

The background features a complex network of light blue lines and nodes, overlaid with several semi-transparent gears of varying sizes. The NIST logo is prominently displayed in the center-left. To its right, the text 'National Institute of Standards and Technology' is partially visible, with 'logy' being the most legible part. Below this, 'U.S. Department of Commerce' is also partially visible. The overall aesthetic is technical and futuristic.

| Sharon Laskowski, Ph.D. | Deputy Chief, Information Access Division |
| Kevin Mangold | Computer Scientist |
| Mark Przybocki | Chief, Information Access Division |
| Karen Reczek | Social Scientist |

Promoting Access to Voting Executive Order 14019

Section 7: Directs NIST to analyze barriers to private and independent voting and publish recommendations.

**Voter Registration &
National Voter
Registration Form**

Vote By Mail

Voting Technology

Polling Locations

Poll Worker Training

**Additional areas as
identified**

TIMELINE OF NIST'S EFFORTS

INFORMATION COLLECTION

COMPLETED:
March - July

- Discussions with stakeholders
- Review of publications, reports, and resources

REQUEST FOR INFORMATION

COMPLETED:
June - July

- NIST published 20 statements in the Federal Register
- Received 171 relevant responses

REQUEST FOR PUBLIC COMMENT

IN PROGRESS:
October - November

- NIST will publish draft document in the Federal Register for Public Comment

FINAL PUBLICATION

DUE DATE:
December 2

- NIST will publish a final report

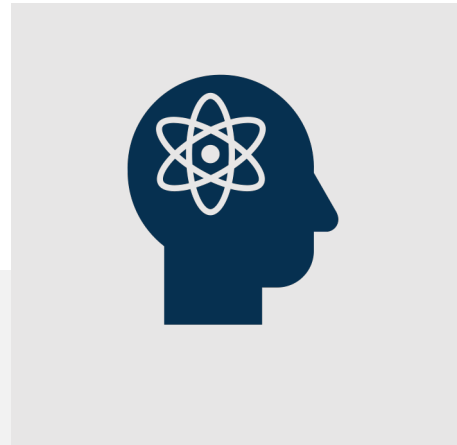

RFI RESPONDENTS

NIST received 171 relevant responses.

DISABILITY ADVOCACY GROUPS

46 advocacy groups and
associations

OTHER ORGANIZATIONS

3 vendors, 1 professional
society, 1 policy institute

GOVERNMENT

4 government
organizations across
federal, state, and
local level

INDIVIDUALS

116 individuals, largely voters
with disabilities or caregivers

RFI THEMES

1. **Privacy, independence, and equal access are of utmost importance to voters with disabilities.**
2. **Many barriers exist for voters across a wide range of disabilities.**
3. **More choices mean more accessibility and better design for all voters.**
4. **Multiple standards, laws, guidelines, and best practices exist that increase accessibility.**
5. **Accessibility and cybersecurity must work together.**

DRAFT REPORT OVERVIEW

≡

Sec. 1 Introduction

Sec. 2 Systemic Barriers to and Recommendations for Voting Accessibility

Sec. 3 Voter Registration and the National Mail Voter Registration Form

Sec. 4 Vote by Mail

Sec. 5 Voting Technology

Sec. 6 Polling Locations

Sec. 7 Poll Worker Training

SYSTEMIC BARRIERS

1. **Struggles to meet federal standards, laws, and guidelines that address accessibility for voters.**
2. **Gaps in accessible communication and information.**
3. **Inaccessibility of paper.**
4. **Design of security solutions may not consider accessibility.**
5. **Extra obstacles encountered by voters with disabilities.**

SYSTEMIC RECOMMENDATIONS

- 1. Create guidance to help address meeting federal standards, laws, and guidelines.**
- 2. Improve dissemination, outreach, and accessibility of voting information.**
- 3. Provide accessible options for the voting process.**
- 4. Integrate the disability community into all aspects of voting.**
- 5. Conduct research and development to promote access to voting.**

PUBLIC COMMENT PERIOD

Public comment period opens in October for 30 days

See announcement and how to comment:

- Federal Register
- NIST's Voting web page
