Subject Election Training-All Hands

Julie, Brian, and I have worked out the following training schedule. This training is important for all hands because questions will come in before and after election day, as well as on election day.

Except for Wednesday, October 27, all training sessions will be held in EAC's big meeting room from 11:30 AM - 12:30 PM. The time and location of the October 27 will be announced later, once we have figured out where we can hold it.

**Wednesday, October 20**

*Election Fraud, Voting Rights Issues, HAVA Administrative Complaint Procedures - Julie Thompson*

**Friday, October 22**

*NVRA Fail-safe Voting Provisions, Voter ID Requirements, Provisional Voting - Peggy Sims*

**Wednesday, October 27**

*Voter Assistance, Access for Disabled Voters, HAVA Voter Information Postings, Other Polling Place Issues (Campaigning, Exit Polling, Poll Hours, Time Off to Vote) - Peggy Sims*

**Friday, October 29**

*Reporting and Certifying Election Results, Contested Elections & Recounts, Electoral College - Brian Hancock*

Please feel free to bring your lunch and your questions.

Subject Commissioner approval (by 2/25) of contracting process for work on Provisional Voting and Voter ID projects

Commissioners-

As was discussed during our session on February 17, 2005, please *review and provide your approval, disapproval or amendments* to the following items by Friday, February, 25, 2005:

1. The attached Scope of Work which outlines the tasks related to contract work around projects relating to voluntary guidance on provisional voting and voter identification procedures.
2. The proposal will be advertised beginning **February 28, 2005.**
3. The deadline for submitting proposals will be **March 14, 2005.**
4. Proposal review will be completed by EAC staff by **March 17, 2005**
5. Staff will recommend a contractor to the Commissioners on **March 18, 2005.**
6. Commissioners will be asked for their decisions no later than **Tuesday, March 22, 2005**

PROVIDING EAC ASSISTANCE IN DEVELOPING VOLUNTARY GUIDANCE ON PROVISIONAL VOTING AND VOTER IDENTIFICATION PROCEDURES

0.0 Contract Title: Assistance to the U.S. Election Assistance Commission in the Development of Guidance on Provisional Voting and Voter Identification Procedures

1.0 Background: Sec. 302(a) of HAVA requires that all States allow the casting of provisional ballots in instances where a voter declares their eligibility to vote but their name does not appear on the official list of eligible voters, or an election official asserts that a voter is not eligible to vote. This section describes several requirements for implementation of provisional voting, but the States have considerable latitude in specifying how to carry out these requirements. The EAC seeks to examine how provisional voting was implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 Federal elections.

HAVA Sec. 303(b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC seeks to examine how these voter identification requirements were implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 elections.

One of the remedies for a voter not having an acceptable proof of identity is to allow the voter to cast a provisional ballot, either at the polling place or by mail. This linkage between these two HAVA sections provides a rationale for conducting research on these topics in parallel. However, it is anticipated that two separate guidance documents will result.

2.0 Objective: The objective of this contract is for EAC to obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics for promulgation to the States in time for implementation for the 2006 Federal elections. The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

3.0 Scope: In general the Contractor shall be responsible for all research and analysis activities, including the conduct of public hearings for fact finding and public comment purposes. However, in light of the urgent need to get this work underway, the EAC has scheduled a public hearing on February 23, 2005, on the topic of provisional voting.

028329

An initial framework for provisional voting policy has been set by the court decisions rendered on the election procedures utilized in the 2004 election. The 6<sup>th</sup> Circuit decision, in particular, has drawn some boundaries which must be given due regard in the course of considering future policy alternatives for provisional voting.

Notice of public meetings and hearings is required to be published in the Federal Register. The Contractor shall be responsible for preparing the notice documents, and the EAC will submit the notices and cover the cost of publication. In addition, draft guidance documents must be published in the Federal Register to obtain public comment prior to their adoption. Again, the Contractor will work with the EAC to prepare the draft documents for publication, which the EAC will submit and cover the cost of publication. Comments received will be provided to the Contractor for analysis and incorporation into the final guidance documents, as appropriate.

#### 4.0 Specific Tasks

For ease of reference, following task 4.3 the remaining tasks are listed separately under the headings of Provisional Voting and Voter Identification Requirements. It is understood that the work on these two topics will be conducted essentially concurrently, with Voter Identification activities starting approximately one month after Provisional Voting.

- 4.1 Prepare a project work plan. The Contractor shall prepare and deliver a brief Project Plan not later than 10 days after contract award. This plan shall describe how the Contractor will accomplish each of the project tasks, including a timeline indicating major milestones. A single document will be prepared to include both provisional voting and voter identification tasks. The Plan shall be presented at a project kickoff meeting with the EAC Project Manager.
- 4.2 Submit monthly progress reports. The Contractor shall submit a monthly progress report within 2 weeks of the end of each month. This report shall provide a brief summary of activities performed and indicate progress against the timeline provided in the Project Plan. Any issues that could adversely affect schedule should be identified for resolution. Budget status should also be provided.
- 4.3 Conduct periodic briefings for the EAC. The Contractor shall periodically meet with the EAC Project Manager and the lead Commissioner for this work to discuss research findings and progress. The Project Plan should make allowance for this activity. The number and frequency of briefings will be determined by the Contractor Project Manager and the EAC Project Manager as the work progresses. The Contractor may also be required to periodically brief the full Commission on their work.

#### Provisional Voting

- 4.4 Collect and analyze State legislation, administrative procedures, and court cases. An understanding of the disparities and similarities of how provisional

voting was implemented around the country will provide a baseline for the consideration of future approaches. Seventeen States never had provisional voting before HAVA was enacted, while many other States did. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

- 4.5 Recommend alternative approaches for future implementation of provisional voting. The Contractor shall conduct a literature review to identify other research results and data available on this topic. The EAC Election Day Survey, for example, contained several questions on provisional voting. The EAC will make these survey data available to the Contractor. Based on their analysis of available research and the results of Task 4.5, the Contractor shall diagnose the problems and challenges of provisional voting implementation and hypothesize alternative approaches.

The Contractor shall assess the efficacy of these alternatives in relation to the following inter-related policy objectives: (1) enabling the maximum number of eligible voters to cast ballots that will be counted; (2) providing procedural simplicity for voters, poll workers, and election officials; (3) minimizing opportunity for voter fraud; and (4) maintaining a reasonable workload for election officials and poll workers. Additional policy considerations may be identified in the course of this research effort. The Contractor shall document and brief these alternatives to the Commission.

- 4.6 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors. EAC will convene a Board of Advisors meeting or teleconference for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.
- 4.7 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC and the Board of Advisors and provide the draft guidance for publication in the Federal Register by the EAC.
- 4.8 Arrange one public hearing for receiving public comment on draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. No speakers will be required. EAC will handle publicity for the meeting
- 4.9 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.

## Voter Identification Requirements

- 4.10 Collect and analyze State legislation, administrative procedures, and court cases. It is assumed that the collection of information for analysis of voter identification requirements will be performed concurrently with the research for Task 4.5. An understanding of the disparities and similarities of how voter identification requirements were implemented around the country will provide a baseline for the consideration of future approaches. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.
- 4.11 Convene a half day public hearing on the topic of voter identification requirements. The Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC. The Contractor shall identify three panels of three to four speakers each. The Contractor shall arrange for speaker attendance to include travel and per diem expenses. The EAC will provide publicity for the hearing. The Contractor shall prepare a document summarizing the proceedings and containing all testimony provided.
- 4.12 Recommend alternative approaches for future implementation of HAVA voter identification requirements. The Contractor shall conduct a literature review to identify other research results and data available on this topic. Based on their analysis of available research and the results of Task 5.11, the Contractor shall diagnose the problems and challenges of voter identification and hypothesize alternative approaches. The Contractor shall coordinate with the EAC to identify appropriate policy objectives by which to assess these alternatives. The Contractor shall document and brief these alternatives to the Commission.
- 4.13 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors. EAC will convene a Board meeting or teleconference for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.
- 4.14 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC and the Board of Advisors and provide the draft guidance for publication in the Federal Register by the EAC.
- 4.15 Arrange one public hearing for receiving public comment on the draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. No speakers will be required. EAC will handle publicity for the hearing.
- 4.16 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.

4

Contract Type. The contract type will be Time and Materials with a ceiling of

6.0 Place of performance. The principal place of performance will be the Contractor's place of business. Meetings and occasional work efforts may be performed at the EAC offices.

7.0 Period of Performance. The period of performance is from date of award until October 28, 2005.

8.0 Schedule of Deliverables:

- Project plan – 10 days after contract award
- Progress reports – monthly
- Briefings – as required
- Analysis report on provisional voting - TBD
- Alternatives report on provisional voting – TBD
- Preliminary draft guidance on provisional voting - TBD
- Draft guidance on provisional voting for publication – 8/2005
- Public hearing on draft guidance – 30 days after publication
- Final guidance on provisional voting for EAC adoption – 9/2005
- Analysis report on voter identification requirements – TBD
- Public hearing on voter identification requirements – TBD
- Summary of voter identification requirements hearing - TBD
- Alternatives report on voter identification requirements - TBD
- Preliminary draft guidance on voter identification requirements - TBD
- Draft guidance on voter identification requirements for publication – 9/2005
- Public hearing on draft guidance – 30 days after publication
- Final guidance on voter identification requirements to EAC for adoption – 10/2005

REMAINING STANDARD CONTRACT TERMS TO BE PROVIDED.

Subject RE: Peer Review Group 

Tom-

Had a very good review and discussion of the PRG at this morning's Commissioner meeting.

Also, the Commissioners have marked their calendars for a conference call with the Eagleton/Moritz team on July 12 at 9:30 AM.

Several concerns were raised about the composition of the PRG and, after some discussion, I indicated that Eagleton will provide the EAC with a revised participant list, and with a more detailed description of the PRG's mission, goals, objectives, workplan and timelines for accomplishing its work.

The Vice Chair is concerned that there is not sufficient conservative representation on the PRG. I would suggest the team do more research to identify well-recognized conservative academics to put on the Group.

Further, the Commissioners recommend a tiered process in which the PRG will prepare a "dispassionate" analysis of the issues and draw some tentative conclusions. This analysis and these conclusions will then be vetted with a defined/select group of local election officials, and then, with a defined/select group of advocacy organizations.

It was also suggested that a final round of focus group meetings be held with a cross-section of these election officials, advocates and academics for an overall interactive reaction to the analysis and recommendations.

Hope this helps clarify concerns; I look forward to sharing your revisions to the PRG with them.

**Subject:** Re: Peer Review Group

Tom-

I will be back to you early next week with EAC's feedback on this.

Our initial reaction is that the group needs to include some local and/or state-level election officials, who have first-hand experience with these issues.

We will get you additional names and reactions by mid-week next week.

Thanks

Subject Peer Review Group

Karen,

As you probably recall, one of the features of our proposal was the creation of a Peer Review Group to look over our findings, conclusions and draft reports before we prepare final drafts for the EAC's review. The EAC asked that before recruiting members of the PRG we submit names for EAC's review. The aim, course, is to assemble a panel that is experienced, informed, and

028337

balanced.

Attached is a list of potential PRG members drawn from academia, the law, and non-profit organizations with interests in this area. Please look it over.

We may conclude that the PRG should also include two or three former government officials now in academia or related fields. We have a conference call with our partners at Moritz planned for tomorrow or Friday to decide a) if former officials should be included in the PRG and b) if so, who they should be. I'll keep you informed of our thinking as it develops.

Subject Eagleton Institute June 2005 Progress Report

Ms. Dyson,

Attached please find the June 2005 Progress Report for the project entitled, "Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures." If you have any questions regarding any part of this document please direct them to Tom O'Neill at [REDACTED] or (908)794-1030.

The financial reporting for this project is performed by the Division of Grant and Contract Accounting at Rutgers University. A copy of this report was not made available to us in an electronic format. Hard copies of the Progress Report and Financial Report have been Fedex'ed to you this afternoon and should arrive to your attention tomorrow morning. Please let me know if you do not receive this package by tomorrow afternoon.

Thank you for your time, have a great evening.

Best,

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.4
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from the start of the project on May 26 through June 30, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

The objective of the contract is to assist the EAC in the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements on which to base policy recommendations as guidance for the states in the conduct of the 2006 elections. The work has begun well, thanks to the clarity of the EAC's expectations and the strong collaboration by the scholars and staff at the Eagleton Institute of Politics at Rutgers, The State University of New Jersey, and the Moritz College of Law at the Ohio State University.

The document report is divided into 4 sections that cover: Provisional Voting, Voter Identification Requirements, Project Management, and the Financial Report. Each section references the specific tasks described in paragraph 3 of the contract.

Please direct any questions or comments about this report to Tom O'Neill at: [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net) or (908) 794-1030.

## PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. The work plan provides for two months to complete Task 3.4. Work on this task is on schedule.

**Task 3.4: Collect and analyze state legislation, administrative procedures, and court cases. Understand the disparities and similarities of how provisional voting was implemented around the country.**

### LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task. It also will provide a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team includes faculty, an executive administrator, a reference librarian, and several research assistants. It began immediately to compile statutes, case law and administrative procedures regarding Provisional Voting. The team has created a 50 state chart to summarize information on provisional voting. Categories for which state statutes and administrative procedures are being reviewed include:

- *When did the state create a system compliant with the HAVA provisional ballot requirements?*
- *Who may be eligible to cast a provisional ballot? and*
- *What is the process for discovering whether your provisional ballot was counted in the election?*

**Progress:** Initial research for 27 states, including the collection of provisional voting statutes is complete. This phase of the work is on schedule for completion by August 1. By the beginning of the week of July 11, Moritz's full time research assistant will move from voter identification research to gathering and organizing case law on provisional voting.

**Challenges:** Identifying the relevant statutes has been challenging; states use different terminology to codify provisional voting issues. Many states have scattered election law provisions throughout their codes. This variation from state to state makes creating a snapshot view across states a challenge. The team is meeting this challenge, and the work is on schedule.

028344

### PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team is constructing a narrative description for each state of the 50 states and the District of Columbia. It is also surveying a stratified random sample of county election officials to improve its understanding of actual practice in administering provisional voting.

**Description:** To construct the narratives, a researcher is examining newspaper accounts, state websites, and reports from third-party organizations to determine what information is publicly available about these issues during the 2004 election. To organize the information derived from this examination, we are creating an information system that will make it possible to catalog the basic information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combine it with Moritz's collection and analysis of statutes, regulations and litigation. The information system will make it possible to provide answers to such topics of particular interest listed in the contract as: "How did preparation for provisional voting vary between states that had some form of provisional voting and those that did not?" and "How did litigation affect implementation?"

**Progress:** The researcher in this area has identified sources of information for every state and the collection process is well underway. Verified database entries for 24 states are complete, as are two state narrative summaries. This phase of the research is on schedule for completion by the end of July.

**Challenges:** A key challenge is determining just what states actually did in practice to verify and count provisional ballots. A second challenge has been determining the variations in policy within individual states. We are still wrestling with resolving this challenge, but the work is on schedule.

**Work Plan:** By the end of the July, the compilation of statutes, administrative regulations, and litigation will be complete and ready to be combined with the state-by-state narrative compiled by Eagleton. That will form the basis for the analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

### SURVEY OF COUNTY ELECTION OFFICIALS

This survey will help the research team understand more about such key topics of interest as:

- "How did the experience of provisional voting vary between states that previously had some form of provisional voting and those where provisional voting was new in 2004?"
- "Did state and local processes provide for consistent counting of provisional ballots?"
- "Did local officials have a clear understanding of how to implement provisional voting?"

The survey results will supplement the information on these topics from the compilation of statutes, regulations and cases and from the narrative we are constructing for each state.

028345

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton is conducting a national survey of county election officials to measure several aspects of provisional voting. The survey is designed to determine the following factors related to provisional voting at the county level:

- The content and quality of instructions provided to county officials by the states
- The steps taken by county officials to pass information on to poll workers;
- Differences in experience between states new to provisional voting and those that had some form of provisional ballot before HAVA; and
- Recommendations to improve and/or reduce the need for provisional voting

**Progress:** The survey instrument is complete. CPIP has compiled a list of election officials at the county level and at the municipal or regional level for states that do not assign the election responsibility to counties. It was forwarded to the call center, Schulman, Ronca & Bucuvalas Inc., (SRBI) the week of July 5, 2005. A sample will be drawn the week of July 12. Human Subjects Approval from Rutgers University was granted July 12. Pre-notification letters will be sent to election officials around July 12-13, 2005. The EAC has reviewed a draft of this letter, which we have now revised to make clear that the survey will increase our understanding of the provisional voting process, but is not being conducted on behalf of the EAC.

**Challenges:** We made special efforts to expedite Human Subject Approval to meet the schedule in the work plan. In the absence of an existing, reliable database of local election officials, we had to create one especially for this project. In order to provide a valid comparison between the states new to provisional voting with those that previously had some form of provisional ballot we doubled the sample size from 200 to 400. This increase will require an increase in the budget for the survey from \$15,000 to about \$24,000. We intend to reallocate costs within the existing budget to make this improvement possible, and will submit a letter describing the reallocation to the EAC in mid-July.

The sample has been, and will continue to represent the biggest challenge in this survey. Compiling the sample required substantial coordination and research to determine the accuracy of the identity and contact information for potential respondents. The difficulty in determining the appropriate contact is attributed to variation in county election officials' titles, jurisdiction types, and state and county election structures across the country. In addition to the potential pitfalls of reaching the appropriate county official, another factor in actually making contact with this special population will be dependent upon the hours that they keep, and may be hindered by the summer season.

**Work Plan:** This questionnaire will be pre-tested by July 15, and will field July 18 through August 5, 2005. This is somewhat later than projected in the revised work plan, but the information will arrive in time to be considered in drafting the analysis and alternatives document required under Task 3.5.

028346

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. During the reporting period, we have made substantial progress in the first two tasks, which constitute the information-gathering phase of the work on Voter ID. The research of Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** A team of Election Law@Moritz faculty, executive administrator, a reference librarian, and several research assistants is compiling statutes on Voter Identification, and providing a summarized analysis of this research.

**Progress:** The Moritz team has created a 50-state chart to record data on voter identification. Categories for which state statutes and administrative regulations are being reviewed include: “*Who is required to present ID*”, “*Types of ID required*”, and “*Consequences of having no ID*”. We have completed the initial research for 45 states and have collected the voter identification statutes for those states. An *Election Law@Moritz* Fellow is conducting an academic literature review on voter identification. This literature review will help shape the analytical framework that will guide us when the compendium of statutes and administrative regulations is complete.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Projections:** At the current rate, a draft of the voter identification chart should be complete on schedule, by the end of July. Work on the literature review will continue into August, but will be available to inform the analysis of alternative approaches for voter identification called for by Task 3.12 of the contract.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter in the states; and second, estimating the effect on turnout of voter id requirements. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern with more rigorous identification requirements for all voters. We are following these developments both to

028347

monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with increasing the rigor of voter ID requirements. This work is on schedule to be completed by the end of July. The next key milestones will be the completion of the state database and drafting the first narratives.

### **VOTER ID AND TURNOUT ANALYSIS**

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election. Analysis on the county-level will enable us to estimate the influence of ID requirements on various age groups, races, ethnicities and gender groups. We are compiling data from both the 2000 and 2004 Presidential elections to measure the effect that changes in ID requirements may have had on voter turnout through two national election cycles.

**Progress:** The structure of the database is complete. It contains demographic information from the Census, and turnout data from various sources. The researcher assigned to this task is devising the syntax that will be required to run the statistics when the dataset is complete. The methodology for this part of the study is complete, and the actual data collection will soon be finished.

**Projection:** We are waiting for the Census Bureau to release the 2004 County Demographic Estimates. We have ordered and await the arrival of 2 datasets that contain voter turnout and voter registration numbers on the county-level for both the 2000 and 2004 elections. Once these two sources of information are received, the researcher will insert this information into the existing database, clean up the dataset, and begin to run the statistics. By that point, the researcher will have separated the states into various ID-requirement groupings that have been determined by the team, which will require coordination with several other parts of the study. This work is on schedule. By the end of July, the researcher should have county-level and state-level statistics on the impact of each ID system upon turnout, analyzed through various demographic features on the county-level.

028348

### Task 3.11 Public meeting on Voter Identification Requirements

**Description:** We are working closely with EAC staff, particularly the General Counsel, to plan a half day public meeting on Voter ID requirements. Presentations at the meeting will form an important part of the information we are compiling about Voter ID requirements and the strengths and shortcomings of a range of alternative approaches.

**Progress:** We have recommended a focus on the debate over Voter ID now underway in the states. To provide a vivid picture of the debate, we have recommended that one panel include legislators on opposite sides of the issue from two different states. Our research identified Mississippi and Wisconsin as two states to focus on, and we have recommended specific legislators from each. We have discussed with staff adding a researcher to the panel to put the debate in Wisconsin and Mississippi in either a national or historic context. We also recommended two researchers from contrasting points of view, to address the effects of Voter ID provisions under HAVA and broader provisions that are now the subject of national debate. EAC staff recommended a panel of two state election directors to address the interaction of Voter ID with HAVA. We are awaiting a decision on our recommendations from EAC staff. We have no reason not to believe that the work is on schedule to be completed in time to organize a productive meeting on July 28.

**Challenges:** The date and location of this hearing has been changed twice since the beginning of the project. It was originally scheduled to take place in late June, but was rescheduled for July to allow the June hearing to focus on voting machine technology. The regular meeting was rescheduled for July 26 in Minneapolis, and was recently changed to July 28 in Pasadena. The changes in the scheduling of the July meeting have complicated our choice of panelists. More seriously, the changes mean that information from the hearing will not be available as early in the research process as contemplated in the contract. This timeframe will now require the team to summarize the hearing events at the same time that we are drafting the analysis and alternatives paper in early August.

Additionally, while our contract states that the "Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC," we have been asked only to make recommendations of topics and panelists, and the arrangements for the organization of the hearing are in other hands. This lack of clarity has caused some confusion and has delayed invitations to panelists. Thanks to frequent communication with members of the EAC, the process now seems to be working smoothly.

**Projection:** We believe the work is on schedule for completion in time to recruit the panelists for the July 28 hearing. Preparation of the hearing summary will likely be delayed because of the need to complete the analysis and alternatives paper.

028349

## PROJECT MANAGEMENT

Immediately after announcement of the award of the contract, Eagleton and Moritz began supplementing the core group that had prepared to proposal to building a highly qualified team to undertake the work. That team was in place by mid June, just a few weeks after the contract award.

As described in the proposal, the direction of the project is the responsibility of a five-person committee of faculty and staff from Eagleton and Moritz, chaired by Dr. Ruth Mandel, Director of the Eagleton Institute of Politics. Project Director Thomas O'Neill, a consultant to Eagleton, reports to this team and provides day-to-day guidance and coordination for the research. A weekly meeting of all the researchers engaged in the project is the primary means of coordinating the work. We have recently added an internal website to facilitate the review and revision of written materials.

### Task 3.1 Update the Work Plan

The first task was completed on time with the submission of a detailed work plan and timeline. EAC staff requested that the work plan be supplemented with a Gantt chart created on MS Project, and we submitted that a few days later.

### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The EAC indicated at our first meeting in May that it would review our recommendations for members of the PRG. Our initial vision of the PRG was a small group of scholars and representatives of advocacy organizations that would comment on the research design, review drafts of our analyses and reports, and, in general, identify areas of the research that should be strengthened and help us improve the breadth, depth and clarity of reports based on that research.

**Progress:** Upon reflection, the project team agreed that the PRG should not include representatives of advocacy groups. We concluded, as representatives they would feel obligated to act as advocates for positions already taken by their groups. While advocacy organizations should be consulted as stakeholders during the course of our work, they were unlikely to achieve the goals we had in mind for the PRG as a source of advice on research design, methodology, and analysis. We submitted a revised list of potential members, substantially comprised of academics, to EAC for review.

The EAC responded with suggestions concerning both the balance of the PRG's membership and the creation of additional committees to review our work. We answered with an analysis of the cost and time involved adopting the EAC's suggestions as well as with suggestions for a balanced selection of academics for the Peer Review Group. We have not received response on this correspondence from the EAC, and the recruitment of the group is on hold.

028350

**Challenges:** Communications on this issue with the EAC have not been clear or timely. The PRG should be in place now to comment on our research design while there is still time to refine it. While we are confident in the quality of our work, the wisdom and perspective of the outstanding candidates we have proposed for membership would strengthen the analysis and reports of our work.

**Projections:** We have effectively brought these challenges to the attention of EAC staff and look forward to a resolution speedy enough to allow recruitment of the PRG's members before the end of the month. If we meet that goal, the work of the PRG will be about 2 weeks behind the milestones indicated in the work plan.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and a website for easy access to drafts and reports.

#### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law will be merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** The Moritz team has provided Eagleton staff with samples of the work that they are performing. An Eagleton staff member will be reviewing the content and formats of data from all supporting research and (re-)formatting once the work has been completed. The researchers and staff at Eagleton have created a shared folder on the Institute's server for the safe storage of work and access for those staff members. All of this work is being reviewed by the project team to ensure that a broad survey is being performed.

**Challenges:** There are no evident challenges to this task at this time.

**Projections:** By the end of July 2005, much of the above referenced research will have been completed with respective materials and charts near completion. At that time, staff at Eagleton will review, combine and format all documents and materials in preparation for our final reporting to the EAC.

#### INTRANET

**Description:** A trial Intranet for the project became available during the week of June 26. The Intranet will facilitate the exchange of information and collaboration among project participants.

**Progress:** After meetings with staff members of Rutgers University Computer Services (RUCS) and subsequent submission of a proposal by RUCS for technical support and hosting of the Intranet and the evaluation of alternative commercial services, the project team decided at its June 28<sup>th</sup> meeting to publish the Intranet through [www.intranets.com](http://www.intranets.com),

028351

one of the leading commercial services. This decision was based on lower costs and earlier publication schedules than offered under the RUCS proposal. The Intranet services were evaluated during a free trial period, which demonstrated the ease of design and navigation of the proposed service.

**Challenges:** There are no immediate challenges to completion of this task by the timeframe specified below.

**Projections:** Design, testing and publication of initial content of the Intranet service is continuing, with all participants expected to be provided access by July 8, 2005.

#### FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Given that the report reflects the first month of the project, several procedures for payment of subcontractors on the project were initiated. Expenses related to those members of the team are not reflected in this report because they have not yet been incurred.

Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project inception through June 30, 2005, is attached.

Job-

I write to see if you might be available to come to Washington on Monday, August 1 to meet with several EAC staff and Commissioners to discuss the voter fraud/voter intimidation project and your possible work as a consultant on the project.

I'd like to schedule this 1-2 hour meeting for sometime between 1 and 3 in the afternoon.

Might you be available to come to Washington for this ?

## U.S. Election Assistance Commission Public Hearing Agenda

Thursday, July 28, 2005  
1:00 P.M. – 5:00 P.M.

*Public Hearing on the EAC's Proposed Voluntary Voting System Guidelines*

**Call to Order** (Chair Hillman) (1:00)

**Pledge of Allegiance** (Chair Hillman) (1:01)

**Roll Call** (1:03)

**Adoption of Agenda** (Chair Hillman) (1:05)

**Presentations on Proposed Voluntary Voting System Guidelines**  
(1:07)

**Introduction of Proposed Voluntary Voting System Guidelines**  
(Carol Paquette) (1:10 - 1:20)

**Panel 1: State Election Officials** (1:20 – 2:30)

- Brad Clark, Assistant Secretary of State, Elections, CA
- Ann McGeehan, Director of Elections, TX
- Linda Lamone, President, National Association of State Election Directors

**Break** (2:30- 2:40)

**Panel 2: The Academic Community** (2:40 – 3:40)

- Thad Hall, Ph.D., Assistant Professor, Political Science, University of Utah
- Ted Selker, Ph.D., Associate Professor, Massachusetts Institute of Technology, Media and Arts Technology Laboratory
- David Dill, Professor of Computer Science, Stanford University

**Break** (3:40 - 3:50)

---

**Panel 3: Use of Wireless Technology in Voting (3:50 – 4:20)**

- Stephen Berger, TEM Consulting & Chair of IEEE Standard Coordinating Committee 38

**Break (4:20 – 4:30)**

**Public Comment Period (4:30 – 5:00)**

This time period will be reserved for public participation. Pursuant to the public notice for this hearing, members of the public or organizations who have previously contacted the EAC will be given three minutes of hearing time for comment. All such groups and persons have pre-registered and been contacted regarding their participation. Comments will be strictly limited to three minutes to ensure the fullest participation possible.

**Commissioners' Closing Remarks**

**Adjournment**

Subject Conference call to "interview" potential voter  
fraud/intimidation consultants

Hi All-

Well, I have the unhappy task of trying to identify a date and time when we might schedule a series of conference calls with the consultants we've identified as possible candidates to work on the voter fraud/intimidation project.

Since August is impossible and horrible in terms of everyone being in the same place, I thought it might be easier to try and schedule three calls--one hour each in duration-- in which the Commissioners could talk to these candidates.

I'd like to "start the bidding" for the week of August 15.

Actually, I happen to know that all of the candidates could be available August 22 or 23 at some point in the day.

Let me know if your folks could be available by phone at any of these days and times.

Thanks

Tom-

I will be in touch shortly with possible dates in very late August or early September, when EAC staff might be available to meet with Eagleton to discuss the project's research results and next steps.

In the meantime, I thought it was important to follow up on the issues Vice Chair DeGregorio raised while we were in Pasadena.

To be certain that I have the latest information, could you send to me the final list of the Eagleton/Moritz Peer Review Group and the list of organizations that Eagleton will be contacting for input?

Regards-

Subject RE: Meeting with EAC

Karen,

Thanks for the email. No need to resend the original email from Washington. I received that shortly after you sent it. That email let us know that EAC would not need the research on ballot design that Tom Wilkey suggested we undertake and that you asked us to submit a proposal for. But the ballot-design issue was only one of the two topics raised by my email to you. The other question concerned a date to meet with EAC staff to discuss the forthcoming draft of our Analysis and Alternatives paper and an outline for the Preliminary Guidance Document. From our conversation yesterday, I understand that August 26, the date suggested, will not work because of the EAC's travel schedule. Please let me know if August 30, 31 or September 1 are possible for a meeting between the project team and EAC in Washington. The meeting would require perhaps 2 hours.

Tom O'Neill

Privilege**

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.4
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from July 1 through July 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

The effort this month continued to focus on research for the analysis and alternatives paper, including the compilation of Provisional Voting statutes, regulations, and litigation from the 50 states. We also prepared and delivered testimony at the EAC's regular monthly meeting in Pasadena on July 28.

The data collection, analysis, and compilation are all on schedule. Because of delays in agreeing on the composition of the Peer Review Group with EAC, however, the actual completion and submission of the analysis and alternatives paper to the EAC will most likely be delayed about a week beyond the target date in the work plan. We are scheduled to discuss the draft paper and guidance document prior to submission, with the EAC on September 6, and the final draft cannot be completed until several days after that date.

The document report is divided into 4 sections that cover: Provisional Voting, Voter Identification Requirements, Project Management, and the Financial Report. Each section references the specific tasks described in paragraph 3 of the contract.

Please direct any questions or comments about this report to Tom O'Neill at: tom\_oneill@verizon.net or (908) 794-1030.

## **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed this month.

**Task 3.4: Collect and analyze state legislation, administrative procedures, and court cases. Understand the disparities and similarities of how provisional voting was implemented around the country.**

### **LEGISLATION, REGULATIONS, AND LITIGATION**

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It also will provide a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on provisional voting, compiled statutes, case law and administrative procedures regarding Provisional Voting.

**Progress:** The 50-state (plus District of Columbia) chart created to collect data on provisional voting is complete. We have collected the statutes for all states. State by state summaries of provisional voting have been written for 47 states and D.C. A memorandum summarizing provisional voting litigation is complete. The collection of the documents associated with the litigation is nearing completion.

**Challenges:** The variety in the form of provisional voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The remaining 3 state summaries of provisional voting will be completed by August 8. Analysis of all the information, data, and survey results concerning provisional voting data will be performed in August.

### **PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING**

The Eagleton team has researched and compiled a narrative of each state's experience with provisional voting in 2004. At the end of July the survey of 400 local election officials was nearing its end, and – as of this writing – is now complete with an analysis and report in draft form. We will rely on the survey results to improve our understanding of actual practice in administering provisional voting, including the steps local officials took to prepare for the election.

## PROVISIONAL VOTING NARRATIVES

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with provisional voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** The state-by-state database is complete, as is a first draft of all state narratives. This work has been shared with the larger team and is being reviewed currently in preparation for constructing analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

**Work Plan:** In the next month, revisions of the narratives will be complete. In addition to this research, we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms.

## SURVEY OF COUNTY ELECTION OFFICIALS

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton conducted a national survey of county election officials to measure several aspects of provisional voting. The survey was designed to determine the following factors related to provisional voting at the county (or equivalent election jurisdiction) level:

- The content and quality of instructions provided to county officials by the states;
- The steps taken by county officials to pass information on to poll workers;
- Differences in experience between states new to provisional voting and those that had some form of provisional ballot before HAVA; and
- Recommendations to improve and/or reduce the need for provisional voting.

**Progress:** The fielding and initial analysis of the survey results are complete.

**Work Plan:** The information derived from the survey will be considered in drafting the analysis and alternatives document required under Task 3.5.

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. During the reporting period, we have completed tasks 3.10 and 3.11. The research on Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The chart created to collect data on voter identification is complete and is now being reviewed. Voter identification statutes are being collected.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** Review of the voter identification chart, the collection of the voter identification statutes, and the writing of the state by state summaries will be completed by the end of August.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of voter ID requirements. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern with more rigorous identification requirements for all voters. We are following these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern

with increasing the rigor of voter ID requirements. The next key milestones will be the completion of the state database and drafting the first narratives.

### **VOTER ID AND TURNOUT ANALYSIS**

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. It also contains exit poll data from the 50 states, providing demographic data of voter turnout. The analysis of that data is well underway.

**Challenges:** The initial methodology that was devised to investigate the questions involved in this part of the study proved insufficient, as the necessary data was unobtainable (the Census Bureau has not yet released their 2004 data). After re-developing an appropriate methodology, the necessary data has been assembled, we have resumed the analysis of this data.

**Projection:** The analysis of the impact that voter identification requirements have upon voter turnout should be completed around mid-August.

### **Task 3.11 Public meeting on Voter Identification Requirements**

**Description:** In early July, we continued our efforts to identify specific Voter ID topics or issues and panelists who could shed light on them. We recommended a focus on the debate over Voter ID now underway in the states. To provide a vivid picture of the debate, we recommended that one panel include specific legislators on opposite sides of the issue from two different states, Mississippi and Wisconsin. We also discussed adding a researcher to the panel in order to place the debate in a national or historical context. We also recommended a panel of two academic researchers with contrasting points of view, to address the effects of Voter ID provisions under HAVA. In response to our suggestions, EAC staff recommended a panel of two state election directors to address the interaction of Voter ID with HAVA.

By mid-July, the EAC had decided which topics and speakers should be invited, however most of those speakers proved unable to attend.

**Progress:** Tom O'Neill and Dan Tokaji attended the EAC Public Meeting held in Pasadena on July 28. Their presentations at the meeting described the progress of the research and our developing perspective on how to assess the quality of the provisional voting process in the states and identify possible steps for improvement.

**Challenges:** The changes in the scheduling of the July meeting delayed and ultimately made it impossible to assemble a panel, from which we could derive substantive insight into voter identification issues as they are playing out in the states. Additionally, due to the date of the hearing, the information from the hearing was not available as early in the research process as contemplated in the contract.

**Projection:** Preparation of the hearing summary will likely be delayed, due to the team's focus on preparation of the analysis and alternatives paper.

## **PROJECT MANAGEMENT**

### **PEER REVIEW GROUP**

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The EAC indicated at our first meeting in May that it would review our recommendations for members of the PRG. Our initial vision of the PRG was a small group of scholars and representatives of advocacy organizations that would comment on the research design, review drafts of our analyses and reports, and, in general, identify areas of the research that should be strengthened and help us improve the breadth, depth and clarity of reports based on that research.

**Progress:** Upon reflection, the project team agreed that the PRG should not include representatives of advocacy groups. We concluded that as representatives they would feel obligated to act as advocates for positions already taken by their groups. While advocacy organizations might be consulted as stakeholders during the course of our work, they were unlikely to achieve the goals we had in mind for the PRG as a source of advice on research design, methodology, and analysis. We submitted a revised list of potential members, substantially comprised of academics, to the EAC for review.

The EAC responded with suggestions concerning both the balance of the PRG's membership and the creation of additional committees to review our work. We provided an analysis of the cost and time involved in adopting the EAC's suggestions as well as with suggestions for a balanced selection of academics for the Peer Review Group. In the end, the EAC determined that Eagleton should appoint a balanced Peer Review Group of its own choosing. Initial phone calls were made to all members of that group by the end of July, and written invitations and descriptions of the process have gone to all possible members who had indicated their interest in serving.

**Challenges:** Communications on this issue with the EAC were not clear or timely. The purpose of the PRG is to review our work, and to comment on our research design, which is well underway. We had planned to have the PRG in place early enough in the project to enable them to provide feedback, including the research design. While we are

confident in the quality of our work, the experience and perspective of the Peer Review Group will strengthen our analysis and recommendations as we find a way to receive its critique in the more limited time now available. The delay in creating the Peer Review Group will result in a delay in the completion of the final draft of the analysis and alternatives paper and in the preliminary guidance document.

**Projections:** The work of the PRG will be about 2 weeks behind the milestones indicated in the work plan.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law will be merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** The Moritz team has provided Eagleton staff with all completed work. An Eagleton staff member reviews the content and formats of data from all supporting research and will (re-)format once the work has been completed for the compendium and reports submitted to the EAC. The researchers and staff at Eagleton have created a shared folder on the Institute's server for the safe storage of work and access for those staff members. All of this work is being reviewed by the project team to ensure that a broad survey is being performed.

**Projections:** By the end of July 2005, much of the above referenced research has been completed. The entire project team has begun the process of reviewing all work, and will combine and format all documents and materials in preparation for our final reporting to the EAC.

### INTRANET

**Description:** All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

**Progress:** Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has been extremely helpful to team members and serves as an internal website with announcements and important documents readily available to all team members.

## FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project inception through June 30, 2005, is attached.

Mr. O'Neill,

Just a quick note to remind you that your meeting with EAC is confirmed for September 6 at 1 p.m. in Washington. The purpose of this meeting will be to review the draft of your analysis and alternatives paper with EAC and discuss the outline and direction of the Preliminary Guidance Document.

Regards,

Nicole K. Mortellito

Tom-

Thank you for sharing this list of your Peer Review Group members, to-date. I will share this list with the Commissioners and will be certain to let your know of their feedback, if any.

I will also be back in touch regarding Eagleton's research around voter fraud and the research project EAC will be undertaking, this fall, around voting fraud and voter intimidation. The EAC is presently in the process of finalizing a work and staff plan for this project and once it is completed, I will be certain to brief you on it.

In the meantime, EAC staff and several of the Commissioners looks forward to meeting with the Eagleton/Moritz team on September 6 at 1:30 PM.

Subject: Re: Fw: AZ DOJ response

Thanks-- we had, and it's good coverage. The AP had a piece as well-- this can be seen as a victory. Has the CHC come out officially on these ID issues? It is my opinion that the movements are being made in state legs. that will apply AZ type laws elsewhere. We obviously have good communications with House Admin and Senate Rules, as well as Whip Hoyer's office, but increased communications with Hill member offices would be helpful, if you have any suggestions.

AP Article:

Feds revise stance on Arizona voter ID requirement

Wednesday, August 31, 2005 7:43 PM PDT

PHOENIX (AP) - Arizona voters may be able to obtain at least a provisional ballot at polling places even if they don't show required identification despite the ID requirement in a ballot measure approved by voters last year. Whether that provisional ballot gets counted is another question.

The U.S. Justice Department in January signed off on election-law changes made by Proposition 200 itself. And a top department official in April signaled that the state would not run afoul of federal law if it put into place procedures to implement the ballot measure's voter ID mandate.

However, a different department official on Thursday wrote the state, saying it was "necessary to clarify our earlier interpretation in order to ensure an accurate representation of the Justice Department's views."

Acting Assistant Attorney General Bradley J. Schlozman's letter to a state official said the federal Help America Vote Act of 2002 requires that a person claiming to be an eligible voter and willing to sign a statement to that effect be given at least a provisional ballot.

However, HAVA leaves it up to states to decide whether a person who casts a provisional ballot is actually eligible to vote and therefore whether a provisional ballot should be counted, Schlozman wrote. Therefore, the state is free to

028377

prohibit the counting of a provisional unless the voter produces proper identification on or after election day, Schlozman added.

Schlozman ended his letter by apologizing "for any confusion generated by our earlier response."

The revised federal position runs counter to polling-place rules which Republican Secretary of State Jan Brewer and other top state officials adopted after months of legal and political wrangling among themselves and with lawmakers after Democratic Gov. Janet Napolitano vetoed two voter-ID bills passed by the Republican-led Legislature.

Reacting to Schlozman's letter, Brewer said she's willing to revise the election rules, now waiting for Justice Department clearance under the Voting Rights Act, to let voters get a provisional ballot even without ID at the polls but not to count that ballot counted unless the voter later shows ID to election officials within a certain number of days.

"If they don't, it doesn't get counted. It's on their back," Brewer said.

In vetoing the bills, Napolitano had argued that HAVA entitled voters to cast provisional ballots and a top gubernatorial adviser said Thursday that the revised Justice Department position supports the governor's view.

"I think they've seen the light," said Napolitano general counsel Tim Nelson.

The Arizona Republic

Federal official upends Prop. 200 voter ID rule

Robbie Sherwood  
The Arizona Republic  
Sept. 2, 2005 12:00 AM

Arizonans who show up to the polls without identification must be given a provisional ballot, a top federal Justice Department official warned Thursday.

That opinion dealt a blow to Arizona's requirement that voters must show identification in order to cast a ballot at the polls, and throws into question rules approved under Proposition 200 to combat voter fraud.

Acting Assistant Attorney General Bradley Schlozman wrote to Secretary of State Jan Brewer Thursday and told her that a voter who shows up to the polls without identification must be given a provisional ballot.

That legal opinion contradicts a key portion of Brewer's much-delayed plan to carry out Proposition 200's voter-identification requirement, which was sent to the Justice Department for approval in early August. That plan, which Attorney General Terry Goddard and Gov. Janet Napolitano also signed off on, said any voter unable to produce proper identification would be turned away and not be allowed to cast a provisional ballot.

Provisional, or contested, ballots are put into sealed envelopes and verified later. They are counted only if the signature on the ballot envelope matches the signature on a person's voter registration.

While the letter said voters must be given provisional ballots whether or not they have identification, it added that state officials can still decide whether to count the ballots. It did not say that state election officials had to count the ballots.

Brewer said she had not seen the letter, but said she would comply with the department's interpretation of the law.

028379

Brewer did not believe the letter meant that the Justice Department would reject Arizona's voter-identification plan. The plan is still under review for compliance with the Voting Rights Act and election officials hope to have the new rules in place before local elections in November.

"My gut instinct is, if that's what DOJ says, then we will give provisional ballots," Brewer said. "But we will also (give voters) three or five days to return to the county elections director with ID before we count those votes. The people said they wanted ID at the polls with Prop. 200. So those votes won't be counted until they bring back their identification. Simple."

Not so simple, said Pima County Recorder F. Ann Rodriguez, one of Brewer's most powerful critics on the voter-identification issue.

Rodriguez said it would be impractical to require voters to travel to county election offices to prove their identity, as well as a logistical nightmare. Maricopa County had over 65,000 provisional ballots in the 2004 election, and Pima County had over 60,000. Rodriguez said election officials already have a method to verify provisional ballots by matching the signature on the ballot envelope with the voter's signature on their registration form.

"Considering gas is now \$3 a gallon, and how far somebody might live from the elections office, are voters really going to do that?" Rodriguez said. "That sounds like a quick response off the top of (Brewer's) head without really thinking it through."

So there could be more battles ahead.

Thursday's letter also contradicted - or "clarified" - a letter sent in April from a different Justice Department official to Brewer. She and other Proposition 200 supporters had used the letter to justify a hard-line stance against providing provisional ballots to voters without identification. Brewer had also used the April letter to chastise Napolitano for vetoing a bill that would have prevented people from casting a provisional ballot at polling places if they didn't have identification.

The letter Brewer received in April raised some eyebrows at the time. It had come from a politically appointed Justice Department official, Sheldon Bradshaw. He had resigned and started a new job as chief counsel for the Food and Drug Administration two weeks before he wrote to Brewer.

Schlozman didn't say why he disagreed with Bradshaw's earlier letter but wrote "we feel it necessary to clarify our earlier interpretation in order to ensure an accurate representation of the Justice Department's views."

Thursday's letter reversed Bradshaw's position and left Napolitano's chief legal adviser feeling vindicated.

"We've said all along that federal law requires provisional ballots and the statute was crystal clear on that," said Tim Nelson, Napolitano's general counsel. "This certainly calls into question whether the DOJ is going to pre-approve the secretary of state's voter manual."

Nelson said Napolitano disagreed with Brewer over denying provisional ballots to those who lacked identification, but backed off because it appeared the idea had the backing of the Justice Department, and Attorney General Goddard had agreed as well.

Goddard said Thursday he was still evaluating the department's letter but said, "It appears to be a major change in position about identification on provisional ballots, and is pretty much in line with the governor's position."

Subject August Progress Report - Eagleton Institute of Politics

Hi Karen,

Attached is the August progress report in fulfillment of our Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures. Please note, as per your instructions earlier this month, that the financial report will be sent via Fedex under separate cover to: Ms. Dianna Scott, Administrative Officer, EAC. Also attached to the progress report is a finalized list of our Peer Review Group members. If you have any questions regarding this report, please contact Tom O'Neill at (908) 794-1030 or [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net).

Have a great day,  
Lauren Vincelli

Privilege**

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.5
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from August 1 through August 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

Research on Provisional Voting and a draft of reports on the analysis and alternatives were substantially completed in preparation for the September 6 briefing for the EAC. Important reports such as the National Survey of Local Election Officials' Experience with Provisional Voting; Statistical Review Provisional Voting in the 2004 Election; State-by-state Narrative of Developments in Provisional Voting; and the compilation of Provisional Voting statutes, regulations, and litigation from the 50 states, were all completed in August.

We made further progress on recruiting a balanced and authoritative Peer Review Group (which, as this report is written, is receiving all the documents listed above for review). Ingrid Reed of Eagleton will coordinate the work of the Peer Review Group. A list of the members of the Peer Review Group is attached.

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to Tom O'Neill at: tom\_oneill@verizon.net or (908) 794-1030.

## **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, and Task 3.5 is well underway.

**Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of provisional voting and develop alternative means to achieve the goals of provisional voting.**

## **LEGISLATION, REGULATIONS, AND LITIGATION**

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on provisional voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and is near completion with this research.

**Progress:** We completed the state by state summaries of provisional voting in August. Also complete is a memorandum outlining provisional voting legislative changes since the 2004 election. This material was sent to the EAC as part of the package for briefing on September 6.

**Challenges:** The variety in the form and frequency of provisional voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The analysis of all the information, data, and survey results concerning provisional voting data will be completed in September, on schedule. The alternatives document should also be complete in September, pending response from the EAC on which direction those alternatives should follow.

## **PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING**

The Eagleton team has researched and compiled a narrative of each state's experience with provisional voting in 2004. The report findings from the survey of 400 local election officials is now complete. The survey results improve our understanding of actual practice in administering provisional voting, including the steps local officials took to prepare for the election.

## PROVISIONAL VOTING NARRATIVES

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with provisional voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** A state-by-state narrative of developments in Provisional Voting is complete and has been distributed to the EAC and the Peer Review Group. This work has been crucial to the process of constructing our draft analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

**Challenges:** The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent multiple revisions in order to incorporate the most up-to-date material available. Had the Election Day Study been available, this task would probably have been simplified considerably.

**Work Plan:** We completed revisions of the narratives.

## SURVEY OF COUNTY ELECTION OFFICIALS

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton conducted a national survey of county election officials to measure several aspects of provisional voting.

**Progress:** The analysis of the survey results and findings report are complete.

**Work Plan:** We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5.

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting, and is becoming the principal focus of our research.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** We are refining the 50 state (plus District of Columbia) chart of data on voter identification. So far collected are voter identification statutes for 35 states. Summaries of the existing voter identification statutes have been written for forty states.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The state by state voter identification statute summaries will be completed for the remaining ten states and D.C. and the review of the chart will be completed. Analysis of voter identification data will begin.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern, and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with

increasing the rigor of voter ID requirements. The next key milestones will be the completion of the state database and drafting the first narratives.

#### **VOTER ID AND TURNOUT ANALYSIS**

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also utilized exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout. The analysis of that data is underway.

**Challenges:** The main challenges to this task include gathering the complete set of changes to Voter ID laws over the past 5 years, and then incorporating those changes into a sound statistical methodology.

**Projection:** We will continue to work towards resolving the methodology issue, and ultimately produce a final report on this subject. The analysis of the impact that voter identification requirements have upon voter turnout should be completed around mid-September.

## **PROJECT MANAGEMENT**

### **PEER REVIEW GROUP**

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The Peer Review Group will review our research and methodology and provide valuable feedback and suggestions for the direction of our work.

**Progress:** The composition of the Peer Review Group has been determined and the membership has been submitted to the EAC. Additionally, as of the date of this report all PRG members have received their first mailing, which included several reports from our research, and a draft of our analysis and alternatives outline for their review.

**Challenges:** Our timeline for circulating and discussing our research with the PRG has been compromised due to delays in completing the recruitment of members of the group.

**Projections:** We are in the process of scheduling our first conference call with PRG members for the week of Sept. 19, 2005.

### **COORDINATION AND INFORMATION MANAGEMENT**

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

### **INFORMATION SYSTEM**

**Description:** The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. As we near the end of the Provisional Voting research and move into the Voter Identification research, we will re-evaluate the volume of files contained in the Information System and update the system.

**Projections:** The entire project team continues to review all project drafts, and will staff members combine and format all documents and materials in preparation for our final reporting to the EAC.

### **INTRANET**

**Description:** All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

**Progress:** Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has been extremely helpful to team members and serves as an internal website with announcements and important documents readily available to all team members.

## FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project August 1- August 31, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer, EAC.

Subject Re: EAC Conference Call - Friday 9/30 

Eagleton/Moritz team-

I'd leek to propose a conference call with EAC Commissioner Martinez, General Counsel ,Julie Thompson, Research Manager Karen Lynn-Dyson and your team for either 10:30 or 1:30 on Friday, September 30.

This will be to discuss the draft guidance and final report you will be producing for the EAC.

Please let me know which time works for you

Subject Getting together today or tomorrow at 4:00

I've had a chance to go over, more thoroughly, the Eagleton study and findings and think it would be helpful for you all to take a special look at the research that was done related to provisional case law.

Shall we get together for about an hour or so today or tomorrow, so that you all can look through this material? This would be in preparation for Friday's call with Eagleton.

Thanks

History

 This message has been replied to

Hi Adam,

It was great meeting you at the UDC Law Symposium last week. I wanted to let you know that we are having a meeting about the voter fraud and intimidation meeting at 10 AM on October 28 at the EAC, and it would be great if you and Commissioner Martinez could be there. Let me know, and let's stay in touch. Thanks so much.

Tova

Subject RE: October 28 meeting

History

This message has been replied to

Adam,

Just to make sure we're talking about the same thing, I'm actually not going to be at the "kick-off" on the 14th. This is a meeting just about our project on the 28th. The project is already underway and the contracts finalized.

Since the meeting I refer to on the 28th is from 10-12, is there any possibility of the three of us having lunch after that?

Tova

**Subject:** Re: October 28 meeting

Tova:

I was about to email you as well. It was certainly good to meet you last week, as I've heard about your work through numerous sources, and am glad we have finally been able to chat. As with many things (we started to discuss), the EAC is doing a lot of these projects for the first time. And unlike a thinktank, or nonprofit, we are constrained in a number of ways, and there are "sensitivities" that exist. Of course, there are benefits to not being a nonprofit, as well.

I'll state that at least myself, but hopefully Cmsr. Martinez will be at the kickoff meeting. You may do this already, but I would attempt to lay out the ideal structure for your involvement in the contract, and perhaps communicate this to Karen and the other contractor immediately before the meeting. That will frame this contract structure (beyond the terms of the agreement) to your liking.

Obviously a suggestion. However, I think that the goal is good, efficient research that is unimpeachable in partisan or methodological grounds--that will then be submitted to the Commission for its approval (and actually getting its approval).

Feel free to call me anytime. If you're in DC before then, and have some time, let's get Cmsr Martinez, you and I together for lunch or coffee.

Best,  
Adam

Subject October 28 meeting

Hi Adam,

It was great meeting you at the UDC Law Symposium last week. I wanted to let you know that we are having a meeting about the voter fraud and intimidation meeting at 10 AM on October 28 at the EAC, and it would be great if you and Commissioner Martinez could be there. Let me know, and let's stay in touch. Thanks so much.

Subject Re: Requested Documents

Karen:

I enjoyed the discussion too. I really think that this project will be of national importance and can positively affect elections administration while providing an answer to the handling of the vote fraud problem for the future.

On another note, why don't you leave an evening free while I am there for dinner. I am trying to bring my wife along. If you can bring your husband it could make for an interesting evening.

Regards,

Job

Summary of Election Activities of Job Serebrov

Background to Election Problems in Arkansas

Ever since Reconstruction, Arkansas has had a history of election problems. The election fraud that gave rise to the Brooks-Baxter War in Arkansas in the 1870s involved people from both sides of the aisle voting more than once, the dead rising to cast a ballot or two, destroying ballots, creating ballots and making ballot boxes disappear. A strong one-party system

028411

perpetuated this tradition into modern times.

In 1995, I met with Arkansas Supreme Court Justice Tom Glaze to discuss voting issues and my efforts to clean up the electoral process. Although supportive, Justice Glaze encouraged me to proceed with caution. Before being elected to the Supreme Court, Justice Glaze had been employed in the 1960s by Gov. Win Rockefeller to clean up ballot fraud throughout Arkansas. He was nearly disbarred in the process by those involved in ballot fraud in a small, rural county.

Shortly after my discussion with Justice Glaze, I discovered how pervasive the election problems were in the state. For instance, ballot boxes were stuffed or disappeared into the night only to return altered. Contrary to state law, county sheriffs running in contested elections maintained custody of the ballot boxes. In one instance, 20 voted ballot boxes were found in the attic of a sheriff's deputy after he died.

#### Attorney (1991-2004)

In my private practice as an attorney, I represented numerous clients in county election contests throughout Arkansas. I also represented clients in matters before the Federal Election Commission. I have never lost an election case. Finally, I was hired as a consultant to a major nonprofit legal organization to review and summarize the 2002 amendments to federal election laws and apply the new law to 10 scenarios.

#### Member, Washington County Board of Election Commissioners, Fayetteville, Arkansas (1990-1996)

This board consisted of three commissioners; I was the lone Republican. We were charged with supervising the training of poll workers, evaluating voting systems and then purchasing an optical scan system to be used countywide, preparing and justifying our annual budget before the Washington County Quorum Court, hiring and supervising staff and sitting as an administrative tribunal.

When I first came on the board, Washington County was primarily a one-party county and the Democrats were used to running elections according to tradition rather than the law. I had to battle with the two Democrats on the board to enforce election laws within the county. As I started to force the issue in the courts, the Republican Party gained strength. Four years later and after outlasting eight Democrat commissioners, I was able to work with new Democrat commissioners who recognized the need to enforce the law. At this point, the commission requested that I draft administrative regulations for the board. These remain in place today.

028412

Founder, President, General Counsel; Arkansans for Fair Elections (1994-1999)

In 1994, Gov. Mike Huckabee (R), then a candidate for lieutenant governor, asked me to serve as his general counsel for ballot fraud protection. Thinking it best to act independently of any candidate, I formed Arkansans for Fair Elections. I served as the organization's president and, later, general counsel. This group launched a statewide educational campaign to train poll watchers to recognize irregular or fraudulent electoral procedures; this included the creation of literature and a video. Our extensive public relations campaign brought media attention to the issue. We also organized a statewide team of citizen poll watchers and attorneys to ensure that the election laws were fairly enforced. We were so successful in the lieutenant governor's race that Arkansans for Fair Elections was asked to continue the effort until 1999 when I moved to Louisiana.

General Counsel - Ballot Fraud Protection Committee, Republican Party of Arkansas (1995-1999)

In late 1995, Asa Hutchinson, chairman of the Republican Party of Arkansas, appointed me as general counsel for the newly formed Ballot Fraud Protection Committee of the state party. I retained this position until 1999. I was responsible for coordinating statewide enforcement efforts and directing a legal team to respond to problematic situations prior to and on election day.

(Through my role with Arkansans for Fair Elections and the Ballot Fraud Protection Committee, I successfully sued or negotiated a settlement in more than two-thirds of the 75 counties in Arkansas over electoral irregularities.)

Legal Consultant to Republican Members of the Arkansas General Assembly (1994-1996)

Republicans in the General Assembly requested that I review and draft suggested changes to Arkansas election law. Based on my personal experience as an election commissioner and as an election attorney, I identified a number of areas of concern and drafted new statutes modeled on the best examples that I could find from other states. My proposal was not passed by the Democrat-controlled General Assembly as a package, however, several of its components were passed into law.

Consultant to the Arkansas Court of Appeals Redistricting Commission (1996-1999)

I drafted five redistricting bills and maps for the

028413

constitutionally required redistricting of the Arkansas Court of Appeals. These bills were based on current U.S. Supreme Court precedent regarding gerrymandering. I had to present each bill and give supporting testimony to the commission.

Director of International Development - Louisiana State University, Baton Rouge, Louisiana (2000-2003)

Part of my duties as director was to develop international cooperative projects. The theme of several of these proposals was democratization. In each case, I required review of the national election code of the country involved.

My activities in Namibia led to a request by the director of the Namibian Election Commission, Joram Rukambe and the Speaker of the Namibian National Assembly, Dr. Mose Tjitendero to review and suggest changes to the Namibian election code. This review took three months and resulted in proposed alterations a number of code sections. These suggestions were considered by the Namibian National Assembly and a number were incorporated into the code revisions. Additionally, I drafted legislation for the Speaker to guarantee voting rights to agricultural workers that were being denied by the owners of the farms. This legislation also was passed into law.

During this time, I was qualified as an election expert and placed on an election consultant list by the United Nations, IFES and the Electoral Institute of Southern Africa.

#### Related Memberships

- Republican Party of Arkansas (1990-1999)
  - Benton County, Arkansas, Republican Committee (1996-1999)
  - Washington County, Arkansas, Republican Committee (1990-1996)
- (When we moved to Louisiana in 1999, the party was in such turmoil that it was difficult to get involved. This past year, I have been prohibited by the Hatch Act from participating in partisan politics. This prohibition ends August 19 when my judicial clerkship ends.)

#### Related Education

- Graduate certificate in electoral governance, Griffith University, Queensland, Australia (2003)

Karen,

028415

Attached is the Progress Report for October. Please note that this report includes an attachment showing how our study classifies each state on key variables, such as counting out-of-precinct ballots, requirements for ballot evaluation, and other variables. It also displays how the data we used differs for some states for the vote counts reported by the Election Day Survey. We believe that our data is more accurate and complete (see for example the data for New Mexico and Pennsylvania).

I look forward to responding to any questions or concerns you or others at the EAC may have.

Tom O'Neill

*Contract to Provide Research Assistance to the EAC For  
the Development of Voluntary Guidance on Provisional  
Voting and Voter Identification Procedures*

**MONTHLY PROGRESS REPORT**  
**October 2005**

For  
**UNITED STATES ELECTION ASSISTANCE COMMISSION**  
1225 New York Avenue N.W., Suite - 1100  
Washington, DC 20005

November 15, 2005

**Prepared by:**  
Eagleton Institute of Politics  
Rutgers, The State University of New Jersey  
191 Ryders Lane  
New Brunswick, NJ 08901-8557

028417

**Deliberative Process  
Privilege**

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.5
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from October 1 through October 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

In October we focused on finalizing our Provisional Voting analysis paper, including the development of recommendations to the EAC for a draft guidance document and best practices. These policy prescriptions are based on our research and the comments of the Peer Review Group. We completed a careful review of our data to reconcile it with other sources and identify the latest, most reliable information to use in the analysis. (See the attachment to this Progress Report for the details.) The importance of this demanding effort was described in September's Progress Report.

Also in October we revised the schedule for the project in light of the additional time that has been needed for review of earlier drafts by the EAC and the late completion of the Election Day Study. We will seek a meeting with the EAC in the next several weeks to confer about the schedule to complete the project and alternative approaches that could speed the conclusion of our work.

We will submit to the EAC a final draft of our report, a preliminary guidance document, and draft best practices before Thanksgiving. We project that EAC will take 3 to 4 weeks to review and react to that final draft. And we understand that after its review, the EAC will decide if it should move towards issuing a Guidance Document or recommending best practices. If the EAC does decide to issue a Guidance Document on Provisional Voting, the time needed for a review by the advisory boards is likely to delay a public hearing until early February.

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to tom\_oneill@verizon.net or by telephone at (908) 794-1030.

## **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to Provisional Voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, Tasks 3.5 and 3.6 are nearing completion.

**Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of Provisional Voting and develop alternative means to achieve the goals of Provisional Voting.**

## **LEGISLATION, REGULATIONS, AND LITIGATION**

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states' actual experience with Provisional Voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on Provisional Voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and has completed this research.

**Progress:** We have completed the memorandum outlining Provisional Voting legislative changes since the 2004 election and we are continuing to clarify the laws prior to these changes.

**Challenges:** The variety in the form and frequency of Provisional Voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The final analysis will be sent to the EAC by Thanksgiving.

## PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team has researched and compiled a narrative of each state's experience with Provisional Voting in 2004. The report findings from the survey of 400 local election officials are now complete. The survey results have proven to be instrumental in shaping our understanding of actual practice in administering Provisional Voting, including the steps local officials took to prepare for the election.

### PROVISIONAL VOTING NARRATIVES

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with Provisional Voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to Provisional Voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** We completed a state-by-state narrative of developments in Provisional Voting and distributed it to the EAC and the PRG. This work has been helpful in understanding the context of the data collected on provisional voting from the states.

**Challenges:** The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent several revisions to incorporate up-to-date and reliable information. Now that so many other analyses, including the Election Day Survey, have been released, we were challenged by different interpretations of the same basic facts. But the reconciliation of interpretation and data collection has been invaluable in establishing rigor in our report.

**Work Plan:** We completed revisions of the narratives incorporating comments from the PRG and addressing any discrepancies between our findings and other interpretations of similar information included in other studies.

### PROVISIONAL VOTING STATISTICAL ANALYSIS

**Description:** During October the Eagleton research team continued to check its statistical analysis, and worked to reconcile the classifications of this analysis (such as states counting only those provisional ballots cast within the proper precinct versus states that counted ballots cast within the proper county) with the classification made in other parts of this study or in other studies (such as the Election Day Study or *Electionline* reports).

**Progress:** The effort to double check all of the classifications used in the study is complete. The results of this effort are displayed in the attachment to this progress report, "Characteristics of the Provisional Voting Process -- Classification of the States,"

beginning on page 9. Only Delaware and Arkansas remain unclear in regard to one of the measures, and both states have been contacted to receive clarification in this area..

**Challenges:** The difficulties encountered have been a result of communication delays and time constraints. Some states have been more responsive to our inquires about their practices than others. Overall, this is not an irresolvable problem but it does slow the process of completion down.

**Work Plan:** By early-November the final revision of the statistical analysis, which includes full reconciliation of all data within the study, will be complete. The reconciliation of data is displayed in the attachment to this progress report.

### **SURVEY OF COUNTY ELECTION OFFICIALS**

**Description:** The Eagleton Center for Public Interest Polling (CPIP) conducted a national survey of county election officials to measure several aspects of Provisional Voting.

**Progress:** The analysis of the survey results and findings report is complete. As a result of the critique by the PRG, the research team is revising and clarifying the descriptions of the survey design and sample selection process to make the research methods more transparent.

**Work Plan:** We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5. We will include necessary clarifications regarding survey design and sample selection in the final analysis and alternatives document.

<p><b>Task 3.6: Prepare preliminary draft guidance document.</b></p>
--

The report and recommendations now nearing completion constitutes the draft preliminary guidance document. Based on our conversation with the EAC, the draft gives the EAC the option of proceeding with a guidance document or issuing recommendations to the state for best practices, recommendations that would not constitute voluntary guidance. Before proceeding to Task 3.7 (revise the guidance document for publication) or 3.8 (arrange a public hearing on the draft guidance), we will await the EAC's decision on how to proceed.

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is becoming the principal focus of our research.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The 50 State (plus the District of Columbia) chart has been completed, the voter identification statutes have been collected for all states and D.C., and summaries of the existing voter identification statutes have been written for all states and D.C.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** Analysis of voter identification data has begun and will increasingly become the central focus of our work.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

## VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also used exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout.

**Challenges:** The analysis of these data had been postponed until the data reconciliation of Provisional Voting is complete. As a result of the extensive revision and data reconciliation efforts aimed at the Provisional Voting section of our work VID had been temporarily placed on hold. We are now beginning data analysis on the impact of voter identification requirements on voter turnout.

**Work Plan:** The analysis of the impact that voter identification requirements have upon voter turnout should be completed by early December. Early January is our target to deliver the draft report and outline of alternative policies to the Peer Review Group. In mid January, the EAC would receive a draft report and recommendations that take into account the comments of the PRG.

## **PROJECT MANAGEMENT**

### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

**Progress:** Eagleton has stayed in touch with members of the Peer Review Group since the September 21<sup>st</sup> conference call, and has solicited their final comments on the Provisional Voting research. During October, we telephoned two members who did not participate in the conference call to confirm their commitment to serving as members of the Peer Review Group. Profess Guy Charles affirmed his interest. Professor Pamela Karlan did not return the call. The revisions in the schedule for the project have now made it possible to begin the process of scheduling a meeting of the PRG to consider our draft report and recommendations on Voter Identification Issues. We anticipate that meeting will take place the second week of January.

**Challenges:** No new challenges were encountered during October.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

**Progress:** At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole. Upon their completion, new documents continue to be added.

**Projections:** The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

### INTRANET

**Description:** All project team members have signed on to the Intranet site, and regularly post drafts, completed materials and spreadsheets online for internal review. The Intranet facilitates the exchange of information and collaboration among project participants.

### FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project October 1- October 31, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.

028424

## ATTACHMENT TO OCTOBER PROGRESS REPORT

### **Characteristics of the Provisional Voting Process Classification of the States**

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The categories analyzed here are:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

Please note that:

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and did include it in our analysis.

028425

## New vs. Old States

We classified states as “new” or “old” based on the 2001 Electionline study of provisional voting<sup>1</sup> and condensing its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We collapsed all of the states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots as “old” states, because the states in all three categories would have been familiar with key aspects of provisional voting.. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as “new” states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline’s map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct’s list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter’s name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island’s first use of provisional voting was in 2004 and, therefore, classified the state as “new” to the system of provisional balloting.

---

Oregon		
South Carolina		
Texas		
Virginia		
Washington		
West Virginia		
<b>26</b>	<b>18</b>	<b>7</b>

Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>2</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline’s criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases

<sup>2</sup> “Election Preview 2004: What’s changed, What Hasn’t and Why”. This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

028427

because we found they had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

<b>Had Database 2004</b>	<b>No Database A-N</b>	<b>No Database N-W</b>	<b>HAVA Exempt or NA</b>
Alaska	Alabama	Ohio	Idaho
Arizona	Arkansas	Oregon	Maine
Connecticut	California	Pennsylvania	Mississippi
Delaware	Colorado	Rhode Island	Minnesota
District of Columbia	Florida	Tennessee	New Hampshire
Georgia	Iowa	Texas	North Dakota
Hawaii	Illinois	Utah	Wisconsin
Kentucky	Indiana	Vermont	Wyoming
Louisiana	Kansas	Virginia	
Massachusetts	Maryland	Washington	
Michigan	Missouri		
New Mexico	Montana		
Oklahoma	Nebraska		
South Carolina	Nevada		
South Dakota	New Jersey		
West Virginia	New York		
	North Carolina		
<b>16</b>	<b>27</b>		<b>8</b>

Minnesota has a statewide database but was excluded from the analysis because it did not offer provisional ballots and was exempt from the HAVA requirements.

#### Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as “out-of-precinct.” States that invalidated such ballots were categorized as “In-precinct only.”

028428

**Table 3**  
**CATEGORIZATION OF STATES -- Counting Out-Of-Precinct Ballots**

	Ohio	
	Oklahoma	
	South Carolina	
	South Dakota	
	Tennessee	
	Texas	
	Virginia	
	West Virginia	
<b>17</b>	<b>26</b>	<b>7</b>

**Voter Identification**

We relied on Electionline studies, including the Voter Identification study<sup>3</sup> and the 2004 Election Preview, to classify the states on their requirements for voter identification. Each state's categorization is taken directly from the Electionline studies except Hawaii.<sup>4</sup> The five different, and increasingly rigorous, categories are: Give Name (8 states), Sign Name (14 states), Match Signature (8 states), Provide ID (15 states), and Photo ID (5 states).

<sup>3</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Voter%20Identification.pdf>

<sup>4</sup> In 2004, ElectionLine listed Hawaii as requiring identification. Our review of statutes revealed that Hawaii could require photo ID. Since that is the most rigorous form of identification that may be required of voters, we classified Hawaii under this category.

**Table 4****CATEGORIZATION OF STATES -- Forms of Identification Required**

*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<b>Give Name</b>	<b>Sign Name</b>	<b>Match Signature</b>	<b>Provide ID</b>	<b>Photo ID</b>
<i>Maine</i>	California	Illinois	Alabama	Florida
Massachusetts	DC	Nevada	Alaska	Hawaii
<i>New Hampshire</i>	<i>Idaho</i>	New Jersey	Arizona	Louisiana
North Carolina	Indiana	New York	Arkansas	South Carolina
Rhode Island	Iowa	Ohio	Colorado	South Dakota
Utah	Kansas	Oregon	Connecticut	
Vermont	Maryland	Pennsylvania	Delaware	
<i>Wisconsin</i>	Michigan	West Virginia	Georgia	
<i>Wyoming</i>	Minnesota		Kentucky	
	<i>Mississippi</i>		Missouri	
	Nebraska		Montana	
	New Mexico		<i>North Dakota</i>	
	Oklahoma		Tennessee	
	Washington		Texas	
			Virginia	
<b>9</b>	<b>14</b>	<b>8</b>	<b>15</b>	<b>5</b>

South Dakota complicates the effort to assign each state to a category. It permits voters to sign an affidavit that would allow them to vote without presenting photo ID. While Hawaii did not normally require photo ID, its statutes gave challenged voters the opportunity to respond by producing a photo ID.

### Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

028430

**Table 5****CATEGORIZATION OF STATES – Ballot Evaluation Methods**

*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<b>Signature Match</b>	<b>Data Match</b>	<b>Affidavit</b>	<b>Return with ID</b>	<b>NA</b>
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire
	Louisiana	Kentucky	Montana	N. Carolina*
	Missouri	Massachusetts	New Jersey	N. Dakota
	Ohio	Nebraska	New Mexico	Wisconsin
	Oklahoma	Nevada	Texas	Wyoming
	Pennsylvania	New York	Utah	
	Rhode Island	South Dakota		
	S. Carolina	Tennessee		
	Washington	Vermont		
	West Virginia	Virginia		
4	14	14	10	9

**Data Collection**

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

028431

<b>Table 6</b>	
<b>Updated information by State</b>	
<b>Received Updated Data</b>	<b>Did Not Receive Updated Data</b>
California	Alabama
District of Columbia	Alaska <sup>5</sup>
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland <sup>6</sup>	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska <sup>7</sup>	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
<b>26 States</b>	<b>25 States</b>

<sup>5</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>6</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>7</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

028432

## Data Differences with Election Day Study

The data used in this study differs from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished, on the schedule laid out in our work plan. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

State	EDS Numbers Cast/Counted	Our Numbers Cast/Counted	Differences	Updated Info from State?
Alabama	6,478/1,865	6560/1836	82/29	No
Alaska	23,285/22,498	23,275/22,498	10/0	No
Colorado	51,529/39,086	51,477/39,163	52/77	No
Georgia	12,893/4,489	12,893/3,839	0/650	No
Hawaii	346/25	348/25	2/0	Yes
Iowa	15,406/8,038	15,454/8,048	48/10	Yes
Kansas	45,535/32,079	45,563/31,805	28/274	Yes
Montana	688/378	653/357	35/21	Yes
Nebraska	17,421/13,788	17,003/13,298	418/490	Yes
Nevada	6,153/2,446	6,154/2,447	1/1	Yes
New Mexico	6,410/2,914	15,360/8,767	8,950/5,853	Yes
N. Carolina	77,469/50,370	77,469/42,348	0/8,022	No
Ohio	157,714/123,902	158,642/123,548	928/354	Yes
Pennsylvania	No data	53,698/26,092	N/A	Yes
Texas	35,282/7,156	36,193/7,770	911/614	Yes
Vermont	121/30	101/37	20/7	No
Virginia	4,608/728	4,609/728	1/0	Yes
Washington	92,402/73,806	86,239/69,273	6,163/4,533	Yes
Wisconsin	374/119	373/120	1/1	No

Subject Provisional Voting Report Status and Request for Advice

Karen - We would like to talk with you about the process and schedule for completing our work in a way that is most useful to the EAC. I am attaching a draft timeline for the completion of this work and listing below five specific questions we need to resolve as quickly as possible. I would appreciate it if you would call me to discuss how best to address these matters - whether by telephone or by coming to meet in Washington.

We are planning to submit our report on Provisional Voting to the EAC by November 18<sup>th</sup>. Although it is not required in our contract, we will at the same time give copies to the members of the Peer Review Group offering them the opportunity to send us any additional corrections or other comments.

We are considering making all our recommendations for both Provisional Voting and Voter ID in the form of Best Practices. Some of them might well lend themselves to Guidance, but our discussion of the earlier draft with the EAC left us with the clear impression that on this topic the preference was for recommendations for Best Practices rather than a Guidance document. The calendar also argues for the Best Practices route to enable the EAC to give states advice they can use in 2006. (The attached draft timeline would need to be revised if the EAC prefers to propose some of the recommendations as Guidance.)

028434

QUESTIONS:

1. Does the EAC agree with the approach described above to make all recommendations in the form of Best Practices rather than Guidance?
2. How long will it take the EAC to review and return comments on our draft Provisional Voting document? Is our attached revised schedule realistic in anticipating EAC comments no later than the week of December 12<sup>th</sup> on the report we send you at the end of this week?
3. After we revise our report on Provisional Voting to reflect any comments we receive from the EAC, and follow a similar process for our report on Voter Identification, what further steps would the Commission like us to take? Would you want us to conduct a review with your Board of Advisors and/or hold public hearings even though these steps are, we understand, required only for a Guidance Document? A review by the Board of Advisors would offer the opportunity to solicit suggestions for Best Practices from its members, thus strengthening the document and building a constituency for their adoption. (The attached draft timeline does not include such additional reviews.)
4. In any case, we will need a no-cost extension to the contract to carry us past December 31<sup>st</sup> . How do we make that request?
5. Assuming that we conduct fewer public hearings than we had anticipated, can we reallocate funds we had budgeted for that purpose to cover the higher than anticipated personnel and consultant costs we will be incurring after the first of the year?

We look forward to discussing these matters with you.

Thanks, John

**DRAFT FOR DISCUSSION**

**REVISED SCHEDULE FOR EAC PROJECT**

**November 2005 – February 2006**

November 10, 2005

Assumes no guidance document, only analysis and recommended best practices

<b>DATE</b>	<b>Project Management</b>	<b>Provisional Voting</b>	<b>Voter ID</b>
<b>Week of 10/31</b>		Review draft report to EAC (Team)  Submit comments on report (Team)	Voter ID Research to TV
<b>Week of 11/7</b>	Status reports to JD for October tasks (all)	Redraft report (TON)  Review and approve report (Team)  Final draft report (TON)	Research continues (TV)
<b>Week of 11/14</b>	Submit monthly progress report (JD)	<b>Submit report to EAC for review</b> and to PRG for information Discuss with EAC use of Board of Advisors to expand "best practices." (TON, JW)  EAC reviews report	Research continues (TV)
<b>Week of 11/21</b>		EAC review continues	Complete data collection for Voter ID analysis. (TV)
<b>Week of 11/28</b>		EAC review continues	Draft report on Voter ID analysis (TV)

028436

**DRAFT FOR DISCUSSION**

<b>Week of 12/5</b>	Status reports to JD for November tasks (all)	EAC review continues	Internal review (PT)
<b>Week of 12/12</b>	Submit monthly progress report (JD)	Receive EAC comments on report  Revise and PT review	Revise draft (TV)  Draft alternatives (TON)  Review and comment on alternatives (PT)
<b>Week of 12/19</b>		<b>Finalize analysis and best practices to EAC for publication<sup>1</sup></b>	Complete draft report and alternatives (TV, TON)
<b>Week of 12/26</b>			Review draft report and alternatives (PT)
<b>Week of 1/2/06</b>	Status reports to JD for December tasks (all)		<b>Report and alternatives to PRG</b>
<b>Week of 1/9/06</b>			PRG meets and comments  Revise (TV & TON)

<sup>1</sup> If the EAC chooses not to issue a Guidance Document on provisional voting but only to recommend "best practices," the register publication, hearing and comment period may not be required, which would shorten the process by at least 30 days. 028437

Subject Final Best Practices Document

Dear Ms. Karen Lynn-Dyson:

Attached please find the final draft 'Best Practices to Improve Provisional Voting Report' completed by the Eagleton Institute of Politics, and Mortiz College of Law.

Please note that our report has two attachments, the first of which is appended directly within the text of the report, and the second of which is a separate excel document. In addition to this electronic submission I will be sending you a hard copy, via FedEx of these materials later today.

Please let me know if you have any difficulty opening the files.

Sincerely,

Johanna Dobrich

Background of the Research

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning provisional voting, a sample survey of local election officials, and a statistical analysis of provisional voting in the 2004 election. Also consulted as a basis for these recommendations were other studies, notably the EAC's Election Day Survey.<sup>1</sup>

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

Section 302(a) of HAVA requires states to establish the process of provisional balloting by January 2004.<sup>3</sup> The process HAVA outlined leaves considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voters eligible to cast a provisional ballot that will be counted and, arguably, in what jurisdiction (precinct or larger unit) that the ballot must be cast in order to be counted.<sup>4</sup>

The general requirement is that, if a registered voter appears at a polling place to vote in an election for Federal office, but the potential voter's name does not appear on the official list of eligible voters for the polling place, or if an election official asserts that the individual is not eligible to vote, that potential voter be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the Election Day Survey, include first-time voters who cannot provide identification, as required under HAVA, and voters who were

<sup>1</sup> Appendix 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures and describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

<sup>3</sup> The Election Center's National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing "voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted." It recommended "in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions." See www.electioncenter.org

<sup>4</sup> The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in *Sandusky County Democratic Party v. Blackwell*, 387 F.3d565 (6<sup>th</sup> Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer, had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA's definition of "jurisdiction" incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define "jurisdiction" for the purpose of counting a provisional ballot.

challenged at the poll.<sup>5</sup> HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. HAVA also requires election administrators to notify individuals of their opportunity to cast a provisional ballot.

Deleted: "

Deleted: " HAVA leaves critical questions to the states, including how to define "jurisdiction" and who qualifies as a registered voter for the purposes of counting provisional ballots.

Provisional Ballots in the 2004 Election

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.<sup>6</sup>

Deleted: just over

These totals obscure the tremendous variation in provisional voting among the states. HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted. Six states accounted for two-thirds of all the provisional ballots cast.<sup>7</sup> State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000, from a high of 7% in Alaska's to Vermont's .006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted ballots at more than twice that rate: 44%. (Or, as the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without."<sup>8</sup>)

The wide variations in the use of provisional ballots argue for the promulgation of best practices that states can use to determine how to make procedures clearer to both officials and voters could improve the implementation of provisional voting across the country.

One important source of variation among states was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>9</sup>

<sup>5</sup> The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See <http://wired.com/news/evote/0,2645,63298,00.html>. (Our analysis revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)

<sup>6</sup> These figures differ slightly from those in the Election Day Survey. Data used for this study include complete voting data for New Mexico, for which the Election Day Survey had only partial data, and vote totals for Pennsylvania, which was not included in the provisional voting analysis in the Election Day Survey. See the appendix to this report for a full explanation of the differences in data between this research and the Election Day Survey.

<sup>7</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>8</sup> Report on the Commission on Federal Election Reform, "Building Confidence in U. S. Elections," September 2005, p. 16.

<sup>9</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

028444

FINAL DRAFT

11/23/2005

- The percentage of the total vote cast as provisional ballots averaged more than 2% (2.17%) in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Those voting with provisional ballots in experienced states were enfranchised more frequently than those in the new states, another indication that there is room for improvement in provisional balloting procedures.<sup>10</sup> That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

- Be prepared to direct voters to their correct precincts with maps;
- Regard provisional voting as easy to implement;
- Report that provisional voting sped up and improved polling place operations
- Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from "new" states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC should consider providing the "new" states with information on more effective administration of provisional voting. EAC could also consider convening a national meeting for state and county election officials to share experiences and best practices from their own jurisdictions.

 Formatted: Font color: Red

But the optimistic conclusion that experience will make all the difference may be unwarranted. Only if the performance of the "new" states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Current understanding of the provisional voting processes in use in 2004 is not sufficient to determine unambiguously which view is correct.

1. "New" states may have a political culture different from "old" states. That is, underlying features of the "new" states political system may be the reason they had not adopted some form of provisional voting before HAVA. The "new" states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such

<sup>10</sup> Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit's "6-day time frame for processing the provisional ballots was very challenging and unrealistic. To overcome this challenge, the entire department's employees were mobilized to process provisional ballots." (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.

actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. If the inconsistent performance in the "new" states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots – as measured by intrastate consistency in administration— will be harder and take longer to achieve.<sup>11</sup>

Formatted: Indent: Left: 18 pt

- 2. "Old" states may devote fewer resources to updating their registration files or databases because they are comfortable with provisional ballots as a fail safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

Deleted: increasing variation

Deleted: d

- The more rigorous the verification requirements of the voter's identity and registration status, the smaller the percentage of provisional ballots that were counted. Some states merely require a voter's signature, some match signatures, some require identity documents, others require an affidavit, and a few require photo identification.<sup>12</sup>
  - In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
  - In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
  - In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
  - In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office.
- Voter registration databases provided information that reduced the number of provisional ballots counted.<sup>13</sup> In states using provisional voting for the first time, states with

Deleted: ertified

Deleted: ertified

<sup>11</sup> Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, "no state gave the voter the right to find out the status of their ballot after the election. " Now all offer that opportunity. See Bali and Silver, "The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000," manuscript, Department of Political Science, Michigan State University. Resisting HAVA's mandates through foot-dragging lacks any legitimate foundation in law or policy.

Formatted: Normal

<sup>12</sup> See Table 2 in Appendix 2 for information on the verification method used in each state.

Deleted: Publication of best practices may provide an incentive and a direction for states to strengthen their systems.¶

<sup>13</sup> The Election Day Survey found that states using statewide voter registration databases reported a lower incidence of casting provisional ballots than states without voter registration databases, suggesting that better administration of voter registration rolls might be associated with fewer instances where voters would be required to cast a provisional ballot due to a problem with their voter registration.

Formatted: Font: (Default) Arial, 9 pt

Deleted: Election Day Study

028446

FINAL DRAFT

11/23/2005

Deleted: 15

registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.

- States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted ballots cast only in the proper precinct counted an average of 42% of provisional ballots.<sup>14</sup>
  - In experienced states, the disparity was even more pronounced; 52% of provisional ballots cast were counted in states requiring in-district ballots, while 70% were counted in those allowing out-of-precinct ballots.
  - If all states had counted out-of-precinct ballots, perhaps 290,000 more voters would have been enfranchised across the country.<sup>15</sup>

Variation With-in States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors outside of the statewide factors analyzed here also influence the use of provisional ballots.<sup>16</sup> Reacting to the lack of consistency within states, the Carter-Baker Commission recommended that "states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state."<sup>17</sup>

Deleted: way

Deleted: were used in 2004

Election Line reported that:

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.

Deleted: ¶

Deleted: ¶

<sup>14</sup> The Election Day Survey concluded that: "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."

Deleted: Election Day Study

<sup>15</sup> This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

Formatted: Normal, Don't adjust space between Latin and Asian text, Don't adjust space between Asian text and numbers, Tabs: 396 pt, Left

<sup>16</sup> For example, The Election Day Survey also found that "the reported rate of provisional ballots cast increases with population size, from 0.10 percent for voter registration in jurisdictions under 1,000 voting age population (VAP), to 2.51 percent in jurisdictions over one million VAP. It also calculated that, "The highest reported rate of counting provisional ballots was also among predominantly Hispanic jurisdictions, 79.30 percent, followed by predominantly non-Hispanic White areas, 62.60 percent; predominantly non-Hispanic Black communities, 58.60 percent; and predominantly non-Hispanic Native American jurisdictions, 48.70 percent.

Deleted: ¶

<sup>17</sup> Report of the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p.16. The report observed that, ". . .different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated."

028447

FINAL DRAFT

11/23/2005

Deleted: 15

- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, high mobility, and inadequately staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

**Effectiveness of Provisional Voting**

The certainty of our conclusions about the effectiveness of provisional voting is limited because of a fundamental challenge of methodology and the lack of important information. An ideal assessment of how well provisional ballots served the needs of voters and the public interest requires knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting; their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. And information needed about the eligibility or registration status of provisional voters is also not available.

Deleted: Our recommendations for best practices are based on research into the legal framework, the national sample survey of local election officials, and statistical analysis of the use of provisional ballots in 2004. While we are confident in the quality of the research, we recognize that t

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. A rough estimate of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost). Whatever the precise figure, it { ... [8]

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect an accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were not made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know, that in 2004 provisional ballots enfranchised 1.2 million citizens, who would otherwise have been turned away from the polls.

Not knowing the total number of registered voters who might have voted but could not makes a precise, quantitative estimate of the effectiveness of provisional voting impossible. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the 2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

**Estimates of Votes Lost In 2000 Presidential Election**

Votes Lost (Millions)	Cause
1.5 – 2	Faulty equipment and confusing ballots
1.5 – 3	Registration mix-ups
<1	Polling place operations
?	Absentee ballot administration

**Table 1 Cal Tech – MIT Voting Technology Project Estimates**  
4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

Deleted: 15

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. A rough estimate of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost). Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

Legislative Response

Indeed, several states<sup>20</sup> came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

Deleted: by amending

Deleted: The resulting legislative activity is evidence that states were less than satisfied with the effectiveness of their processes.

Formatted: Indent: Left: 36 pt

Not enough time to examine and count the provisional ballots. Florida, Indiana, Virginia, and Washington all have clarified or extended the timeline to evaluate the ballots. But taking more time can prove a problem, particularly in presidential elections with the looming deadline to certify the vote for the Electoral College.<sup>21</sup>

Deleted: ¶  
<#> ¶

Formatted: Bullets and Numbering

Lack of uniform rules for counting ballots and effective training of the election officials in interpreting and applying those rules to determine the validity of ballots. Colorado, New Mexico, North Carolina, and Washington have all passed legislation focused on improving the efficacy and consistency of the voting and counting process.

The issue of counting provisional ballots cast in the wrong precinct was addressed by Colorado, Arkansas, and North Dakota.

Litigation

Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called "wrong precinct issue" – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

Deleted: The 2004 election caused voters or other parties to seek court review of local officials' decisions.

This litigation was significant nonetheless.

\* Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems after each election when it asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

<sup>20</sup> Twelve states made statutory or regulatory changes: Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Louisiana, Montana, New Mexico, North Carolina, Virginia and Wyoming. See Table 4 in Appendix 2.

<sup>21</sup> The resources available to evaluate and count provisional ballots within a tight schedule may not be easily available. The General Accounting Office reports that Detroit, where 1,350 provisional ballots were cast and 123 counted, found the 6-day time frame for processing provisional ballots "very challenging and unrealistic. To overcome this challenge, the entire department's employees were mobilized to process provisional ballots." The report also found that in Los Angeles County, "staff had to prepare duplicate ballots to remove ineligible or invalid contests when voters cast their ballots at the wrong precinct. To overcome this challenge, staffing was increased to prepare the duplicate ballots." In a close, contested election, "duplicate" ballots would doubtless receive long and careful scrutiny." See Appendix 7, GAO, "Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," September 2005. (GAO Report-05-997)

Deleted: 15

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second –and significantly– the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right –the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

Deleted: First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA. (A state's decision not to count wrong-precinct provisional ballots, however, was found by the court not to violate HAVA. ¶

Formatted: Bullets and Numbering

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted an absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

**Need for Promulgation of Best Practices**

Because every provisional ballot counted represents a voter who, if the system had worked really well, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

Deleted: Because every provisional ballot counted represents a voter who, if the system had worked really well, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly. EAC's guidance and recommendations for best practices will provide information to allow states to adopt procedures likely to strengthen their systems.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting.

**Recommendations for Best Practices**

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

Deleted: for consideration by all committee members. State action in response to the EAC's recommendations for best practices would be voluntary.

Deleted: 15

**Self-evaluation of Provisional Voting –4 Key Questions**

The first recommendation is not for a specific procedure, but rather for a way of thinking about provisional voting. As legislators and election officials in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?
2. Is the system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and with litigation looming?
3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?
4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

**Best Practices For Each Step In The Process**

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention, and we offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

Deleted: We examined each step of the provisional voting process to identify specific areas where the states should focus their attention, and we offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.[]

**The Importance of Clarity**

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots. . . To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result— well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."<sup>22</sup>

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

<sup>22</sup> The Century Foundation, Balancing Access and Integrity, Report of the Working Group on State Implementation of Election Reforms, July 2005.

FINAL DRAFT

11/23/2005

- Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards. For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant recanvassing.<sup>23</sup> Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.
- States should provide poll workers the training and information resources they need, as for example, how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.<sup>24</sup>
- States should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.<sup>25</sup> Recent legislation in Arizona indicates that the EAC's recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.<sup>26</sup>

**A. Registration and Pre-Election Information for Voters**

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, "You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency."<sup>27</sup>

<sup>23</sup> See *Washington State Republican Party v. King County Division of Records*, 103 P3d 725, 727-728 (Wash. 2004)

<sup>24</sup> See *Panio v. Sunderland* 824 N.E.2d 488, 490 (NY, 2005) See also Order, *Hawkins v. Blunt*, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even the wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

<sup>25</sup> *Sandusky County Democratic Party v. Blackwell*, 387 F.3d 565, 774 (6<sup>th</sup> Cir. 2004)

<sup>26</sup> *The Florida Democratic Party v. Hood*, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

<sup>27</sup> Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina), they can verify their registration on the website.

2. The process to re-enfranchise felons should be clear and straightforward. To avoid litigation over the registration status of felons, best practice should be defined as making re-enfranchisement automatic, or no more burdensome than the process required for any new registrant.<sup>28</sup>

Deleted:  
Deleted: ment for  
Deleted: process

3. A state website for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

Deleted: For example,

B. At the Polling Place

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display.<sup>29</sup> After the 2004 election, New Mexico adopted a requirement for poll workers to attend an "election school."<sup>30</sup> Such statutory direction could help other states ensure uniform instruction of poll workers.

Deleted: This  
Deleted: prove  
Deleted: ful for  
Deleted: ing  
Deleted: , and other states can benefit from this example.

2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: "Reasons Why Your Provisional Ballot Might Not Be Counted" on one side and "What to Do if My Provisional Ballot Is Not Counted" on the other.

3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk "in the event additional provisional ballots are required . . . to photocopy official provisional ballots."<sup>31</sup> At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the

number of provisional ballots actually cast in recent elections. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%.<sup>32</sup>

- 4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.<sup>33</sup>

C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. The recognition of the validity of those criteria is important to establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underline the importance of clear criteria. As the Century Foundation report put it, "Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation."<sup>34</sup> Nonetheless, the *Panio v. Sutherland*<sup>35</sup> decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is "clerical error" judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

Deleted: that are cast

- 1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted

and the individual returning later with identification is, in fact, the same person. Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.<sup>37</sup>

Deleted: n individual

2. More provisional voters are enfranchised in those states that count ballots cast outside the correct precinct.<sup>38</sup> The best practice may be to count provisional ballots even if they are cast in the wrong precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. See the experience in Los Angeles County with the difficulties in evaluating out-of-precinct ballots described earlier in this report.
3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot correct polling site even if at the wrong precinct within that location.<sup>39</sup>
4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box "unregistered voter"; "lack of signature match" "wrong precinct," etc.) Those forms should be disclosed publicly when completed. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.<sup>40</sup>

### D. Verification of Provisional Ballots

1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections Formatted: Bullets and Numbering
2. The time by which election officials must complete their eligibility evaluations is critical, particularly in presidential elections. States should consider in particular how to divide the time allowed them by the safe-harbor provisions that apply in presidential elections to the certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available. Formatted: Bullets and Numbering

### E. Post-election Information for Voters

Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### F. State Laws Governing Litigation over Provisional Voting

1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot

**Broader Considerations**

**G. Integrity and the Appearance of Integrity**

1. State laws or regulations providing for non or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.
2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.
3. State laws or regulation should require the evaluation process for provisional ballots to be public.

**H. Continuous Assessment of the Provisional Ballot – Process and Performance**

Defining what constitutes a successful provisional voting system is difficult. As noted earlier, the most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed.

Deleted: (  
Deleted: )

Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations to evaluate the provisional ballot process within the broader context of the electoral system. Pending such a review, the EAC can recommend that states take the following actions.

Deleted: it can  
Deleted: the

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.

2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:

Deleted: systematically  
Deleted: in a form that would enable them to  
Deleted: This

- Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (Jack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.
- Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.
- Measures of variance among jurisdictions.
- Number of poll workers trained in administration of provisional voting by polling place
- Number of jurisdictions posting information on provisional voting in the polling place
- Time required to evaluate ballots by jurisdiction

Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.

**Conclusion – Research-based, continuing improvements for provisional voting are needed**

Formatted: Bullets and Numbering

The recommendations above are based on research that began in late May 2005. Our research focused on six key questions raised by the EAC. The answers to those questions provided the foundation for our policy recommendation. Those questions are:

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, the Eagleton-Moritz team undertook the following research efforts:

Formatted: Bullets and Numbering

1. Survey of 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Review of news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.
3. Statistical analysis of provisional voting to determine associations between the use of provisional voting and such variables as states' experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification
4. Collection and review of the provisional voting statutes and regulations in all 50 states.
5. Analysis of litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Deleted: ¶

Our research-based recommendations provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states moved forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

Deleted: ¶

**ATTACHMENT 1 -- Characteristics of the Provisional Voting Process****Classification of the States**

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The categories analyzed here are:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

Formatted: Bullets and Numbering

Comment [o1]:

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

Please note that:

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and did include it in our analysis.

New vs. Old States

We classified states as “new” or “old” based on the 2001 Electionline study of provisional voting<sup>41</sup> and condensing its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

**Comment [o2]:** It would be useful here to insert a table showing our classification as old or new.

**Formatted:** Bullets and Numbering

We collapsed all of the states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots as “old” states, because the states in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as “new” states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

**Comment [o3]:** Under this criterion, how did Florida become an “old” state?

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline’s map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct’s list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter’s name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island’s first use of provisional voting was in 2004 and, therefore, classified the state as “new” to the system of provisional balloting.

Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>42</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found they had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

<sup>42</sup> "Election Preview 2004: What's changed, What Hasn't and Why". This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

Minnesota has a statewide database but was excluded from the analysis because it did not offer provisional ballots and was exempt from the HAVA requirements.

Comment [04]:

Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as "out-of-precinct." States that invalidated such ballots were categorized as "In-precinct only."

<b>Table 3</b>		
<b>CATEGORIZATION OF STATES – Counting Out-Of-Precinct Ballots</b>

#### Voter Identification

We relied on Electionline studies, including the Voter Identification study<sup>43</sup> and the 2004 Election Preview, to classify the states on their requirements for voter identification. Each state's categorization is taken directly from the Electionline studies except Hawaii.<sup>44</sup> The five different, and increasingly rigorous, categories are: Give Name (8 states), Sign Name (14 states), Match Signature (8 states), Provide ID (15 states), and Photo ID (5 states).

**Table 4**  
**CATEGORIZATION OF STATES – Forms of Identification Required**

<sup>43</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Voter%20Identification.pdf>

<sup>44</sup> In 2004, ElectionLine listed Hawaii as requiring identification. Our review of statutes revealed that Hawaii could require photo ID. Since that is the most rigorous form of identification that may be required of voters, we classified Hawaii under this category.

FINAL DRAFT

11/23/2005

Deleted: 15

*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<u>Give Name</u>	<u>Sign Name</u>	<u>Match Signature</u>	<u>Provide ID</u>	<u>Photo ID</u>
<i>Maine</i>	<u>California</u>	<u>Illinois</u>	<u>Alabama</u>	<u>Florida</u>
<i>Massachusetts</i>	<u>DC</u>	<u>Nevada</u>	<u>Alaska</u>	<u>Hawaii</u>
<i>New Hampshire</i>	<u>Idaho</u>	<u>New Jersey</u>	<u>Arizona</u>	<u>Louisiana</u>
<i>North Carolina</i>	<u>Indiana</u>	<u>New York</u>	<u>Arkansas</u>	<u>South Carolina</u>
<i>Rhode Island</i>	<u>Iowa</u>	<u>Ohio</u>	<u>Colorado</u>	<u>South Dakota</u>
<i>Utah</i>	<u>Kansas</u>	<u>Oregon</u>	<u>Connecticut</u>	
<i>Vermont</i>	<u>Maryland</u>	<u>Pennsylvania</u>	<u>Delaware</u>	
<i>Wisconsin</i>	<u>Michigan</u>	<u>West Virginia</u>	<u>Georgia</u>	
<i>Wyoming</i>	<u>Minnesota</u>		<u>Kentucky</u>	
	<u>Mississippi</u>		<u>Missouri</u>	
	<u>Nebraska</u>		<u>Montana</u>	
	<u>New Mexico</u>		<u>North Dakota</u>	
	<u>Oklahoma</u>		<u>Tennessee</u>	
	<u>Washington</u>		<u>Texas</u>	
			<u>Virginia</u>	
<b>9</b>	<b>14</b>	<b>8</b>	<b>15</b>	<b>5</b>

South Dakota complicates the effort to assign each state to a category. It permits voters to sign an affidavit that would allow them to vote without presenting photo ID. While Hawaii did not normally require photo ID, its statutes gave challenged voters the opportunity to respond by producing a photo ID.

Comment [o5]: Again, this would work better as a table.

Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

**Table 5**  
**CATEGORIZATION OF STATES – Ballot Evaluation Methods**  
*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<u>Signature Match</u>	<u>Data Match</u>	<u>Affidavit</u>	<u>Return with ID</u>	<u>NA</u>
<u>Alaska</u>	<u>Alabama</u>	<u>Connecticut</u>	<u>Indiana</u>	<u>Idaho</u>
<u>California</u>	<u>Arizona</u>	<u>Delaware</u>	<u>Iowa</u>	<u>Maine</u>
<u>Florida</u>	<u>Arkansas</u>	<u>Georgia</u>	<u>Kansas</u>	<u>Mississippi</u>

	<u>Washington</u>	<u>Vermont</u>		
	<u>West Virginia</u>	<u>Virginia</u>		
<u>4</u>	<u>14</u>	<u>14</u>	<u>10</u>	<u>9</u>

**Data Collection**

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

<b>Table 6</b>	
<b>Updated information by State</b>	
<b>Received Updated Data</b>	<b>Did Not Receive Updated Data</b>
<u>California</u>	<u>Alabama</u>
<u>District of Columbia</u>	<u>Alaska</u> <sup>45</sup>
<u>Florida</u>	<u>Arizona</u>
<u>Hawaii</u>	<u>Arkansas</u>
<u>Indiana</u>	<u>Colorado</u>
<u>Iowa</u>	<u>Connecticut</u>
<u>Kansas</u>	<u>Delaware</u>
<u>Louisiana</u>	<u>Georgia</u>
<u>Maryland</u> <sup>46</sup>	<u>Idaho</u>
<u>Missouri</u>	<u>Illinois</u>
<u>Montana</u>	<u>Kentucky</u>
<u>Nebraska</u> <sup>47</sup>	<u>Maine</u>
<u>Nevada</u>	<u>Massachusetts</u>
<u>New Jersey</u>	<u>Michigan</u>
<u>New Mexico</u>	<u>Minnesota</u>
<u>Ohio</u>	<u>Mississippi</u>
<u>Oklahoma</u>	<u>New Hampshire</u>
<u>Oregon</u>	<u>New York</u>
<u>Pennsylvania</u>	<u>North Carolina</u>
<u>Rhode Island</u>	<u>North Dakota</u>
<u>South Dakota</u>	<u>South Carolina</u>
<u>Tennessee</u>	<u>Utah</u>
<u>Texas</u>	<u>Vermont</u>
<u>Virginia</u>	<u>Wisconsin</u>
<u>Washington</u>	<u>Wyoming</u>
<u>West Virginia</u>	
<b>26 States</b>	<b>25 States</b>

<sup>45</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>46</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>47</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

**Data Differences**

The data used in this study differs from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished, on the schedule laid out in our work plan. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

<u>State</u>	<u>EDS Numbers Cast/Counted</u>	<u>Our Numbers Cast/Counted</u>	<u>Differences</u>	<u>Updated Info from State?</u>
<u>Alabama</u>	<u>6,478/1,865</u>	<u>6560/1836</u>	<u>82/29</u>	<u>No</u>

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. A rough estimate of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)\*. Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

---

\* Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems after each election when it asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

Subject Re: No Cost Extension Request 

John-

Just wanted to let you know that we've had to push back, by a week, the review of Eagleton's Best Practices document.

EAC staff are very focused on the release of the Voting Systems Guidelines; this will be completed by mid-week next week. I'm told that the Commissioners will turn their attention to the Best Practices document, immediately following this.

Subject Something to look forward to— or life after the VVSG

Hey-

I've had a chance to take a close look at the Eagleton Best Practices document.

I find it very confusing ( to say the least) and think it is a very long way from a Best Practices document we would want to or could use for our constituency.

Look forward to you all's thoughts and insights about next steps.

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.7
  - Task 3.8
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from November 1 through November 30, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

In November we completed and submitted our Provisional Voting analysis paper, including recommendations to the EAC for best practices. These policy prescriptions are based on our research and the comments of the Peer Review Group on that research. We completed a careful review of our data to reconcile it with other sources and identify the latest, most reliable information to use in the analysis. The importance of this demanding effort was described in October's Progress Report. We continue to await the EAC's comments on that final draft.

Also in November we revised the schedule for the project in light of the additional time that has been needed for review of earlier drafts by the EAC and the late completion of the Election Day Study. We made a written request to the EAC for a no-cost extension of the contract through the end of February which we understand is likely to be approved before Christmas.

Since the submission of our Provisional Voting report to the EAC on November 28, 2005, our efforts have been entirely aimed at the completion of the voter identification research. We have been advised that EAC will take several weeks to review and react to our final draft on provisional voting. As we await a January meeting on that topic, we are moving ahead

028475

quickly on the statistical analysis of voter identification data and summarizing the legal research that was completed earlier.

This Monthly Progress Report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to tom\_oneill@verizon.net or by telephone at (908) 794-1030.

### **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to Provisional Voting. Task 3.4 was completed in August, and Tasks 3.5 and 3.6 were completed in November.

#### **Task 3.6: Prepare preliminary draft guidance document.**

The report and recommendations which were sent to the EAC on November 28, 2005 recommends against the adoption of a guidance document per se and advises that the EAC adopt its recommendations as best practices. That recommendation followed agreement by the EAC with that course of action. The submission of that report and recommendations, however, constitutes the document required under this task. Before proceeding to Task 3.7 (revise the guidance document for publication) or 3.8 (arrange a public hearing on the draft guidance), we await the EAC's decision on how to proceed.

028476

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is the principal focus of our research at this time.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The 50 state (plus District of Columbia) chart has been completed, the voter identification statutes have been collected for all states and D.C., and summaries of the existing voter identification statutes have been written for all states and D.C. Moritz has completed its review of voter identification litigation. Moritz and Eagleton have worked together to review the research, clarify the categorization of that research on our charts, and reconcile the data developed in our two different research techniques categorizations.

**Challenges:** The biggest challenge facing the reconciliation process of research findings, descriptions and categorizations is that it is being done by two different teams (Moritz and Eagleton) who rely on different primary source materials. Despite the necessity this has created to reconcile conflicting data from time to time, the collaboration has also been very beneficial because it has made our research efforts more rigorous.

**Work Plan:** During December we will conclude our reconciliation and continue analysis of voter identification research, including an analysis of the most important issues and trends in voter identification litigation.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

028477

During the month of November, we developed narratives to establish how laws were passed, looking at when they were proposed and when they were eventually enacted. In the upcoming month, Eagleton will examine voter registration forms across the states to see what forms of identification are requested from mail-in registrants. The difficulty will be determining the 2004 status of the states.

### VOTER ID AND TURNOUT ANALYSIS

Now under way is a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election. In November, we have analyzed both aggregate- and individual-level data to determine whether there is any relationship between voter turnout and the various forms of voter identification states require.

**Progress:** Analysis is under way for two data sets: County-level data that includes registration and turnout rates for 2000 and 2004, as well as Census measures and indicators of the type of voter identification requirements that were in existence at the time of the 2004 presidential election. The second data set consists of the voter supplement to the November 2004 Current Population Survey. This data set allows for testing of the same hypotheses at the individual level. Preliminary findings from the aggregate data set suggest that voter ID requirements have their greatest effect at the registration stage, as opposed to the turnout stage. This is a first cut at the data, however, and we will be adding a number of control variables to the analysis to see if the relationship holds.

**Challenges:** These analyses use hierarchical linear modeling. Because voter identification requirements vary by state, one must pay special attention to other, unseen state-level influences on the data. The models are difficult to run and interpret, so the analyses are time-consuming.

**Work Plan:** The statistical analyses will continue during the month of December, and a draft of the findings is anticipated by the end of the month.

### PROJECT MANAGEMENT

#### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

028478

**Progress:** During the month of November, Eagleton contacted the PRG Members on two occasions. First, all members received the final draft provisional voting report that was submitted to the EAC. Further comments are welcome but not expected from the PRG. Second, we have asked PRG members to reserve two dates in mid-January for potential conference call sessions to review the voter identification report.

**Challenges:** No new challenges were encountered during November.

## COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

**Progress:** At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole. Upon their completion, new documents continue to be added.

**Projections:** The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

### INTRANET

**Description:** All project team members have signed on to the Intranet site, and regularly post drafts, completed materials and spreadsheets online for internal review. The Intranet facilitates the exchange of information and collaboration among project participants.

## **FINANCIAL REPORT**

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

028479

A detail of expenses incurred from project November 1- November 30, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.

Subject Re: January Progress Report 

Tom-

I have now received comments back on the Provisional Voting Best Practices document, from all of EAC's senior staff. I am in the process of combining these comments into one document, and will get the copy to you by mid-week next week.

By-and-large the comments are not major. The comment of greatest magnitude relates to the fact-checking process and the overall accuracy of regarding Eagleton's/Moritz' recording of States' previous experiences with provisional voting.

Overall, the Commission is continuing to review its option of issuing guidance on this topic, along with best practices.

Shall we schedule a conference call for Friday , February 24 at 10:00 AM to go over the EAC's comments and Eagleton putting the finishing touches on its report?

Also, when should the EAC expect the Voter ID document?

Subject Meeting with EAC in March

Karen,

The Eagleton-Moritz team would like to schedule a meeting with the EAC in March. It would be the final substantive meeting on our contract, which expires at the end of March.

The agenda would include:

1. Brief the Commission on the principal findings and recommendations of the Voter ID research and hear questions and comments on that work.
2. Discuss the changes we made to the Provisional Voting paper as a result of comments and questions from the Commission.
3. Explore the Commission's intentions for the use of our work as recommendations for best practices or otherwise.

028484

I believe the meeting should take place after you receive the Voter ID paper from us in the first week of March, and ideally after the Commission staff has had enough time for a preliminary review of it.

The earlier we could set a date for this meeting, the more key members of the team would be able to participate.

Tom O'Neill

Subject Voter ID Paper --Final Draft

Karen,

Attached is the final draft of the Voter ID paper, with recommendations for the EAC to consider promulgating as best practices. Two appendices are included as part of the draft and a third, the statistical analysis of the effects of different voter ID requirements on turnout, is attached separately to this email.

We look forward to discussing this final draft with you and with the commissioners on April 3. I'll be preparing a Powerpoint presentation for that meeting. Any guidance you can give me later this month on particular questions that briefing should address would be appreciated.

The Moritz-Eagleton team will be meeting next Tuesday at 9:30 a.m.. If you have preliminary comments you would like us to consider, that meeting would be a most convenient occasion to

028488

discuss them.

Tom O'Neill

# **REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES**

---

## **1. Introduction and Report Background**

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve implementation of the requirements for voters to show identification pursuant to [statute or regulation citation] It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

## **2. Voter Identification –Background and Approach of the Study**

Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The burden of providing required ID documents on the voter may be greater at the polls on Election Day than at the time of registration. The burden of checking ID, even as simple as a signature match, can be much greater on election workers at the polls than on those registering voters. Poll workers may be faced with long lines and limited time. This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>1</sup> The emphasis here is on Voter ID on Election Day and afterwards as election judges evaluate provisional

---

<sup>1</sup> As the Carter-Baker Commission noted, photographic ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify identification. Commission on Federal Election Reform, pp 46-47.

## FINAL D R A F T

ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

This analysis takes a view of voter ID issues broader than the rather narrow identification requirements in HAVA. Much of the national ferment over voter ID goes beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those casting a ballot for the first time who had not registered in person. The controversy in the states over voter ID stems from the HAVA requirements, goes beyond those requirements, and sets the context for the analysis here.<sup>2</sup>

Identification is often described as the critical step in protecting the integrity of the ballot, the process that ensures that the potential voter is eligible and permitted to cast a ballot and one ballot only. In fact, ensuring ballot integrity requires a perspective that takes in the entire voting process. Protecting the integrity of the ballot requires more than preventing the ineligible from voting. It also should ensure that all those who are eligible and want to vote can cast a ballot that counts, and that they can effectively cast a ballot for the candidate of their choice. The protection effort must take into account all forms of voting, including absentee ballots, and embrace each step in the process. A voting system that establishes onerous requirements for voters to identify themselves may prevent the ineligible from voting, but it may also prevent the eligible from casting a ballot. If the ID requirements of a ballot protection system block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or forget to bring to the polls the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This analysis does not include consideration of the incidence of vote fraud, the forms that it takes, nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. The EAC has commissioned a separate study of vote fraud and instructed us not to address that issue in this research.

---

<sup>2</sup> Harvard Law Review 119:1127. "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA. . . . HAVA makes explicit that it shall not 'be construed to prevent a State from establishing election technology and administration requirements that are more strict than' HAVA itself provides. The states have accepted the invitation. "

## FINAL D R A F T

Nonetheless, a broad view of ballot integrity is needed to appreciate the background and context of this narrower study. We explore the inter-relationships between Voter ID requirements and Provisional Voting and estimate the effects of various voter id requirements on turnout and on the casting of provisional ballots.

Voters lacking required ID, or who have ID that does not reflect their current address, may be able to vote only by casting a provisional ballot.<sup>3</sup> To the extent that stricter voter ID requirements divert more voters to the provisional ballot, voter ID requirements can put stress on the already pressured management of the polling place. Administering provisional ballots is more expensive than the normal ballot. Scrutiny of ID can create lines at the polling places, lines made longer as voters are diverted to the provisional voting line. Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle that will keep more citizens from the polls. A review of voter identification practices should keep in mind that America's problem may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes will be more effective if based on clear standards –legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

- Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?
- How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>4</sup>
- How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity

---

<sup>3</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>4</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

## FINAL D R A F T

that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>5</sup>

- How cost-effective is the system? Does it increase the security of the ballot at an affordable cost, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.
- If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>6</sup>
- Does it comply with the letter and spirit of Voting Rights Act?
- The seventh question is more difficult to measure than those described in the 6 questions outlined above. The Voter ID requirements should have a neutral result on the composition of the qualified electorate. That is, those requirements should not be designed to reduce the turnout of particular groups of voters who may have a propensity to support one party over another. Whatever the requirement may be, all citizens should be able to comply with it easily and at no or minimal cost.

### Summary of findings and conclusions

Voter turnout at the state level in 2004 declined where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Including other factors beyond voter id requirements diminishes the influence of voter ID on turnout. But the analysis still offers some support for the hypothesis that as the burden of voter identification

---

<sup>5</sup> In New York, in 2004, disparities in training and voting information were made all too apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>6</sup> For example, the Carter-Baker Commission accompanied its recommendation for a national voter ID card with a recommendations for an affirmative effort by the states to reach out and register the unregistered, to use the new Voter ID regime as a means to enroll more voters.

028493

## FINAL D R A F T

requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>7</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

### Recommendations for consideration and action by the EAC

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice that before states adopt a change described as increasing ballot security, states should publish an analysis of the number of eligible, potential voters that the new requirement may keep away from the polls or be permitted to cast only a provisional ballot as well as an estimate of the number of ineligible voters who will be prevented from voting.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. The data should be analyzed to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent and should describe the dynamics of voter ID in preserving the security of the ballot?

---

<sup>7</sup> Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject

028494

## FINAL D R A F T

- Useful information could be supplied by exit polling. It would identify those who had cast a provisional ballot and ask why they were unable to cast a regular ballot. Answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
- Polling to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter id requirements on electoral participation.
- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three criteria: the convenience of the voter, the total time allowed to evaluate ballots<sup>8</sup>, and the safe harbor provision in presidential elections.

---

<sup>8</sup> Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

**FINAL D R A F T**

**3. Voter ID and Turnout**

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, *Voter ID Requirements*. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility.

^In Florida and Louisiana, states that required a photo id in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

^^In these states in 2004, voters lacking a photo ID could vote by providing other ID.

\*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

\*\*State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

\*\*\*Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

\*\*\*\*Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

\*\*\*\*\*Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compare to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

\*\*\*\*\*Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

In 9 states, voters were required merely to state their names so that poll workers could locate them in the registration book. In 14 states, voters signed their names. In 8 states, voters' signatures were matched with a specimen signature. In 15 states voters had to show some form of ID, not necessarily an official picture ID. And in 5 states, voters were required to show an official photo ID, although in 2004 voters who lacked a picture ID could execute an affidavit and vote a regular ballot.

028497

## FINAL D R A F T

This neat assignment of each state to one of a few categories may fail to reflect actual practice at a polling place. Like any system run by fallible people it is subject to wide variation in practice. Voters may be confronted with demands for identification at variance with state statutes or legislation. Other voters may be waved through the process without a look at any document, no matter what the regulations may say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters may encounter.

It is not practical to attempt to capture the wide variety of how voter ID requirements may be actually implemented across the nation's tens of thousands of polling places. Recognizing that means that the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

### Effect of Voter ID requirements on Turnout

#### Summary of Findings and Conclusions

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau.<sup>9</sup>

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each

---

<sup>9</sup> See Appendix \_\_\_\_ for the full report on voter ID and turnout.

028498

## FINAL D R A F T

level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

### Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous. a form of identification, and providing a form of photo identification.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

028499

## FINAL D R A F T

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	63.1 %	State Name	61.3 %
Sign Name	58.6 %	Sign Name	60.4 %
Match Signature	62.1 %	Match Signature	59.2 %
Provide Non-Photo ID	57.8 %	Provide Non-Photo ID	57.6 %
Provide Photo ID	57.3 %	Swear Affidavit	58.7 %
Average Turnout (All States)	59.6 %		

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political-- also affect voter participation. Multivariate models that take into account other predictors an place the effects of voter identification in a more accurate context. To consider that broader context, our multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground for president, governor or senate voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-

## FINAL D R A F T

Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line.

In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line.

Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. (Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting.) Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age in years, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note

028501

## FINAL D R A F T

that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

### Discussion and Conclusions of the Analysis

The results presented here give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

209870

## FINAL D R A F T

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.
- Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.
- Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.
- Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the elderly, while they would be slightly less likely to vote as requirements range from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

The data examined in this analysis could not capture the dynamics of how identification requirements might lower turnout. Do these requirements dampen turnout because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most

028503

**FINAL D R A F T**

effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

028504

#### 4. Litigation over Voter ID Requirements

There have been a handful of cases challenging identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether or not laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on cases challenging requirements that voters present some form of identifying documents if the photo identification is the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*,

## FINAL D R A F T

Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. The court's decision in this case indicates that courts are likely to look strictly on photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions

**FINAL D R A F T**

suggest that best practice may be to conform to the NVRA's limitation on requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

028507

## FINAL D R A F T

### 5. Developments since 2004

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

This information would allow a more informed judgment to be brought to bear in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

028508

## FINAL D R A F T

HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### 6. Conclusions

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.<sup>10</sup> The dynamics of Voter ID requirements—how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That research might address that, so far as may be

---

<sup>10</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." The exclusion of voters through restrictive ID requirements could affect election outcomes as much as fraud by voters at the polls. *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

028509

## FINAL D R A F T

necessary to reduce vote fraud, could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended by our colleague Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed.<sup>11</sup>

---

<sup>11</sup> "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they *register* to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote. These electronic photos should satisfy the anti-fraud concerns of conservatives as much as printed photos that citizens would be required to bring to the polls. . . Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier."

## FINAL D R A F T

### APPENDIX –Court Decisions and Literature on Voter Identification and Related Issues

#### Court Decisions

##### Summary of Relevant Cases:

##### Challenges Prevailed:

###### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

###### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

##### Challenges Rejected:

###### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

###### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

028512

## FINAL D R A F T

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

### *McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

### *Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

### *Perez v. Rhiddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

### **Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

#### ***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

028513

## FINAL D R A F T

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

### ***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

### **Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

#### ***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

#### ***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

028514

## FINAL D R A F T

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

### ***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

### ***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

028515

## FINAL D R A F T

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

### **Current Litigation Concerning Voter ID Issues<sup>12</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>12</sup> As of January 2, 2006

028516

## FINAL D R A F T

### Georgia (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>13</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>14</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

### Indiana (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

<sup>13</sup> Litigation documents are available at the Election Law @ Moritz website.  
<http://moritzlaw.osu.edu/electionlaw/litigation/index.php>

<sup>14</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

028517

## FINAL D R A F T

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>15</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>15</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

All-

About a week ago you received a copy of the Eagleton draft report on Voter Identification. As you know, Eagleton will be coming to EAC on April 3 to do a project close-out meeting with the agency.

Should you have comments or edits that you would like me to pass along to Eagleton, regarding their draft report on Voter ID, please get them to me by **COB Friday, March 24**. so that I may pass them along to Eagleton for inclusion in their final document.

Thank you

hey-- an idea...

From Eagleton ID report[below]... perhaps something to discuss for addition in the Data collection project-- asking pollworkers to keep the numbers of those people turned away for lack of eligibility....

Would be helpful.  
Adam

...States should publish an analysis of the number of eligible, potential voters that the new requirement may keep away from the polls or be permitted to cast only a provisional ballot as well as an estimate of the number of ineligible voters who will be prevented from voting.

Subject Revised Voter ID Paper

Karen,

Attached is a new draft of the Voter ID paper, revised to take into account the comments you gave us on Tuesday as well as some points raised recently by other reviewers. We'll be bringing hard copies of this draft with us to Monday's briefing. If you could distribute the new "Executive Summary" (pages 1 – 5) in advance to those who will take part in the meeting on Monday, I think the discussion would be improved.

Our train is scheduled to get into Union Station at 10:30 on Monday. Barring Amtrak delays, we should arrive at your offices shortly before 11.

Tom O'Neill

# FINAL DRAFT REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

---

## Report Background

This report to the United States Election Assistance Commission (EAC) presents an analysis of voter identification requirements across the country and makes recommendations for best practices to improve implementation of voter ID requirements at the polls. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under a contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

## Executive Summary

### Methods

To explore the effects of voter ID requirements on electoral participation in 2004, as measured by turnout, we gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. We assigned each state to one of five categories based on its ID requirements. The five categories are progressively more rigorous based on the demands they make on both voters<sup>1</sup> (and, to some extent) on election workers. The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample,

---

<sup>1</sup> Even the most relaxed provisions for identification at the polls — anything stricter than the honor system used in North Dakota — will impose some burden on particular voters. *Harvard Law Review* 119:1146

## FINAL D R A F T

which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents are not uniformly and conveniently available to all voters.

We collected data on turnout in all counties to permit an estimate of the relationship between the rigor of the ID requirements and the level of turnout. This aggregate analysis is useful, but does not provide valid estimates on the effects of different kinds of ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates.) To allow that analysis, we used the Census Bureau's Current Population Survey from November 2004, which asked a large sample of Americans about their experience in the election. It has the disadvantage of relying on self reports by respondents about their registration status, citizenship, and experience in the polling place, but it provides the demographic data needed to supplement the aggregate analysis.

To understand the legal issues raised by voter ID requirements, we collected and analyzed the few major cases that have been decided on this issue. The decisions so far suggest the constitutional and other constraints to policies on voter ID requirements.

### Findings

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack precise information on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.

Voter turnout at the state level in 2004 was lower in states where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required

## FINAL D R A F T

voters to state their names, compared to 57.3 percent in states that required photo identification. Those figures, however, probably overstate the effect since the inclusion of other factors beyond voter ID requirements in the analysis diminishes the extent of influence of voter ID on turnout. After taking account of the other factors, the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents orf people living below the poverty line.

Our analysis of litigation suggests that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not now sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>2</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

A voting system that requires voters to produce an identify document or documents may indeed prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the

---

<sup>2</sup> Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject.

## FINAL D R A F T

ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

### Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous Voter ID requirements affect the decision by potential voters to go or stay away from the polls-- are not well understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice the publication of a “Voting Impact Statement” by states considering changing their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that a proposed stricter ID requirement may keep away from the polls or be permitted to cast only a provisional ballot; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should analyze this publish an analysis of this information to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. The states should also be encouraged to use this information to increase the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections.
  - Useful information could be supplied by exit polling or surveys of voters by local election officials. It would make clear why those who cast a provisional ballot

## FINAL DRAFT

were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.

- Polling to ask voters what they know about the voter ID requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots<sup>3</sup>, and the safe harbor provision in presidential elections.
- Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional.

### **Background and Approach of the Study**

Establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The stress on voters to provide required ID documents may be greater at the polls on Election Day than when registering. The pressures arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may be faced with long lines and limited time.

---

<sup>3</sup> Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

## FINAL DRAFT

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>4</sup> The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks broadly at voter ID issues and goes beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures on voter ID goes ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. The controversy in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.<sup>5</sup>

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.<sup>6</sup> Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

---

<sup>4</sup> As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

<sup>5</sup> Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

<sup>6</sup> "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

## FINAL D R A F T

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has informed us that it has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our analysis of the effects of voter ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.<sup>7</sup> Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- can divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.<sup>8</sup> And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the

---

<sup>7</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>8</sup> The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

028541

## FINAL D R A F T

polls. In conducting this analysis, we were sensitive to the observation that the problem with American elections may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes can be more effective if based on clear standards –legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?<sup>9</sup>
2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>10</sup>
3. How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>11</sup>
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.<sup>12</sup> A thorough, objective

---

<sup>9</sup> "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)

<sup>10</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

<sup>11</sup> In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>12</sup> "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at

## FINAL D R A F T

impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>13</sup>
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. Does the Voter ID requirement have a neutral result on the composition of the qualified and eligible electorate? ID requirements should not be designed to, or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another. Whatever the requirement may be, can all citizens comply with it easily and at no or minimal cost?

### **Voter ID and Turnout**

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, *Voter ID Requirements*. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID.

This neat assignment in the following table and map of each state to one category no doubt fails to reflect actual practice at many polling places. Like any system run by fallible people, the voter ID process is subject to wide variation in practice. Voters may be confronted with demands for identification different from the directives in state statutes or regulation. Some voters may be waved through the process without a look at any document, no matter what the regulations say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters actually encounter.

---

administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

<sup>13</sup> For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen Hasen's has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).

^In Florida and Louisiana, states that required a photo id in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

^In these states in 2004, voters lacking a photo ID could vote by providing other ID.

\*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

\*\*State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

\*\*\*Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

\*\*\*\*Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

\*\*\*\*\*Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compare to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

\*\*\*\*\*Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

**Figure 1**

**Voter ID Requirements 2004**

## FINAL D R A F T

Since it is not practical to attempt to capture the wide variety of how voter ID requirements are actually implemented across the nation's tens of thousands of polling places, the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

### Effect of Voter ID requirements on Turnout

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau.<sup>14</sup>

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

---

<sup>14</sup> See Appendix \_\_\_ for the full report on voter ID and turnout.

028546

## FINAL D R A F T

### Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit is regarded as the most rigorous.

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

028547

**FINAL D R A F T**

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	63.1 %	State Name	61.3 %
Sign Name	58.6 %	Sign Name	60.4 %
Match Signature	62.1 %	Match Signature	59.2 %
Provide Non-Photo ID	57.8 %	Provide Non-Photo ID	57.6 %
Provide Photo ID	57.3 %	Swear Affidavit	58.7 %
Average Turnout (All States)	59.6 %		

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political-- also affect voter participation. Multivariate models that take into account other predictors can place the effects of voter identification in a more accurate context. The multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line. In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. The decline in turnout is particularly noticeable in counties with concentrations of Hispanic residents or individuals who live below the poverty line. Determining if the reduction in turnout is, in fact, among the Hispanic or poor residents of those counties requires further research at the individual level.

028548

## FINAL D R A F T

Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting. Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

028549

## FINAL D R A F T

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

### Discussion and Conclusions of the Analysis

The results give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.

028550

## FINAL D R A F T

- Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.
- Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.
- Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the self-reports of elderly voters, while indicating that they would be slightly less likely to vote as ID requirements become stricter, do not show a dramatic effect.

The data examined in this analysis could not capture the dynamics of how identification requirements lower turnout. Do know the voter ID and stay away from the polls because they cannot or do not want to meet them? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

It is important to note that the 2004 data do not allow us to draw conclusions about the effect of laws such as those recently passed in Georgia and Indiana, which require government-issued photo ID. No such laws were in place in 2004, and the five states that then required photo ID at the time allowed voters who signed an affidavit or provided another form of identification to cast a regular ballot.

028551

## FINAL D R A F T

### Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*,

028552

## FINAL D R A F T

Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. The court's decision in this case indicates that courts are likely to look strictly on photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions

028553

## FINAL D R A F T

suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

### Developments since 2004

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

028554

## FINAL D R A F T

HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### 6. Conclusions

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.<sup>15</sup>

The dynamics of Voter ID requirements—how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in

---

<sup>15</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

028555

## FINAL D R A F T

the states would be improved by additional research sponsored by the EAC. So far as it may be necessary to reduce vote fraud made possible by inadequate voter ID, the research could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended elsewhere by one of the authors of this report, Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed.<sup>16</sup>

---

<sup>16</sup> "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they *register* to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote. . . . Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier. "

## APPENDIX – Court Decisions and Literature on Voter Identification and Related Issues

### Court Decisions

#### Summary of Relevant Cases:

#### Challenges Prevailed:

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### Challenges Rejected:

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

028558

## FINAL D R A F T

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

### *McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

### *Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

### *Perez v. Riddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

### **Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

#### ***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

028559

## FINAL D R A F T

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

### ***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

### **Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

#### ***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

#### ***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

028560

## FINAL D R A F T

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

### ***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

### ***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

028561

## FINAL D R A F T

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

### ***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

### ***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

### **Current Litigation Concerning Voter ID Issues<sup>17</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

## FINAL D R A F T

### Georgia (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>18</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>19</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

### Indiana (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

<sup>18</sup> Litigation documents are available at the Election Law @ Moritz website.

## FINAL D R A F T

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>20</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>20</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

Subject Re: BoA and Standards Board agendas 

History:

 This message has been replied to.

I have taken a look at the agendas. My questions start with assignment as resource person. Is Peggy going to be present for the Vote Fraud and Intimidation presentation? I have not been the person refereeing between Job and Tova, nor am I up to date on what their findings and work are. If I am just there to support the meeting, that's great, but Peggy should be there to make any substantive comments. I suffer from a similar problem with regard to the Eagleton presentation (other than what I gathered from their presentation a few weeks ago).

Perhaps what I need to know is what is the "resource person" supposed to do?

As a second question, do we know whether this lunch on Tuesday is "set". The hotel contract will have to be amended to include this lunch. I don't want to move forward on setting that up if it is not approved by the two Boards or it is otherwise not going to occur.

Third issue is that last time the Standards Board wanted a parliamentarian -- not volunteering, but that should be considered in terms of how our staff is assigned.

## MEMORANDUM

---

**TO:** MEMBERS OF EAC BOARD OF ADVISORS  
**FROM:** BEVERLY KAUFMAN, CHAIR  
PAUL DEGREGORIO, EAC COMMISSIONER  
**DATE:** APRIL 24, 2006  
**SUBJECT:** UPCOMING MEETING OF BOARD OF ADVISORS, MAY 23-24, 2006

**The next meeting of the EAC Board of Advisors (to be held jointly with the EAC Standards Board) will be held in Washington, D.C. on Tuesday, May 23 and Wednesday, May 24, 2006 at the Hamilton Crown Plaza hotel.** We hope you will be able to attend this important meeting, which will focus on consideration and discussion of a number of ongoing election administration research projects currently underway by the EAC. Additionally, there will also be a discussion regarding recent work conducted by the National Institute of Standards and Technology (NIST) regarding voter verifiable audit trail. (Please see the draft agenda attached for additional information.)

As was the case with our previous meetings of the EAC Board of Advisors, the EAC will pay the cost of travel, hotel and a Federal per diem for any member of the Board of Advisors wishing to attend the May 2006 meeting. Our travel agent, Adventure Travel, will be contacting you with further information regarding travel and lodging arrangements. If you have any questions, please contact Amie Sherrill of the Election Assistance Commission. She may be reached at (202) 566-3100 (email address is [asherrill@eac.gov](mailto:asherrill@eac.gov)).

Thank you in advance for your willingness to join us in Washington, D.C. We look forward to seeing you soon.

028575

**U.S. ELECTION ASSISTANCE COMMISSION  
Board of Advisors Meeting Agenda  
Washington, D.C.  
May 23 – 24, 2006**

**Tuesday, May 23, 2006**

**Noon – 1:15 P.M. LUNCHEON**

**Brief Welcoming Remarks**  
Chairman Paul DeGregorio

**EAC Staff Presentations:**

- Katrina Voting Assistance Relief* (Edgardo Cortes);
- Public Access Portals* (Edgardo Cortes);
- Legal On-Line Information Clearinghouse* (Julie Thompson-Hodgkins);
- Design for Democracy* (improvements to ballot design, national voter registration mail-in form and polling place signage) (Karen Lynn-Dyson)

***NOTE: The EAC Standards Board will be meeting simultaneously.***

**1:15 – 1:30 P.M. BREAK**

**1:30 – 2:30 P.M. BOARD OF ADVISORS PLENARY SESSION**  
Session Chaired by Beverly Kaufman, Chair

- Appointment of Parliamentarian
- Call of Roll and Appointment of Proxy Committee
- Appointment of Resolutions Committee
- Review of Meeting Book Materials

Subject Voting Fraud-Voter Intimidation Working Group Meeting

Dear Commissioners:

This is to let you know that the Working Group for our Voting Fraud and Voter Intimidation preliminary research project is scheduled to meet in EAC's large conference room the afternoon of Thursday, May 18. I will provide more information about this meeting to you later.

Subject Re: Working Group-Perez 

As you may recall, the Commissioners directed me to find a nonpartisan local election official to serve on the Working Group. The three of us discussed the desirability of having a Hispanic. I proposed that I find someone from Texas because of that State's colorful history of voting fraud and their innovative approaches to combat it. In those Texas counties that hire Election Administrators to run elections, rather than having elected officials do so (Tax Assessor for voter registration; County Clerk for balloting), the Election Administrator is hired by the County Election Commission and is supposed to perform his or her duties in a nonpartisan manner. (See attached excerpts from Texas Election Code regarding election administrator hiring and restrictions on partisan activity.)

Any experienced Texas election official will be familiar with voting fraud and voter intimidation schemes used in that State. Mr. Perez has over 13 years experience as a county Election Administrator in Texas. You won't find many news articles mentioning him because he has kept his nose clean. (The Texas press, as in many other parts of the country, prefers to report bad news.) Mr. Perez is plugged into the association of Texas election officials and the two largest organizations of election officials in this country: the International Association of Clerks, Records, Election Officials and Treasurers (IACREOT); and The Election Center. He is a past President and past Chairman of the Legislative Committee for the Texas Association of Election Administrators. He currently serves on IACREOT's Election Officials Committee, which plans the educational sessions for election officials that are conducted at that organization's conferences. His peers in IACREOT and The Election Center have selected his submissions on web presentations (IACREOT) and his professional practices papers (Election Center) for awards. Mr. Perez also has access to information from other States through his membership in IACREOT and The Election Center. He also has a sense of humor, which you will note if you access the staff web page on the Guadalupe County Elections web site and hear the Mission Impossible theme .. something that might be useful in the upcoming meeting.

Guadalupe County is small but growing. In 2004, the county had over 65 thousand registered voters (a number more than doubled the number of registered voters in 1988). A third of the county's population claims Hispanic or Latino origin, according to the U.S. Census Bureau. The county is in south central Texas and is bordered by Comal, Hays, Cladwell, Gonzales, Wilson, and Bexar counties. In the 1980s, the county was predominately a farming community; but in recent years, many people have moved from

028588

San Antonio (Bexar County) to Guadalupe County, preferring to live in Guadalupe County and work in Bexar County.

Subject: Re: Materials for Standards Board (DRAFT) 

Adam:

Regarding the **Vote Count/Recount** contract, I am trying to schedule a teleconference with Thad for tomorrow. We will discuss preparations for his presentation, among other things. He may suggest additional materials, other than the testimony, that may be acceptable to us.

Regarding the **Vote Fraud/Voter Intimidation** project, I don't think the materials will include a written recap of the Working Group meeting, scheduled for May 18, if we have to have the materials to you NLT COB May 17. I can provide a verbal recap at the meeting. I may be able to pull together a written recap after May 18, but it won't be available much earlier than the week of the meetings.

Let me know if you have any questions. --- Peggy

Subject: Materials for Standards Board (DRAFT)

Attached, please find draft letter to be sent to the Commissioners. Any comments or corrections, please make them and send them back to Amie and myself. We hope to send this email by 3 PM today, so please take a look quickly-- for your projects.

Commissioners:

Peggy, Edgardo, Karen, Laiza, Adam and Amie met this afternoon to discuss what materials will be ready to present to the Standards Board and Board of Advisors members during the meetings later this month. Listed below is what we have determined to be available for their review and feedback. Please review this list and offer your feedback.

Also, attached is an updated SB agenda with "comments" on work product for each project to be discussed.

Design for Democracy - exhibits to be on display for board member review and feedback; Ric Grefe will be present with KLD to discuss the processes used to get to these specific examples; Preliminary Design Report (dated April 10, 2006) to be delivered electronically to the members for their review prior to the meeting

028585

Legal Information Clearinghouse - demo version of the website will be available to show

Public Access Portals - there is a conference scheduled for June 16-18; a tentative agenda and, if desired, a list of participants will be made available to the members for their review and feedback; also future steps can also be outlined for their feedback

Katrina Voting Assistance Relief - due to the limited amount of information that we can offer, we propose eliminating this topic and substituting discussions on our Language Working Group meetings

Language Working Groups - the members will be updated on our two working group meetings and the information received at both, as well as our next steps

Provisional Voting - a draft of the final report is to be delivered to the 4 C's by 5/11 for their review and feedback; product following 4C review will be available 5/17 for electronic distribution to board members

Poll Worker R T & R (including College Pollworker) - reports as they stand now are not ready to be presented, according to the KLD; Peggy and Karen to communicate to project managers the need for a report by 5/11 for review by the 4 C's

Proposed Management Guidelines - Connie, Brit, and Brian to determine on 5/10 what materials are ready for presentation to board members; currently a 3 page overview briefing of guideline principles and a 20 page chapter on security principles have been prepared

Vote Count/Recount - materials to be delivered to board members include the public testimony given by Thad Hall and Doug Chapin at our Seattle public meeting and several case studies outlining examples

EAC Election Day Survey - draft report with changes/updates highlighted and website application clips to be presented (Ready).

Voting Fraud/Voter Intimidation - a summary of the preliminary research and a recap of the discussions of the May 18 working group meeting offering brainstorming ideas, not advice

NIST/TGDC activities - Allan Eustis states that NIST is working to provide their summary of materials to be provided, and that they will get that to us ASAP.

Voter Identification - a PowerPoint presentation outlining the process and a summary of findings. Peer review group to occur May 11th, with final Draft due the 15th. At this time, Commissioners can determine whether Draft Report is ready to submit to the SB and BOA.

**U.S. ELECTION ASSISTANCE COMMISSION**

**Status Report on the  
Voting Fraud-Voter Intimidation Research  
Project**

**May 17, 2006**

**028591**

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

028592

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people – including representatives from the Department of Justice (DOJ) - indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. While DOJ's Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance, the Election Crimes Branch, Public Integrity Section, has increased prosecutions of individual instances of felon, alien, and double voting at the same time as it maintains an aggressive pursuit of systematic schemes to corrupt the electoral process.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.
- A few recommend returning to allowing use of absentee ballots "for cause" only if it were politically feasible.

- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

## **NEWS ARTICLES**

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

### **Absentee Ballots**

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

028597

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio and Pennsylvania.

### **“Dead Voters and Multiple Voting”**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

028599

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

I am told that a Wordperfect copy of the Provisional document will be fine.

EAC staff will convert it to a PDF file. Please sent the final drafts of the reports ASAP.

Also, you are correct to note the changes in the time allotments Please divide the time among your staff as you deem appropriate.

Subject RE: Presentations at the EAC Governing Boards

Karen, I don't have the capacity to produce a PDF copy of the report. (I thought we discussed this last week and you agreed that the word document would suffice.) Someone at Eagleton could surely covert the DOC file to PDF, but since I just read your email now (4:50), we could not provide a PDF copy today. Please let me know if you want me to pursue this tomorrow.

Thanks for the schedule below. But it raises a question. Earlier this week you told me that the Commissioners asked that we limit our presentation to 10 minutes and leave the rest of the time for questions and comments. As I noted in my response, condensing our reports to 10 minutes poses a challenge. Is the 10 minute limit no longer operative?

Tom O'Neill

Tom-

Look forward to getting a PDF copy of the final versions of the Voter ID paper and the Provisional Voting Paper by COB today

Here is the timing breakdown for next week's presentations:

**EAC Standards Board ( 137 members)**

**Tuesday, May 23, 2006**

**2:30-4:00 PM**

**Hamilton Ballroom**

Provisional Voting

45 minutes for presentation

45 minutes for questions and answers

**Wednesday, May 24, 2006**

**1:40-2:45 PM**

**Hamilton Ballroom**

Voter Identification

40 minutes for presentation

25 minutes for questions and answers

**EAC Board of Advisors ( 36 members)**

**Wednesday, May 24, 2006**

**8:30-9:15 AM**

**Lafayette Park Ballroom**

Provisional Voting

20 minutes for presentation

25 minutes questions and answers

**Wednesday, May 24, 2006**

**11:00-11:55 PM**

**Lafayette Ballroom**

Voter Identification

30 minutes presentation

25 minutes questions and answers

**EAC General Counsel Julie Thompson - Hodgkins will facilitate /moderate all of your sessions**

Will be in touch tomorrow after the Commissioners have met.

Subject PV Final Draft for Review by Advisory and Standards Boards

Karen,

Attached is the Final Draft of our report on Provisional Voting for review by the Advisory Board and the Standards Board. I understand from our conversation earlier today that it will be reviewed by the Commissioners at their meeting next week, and, if approved by them, distributed to the boards in advance of their meetings on May 23 and 24. This report will form the basis of our PowerPoint briefing for the boards at those meetings. I will not have hard copies of those PowerPoint presentations for distribution to the boards until the day of the meeting.

We intend to have the Final Draft Voter ID Report to you in time for review by the Commissioners at their second meeting next week.

Thanks for your guidance.

**The Research Team**

This research report on Provisional Voting in the 2004 election is part of a broader analysis that also includes a study of Voter Identification Requirements, a report on which is forthcoming. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

## EXECUTIVE SUMMARY

### Background and Methodology

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005.

The Help America Vote Act of 2002 (HAVA, (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient. Section 302(a) of HAVA required states to establish provisional balloting procedures by January 2004.<sup>1</sup> The process HAVA outlined left considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voter eligible to cast a provisional ballot that will be counted and in what jurisdiction (precinct or larger unit) the ballot must be cast in order to be counted.<sup>2</sup>

The general requirement for provisional voting is that, if a registered voter appears at a polling place to vote in an election for Federal office, but either the potential voter's name does not appear on the official list of eligible voters for the polling place, or an election official asserts that the individual is not eligible to vote, that potential voter must be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the EAC's Election Day Survey, "first-time voters who registered by mail without identification and cannot provide identification, as required under HAVA. . ." <sup>3</sup> HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. Election administrators are required by HAVA to notify individuals of their opportunity to cast a provisional ballot.

---

<sup>1</sup>The Election Center's National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing "voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted." It recommended "in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions." See [www.electioncenter.org](http://www.electioncenter.org).

<sup>2</sup>The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in *Sandusky County Democratic Party v. Blackwell*, 387 F.3d565 (6<sup>th</sup> Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA's definition of "jurisdiction" incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define "jurisdiction" for the purpose of counting a provisional ballot.

<sup>3</sup>The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See <http://wired.com/news/evote/0,2645,63298,00.html>. (Our analysis revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Our research began in late May 2005. It focused on six key questions raised by the EAC.

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, we:

1. Surveyed 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Reviewed the EAC's Election Day Survey, news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.<sup>4</sup>
3. Analyzed statistically provisional voting data from the 2004 election to determine associations between the use of provisional voting and such variables as states' experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification.
4. Collected and reviewed the provisional voting statutes and regulations in all 50 states.
5. Analyzed litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Our research is intended to provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states move forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly those states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

## KEY FINDINGS

### Variation among the states

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63%, were counted. Provisional ballots accounted for a little more than 1% of the final vote tally. These totals obscure the wide variation in provisional voting among the states.<sup>5</sup>

---

<sup>4</sup> Attachment 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures. It also describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

<sup>5</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

028612

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Six states accounted for two-thirds of all the provisional ballots cast.<sup>6</sup>
- The percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%.
- The portion of provisional ballots cast that were counted ranged from 96% in Alaska to 6% in Delaware.
- States with voter registration databases counted, on average, 20% of the provisional ballots cast.
- States without databases counted ballots at more than twice that rate: 44%.<sup>7</sup>
- States that provided more time to evaluate provisional ballots counted a greater proportion of those ballots. Those that provided less than one week counted an average of 35.4% of their ballots, while states that permitted more than 2 weeks, counted 60.8%.

An important source of variation among states was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>8</sup>

### Variation within states

Within states, too, there was little consistency among different jurisdictions. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors (including the training of election judges or poll workers) beyond statewide factors, such as experience or the existence of voter registration databases, also influence the use of provisional ballots.

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot.

Resources available to administer provisional voting varied considerably among and within states. Differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.

---

<sup>6</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>7</sup> As the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without." Report on the Commission on Federal Election Reform, "Building Confidence in U. S. Elections," September 2005, p. 16.

<sup>8</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.

In precincts located in districts where many voters live in poverty and have low levels of income and education, the voting process, in general, may be managed poorly. Provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

## **The lessons of litigation**

Successful legal challenges highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called “wrong precinct issue” – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. Most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots. This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right --the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot.

## **States move to improve their processes**

Shortly after the 2004 election, several states came to the conclusion that the administration of their provisional voting procedures needed to be improved, and they amended their statutes. The new legislation highlights areas of particular concern to states about their provisional voting process.

- Florida, Indiana, Virginia, and Washington have clarified or extended the timeline to evaluate the ballots.
- Colorado, New Mexico, North Carolina, and Washington have passed legislation focused on improving the efficacy and consistency of the voting and counting process.
- Colorado, Arkansas, and North Dakota took up the issue of counting provisional ballots cast in the wrong precinct.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices that draw on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting. The important effect of experience on the administration of the provisional ballot process indicates that the states have much they can learn from each other.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## SUMMARY OF RECOMMENDATIONS FOR BEST PRACTICES

State efforts to improve the provisional voting process have been underway since the 2004 election. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states.

### Take a quality-improvement approach

Defining what constitutes a successful provisional voting system is difficult. Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. A first step is for states to recognize that improving quality begins with seeing the provisional voting process as a system and taking a systems approach to regular evaluation through standardized metrics with explicit goals for performance. EAC can facilitate action by the states by recommending as a best practice that:

- Each state collect data systematically on the provisional voting process to permit evaluation of its voting system and assess changes from one election to the next. The data collected should include: provisional votes cast and counted by county; reasons why provisional ballots were not counted, measures of variance among jurisdictions, and time required to evaluate ballots by jurisdiction

### Emphasize the importance of clarity

Above all else, the EAC should emphasize the importance of clarity in the rules by which each state governs provisional voting. As state legislators and election officials prepare for the 2006 election, answers to the questions listed in the recommendation section of this report could be helpful. Among those questions are:

- Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate?
- Do the procedural requirements of the system permit cost-efficient operation?
- How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

### Court decisions suggest areas for action

The court decisions following the 2004 election also suggest procedures for states to incorporate into their procedures for provisional voting. EAC should recommend to the states that they:

- Promulgate clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.
- Provide effective materials to be used by local jurisdictions in training poll workers on such procedures as how to locate polling places for potential voters who show up at the wrong place.
- Make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.

### Assess each stage of the provisional voting process

028614

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Beyond the procedures suggested by court decisions, states should assess each stage of the provisional voting process. They can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process.

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot. Our recommendations for best practices to avoid error at the polling place include:

- The layout and staffing of the multi-precinct polling place is important. States should ensure that training materials distributed to every jurisdiction make poll workers familiar with the options available to voters.
- The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting and include take-away information for the voter on the steps in the ballot evaluation process.
- Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. Best practice would be for states should provide guidelines (as do Connecticut and Delaware) to estimate the supply of provisional ballots needed at each polling place.

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted.

- State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Kansas allows voters to proffer their ID by electronic means or by mail, as well as in person.
- More provisional voters have their ballots counted in those states that count ballots cast outside the correct precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence.
- If a state does require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location. While the best practice might be for poll workers to direct the voter to correct precinct poll workers' advice is not always correct, and the voter should be protect against ministerial error.
- Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.

In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. Our research did not identify an optimum division of the five weeks available.

028615

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

After the election, timely information to voters about the disposition of their provisional ballot can enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

- Best practice for the states is to establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### Final observation

The detailed examination of each stage in the provisional voting process can lay the foundation each state needs to improve its system. Efforts to improve provisional voting may be most effective as part of a broader effort by state and local election officials to strengthen their systems. Collecting and analyzing data about those systems will enable states to identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as ways to reduce the need for voters to cast their ballots provisionally.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## Provisional Voting in 2004

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.

These totals obscure the wide variation in provisional voting among the states.<sup>9</sup> Six states accounted for two-thirds of all the provisional ballots cast.<sup>10</sup> State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted provisional ballots at more than twice that rate, 44%.

An important source of variation was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>11</sup>

- The percentage of the total vote cast as provisional ballots averaged more than 2% in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.<sup>12</sup>
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Those voting with provisional ballots in experienced states had their ballots counted more frequently than those in the new states. This experience effect is evidence that there is room for improvement in provisional balloting procedures, especially in those states new to the process.<sup>13</sup> That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

<sup>9</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

<sup>10</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>11</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

<sup>12</sup> To compensate for the wide differences in vote turnout among the 50 states the average figures here are calculated as the mean of the percent cast or counted rather than from the raw numbers of ballots cast or counted.

<sup>13</sup> Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit's "6-day time limit to process provisional ballots was very challenging and unrealistic. To overcome this challenge, *the entire department's employees were mobilized to process provisional ballots.*" (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.

028617

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Be prepared to direct voters to their correct precincts with maps;
- Regard provisional voting as easy to implement;
- Report that provisional voting sped up and improved polling place operations
- Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from “new” states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC can facilitate the exchange of experience among the states and can offer all states information on more effective administration of provisional voting.

Concluding optimistically that experience will make all the difference, however, may be unwarranted. Only if the performance of the “new” states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Our current understanding of how provisional voting worked in 2004 is not sufficient to determine unambiguously which view is correct.

1. “New” states may have a political culture different from “old” states. That is, underlying features of the “new” states political system may be the reason they had not adopted some form of provisional voting before HAVA. The “new” states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. The training they offer poll workers about provisional ballots may not be as frequent or effective as in other states. If the inconsistent performance in the “new” states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots -- as measured by intrastate consistency in administration--- will be harder and take longer to achieve.<sup>14</sup>
2. “Old” states may devote fewer resources to updating their registration files or databases because they consider provisional ballots as a reasonable fail safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

---

<sup>14</sup> Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, “no state gave the voter the right to find out the status of their ballot after the election. “ Now all offer that opportunity. See Bali and Silver, “The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000,” manuscript, Department of Political Science, Michigan State University. Resisting HAVA’s mandates through foot-dragging lacks any legitimate foundation in law or policy.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- The more rigorous the verification requirements, the smaller the percentage of provisional ballots that were counted. Some states verified provisional ballots by comparing the voter's signature to a sample, some matched such identifying data as address, birth date, or social security number, others required voters who lacked ID at the polling place to return later with the ID to evaluate the provisional ballot, and some required provisional voters to execute an affidavit.<sup>15</sup>
  - In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
  - In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
  - In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
  - In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office
- Voter registration databases provided information that reduced the number of provisional ballots counted.<sup>16</sup> In states using provisional voting for the first time, states with registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.
- States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted ballots cast only in the proper precinct counted an average of 42% of provisional ballots.<sup>17</sup>

<sup>15</sup> See Table 2 in Appendix 2 for information on the verification method used in each state.

<sup>16</sup> The Election Day Survey found that states using statewide voter registration databases reported a lower incidence of casting provisional ballots than states without voter registration databases, suggesting that better administration of voter registration rolls might be associated with fewer instances where voters would be required to cast a provisional ballot due to a problem with their voter registration.

<sup>17</sup> The Election Day Survey concluded that: "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."

028619

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In experienced states, the disparity was even more pronounced: 52% of provisional ballots cast were counted in states requiring in-district ballots, while 70% were counted in those allowing out-of-precinct ballots.
- If all states had counted out-of-precinct ballots, perhaps 290,000 more provisional ballots would have been counted across the country.<sup>18</sup>
- States that provide a longer the time to evaluate provisional ballots counted a higher proportion of those ballots.<sup>19</sup>
  - Fourteen states permitted less than one week to evaluate provisional ballots, 15 states permitted between one and two weeks, and 14 states permitted greater than two weeks<sup>20</sup>.
  - Those states that permitted less than one week counted an average of 35.4% of their ballots.
  - States that permitted between one and two weeks counted 47.1%.
  - States that permitted more than 2 weeks, counted 60.8% of the provisional ballots cast<sup>21</sup>.
  - The effect of allowing more time for evaluation is felt most strongly in states where more than 1% of the overall turnout was of provisional ballots. In states where provisional ballots were used most heavily, those that permitted less than one week to evaluate ballots counted 58.6% while those that permitted one to two weeks counted 65.0% of ballots, and those states that permitted greater than three weeks verified the highest proportion of provisional ballots, at 73.8%.

## Variation Within States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors beyond statewide factors, such as verification requirements or the time provided for ballot evaluation, also influence the provisional voting process. Reacting to the lack of consistency within states, the Carter-Baker Commission recommended that "states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state."<sup>22</sup>

Election Line reported that:

---

<sup>18</sup> This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

<sup>19</sup> See Appendix \_\_, Relationship Between Time Allotted to Verify Provisional Ballots and the Level of Ballots that are Verified, David Andersen, The Eagleton Institute of Politics

<sup>20</sup> Many thanks to Ben Shepler, of the Moritz College of Law, for assembling complete data on the time requirements states permitted for the counting of provisional ballots.

<sup>21</sup> 43 states are included in this analysis, including Washington D.C. The 7 election-day registration states are omitted, as is Mississippi, which never provided data on provisional ballots. North Carolina is also omitted from the regressions, as it does not have a statewide policy on how it verifies provisional ballots.

<sup>22</sup> Recommendation 2.3.2 of the Report of the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p.16. The report also observed that, ". . .different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated."

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, and inadequately staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important in such districts. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

### **Effectiveness of Provisional Voting**

The certainty of our conclusions about the effectiveness of provisional voting is limited because of the complexity of the problem and a lack of important information. An ideal assessment of how well provisional ballots worked in 2004 would require knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting; their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. Information needed about the eligibility or registration status of provisional voters is also not available.

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were not

028621

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know that in 2004 provisional ballots allowed 1.2 million citizens to vote, citizens who would otherwise have been turned away from the polls.

Since we do not know the total number of registered voters who might have voted but could not makes a precise, quantitative estimate of the effectiveness of provisional voting impossible. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the 2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

***Estimates of Votes Lost In 2000 Presidential Election***

<b>Votes Lost (Millions)</b>	<b>Cause</b>
1.5 – 2	Faulty equipment and confusing ballots
1.5 – 3	Registration mix-ups
<1	Polling place operations
?	Absentee ballot administration

***Table 1 Cal Tech – MIT Voting Technology Project Estimates***

4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. In 2004, about 1.2 million provisional voters were counted. A rough estimate, then, of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)<sup>23</sup>. Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

### **Legislative Response**

Indeed, several states<sup>24</sup> came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

<sup>23</sup> Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems. After each election the CPS asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or they were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

<sup>24</sup> Twelve states made statutory or regulatory changes: Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Louisiana, Montana, New Mexico, North Carolina, Virginia and Wyoming. See Table 4 in Appendix 2.

028622

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Not enough time to examine and count the provisional ballots. Florida, Indiana, Virginia, and Washington all have clarified or extended the timeline to evaluate the ballots. But taking more time can prove a problem, particularly in presidential elections with the looming deadline to certify the vote for the Electoral College.<sup>25</sup>

Lack of uniform rules for counting ballots and effective training of the election officials in interpreting and applying those rules to determine the validity of ballots. Colorado, New Mexico, North Carolina, and Washington have all passed legislation focused on improving the efficacy and consistency of the voting and counting process.

## Litigation

Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called “wrong precinct issue” – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right --the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to

---

<sup>25</sup> The resources available to evaluate and count provisional ballots within a tight schedule may not be easily available. The General Accounting Office reports that Detroit, where 1,350 provisional ballots were cast and 123 counted, found the 6-day time frame for processing provisional ballots “very challenging and unrealistic. To overcome this challenge, the *entire department’s employees were mobilized to process provisional ballots.*” The report also found that in Los Angeles County, “staff had to prepare duplicate ballots to remove ineligible or invalid contests when voters cast their ballots at the wrong precinct. To overcome this challenge, staffing was increased to prepare the duplicate ballots.” In a close, contested election, “duplicate” ballots would doubtless receive long and careful scrutiny.” See Appendix 7, GAO, “Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote,” September 2005. (GAO Report-05-997)

028626

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted an absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

## RECOMMENDATIONS

Because every provisional ballot counted represents a voter who, if the system had worked perfectly, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use of provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. The statewide voter registration database will facilitate verifying that ballot, but the voter will still have voted provisionally. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

The wide variation in the implementation of provisional voting among and particularly within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting.

### Recommendations for Best Practices

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

### Self-evaluation of Provisional Voting –4 Key Questions

The first need to achieve greater consistency within each state is to think about provisional voting systematically. As legislators, election officials, and citizens in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?
2. Is the provisional voting system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and litigation looms?
3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?

028624

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

If the answers to these questions leave room for doubt about the effectiveness of the system or some of its parts, the EAC's recommendation of best practices should provide the starting point for a state's effort to improve its provisional voting system.

### Best Practices For Each Step In The Process

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention to reduce the inconsistencies noted in our analysis. We offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

### The Importance of Clarity

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots. . . . To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result— well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."<sup>26</sup>

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

- Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards. For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant recanvassing.<sup>27</sup> Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.
- States should provide poll workers standard information resources for the training of poll workers by local jurisdictions. Training materials might include, for example, maps or databases with instruction on how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.<sup>28</sup>

<sup>26</sup> The Century Foundation, *Balancing Access and Integrity*, Report of the Working Group on State Implementation of Election Reforms, July 2005.

<sup>27</sup> See *Washington State Republican Party v. King County Division of Records*, 103 P3d 725, 727-728 (Wash. 2004)

<sup>28</sup> See *Panio v. Sunderland* 824 N.E.2d 488, 490 (NY, 2005) See also Order, *Hawkins v. Blunt*, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even the

028625

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- State training materials provided to local jurisdictions should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.<sup>29</sup> Recent legislation in Arizona indicates that recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll workers may need appropriate training to understand their duty to give such voters a provisional ballot.<sup>30</sup>

## A. Registration and Pre-Election Information for Voters

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, "You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency."<sup>31</sup>
2. The process to re-enfranchise felons should be clear and straightforward. To avoid litigation over the registration status of felons, best practice should be defined as making re-enfranchisement automatic, or no more burdensome than the process required for any new registrant.<sup>32</sup>
3. State or county websites for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

## B. At the Polling Place

---

wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

<sup>29</sup> *Sandusky County Democratic Party v. Blackwell*, 387 F.3d 565, 774 (6<sup>th</sup> Cir. 2004)

<sup>30</sup> *The Florida Democratic Party v. Hood*, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

<sup>31</sup> Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina) they can verify their registration on the website.

<sup>32</sup> The Century Foundation, *op. cit.*

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display.<sup>33</sup> Many states require training of poll workers. In some states that requirement is recent: after the 2004 election, New Mexico adopted a requirement for poll workers to attend an "election school."<sup>34</sup> A state statutory requirement for training could facilitate uniform instruction of poll workers in those states that do not already provide it.
2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: "Reasons Why Your Provisional Ballot Might Not Be Counted" on one side and "What to Do if My Provisional Ballot Is Not Counted" on the other.
3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk "in the event additional provisional ballots are required . . . to photocopy official provisional ballots."<sup>35</sup> At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%.<sup>36</sup> States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the number of provisional ballots actually cast in recent elections.
4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. All states should examine their chain-of-custody requirements for clarity. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.

<sup>33</sup> 8 Colo. Code Regs. § 1505-1, Rule 7.1.

<sup>34</sup> 2005 N.M. Laws 270 page no. 4-5.

### C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. Public recognition of the validity of those criteria is important to establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underlines the importance of clear criteria. As the Century Foundation report put it, “Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation.”<sup>37</sup> Nonetheless, the *Panio v. Sutherland*<sup>38</sup> decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is “clerical error” judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state’s ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted and the individual returning later with identification is, in fact, the same person. Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.<sup>39</sup>
2. More provisional ballots are counted in those states that verify ballots cast outside the correct precinct.<sup>40</sup> While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the

<sup>37</sup> The Century Foundation, op. cit.

<sup>38</sup> 4 N.Y.3d 123, 824 N.E.2d 488 (N.Y. 2005) and Memorandum (LaPlante—Foley) Provisional Ballot Cases by State, July 19, 2005.

<sup>39</sup> In Kansas, the voter can provide ID to a County Election Officer any time before the County Board of Canvassers meets to count provisional ballots. KS. ST. 25-1122(d). ID can be presented in person, OR via mail or electronic means. *Id.* The Board must meet either on the Friday or Monday following a Tuesday election. *Id.* at 25-3104. Deadlines in other states are: Alabama – 5:00 P.M. on the Monday following the election AL ST § 17-10A-2(c),(1) Florida: until 5:00 P.M. on the third day following the election . Fla. Stat. Ann. § 101.048 (adopted after the 2004 election); Georgia—no later than 2 days after the election. GA ST § 21-2-417; 419. Illinois- 2 days to submit additional information 10 Ill. Comp. Stat. Ann. 5/18A-15(d); Indiana— in 2004 the deadline was the close of the polls IN. ST. §. 3-11.7-5-2(a). The time period was extended to 13 days by the adoption of Indiana Code 3-11-8, Section 25, Subsection (l); Maryland—until the meeting of the Election Board; MD ELEC LAW § 11-303. New Jersey— until the close of business on the second day after the election 19:53C-3(i). Nevada— until 5:00 P.M. on the Friday following the election NV ST 293.3085; New Mexico—until 7:00 P.M. on Election Day NM ADC 1.10.22 (8) (H).

<sup>40</sup> See Andersen, op. cit, pgs. 23 – 24 for an analysis of the significant effect of counting out-of-precinct ballots. The Election Day Survey found that, “Most notably, jurisdictions that permitted jurisdiction-wide acceptance of provisional ballots reported higher rates of provisional ballots being cast, but also reported a much higher incidence of provisional ballots being counted, than other jurisdictions.”

028626

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence. One option for states is to involve the voters in the decision by pointing out that voters who cast their provisional ballots in the wrong precinct may not be able to participate in the local election. The voter could then decide to go to the correct precinct or vote provisionally for the higher offices at the top of the ticket only.

3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location.<sup>41</sup> Ideally the voter could be directed to the correct machine, but poll worker advice will not always be correct. One way to assess the balance of issues here is to consider that, if a voter in a multi-precinct polling place is sent to the wrong machine, the error is probably the poll worker's, and the voter should not be penalized.
4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box "unregistered voter"; "lack of signature match" "wrong precinct," etc.) Those forms should be disclosed publicly when completed. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.<sup>42</sup>

### Colorado Rejection Codes (Any ballot given a rejection code shall not be counted):

RFS	(Rejection federal or state) No federal or state candidates or issues to duplicate.
RNS	(Rejection not signed) Provisional Ballot Affidavit not signed.
RIN	(Rejection incomplete information provided) Required information is incomplete and the designated election official is unable to confirm voter's eligibility.
RNR	(Rejection not registered) Voter did not register by the voter registration deadline or by emergency registration, Colorado voter registration record was not found, or voter was previously cancelled and has not been reinstated pursuant to 1-2-605(10). C.R.S.
REE	(Rejection envelope empty) Provisional ballot envelope is empty.
RAB	(Rejection voter voted absentee) Designated election official has confirmed that voter voted an absentee ballot.
REV	(Rejection based on ballot cast in early voting) Voter voted early.
RIP	(Rejection based on incorrect party) Incorrect Party in Primary Election.
RFE	(Rejection felon not eligible to vote) Individual was convicted of a felony and is either serving a sentence of confinement or detention or is on parole.
RWC	(Rejection elector not registered in county or State of Colorado) Non-county or non-state resident; therefore voter not eligible to vote in the county where the provisional ballot was voted.
RID	(Rejection first time voter has not supplied identification upon registration or thereafter prior to and during time voter voted) First Time Voter who

<sup>41</sup> Chances are administrative error accounts for the voter being directed to the wrong precinct under these circumstances.

<sup>42</sup> 8 CCR 1505-1, at 26.5.4, adopted August 4, 2005. See also 1-2-509(3) C.R.S.

028629

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

registered by mail or through a voter registration drive, is tagged as id deficient, and did not provide id at the time of voting.

RRD (Rejection registration deficient) Voter had deficient or incomplete registration and required information was not provided prior to or at the time of filling in the provisional ballot envelope. Voter's eligibility cannot be established.

### **D. Verification of Provisional Ballots**

1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections
2. In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. States should consider in particular how to divide the time allowed them by the safe-harbor provisions that apply in presidential elections to the certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The prudent course here would be to encourage states to consider the issue and then make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

### **E. Post-election Information for Voters**

Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### **F. State Laws Governing Litigation over Provisional Voting**

1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot

### **Broader Considerations**

#### **G. Integrity and the Appearance of Integrity**

1. State laws or regulations providing for non-partisan or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.

028630

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.
3. State laws or regulation should require the evaluation process for provisional ballots to be public, while protecting the names of those who voted provisionally.

### H. Continuous Assessment of the Provisional Ballot -- Process and Performance

Defining what makes for a successful provisional voting system is difficult. The most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed.

Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations or processes, such as Six Sigma<sup>43</sup> or the Baldrige Quality process<sup>44</sup> to evaluate the provisional ballot process. Pending such a review, the EAC can recommend that states take the following actions.

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.
2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:
  - Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (lack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.
  - Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.
  - Measures of variance among jurisdictions.
  - Number of poll workers trained in administration of provisional voting by polling place
  - Number of jurisdictions posting information on provisional voting in the polling place
  - Time required to evaluate ballots by jurisdiction

---

<sup>43</sup> Six Sigma is a measure of quality that strives for near perfection. Six Sigma is a disciplined, data-driven approach and methodology for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process – from manufacturing to transactional and from product to service.

<sup>44</sup> The Baldrige Criteria for Performance Excellence provide a systems perspective for understanding performance management. They reflect validated, leading-edge management practices against which an organization can measure itself. With their acceptance nationally and internationally as the model for performance excellence, the Criteria represent a common language for communication among organizations for sharing best practices. The Criteria are also the basis for the Malcolm Baldrige National Quality Award process.

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.

## ATTACHMENT 1 – Data Sources for Classification of the States

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The variables used to analyze a state's use of provisional ballots:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and included it in our analysis.

### New vs. Old States

We classified states as “new” or “old” based on the 2001 Electionline study of provisional voting,<sup>45</sup> but condensed its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We included in the list of “Old States” all states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots. States in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as “new” states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline's map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct's list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter's name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island's first use of provisional voting was in 2004 and, therefore, classified the state as "new" to the system of provisional balloting.

<b>Table 1 CATEGORIZATION OF STATES -- Old and New</b>

## Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>46</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found it had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

## Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as "out-of-precinct." States that invalidated such ballots were categorized as "In-precinct only."

<b>Out-of-Precinct</b>	<b>In-Precinct Only</b>	<b>HAVA EXEMPT OR NA</b>
Alaska	Alabama	Idaho
Arkansas	Arizona	Maine
California	Colorado	Mississippi
Delaware	Connecticut	New Hampshire
Georgia	District of Columbia	North Dakota
Illinois <sup>47</sup>	Florida	Wisconsin
Kansas	Hawaii	Wyoming
Louisiana	Indiana	
Maryland	Iowa	
New Mexico	Kentucky	
North Carolina	Massachusetts	
Oregon	Michigan	
Pennsylvania	Missouri	
Rhode Island	Montana	
Utah	Nebraska	
Vermont	Nevada	
Washington	New Jersey	
	New York

## Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

<b>Signature Match</b>	<b>Data Match</b>	<b>Affidavit</b>	<b>Return with ID</b>	<b>NA</b>
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire
	Louisiana	Kentucky	Montana	N. Carolina*
	Missouri	Massachusetts	New Jersey	N. Dakota
	Ohio	Nebraska	New Mexico	Wisconsin
	Oklahoma	Nevada	Texas	Wyoming
	Pennsylvania	New York	Utah	
	Rhode Island	South Dakota		
	S. Carolina	Tennessee		
	Washington	Vermont		
	West Virginia	Virginia		
4	14	14	10	9

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

## Data Collection

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

<b>Table 4</b>	
<b>Updated information by State</b>	
<b>Received Updated Data</b>	<b>Did Not Receive Updated Data</b>
California	Alabama
District of Columbia	Alaska <sup>48</sup>
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland <sup>49</sup>	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska <sup>50</sup>	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
<b>26 States</b>	<b>25 States</b>

<sup>48</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>49</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>50</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

## Data Differences

The data used in this study differ from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

<b>State</b>	<b>EDS Numbers Cast/Counted</b>	<b>Our Numbers Cast/Counted</b>	<b>Differences</b>	<b>Updated Info from State?<sup>51</sup></b>
<b>Alabama</b>	6,478/1,865	6560/1836	82/29	No
<b>Alaska</b>	23,285/22,498	23,275/22,498	10/0	No
<b>Colorado</b>	51,529/39,086	51,477/39,163	52/77	No
<b>Georgia</b>	12,893/4,489	12,893/3,839	0/650	No
<b>Hawaii</b>	346/25	348/25	2/0	Yes
<b>Iowa</b>	15,406/8,038	15,454/8,048	48/10	Yes
<b>Kansas</b>	45,535/32,079	45,563/31,805	28/274	Yes
<b>Montana</b>	688/378	653/357	35/21	Yes
<b>Nebraska</b>	17,421/13,788	17,003/13,298	418/490	Yes

## Appendix A Summary of Voter Identification Requirements By State

Prepared by  
Sara A. Sampson, Reference Librarian,  
The Ohio State University Moritz College of Law.

### Voter ID Requirements

State	Forms of ID Required 2004	Statutory Language	Statutory Citation
Alabama	Provide ID	<p>(b) Each elector shall provide identification to an appropriate election official prior to voting. A voter required to show identification when voting in person shall present to the appropriate election official either of the following forms of identification:</p> <p>(1) A current valid photo identification.            (2) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. The term "other government document" may include, but is not limited to, any of the following:</p> <p>a. A valid identification card issued by a branch, department, agency, or entity of the State of Alabama, any other state, or the United States authorized by law to issue personal identification.            b. A valid United States passport.            c. A valid Alabama hunting or fishing license.            d. A valid Alabama permit to carry a pistol or revolver.            e. A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States.            f. A valid United States military identification card.            g. A certified copy of the elector's birth certificate.            h. A valid Social Security card.            i. Certified naturalization documentation.            j. A certified copy of court records showing adoption or name change.            k. A valid Medicaid card, Medicare card, or an Electronic Benefits Transfer Card (formerly referred to as a "food stamp card").</p> <p>(c) For voters required to show identification when voting by mail, the voter shall submit with the ballot a copy of one of the forms of identification listed in subsection (b).            (e) An individual required to present identification in accordance with this section who is unable to meet the identification requirements of this section shall be permitted to vote by a challenged or provisional ballot, as provided for by law.</p> <p>(f) In addition, an individual who does not have identification in his or her possession at the polls shall be permitted to vote if the individual is positively identified by two election officials as a voter on the poll list who is eligible to vote and the election official signs the voters list by where the voter signs.</p> <p>Effective Date: June 24, 2003</p>	Ala. Code § 17-11A-1
Alaska	Provide ID	<p>(a) Before being allowed to vote, each voter shall exhibit to an election official one form of identification, including</p> <p>(1) an official voter registration card, driver's license, state identification card, current and valid photo identification, birth certificate, passport, or hunting or fishing license; or</p> <p>(2) an original or a copy of a current utility bill, bank statement, paycheck, government check, or other government document; an item exhibited under this</p>	Alaska Stat. § 15.15.225

028639

		<p>paragraph must show the name and current address of the voter.</p> <p>(b) An election official may waive the identification requirement if the election official knows the identity of the voter. The identification requirement may not be waived for voters who are first-time voters who initially registered by mail or by facsimile or other electronic transmission approved by the director under <u>AS 15.07.050</u>, and did not provide identification as required in <u>AS 15.07.060</u>.</p> <p>(c) A voter who cannot exhibit a required form of identification shall be allowed to vote a questioned ballot.</p> <p>effective June 17, 2003</p>	
Arizona	Provide ID	<p>B. If a statewide voter registration database is not yet operational, for any person who has registered to vote by mail for the first time in this state after January 1, 2003 or who is reregistering by mail after January 1, 2003 after moving from one county to another county in this state, the person shall comply with the following in order to be issued a ballot:</p> <p>1. The person shall present either one of the following:</p> <p>(a) A current form of identification that bears a photograph of the person and the name of the person.</p> <p>(b) A current utility bill, bank statement, paycheck, government issued check or other government document that shows the name and registration address of the person.</p> <p>2. If the person does not present a document that complies with paragraph 1, the person is only eligible to vote a provisional ballot as prescribed by <u>§ 16-584</u>.</p> <p>Effective Dec. 1, 2003</p>	Ariz. Rev. Stat. Ann. § 16-579
Arkansas	Provide ID	<p>7-5-305. Requirements.</p> <p>(a) Before a person is permitted to vote, the election official shall:</p> <p>(1) Request the voter to identify himself in order to verify the existence of his name on the precinct voter registration list;</p> <p>(2) Request the voter, in the presence of the election official, to state his address and state or confirm his date of birth;</p> <p>(3) Determine that the voter's date of birth and address are the same as those on the precinct voter registration list;</p> <p>(4) If the date of birth given by the voter is not the same as that on the precinct voter registration list, request the voter to provide identification as the election official deems appropriate;</p> <p>(5)(A) If the voter's address is not the same as that on the precinct voter registration list, verify with the county clerk that the address is within the precinct.</p> <p>(B) If the address is within the precinct, request the voter to complete a voter registration application form for the purpose of updating county voter registration record files.</p> <p>(C) If the address is not within the precinct, instruct the voter to contact the county clerk's office to determine the proper precinct;</p> <p>(6) If the voter's name is not the same as that on the precinct voter registration list, request the voter to complete a voter registration application form for purposes of updating county voter registration record files;</p> <p>(7) Request the voter, in the presence of the election official, to sign his name, including his given name, his middle name or initial, if any, and his last name in the space provided on the precinct voter registration list. If a person is unable to sign his signature or make his mark or cross, the election official shall enter his initials and the voter's date of birth in the space for the person's signature on the precinct voter registration list; and</p>	Arkansas Code Annotated § 7-5-305

		<p>(8)(A) Request the voter for purposes of identification to provide a valid driver's license, photo identification card issued by a governmental agency, voter card, social security card, birth certificate, United States passport, employee identification card issued by a governmental agency containing a photograph, employee identification card issued in the normal course of business of the employer, student identification card, Arkansas hunting license, or United States military identification card.</p> <p>(B)(i) If a voter is unable to provide this identification, the election official shall indicate on the precinct voter registration list that the voter did not provide identification.</p> <p>(ii) Following each election, the county board of election commissioners may review the precinct voter registration lists and may provide the information of the voters not providing identification at the polls to the prosecuting attorney.</p> <p>(iii) The prosecuting attorney may investigate possible voter fraud; and</p> <p>(9) Follow the procedures under §§ 7-5-310, 7-5-311, and 7-5-523, if the person is a disabled voter and presents himself or herself to vote.</p> <p>Effective: July 16, 2003</p>	
California	Sign Name	<p>Any person desiring to vote shall announce his or her name and address in an audible tone of voice, and when one of the precinct officers finds the name in the index, the officer shall in a like manner repeat the name and address. The voter shall then write his or her name and residence address or, if the voter is unable to write, shall have the name and residence address written by another person on a roster of voters provided for that purpose, whereupon a challenge may be interposed as provided in this article.</p> <p>(Enacted in 1994, no amendments since)</p>	Cal. Elec. Code § 14216
Colorado	Provide ID	<p>(1) Except as provided in subsection (4) of this section, any eligible elector desiring to vote shall show his or her identification as defined in <u>section 1-1-104(19.5)</u>, write his or her name and address on the signature card, and give the signature card to one of the election judges, * * *</p> <p>(4) An eligible elector who is unable to produce identification may cast a provisional ballot in accordance with article 8.5 of this title.</p> <p>(19.5)(a) "Identification" means:</p> <p>(I) A valid Colorado driver's license;</p> <p>(II) A valid identification card issued by the department of revenue in accordance with the requirements of part 3 of article 2 of title 42, C.R.S.;</p> <p>(III) A valid United States passport;</p> <p>(IV) A valid employee identification card with a photograph of the eligible elector issued by any branch, department, agency, or entity of the United States government or of this state, or by any county, municipality, board, authority, or other political subdivision of this state;</p> <p>(V) A valid pilot's license issued by the federal aviation administration or other authorized agency of the United States;</p> <p>(VI) A valid United States military identification card with a photograph of the eligible elector;</p> <p>(VII) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the elector;</p> <p>(VIII) A valid medicare or medicaid card issued by the United States health care</p>	Colo. Rev. Stat. Ann. § 1-7-110; Colo. Rev. Stat. Ann. § 1-1-104

028641

		<p>financing administration;</p> <p>(IX) A certified copy of a birth certificate for the elector issued in the United States; or</p> <p>(X) Certified documentation of naturalization.</p> <p>(b) Any form of identification indicated in paragraph (a) of this subsection (19.5) that shows the address of the eligible elector shall be considered identification only if the address is in the state of Colorado.</p> <p>Effective 5/28/2004</p>	
Connecticut	Provide ID	<p>(a) In each primary, election or referendum, when an elector has entered the polling place, the elector shall announce the elector's street address, if any, and the elector's name to the checkers in a tone sufficiently loud and clear as to enable all the election officials present to hear the same. Each elector who registered to vote by mail for the first time on or after January 1, 2003, and has a "mark" next to the elector's name on the official registry list, as required by <u>section 9-23r</u>, shall present to the checkers, before the elector votes, either a current and valid photo identification that shows the elector's name and address or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the elector. Each other elector shall (1) present to the checkers the elector's Social Security card or any other preprinted form of identification which shows the elector's name and either the elector's address, signature or photograph, or (2) on a form prescribed by the Secretary of the State, write the elector's residential address and date of birth, print the elector's name and sign a statement under penalty of false statement that the elector is the elector whose name appears on the official checklist. Such form shall clearly state the penalty of false statement. A separate such form shall be used for each elector. If the elector presents a preprinted form of identification under subdivision (1) of this subsection, the checkers shall check the name of such elector on the official checklist. If the elector completes the form under subdivision (2) of this subsection, the assistant registrar of voters shall examine the information on such form and either instruct the checkers to check the name of such elector on the official checklist or notify the elector that the form is incomplete or inaccurate.</p> <p>Effective May 10., 2004</p>	Conn. Gen. Stat. Ann. § 9-261
Delaware	Provide ID	<p>(a) A voter, upon entering the room where an election is being held, shall announce his or her name and address and provide proof of identity, whereupon the clerks shall place a mark or make a notation of his or her name upon the election district record. In the event the voter does not have proof of identity with them, he or she shall sign an affidavit of affirmation that he or she is the person listed on the election district record.</p> <p>Effective: July 9, 2002</p>	15 Del. Code § 4937
D.C.	Sign Name	<p>(i)(1) A person shall be entitled to vote in an election in the District of Columbia if he or she is a duly registered voter. A qualified elector shall be considered duly registered in the District if he or she has met the requirements for voter registration and, on the day of the election, either resides at the address listed on the Board's records or files an election day change of address pursuant to this subsection.</p> <p>(2) Each registered voter who changes his or her place of residence from that listed on the Board's records shall notify the Board, in writing, of the new residence address. A change of address shall be effective on the date the notification was mailed as shown by the United States Postal Service postmark. If not postmarked, the notification shall be effective on the date of receipt by the Board. Change of address notifications from registrants shall be accepted pursuant to subsection (g) of this section, except that any registrant who has not notified the Board of his or her current residence address by the deadline established by subsection (g) of this section may be permitted to vote at the</p>	D.C. Code § 1-1001.07

		<p>polling place that serves the current residence address by filing an election day change of address notice pursuant to paragraph (4) of this subsection.</p> <p>(3) Each registered voter who votes at a polling place on election day shall affirm his or her residence address as it appears on the official registration roll for the precinct. The act of signing a copy of the official registration roll for the precinct shall be deemed affirmation of the voter's address as it appears on the Board's registration records.</p> <p>(Effective April 3, 2001)(not added as part of 2005 amendment)</p>	
Florida	Photo ID	<p>101.043 (1) The precinct register, as prescribed in <u>s. 98.461</u>, shall be used at the polls in lieu of the registration books for the purpose of identifying the elector at the polls prior to allowing him or her to vote. The clerk or inspector shall require each elector, upon entering the polling place, to present a current and valid picture identification as provided in <u>s. 97.0535(3)(a)</u>. If the picture identification does not contain the signature of the voter, an additional identification that provides the voter's signature shall be required. The elector shall sign his or her name in the space provided, and the clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.</p> <p>(2) Except as provided in subsection (3), if the elector fails to furnish the required identification, or if the clerk or inspector is in doubt as to the identity of the elector, such clerk or inspector shall follow the procedure prescribed in <u>s. 101.49</u>.</p> <p><b>97.0535</b> (3)(a) The following forms of identification shall be considered current and valid if they contain the name and photograph of the applicant and have not expired:</p> <ol style="list-style-type: none"> <li>1. Idaho	Sign Name	<p>(1) An elector desiring to vote shall state his name and address to the judge or clerk in charge of the combination election record and poll book.</p> <p>(2) Before receiving his ballot, each elector shall sign his name in the combination election record and poll book following his name therein.</p> <p>(5) The elector shall then be given the appropriate ballots which have been stamped with the official election stamp and shall be given folding instructions for such ballots.</p> <p>(Last amended in 1972)</p>	Id. St. §34-1106
Illinois	Give Name	<p>Any person desiring to vote shall give his name and, if required to do so, his residence to the judges of election, one of whom shall thereupon announce the same in a loud and distinct tone of voice, clear, and audible; the judges of elections shall check each application for ballot against the list of voters registered in that precinct to whom absentee or early ballots have been issued for that election, which shall be provided by the election authority and which list shall be available for inspection by pollwatchers. A voter applying to vote in the precinct on election day whose name appears on the list as having been issued an absentee or early ballot shall not be permitted to vote in the precinct. All applicable provisions of Articles 4, 5 or 6 shall be complied with and if such name is found on the register of voters by the officer having charge thereof, he</p>	10 Ill. Comp. Stat. 5/17-9

		<p>shall likewise repeat said name, and the voter shall be allowed to enter within the proximity of the voting booths, as above provided. One of the judges shall give the voter one, and only one of each ballot to be voted at the election, on the back of which ballots such judge shall indorse his initials in such manner that they may be seen when each such ballot is properly folded, and the voter's name shall be immediately checked on the register list. In those election jurisdictions where perforated ballot cards are utilized of the type on which write-in votes can be cast above the perforation, the election authority shall provide a space both above and below the perforation for the judge's initials, and the judge shall endorse his or her initials in both spaces. Whenever a proposal for a constitutional amendment or for the calling of a constitutional convention is to be voted upon at the election, the separate blue ballot or ballots pertaining thereto shall, when being handed to the voter, be placed on top of the other ballots to be voted at the election in such manner that the legend appearing on the back thereof, as prescribed in Section 16-6 of this Act, shall be plainly visible to the voter. At all elections, when a registry may be required, if the name of any person so desiring to vote at such election is not found on the register of voters, he or she shall not receive a ballot until he or she shall have complied with the law prescribing the manner and conditions of voting by unregistered voters. If any person desiring to vote at any election shall be challenged, he or she shall not receive a ballot until he or she shall have established his right to vote in the manner provided hereinafter; and if he or she shall be challenged after he has received his ballot, he shall not be permitted to vote until he or she has fully complied with such requirements of the law upon being challenged. Besides the election officer, not more than 2 voters in excess of the whole number of voting booths provided shall be allowed within the proximity of the voting booths at one time. The provisions of this Act, so far as they require the registration of voters as a condition to their being allowed to vote shall not apply to persons otherwise entitled to vote, who are, at the time of the election, or at any time within 60 days prior to such election have been engaged in the military or naval service of the United States, and who appear personally at the polling place on election day and produce to the judges of election satisfactory evidence thereof, but such persons, if otherwise qualified to vote, shall be permitted to vote at such election without previous registration.</p>

		shall provide further identification by presenting his current registration certificate, giving his date of birth or providing other information stated in the precinct register that is requested by the commissioners. However, an applicant that is allowed to vote without the picture identification required by this Paragraph is subject to challenge as provided in <u>R.S. 18:565</u> .	
		Effective: 1/1/2002	
Maine	Give Name	The voting procedure is as follows.  1. Name announced. A voter who wishes to vote must state the voter's name and, upon request, residence address to an election clerk who shall announce the name in a loud, clear voice.  (In effect at time of 2003 amendment: 2003, c. 584, § 9)	Me. Rev. Stat. Ann. tit. 21-A, § 671
Maryland	Sign Name	10-310. (a) For each individual who seeks to vote, an election judge, in accordance with instructions provided by the local board, shall: (1) locate the individual's name in the precinct register and locate the preprinted voting authority card and then authorize the individual to vote a regular ballot; (2)(i) if the individual's name is not found on the precinct register, search the inactive list and if the name is found, authorize the individual to vote a regular ballot; or (ii) if the individual's name is not on the inactive list, refer the individual for provisional ballot voting under § 9-404 of this article; (3) establish the identity of the voter by requesting the voter to state the month and day of the voter's birth and comparing the response to the information listed in the precinct register; (4) verify the address of the voter's residence; (5) if any changes to the voting authority card are indicated by a voter, make the appropriate changes in information on the card or other appropriate form; and (6) have the voter sign the voting authority card and either issue the voter a ballot or send the voter to a machine to vote.	Md. Elec. Law § 10-310
Mass.	Give Name	Each voter desiring to vote at a polling place shall give his name and, if requested, his residence to one of the officers at the entrance to the space within the guard rail, who shall thereupon distinctly announce the same. If such name is found on the voting list, the election officer shall check and repeat the name and shall admit the voter to the space enclosed by the guard rail and, in case official ballots, other than those marked "Challenged Ballots" as provided by section thirty-five A, are used, such voter shall be given one ballot. The use of electronic means such as tape recording equipment or radio broadcasting equipment for the recording or broadcasting of the names of voters not yet checked as having voted shall be prohibited.  Last amended in 1981  (5B) Identification. If so authorized by the city or town clerk or registrars of voters, an election officer may request any voter to present written identification. Such requests shall not discriminate in any way, but shall be entirely random, consistent, or based on reasonable suspicion. For the purpose of 950 CMR 52.03(5B), of M.G.L. c. 54, § 76B, and of 950 CMR 52.03(5)(b), suitable written identification includes a driver's license, recent utility bill, rent receipt on a landlord's printed letterhead, lease, duplicate copy of a voter registration affidavit, or any other printed identification which contains the voter's name and address. If voters fail to present suitable written identification when so requested, they must still be allowed to vote, but an election officer or any other person may challenge their right to vote under M.G.L. c. 54, § 85 and 950 CMR 52.03(23).	Mass. Ann. Laws 54 § 76  950 Mass. Code Regs. 52.03
Michigan	Sign Name	(1) At each election, before being given a ballot, each registered elector offering to vote shall identify himself or herself by presenting an official state	Mich. Comp. Laws Ann. §

		<p>identification card issued to that individual pursuant to Act No. 222 of the Public Acts of 1972, being sections 28.291 to 28.295 of the Michigan Compiled Laws, an operator's or chauffeur's license issued to that individual pursuant to the Michigan Vehicle Code, Act No. 300 of the Public Acts of 1949, being sections 257.1 to 257.923 of the Michigan Compiled Laws, or other generally recognized picture identification card and by executing an application showing his or her signature or mark and address of residence in the presence of an election official. If the voter registration cards are used in the precinct, the election official in charge of the precinct registration file shall compare the signature upon the application with the signature upon the registration card. If voter registration lists are used in the precinct, the election inspector shall determine if the name on the application to vote appears on the voter registration list. If the name appears on the voter registration list, the elector shall provide further identification by giving his or her date of birth or other information stated upon the voter registration list. In precincts using voter registration lists, the date of birth may be required to be placed on the application to vote. If the signature or an item of information does not correspond, the vote of the person shall be challenged, and the same procedure shall be followed as provided in this act for the challenging of an elector. If the person offering to vote has signed the registration card or application by making a mark, the person shall identify himself or herself by giving his or her date of birth, which shall be compared with the date of birth stated upon the registration card or voter registration list, or shall give other identification as may be referred to upon the registration card or voter registration list. If the elector does not have an official state identification card, operator's or chauffeur's license as required in this subsection, or other generally recognized picture identification card, the individual shall sign an affidavit to that effect before an election inspector and be allowed to vote as otherwise provided in this act. However, an elector being allowed to vote without the identification required under this subsection is subject to challenge as provided in section 727.</p> <p>(2) If, upon a comparison of the signature or other identification, it is found that the applicant is entitled to vote, the election officer having charge of the registration list shall approve the application and write his or her initials on the application, after which the number on the ballot issued shall be noted on the application. The application shall serve as 1 of the 2 poll lists required to be kept as a record of a person who has voted. The application shall be filed with the township, city, or village clerk. If voter registration cards are used in the precinct, the date of the election shall be noted by 1 of the election officials upon the precinct registration card of each elector voting at an election. If voter registration lists are used in the precinct, the election official shall clearly indicate upon the list each elector voting at that election. The clerk of a city, village, or township shall maintain a record of voting participation for each registered elector.</p> <p>The Attorney General declared that this statute violated the Equal Protection Clause of the Fourteenth Amendment. Op. Atty. Gen. 1997, No. 6930. That decision is binding on all state agencies.</p> <p>(Effective March 31, 1997)</p>	<p>168.523</p>
<p>Minnesota</p>	<p>Sign Name</p>	<p>(a) An individual seeking to vote shall sign a polling place roster which states that the individual is at least 18 years of age, a citizen of the United States, has resided in Minnesota for 20 days immediately preceding the election, maintains residence at the address shown, is not under a guardianship in which the court order revokes the individual's right to vote, has not been found by a court of law to be legally incompetent to vote or convicted of a felony without having civil rights restored, is registered and has not already voted in the election. The roster must also state: "I understand that deliberately providing false information is a felony punishable by not more than five years imprisonment and a fine of not</p>	<p>Minn. Stat. § 204C.10</p>

		<p>more than \$10,000, or both."</p> <p>(b) A judge may, before the applicant signs the roster, confirm the applicant's name, address, and date of birth.</p> <p>(c) After the applicant signs the roster, the judge shall give the applicant a voter's receipt. The voter shall deliver the voter's receipt to the judge in charge of ballots as proof of the voter's right to vote, and thereupon the judge shall hand to the voter the ballot. The voters' receipts must be maintained during the time for notice of filing an election contest.</p> <p>(Effective January 1, 2004)</p>	
Mississippi	Sign Name	<p>* * *</p> <p>When any person entitled to vote shall appear to vote, he shall first sign his name in a receipt book or booklet provided for that purpose and to be used at that election only and said receipt book or booklet shall be used in lieu of the list of voters who have voted formerly made by the managers or clerks; whereupon and not before, the initialing manager or, in his absence, the alternate initialing manager shall indorse his initials on the back of an official blank ballot, prepared in accordance with law, and at such place on the back of the ballot that the initials may be seen after the ballot has been marked and folded, and when so indorsed he shall deliver it to the voter, which ballot the voter shall mark in the manner provided by law, which when done the voter shall deliver the same to the initialing manager or, in his absence, to the alternate initialing manager, in the presence of the others, and the manager shall see that the ballot so delivered bears on the back thereof the genuine initials of the initialing manager, or alternate initialing manager, and if so, but not otherwise, the ballot shall be put into the ballot box; and when so done one (1) of the managers or a duly appointed clerk shall make the proper entry on the pollbook. If the voter is unable to write his name on the receipt book, a manager or clerk shall note on the back of the ballot that it was received for by his assistance.</p> <p>(Effective January 1, 1987)</p>	Miss. Code Ann. § 23-15-541
Missouri	Provide ID	<p>1. Before receiving a ballot, voters shall identify themselves by presenting a form of personal identification from the following list:</p> <p>(1) Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;</p> <p>(2) Identification issued by the United States government or agency thereof;</p> <p>(3) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;</p> <p>(4) A copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter;</p> <p>(5) Driver's license or state identification card issued by another state; or</p> <p>(6) Other identification approved by the secretary of state under rules promulgated pursuant to subsection 3 of this section other identification approved by federal law. Personal knowledge of the voter by two supervising election judges, one from each major political party, shall be acceptable voter identification upon the completion of a secretary of state-approved affidavit that is signed by both supervisory election judges and the voter that attests to the personal knowledge of the voter by the two supervisory election judges. The secretary of state may provide by rule for a sample affidavit to be used for such purpose.</p> <p>(Last amended in 2002)</p>	Mo. Rev. Stat. §115.427.1

Montana	Provide ID	<p>(1) (a) Before an elector is permitted to receive a ballot or vote, the elector shall present to an election judge a current photo identification showing the elector's name. If the elector does not present photo identification, including but not limited to a valid driver's license, a school district or postsecondary education photo identification, or a tribal photo identification, the elector shall present a current utility bill, bank statement, paycheck, notice of confirmation of voter registration issued pursuant to 13-2-207, government check, or other government document that shows the elector's name and current address.</p> <p>(From 2004 version of the Montana Code Annotated; No updates in 2004, only in 2005 [ Unrelated section was amended in 2005])</p>	Mont. Code. Ann. §13-13-114(1)(a)
Nebraska	Sign Name	<p>(1) The clerks of election shall have a list of registered voters of the precinct and a sign-in register at the polling place on election day. The list of registered voters shall be used for guidance on election day and may be in the form of a computerized, typed, or handwritten list or precinct registration cards. Registered voters of the precinct shall place and record their signature in the sign-in register before receiving any ballot. The list of registered voters and the sign-in register may be combined into one document.</p> <p>(Last amended in 2003)</p> <p>Official ballots shall be used at all elections. No person shall receive a ballot or be entitled to vote unless and until he or she is registered as a voter except as provided in section 32-914.01, 32-914.02, 32-915, 32-915.01, or 32-936. Except as otherwise specifically provided, no ballot shall be handed to any registered voter at any election until (1) he or she announces his or her name and address to the clerk of election, (2) the clerk has found that he or she is a registered voter at the address as shown by the precinct list of registered voters unless otherwise entitled to vote in the precinct under section 32-328, 32-914.01, 32-914.02, 32-915, or 32-915.01, (3) if the voter registered by mail after January 1, 2003, and has not previously voted in an election for a federal office within the county, the clerk shall ask the registered voter to present a photographic identification which is current and valid or a copy of a utility bill, bank statement, government check, paycheck, or other government document that is current and that shows the name and address of the voter, (4) the clerk has instructed the registered voter to personally write his or her name in the precinct sign-in register on the appropriate line which follows the last signature of any previous voter, and (5) the clerk has listed on the precinct list of registered voters the corresponding line number and name of the registered voter.</p> <p>(Last updated in 2003)</p>	<p>Neb. 		(e) Any other form of identification issued by a governmental agency which contains the voter's signature and physical description or picture.  Last Amendment Effective Jan. 1, 2004.	
NH	Give Name	A person desiring to vote shall, before being admitted to the enclosed space within the guardrail, announce his or her name to one of the ballot clerks who shall thereupon repeat the name; and, if the name is found on the checklist by the ballot clerk, the ballot clerk shall put a checkmark beside it and again repeat the name. The ballot clerk shall state the address listed on the checklist for the voter, and ask if the address is correct; if the address on the checklist is not correct, the ballot clerk shall correct the address in red on the checklist. The voter, if still qualified to vote in the town or ward and unless challenged as provided for in RSA 659:27-33, shall then be allowed to enter the space enclosed by the guardrail. After the voter enters the enclosed space, the ballot clerk shall give the voter one of each ballot to be voted on in that election which shall be folded as it was upon receipt from the secretary of state.  Last Amendment Effective July 2, 2002.	N.H. Rev. Stat. Ann. 659:13
New Jersey	Match Sig.	19:15-17. Comparison of signatures or statements made openly; provisional ballots for newly registered voters without proper identification  a. The comparison of signatures of a voter made upon registration and upon election day, and if the voter alleges his inability to write, the comparison of the answers made by such voter upon registration and upon election day, shall be had in full view of the challengers.  b. If a voter has registered by mail after January 1, 2003 to vote for the first time in his or her current county of residence and did not provide personal identification when registering pursuant to section 16 of P.L.1974, c. 30 (C.19:31-6.4), the voter shall be permitted to vote starting at the first election held after January 1, 2004 at which candidates are seeking federal office after displaying one of the following items: (1) a current and valid photo identification card; (2) a current utility bill, bank statement, government check or pay check; (3) any other government document that shows the voter's name and current address; or (4) any other identifying document that the Attorney General has determined to be acceptable for this purpose. If the voter does not display one of these documents, the voter shall not be permitted to vote by machine but shall instead be provided with a provisional ballot, pursuant to the provisions of P.L.1999, c. 232 (C.19:53C-1 et seq.). This subsection shall not apply to any voter entitled to vote by absentee ballot under the "Uniformed and Overseas Citizens Absentee Voting Act" (42 U.S.C. 1973ff-1 et seq.) or to any voter who is provided the right to vote other than in person under section 3 of Pub.L.98-435, the "Voting Accessibility for the Elderly and Handicapped Act," or any other voter entitled to vote otherwise than in person under any other federal law. This subsection shall also not apply to any person who registers to vote by appearing in person at any voter registration agency or to any person whose voter registration form is delivered to the county commissioner of registration or to the Attorney General, as the case may be, through a third party by means other than by mail delivery.  c. Each county commissioner of registration shall collect and maintain, in the manner prescribed by the Attorney General, the information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31- 6.4). Access to the personal identification information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31- 6.4). shall be prohibited, in accordance with subsection a. of section 6 of P.L.2001, c. 404 (C.47:1A-5).  Last Amendment Effective July 9, 2004	N.J. Stat. Ann. 19:15-17
New Mexico	Sign Name	D. The judge assigned to the voter list used for confirmation of registration and voting shall determine that each person offering to vote is registered and, in the	N.M. Stat. Ann §1-5-10

		<p>case of a primary election, that the voter is registered in a party designated on the primary election ballot. If the person's registration is confirmed by the presence of his name on the voter list or if the person presents a certificate under the seal and signature of the county clerk showing that he is entitled to vote in the election and to vote in that precinct, the judge shall announce to the election clerks the list number and the name of the voter as shown on the voter list.</p> <p>E. The election clerk shall locate that list number and name on the signature roster and shall require the voter to sign his usual signature or, if unable to write, to make his mark opposite his printed name. If the voter makes his mark, it shall be witnessed by one of the judges of the precinct board. If the signature roster indicates that the voter is required to present a form of identification before voting, the election judge shall ask the voter for a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows and matches the name and address of the voter as indicated on the signature roster. If the voter does not provide the required identification, he shall be allowed to vote on a provisional paper ballot.</p> <p>G. A voter shall not be permitted to vote until he has properly signed his usual signature or made his mark in the signature roster.</p> <p>(From 2004 version of New Mexico Annotated Statutes, amended in 2005 to require presentation of ID)</p>	<p>(Recompiled as §1-12 -7.1 by L. 2005, Ch. 270, §63, effective July 1, 2005)</p>
<p>New York</p>	<p>Match Sig.</p>	<ol style="list-style-type: none"> <li>1. A person before being allowed to vote shall be required, except as provided in this chapter, to sign his name on the back of his registration poll record on the first line reserved for his signature at the time of election which is not filled with a previous signature, or on the line of the computer generated registration list reserved for his signature. The two inspectors in charge shall satisfy themselves by a comparison of this signature with his registration signature and by comparison of his appearance with the descriptive material on the face of the registration poll record that he is the person registered. If they are so satisfied they shall enter the other information required for the election on the same line with the voter's latest signature, shall sign their names or initials in the spaces provided therefor, and shall permit the applicant to vote. Any inspector or inspectors not satisfied shall challenge the applicant forthwith.</li> <li>2. If a person who alleges his inability to sign his name presents himself to vote, the board of inspectors shall permit him to vote, unless challenged on other grounds, provided he had been permitted to register without signing his name. The board shall enter the words "Unable to Sign" in the space on his registration poll record reserved for his signature or on the line of the computer generated registration list reserved for his signature at such election. If his signature appears upon his registration record or upon the computer generated registration list the board shall challenge him forthwith, except that if such a person claims that he is unable to sign his name by reason of a physical disability incurred since his registration, the board, if convinced of the existence of such disability, shall permit him to vote, shall enter the words "Unable to Sign" and a brief description of such disability in the space reserved for his signature at such election. At each subsequent election, if such disability still exists, he shall be entitled to vote without signing his name and the board of inspectors, without further notation, shall enter the words "Unable to Sign" in the space reserved for his signature at such election.</li> <li>3. The voter's signature made by him upon registration and his signature made at subsequent elections shall be effectively concealed from the voter by a blotter or piece of opaque paper until after the voter shall have completed his signature.</li> <li>4. In any case where a person who has heretofore voted has placed his voting signature on the back of his registration poll record on the first or any succeeding line or lines at the time or times of an election, instead of on the last line of the</li> </ol>	<p>N.Y. Law § 8-304 (McKinney)</p>

		<p>space thereon required to be reserved for such voting signatures and on any lines next running upward therefrom, the inspectors of election shall obliterate such misplaced signature or signatures, initial the obliteration and require such voter to sign his name again in the correct place on such registration poll record.</p> <p>5. Any person who has heretofore registered and who at such time placed his or her registration signature on the back of the registration poll record otherwise than in the space required to be provided therefor at the bottom of such poll record, shall, before being permitted to vote at any election thereafter, subscribe a new registration signature for himself on the last line at the bottom of such poll record, and, at the same time, if the inspectors of election are satisfied that the signatures were made by the same person, obliterate his original registration signature placed elsewhere than on the bottom of such record. Such obliterations may be made by crossing out the signature so as to completely efface the same or by affixing thereover a piece of gummed tape of a size sufficient only to cover such signature and of a type adequate to fully conceal the same</p> <p>Last Amended 1986</p>	
North Carolina	Give Name	<p>(a) Checking Registration. --A person seeking to vote shall enter the voting enclosure through the appropriate entrance. A precinct official assigned to check registration shall at once ask the voter to state current name and residence address. The voter shall answer by stating current name and residence address. In a primary election, that voter shall also be asked to state, and shall state, the political party with which the voter is affiliated or, if unaffiliated, the authorizing party in which the voter wishes to vote. After examination, that official shall state whether that voter is duly registered to vote in that precinct and shall direct that voter to the voting equipment or to the official assigned to distribute official ballots. If a precinct official states that the person is duly registered, the person shall sign the pollbook, other voting record, or voter authorization document in accordance with subsection (c) of this section before voting.</p>	N.C. Gen. Stat. Ann. § 163-166.7
North Dakota	Provide ID	<p>16.1-05-07 Poll clerks to check identification and verify eligibility -- Poll clerks to request, correct, and update incorrect information contained in the pollbook.</p> <p>1. Before delivering a ballot to an individual according to section 16.1-13- 22, the poll clerks shall request the individual to show a driver's license issued by the state, another form of identification displaying a photograph of the individual and the individual's date of birth, or another appropriate form of identification prescribed by the secretary of state. If an individual offering to vote fails or refuses to show an appropriate form of identification, the individual may be allowed to vote without being challenged according to section 16.1-05-06 if the individual provides to the election board the individual's date of birth and if a member of the election board or a clerk knows the individual and can personally vouch that the individual is a qualified elector of the precinct. After verifying that the individual's name is contained in the pollbook generated from the central voter file, poll clerks shall verify the individual's residential address and mailing address, if different from the individual's residential address.</p> <p>(From 2003 version of N.D. Century Code; only amendment to this statute that became effective in 2003 was in 2005)</p>	N.D. Cent. Code § 16.1-05-07

Ohio	Match Sig.	<p>When an elector appears in a polling place to vote he shall announce his full name and address to the precinct election officials. He shall then write his name and address at the proper place in the poll lists or signature pollbooks provided therefore, except that if, for any reason, an elector shall be unable to write his name and address in the poll list or signature pollbook, the elector may make his mark at the place intended for his name and a precinct official shall write the name of the elector at the proper place on the poll list or signature pollbook following the elector's mark, upon the presentation of proper identification. The making of such mark shall be attested by the precinct official who shall evidence the same by signing his name on the poll list or signature pollbook as a witness to such mark.</p> <p>The elector's signature in the poll lists or signature pollbooks shall then be compared with his signature on his registration form or a digitized signature list as provided for in section 3503.13 of the Revised Code, and if, in the opinion of a majority of the precinct election officials, the signatures are the signatures of the same person, the clerks shall enter the date of the election on the registration form or shall record the date by such other means as may be prescribed by the secretary of state. If the right of the elector to vote is not then challenged, or, if being challenged, he establishes his right to vote, he shall be allowed to proceed into the voting machine. If voting machines are not being used in that precinct, the judge in charge of ballots shall then detach the next ballots to be issued to the elector from Stub B attached to each ballot, leaving Stub A attached to each ballot, hand the ballots to the elector, and call his name and the stub number on each of the ballots. The clerk shall enter the stub numbers opposite the signature of the elector in the pollbook. The elector shall then retire to one of the voting compartments to mark his ballots. No mark shall be made on any ballot which would in any way enable any person to identify the person who voted the ballot.</p> <p>(Effective at time of last update, 1992 H 182, eff. 4-9-93)</p>	Ohio Rev. Code Ann. § 3505.18

Rev. Stat. § 254.385
Penn.	Match Sig.	(a.3) All electors, including any elector that shows identification pursuant to subsection (a), shall subsequently sign a voter's certificate, and, unless he is a State or Federal employee who has registered under any registration act without declaring his residence by street and number, he shall insert his address therein, and hand the same to the election officer in charge of the district register. Such election officer shall thereupon announce the elector's name so that it may be heard by all members of the election board and by all watchers present in the	25 Pa. Stat. Ann. § 3050

		<p>polling place and shall compare the elector's signature on his voter's certificate with his signature in the district register. If, upon such comparison, the signature upon the voter's certificate appears to be genuine, the elector who has signed the certificate shall, if otherwise qualified, be permitted to vote: Provided, That if the signature on the voter's certificate, as compared with the signature as recorded in the district register, shall not be deemed authentic by any of the election officers, such elector shall not be denied the right to vote for that reason, but shall be considered challenged as to identity and required to make the affidavit and produce the evidence as provided in subsection (d) of this section. When an elector has been found entitled to vote, the election officer who examined his voter's certificate and compared his signature shall sign his name or initials on the voter's certificate, shall, if the elector's signature is not readily legible, print such elector's name over his signature, and the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes shall also be entered by one of the election officers or clerks. As each voter is found to be qualified and votes, the election officer in charge of the district register shall write or stamp the date of the election or primary, the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes, and shall sign his name or initials in the proper space on the registration card of such voter contained in the district register.</p> <p>(In effect at time of, and unaltered by: 2004, Oct. 8, P.L. 807, No. 97, § 5.1 (changes procedure for first time voters, not established voters))</p>	
<p>Rhode Island</p>	<p>Give Name</p>	<p>(a) Each person desiring to vote shall state his or her name and residence, including that person's street address, if he or she has any, to one of the first pair of bi-partisan supervisors, who shall then announce the name and residence in a loud and distinct voice, clear and audible. As each voter's name is announced, the voter shall be handed a ballot application in the following form:</p> <p><b>BALLOT APPLICATION</b></p> <p>(Poll List)          Senatorial District _____          Representative District _____          Voting District _____          Election _____          Date _____</p> <p>I hereby certify that I am a registered and qualified elector in the above voting district of          City of _____          and hereby make application for ballots to be voted at this election.</p> <p>_____</p> <p>(Signature of Voter)</p> <p>_____</p> <p>(Residence Address)          Number Approved _____</p> <p>(Supervisor of Election)</p>	<p>R.I. Gen. Laws § 17-19-24</p>

		<p>(b) The voter shall sign the application in the presence and view of a bipartisan pair. They shall locate the voter's name on the certified voting list for the voting district. Upon finding the voter's name on the certified voting list for the district, they shall initial the ballot application in the place provided next to the word "Approved" and shall enter on the certified list of voters a proper notation that the applicant has voted in the election. They shall then return the ballot application to the voter who shall pass down the line and present it to the clerk. After the voter has handed the approved ballot application to the clerk, the clerk shall provide the voter with the appropriate computer ballot and security sleeve, the warden shall direct the voter to the voting booth which the voter shall use, and unless the voter needs instruction or assistance as provided in this chapter, the voter shall cast his or her vote, and if he or she desires place the voted computer ballot in a security sleeve, and shall proceed to the optical scan precinct count unit and shall personally place his or her voted ballot into the designated ballot slot on the unit, and after doing so, shall leave the enclosure at once. No voter shall remain within the voting booth longer than ten (10) minutes, and if the voter refuses to leave after the lapse of ten (10) minutes, the voter shall be removed from the voting booth by order of the warden. Except for the election officials and the election inspector, not more than two (2) voters in excess of the number of voting booths shall be permitted within the enclosed space at any time.</p> <p>(Last amended 2004, Current through January 2005 Session)</p>	
South Carolina	Photo ID	<p><b>§ 7-13-710. Proof of right to vote; signing poll list; comparison of signatures.</b></p> <p>When any person presents himself to vote, he shall produce his valid South Carolina driver's license or other form of identification containing a photograph issued by the Department of Motor Vehicles, if he is not licensed to drive, or the written notification of registration provided for by §§ 7-5-125 and 7-5-180 if the notification has been signed by the elector. If the elector loses or defaces his registration notification, he may obtain a duplicate notification from his county board of registration upon request in person, or by telephone or mail. After presentation of the required identification, his name must be checked by one of the managers on the margin of the page opposite his name upon the registration books, or copy of the books, furnished by the board of registration. The managers shall keep a poll list which must contain one column headed "Names of Voters". Before any ballot is delivered to a voter, the voter shall sign his name on the poll list, which must be furnished to the appropriate election officials by the State Election Commission. At the top of each page the voter's oath appropriate to the election must be printed. The signing of the poll list or the marking of the poll list is considered to be an affirmation of the oath by the voter. One of the managers shall compare the signature on the poll list with the signature on the voter's driver's license, registration notification, or other identification and may require further identification of the voter and proof of his right to vote under this title as he considers necessary. If the voter is unable to write or if the voter is prevented from signing by physical handicap, he may sign his name to the poll list by mark with the assistance of one of the managers.</p> <p>Last amended: 1968</p>	S.C. Code Ann. § 7-13-710
South Dakota	Photo ID	<p>When a voter is requesting a ballot, the voter shall present a valid form of personal identification. The personal identification that may be presented shall be either:</p> <ol style="list-style-type: none"> <li>(1) A South Dakota driver's license or nondriver identification card;</li> <li>(2) A passport or an identification card, including a picture, issued by an agency of the United States government;</li> <li>(3) A tribal identification card, including a picture; or</li> <li>(4) An identification card, including a picture, issued by a high school or an accredited institution of higher education, including a university, college, or</li> </ol>	S.D. 		<p>technical school, located within the State of South Dakota.</p> <p>Last amended March 2004</p>	
Tennessee	Provide ID	<p>Identification of eligible voters</p> <p>(a)(1) A voter shall sign an application for ballot, indicate the primary in which the voter desires to vote, if any, and present it to a registrar. The application for ballot shall include thereon a space for the address of the voter's current residence, and the voter shall write or print such address on the application when the voter signs it. The registrar shall compare the signature and information on the application with the signature and information on the duplicate permanent registration record. The registrar shall make a determination whether the voter's address is different from the address on the voter's permanent registration record or if the registration is in inactive status. If the voter has changed residence, or the voter's registration is inactive, the registrar shall follow the procedures for voting pursuant to § 2-7-140. If, upon comparison of the signature and other identification, it is found that the applicant is entitled to vote, the registrar shall initial the application and shall note on the reverse side of the voter's duplicate permanent registration record the date of the election, the number of the voter's ballot application, and the elections in which the voter votes. If the applicant's signature is illegible, the registrar shall print the name on the application. The registrar shall give the voter the ballot application which is the voter's identification for a paper ballot or ballots or for admission to a voting machine. The voter shall then sign the duplicate poll lists without leaving any lines blank on any poll list sheet.</p> <p>(2) In any computerized county, the county election commission shall have the option of using an application for a ballot as provided in this section, or using the computerized voter signature list. A computerized voter signature list shall include the voter's name, current address of residence, social security number or registration number, birth date and spaces for the voter's signature, elections voted, ballot number and precinct registrar's initials. The following procedures shall be followed in the case of computerized voter signature lists:</p> <p>(A) The voter shall sign the signature list and indicate the election or elections the voter desires to vote in and verify the voter's address in the presence of the precinct registrar;</p> <p>(B) The registrar shall compare the voter's signature and information on the signature list with other evidence of identification supplied by the voter. If, upon comparison of the signature and other evidence of identification, it is found that the applicant is entitled to vote, the registrar shall initial the signature list;</p> <p>(C) If the applicant's signature is illegible, the registrar shall print the name of the applicant on the voter list; and</p> <p>(D) If a voter is unable to present any evidence of identification specified in subsection (c), the voter shall be required to execute an affidavit of identity on a form provided by the county election commission.</p> <p>Last amended 2003</p>	Tenn. Code Ann. § 2-7-112

Vermont	Give Name	<p>Before a person may be admitted to vote, he or she shall announce his or her name and if requested, his or her place of residence in a clear and audible tone of voice, or present his or her name in writing, or otherwise identify himself or herself by appropriate documentation. The election officials attending the entrance of the polling place shall then verify that the person's name appears on the checklist for the polling place. If the name does appear, and if no one immediately challenges the person's right to vote on grounds of identity or having previously voted in the same election, the election officials shall repeat the name of the person and:</p> <p>(1) If the checklist indicates that the person is a first-time voter in the municipality who registered by mail and who has not provided required identification before the opening of the polls, require the person to present any one of the following: a valid photo identification; a copy of a current utility bill; a copy of a current bank statement; or a copy of a government check, paycheck, or any other government document that shows the current name and address of the voter. If the person is unable to produce the required information, the person shall be afforded the opportunity to cast a provisional ballot, as provided in subchapter 6A of this chapter. The elections official shall note upon the checklist a first-time voter in the municipality who has registered by mail and who produces the required information, and place a mark next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting.</p> <p>(2) If the voter is not a first-time voter in the municipality, no identification shall be required, the clerk shall place a check next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting.</p> <p>(Last amended in 2003)</p>	Vt. Stat. Ann. tit. 17, § 2563
Virginia	Provide ID	<p>§ 24.2-643. Qualified voter permitted to vote; procedures at polling place; voter identification</p> <p>A. After the polls are open, each qualified voter at a precinct shall be permitted to vote. The officers of election shall ascertain that a person offering to vote is a qualified voter before admitting him to the voting booth and furnishing an official ballot to him.</p> <p>B. An officer of election shall ask the voter for his full name and current residence address and repeat, in a voice audible to party and candidate representatives present, the full name and address stated by the voter. The officer shall ask the voter to present any one of the following forms of identification: his Commonwealth of Virginia voter registration card, his social security card, his valid Virginia driver's license, or any other identification card issued by a government agency of the Commonwealth, one of its political subdivisions, or the United States; or any valid employee identification card containing a photograph of the voter and issued by an employer of the voter in the ordinary course of the employer's business.</p> <p>If the voter's name is found on the pollbook, if he presents one of the forms of</p>	Va. Code. Ann.

		<p>identification listed above, if he is qualified to vote in the election, and if no objection is made, an officer shall enter, opposite the voter's name on the pollbook, the first or next consecutive number from the voter count form provided by the State Board, or shall enter that the voter has voted if the pollbook is in electronic form; an officer shall provide the voter with the official ballot; and another officer shall admit him to the voting booth.</p> <p>Except as provided in subsection E of this section, if a voter is entitled to vote except that he is unable to present one of the forms of identification listed above, he shall be allowed to vote after signing a statement, subject to felony penalties for false statements pursuant to § 24.2-1016, that he is the named registered voter who he claims to be. A voter who requires assistance in voting by reason of physical disability or inability to read or write, and who requests assistance pursuant to § 24.2-649, may be assisted in preparation of this statement in accordance with that section. The provisions of § 24.2-649 regarding voters who are unable to sign shall be followed when assisting a voter in completing this statement.</p> <p>(Version in effect as of 2004- effective 4/12/2004)</p>	
Washington	Sign Name	<p>29A.44.201.</p> <p>A voter desiring to vote shall give his or her name to the precinct election officer who has the precinct list of registered voters. This officer shall announce the name to the precinct election officer who has the copy of the inspector's poll book for that precinct. If the right of this voter to participate in the primary or election is not challenged, the voter must be issued a ballot or permitted to enter a voting booth or to operate a voting device. For a partisan primary in a jurisdiction using the physically separate ballot format, the voter must be issued a nonpartisan ballot and each party ballot. The number of the ballot or the voter must be recorded by the precinct election officers. If the right of the voter to participate is challenged, RCW 29A.08.810 and 29A.08.820 apply to that voter.</p> <p>(In effect at time of last update prior to 2005: 2004 c 271 § 136, eff. West Virginia	Match Sig.	<p>(a) Any person desiring to vote in an election shall, upon entering the election room, clearly state his or her name and residence to one of the poll clerks who shall thereupon announce the same in a clear and distinct tone of voice. If that person is found to be duly registered as a voter at that precinct, he or she shall be required to sign his or her name in the space marked "signature of voter" on the pollbook prescribed and provided for the precinct. If that person is physically or otherwise unable to sign his or her name, his or her mark shall be affixed by one of the poll clerks in the presence of the other and the name of the poll clerk affixing the voter's mark shall be indicated immediately under the affixation. No ballot may be given to the person until he or she so signs his or her name on the pollbook or his or her signature is so affixed thereon.</p> <p>* * *</p> <p>(c) When the voter's signature is properly on the pollbook, the two poll clerks shall sign their names in the places indicated on the back of the official ballot and deliver the ballot to the voter to be voted by him or her without leaving the</p>	<p>W. Va. Code § 3-1-34 (a)</p>

		<p>election room. If he or she returns the ballot spoiled to the clerks, they shall immediately mark the ballot "spoiled" and it shall be preserved and placed in a spoiled ballot envelope together with other spoiled ballots to be delivered to the board of canvassers and deliver to the voter another official ballot, signed by the clerks on the reverse side required by this subsection. The voter shall thereupon retire alone to the booth or compartment prepared within the election room for voting purposes and there prepare his or her ballot using a ballpoint pen of not less than five inches in length or other indelible marking device of not less than five inches in length. In voting for candidates in general and special elections, the voter shall comply with the rules and procedures prescribed in section five, article six of this chapter.</p> <p>(In effect at time of last update prior to 2005: Acts 2003, c. 100, eff. 90 days after March 7, 2003)</p>	
Wisconsin	Give Name	<p>6.79(2)(a) Except as provided in sub. (6), where there is registration, each person, before receiving a voting number, shall state his or her full name and address. Upon the prepared registration list, after the name of each elector, the officials shall enter the serial number of the vote as it is polled, beginning with number one. Each elector shall receive a slip bearing the same serial number. A separate list shall be maintained for electors who are voting under s. 6.15, 6.29 or 6.55(2) or (3) and electors who are reassigned from another polling place under s. 5.25(5)(b). Each such elector shall have his or her full name, address and serial number likewise entered and shall be given a slip bearing such number.</p> <p>(In effect at time of last update prior to 2005: 2003 Act 327, § 4, eff. June 12, 2004)</p>	Wis. Stat. § 6.79
Wyoming	Give Name	<p>(a) Unless a voter is challenged pursuant to W.S. 22-15-101 through 22-15-109, no identification shall be required when:</p> <p>(i) Voting in person or by mail after having registered in person; or</p> <p>(ii) Voting in person or by mail after having registered by mail and having previously voted in a Wyoming federal election.</p> <p>(In effect at time of last update prior to 2005: Effective dates. -- Laws 2004, ch. 94, § 5, makes the act effective immediately upon completion of all acts necessary for a bill to become law as provided by art. 4, § 8, Wyo. Const. Approved March 5, 2004.)</p>	Wyo. Stat. Ann. § 22-3-118

## APPENDIX B – Court Decisions and Literature on Voter Identification and Related Issues

### Court Decisions

#### Summary of Relevant Cases:

#### Challenges Prevailed:

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### Challenges Rejected:

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters’ identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions’ purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

*McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

*Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

*Perez v. Rhiddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

**Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

**Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

### **Current Litigation Concerning Voter ID Issues<sup>1</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>1</sup> As of January 2, 2006

**Georgia** (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>2</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>3</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

**Indiana** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

<sup>2</sup> Litigation documents are available at the Election Law @ Moritz website.  
<http://moritzlaw.osu.edu/electionlaw/litigation/index.php>

<sup>3</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>4</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>4</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

## Appendix C

### Analysis of Effects of Voter Identification Requirements on Turnout

Tim Vercellotti  
Eagleton Institute of Politics  
Rutgers University  
May 16, 2006

#### Introduction

A key area of disagreement in the policy debate over voter identification requirements concerns whether such requirements dampen turnout among those eligible to vote. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics of voter identification requirements contend that the effect is greater based on specific types of requirements. Critics argue that requiring voters to produce some form of government-issued photo identification on Election Day is more demanding than requiring, for example, that they state their names at the polling place because of the various steps needed to procure a photo identification card, such as a driver's license. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. This report draws from two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

#### Types of voter identification requirements

Based on research by the Moritz College of Law, states had one of five types of requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (10 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>5</sup> It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification.

---

<sup>5</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). For the purposes of this analysis I also tested the array of minimum identification requirements to assess whether they posed increasing levels of demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

### **Estimating turnout among citizens in the voting-age population**

This report examines turnout among U.S. citizens of voting age in both the aggregate- and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

In the aggregate data, determining the percentage of the voting-age population that has U.S. citizenship posed a methodological challenge. The Census Bureau gathers information on the citizenship status of adults ages 18 and older only during the decennial census. While the Census Bureau provides annual estimates of the population to account for changes between decennial censuses, the bureau does not offer estimates for the proportion of the adult population who are citizens as part of the annual estimates. To address this issue I estimated the 2004 citizen voting-age population for each county using a method reported in the analysis of the 2004 Election Day Survey conducted for the U.S. Election Assistance Commission (U.S. Election Assistance Commission, 2005). I calculated the percentage of the 2000 voting-age population who were citizens in 2000, and applied that percentage to the July 1, 2004 estimates for voting-age population in each county. In other words, I assumed that the percentage of the voting-age population that had U.S. citizenship in 2004 was similar to the percentage of the voting-age population who were citizens in 2000.<sup>6</sup>

### **Analysis of aggregate data**

If one treats maximum voter identification requirements as a continuous variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter

---

<sup>6</sup> McDonald and Popkin (2001) recommend an even more stringent approach to voter turnout calculations. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.

identification requirements ( $r = -.30$ ,  $p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20$ ,  $p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.2 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, I opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.<sup>7</sup>

Voter identification requirements alone do not determine voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county.

I coded the voter identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

To capture electoral context I included whether the county was in a presidential battleground state (any state in which the margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus I added a variable to reflect the number of days between each state's registration deadline and the election.<sup>8</sup>

<sup>7</sup> Treating maximum voter identification requirements as a continuous variable yielded results in which voter identification requirements were negatively related to aggregate turnout. Those results can be found in Table A-1 in the Appendix to this report.

<sup>8</sup> For states that had Election Day registration or no registration requirement (North Dakota), I assigned a value of zero to this variable.

Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the median household income for 2002 in each county.<sup>9</sup>

I estimated a series of random effects models to account for the likelihood that data from counties were correlated within each state (for further explanation of random effects and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998).<sup>10</sup> I allowed the median income variable to have both fixed and random effects in each state to take into account variation in the cost of living in each state. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the estimated citizen voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, two of the four requirements had a small and negative effect on turnout in 2004: matching one's signature and providing a non-photo identification. Taking into account the reference variable of stating one's name, the results indicate that turnout was lower in states that required signature matches or a non-photo identification than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Two contextual factors -- whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate-- increased voter turnout. The time between the closing date for registration and the election had a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income had positive effects on turnout. The percentage of African-Americans in the county did not have a significant effect.

The effects of the minimum voter identification requirements were non-existent. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to have a negative effect on turnout, as did the number of days between the closing date for registration and the election.

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. A chi-square test of the difference in the deviance for each model (represented by -2 log likelihood in Table 2),

<sup>9</sup> To bring the income figures into a scale comparable to those of the other variables, I used the natural log of median household income.

<sup>10</sup> The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the intercept as a predictor generated an intraclass correlation of .43, indicating considerable variation between the states.

showed no significant improvement by including the interactions ( $p > 0.05$ ). I report the coefficients for the models with the interactions in the Appendix in tables A-2 and A-3.

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the identification requirements for voting vary, so does turnout. Specifically, in terms of the maximum requirements, the results suggest that requiring a signature match or non-photo identification is negatively related to turnout compared to requiring that a voter state his or her name. But the analysis showed that adding interactions between identification requirements and the percentage of the county that was African-American or Hispanic did not improve the fit of the model to the data.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>11</sup> Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

### Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>12</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not registered to vote. I also excluded those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S. citizens because the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey.

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>13</sup> As in the analysis of aggregate data, I coded the voter

<sup>11</sup> A reviewer for an earlier version of this paper recommended adding an education variable to the aggregate model. One version of the aggregate model not reported here included the percentage of adults in the county who had at least a college degree. The measure was highly collinear with the percentage of residents living below the poverty line, necessitating removal of the college degree variable from the model.

<sup>12</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

<sup>13</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown

identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.<sup>14</sup>

In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate data analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less.<sup>15</sup> At the individual level, I controlled for gender, household income, and dummy variables for race/ethnicity, age and education. In terms of race and ethnicity, I created dummy variables to represent whether a voter was Black/non-Hispanic, Hispanic, or Asian (with white/non-Hispanic/other voters as the omitted category for reference purposes). I separated education into five dummy variables: less than high school, high school diploma, some college, college graduate, and graduate training. I omitted the "less than high school" variable from the model for reference purposes. Regarding age, I created four dummy variables to represent 18 to 24 years of age, 29 to 44, 45 to 64, and 65 years and older. I omitted the 18-to-24 category as the reference variable in the model.

Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

## Results

---

that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>14</sup> Earlier versions of this paper included an individual-level analysis that included the five maximum voter identification requirements combined into a continuous variable. The results of that analysis, which found that voter identification requirements had a negative relationship with turnout, can be found in table A-4 in the Appendix.

<sup>15</sup> Given that the individual-level analysis focused on registered voters (as opposed to the citizen voting-age population in the aggregate analysis), I did not include the closing date for registration as a predictor of turnout in the individual-level analysis.

The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted. I estimated the models using robust standard errors to control for correlated error terms for observations from within the same state.

[Table 3 here]

The two models in Table 3 use either the maximum or minimum voter identification requirements in each state. The two models generate similar results. In each model, three of the voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. In other words, compared to states that require voters only to state their names, the requirements to sign one's name, provide a non-photo identification, photo identification in the maximum requirements or affidavit in the minimum requires exert a negative influence on turnout.

Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had finished high school. Respondents who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>16</sup> I calculated the probabilities taking into account both maximum and minimum requirements.

[Table 4 here]

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability appear to decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>17</sup> In terms of the

<sup>16</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

<sup>17</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of

minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter identification requirements. But incorporating dummy variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, I divided the sample into sub-samples and re-ran the probit models.

[Table 5 here]

The effects of voter identification requirements were similar for white voters compared to the entire sample, which was not surprising given that white voters comprised 81 percent of the sample. Voters in states where the maximum requirement involved signing one's name, providing a non-photo identification or photo identification were less likely to vote than those in a state that required voters to give their names. Taking into consideration the minimum requirements, this was true only for voters in states that require a non-photo identification or an affidavit. White voters in photo identification states were 3.7 percent less likely to vote than were white voters in states where respondents gave their names. The difference in probability was 4.4 percent for voters in states where an affidavit was the minimum requirement.

Voter identification requirements also influenced turnout among Black voters, but to a lesser extent relative to white voters.

[Table 6 here]

Of the maximum voter identification requirements, only the non-photo identification requirement reduced turnout compared to turnout in states that required voters to state their names. The predicted probability of voting was 5.7 percent lower for Black respondents in states that required non-photo identification. In terms of age, only African-Americans age 65 and older were more likely to vote than respondents in the 18 to 24 referent group. Respondents in all levels of education were more likely to vote than respondents without a high school diploma. Gender, income, living in a battleground state, being a part of the workforce and having been born in the United States also were positive predictors. Recent mobility tended to lower the probability of voting. None of the minimum identification requirements had a significant effect on voting, while most of the remaining variables had effects similar to those in the maximum requirement model.

---

all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

Hispanic voters also were less likely to vote in states that required non-photo identification as opposed to stating one's name.

[Table 7 here]

Using the coefficients from Table 7 to calculate predicted probabilities, for both the maximum and minimum requirements, Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. Hispanic voters ages 45 to 64 and 65 and over were more likely to vote than their 18-to-24-year-old counterparts. Education and income also were positive predictors of voting. Interestingly, being a native-born citizen lowered the probability of voting, while native-born citizenship was a positive predictor for African-American voters and was not a predictor at all for white voters. It may be that naturalized citizens of Hispanic descent are more conscious of the value of voting rights than other groups.

Varying voter identification requirements influenced Asian-American voters as well. As with Hispanic and Black voters, Asian-American voters were less likely to turn out in states with non-photo identification requirements than in states where voters gave their names.

[Table 8 here]

Using the probit coefficients to calculate predicted probabilities, Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement. Asian-American voters also were 2.2 percent less likely to vote when signatures were the maximum requirement compared to stating one's name.

In terms of other predictors, there were no significant differences in terms of age or income. In contrast to Hispanic voters, where one was a naturalized or natural-born citizen did not affect the probability of voting. Those with high school or college diplomas or graduate training were more likely to turn out than those with less than a high school diploma. Women and married voters also were more likely to turn out than men and voters who were not married.

## **Discussion and conclusion**

The results presented here provide evidence that as voter identification requirements vary, voter turnout does as well. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but still statistically significant.

In the aggregate data, requirements that voters match signatures on file, provide a non-photo identification or photo identification had negative effects on turnout compared to requiring that voters state their names. Interactions with specific groups – African-Americans and Hispanics – did not improve the fit of the aggregate data to the models. But differences emerged among specific groups in the individual-level data. The signature, non-photo identification and photo identification requirements all had negative effects compared to the requirement that voters simply state their names. These effects translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For

example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters (the gap widened to 3.7 percent for white voters when comparing photo identification to simply stating one's name).

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This begs the question as to why photo identification requirements did not have a greater influence in 2004. It may have been due to the fact that photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement.

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements?<sup>18</sup> Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

---

<sup>18</sup> The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using the November 2004 Current Population Survey data and voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not registered). Of all of the voter identification requirements, only requiring signatures or matching signatures had a significant effect on whether a respondent said he or she was registered to vote in 2004. In each instance the effect was negative.

## The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

## REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

---

### Report Background

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

### EXECUTIVE SUMMARY AND RECOMMENDATIONS

#### Background and Methods

This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.

000000

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

- Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters --such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.
- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.

028707

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:<sup>1</sup> the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.<sup>2</sup> Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed.<sup>3</sup> As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible

---

<sup>1</sup> See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

<sup>2</sup> The EAC has contracted with other researchers to study vote fraud issues.

<sup>3</sup> Appendix C: Tim Vercellotti, Eagleton Institute of Politics, *Analysis of Effects of Voter Identification Requirements on Turnout*.

028708

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

voters, however, the tradeoffs between ballot security and ballot access cannot be assessed fully.

Methodology

The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.<sup>4</sup> The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be *asked* to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be *required* to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included "maximum" requirements in our analysis, and not simply "minimum" requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the "maximum" of being asked to show photo ID may deter some voters even though the "minimum" would allow them to vote without photo ID.

---

<sup>4</sup> Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146

028709

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

It is worth emphasizing that, at the time of the 2004 election, there was *no* state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings

As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis's aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a

028710

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

significant predictor of turnout. Signature match and non-photo id remain significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a "maximum" requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a "minimum" requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for

028711

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>5</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls-- are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.
2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls

---

<sup>5</sup> Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.

028712

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC can also use this information to encourage the states to assess the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
  - I. Useful information could be supplied by state-sponsored surveys of voters by local election officials. It would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
  - II. Surveys to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
  - III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks statutory or regulatory requirements. Such reports should be available to the public.
4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors:

028713

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

the convenience of the voter, the total time allowed to evaluate ballots<sup>6</sup>, and the safe harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends.

Requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more uncertain.

## **SUMMARY OF RESEARCH**

### **Background and Approach of the Study**

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether the vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". *The Journal of Politics*, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." *American Political Science Review*. 61:2 (June 1967) found that local variations in the

---

<sup>6</sup> Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

028714

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly*. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics*. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.
  
- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior*. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review*. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review*. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.
  
- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review*. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior*. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.

028715

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics*., 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

Voter ID requirements on Election Day

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>7</sup> The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.<sup>8</sup>

---

<sup>7</sup> As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

<sup>8</sup> Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

028710

**For review by the EAC's Advisory Boards**

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.<sup>9</sup> Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter

---

<sup>9</sup> "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

028717

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.<sup>10</sup> Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.<sup>11</sup> And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?<sup>12</sup>

---

<sup>10</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>11</sup> The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

<sup>12</sup> "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)

028718

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>13</sup>
3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>14</sup>
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.<sup>15</sup> A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.
5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>16</sup>
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it,

---

<sup>13</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

<sup>14</sup> In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>15</sup> "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

<sup>16</sup> For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).

028755

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

**Voter ID and Turnout**

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>17</sup> Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.<sup>18</sup>

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum

---

<sup>17</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

<sup>18</sup> As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, *no* state had a “minimum” requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state’s voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice.<sup>19</sup> Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state’s legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

---

<sup>19</sup> One state election official told us that, “We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is.”

\* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

<sup>1</sup> Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

<sup>2</sup> Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

<sup>3</sup> Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

<sup>4</sup> Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

<sup>5</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>6</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>7</sup> Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

<sup>8</sup> Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

028723

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ( $r = -.30, p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20, p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	<b>64.2 %</b>	State Name	<b>63.0 %</b>
Sign Name	<b>61.1 %</b>	Sign Name	<b>60.4 %</b>
Match Signature	<b>60.9 %</b>	Match Signature	<b>61.7 %</b>
Provide Non-Photo ID	<b>59.3 %</b>	Provide Non-Photo ID	<b>59.0 %</b>
Provide Photo ID	<b>58.1 %</b>	Swear Affidavit	<b>60.1 %</b>
<i>Average Turnout (All States)</i>	<b>60.9 %</b>		

**This table displays the mean turnout using the aggregate county level data for each state in 2004.**

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.<sup>21</sup>

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American<sup>22</sup>
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

---

<sup>21</sup> The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

<sup>22</sup> The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.

028725

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.<sup>23</sup>

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

---

<sup>23</sup> This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.

028726

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote.<sup>24</sup> Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

#### Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>25</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from *self-described* registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

---

<sup>24</sup> For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>24</sup> Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

<sup>25</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

028727

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

influenced turnout in 2004.<sup>26</sup> The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>27</sup>

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation.<sup>28</sup> Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>29</sup>

---

<sup>26</sup> The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

<sup>27</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>28</sup> A probit model is a popular specification of a generalized linear regression model, using the probit link function.

<sup>29</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

<b>Table 3. Predicted probability of voter turnout – all voters</b>		
	<b>Maximum requirement</b>	<b>Minimum requirement</b>
<b>State name</b>	91.7%	91.5%
<b>Sign name</b>	89.9%	90.2%
<b>Match signature</b>	Not significant	Not significant
<b>Non-photo ID</b>	89.0%	89.0%
<b>Photo ID</b>	88.8%	----
<b>Affidavit</b>	----	87.5%
<b>Total difference from “state name” to “photo ID” or “affidavit”</b>	<b>2.9%</b>	<b>4.0%</b>
<b>N</b>	54,973	
<p>Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies stating one's name to providing photo identification or an affidavit, with all other variables held constant. N.S. = nonsignificant coefficient in the probit model.</p> <p>Data source: U.S. Census Bureau, Current Population Survey, Voting and Registration Supplement, November 2004.</p>		

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>30</sup> In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

<sup>30</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

028729

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Race and ethnicity have generated particular interest in the debate over voter ID requirements.<sup>31</sup> The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

---

<sup>31</sup> Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day , or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

**Litigation Over Voter ID Requirements**

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (*Common Cause v. Billups* and *Indiana Democratic Party v. Rokita*). Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the

028731

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.<sup>32</sup> Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL

---

<sup>32</sup> Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

**Developments since 2004**

028733

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at:

028734

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

**Conclusions**

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.<sup>33</sup>

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents

---

<sup>33</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

with them to the polls, while assuring that each voter who casts a ballot is eligible and votes only once.

**10:15 am - 5:15 pm Redistricting & Elections Committee**

### ***Supremes Rule on Re-Redistricting of Texas***

10:15 am - 11:30 am

Three years after the highly publicized redrawing of Texas congressional districts, the U.S. Supreme Court ruled in June on whether the Legislature acted unconstitutionally. How will the decision alter the redistricting process? What subtle, but critical, lines were buried in the text of the opinions?

### ***Legislative Competition and the role of Gerrymandering?***

11:30 am - 12:45 pm

Are legislative elections really less competitive today than in the past? Is gerrymandering the culprit or one of many reasons. New research helps put the redistricting factor in perspective.

### ***Are Voters Who they Say they Are?***

1:00 pm - 2:00 pm

Many states continue to look at the issue of voter ID and struggle with balancing the need for maximum access to the polls with trying to eliminate any possible fraud. How big is this problem and what are states doing about it?

### ***Will Fall Elections Run like Clockwork?***

2:00 pm - 3:00 pm

Since the controversial 2000 election debacle, most states have implemented key election

028737

reforms to shore up the system and respond to federal legislation. Will this fall's 2006 election go off without a hitch or will new problems emerge in the voting process?

### ***What's Next in Redistricting Technology***

3:15 pm - 4:15 pm

Redistricting software vendors will preview and demonstrate what they are planning for 2010. They will be discuss things like the next generation of redistricting technology with support for desktop, Web based and PDA/Cellular applications.

### ***Countdown to Census 2010***

4:15 pm - 5:15 pm

Speakers: Linda Franz, Geographer, U.S. Census Bureau, Washington, D.C.  
Bob LaMacchia, Chief, Geography Division, U.S. Census Bureau, Washington, D.C.  
Cathy McCully, Chief, Census Redistricting Data Office, U.S. Census Bureau, Washington, D.C.

## **Wednesday, August 16, 2006**

**10:15 am - 11:30 am Redistricting & Elections Committee**

### ***Are 527s Here to Stay?***

In many states, the so-called 527 groups are likely to play a major part in this fall's campaigns. What are they? Should they be regulated? Can they be regulated? What are states doing in this area?

**2:45 pm - 4:15 pm Money and Politics**

As ethical scandals over campaign contributions and influence-buying swirl around Washington, D.C., states once again take the lead in finding new solutions to an old problem. This session will highlight states' innovative ideas for regulating money in politics and the role of lobbyists in fundraising and campaigns.

## **Friday, August 18, 2006**

**8:30 am - 10:00 am General Session and Breakfast**

### ***SPEAKERS :***

Peter Hart has been one of the country's leading public opinion analysts for more than 27 years. He conducts all public opinion polling for NBC News and The Wall Street Journal. His focus is public policy, cultural and social issues, and strategic consulting for corporations, including Time Warner, Microsoft, Kodak to name a few.

Frank Luntz is one of the most honored communications professionals in America today. Named one of the four Top Research Minds by Business Week magazine, he pioneered the Instant Response focus group research technique, and won an Emmy Award in 2001 for his 100 Days, 1000 Voices segments on NBC's primary and election night coverage.

Subject: State election fraud statute collection?

Dear Craig:

Hope is well with you. Hoping that you can help us out with a quick request from a member of congressional committee. They would like to know if there exists a list (compendium or index) of state election laws on crime and fraud specifically. They are trying to get access to such a list as soon as possible, for a Congressional hearing on Thursday. If no list exists to your knowledge, that's great. If it does exist, and we can get access to it, please let me know.

Thanks so much, Craig. I hope all is well.  
Best,  
Adam

Subject Commissioner approval (by 2/25) of contracting process for work on Provisional Voting and Voter ID projects

Commissioners-

As was discussed during our session on February 17, 2005, please *review and provide your approval , disapproval or amendments* to the following items by Friday, February, 25, 2005:

1. The attached Scope of Work which outlines the tasks related to contract work around projects relating to voluntary guidance on provisional voting and voter identification procedures.
2. The proposal will be advertised beginning **February 28, 2005**.
3. The deadline for submitting proposals will be **March 14, 2005**.
4. Proposal review will be completed by EAC staff by **March 17, 2005**
5. Staff will recommend a contractor to the Commissioners on **March 18, 2005**.
6. Commissioners will be asked for their decisions no later than **Tuesday, March 22, 2005**

February 14, 2005

PROVIDING EAC ASSISTANCE IN DEVELOPING VOLUNTARY GUIDANCE ON  
PROVISIONAL VOTING AND VOTER IDENTIFICATION PROCEDURES

0.0 Contract Title: Assistance to the U.S. Election Assistance Commission in the Development of Guidance on Provisional Voting and Voter Identification Procedures

1.0 Background: Sec. 302(a) of HAVA requires that all States allow the casting of provisional ballots in instances where a voter declares their eligibility to vote but their name does not appear on the official list of eligible voters, or an election official asserts that a voter is not eligible to vote. This section describes several requirements for implementation of provisional voting, but the States have considerable latitude in specifying how to carry out these requirements. The EAC seeks to examine how provisional voting was implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 Federal elections.

HAVA Sec. 303(b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC seeks to examine how these voter identification requirements were implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 elections.

One of the remedies for a voter not having an acceptable proof of identity is to allow the voter to cast a provisional ballot, either at the polling place or by mail. This linkage between these two HAVA sections provides a rationale for conducting research on these topics in parallel. However, it is anticipated that two separate guidance documents will result.

2.0 Objective: The objective of this contract is for EAC to obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics for promulgation to the States in time for implementation for the 2006 Federal elections. The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

3.0 Scope: In general the Contractor shall be responsible for all research and analysis activities, including the conduct of public hearings for fact finding and public comment purposes. However, in light of the urgent need to get this work underway, the EAC has scheduled a public hearing on February 23, 2005, on the topic of provisional voting.

028745

An initial framework for provisional voting policy has been set by the court decisions rendered on the election procedures utilized in the 2004 election. The 6<sup>th</sup> Circuit decision, in particular, has drawn some boundaries which must be given due regard in the course of considering future policy alternatives for provisional voting.

Notice of public meetings and hearings is required to be published in the Federal Register. The Contractor shall be responsible for preparing the notice documents, and the EAC will submit the notices and cover the cost of publication. In addition, draft guidance documents must be published in the Federal Register to obtain public comment prior to their adoption. Again, the Contractor will work with the EAC to prepare the draft documents for publication, which the EAC will submit and cover the cost of publication. Comments received will be provided to the Contractor for analysis and incorporation into the final guidance documents, as appropriate.

#### 4.0 Specific Tasks

For ease of reference, following task 4.3 the remaining tasks are listed separately under the headings of Provisional Voting and Voter Identification Requirements. It is understood that the work on these two topics will be conducted essentially concurrently, with Voter Identification activities starting approximately one month after Provisional Voting.

- 4.1 Prepare a project work plan. The Contractor shall prepare and deliver a brief Project Plan not later than 10 days after contract award. This plan shall describe how the Contractor will accomplish each of the project tasks, including a timeline indicating major milestones. A single document will be prepared to include both provisional voting and voter identification tasks. The Plan shall be presented at a project kickoff meeting with the EAC Project Manager.
- 4.2 Submit monthly progress reports. The Contractor shall submit a monthly progress report within 2 weeks of the end of each month. This report shall provide a brief summary of activities performed and indicate progress against the timeline provided in the Project Plan. Any issues that could adversely affect schedule should be identified for resolution. Budget status should also be provided.
- 4.3 Conduct periodic briefings for the EAC. The Contractor shall periodically meet with the EAC Project Manager and the lead Commissioner for this work to discuss research findings and progress. The Project Plan should make allowance for this activity. The number and frequency of briefings will be determined by the Contractor Project Manager and the EAC Project Manager as the work progresses. The Contractor may also be required to periodically brief the full Commission on their work.

#### Provisional Voting

- 4.4 Collect and analyze State legislation, administrative procedures, and court cases. An understanding of the disparities and similarities of how provisional

028746

voting was implemented around the country will provide a baseline for the consideration of future approaches. Seventeen States never had provisional voting before HAVA was enacted, while many other States did. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

- 4.5 Recommend alternative approaches for future implementation of provisional voting. The Contractor shall conduct a literature review to identify other research results and data available on this topic. The EAC Election Day Survey, for example, contained several questions on provisional voting. The EAC will make these survey data available to the Contractor. Based on their analysis of available research and the results of Task 4.5, the Contractor shall diagnose the problems and challenges of provisional voting implementation and hypothesize alternative approaches.

The Contractor shall assess the efficacy of these alternatives in relation to the following inter-related policy objectives: (1) enabling the maximum number of eligible voters to cast ballots that will be counted; (2) providing procedural simplicity for voters, poll workers, and election officials; (3) minimizing opportunity for voter fraud; and (4) maintaining a reasonable workload for election officials and poll workers. Additional policy considerations may be identified in the course of this research effort. The Contractor shall document and brief these alternatives to the Commission.

- 4.6 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors. EAC will convene a Board of Advisors meeting or teleconference for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.
- 4.7 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC and the Board of Advisors and provide the draft guidance for publication in the Federal Register by the EAC.
- 4.8 Arrange one public hearing for receiving public comment on draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. No speakers will be required. EAC will handle publicity for the meeting
- 4.9 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.

## Voter Identification Requirements

- 4.10 Collect and analyze State legislation, administrative procedures, and court cases. It is assumed that the collection of information for analysis of voter identification requirements will be performed concurrently with the research for Task 4.5. An understanding of the disparities and similarities of how voter identification requirements were implemented around the country will provide a baseline for the consideration of future approaches. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.
- 4.11 Convene a half day public hearing on the topic of voter identification requirements. The Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC. The Contractor shall identify three panels of three to four speakers each. The Contractor shall arrange for speaker attendance to include travel and per diem expenses. The EAC will provide publicity for the hearing. The Contractor shall prepare a document summarizing the proceedings and containing all testimony provided.
- 4.12 Recommend alternative approaches for future implementation of HAVA voter identification requirements. The Contractor shall conduct a literature review to identify other research results and data available on this topic. Based on their analysis of available research and the results of Task 5.11, the Contractor shall diagnose the problems and challenges of voter identification and hypothesize alternative approaches. The Contractor shall coordinate with the EAC to identify appropriate policy objectives by which to assess these alternatives. The Contractor shall document and brief these alternatives to the Commission.
- 4.13 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors. EAC will convene a Board meeting or teleconference for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.
- 4.14 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC and the Board of Advisors and provide the draft guidance for publication in the Federal Register by the EAC.
- 4.15 Arrange one public hearing for receiving public comment on the draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. No speakers will be required. EAC will handle publicity for the hearing.
- 4.16 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.

Contract Type. The contract type will be Time and Materials with a ceiling of

6.0 Place of performance. The principal place of performance will be the Contractor's place of business. Meetings and occasional work efforts may be performed at the EAC offices.

7.0 Period of Performance. The period of performance is from date of award until October 28, 2005.

8.0 Schedule of Deliverables:

- Project plan – 10 days after contract award
- Progress reports – monthly
- Briefings – as required
- Analysis report on provisional voting - TBD
- Alternatives report on provisional voting – TBD
- Preliminary draft guidance on provisional voting - TBD
- Draft guidance on provisional voting for publication – 8/2005
- Public hearing on draft guidance – 30 days after publication
- Final guidance on provisional voting for EAC adoption – 9/2005
- Analysis report on voter identification requirements – TBD
- Public hearing on voter identification requirements – TBD
- Summary of voter identification requirements hearing - TBD
- Alternatives report on voter identification requirements - TBD
- Preliminary draft guidance on voter identification requirements - TBD
- Draft guidance on voter identification requirements for publication – 9/2005
- Public hearing on draft guidance – 30 days after publication
- Final guidance on voter identification requirements to EAC for adoption – 10/2005

REMAINING STANDARD CONTRACT TERMS TO BE PROVIDED.

Subject RE: Peer Review Group [REDACTED]

Tom-

Had a very good review and discussion of the PRG at this morning's Commissioner meeting.

Also, the Commissioners have marked their calendars for a conference call with the Eagleton/Moritz team on July 12 at 9:30 AM.

Several concerns were raised about the composition of the PRG and, after some discussion, I indicated that Eagleton will provide the EAC with a revised participant list, and with a more detailed description of the PRG's mission, goals, objectives, workplan and timelines for accomplishing its work.

The Vice Chair is concerned that there is not sufficient conservative representation on the PRG. I would suggest the team do more research to identify well-recognized conservative academics to put on the Group.

Further, the Commissioners recommend a tiered process in which the PRG will prepare a "dispassionate" analysis of the issues and draw some tentative conclusions. This analysis and these conclusions will then be vetted with a defined/select group of local election officials, and then, with a defined/select group of advocacy organizations.

It was also suggested that a final round of focus group meetings be held with a cross-section of these election officials, advocates and academics for an overall interactive reaction to the analysis and recommendations.

Hope this helps clarify concerns; I look forward to sharing your revisions to the PRG with them.

Tom-

I will be back to you early next week with EAC's feedback on this.

Our initial reaction is that the group needs to include some local and/or state-level election officials, who have first-hand experience with these issues.

We will get you additional names and reactions by mid-week next week.

Thanks

Subject Peer Review Group

Karen,

As you probably recall, one of the features of our proposal was the creation of a Peer Review Group to look over our findings, conclusions and draft reports before we prepare final drafts for the EAC's review. The EAC asked that before recruiting members of the PRG we submit names for EAC's review. The aim, course, is to assemble a panel that is experienced, informed, and

028753

balanced.

Attached is a list of potential PRG members drawn from academia, the law, and non-profit organizations with interests in this area. Please look it over.

We may conclude that the PRG should also include two or three former government officials now in academia or related fields. We have a conference call with our partners at Moritz planned for tomorrow or Friday to decide a) if former officials should be included in the PRG and b) if so, who they should be. I'll keep you informed of our thinking as it develops.

Tom

Subject Eagleton Institute June 2005 Progress Report

Ms. Dyson,

Attached please find the June 2005 Progress Report for the project entitled, "Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures." If you have any questions regarding any part of this document please direct them to Tom O'Neill at: [REDACTED] or (908)794-1030.

The financial reporting for this project is performed by the Division of Grant and Contract Accounting at Rutgers University. A copy of this report was not made available to us in an electronic format. Hard copies of the Progress Report and Financial Report have been Fedex'ed to you this afternoon and should arrive to your attention tomorrow morning. Please let me know if you do not receive this package by tomorrow afternoon.

Thank you for your time, have a great evening.

Best,

  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from the start of the project on May 26 through June 30, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

The objective of the contract is to assist the EAC in the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements on which to base policy recommendations as guidance for the states in the conduct of the 2006 elections. The work has begun well, thanks to the clarity of the EAC's expectations and the strong collaboration by the scholars and staff at the Eagleton Institute of Politics at Rutgers, The State University of New Jersey, and the Moritz College of Law at the Ohio State University.

The document report is divided into 4 sections that cover: Provisional Voting, Voter Identification Requirements, Project Management, and the Financial Report. Each section references the specific tasks described in paragraph 3 of the contract.

Please direct any questions or comments about this report to Tom O'Neill at: [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net) or (908) 794-1030.

028759

## PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. The work plan provides for two months to complete Task 3.4. Work on this task is on schedule.

**Task 3.4: Collect and analyze state legislation, administrative procedures, and court cases. Understand the disparities and similarities of how provisional voting was implemented around the country.**

### LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task. It also will provide a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team includes faculty, an executive administrator, a reference librarian, and several research assistants. It began immediately to compile statutes, case law and administrative procedures regarding Provisional Voting. The team has created a 50 state chart to summarize information on provisional voting. Categories for which state statutes and administrative procedures are being reviewed include:

- *When did the state create a system compliant with the HAVA provisional ballot requirements?*
- *Who may be eligible to cast a provisional ballot? and*
- *What is the process for discovering whether your provisional ballot was counted in the election?*

**Progress:** Initial research for 27 states, including the collection of provisional voting statutes is complete. This phase of the work is on schedule for completion by August 1. By the beginning of the week of July 11, Moritz's full time research assistant will move from voter identification research to gathering and organizing case law on provisional voting.

**Challenges:** Identifying the relevant statutes has been challenging; states use different terminology to codify provisional voting issues. Many states have scattered election law provisions throughout their codes. This variation from state to state makes creating a snapshot view across states a challenge. The team is meeting this challenge, and the work is on schedule.

028760

## PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team is constructing a narrative description for each state of the 50 states and the District of Columbia. It is also surveying a stratified random sample of county election officials to improve its understanding of actual practice in administering provisional voting.

**Description:** To construct the narratives, a researcher is examining newspaper accounts, state websites, and reports from third-party organizations to determine what information is publicly available about these issues during the 2004 election. To organize the information derived from this examination, we are creating an information system that will make it possible to catalog the basic information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combine it with Moritz's collection and analysis of statutes, regulations and litigation. The information system will make it possible to provide answers to such topics of particular interest listed in the contract as: How did preparation for provisional voting vary between states that had some form of provisional voting and those that did not?" and "How did litigation affect implementation?"

**Progress:** The researcher in this area has identified sources of information for every state and the collection process is well underway. Verified database entries for 24 states are complete, as are two state narrative summaries. This phase of the research is on schedule for completion by the end of July.

**Challenges:** A key challenge is determining just what states actually did in practice to verify and count provisional ballots. A second challenge has been determining the variations in policy within individual states. We are still wrestling with resolving this challenge, but the work is on schedule.

**Work Plan:** By the end of the July, the compilation of statutes, administrative regulations, and litigation will be complete and ready to be combined with the state-by-state narrative compiled by Eagleton. That will form the basis for the analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

## SURVEY OF COUNTY ELECTION OFFICIALS

This survey will help the research team understand more about such key topics of interest as:

- "How did the experience of provisional voting vary between states that previously had some form of provisional voting and those where provisional voting was new in 2004?"
- "Did state and local processes provide for consistent counting of provisional ballots?"
- "Did local officials have a clear understanding of how to implement provisional voting?"

The survey results will supplement the information on these topics from the compilation of statutes, regulations and cases and from the narrative we are constructing for each state.

028761

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton is conducting a national survey of county election officials to measure several aspects of provisional voting. The survey is designed to determine the following factors related to provisional voting at the county level:

- The content and quality of instructions provided to county officials by the states
- The steps taken by county officials to pass information on to poll workers;
- Differences in experience between states new to provisional voting and those that had some form of provisional ballot before HAVA; and
- Recommendations to improve and/or reduce the need for provisional voting

**Progress:** The survey instrument is complete. CPIP has compiled a list of election officials at the county level and at the municipal or regional level for states that do not assign the election responsibility to counties. It was forwarded to the call center, Schulman, Ronca & Bucuvalas Inc., (SRBI) the week of July 5, 2005. A sample will be drawn the week of July 12. Human Subjects Approval from Rutgers University was granted July 12. Pre-notification letters will be sent to election officials around July 12-13, 2005. The EAC has reviewed a draft of this letter, which we have now revised to make clear that the survey will increase our understanding of the provisional voting process, but is not being conducted on behalf of the EAC.

**Challenges:** We made special efforts to expedite Human Subject Approval to meet the schedule in the work plan. In the absence of an existing, reliable database of local election officials, we had to create one especially for this project. In order to provide a valid comparison between the states new to provisional voting with those that previously had some form of provisional ballot we doubled the sample size from 200 to 400. This increase will require an increase in the budget for the survey from \$15,000 to about \$24,000. We intend to reallocate costs within the existing budget to make this improvement possible, and will submit a letter describing the reallocation to the EAC in mid-July.

The sample has been, and will continue to represent the biggest challenge in this survey. Compiling the sample required substantial coordination and research to determine the accuracy of the identity and contact information for potential respondents. The difficulty in determining the appropriate contact is attributed to variation in county election officials' titles, jurisdiction types, and state and county election structures across the country. In addition to the potential pitfalls of reaching the appropriate county official, another factor in actually making contact with this special population will be dependent upon the hours that they keep, and may be hindered by the summer season.

**Work Plan:** This questionnaire will be pre-tested by July 15, and will field July 18 through August 5, 2005. This is somewhat later than projected in the revised work plan, but the information will arrive in time to be considered in drafting the analysis and alternatives document required under Task 3.5.

028762

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. During the reporting period, we have made substantial progress in the first two tasks, which constitute the information-gathering phase of the work on Voter ID. The research of Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** A team of Election Law@Moritz faculty, executive administrator, a reference librarian, and several research assistants is compiling statutes on Voter Identification, and providing a summarized analysis of this research.

**Progress:** The Moritz team has created a 50-state chart to record data on voter identification. Categories for which state statutes and administrative regulations are being reviewed include: “*Who is required to present ID*”, “*Types of ID required*”, and “*Consequences of having no ID*”. We have completed the initial research for 45 states and have collected the voter identification statutes for those states. An *Election Law@Moritz* Fellow is conducting an academic literature review on voter identification. This literature review will help shape the analytical framework that will guide us when the compendium of statutes and administrative regulations is complete.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Projections:** At the current rate, a draft of the voter identification chart should be complete on schedule, by the end of July. Work on the literature review will continue into August, but will be available to inform the analysis of alternative approaches for voter identification called for by Task 3.12 of the contract.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter in the states; and second, estimating the effect on turnout of voter id requirements. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern with more rigorous identification requirements for all voters. We are following these developments both to

028763

monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with increasing the rigor of voter ID requirements. This work is on schedule to be completed by the end of July. The next key milestones will be the completion of the state database and drafting the first narratives.

### **VOTER ID AND TURNOUT ANALYSIS**

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election. Analysis on the county-level will enable us to estimate the influence of ID requirements on various age groups, races, ethnicities and gender groups. We are compiling data from both the 2000 and 2004 Presidential elections to measure the effect that changes in ID requirements may have had on voter turnout through two national election cycles.

**Progress:** The structure of the database is complete. It contains demographic information from the Census, and turnout data from various sources. The researcher assigned to this task is devising the syntax that will be required to run the statistics when the dataset is complete. The methodology for this part of the study is complete, and the actual data collection will soon be finished.

**Projection:** We are waiting for the Census Bureau to release the 2004 County Demographic Estimates. We have ordered and await the arrival of 2 datasets that contain voter turnout and voter registration numbers on the county-level for both the 2000 and 2004 elections. Once these two sources of information are received, the researcher will insert this information into the existing database, clean up the dataset, and begin to run the statistics. By that point, the researcher will have separated the states into various ID-requirement groupings that have been determined by the team, which will require coordination with several other parts of the study. This work is on schedule. By the end of July, the researcher should have county-level and state-level statistics on the impact of each ID system upon turnout, analyzed through various demographic features on the county-level.

028764

### Task 3.11 Public meeting on Voter Identification Requirements

**Description:** We are working closely with EAC staff, particularly the General Counsel, to plan a half day public meeting on Voter ID requirements. Presentations at the meeting will form an important part of the information we are compiling about Voter ID requirements and the strengths and shortcomings of a range of alternative approaches.

**Progress:** We have recommended a focus on the debate over Voter ID now underway in the states. To provide a vivid picture of the debate, we have recommended that one panel include legislators on opposite sides of the issue from two different states. Our research identified Mississippi and Wisconsin as two states to focus on, and we have recommended specific legislators from each. We have discussed with staff adding a researcher to the panel to put the debate in Wisconsin and Mississippi in either a national or historic context. We also recommended two researchers from contrasting points of view, to address the effects of Voter ID provisions under HAVA and broader provisions that are now the subject of national debate. EAC staff recommended a panel of two state election directors to address the interaction of Voter ID with HAVA. We are awaiting a decision on our recommendations from EAC staff. We have no reason not to believe that the work is on schedule to be completed in time to organize a productive meeting on July 28.

**Challenges:** The date and location of this hearing has been changed twice since the beginning of the project. It was originally scheduled to take place in late June, but was rescheduled for July to allow the June hearing to focus on voting machine technology. The regular meeting was rescheduled for July 26 in Minneapolis, and was recently changed to July 28 in Pasadena. The changes in the scheduling of the July meeting have complicated our choice of panelists. More seriously, the changes mean that information from the hearing will not be available as early in the research process as contemplated in the contract. This timeframe will now require the team to summarize the hearing events at the same time that we are drafting the analysis and alternatives paper in early August.

Additionally, while our contract states that the "Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC," we have been asked only to make recommendations of topics and panelists, and the arrangements for the organization of the hearing are in other hands. This lack of clarity has caused some confusion and has delayed invitations to panelists. Thanks to frequent communication with members of the EAC, the process now seems to be working smoothly.

**Projection:** We believe the work is on schedule for completion in time to recruit the panelists for the July 28 hearing. Preparation of the hearing summary will likely be delayed because of the need to complete the analysis and alternatives paper.

028765

## PROJECT MANAGEMENT

Immediately after announcement of the award of the contract, Eagleton and Moritz began supplementing the core group that had prepared to proposal to building a highly qualified team to undertake the work. That team was in place by mid June, just a few weeks after the contract award.

As described in the proposal, the direction of the project is the responsibility of a five-person committee of faculty and staff from Eagleton and Moritz, chaired by Dr. Ruth Mandel, Director of the Eagleton Institute of Politics. Project Director Thomas O'Neill, a consultant to Eagleton, reports to this team and provides day-to-day guidance and coordination for the research. A weekly meeting of all the researchers engaged in the project is the primary means of coordinating the work. We have recently added an internal website to facilitate the review and revision of written materials.

### Task 3.1 Update the Work Plan

The first task was completed on time with the submission of a detailed work plan and timeline. EAC staff requested that the work plan be supplemented with a Gantt chart created on MS Project, and we submitted that a few days later.

### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The EAC indicated at our first meeting in May that it would review our recommendations for members of the PRG. Our initial vision of the PRG was a small group of scholars and representatives of advocacy organizations that would comment on the research design, review drafts of our analyses and reports, and, in general, identify areas of the research that should be strengthened and help us improve the breadth, depth and clarity of reports based on that research.

**Progress:** Upon reflection, the project team agreed that the PRG should not include representatives of advocacy groups. We concluded, as representatives they would feel obligated to act as advocates for positions already taken by their groups. While advocacy organizations should be consulted as stakeholders during the course of our work, they were unlikely to achieve the goals we had in mind for the PRG as a source of advice on research design, methodology, and analysis. We submitted a revised list of potential members, substantially comprised of academics, to EAC for review.

The EAC responded with suggestions concerning both the balance of the PRG's membership and the creation of additional committees to review our work. We answered with an analysis of the cost and time involved adopting the EAC's suggestions as well as with suggestions for a balanced selection of academics for the Peer Review Group. We have not received response on this correspondence from the EAC, and the recruitment of the group is on hold.

028766

**Challenges:** Communications on this issue with the EAC have not been clear or timely. The PRG should be in place now to comment on our research design while there is still time to refine it. While we are confident in the quality of our work, the wisdom and perspective of the outstanding candidates we have proposed for membership would strengthen the analysis and reports of our work.

**Projections:** We have effectively brought these challenges to the attention of EAC staff and look forward to a resolution speedy enough to allow recruitment of the PRG's members before the end of the month. If we meet that goal, the work of the PRG will be about 2 weeks behind the milestones indicated in the work plan.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and a website for easy access to drafts and reports.

#### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law will be merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** The Moritz team has provided Eagleton staff with samples of the work that they are performing. An Eagleton staff member will be reviewing the content and formats of data from all supporting research and (re-)formatting once the work has been completed. The researchers and staff at Eagleton have created a shared folder on the Institute's server for the safe storage of work and access for those staff members. All of this work is being reviewed by the project team to ensure that a broad survey is being performed.

**Challenges:** There are no evident challenges to this task at this time.

**Projections:** By the end of July 2005, much of the above referenced research will have been completed with respective materials and charts near completion. At that time, staff at Eagleton will review, combine and format all documents and materials in preparation for our final reporting to the EAC.

#### INTRANET

**Description:** A trial Intranet for the project became available during the week of June 26. The Intranet will facilitate the exchange of information and collaboration among project participants.

**Progress:** After meetings with staff members of Rutgers University Computer Services (RUCS) and subsequent submission of a proposal by RUCS for technical support and hosting of the Intranet and the evaluation of alternative commercial services, the project team decided at its June 28<sup>th</sup> meeting to publish the Intranet through [www.intranets.com](http://www.intranets.com),

028767

one of the leading commercial services. This decision was based on lower costs and earlier publication schedules than offered under the RUCS proposal. The Intranet services were evaluated during a free trial period, which demonstrated the ease of design and navigation of the proposed service.

**Challenges:** There are no immediate challenges to completion of this task by the timeframe specified below.

**Projections:** Design, testing and publication of initial content of the Intranet service is continuing, with all participants expected to be provided access by July 8, 2005.

#### **FINANCIAL REPORT**

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Given that the report reflects the first month of the project, several procedures for payment of subcontractors on the project were initiated. Expenses related to those members of the team are not reflected in this report because they have not yet been incurred.

Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project inception through June 30, 2005, is attached.

Job-

I write to see if you might be available to come to Washington on Monday, August 1 to meet with several EAC staff and Commissioners to discuss the voter fraud/voter intimidation project and your possible work as a consultant on the project.

I'd like to schedule this 1-2 hour meeting for sometime between 1 and 3 in the afternoon.

Might you be available to come to Washington for this ?

Regards-

Subject Conference call to "interview" potential voter  
fraud/intimidation consultants

Hi All-

Well, I have the unhappy task of trying to identify a date and time when we might schedule a series of conference calls with the consultants we've identified as possible candidates to work on the voter fraud/intimidation project.

Since August is impossible and horrible in terms of everyone being in the same place, I thought it might be easier to try and schedule three calls--one hour each in duration-- in which the Commissioners could talk to these candidates.

I'd like to "start the bidding" for the week of August 15.

Actually, I happen to know that all of the candidates could be available August 22 or 23 at some point in the day.

Let me know if your folks could be available by phone at any of these days and times:

Thanks

K

Tom-

I will be in touch shortly with possible dates in very late August or early September, when EAC staff might be available to meet with Eagleton to discuss the project's research results and next steps.

In the meantime, I thought it was important to follow up on the issues Vice Chair DeGregorio raised while we were in Pasadena.

To be certain that I have the latest information, could you send to me the final list of the Eagleton/Moritz Peer Review Group and the list of organizations that Eagleton will be contacting for input?

Subject RE: Meeting with EAC

Karen,

Thanks for the email. No need to resend the original email from Washington. I received that shortly after you sent it. That email let us know that EAC would not need the research on ballot design that Tom Wilkey suggested we undertake and that you asked us to submit a proposal for. But the ballot-design issue was only one of the two topics raised by my email to you. The other question concerned a date to meet with EAC staff to discuss the forthcoming draft of our Analysis and Alternatives paper and an outline for the Preliminary Guidance Document. From our conversation yesterday, I understand that August 26, the date suggested, will not work because of the EAC's travel schedule. Please let me know if August 30, 31 or September 1 are possible for a meeting between the project team and EAC in Washington. The meeting would require perhaps 2 hours.

Tom O'Neill

Subject Eagleton Institute of Politics - July 2005 - Monthly Progress  
Report

Ms. Dyson,

Attached please find the July 2005 Progress Report for the project entitled, "Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures." If you have any questions regarding any part of this document please contact Tom O'Neill at: [REDACTED] or (908)794-1030.

The financial reporting for this project is performed by the Division of Grant and Contract Accounting at Rutgers University. A copy of this report was not made available to us in an electronic format. Hard copies of the Progress Report and Financial Report have been Fedex'ed to you this afternoon and should arrive at your attention tomorrow morning. Please let me know if you do not receive this package by tomorrow afternoon.

Thank you for your time, have a great evening.

Best,  
Lauren Vincelli

**Deliberative Process  
Privilege**

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.4
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from July 1 through July 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

The effort this month continued to focus on research for the analysis and alternatives paper, including the compilation of Provisional Voting statutes, regulations, and litigation from the 50 states. We also prepared and delivered testimony at the EAC's regular monthly meeting in Pasadena on July 28.

The data collection, analysis, and compilation are all on schedule. Because of delays in agreeing on the composition of the Peer Review Group with EAC, however, the actual completion and submission of the analysis and alternatives paper to the EAC will most likely be delayed about a week beyond the target date in the work plan. We are scheduled to discuss the draft paper and guidance document prior to submission, with the EAC on September 6, and the final draft cannot be completed until several days after that date.

The document report is divided into 4 sections that cover: Provisional Voting, Voter Identification Requirements, Project Management, and the Financial Report. Each section references the specific tasks described in paragraph 3 of the contract.

Please direct any questions or comments about this report to Tom O'Neill at: [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net) or (908) 794-1030.

028778

## **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed this month.

**Task 3.4: Collect and analyze state legislation, administrative procedures, and court cases. Understand the disparities and similarities of how provisional voting was implemented around the country.**

### **LEGISLATION, REGULATIONS, AND LITIGATION**

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It also will provide a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on provisional voting, compiled statutes, case law and administrative procedures regarding Provisional Voting.

**Progress:** The 50-state (plus District of Columbia) chart created to collect data on provisional voting is complete. We have collected the statutes for all states. State by state summaries of provisional voting have been written for 47 states and D.C. A memorandum summarizing provisional voting litigation is complete. The collection of the documents associated with the litigation is nearing completion.

**Challenges:** The variety in the form of provisional voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The remaining 3 state summaries of provisional voting will be completed by August 8. Analysis of all the information, data, and survey results concerning provisional voting data will be performed in August.

### **PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING**

The Eagleton team has researched and compiled a narrative of each state's experience with provisional voting in 2004. At the end of July the survey of 400 local election officials was nearing its end, and – as of this writing – is now complete with an analysis and report in draft form. We will rely on the survey results to improve our understanding of actual practice in administering provisional voting, including the steps local officials took to prepare for the election.

028779

## PROVISIONAL VOTING NARRATIVES

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with provisional voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** The state-by-state database is complete, as is a first draft of all state narratives. This work has been shared with the larger team and is being reviewed currently in preparation for constructing analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

**Work Plan:** In the next month, revisions of the narratives will be complete. In addition to this research, we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms.

## SURVEY OF COUNTY ELECTION OFFICIALS

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton conducted a national survey of county election officials to measure several aspects of provisional voting. The survey was designed to determine the following factors related to provisional voting at the county (or equivalent election jurisdiction) level:

- The content and quality of instructions provided to county officials by the states;
- The steps taken by county officials to pass information on to poll workers;
- Differences in experience between states new to provisional voting and those that had some form of provisional ballot before HAVA; and
- Recommendations to improve and/or reduce the need for provisional voting.

**Progress:** The fielding and initial analysis of the survey results are complete.

**Work Plan:** The information derived from the survey will be considered in drafting the analysis and alternatives document required under Task 3.5.

028780

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. During the reporting period, we have completed tasks 3.10 and 3.11. The research on Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The chart created to collect data on voter identification is complete and is now being reviewed. Voter identification statutes are being collected.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** Review of the voter identification chart, the collection of the voter identification statutes, and the writing of the state by state summaries will be completed by the end of August.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of voter ID requirements. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern with more rigorous identification requirements for all voters. We are following these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern

028781

with increasing the rigor of voter ID requirements. The next key milestones will be the completion of the state database and drafting the first narratives.

### **VOTER ID AND TURNOUT ANALYSIS**

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. It also contains exit poll data from the 50 states, providing demographic data of voter turnout. The analysis of that data is well underway.

**Challenges:** The initial methodology that was devised to investigate the questions involved in this part of the study proved insufficient, as the necessary data was unobtainable (the Census Bureau has not yet released their 2004 data). After re-developing an appropriate methodology, the necessary data has been assembled, we have resumed the analysis of this data.

**Projection:** The analysis of the impact that voter identification requirements have upon voter turnout should be completed around mid-August.

### **Task 3.11 Public meeting on Voter Identification Requirements**

**Description:** In early July, we continued our efforts to identify specific Voter ID topics or issues and panelists who could shed light on them. We recommended a focus on the debate over Voter ID now underway in the states. To provide a vivid picture of the debate, we recommended that one panel include specific legislators on opposite sides of the issue from two different states, Mississippi and Wisconsin. We also discussed adding a researcher to the panel in order to place the debate in a national or historical context. We also recommended a panel of two academic researchers with contrasting points of view, to address the effects of Voter ID provisions under HAVA. In response to our suggestions, EAC staff recommended a panel of two state election directors to address the interaction of Voter ID with HAVA.

By mid-July, the EAC had decided which topics and speakers should be invited, however most of those speakers proved unable to attend.

028782

**Progress:** Tom O'Neill and Dan Tokaji attended the EAC Public Meeting held in Pasadena on July 28. Their presentations at the meeting described the progress of the research and our developing perspective on how to assess the quality of the provisional voting process in the states and identify possible steps for improvement.

**Challenges:** The changes in the scheduling of the July meeting delayed and ultimately made it impossible to assemble a panel, from which we could derive substantive insight into voter identification issues as they are playing out in the states. Additionally, due to the date of the hearing, the information from the hearing was not available as early in the research process as contemplated in the contract.

**Projection:** Preparation of the hearing summary will likely be delayed, due to the team's focus on preparation of the analysis and alternatives paper.

## **PROJECT MANAGEMENT**

### **PEER REVIEW GROUP**

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The EAC indicated at our first meeting in May that it would review our recommendations for members of the PRG. Our initial vision of the PRG was a small group of scholars and representatives of advocacy organizations that would comment on the research design, review drafts of our analyses and reports, and, in general, identify areas of the research that should be strengthened and help us improve the breadth, depth and clarity of reports based on that research.

**Progress:** Upon reflection, the project team agreed that the PRG should not include representatives of advocacy groups. We concluded that as representatives they would feel obligated to act as advocates for positions already taken by their groups. While advocacy organizations might be consulted as stakeholders during the course of our work, they were unlikely to achieve the goals we had in mind for the PRG as a source of advice on research design, methodology, and analysis. We submitted a revised list of potential members, substantially comprised of academics, to the EAC for review.

The EAC responded with suggestions concerning both the balance of the PRG's membership and the creation of additional committees to review our work. We provided an analysis of the cost and time involved in adopting the EAC's suggestions as well as with suggestions for a balanced selection of academics for the Peer Review Group. In the end, the EAC determined that Eagleton should appoint a balanced Peer Review Group of its own choosing. Initial phone calls were made to all members of that group by the end of July, and written invitations and descriptions of the process have gone to all possible members who had indicated their interest in serving.

**Challenges:** Communications on this issue with the EAC were not clear or timely. The purpose of the PRG is to review our work, and to comment on our research design, which is well underway. We had planned to have the PRG in place early enough in the project to enable them to provide feedback, including the research design. While we are

028783

confident in the quality of our work, the experience and perspective of the Peer Review Group will strengthen our analysis and recommendations as we find a way to receive its critique in the more limited time now available. The delay in creating the Peer Review Group will result in a delay in the completion of the final draft of the analysis and alternatives paper and in the preliminary guidance document.

**Projections:** The work of the PRG will be about 2 weeks behind the milestones indicated in the work plan.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law will be merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** The Moritz team has provided Eagleton staff with all completed work. An Eagleton staff member reviews the content and formats of data from all supporting research and will (re-)format once the work has been completed for the compendium and reports submitted to the EAC. The researchers and staff at Eagleton have created a shared folder on the Institute's server for the safe storage of work and access for those staff members. All of this work is being reviewed by the project team to ensure that a broad survey is being performed.

**Projections:** By the end of July 2005, much of the above referenced research has been completed. The entire project team has begun the process of reviewing all work, and will combine and format all documents and materials in preparation for our final reporting to the EAC.

### INTRANET

**Description:** All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

**Progress:** Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has been extremely helpful to team members and serves as an internal website with announcements and important documents readily available to all team members.

028784

## FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project inception through June 30, 2005, is attached.

Tom-

Thank you for sharing this list of your Peer Review Group members, to-date. I will share this list with the Commissioners and will be certain to let your know of their feedback, if any.

I will also be back in touch regarding Eagleton's research around voter fraud and the research project EAC will be undertaking, this fall, around voting fraud and voter intimidation. The EAC is presently in the process of finalizing a work and staff plan for this project and once it is completed, I will be certain to brief you on it.

In the meantime, EAC staff and several of the Commissioners looks forward to meeting with the Eagleton/Moritz team on September 6 at 1:30 PM.

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.5
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from August 1 through August 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

Research on Provisional Voting and a draft of reports on the analysis and alternatives were substantially completed in preparation for the September 6 briefing for the EAC. Important reports such as the National Survey of Local Election Officials' Experience with Provisional Voting; Statistical Review Provisional Voting in the 2004 Election; State-by-state Narrative of Developments in Provisional Voting; and the compilation of Provisional Voting statutes, regulations, and litigation from the 50 states, were all completed in August.

We made further progress on recruiting a balanced and authoritative Peer Review Group (which, as this report is written, is receiving all the documents listed above for review). Ingrid Reed of Eagleton will coordinate the work of the Peer Review Group. A list of the members of the Peer Review Group is attached.

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to Tom O'Neill at: [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net) or (908) 794-1030.

028792

## PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, and Task 3.5 is well underway.

**Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of provisional voting and develop alternative means to achieve the goals of provisional voting.**

### LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on provisional voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and is near completion with this research.

**Progress:** We completed the state by state summaries of provisional voting in August. Also complete is a memorandum outlining provisional voting legislative changes since the 2004 election. This material was sent to the EAC as part of the package for briefing on September 6.

**Challenges:** The variety in the form and frequency of provisional voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The analysis of all the information, data, and survey results concerning provisional voting data will be completed in September, on schedule. The alternatives document should also be complete in September, pending response from the EAC on which direction those alternatives should follow.

### PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team has researched and compiled a narrative of each state's experience with provisional voting in 2004. The report findings from the survey of 400 local election officials is now complete. The survey results improve our understanding of actual practice in administering provisional voting, including the steps local officials took to prepare for the election.

028793

### PROVISIONAL VOTING NARRATIVES

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with provisional voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** A state-by-state narrative of developments in Provisional Voting is complete and has been distributed to the EAC and the Peer Review Group. This work has been crucial to the process of constructing our draft analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

**Challenges:** The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent multiple revisions in order to incorporate the most up-to-date material available. Had the Election Day Study been available, this task would probably have been simplified considerably.

**Work Plan:** We completed revisions of the narratives.

### SURVEY OF COUNTY ELECTION OFFICIALS

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton conducted a national survey of county election officials to measure several aspects of provisional voting.

**Progress:** The analysis of the survey results and findings report are complete.

**Work Plan:** We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5.

028794

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting, and is becoming the principal focus of our research.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** We are refining the 50 state (plus District of Columbia) chart of data on voter identification. So far collected are voter identification statutes for 35 states. Summaries of the existing voter identification statutes have been written for forty states.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The state by state voter identification statute summaries will be completed for the remaining ten states and D.C. and the review of the chart will be completed. Analysis of voter identification data will begin.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern, and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with

028795

increasing the rigor of voter ID requirements. The next key milestones will be the completion of the state database and drafting the first narratives.

#### VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also utilized exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout. The analysis of that data is underway.

**Challenges:** The main challenges to this task include gathering the complete set of changes to Voter ID laws over the past 5 years, and then incorporating those changes into a sound statistical methodology.

**Projection:** We will continue to work towards resolving the methodology issue, and ultimately produce a final report on this subject. The analysis of the impact that voter identification requirements have upon voter turnout should be completed around mid-September.

02879E

## **PROJECT MANAGEMENT**

### **PEER REVIEW GROUP**

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The Peer Review Group will review our research and methodology and provide valuable feedback and suggestions for the direction of our work.

**Progress:** The composition of the Peer Review Group has been determined and the membership has been submitted to the EAC. Additionally, as of the date of this report all PRG members have received their first mailing, which included several reports from our research, and a draft of our analysis and alternatives outline for their review.

**Challenges:** Our timeline for circulating and discussing our research with the PRG has been compromised due to delays in completing the recruitment of members of the group.

**Projections:** We are in the process of scheduling our first conference call with PRG members for the week of Sept. 19, 2005.

### **COORDINATION AND INFORMATION MANAGEMENT**

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

### **INFORMATION SYSTEM**

**Description:** The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. As we near the end of the Provisional Voting research and move into the Voter Identification research, we will re-evaluate the volume of files contained in the Information System and update the system.

**Projections:** The entire project team continues to review all project drafts, and will staff members combine and format all documents and materials in preparation for our final reporting to the EAC.

### **INTRANET**

**Description:** All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

028797

**Progress:** Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has been extremely helpful to team members and serves as an internal website with announcements and important documents readily available to all team members.

## FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project August 1 - August 31, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer, EAC .

Subject Re: EAC Conference Call - Friday 9/30 

Eagleton/Moritz team-

I'd leek to propose a conference call with EAC Commissioner Martinez, General Counsel ,Julie Thompson, Research Manager Karen Lynn-Dyson and your team for either **10:30 or 1:30 on Friday, September 30.**

This will be to discuss the draft guidance and final report you will be producing for the EAC.

Please let me know which time works for you

Subject EAC Contracts

Keith,

Hope you're well. Ray told me you were able to catch up on the array of exciting events here at the EAC. I wanted to pass along a 'marked up' copy of the contracts we approved for the end of the Fiscal Year. If you have any questions about the substance of the contracts, pls let me know. Take care.

Adam

## EAC CONTRACT SUMMARY

Subject	Vendor	Cost	End Date
✓ Indirect rate negotiation assistance	KPMG, LLP	\$276,960.	September 2006
✓ Website maintenance	Humanitas	\$120,000.	September 2006
✓ Vote count, recount	University of Utah	\$257,350.	September 2006
✓ Voter registration database technology assistance	National Academy of Sciences	\$650,000.	September 2007
✓ Polling place signage, ballot design, revised NVRA form	AIGA Design for Democracy	\$681,400.	September 2006
✓ Legal clearinghouse	Center for Governmental Responsibility, U. of Florida Levin College of Law	\$224,737.	February 2007
✓ Election management guidelines	National Association of State Election Directors, Connie Schmidt & Associates, Dr. Britain J. Williams, III	\$352,000.	December 2006
✓ Voter roundtables	Council for Excellence in Government	\$300,212.	September 2006
✓ Poll worker (non-college) recruitment	International Foundation for Election Systems	\$378,310.	December 2006
✓ College poll worker recruitment	Center for Election Integrity, Cleveland State University	\$346,615.	December 2006
✓ Public access portal research	Publius.org	\$285,226.	September 2006
✓ Voter hotline research	InfoVoter Technologies	\$217,105.	June 2006
✓ EAC records management procedures	Zimmerman Associates	\$ 80,381.	June 2006
✓ Voter fraud, voter intimidation	Tova Wang, Job Serebrov	\$ 110,000.	March 2006

Subject October 28 meeting

History:  This message has been replied to.

Hi Adam,

It was great meeting you at the UDC Law Symposium last week. I wanted to let you know that we are having a meeting about the voter fraud and intimidation meeting at 10 AM on October 28 at the EAC, and it would be great if you and Commissioner Martinez could be there. Let me know, and let's stay in touch. Thanks so much.

Subject Re: October 28 meeting

Tova:

I was about to email you as well. It was certainly good to meet you last week, as I've heard about your work through numerous sources, and am glad we have finally been able to chat. As with many things (we started to discuss), the EAC is doing a lot of these projects for the first time. And unlike a thinktank, or nonprofit, we are constrained in a number of ways, and there are "sensitivities" that exist. Of course, there are benefits to not being a nonprofit, as well.

I'll state that at least myself, but hopefully Cmsr. Martinez will be at the kickoff meeting. You may do this already, but I would attempt to lay out the ideal structure for your involvement in the contract, and perhaps communicate this to Karen and the other contractor immediately before the meeting. That will frame this contract structure (beyond the terms of the agreement) to your liking.

Obviously a suggestion. However, I think that the goal is good, efficient research that is unimpeachable in partisan or methodological grounds--that will then be submitted to the Commission for its approval (and actually getting its approval).

Feel free to call me anytime. If you're in DC before then, and have some time, let's get Cmsr Martinez, you and I together for lunch or coffee.

Best,  
Adam

Hi Adam,

It was great meeting you at the UDC Law Symposium last week. I wanted to let you know that we are having a meeting about the voter fraud and intimidation meeting at 10 AM on October 28 at the EAC, and it would be great if you and Commissioner Martinez could be there. Let me know, and let's stay in touch. Thanks so much.

History: This message has been replied to.

Adam,

Just to make sure we're talking about the same thing, I'm actually not going to be at the "kick-off" on the 14th. This is a meeting just about our project on the 28th. The project is already underway and the contracts finalized.

Since the meeting I refer to on the 28th is from 10-12, is there any possibility of the three of us having lunch after that?

Tova

Karen:

I enjoyed the discussion too. I really think that this project will be of national importance and can positively affect elections administration while providing an answer to the handling of the vote fraud problem for the future.

On another note, why don't you leave an evening free while I am there for dinner. I am trying to bring my wife along. If you can bring your husband it could make for an interesting evening.

Regards,

Job

Summary of Election Activities of Job Serebrov

Background to Election Problems in Arkansas

Ever since Reconstruction, Arkansas has had a history of election problems. The election fraud that gave rise to the Brooks-Baxter War in Arkansas in the 1870s involved people from both sides of the aisle voting more than once, the dead rising to cast a ballot or two, destroying ballots, creating ballots and making ballot boxes disappear. A strong one-party system

028827

perpetuated this tradition into modern times.

In 1995, I met with Arkansas Supreme Court Justice Tom Glaze to discuss voting issues and my efforts to clean up the electoral process. Although supportive, Justice Glaze encouraged me to proceed with caution. Before being elected to the Supreme Court, Justice Glaze had been employed in the 1960s by Gov. Win Rockefeller to clean up ballot fraud throughout Arkansas. He was nearly disbarred in the process by those involved in ballot fraud in a small, rural county.

Shortly after my discussion with Justice Glaze, I discovered how pervasive the election problems were in the state. For instance, ballot boxes were stuffed or disappeared into the night only to return altered. Contrary to state law, county sheriffs running in contested elections maintained custody of the ballot boxes. In one instance, 20 voted ballot boxes were found in the attic of a sheriff's deputy after he died.

Attorney (1991-2004)

In my private practice as an attorney, I represented numerous clients in county election contests throughout Arkansas. I also represented clients in matters before the Federal Election Commission. I have never lost an election case. Finally, I was hired as a consultant to a major nonprofit legal organization to review and summarize the 2002 amendments to federal election laws and apply the new law to 10 scenarios.

Member, Washington County Board of Election Commissioners, Fayetteville, Arkansas (1990-1996)

This board consisted of three commissioners; I was the lone Republican. We were charged with supervising the training of poll workers, evaluating voting systems and then purchasing an optical scan system to be used countywide, preparing and justifying our annual budget before the Washington County Quorum Court, hiring and supervising staff and sitting as an administrative tribunal.

When I first came on the board, Washington County was primarily a one-party county and the Democrats were used to running elections according to tradition rather than the law. I had to battle with the two Democrats on the board to enforce election laws within the county. As I started to force the issue in the courts, the Republican Party gained strength. Four years later and after outlasting eight Democrat commissioners, I was able to work with new Democrat commissioners who recognized the need to enforce the law. At this point, the commission requested that I draft administrative regulations for the board. These remain in place today.

028828

Founder, President, General Counsel; Arkansans for Fair Elections (1994-1999)

In 1994, Gov. Mike Huckabee (R), then a candidate for lieutenant governor, asked me to serve as his general counsel for ballot fraud protection. Thinking it best to act independently of any candidate, I formed Arkansans for Fair Elections. I served as the organization's president and, later, general counsel. This group launched a statewide educational campaign to train poll watchers to recognize irregular or fraudulent electoral procedures; this included the creation of literature and a video. Our extensive public relations campaign brought media attention to the issue. We also organized a statewide team of citizen poll watchers and attorneys to ensure that the election laws were fairly enforced. We were so successful in the lieutenant governor's race that Arkansans for Fair Elections was asked to continue the effort until 1999 when I moved to Louisiana.

General Counsel - Ballot Fraud Protection Committee, Republican Party of Arkansas (1995-1999)

In late 1995, Asa Hutchinson, chairman of the Republican Party of Arkansas, appointed me as general counsel for the newly formed Ballot Fraud Protection Committee of the state party. I retained this position until 1999. I was responsible for coordinating statewide enforcement efforts and directing a legal team to respond to problematic situations prior to and on election day.

(Through my role with Arkansans for Fair Elections and the Ballot Fraud Protection Committee, I successfully sued or negotiated a settlement in more than two-thirds of the 75 counties in Arkansas over electoral irregularities.)

Legal Consultant to Republican Members of the Arkansas General Assembly (1994-1996)

Republicans in the General Assembly requested that I review and draft suggested changes to Arkansas election law. Based on my personal experience as an election commissioner and as an election attorney, I identified a number of areas of concern and drafted new statutes modeled on the best examples that I could find from other states. My proposal was not passed by the Democrat-controlled General Assembly as a package, however, several of its components were passed into law.

Consultant to the Arkansas Court of Appeals Redistricting Commission (1996-1999)

I drafted five redistricting bills and maps for the

028829

constitutionally required redistricting of the Arkansas Court of Appeals. These bills were based on current U.S. Supreme Court precedent regarding gerrymandering. I had to present each bill and give supporting testimony to the commission.

Director of International Development - Louisiana State University, Baton Rouge, Louisiana (2000-2003)

Part of my duties as director was to develop international cooperative projects. The theme of several of these proposals was democratization. In each case, I required review of the national election code of the country involved.

My activities in Namibia led to a request by the director of the Namibian Election Commission, Joram Rukambe and the Speaker of the Namibian National Assembly, Dr. Mose Tjitendero to review and suggest changes to the Namibian election code. This review took three months and resulted in proposed alterations a number of code sections. These suggestions were considered by the Namibian National Assembly and a number were incorporated into the code revisions. Additionally, I drafted legislation for the Speaker to guarantee voting rights to agricultural workers that were being denied by the owners of the farms. This legislation also was passed into law.

During this time, I was qualified as an election expert and placed on an election consultant list by the United Nations, IFES and the Electoral Institute of Southern Africa.

#### Related Memberships

- Republican Party of Arkansas (1990-1999)
  - Benton County, Arkansas, Republican Committee (1996-1999)
  - Washington County, Arkansas, Republican Committee (1990-1996)
- (When we moved to Louisiana in 1999, the party was in such turmoil that it was difficult to get involved. This past year, I have been prohibited by the Hatch Act from participating in partisan politics. This prohibition ends August 19 when my judicial clerkship ends.)

#### Related Education

- Graduate certificate in electoral governance, Griffith University, Queensland, Australia (2003)

**Subject:** October Progress Report

Karen,

028830

Attached is the Progress Report for October. Please note that this report includes an attachment showing how our study classifies each state on key variables, such as counting out-of-precinct ballots, requirements for ballot evaluation, and other variables. It also displays how the data we used differs for some states for the vote counts reported by the Election Day Survey. We believe that our data is more accurate and complete (see for example the data for New Mexico and Pennsylvania).

I look forward to responding to any questions or concerns you or others at the EAC may have.

Tom O'Neill

**Deliberative Process  
Privilege**

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.5
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from October 1 through October 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

In October we focused on finalizing our Provisional Voting analysis paper, including the development of recommendations to the EAC for a draft guidance document and best practices. These policy prescriptions are based on our research and the comments of the Peer Review Group. We completed a careful review of our data to reconcile it with other sources and identify the latest, most reliable information to use in the analysis. (See the attachment to this Progress Report for the details.) The importance of this demanding effort was described in September's Progress Report.

Also in October we revised the schedule for the project in light of the additional time that has been needed for review of earlier drafts by the EAC and the late completion of the Election Day Study. We will seek a meeting with the EAC in the next several weeks to confer about the schedule to complete the project and alternative approaches that could speed the conclusion of our work.

We will submit to the EAC a final draft of our report, a preliminary guidance document, and draft best practices before Thanksgiving. We project that EAC will take 3 to 4 weeks to review and react to that final draft. And we understand that after its review, the EAC will decide if it should move towards issuing a Guidance Document or recommending best practices. If the EAC does decide to issue a Guidance Document on Provisional Voting, the time needed for a review by the advisory boards is likely to delay a public hearing until early February.

02883E

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to tom\_oneill@verizon.net or by telephone at (908) 794-1030.

## PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to Provisional Voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, Tasks 3.5 and 3.6 are nearing completion.

**Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of Provisional Voting and develop alternative means to achieve the goals of Provisional Voting.**

## LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states' actual experience with Provisional Voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on Provisional Voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and has completed this research.

**Progress:** We have completed the memorandum outlining Provisional Voting legislative changes since the 2004 election and we are continuing to clarify the laws prior to these changes.

**Challenges:** The variety in the form and frequency of Provisional Voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The final analysis will be sent to the EAC by Thanksgiving.

02883

## PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team has researched and compiled a narrative of each state's experience with Provisional Voting in 2004. The report findings from the survey of 400 local election officials are now complete. The survey results have proven to be instrumental in shaping our understanding of actual practice in administering Provisional Voting, including the steps local officials took to prepare for the election.

### PROVISIONAL VOTING NARRATIVES

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with Provisional Voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to Provisional Voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** We completed a state-by-state narrative of developments in Provisional Voting and distributed it to the EAC and the PRG. This work has been helpful in understanding the context of the data collected on provisional voting from the states.

**Challenges:** The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent several revisions to incorporate up-to-date and reliable information. Now that so many other analyses, including the Election Day Survey, have been released, we were challenged by different interpretations of the same basic facts. But the reconciliation of interpretation and data collection has been invaluable in establishing rigor in our report.

**Work Plan:** We completed revisions of the narratives incorporating comments from the PRG and addressing any discrepancies between our findings and other interpretations of similar information included in other studies.

### PROVISIONAL VOTING STATISTICAL ANALYSIS

**Description:** During October the Eagleton research team continued to check its statistical analysis, and worked to reconcile the classifications of this analysis (such as states counting only those provisional ballots cast within the proper precinct versus states that counted ballots cast within the proper county) with the classification made in other parts of this study or in other studies (such as the Election Day Study or *Electionline* reports).

**Progress:** The effort to double check all of the classifications used in the study is complete. The results of this effort are displayed in the attachment to this progress report, "Characteristics of the Provisional Voting Process -- Classification of the States,"

028838

beginning on page 9. Only Delaware and Arkansas remain unclear in regard to one of the measures, and both states have been contacted to receive clarification in this area.

**Challenges:** The difficulties encountered have been a result of communication delays and time constraints. Some states have been more responsive to our inquiries about their practices than others. Overall, this is not an irresolvable problem but it does slow the process of completion down.

**Work Plan:** By early-November the final revision of the statistical analysis, which includes full reconciliation of all data within the study, will be complete. The reconciliation of data is displayed in the attachment to this progress report.

### **SURVEY OF COUNTY ELECTION OFFICIALS**

**Description:** The Eagleton Center for Public Interest Polling (CPIP) conducted a national survey of county election officials to measure several aspects of Provisional Voting.

**Progress:** The analysis of the survey results and findings report is complete. As a result of the critique by the PRG, the research team is revising and clarifying the descriptions of the survey design and sample selection process to make the research methods more transparent.

**Work Plan:** We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5. We will include necessary clarifications regarding survey design and sample selection in the final analysis and alternatives document.

<p><b>Task 3.6: Prepare preliminary draft guidance document.</b></p>
--

The report and recommendations now nearing completion constitutes the draft preliminary guidance document. Based on our conversation with the EAC, the draft gives the EAC the option of proceeding with a guidance document or issuing recommendations to the state for best practices, recommendations that would not constitute voluntary guidance. Before proceeding to Task 3.7 (revise the guidance document for publication) or 3.8 (arrange a public hearing on the draft guidance), we will await the EAC's decision on how to proceed.

028830

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is becoming the principal focus of our research.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The 50 State (plus the District of Columbia) chart has been completed, the voter identification statutes have been collected for all states and D.C., and summaries of the existing voter identification statutes have been written for all states and D.C.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** Analysis of voter identification data has begun and will increasingly become the central focus of our work.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

028840

## VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also used exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout.

**Challenges:** The analysis of these data had been postponed until the data reconciliation of Provisional Voting is complete. As a result of the extensive revision and data reconciliation efforts aimed at the Provisional Voting section of our work VID had been temporarily placed on hold. We are now beginning data analysis on the impact of voter identification requirements on voter turnout.

**Work Plan:** The analysis of the impact that voter identification requirements have upon voter turnout should be completed by early December. Early January is our target to deliver the draft report and outline of alternative policies to the Peer Review Group. In mid January, the EAC would receive a draft report and recommendations that take into account the comments of the PRG.

## **PROJECT MANAGEMENT**

### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

**Progress:** Eagleton has stayed in touch with members of the Peer Review Group since the September 21<sup>st</sup> conference call, and has solicited their final comments on the Provisional Voting research. During October, we telephoned two members who did not participate in the conference call to confirm their commitment to serving as members of the Peer Review Group. Profess Guy Charles affirmed his interest. Professor Pamela Karlan did not return the call. The revisions in the schedule for the project have now made it possible to begin the process of scheduling a meeting of the PRG to consider our draft report and recommendations on Voter Identification Issues. We anticipate that meeting will take place the second week of January.

028841

**Challenges:** No new challenges were encountered during October.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

**Progress:** At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole. Upon their completion, new documents continue to be added.

**Projections:** The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

### INTRANET

**Description:** All project team members have signed on to the Intranet site, and regularly post drafts, completed materials and spreadsheets online for internal review. The Intranet facilitates the exchange of information and collaboration among project participants.

### FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project October 1- October 31, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.

028842

## ATTACHMENT TO OCTOBER PROGRESS REPORT

### **Characteristics of the Provisional Voting Process**

#### **Classification of the States**

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The categories analyzed here are:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

Please note that:

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and did include it in our analysis.

028840

## New vs. Old States

We classified states as “new” or “old” based on the 2001 Electionline study of provisional voting<sup>1</sup> and condensing its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We collapsed all of the states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots as “old” states, because the states in all three categories would have been familiar with key aspects of provisional voting.. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as “new” states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline’s map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct’s list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter’s name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island’s first use of provisional voting was in 2004 and, therefore, classified the state as “new” to the system of provisional balloting.

---

<sup>1</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Provisional%20Voting.pdf>.

<b>Table 1 CATEGORIZATION OF STATES -- Old vs New</b>		
<b>Old States</b>	<b>New States</b>	<b>HAVA Exempt or NA</b>
Alaska	Connecticut	Idaho
Alabama	Delaware	Maine
Arkansas	Georgia	Minnesota
California	Hawaii	New Hampshire
Colorado	Illinois	North Dakota

Michigan	Oklahoma	
Mississippi	Pennsylvania	
Nebraska	Rhode Island	
New Jersey	South Dakota	
New Mexico	Tennessee	
New York	Utah	
North Carolina	Vermont	
Ohio		
Oregon		
South Carolina		
Texas		
Virginia		
Washington		
West Virginia		
<b>26</b>	<b>18</b>	<b>7</b>

Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>2</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline’s criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases

<sup>2</sup> “Election Preview 2004: What’s changed, What Hasn’t and Why”. This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

028845

because we found they had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

<b>Table 2</b>			
<b>CATEGORIZATION OF STATES -- Statewide Registration Database</b>			
<b>Had Database 2004</b>	<b>No Database A-N</b>	<b>No Database N-W</b>	<b>HAVA Exempt or NA</b>
Alaska	Alabama	Ohio	Idaho
Arizona	Arkansas	Oregon	Maine
Connecticut	California	Pennsylvania	Mississippi
Delaware	Colorado	Rhode Island	Minnesota
District of Columbia	Florida	Tennessee	New Hampshire
Georgia	Iowa	Texas	North Dakota
Hawaii	Illinois	Utah	Wisconsin

Louisiana	Kansas	Virginia	
Massachusetts	Maryland	Washington	
Michigan	Missouri		
New Mexico	Montana		
Oklahoma	Nebraska		
South Carolina	Nevada		
South Dakota	New Jersey		
West Virginia	New York		
	North Carolina		
<b>16</b>	<b>27</b>		<b>8</b>

Minnesota has a statewide database but was excluded from the analysis because it did not offer provisional ballots and was exempt from the HAVA requirements.

#### Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as “out-of-precinct.” States that invalidated such ballots were categorized as “In-precinct only.”

028846

<b>Out-of-Precinct</b>	<b>In-Precinct Only</b>	<b>HAVA EXEMPT OR NA</b>
Alaska	Alabama	Idaho
Arkansas	Arizona	Maine
California	Colorado	Mississippi
Delaware	Connecticut	New Hampshire
Georgia	District of Columbia	North Dakota
Illinois	Florida	Wisconsin
Kansas	Hawaii	Wyoming

	Ohio	
	Oklahoma	
	South Carolina	
	South Dakota	
	Tennessee	
	Texas	
	Virginia	
	West Virginia	
17	26	7

**Voter Identification**

We relied on Electionline studies, including the Voter Identification study<sup>3</sup> and the 2004 Election Preview, to classify the states on their requirements for voter identification. Each state's categorization is taken directly from the Electionline studies except Hawaii.<sup>4</sup> The five different, and increasingly rigorous, categories are: Give Name (8 states), Sign Name (14 states), Match Signature (8 states), Provide ID (15 states), and Photo ID (5 states).

<sup>3</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Voter%20Identification.pdf>

<sup>4</sup> In 2004, ElectionLine listed Hawaii as requiring identification. Our review of statutes revealed that Hawaii could require photo ID. Since that is the most rigorous form of identification that may be required of voters, we classified Hawaii under this category.

028847

**Table 4****CATEGORIZATION OF STATES -- Forms of Identification Required**

*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<b>Give Name</b>	<b>Sign Name</b>	<b>Match Signature</b>	<b>Provide ID</b>	<b>Photo ID</b>
<i>Maine</i>	California	Illinois	Alabama	Florida
Massachusetts	DC	Nevada	Alaska	Hawaii
<i>New Hampshire</i>	<i>Idaho</i>	New Jersey	Arizona	Louisiana
North Carolina	Indiana	New York	Arkansas	South Carolina
Rhode Island	Iowa	Ohio	Colorado	South Dakota
Utah	Kansas	Oregon	Connecticut	
Vermont	Maryland	Pennsylvania	Delaware	
<i>Wisconsin</i>	Michigan	West Virginia	Georgia	
<i>Wyoming</i>	Minnesota		Kentucky	
	<i>Mississippi</i>		Missouri	
	Nebraska		Montana	
	New Mexico		<i>North Dakota</i>	
	Oklahoma		Tennessee	
	Washington		Texas	
			Virginia	
<b>9</b>	<b>14</b>	<b>8</b>	<b>15</b>	<b>5</b>

South Dakota complicates the effort to assign each state to a category. It permits voters to sign an affidavit that would allow them to vote without presenting photo ID. While Hawaii did not normally require photo ID, its statutes gave challenged voters the opportunity to respond by producing a photo ID.

#### Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

028848

**Table 5****CATEGORIZATION OF STATES -- Ballot Evaluation Methods**

*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<b>Signature Match</b>	<b>Data Match</b>	<b>Affidavit</b>	<b>Return with ID</b>	<b>NA</b>
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire
	Louisiana	Kentucky	Montana	N. Carolina
	Missouri	Massachusetts	New Jersey	N. Dakota
	Ohio	Nebraska	New Mexico	Wisconsin
	Oklahoma	Nevada	Texas	Wyoming
	Pennsylvania	New York	Utah	
	Rhode Island	South Dakota		
	S. Carolina	Tennessee		
	Washington	Vermont		
	West Virginia	Virginia		
4	14	14	10	9

**Data Collection**

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

028849

<b>Table 6 Updated information by State</b>	
<b>Received Updated Data</b>	<b>Did Not Receive Updated Data</b>
California	Alabama
District of Columbia	Alaska <sup>5</sup>
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland <sup>6</sup>	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska <sup>7</sup>	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
<b>26 States</b>	<b>25 States</b>

<sup>5</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>6</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>7</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

028850

## Data Differences with Election Day Study

The data used in this study differs from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished, on the schedule laid out in our work plan. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

State	EDS Numbers Cast/Counted	Our Numbers Cast/Counted	Differences	Updated Info from State?
Alabama	6,478/1,865	6560/1836	82/29	No
Alaska	23,285/22,498	23,275/22,498	10/0	No
Colorado	51,529/39,086	51,477/39,163	52/77	No
Georgia	12,893/4,489	12,893/3,839	0/650	No
Hawaii	346/25	348/25	2/0	Yes
Iowa	15,406/8,038	15,454/8,048	48/10	Yes
Kansas	45,535/32,079	45,563/31,805	28/274	Yes
Montana	688/378	653/357	35/21	Yes

Subject Re: Provisional Voting Report Status and Request for Advice  

John-

Many thanks for getting this draft document to us.

Over the next day or so I will spend time with key EAC staff reviewing the document and considering your questions. As you may recall, Commissioner Martinez has taken a prominent role in the review of your initial work and I am certain he will continue to do so. Sadly, the Commissioner lost his mother two weeks ago and, consequently, will not return to the office until next week.

It is likely that EAC staff will not be able to give you a definitive answer on some of your questions until the Monday after Thanksgiving. I will, however, try to answer some of the administrative questions before that time.

Regards-

Subject Provisional Voting Report Status and Request for Advice

Karen - We would like to talk with you about the process and schedule for completing our work in a way that is most useful to the EAC. I am attaching a draft timeline for the completion of this work and listing below five specific questions we need to resolve as quickly as possible. I would appreciate it if you would call me to discuss how best to address these matters - whether by telephone or by coming to meet in Washington.

We are planning to submit our report on Provisional Voting to the EAC by November 18<sup>th</sup>. Although it is not required in our contract, we will at the same time give copies to the members of the Peer Review Group offering them the opportunity to send us any additional corrections or other comments.

We are considering making all our recommendations for both Provisional Voting and Voter ID in the form of Best Practices. Some of them might well lend themselves to Guidance, but our discussion of the earlier draft with the EAC left us with the clear impression that on this topic the preference was for recommendations for Best Practices rather than a Guidance document. The calendar also argues for the Best Practices route to enable the EAC to give states advice they can use in 2006. (The attached draft timeline would need to be revised if the EAC prefers to propose some of the recommendations as Guidance.)

QUESTIONS:

1. Does the EAC agree with the approach described above to make all recommendations in the form of Best Practices rather than Guidance?
2. How long will it take the EAC to review and return comments on our draft Provisional Voting document? Is our attached revised schedule realistic in anticipating EAC comments no later than the week of December 12<sup>th</sup> on the report we send you at the end of this week?
3. After we revise our report on Provisional Voting to reflect any comments we receive from the EAC, and follow a similar process for our report on Voter Identification, what further steps would the Commission like us to take? Would you want us to conduct a review with your Board of Advisors and/or hold public hearings even though these steps are, we understand, required only for a Guidance Document? A review by the Board of Advisors would offer the opportunity to solicit suggestions for Best Practices from its members, thus strengthening the document and building a constituency for their adoption. (The attached draft timeline does not include such additional reviews.)
4. In any case, we will need a no-cost extension to the contract to carry us past December 31<sup>st</sup>. How do we make that request?
5. Assuming that we conduct fewer public hearings than we had anticipated, can we reallocate funds we had budgeted for that purpose to cover the higher than anticipated personnel and consultant costs we will be incurring after the first of the year?

028853

We look forward to discussing these matters with you.

Thanks, John

**DRAFT FOR DISCUSSION**

**REVISED SCHEDULE FOR EAC PROJECT**

**November 2005 – February 2006**

November 10, 2005

Assumes no guidance document, only analysis and recommended best practices

<b>DATE</b>	<b>Project Management</b>	<b>Provisional Voting</b>	<b>Voter ID</b>
<b>Week of 10/31</b>		Review draft report to EAC (Team)  Submit comments on report (Team)	Voter ID Research to TV
<b>Week of 11/7</b>	Status reports to JD for October tasks (all)	Redraft report (TON)  Review and approve report (Team)  Final draft report (TON)	Research continues (TV)
<b>Week of 11/14</b>	Submit monthly progress report (JD)	<b>Submit report to EAC for review</b> and to PRG for information Discuss with EAC use of Board of Advisors to expand "best practices." (TON, JW)  EAC reviews report	Research continues (TV)
<b>Week of 11/21</b>		EAC review continues	Complete data collection for Voter ID analysis. (TV)
<b>Week of 11/28</b>		EAC review continues	Draft report on Voter ID analysis (TV)

028855

**DRAFT FOR DISCUSSION**

<b>Week of 12/5</b>	Status reports to JD for November tasks (all)	EAC review continues	Internal review (PT)
<b>Week of 12/12</b>	Submit monthly progress report (JD)	Receive EAC comments on report  Revise and PT review	Revise draft (TV)  Draft alternatives (TON)  Review and comment on alternatives (PT)
<b>Week of 12/19</b>		<b>Finalize analysis and best practices to EAC for publication<sup>1</sup></b>	Complete draft report and alternatives (TV, TON)
<b>Week of 12/26</b>			Review draft report and alternatives (PT)
<b>Week of 1/2/06</b>	Status reports to JD for December tasks (all)		Report and alternatives to PRG
<b>Week of 1/9/06</b>			PRG meets and comments  Revise (TV & TON)

<sup>1</sup> If the EAC chooses not to issue a Guidance Document on provisional voting but only to recommend "best practices," the register publication, hearing and comment period may not be required, which would shorten the process by at least 30 days.

Subject RESPONSE REQUESTED-Working Group for Voting Fraud  
and Voter Intimidation Project

Dear Commissioners:

The consultants' contracts for EAC's voting fraud and voter intimidation project require Tova Wang and Job Serebrov to work in consultation with EAC staff and the Commissioners "to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation". The contracts do not specify the number of working group members but, as EAC has to pay for the group's travel and we want the size of the group to be manageable, I recommend that we limit the number to 6 or 8. **Please let me know if you think that this limit is too conservative .**

Attached for your review and comment are two lists of potential working group members for this project. One list was submitted by Job, the other by Tova. Tova and Job have provided brief summaries of each candidate's relevant experience and have placed asterisks next to the names of the individuals whom they particularly recommend. I can provide more extensive biographies of these individuals, if you need them. If EAC agrees that the recommended working group members are acceptable, an equal number may be selected from each list in order to maintain a balanced perspective.

Absent from the attached lists is the name of a representative from the U.S. Department of Justice's Election Crimes Branch. At this time, I am working through the DOJ bureaucracy to determine to what degree Craig Donsanto will be permitted to participate. If he cannot be named as a working group member, we may still be able to use him as a resource.

**Please provide your feedback to me no later than Monday , November 28.** I am available to meet with you if you would like to discuss this matter further.

Peggy Sims

Possible Working Group Members -Serebrov.doc Possible Working Group Members- Wang.doc

028858

## Possible Working Group Members - Serebrov

I recommend the first four with an \*

\***Mark (Thor) Hearne II**-Counsel to Republican National Committee; National Counsel to American Center for Voting Rights; National election counsel to Bush-Cheney, '04; Testified before U.S. House Administration Committee hearings into conduct of Ohio presidential election; Academic Advisor to Commission on Federal Election Reform (Baker-Carter Commission).

\***Todd Rokita**-Secretary of State, Indiana; Secretary Rokita strives to reform Indiana's election practices to ensure Indiana's elections are as fair, accurate and accessible as possible; Secretary Rokita serves on the nine-member Executive Board of the Election Assistance Commission Standards Board, charged by federal law to address election reform issues.

\***Patrick J. Rogers**-Partner/Shareholder, Modrall, Sperling, Roehl, Harris and Sisk, P.A., Albuquerque, New Mexico; 1991-2003 General Counsel to the New Mexico Republican Party; Election cases: *The Coalition to Expose Ballot Deception, et al v. Judy N. Chavez, et al*; Second Judicial District Court of Bernalillo County, New Mexico (2005); represented plaintiffs challenging petition procedures; *Miguel Gomez v. Ken Sanchez and Judy Chaves*; Second Judicial District Court of Bernalillo County, New Mexico (2005); residency challenge; *Moises Griego, et al v. Rebecca Vigil-Giron v. Ralph Nader and Peter Miguel Camejo*, Supreme Court for the State of New Mexico (2004); represented Ralph Nader and Peter Camejo, ballot access issues; *Larry Larrañaga, et al v. Mary E. Herrera and Rebecca Vigil-Giron*, Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *Decker, et al v. Kunko, et al*; District Court of Chaves County, New Mexico (2004); voter identification and fraudulent registration issues; *Kunko, et al v. Decker, et al*; Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *In the Matter of the Security of Ballots Cast in Bernalillo County in the 2000 General Election*; Second Judicial District Court of Bernalillo County, New Mexico (2000); voting and counting irregularities and fraud.

\***David A. Norcross**- Partner, Blank Rome LLP, Trenton NJ, Washington D.C; Chairman, New Jersey Republican State Committee, 1977 – 1981; General Counsel, Republican National Committee, 1993 – 1997; General Counsel, International Republican Institute; Counsel, The Center for Democracy; Vice Chairman, Commission on Presidential Debates; Executive Director, New Jersey Election Law Enforcement Commission

**Benjamin L. Ginsberg**-Served as national counsel to the Bush-Cheney presidential campaign; He played a central role in the 2000 Florida recount; He also represents the campaigns and leadership PACs of numerous members of the Senate and House, as well as the Republican National Committee, National Republican Senatorial Committee and

028859

Deliberative Process  
Privilege

National Republican Congressional Committee; His expertise is more in campaign finance.

**Cleta Mitchell**-Partner in the Washington, D.C. office of Foley & Lardner LLP; She advises corporations, nonprofit organizations, candidates, campaigns, and individuals on state and federal election and campaign finance law, and compliance issues related to lobbying, ethics and financial disclosure; Ms. Mitchell practices before the Federal Election Commission and similar federal and state enforcement agencies; Her expertise is more in campaign finance law.

**Mark Braden**-Of counsel at Baker & Hostetler; He concentrates his work principally on election law and governmental affairs, including work with Congress, the Federal Election Commission, state campaign finance agencies, public integrity issues, political broadcast regulation, contests, recounts, the Voting Rights Act, initiatives, referendums and redistricting; His expertise is mainly outside of the voter fraud area.

From: Tova Wang  
Re: Working Group Recommendations  
Date: November 12, 2005

\*Wendy R. Weiser, Associate Counsel in the Democracy Program at the Brennan Center for Justice at NYU School of Law and an expert in federal and constitutional law, has done a great deal of research, writing, speaking, and litigating on voting rights and election law issues. As part of the Brennan Center's wide ranging activities in the area of democracy, Ms. Weiser is currently overseeing an analysis and investigation of recent allegations of voter fraud throughout the country.

\*Barbara Arnwine is Executive Director of the Lawyers Committee for Civil Rights Under Law, an organization that for four decades has been at the forefront of the legal struggle to secure racial justice and equal access to the electoral process for all voters. Notably, Ms. Arnwine and the organization have led the Election Protection program for the last several years, a nationwide grassroots education and legal effort deploying thousands of volunteers and using a nationally recognized voter hotline to protect voters' rights on election day.

\*Daniel Tokaji, professor and associate director of the Election Law Center at the Moritz College of Law at the Ohio State University, is one of the nation's foremost experts in election law and reform and ensuring equality in the voting system. Professor Tokaji frequently writes and speaks on democracy related issues at academic and practitioner conferences, on such issues as voting technology, fraud, registration, and identification requirements, as well as the interplay between the election administration practices and voting rights laws.

Donna Brazile is Chair of the Democratic National Committee's Voting Rights Institute, the Democratic Party's major initiative to promote and protect the right to vote created in response to the irregularities of the 2000 election, and former Campaign Manager for Gore-Lieberman 2000 (the first African American to lead a major presidential campaign.) Brazile is a weekly contributor and political commentator on CNN's Inside Politics and American Morning, a columnist for Roll Call Newspaper and a contributing writer for Ms. Magazine.

Wade Henderson is the Executive Director of the Leadership Conference on Civil Rights (LCCR) and Counsel to the Leadership Conference on Civil Rights Education Fund (LCCREF), an organization at the forefront of defending voting rights for the last fifty years. Prior to his role with the Leadership Conference, Mr. Henderson was the Washington Bureau Director of the National Association for the Advancement of Colored People (NAACP)

Robert Bauer is the Chair of the Political Law Practice at the law firm of Perkins Coie, National Counsel for Voter Protection, Democratic National Committee, Counsel to the Democratic Senatorial and Congressional Campaign Committees and Co-Author, Report

028861

**Deliberative Process  
Privilege**

of Counsel to the Senate Rules and Administration Committee in the Matter of the United States Senate Seat from Louisiana in the 105<sup>th</sup> Congress of the United States, (March 27, 1997). He is the author of *United States Federal Election Law*, and one of the foremost attorneys in the country in the area of federal/state campaign finance and election laws.

Laughlin McDonald has been the executive director of the Southern Regional Office of the ACLU since 1972 and as the Director of the ACLU Voting Rights Project, McDonald has played a leading role eradicating discriminatory election practices and protecting the gains in political participation won by racial minorities since passage of the 1965 federal Voting Rights Act. During the past two decades, McDonald has broken new ground by expanding ACLU voting rights cases to include representation of Native Americans in various western states, and written innumerable publications on voting rights issues.

Joseph E. Sandler is a member of the firm of Sandler, Reiff & Young, P.C., in Washington, D.C., concentrating in campaign finance and election law matters, and general counsel to the Democratic National Committee. As an attorney he has handled campaign finance and election law matters for Democratic national and state party organizations, Members of Congress, candidates and campaigns. He served as general co-counsel of the Association of State Democratic Chairs, as general counsel for the Democratic Governors' Association and as counsel to several state Democratic parties.

Cathy Cox is serving her second term as Georgia's Secretary of State, having first been elected in 1998. In 2002 she earned re-election with over 61 percent of the vote, winning 146 out of 159 counties. Because of Secretary Cox's efforts Georgia has become a national leader in election reform. Her initiative made Georgia the first state in America to deploy a modern, uniform electronic voting system in every county

Hey-

I've had a chance to take a close look at the Eagleton Best Practices document.

I find it very confusing ( to say the least) and think it is a very long way from a Best Practices document we would want to or could use for our constituency.

Look forward to you all's thoughts and insights about next steps.

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.7
  - Task 3.8
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from November 1 through November 30, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

In November we completed and submitted our Provisional Voting analysis paper, including recommendations to the EAC for best practices. These policy prescriptions are based on our research and the comments of the Peer Review Group on that research. We completed a careful review of our data to reconcile it with other sources and identify the latest, most reliable information to use in the analysis. The importance of this demanding effort was described in October's Progress Report. We continue to await the EAC's comments on that final draft.

Also in November we revised the schedule for the project in light of the additional time that has been needed for review of earlier drafts by the EAC and the late completion of the Election Day Study. We made a written request to the EAC for a no-cost extension of the contract through the end of February which we understand is likely to be approved before Christmas.

Since the submission of our Provisional Voting report to the EAC on November 28, 2005, our efforts have been entirely aimed at the completion of the voter identification research. We have been advised that EAC will take several weeks to review and react to our final draft on provisional voting. As we await a January meeting on that topic, we are moving ahead

028868

quickly on the statistical analysis of voter identification data and summarizing the legal research that was completed earlier.

This Monthly Progress Report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net) or by telephone at (908) 794-1030.

### **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to Provisional Voting. Task 3.4 was completed in August, and Tasks 3.5 and 3.6 were completed in November.

#### **Task 3.6: Prepare preliminary draft guidance document.**

The report and recommendations which were sent to the EAC on November 28, 2005 recommends against the adoption of a guidance document per se and advises that the EAC adopt its recommendations as best practices. That recommendation followed agreement by the EAC with that course of action. The submission of that report and recommendations, however, constitutes the document required under this task. Before proceeding to Task 3.7 (revise the guidance document for publication) or 3.8 (arrange a public hearing on the draft guidance), we await the EAC's decision on how to proceed.

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is the principal focus of our research at this time.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The 50 state (plus District of Columbia) chart has been completed, the voter identification statutes have been collected for all states and D.C., and summaries of the existing voter identification statutes have been written for all states and D.C. Moritz has completed its review of voter identification litigation. Moritz and Eagleton have worked together to review the research, clarify the categorization of that research on our charts, and reconcile the data developed in our two different research techniques categorizations.

**Challenges:** The biggest challenge facing the reconciliation process of research findings, descriptions and categorizations is that it is being done by two different teams (Moritz and Eagleton) who rely on different primary source materials. Despite the necessity this has created to reconcile conflicting data from time to time, the collaboration has also been very beneficial because it has made our research efforts more rigorous.

**Work Plan:** During December we will conclude our reconciliation and continue analysis of voter identification research, including an analysis of the most important issues and trends in voter identification litigation.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

028870

During the month of November, we developed narratives to establish how laws were passed, looking at when they were proposed and when they were eventually enacted. In the upcoming month, Eagleton will examine voter registration forms across the states to see what forms of identification are requested from mail-in registrants. The difficulty will be determining the 2004 status of the states.

### VOTER ID AND TURNOUT ANALYSIS

Now under way is a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election. In November, we have analyzed both aggregate- and individual-level data to determine whether there is any relationship between voter turnout and the various forms of voter identification states require.

**Progress:** Analysis is under way for two data sets: County-level data that includes registration and turnout rates for 2000 and 2004, as well as Census measures and indicators of the type of voter identification requirements that were in existence at the time of the 2004 presidential election. The second data set consists of the voter supplement to the November 2004 Current Population Survey. This data set allows for testing of the same hypotheses at the individual level. Preliminary findings from the aggregate data set suggest that voter ID requirements have their greatest effect at the registration stage, as opposed to the turnout stage. This is a first cut at the data, however, and we will be adding a number of control variables to the analysis to see if the relationship holds.

**Challenges:** These analyses use hierarchical linear modeling. Because voter identification requirements vary by state, one must pay special attention to other, unseen state-level influences on the data. The models are difficult to run and interpret, so the analyses are time-consuming

**Work Plan:** The statistical analyses will continue during the month of December, and a draft of the findings is anticipated by the end of the month.

### **PROJECT MANAGEMENT**

#### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

**Progress:** During the month of November, Eagleton contacted the PRG Members on two occasions. First, all members received the final draft provisional voting report that was submitted to the EAC. Further comments are welcome but not expected from the PRG. Second, we have asked PRG members to reserve two dates in mid-January for potential conference call sessions to review the voter identification report.

**Challenges:** No new challenges were encountered during November.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

#### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

**Progress:** At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole. Upon their completion, new documents continue to be added.

**Projections:** The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

#### INTRANET

**Description:** All project team members have signed on to the Intranet site, and regularly post drafts, completed materials and spreadsheets online for internal review. The Intranet facilitates the exchange of information and collaboration among project participants.

### FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

028872

A detail of expenses incurred from project November 1- November 30, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.

Subject Meeting with EAC in March

Karen,

The Eagleton-Moritz team would like to schedule a meeting with the EAC in March. It would be the final substantive meeting on our contract, which expires at the end of March.

The agenda would include:

1. Brief the Commission on the principal findings and recommendations of the Voter ID research and hear questions and comments on that work.
2. Discuss the changes we made to the Provisional Voting paper as a result of comments and questions from the Commission.
3. Explore the Commission's intentions for the use of our work as recommendations for best practices or otherwise.

028874

I believe the meeting should take place after you receive the Voter ID paper from us in the first week of March, and ideally after the Commission staff has had enough time for a preliminary review of it.

The earlier we could set a date for this meeting, the more key members of the team would be able to participate.

Tom O'Neill

Sounds like you're really swamped-- and I'm not going to put anything more on your plate-- when you get to it, that'll be fine.

While I have not heard in the press about the Cameron Quinn issue, it has become commonly known enough that you could discuss it without it getting back to me.

Hope all is well-- good luck with the law review articles.

Hi Adam: I've honestly not had a chance to look at this. I'm in the midst of trying to meet a couple of LR deadlines this week. But I do plan to turn to the ID draft by Monday of next week. I'm actually in CA right now and don't have the PV piece with me -- if you can email a copy, I'll try to give it another read-through by tomorrow. Dan

Commissioner-

Given travels costs and the number of persons involved from the Eagleton/Moritz team, the idea was to do the two meetings in the same day.

However, I could ask Nicole to determine if there is a day in March that might work with your schedule.

I am very reluctant to schedule a meeting later in April as the contract is technically over March 31 (a Friday). April 3 is the following Monday.

Please advise. Thanks

Subject Voter ID Paper --Final Draft

Karen,

Attached is the final draft of the Voter ID paper, with recommendations for the EAC to consider promulgating as best practices. Two appendices are included as part of the draft and a third, the statistical analysis of the effects of different voter ID requirements on turnout, is attached separately to this email.

We look forward to discussing this final draft with you and with the commissioners on April 3. I'll be preparing a Powerpoint presentation for that meeting. Any guidance you can give me later this month on particular questions that briefing should address would be appreciated.

The Moritz-Eagleton team will be meeting next Tuesday at 9:30 a.m.. If you have preliminary comments you would like us to consider, that meeting would be a most convenient occasion to

028879

discuss them.

## MEMORANDUM

---

---

**TO:** MEMBERS OF EAC STANDARDS BOARD  
**FROM:** PEGGY NIGHSWONGER, CHAIR, EXECUTIVE BOARD  
RAY MARTINEZ, EAC COMMISSIONER  
**DATE:** APRIL 28, 2006  
**SUBJECT:** UPCOMING MEETING OF STANDARDS BOARD, MAY 23-24, 2006

**The next meeting of the EAC Standards Board (to be held jointly with the EAC Board of Advisors) will be held in Washington, D.C. on Tuesday, May 23 and Wednesday, May 24, 2006 at the Hamilton Crown Plaza hotel.** We hope you will be able to attend this important meeting, which will focus on consideration and discussion of a number of ongoing election administration research projects currently underway by the EAC. Additionally, there will also be an update and discussion regarding recent work conducted by the National Institute of Standards and Technology (NIST) on the voluntary voting system guidelines. (Please see the draft agenda attached for additional information.)

As was the case with our previous meetings of the EAC Standards Board, the EAC will pay the cost of travel, hotel and a Federal per diem for any member of the Standards Board wishing to attend the May 2006 meeting. Upon receipt of this memorandum, please contact the EAC's travel agent, Adventure Travel, at (877) 472-6718 to make your travel arrangements. Additionally, if you have any questions or need assistance in making your travel plans, please call \_\_\_\_\_ (email address is \_\_\_\_\_).

Thank you in advance for your willingness to join us in Washington, D.C. We look forward to seeing you soon.

Subject Re: BoA and Standards Board agendas 

History:

 This message has been replied to.

I have taken a look at the agendas. My questions start with assignment as resource person. Is Peggy going to be present for the Vote Fraud and Intimidation presentation? I have not been the person refereeing between Job and Tova, nor am I up to date on what their findings and work are. If I am just there to support the meeting, that's great, but Peggy should be there to make any substantive comments. I suffer from a similar problem with regard to the Eagleton presentation (other than what I gathered from their presentation a few weeks ago).

Perhaps what I need to know is what is the "resource person" supposed to do?

As a second question, do we know whether this lunch on Tuesday is "set". The hotel contract will have to be amended to include this lunch. I don't want to move forward on setting that up if it is not approved by the two Boards or it is otherwise not going to occur.

Third issue is that last time the Standards Board wanted a parliamentarian -- not volunteering, but that should be considered in terms of how our staff is assigned.

Subject Re: BoA and Standards Board agendas

Julie, in response to your questions:

The first response is that we've placed you as a resource person for only the ID, Provisional ballot, and then your presentation on legal clearinghouse website. So that's changed. The EAC reference person is not supposed to really interact, but be able to respond to the Board if they have questions regarding EAC processes in conducting the research. The panelists should start and lead the discussion. (i.e. for the breakout sessions on VVSG, I only answered procedural questions from the crowd). The ID and PV issues are inherently legal, so we wanted you to be on hand to explain those items.

As to the second issue, I'm copying Ray, because I believe that the lunch has the Executive Board's approval to alter the contract to provide for a lunch. They had requested an earlier start that day, and this is an effort to accommodate that request. If he disagrees, then I can do what is necessary to get approval for that lunch officially.

Third issue, we may need a parliamentarian for the SB, however, that role might be filled by Bill Campbell as the new role of secretary, or as one of the other SB members appointed. Do you believe we need a line in the first plenary session to appoint the parliamentarian? Maybe Gavin's interested? Ray, any thoughts?

Thanks,  
Adam

Subject Research materials for Boards

Team:

To help guide our thoughts for those of us working on the 1 PM meeting on what materials will be available for the SB/BOA meeting, I have drawn up a "comment" version of the SB agenda, which indicates, for each agenda item present, what materials will be available, and when. This is a preliminary agenda, and I realize we'll discuss these issues at the meeting today, but I thought it would be better to see this in written form, so we can identify potential problem areas. I'd like to work from this, modify this document, as we make our determinations as when, and in what form we will be providing materials to the Boards.

Again-- you all are the experts as to what stage these projects are at-- so I apologize if there's missing or incomplete information here.

Thanks,  
Adam

ResearchAGENDA (Standards Board) 2006.doc

U.S. ELECTION ASSISTANCE COMMISSION  
Standards Board Meeting Agenda  
Washington, D.C.  
May 23 – 24, 2006

**Tuesday, May 23, 2006**

**NOON – 1:15 P.M. LUNCHEON**

**Brief Welcoming Remarks**  
Commissioner Ray Martinez III

**EAC Staff Presentations:**

*Design for Democracy* (improvements to ballot design, national voter registration/mail-in form and polling place signage) (Karen Lynn-Dyson)

*Legal On-Line Information Clearinghouse* (Julie Thompson-Hodgkins)

*Public Access Portals* (Edgardo Cortes)

*Katrina Voting Assistance Relief* (Edgardo Cortes)

**Comment [Aa1]:** KLD has initial materials—need to determine what materials should/could be provided to the SB.

**Comment [Aa2]:** EC and JL may have initial website to present/display for SB members at meeting—unlikely to have materials ready in advance.

**Comment [Aa3]:** Update only, no materials.

**Comment [Aa4]:** Update only, no materials.

**1:15 – 1:30 P.M. BREAK**

**1:30 – 2:30 P.M. STANDARDS BOARD PLENARY SESSION**  
Session Chaired by Peggy Nighswonger  
Chair, Executive Board

- Appointment of Parliamentarian
- Adoption of Agenda
- Review of Meeting Book Materials
- Presentation of Proposed Permanent Bylaws
- Election of Executive Board Vacancy

**2:30 – 4:00 P.M. DISCUSSION: DRAFT REPORT ON PROVISIONAL VOTING**

**Presenters:**  
Thomas O'Neill: Provisional Voting/Voter Identification Study

**Comment [Aa5]:** Draft available same as last copy to 4Cs. Do not expect additional versions produced prior to the SB meeting. Can be emailed in advance.

Edward Foley: Director, Election Law@Moritz (The Ohio State University)

EAC Resource Person: Julie Thompson-Hodgkins

**4:00 – 4:15 P.M. BREAK**

**4:15 – 5:30 P.M. DISCUSSION: DRAFT REPORT ON POLL WORKER RECRUITMENT, TRAINING AND RETENTION (INCLUDING COLLEGE POLL WORKERS)**

Presenters:  
Jennifer Collins-Foley, Pollworker Institute  
Abby Horn, Cleveland State University  
EAC Resource Person: Karen Lynn-Dyson

**Comment [Aa6]:** Preliminary draft available for both College Pgm. and Poll. Pgm. Needs additional work prior to releasing. Work might be able to be performed in the next week.

**NOTE: Attendees on their own for dinner.**

**Wednesday, May 24, 2006**

**8:00 – 8:30 A.M. CONTINENTAL BREAKFAST**

**8:30 – 9:15 A.M. BRIEFING: PROPOSED MANAGEMENT GUIDELINES**

Presenters:  
Connie Schmidt, EAC Consultant  
Brit Williams, EAC Consultant  
EAC Resource Person: Brian Hancock

**Comment [Aa7]:** CS, BW and BH to meet on Wednesday to determine what of their materials may be ready for distribution. Current potentials: 3 pg. overview briefing of guideline principals, and 20 pg. chapter on security principals.

**9:15 – 10:00 A.M. BRIEFING: DRAFT REPORT ON VOTE COUNT/RECOUNT**

Presenters:  
Dr. Thad Hall, Assistant Professor of Political Science, University of Utah  
Doug Chapin, EAC Consultant  
EAC Resource Person: Peggy Sims

**Comment [Aa8]:** Draft report completed, according to KLD, too technical at this point, but able to be released.

**10:00 – 10:15 A.M. BREAK**

**10:30 – 11:00 A.M. DISCUSSION: DRAFT EAC ELECTION DAY SURVEY**

Presenters:  
Karen Lynn-Dyson, Research Director, EAC  
Laiza Otero, Research Associate, EAC

**Comment [Aa9]:** LO and JT are currently in consultation regarding the form of the document. Will likely be ready in draft form for distribution immediately prior to SB meeting.

**11:00 – 11:55 P.M. BRIEFING: DRAFT REPORT ON VOTING FRAUD/VOTER INTIMIDATION**

Presenters:  
Job Serebrov, Associate, The Nixon Law Firm  
Tova Wang, Democracy Fellow, The Century Foundation

**Comment [Aa10]:** There is legal research prepared, but not compiled in a format that would be usable by SB members. Because of the close proximity to the working group meeting, final report is not yet written.

EAC Resource Person: Peggy Sims

**NOON – 1:30 P.M. JOINT LUNCHEON**

***EAC Activities Update***

Brief Remarks by: Chairman Paul DeGregorio  
Vice-Chairman Ray Martinez III  
Commissioner Gracia Hillman

**Presentation:** ~~General Update on NIST/TGDC Activities~~

**Comment [Aa11]:** Allan Eustice contacted to determine what materials may be made available.

Introduction of Speaker: Commissioner Donetta Davidson

Presenters:  
John Wack, NIST

**1:40 – 2:45 P.M.**

**~~DISCUSSION: DRAFT REPORT ON VOTER IDENTIFICATION~~**

**Comment [Aa12]:** Draft available same as last copy to 4Cs. Do not expect additional versions produced prior to the SB meeting. Can be emailed in advance.

Presenters:  
Thomas O'Neill, Provisional Voting/Voter Identification Study  
Edward Foley, Director, Election Law@Moritz, The Ohio State University  
EAC Resource Person: Julie Thompson-Hodgkins

**2:45 – 3:00 P.M.**

**BREAK**

**3:00 – 5:00 P.M.**

**STANDARDS BOARD PLENARY SESSION**

Session Chaired by Peggy Nighswonger, Chair, Executive Board

Discussion and consideration of Standards Board business.

**5:00 P.M.**

**ADJOURN**

Subject Materials for Standards Board (DRAFT)

Attached, please find draft letter to be sent to the Commissioners. Any comments or corrections, please make them and send them back to Amie and myself. We hope to send this email by 3 PM today, so please take a look quickly-- for your projects.

Commissioners:

Peggy, Edgardo, Karen, Laiza, Adam and Amie met this afternoon to discuss what materials will be ready to present to the Standards Board and Board of Advisors members during the meetings later this month. Listed below is what we have determined to be available for their review and feedback. Please review this list and offer your feedback.

Also, attached is an updated SB agenda with "comments" on work product for each project to be discussed.

Design for Democracy - exhibits to be on display for board member review and feedback; Ric Grefe will be present with KLD to discuss the processes used to get to these specific examples; Preliminary Design Report (dated April 10, 2006) to be delivered electronically to the members for their review prior to the meeting

Legal Information Clearinghouse - demo version of the website will be available to show

Public Access Portals - there is a conference scheduled for June 16-18; a tentative agenda and, if desired, a list of participants will be made available to the members for their review and feedback; also future steps can also be outlined for their feedback

Katrina Voting Assistance Relief - due to the limited amount of information that we can offer, we propose eliminating this topic and substituting discussions on our Language Working Group meetings

Language Working Groups - the members will be updated on our two working group meetings and the information received at both, as well as our next steps

Provisional Voting - a draft of the final report is to be delivered to the 4 C's by 5/11 for their review and feedback; product following 4C review will be available 5/17 for electronic distribution to board members

Poll Worker R T & R (including College Pollworker) - reports as they stand now are not ready to be presented, according the KLD; Peggy and Karen to communicate to project managers the need for a report by 5/11 for review by the 4 C's

Proposed Management Guidelines - Connie, Brit, and Brian to determine on 5/10 what materials are ready for presentation to board members; currently a 3 page overview briefing of guideline principles and a 20 page chapter on security principles have been prepared

Vote Count/Recount - materials to be delivered to board members include the public testimony given by Thad Hall and Doug Chapin at our Seattle public meeting and several case studies outlining examples

EAC Election Day Survey - draft report with changes/updates highlighted and website application clips to be presented (Ready).

028895

Voting Fraud/Voter Intimidation - a summary of the preliminary research and a recap of the discussions of the May 18 working group meeting offering brainstorming ideas, not advice

NIST/TGDC activities - Allan Eustis states that NIST is working to provide their summary of materials to be provided, and that they will get that to us ASAP.

Voter Identification - a PowerPoint presentation outlining the process and a summary of findings. Peer review group to occur May 11th, with final Draft due the 15th. At this time, Commissioners can determine whether Draft Report is ready to submit to the SB and BOA.

Subject Re: Working Group-Perez 

As you may recall, the Commissioners directed me to find a nonpartisan local election official to serve on the Working Group. The three of us discussed the desirability of having a Hispanic. I proposed that I find someone from Texas because of that State's colorful history of voting fraud and their innovative approaches to combat it. In those Texas counties that hire Election Administrators to run elections, rather than having elected officials do so (Tax Assessor for voter registration; County Clerk for balloting), the Election Administrator is hired by the County Election Commission and is supposed to perform his or her duties in a nonpartisan manner. (See attached excerpts from Texas Election Code regarding election administrator hiring and restrictions on partisan activity.)

Any experienced Texas election official will be familiar with voting fraud and voter intimidation schemes used in that State. Mr. Perez has over 13 years experience as a county Election Administrator in Texas. You won't find many news articles mentioning him because he has kept his nose clean. (The Texas press, as in many other parts of the country, prefers to report bad news.) Mr. Perez is plugged into the association of Texas election officials and the two largest organizations of election officials in this country: the International Association of Clerks, Recorders, Election Officials and Treasurers (IACREOT); and The Election Center. He is a past President and past Chairman of the Legislative Committee for the Texas Association of Election Administrators. He currently serves on IACREOT's Election Officials Committee, which plans the educational sessions for election officials that are conducted at that organization's conferences. His peers in IACREOT and The Election Center have selected his submissions on web presentations (IACREOT) and his professional practices papers (Election Center) for awards. Mr. Perez also has access to information from other States through his membership in IACREOT and The Election Center. He also has a sense of humor, which you will note if you access the staff web page on the Guadalupe County Elections web site and hear the Mission Impossible theme .. something that might be useful in the upcoming meeting.

Guadalupe County is small but growing. In 2004, the county had over 65 thousand registered voters (a number more than doubled the number of registered voters in 1988). A third of the county's population claims Hispanic or Latino origin, according to the U.S. Census Bureau. The county is in south central Texas and is bordered by Comal, Hays, Cladwell, Gonzales, Wilson, and Bexar counties. In the 1980s, the county was predominately a farming community; but in recent years, many people have moved from

028897

San Antonio (Bexar County) to Guadalupe County, preferring to live in Guadalupe County and work in Bexar County.

Subject Re: Materials for Standards Board (DRAFT) 

Adam:

Regarding the **Vote Count/Recount** contract, I am trying to schedule a teleconference with Thad for tomorrow. We will discuss preparations for his presentation, among other things. He may suggest additional materials, other than the testimony, that may be acceptable to us.

Regarding the **Vote Fraud/Voter Intimidation** project, I don't think the materials will include a written recap of the Working Group meeting, scheduled for May 18, if we have to have the materials to you NLT COB May 17. I can provide a verbal recap at the meeting. I may be able to pull together a written recap after May 18, but it won't be available much earlier than the week of the meetings.

Let me know if you have any questions. --- Peggy

Subject Board Meeting Materials

Commissioners:

Peggy, Edgardo, Karen, Laiza, Adam and Amie met yesterday afternoon to discuss what materials will be ready to present to the Standards Board and Board of Advisors members during the meetings later this month. Listed below is what the Research Team has determined to be available for their review and feedback. It looks like the much of the information needed will be able to be sent to Adventure travel for their preparation in binders on May 17th.

Please review this list and offer your feedback.

Also, attached is an updated SB agenda with "comments" on work product for each project to be discussed.

Design for Democracy - exhibits to be on display for board member review and feedback; Ric Grefe will be present with KLD to discuss the processes used to get to these specific examples; Preliminary Design Report (dated April 10, 2006) to be delivered electronically to the members for their review prior to the meeting

Legal Information Clearinghouse - Information about contract, potentially a demo website to show members functionality (tentative).

Public Access Portals - there is a conference in June; a tentative agenda will be made available to the members for their review and feedback; also future steps can also be outlined for their feedback; we will include a timeline for when draft documents will be submitted so we can send them out via email for feedback before finalizing the project.

Katrina Voting Assistance Relief - due to the limited amount of information that we can offer, EC strongly proposes eliminating this topic and substituting discussions on our Language Working Group meetings

Language Working Groups - the members will be updated on our two working group meetings and the information received at both, as well as our next steps for development of programs

Provisional Voting - a draft of the final report is to be delivered to the 4 C's by 5/11 for their review and feedback; product following 4C review will be available 5/17 for electronic distribution to board members

Poll Worker R T & R (including College Pollworker) - reports as they stand now are not ready to be presented, according to the KLD; Peggy and Karen to communicate to project managers the need for a report by 5/11 for review by the 4 C's

Proposed Management Guidelines - Connie, Brit, and Brian to determine on 5/10 what materials are ready for presentation to board members; currently a 3 page overview briefing of guideline principles and a 20 page chapter on "security principles" have been prepared

Vote Count/Recount - materials to be delivered to board members include the public testimony given by Thad Hall and Doug Chapin at our Seattle public meeting and several case studies outlining examples. Peggy will discuss on 5/10 with Prof. Hall regarding other materials that may be presented.

EAC Election Day Survey - draft report with changes/updates highlighted and website application clips to

028904

be presented (Ready).

Voting Fraud/Voter Intimidation - a summary of the preliminary research and initial feedback from the May 18 working group meeting offering brainstorming ideas, not formal advice.

NIST/TGDC activities - Allan Eustis states that NIST is working to provide their summary of materials to be provided, and that they will get that to us ASAP.

Voter Identification - a PowerPoint presentation outlining the process and a summary of findings. Peer review group to occur May 11th, with final Draft due the 15th. At this time, Commissioners can determine whether Draft Report is ready to submit to the SB and BOA.

Subject RE: Travel arrangements for the EAC Board of Advisors and  
Standards Board meeting

History:

✉ This message has been replied to.

Tom-

It is my understanding that Adam Ambrogi has been in touch with Ned Foley and, in turn, Dan Tokaji to indicate that you and Dan will present the information on the Voter ID project, while you and Ned will present the information on the Provisional Voting project.

Adam Ambrogi can also clarify your presentations. As I understand it, you will present your Voter ID and Provisional Voting projects to the Standards Board. You will then present your Voter ID and Provisional Voting Projects to the Board of Advisors.

I believe Adventure Travel handles hotel and travel arrangements.

I do not believe accommodations have been made for other members of the project team to attend. I will ask Adam Ambrogi, who is the principal point of contact on these meetings, to clarify this.

Regards-

Karen Lynn-Dyson

Subject RE: Travel arrangement for the EAC Board of Advisors and  
Standards Board meeting

Karen,

As we discussed last week, the Eagleton-Moritz team making the presentations at the advisory board meetings will include others in addition to Ned and me. While Ned and I will handle the briefing on the provisional voting report, the team for the briefing on the Voter ID report will include Dan Tokaji and Tim Vercellotti.

028906

Just to understand what Adventure Travel is to provide: will its services include hotel reservations and travel, or does it have a more limited mission?

Thanks,

Tom O'Neill

**Subject:** Re:Travel arrangement for the EAC Board of Advisors and Standards Board meeting

Tom O' Neill and Ned Foley-

As you know you are scheduled to make two presentations to the EAC Board of Advisors and Standards Board on **Tuesday May 23, 2006 from 2:30-4:00 PM (on Provisional Voting ) and on Wednesday ,May 24th from 1:40-2:45 PM ( on Voter Identification )**

If you have not already done so, please make your hotel and travel arrangements through Adventure Travel, Judy Mays 205-444-4833 ( judy.mays@adtrav.com)

These reservations should be made no later than tomorrow COB.

Please indicate to Judy Mays that you are a contractor, who is scheduled to make a presentation at the meeting.

Thanks

Subject Re: Standards and Advisory Board Agendas 

These are the only publicly released agendas yet-- The discussion, and modification that was done last week as to what products are being produced are not reflected-- but will in the final version. These were distributed because of numerous Staff questions as to time and place issues.

We'll forward around the final draft info when available.

Peggy- any word yet on what's up for Voting Fraud issue for the meeting(I know you have that WG in two days, but....)?  
Thanks,  
Adam

Subject Re: Standards and Advisory Board Agendas 

These agendas still indicate that draft reports on the Vote Count/Recount and the Voting Fraud-Voter Intimidation research projects will be presented for consideration. In neither case is this true. Reports from these projects are unavailable or not ready for prime time.

Thad Hall and Doug Chaping will have a PowerPoint presentation on the Vote Count/Recount project (and we can make copies of their testimony in Seattle available) and I will have a status report on the Voting Fraud-Voter Intimidation project for the boards. --- Peggy

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

028920

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people – including representatives from the Department of Justice (DOJ) - indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. While DOJ's Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance, the Election Crimes Branch, Public Integrity Section, has increased prosecutions of individual instances of felon, alien, and double voting at the same time as it maintains an aggressive pursuit of systematic schemes to corrupt the electoral process.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.
- A few recommend returning to allowing use of absentee ballots "for cause" only if it were politically feasible.

028922

- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

## NEWS ARTICLES

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

### Absentee Ballots

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

028928

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

028924

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio and Pennsylvania.

### **“Dead Voters and Multiple Voting”**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

028925

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

028926

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

# Best Practices in Vote Counts, Recounts, and Challenges

Presentation to  
EAC Standards Board  
May 24, 2006

# Research Team

---

- Thad Hall, University of Utah
- R. Michael Alvarez, Caltech
- Kim Brace, Election Data Services
- Doug Chapin, *electionline.org*

# Requirement for Study

---

- Section 241 of the HAVA requires the EAC to conduct a study examining vote counting and recounting.
- Identify methodology for studying best practices
- Examine election laws and regulations in all 50 states and the District

# Study Overview

---

- Identified best practice methodologies
- Developed criteria for evaluating practices
- Presented the most common practices for vote counting and recounting.
- Identified “benchmark” practices that exceed the most common practices in states.
- Identified best practices for vote counts and recounts that have been implemented.

# Criteria for Studying Vote Counting and Recounting

---

028933

# GAO Best Practice Methodology

---

- Document existing process
- Research literature; talk to practitioners and experts
- Select comparative entities for review
- Collect data from selected entities
- Identify barriers to change
- Compare/contrast processes; develop implementation recommendations

# Best Practice Study

---

- Researched existing literature on vote counting
- Developed baseline of existing activity
- Developed benchmarks for practices that exceed baseline
- Identified potential best practices for review by the EAC Commissioners
- States and localities have to do the hard work: Implementation

# International Principles for Vote Counting

---

IFES, (IDEA), and the United Nations  
election project states:

to establish and maintain public confidence in  
the electoral process, vote counting systems  
and procedures should incorporate the  
[eight] fundamental principles of vote  
counting in a democratic election.

# Eight Principles for Vote Counting

---

- Transparency
- Security
- Professionalism
- Accuracy
- Secrecy
- Timeliness
- Accountability
- Equality

# Common International Practice

---

- All ballots should be reconciled against the number of voters who cast ballots.
- Ballots are initially counted at the precinct where the vote was cast.
- There are explicit legal requirements for securing ballots.
- Recounts are allowed by request; five countries conduct 100 percent audits.
- Convenience voting is everywhere.

# Evaluating State Practices in Statute and Regulation

4028939

# Developing National Baseline

---

- Survey of state laws and regulations
  - Security
  - Pre-election procedures
  - Election ballot procedures
  - End of Election Procedures
  - Definition of "What Constitutes A Vote"
  - Counting and Accounting
  - Recounting
  - Challenges

# Developing National Baseline

---

- Survey of state laws and regulations
  - Identified Specific Questions
  - Reviewed Survey with EAC, Election Officials, and Outside Experts
- Collected Data
  - Statutory or Regulatory Language
  - Legal Citation

# Key Findings

---

- Three issues with great variation in coherence and completeness
  - Ballot Accounting
  - Ballot Security
  - What Constitutes a Vote

# Survey Next Steps

---

- Each report is being carefully reviewed and edited
- Submit surveys to states for review
- States will have interactive online survey form to note problems

# Benchmarking Election Law

---

028944

# Benchmarking

---

- Common in public and private sectors
- How does your performance stack up to similar organizations? OR
- How does your performance stack up to a pre-selected target?
  
- GOAL: Think about your practices.

# Benchmarking Practices

---

- Using the survey data, we have identified most common practices
- For many activities, we will propose “benchmark” practices
  - Clearer,
  - More detailed, or
  - More comprehensive

# Benchmarking Example: Ballot Accounting

---

- Most Common Practice: No Standard
- Benchmark: The counting board shall count all ballots to ensure that the total number of ballots corresponds with the total number of names in the poll book. If [they] cannot reconcile... [they] shall submit... a written report stating how many ballots were missing or in excess and any reason ...for the discrepancy.

# Benchmarking Limitations

---

- Not all activities can be benchmarked
- Some activities reflect political and cultural decisions by the state. For example:
  - Absentee voting
  - Handling of recounts and challenges

# Best Practices in Election Law

---

028940

# What are Best Practices

---

- Best practices refer to the processes, practices, and systems identified in... organizations that performed exceptionally well and are widely recognized as improving an organization's performance and efficiency in specific areas.

# Effective Best Practices

---

- Address a complete process
- Have been carefully charted
- Often come from organizations with similar characteristics

# Best Practices Examined

---

- What Constitutes a Vote
- Accounting
- Auditing
- Security
- Transparency
  
- Issues in Challenges and Recounts

Subject RE: Presentations at the EAC Governing Boards

Karen, I don't have the capacity to produce a PDF copy of the report. (I thought we discussed this last week and you agreed that the word document would suffice.) Someone at Eagleton could surely covert the DOC file to PDF, but since I just read your email now (4:50), we could not provide a PDF copy today. Please let me know if you want me to pursue this tomorrow.

Thanks for the schedule below. But it raises a question. Earlier this week you told me that the Commissioners asked that we limit our presentation to 10 minutes and leave the rest of the time for questions and comments. As I noted in my response, condensing our reports to 10 minutes poses a challenge. Is the 10 minute limit no longer operative?

Tom O'Neill

Tom-

Look forward to getting a PDF copy of the final versions of the Voter ID paper and the Provisional Voting Paper by COB today

Here is the timing breakdown for next week's presentations:

**EAC Standards Board ( 137 members)**

**Tuesday, May 23, 2006**

**2:30-4:00 PM**

**Hamilton Ballroom**

Provisional Voting

45 minutes for presentation

45 minutes for questions and answers

**Wednesday, May 24, 2006**

**1:40-2:45 PM**

**Hamilton Ballroom**

Voter Identification

40 minutes for presentation

25 minutes for questions and answers

**EAC Board of Advisors ( 36 members)**

**Wednesday, May 24, 2006**

**8:30-9:15 AM**

**Lafayette Park Ballroom**

Provisional Voting

20 minutes for presentation

25 minutes questions and answers

**Wednesday, May 24, 2006**

**11:00-11:55 PM**

**Lafayette Ballroom**

Voter Identification

30 minutes presentation

25 minutes questions and answers

**EAC General Counsel Julie Thompson - Hodgkins will facilitate /moderate all of your sessions**

Will be in touch tomorrow after the Commissioners have met.

Subject PV Final Draft for Review by Advisory and Standards Boards

Karen,

Attached is the Final Draft of our report on Provisional Voting for review by the Advisory Board and the Standards Board. I understand from our conversation earlier today that it will be reviewed by the Commissioners at their meeting next week, and, if approved by them, distributed to the boards in advance of their meetings on May 23 and 24. This report will form the basis of our PowerPoint briefing for the boards at those meetings. I will not have hard copies of those PowerPoint presentations for distribution to the boards until the day of the meeting.

We intend to have the Final Draft Voter ID Report to you in time for review by the Commissioners at their second meeting next week.

Thanks for your guidance.

Tom O'Neill

**The Research Team**

This research report on Provisional Voting in the 2004 election is part of a broader analysis that also includes a study of Voter Identification Requirements, a report on which is forthcoming. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

## EXECUTIVE SUMMARY

### Background and Methodology

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005.

The Help America Vote Act of 2002 (HAVA, (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient. Section 302(a) of HAVA required states to establish provisional balloting procedures by January 2004.<sup>1</sup> The process HAVA outlined left considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voter eligible to cast a provisional ballot that will be counted and in what jurisdiction (precinct or larger unit) the ballot must be cast in order to be counted.<sup>2</sup>

The general requirement for provisional voting is that, if a registered voter appears at a polling place to vote in an election for Federal office, but either the potential voter's name does not appear on the official list of eligible voters for the polling place, or an election official asserts that the individual is not eligible to vote, that potential voter must be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the EAC's Election Day Survey, "first-time voters who registered by mail without identification and cannot provide identification, as required under HAVA. . ." <sup>3</sup> HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. Election administrators are required by HAVA to notify individuals of their opportunity to cast a provisional ballot.

---

<sup>1</sup>The Election Center's National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing "voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted." It recommended "in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions." See [www.electioncenter.org](http://www.electioncenter.org).

<sup>2</sup> The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in *Sandusky County Democratic Party v. Blackwell*, 387 F.3d565 (6<sup>th</sup> Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA's definition of "jurisdiction" incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define "jurisdiction" for the purpose of counting a provisional ballot.

<sup>3</sup> The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See <http://wired.com/news/evote/0,2645,63298,00.html>. (Our analysis revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)

028984

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Our research began in late May 2005. It focused on six key questions raised by the EAC.

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, we:

1. Surveyed 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Reviewed the EAC's Election Day Survey, news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.<sup>4</sup>
3. Analyzed statistically provisional voting data from the 2004 election to determine associations between the use of provisional voting and such variables as states' experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification.
4. Collected and reviewed the provisional voting statutes and regulations in all 50 states.
5. Analyzed litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Our research is intended to provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states move forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly those states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

## KEY FINDINGS

### Variation among the states

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63%, were counted. Provisional ballots accounted for a little more than 1% of the final vote tally. These totals obscure the wide variation in provisional voting among the states.<sup>5</sup>

---

<sup>4</sup> Attachment 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures. It also describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

<sup>5</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Six states accounted for two-thirds of all the provisional ballots cast.<sup>6</sup>
- The percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%.
- The portion of provisional ballots cast that were counted ranged from 96% in Alaska to 6% in Delaware.
- States with voter registration databases counted, on average, 20% of the provisional ballots cast.
- States without databases counted ballots at more than twice that rate: 44%.<sup>7</sup>
- States that provided more time to evaluate provisional ballots counted a greater proportion of those ballots. Those that provided less than one week counted an average of 35.4% of their ballots, while states that permitted more than 2 weeks, counted 60.8%.

An important source of variation among states was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>8</sup>

## Variation within states

Within states, too, there was little consistency among different jurisdictions. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors (including the training of election judges or poll workers) beyond statewide factors, such as experience or the existence of voter registration databases, also influence the use of provisional ballots.

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot.

Resources available to administer provisional voting varied considerably among and within states. Differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.

---

<sup>6</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>7</sup> As the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without." Report on the Commission on Federal Election Reform, "Building Confidence in U. S. Elections," September 2005, p. 16.

<sup>8</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.28986.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.

In precincts located in districts where many voters live in poverty and have low levels of income and education, the voting process, in general, may be managed poorly. Provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

## **The lessons of litigation**

Successful legal challenges highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called “wrong precinct issue” – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. Most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots. This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second –and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right –the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot.

## **States move to improve their processes**

Shortly after the 2004 election, several states came to the conclusion that the administration of their provisional voting procedures needed to be improved, and they amended their statutes. The new legislation highlights areas of particular concern to states about their provisional voting process.

- Florida, Indiana, Virginia, and Washington have clarified or extended the timeline to evaluate the ballots.
- Colorado, New Mexico, North Carolina, and Washington have passed legislation focused on improving the efficacy and consistency of the voting and counting process.
- Colorado, Arkansas, and North Dakota took up the issue of counting provisional ballots cast in the wrong precinct.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices that draw on the experience gained in the 2004 election can be useful in states’ efforts to achieve greater consistency in the administration of provisional voting. The important effect of experience on the administration of the provisional ballot process indicates that the states have much they can learn from each other.

For Review by the Standards Board and Board of Advisors

## SUMMARY OF RECOMMENDATIONS FOR BEST PRACTICES

State efforts to improve the provisional voting process have been underway since the 2004 election. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states.

### Take a quality-improvement approach

Defining what constitutes a successful provisional voting system is difficult. Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. A first step is for states to recognize that improving quality begins with seeing the provisional voting process as a system and taking a systems approach to regular evaluation through standardized metrics with explicit goals for performance. EAC can facilitate action by the states by recommending as a best practice that:

- Each state collect data systematically on the provisional voting process to permit evaluation of its voting system and assess changes from one election to the next. The data collected should include: provisional votes cast and counted by county; reasons why provisional ballots were not counted, measures of variance among jurisdictions, and time required to evaluate ballots by jurisdiction

### Emphasize the importance of clarity

Above all else, the EAC should emphasize the importance of clarity in the rules by which each state governs provisional voting. As state legislators and election officials prepare for the 2006 election, answers to the questions listed in the recommendation section of this report could be helpful. Among those questions are:

- Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate?
- Do the procedural requirements of the system permit cost-efficient operation?
- How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

### Court decisions suggest areas for action

The court decisions following the 2004 election also suggest procedures for states to incorporate into their procedures for provisional voting. EAC should recommend to the states that they:

- Promulgate clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.
- Provide effective materials to be used by local jurisdictions in training poll workers on such procedures as how to locate polling places for potential voters who show up at the wrong place.
- Make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.

### Assess each stage of the provisional voting process

028988

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Beyond the procedures suggested by court decisions, states should assess each stage of the provisional voting process. They can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process.

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot. Our recommendations for best practices to avoid error at the polling place include:

- The layout and staffing of the multi-precinct polling place is important. States should ensure that training materials distributed to every jurisdiction make poll workers familiar with the options available to voters.
- The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting and include take-away information for the voter on the steps in the ballot evaluation process.
- Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. Best practice would be for states should provide guidelines (as do Connecticut and Delaware) to estimate the supply of provisional ballots needed at each polling place.

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted.

- State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Kansas allows voters to proffer their ID by electronic means or by mail, as well as in person.
- More provisional voters have their ballots counted in those states that count ballots cast outside the correct precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence.
- If a state does require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location. While the best practice might be for poll workers to direct the voter to correct precinct poll workers' advice is not always correct, and the voter should be protect against ministerial error.
- Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.

In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. Our research did not identify an optimum division of the five weeks available.

028989

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

After the election, timely information to voters about the disposition of their provisional ballot can enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

- Best practice for the states is to establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### Final observation

The detailed examination of each stage in the provisional voting process can lay the foundation each state needs to improve its system. Efforts to improve provisional voting may be most effective as part of a broader effort by state and local election officials to strengthen their systems. Collecting and analyzing data about those systems will enable states to identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as ways to reduce the need for voters to cast their ballots provisionally.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## Provisional Voting in 2004

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.

These totals obscure the wide variation in provisional voting among the states.<sup>9</sup> Six states accounted for two-thirds of all the provisional ballots cast.<sup>10</sup> State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted provisional ballots at more than twice that rate, 44%.

An important source of variation was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>11</sup>

- The percentage of the total vote cast as provisional ballots averaged more than 2% in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.<sup>12</sup>
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Those voting with provisional ballots in experienced states had their ballots counted more frequently than those in the new states. This experience effect is evidence that there is room for improvement in provisional balloting procedures, especially in those states new to the process.<sup>13</sup> That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

---

<sup>9</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

<sup>10</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>11</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

<sup>12</sup> To compensate for the wide differences in vote turnout among the 50 states the average figures here are calculated as the mean of the percent cast or counted rather than from the raw numbers of ballots cast or counted.

<sup>13</sup> Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit's "6-day time limit to process provisional ballots was very challenging and unrealistic. To overcome this challenge, *the entire department's employees were mobilized to process provisional ballots.*" (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.

028991

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Be prepared to direct voters to their correct precincts with maps;
- Regard provisional voting as easy to implement;
- Report that provisional voting sped up and improved polling place operations
- Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from “new” states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC can facilitate the exchange of experience among the states and can offer all states information on more effective administration of provisional voting.

Concluding optimistically that experience will make all the difference, however, may be unwarranted. Only if the performance of the “new” states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Our current understanding of how provisional voting worked in 2004 is not sufficient to determine unambiguously which view is correct.

1. “New” states may have a political culture different from “old” states. That is, underlying features of the “new” states political system may be the reason they had not adopted some form of provisional voting before HAVA. The “new” states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. The training they offer poll workers about provisional ballots may not be as frequent or effective as in other states. If the inconsistent performance in the “new” states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots -- as measured by intrastate consistency in administration--- will be harder and take longer to achieve.<sup>14</sup>
2. “Old” states may devote fewer resources to updating their registration files or databases because they consider provisional ballots as a reasonable fail safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

---

<sup>14</sup> Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, “no state gave the voter the right to find out the status of their ballot after the election.” Now all offer that opportunity. See Bali and Silver, “The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000,” manuscript, Department of Political Science, Michigan State University. Resisting HAVA’s mandates through foot-dragging lacks any legitimate foundation in law or policy.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- The more rigorous the verification requirements, the smaller the percentage of provisional ballots that were counted. Some states verified provisional ballots by comparing the voter's signature to a sample, some matched such identifying data as address, birth date, or social security number, others required voters who lacked ID at the polling place to return later with the ID to evaluate the provisional ballot, and some required provisional voters to execute an affidavit.<sup>15</sup>
  - In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
  - In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
  - In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
  - In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office
- Voter registration databases provided information that reduced the number of provisional ballots counted.<sup>16</sup> In states using provisional voting for the first time, states with registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.
- States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted ballots cast only in the proper precinct counted an average of 42% of provisional ballots.<sup>17</sup>

<sup>15</sup> See Table 2 in Appendix 2 for information on the verification method used in each state.

<sup>16</sup> The Election Day Survey found that states using statewide voter registration databases reported a lower incidence of casting provisional ballots than states without voter registration databases, suggesting that better administration of voter registration rolls might be associated with fewer instances where voters would be required to cast a provisional ballot due to a problem with their voter registration.

<sup>17</sup> The Election Day Survey concluded that : "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."

028993

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In experienced states, the disparity was even more pronounced: 52% of provisional ballots cast were counted in states requiring in-district ballots, while 70% were counted in those allowing out-of-precinct ballots.
- If all states had counted out-of-precinct ballots, perhaps 290,000 more provisional ballots would have been counted across the country.<sup>18</sup>
- States that provide a longer the time to evaluate provisional ballots counted a higher proportion of those ballots.<sup>19</sup>
  - Fourteen states permitted less than one week to evaluate provisional ballots, 15 states permitted between one and two weeks, and 14 states permitted greater than two weeks<sup>20</sup>.
  - Those states that permitted less than one week counted an average of 35.4% of their ballots.
  - States that permitted between one and two weeks counted 47.1%.
  - States that permitted more than 2 weeks, counted 60.8% of the provisional ballots cast<sup>21</sup>.
  - The effect of allowing more time for evaluation is felt most strongly in states where more than 1% of the overall turnout was of provisional ballots. In states where provisional ballots were used most heavily, those that permitted less than one week to evaluate ballots counted 58.6% while those that permitted one to two weeks counted 65.0% of ballots, and those states that permitted greater than three weeks verified the highest proportion of provisional ballots, at 73.8%.

## Variation Within States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors beyond statewide factors, such as verification requirements or the time provided for ballot evaluation, also influence the provisional voting process. Reacting to the lack of consistency within states, the Carter-Baker Commission recommended that “states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state.”<sup>22</sup>

Election Line reported that:

---

<sup>18</sup> This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

<sup>19</sup> See Appendix \_\_, Relationship Between Time Allotted to Verify Provisional Ballots and the Level of Ballots that are Verified, David Andersen, The Eagleton Institute of Politics

<sup>20</sup> Many thanks to Ben Shepler, of the Moritz College of Law, for assembling complete data on the time requirements states permitted for the counting of provisional ballots.

<sup>21</sup> 43 states are included in this analysis, including Washington D.C. The 7 election-day registration states are omitted, as is Mississippi, which never provided data on provisional ballots. North Carolina is also omitted from the regressions, as it does not have a statewide policy on how it verifies provisional ballots.

<sup>22</sup> Recommendation 2.3.2 of the Report of the Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” September 2005, p.16. The report also observed that, “. . .different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated.”

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, and inadequately staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important in such districts. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

### **Effectiveness of Provisional Voting**

The certainty of our conclusions about the effectiveness of provisional voting is limited because of the complexity of the problem and a lack of important information. An ideal assessment of how well provisional ballots worked in 2004 would require knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting; their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. Information needed about the eligibility or registration status of provisional voters is also not available.

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were

028994

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know that in 2004 provisional ballots allowed 1.2 million citizens to vote, citizens who would otherwise have been turned away from the polls.

Since we do not know the total number of registered voters who might have voted but could not makes a precise, quantitative estimate of the effectiveness of provisional voting impossible. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the 2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

***Estimates of Votes Lost In 2000 Presidential Election***

<b><i>Votes Lost (Millions)</i></b>	<b><i>Cause</i></b>
1.5 – 2	Faulty equipment and confusing ballots
1.5 – 3	Registration mix-ups
<1	Polling place operations
?	Absentee ballot administration

***Table 1 Cal Tech – MIT Voting Technology Project Estimates***

4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. In 2004, about 1.2 million provisional voters were counted. A rough estimate, then, of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)<sup>23</sup>. Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

## **Legislative Response**

Indeed, several states<sup>24</sup> came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

<sup>23</sup> Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems. After each election the CPS asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or they were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

<sup>24</sup> Twelve states made statutory or regulatory changes: Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Louisiana, Montana, New Mexico, North Carolina, Virginia and Wyoming. See Table 4 in Appendix 2.

028995

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Not enough time to examine and count the provisional ballots. Florida, Indiana, Virginia, and Washington all have clarified or extended the timeline to evaluate the ballots. But taking more time can prove a problem, particularly in presidential elections with the looming deadline to certify the vote for the Electoral College.<sup>25</sup>

Lack of uniform rules for counting ballots and effective training of the election officials in interpreting and applying those rules to determine the validity of ballots. Colorado, New Mexico, North Carolina, and Washington have all passed legislation focused on improving the efficacy and consistency of the voting and counting process.

## Litigation

Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called “wrong precinct issue” – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second –and significantly– the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right –the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to

---

<sup>25</sup> The resources available to evaluate and count provisional ballots within a tight schedule may not be easily available. The General Accounting Office reports that Detroit, where 1,350 provisional ballots were cast and 123 counted, found the 6-day time frame for processing provisional ballots “very challenging and unrealistic. To overcome this challenge, the *entire department’s employees were mobilized to process provisional ballots.*” The report also found that in Los Angeles County, “staff had to prepare duplicate ballots to remove ineligible or invalid contests when voters cast their ballots at the wrong precinct. To overcome this challenge, staffing was increased to prepare the duplicate ballots.” In a close, contested election, “duplicate” ballots would doubtless receive long and careful scrutiny.” See Appendix 7, GAO, “Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote,” September 2005. (GAO Report-05-997)

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted an absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

## RECOMMENDATIONS

Because every provisional ballot counted represents a voter who, if the system had worked perfectly, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use of provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. The statewide voter registration database will facilitate verifying that ballot, but the voter will still have voted provisionally. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

The wide variation in the implementation of provisional voting among and particularly within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting.

### Recommendations for Best Practices

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

### Self-evaluation of Provisional Voting –4 Key Questions

The first need to achieve greater consistency within each state is to think about provisional voting systematically. As legislators, election officials, and citizens in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?
2. Is the provisional voting system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and litigation looms?
3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?

028997

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

If the answers to these questions leave room for doubt about the effectiveness of the system or some of its parts, the EAC's recommendation of best practices should provide the starting point for a state's effort to improve its provisional voting system.

## Best Practices For Each Step In The Process

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention to reduce the inconsistencies noted in our analysis. We offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

### The Importance of Clarity

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots. . . . To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result— well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."<sup>26</sup>

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

- Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards. For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant recanvassing.<sup>27</sup> Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.
- States should provide poll workers standard information resources for the training of poll workers by local jurisdictions. Training materials might include, for example, maps or databases with instruction on how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.<sup>28</sup>

<sup>28</sup> See *Panio v. Sunderland* 824 N.E.2d 488, 490 (NY, 2005) See also Order, *Hawkins v. Blunt*, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even the

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- State training materials provided to local jurisdictions should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.<sup>29</sup> Recent legislation in Arizona indicates that recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll workers may need appropriate training to understand their duty to give such voters a provisional ballot.<sup>30</sup>

## A. Registration and Pre-Election Information for Voters

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, "You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency." <sup>31</sup>
2. The process to re-enfranchise felons should be clear and straightforward. To avoid litigation over the registration status of felons, best practice should be defined as making re-enfranchisement automatic, or no more burdensome than the process required for any new registrant.<sup>32</sup>
3. State or county websites for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

## B. At the Polling Place

---

wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

<sup>29</sup> *Sandusky County Democratic Party v. Blackwell*, 387 F.3d 565, 774 (6<sup>th</sup> Cir. 2004)

<sup>30</sup> *The Florida Democratic Party v. Hood*, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

<sup>31</sup> Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina) they can verify their registration on the website.

<sup>32</sup> The Century Foundation, op. cit.

028999

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display.<sup>33</sup> Many states require training of poll workers. In some states that requirement is recent: after the 2004 election, New Mexico adopted a requirement for poll workers to attend an "election school."<sup>34</sup> A state statutory requirement for training could facilitate uniform instruction of poll workers in those states that do not already provide it.
2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: "Reasons Why Your Provisional Ballot Might Not Be Counted" on one side and "What to Do if My Provisional Ballot Is Not Counted" on the other.
3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk "in the event additional provisional ballots are required . . . to photocopy official provisional ballots."<sup>35</sup> At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%.<sup>36</sup> States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the number of provisional ballots actually cast in recent elections.
4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. All states should examine their chain-of-custody requirements for clarity. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.

## C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. Public recognition of the validity of those criteria is important to establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underlines the importance of clear criteria. As the Century Foundation report put it, "Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation."<sup>37</sup> Nonetheless, the *Panio v. Sutherland*<sup>38</sup> decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is "clerical error" judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted and the individual returning later with identification is, in fact, the same person. Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.<sup>39</sup>
2. More provisional ballots are counted in those states that verify ballots cast outside the correct precinct.<sup>40</sup> While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the

<sup>37</sup> The Century Foundation, op. cit.

<sup>38</sup> 4 N.Y.3d 123, 824 N.E.2d 488 (N.Y. 2005) and Memorandum (LaPlante—Foley) Provisional Ballot Cases by State, July 19, 2005.

<sup>39</sup> In Kansas, the voter can provide ID to a County Election Officer any time before the County Board of Canvassers meets to count provisional ballots. KS. ST. 25-1122(d). ID can be presented in person, OR via mail or electronic means. *Id.* The Board must meet either on the Friday or Monday following a Tuesday election. *Id.* at 25-3104.

Deadlines in other states are: Alabama – 5:00 P.M. on the Monday following the election AL ST § 17-10A-2(c)(1) Florida: until 5:00 P.M. on the third day following the election . Fla. Stat. Ann. § 101.048 (adopted after the 2004 election); Georgia—no later than 2 days after the election. GA ST § 21-2-417; 419. Illinois- 2 days to submit additional information 10 Ill. Comp. Stat. Ann. 5/18A-15(d); Indiana— in 2004 the deadline was the close of the polls IN. ST. §. 3-11.7-5-2(a). The time period was extended to 13 days by the adoption of Indiana Code 3-11-8, Section 25, Subsection (l); Maryland—until the meeting of the Election Board; MD ELEC LAW § 11-303. New Jersey— until the close of business on the second day after the election 19:53C-3(i). Nevada— until 5:00 P.M. on the Friday following the election NV ST 293.3085; New Mexico—until 7:00 P.M. on Election Day NM ADC 1.10.22 (8) (H).

<sup>40</sup> See Andersen, op. cit, pgs. 23 – 24 for an analysis of the significant effect of counting out-of-precinct ballots. The Election Day Survey found that, "Most notably, jurisdictions that permitted jurisdiction-wide acceptance of provisional ballots reported higher rates of provisional ballots being cast, but also reported a much higher incidence of provisional ballots being counted, than other jurisdictions."

029001

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence. One option for states is to involve the voters in the decision by pointing out that voters who cast their provisional ballots in the wrong precinct may not be able to participate in the local election. The voter could then decide to go to the correct precinct or vote provisionally for the higher offices at the top of the ticket only.

3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location.<sup>41</sup> Ideally the voter could be directed to the correct machine, but poll worker advice will not always be correct. One way to assess the balance of issues here is to consider that, if a voter in a multi-precinct polling place is sent to the wrong machine, the error is probably the poll worker's, and the voter should not be penalized.
4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box "unregistered voter"; "lack of signature match" "wrong precinct," etc.) Those forms should be disclosed publicly when completed. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.<sup>42</sup>

### Colorado Rejection Codes (Any ballot given a rejection code shall not be counted):

RFS	(Rejection federal or state) No federal or state candidates or issues to duplicate.
RNS	(Rejection not signed) Provisional Ballot Affidavit not signed.
RIN	(Rejection incomplete information provided) Required information is incomplete and the designated election official is unable to confirm voter's eligibility.
RNR	(Rejection not registered) Voter did not register by the voter registration deadline or by emergency registration, Colorado voter registration record was not found, or voter was previously cancelled and has not been reinstated pursuant to 1-2-605(10). C.R.S.
REE	(Rejection envelope empty) Provisional ballot envelope is empty.
RAB	(Rejection voter voted absentee) Designated election official has confirmed that voter voted an absentee ballot.
REV	(Rejection based on ballot cast in early voting) Voter voted early.
RIP	(Rejection based on incorrect party) Incorrect Party in Primary Election.
RFE	(Rejection felon not eligible to vote) Individual was convicted of a felony and is either serving a sentence of confinement or detention or is on parole.
RWC	(Rejection elector not registered in county or State of Colorado) Non-county or non-state resident; therefore voter not eligible to vote in the county where the provisional ballot was voted.
RID	(Rejection first time voter has not supplied identification upon registration or thereafter prior to and during time voter voted) First Time Voter who

<sup>41</sup> Chances are administrative error accounts for the voter being directed to the wrong precinct under these circumstances.

<sup>42</sup> 8 CCR 1505-1, at 26.5.4, adopted August 4, 2005. See also 1-2-509(3) C.R.S.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

registered by mail or through a voter registration drive, is tagged as id deficient, and did not provide id at the time of voting.

RRD (Rejection registration deficient) Voter had deficient or incomplete registration and required information was not provided prior to or at the time of filling in the provisional ballot envelope. Voter's eligibility cannot be established.

### **D. Verification of Provisional Ballots**

1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections
2. In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. States should consider in particular how to divide the time allowed them by the safe-harbor provisions that apply in presidential elections to the certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The prudent course here would be to encourage states to consider the issue and then make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

### **E. Post-election Information for Voters**

Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### **F. State Laws Governing Litigation over Provisional Voting**

1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot

### **Broader Considerations**

#### **G. Integrity and the Appearance of Integrity**

1. State laws or regulations providing for non-partisan or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.

029003

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.
3. State laws or regulation should require the evaluation process for provisional ballots to be public, while protecting the names of those who voted provisionally.

## H. Continuous Assessment of the Provisional Ballot -- Process and Performance

Defining what makes for a successful provisional voting system is difficult. The most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed.

Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations or processes, such as Six Sigma<sup>43</sup> or the Baldrige Quality process<sup>44</sup> to evaluate the provisional ballot process. Pending such a review, the EAC can recommend that states take the following actions.

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.
2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:
  - Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (lack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.
  - Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.
  - Measures of variance among jurisdictions.
  - Number of poll workers trained in administration of provisional voting by polling place
  - Number of jurisdictions posting information on provisional voting in the polling place
  - Time required to evaluate ballots by jurisdiction

---

<sup>43</sup> Six Sigma is a measure of quality that strives for near perfection. Six Sigma is a disciplined, data-driven approach and methodology for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process -- from manufacturing to transactional and from product to service.

<sup>44</sup> The Baldrige Criteria for Performance Excellence provide a systems perspective for understanding performance management. They reflect validated, leading-edge management practices against which an organization can measure itself. With their acceptance nationally and internationally as the model for performance excellence, the Criteria represent a common language for communication among organizations for sharing best practices. The Criteria are also the basis for the Malcolm Baldrige National Quality Award process.

029004

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.

## ATTACHMENT 1 – Data Sources for Classification of the States

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The variables used to analyze a state's use of provisional ballots:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and included it in our analysis.

### New vs. Old States

We classified states as "new" or "old" based on the 2001 Electionline study of provisional voting,<sup>45</sup> but condensed its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We included in the list of "Old States" all states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots. States in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as "new" states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they

---

<sup>45</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Provisional%20Voting.pdf>.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline's map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct's list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter's name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island's first use of provisional voting was in 2004 and, therefore, classified the state as "new" to the system of provisional balloting.

<b>Table 1 CATEGORIZATION OF STATES -- Old and New</b>		
<b>Old States</b>	<b>New States</b>	<b>HAVA Exempt or NA</b>
Alaska	Connecticut	Idaho
Alabama	Delaware	Maine

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>46</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found it had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

## Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as "out-of-precinct." States that invalidated such ballots were categorized as "In-precinct only."

<b>Out-of-Precinct</b>	<b>In-Precinct Only</b>	<b>HAVA EXEMPT OR NA</b>
Alaska	Alabama	Idaho
Arkansas	Arizona	Maine
California	Colorado	Mississippi
Delaware	Connecticut	New Hampshire
Georgia	District of Columbia	North Dakota
Illinois <sup>47</sup>	Florida	Wisconsin
Kansas	Hawaii	Wyoming
Louisiana	Indiana	
Maryland	Iowa	
New Mexico	Kentucky	
North Carolina	Massachusetts	
Oregon	Michigan	
Pennsylvania	Missouri	
Rhode Island	Montana	
Utah	Nebraska	
Vermont	Nevada	
Washington	New Jersey	
	New York	
	Ohio	
	Oklahoma	
	South Carolina	
	South Dakota	
	Tennessee	
	Texas	
	Virginia	
	West Virginia	
<b>17</b>	<b>26</b>	<b>7</b>

<sup>46</sup> "Election Preview 2004: What's changed, What Hasn't and Why". This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

<sup>47</sup> In Illinois, it is not clear that all counties followed this procedure. Some counties may not have counted out-of-precinct ballots.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

<b>Signature Match</b>	<b>Data Match</b>	<b>Affidavit</b>	<b>Return with ID</b>	<b>NA</b>
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire
	Louisiana	Kentucky	Montana	N. Carolina
	Missouri	Massachusetts	New Jersey	N. Dakota
	Ohio	Nebraska	New Mexico	Wisconsin
	Oklahoma	Nevada	Texas	Wyoming
	Pennsylvania	New York	Utah	
	Rhode Island	South Dakota		
	S. Carolina	Tennessee		
	Washington	Vermont		
	West Virginia	Virginia		
4	14	14	10	9

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## Data Collection

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

<b>Table 4</b>	
<b>Updated information by State</b>	
<b>Received Updated Data</b>	<b>Did Not Receive Updated Data</b>
California	Alabama
District of Columbia	Alaska <sup>48</sup>
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland <sup>49</sup>	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska <sup>50</sup>	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
<b>26 States</b>	<b>25 States</b>

<sup>48</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>49</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>50</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

029010

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## Data Differences

The data used in this study differ from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

<b>State</b>	<b>EDS Numbers Cast/Counted</b>	<b>Our Numbers Cast/Counted</b>	<b>Differences</b>	<b>Updated Info from State?<sup>51</sup></b>
Alabama	6,478/1,865	6560/1836	82/29	No
Alaska	23,285/22,498	23,275/22,498	10/0	No
Colorado	51,529/39,086	51,477/39,163	52/77	No
Georgia	12,893/4,489	12,893/3,839	0/650	No
Hawaii	346/25	348/25	2/0	Yes
Iowa	15,406/8,038	15,454/8,048	48/10	Yes
Kansas	45,535/32,079	45,563/31,805	28/274	Yes
Montana	688/378	653/357	35/21	Yes
Nebraska	17,421/13,788	17,003/13,298	418/490	Yes
Nevada	6,153/2,446	6,154/2,447	1/1	Yes
New Mexico	6,410/2,914	15,360/8,767	8,950/5,853	Yes
N. Carolina	77,469/50,370	77,469/42,348	0/8,022	No
Ohio	157,714/123,902	158,642/123,548	928/354	Yes
Pennsylvania	No data	53,698/26,092	53,698/26,092	Yes
Texas	35,282/7,156	36,193/7,770	911/614	Yes
Vermont	121/30	101/37	20/7	No
Virginia	4,608/728	4,609/728	1/0	Yes
Washington	92,402/73,806	86,239/69,273	6,163/4,533	Yes
Wisconsin	374/119	373/120	1/1	No

<sup>51</sup> Data not provided by the state itself is taken from Electionline figures.

Tom-

As was just discussed, the EAC's Commissioners have elected to delay a presentation of Eagleton's report on Voter Identification to the EAC Board of Advisors and Standards Board, at this time.

The Commissioners will spend time over the next several weeks reviewing and considering this report in great detail and will make a determination, shortly thereafter, regarding how they wish to proceed with the issuance of an EAC report on this study.

Many thanks to you and your staff for the work that has been done. We look forward to next week's presentation of the Eagleton/Moritz study of provisional voting.

Regards-

Subject REMINDER: Congressman Jackson's show, 5/22, 2pm

Theresa:

Questions/Issues: (Sorry they're a little late)

There have been concerns about both machine failure and pollworker training in the recent primary in Chicago-- what is the EAC doing to focus on these concerns, and how do you believe local election officials are meeting the challenge, and what can ordinary citizens do to assist the process.

What can voters do best to protect their right to vote on election day? What should they bring with them and what information should they know?

(There is, of course the voter identification issues that have been debated on the country with conservatives largely concerned about voting fraud, and liberals largely concerned about voter access. Can you comment on this debate?)

I've heard about a new requirement for provisional voting? What does this mean, and if I'm a voter, and told I can't vote, how do I cast a provisional vote?

You recently authored a New York Times opinion piece (along with Fair Vote President John Anderson) recommending that all high school graduates be registered to vote (to be effective on their 18th birthday). What do you think can be done with that recommendation in the states, and why did you come to that opinion.

You were recently in Ohio to observe the federal primary. Do you see different issues in different states, or are the problems based on the technology used or procedures promulgated?

## Tuesday, August 15, 2006

**10:15 am - 5:15 pm Redistricting & Elections Committee**

### ***Supremes Rule on Re-Redistricting of Texas***

10:15 am - 11:30 am

Three years after the highly publicized redrawing of Texas congressional districts, the U.S. Supreme Court ruled in June on whether the Legislature acted unconstitutionally. How will the decision alter the redistricting process? What subtle, but critical, lines were buried in the text of the opinions?

### ***Legislative Competition and the role of Gerrymandering?***

11:30 am - 12:45 pm

Are legislative elections really less competitive today than in the past? Is gerrymandering the culprit or one of many reasons. New research helps put the redistricting factor in perspective.

### ***Are Voters Who they Say they Are?***

1:00 pm - 2:00 pm

Many states continue to look at the issue of voter ID and struggle with balancing the need for maximum access to the polls with trying to eliminate any possible fraud. How big is this problem and what are states doing about it?

### ***Will Fall Elections Run like Clockwork?***

2:00 pm - 3:00 pm

Since the controversial 2000 election debacle, most states have implemented key election reforms to shore up the system and respond to federal legislation. Will this fall's 2006 election go off without a hitch or will new problems emerge in the voting process?

### ***What's Next in Redistricting Technology***

3:15 pm - 4:15 pm

Redistricting software vendors will preview and demonstrate what they are planning for 2010. They will be discuss things like the next generation of redistricting technology with support for desktop, Web based and PDA/Cellular applications.

### ***Countdown to Census 2010***

4:15 pm - 5:15 pm

Speakers: Linda Franz, Geographer, U.S. Census Bureau, Washington, D.C.  
Bob LaMacchia, Chief, Geography Division, U.S. Census Bureau, Washington, D.C.  
Cathy McCully, Chief, Census Redistricting Data Office, U.S. Census Bureau, Washington,

Adam, Craig thought you were looking for a list of federal statutes, which are discussed in our election fraud manual. We don't have lists of state election crimes. Craig suggests that you contact Peggy Sims at the EAC - she's a wonderful resource, and I'm including her in my reply. Good luck.

Nancy

**Subject:** Martinez ELJ Submission

Prof. Hasen, Lowenstein, and Tokaji:

Attached please find the submission of the Martinez Submission to the Election Law Journal's Mortiz Edition.

We apologize for turning in this paper late; we have unfortunately been occupied with a series of fast-moving election administration events (largely beyond our control). That said, we believe this to be a strong, well researched piece that makes an important statement, and are proud to submit it for consideration.

We are, of course, open to any edits that you may have to this papers, and as to structure, or footnoting improvements. I will provide your staff with any items that you may need to keep "on file" that are not readily available in the public for the cited material. I have taken the opportunity to do a generic law review style format, but you can obviously alter that as per ELJ's specifications. I have limited the "short cite" format-- because the piece isn't terribly long, but I have attempted to follow the Bluebook as much as possible.

Again, I know that Commissioner Martinez truly appreciates the opportunity to write for the ELJ, and the encouragement that you all have provided him to get this piece done. We welcome your comments, and will be happy to work with you on further improving this piece.

Very truly yours,  
Adam Ambrogi

**1S-2.025 Voter Fraud Complaints.**

(1) The Division of Elections is charged with maintaining a voter fraud hotline, pursuant to Section 97.012(12), F.S. Any person that contacts the voter fraud hotline will be asked if he wishes to file a complaint alleging voter fraud. For purposes of this rule, "voter fraud" means intentional misrepresentation, trickery, deceit, or deception, arising out of or in connection with voter registration or voting, and the prescribed offenses set forth in Chapter 104, F.S. "Voter fraud" does not include violations of Chapter 106, F.S.

(2) A person acts "intentionally" if he knew or reasonably should have known that the act in question constitutes voter fraud and is prohibited by Chapter 104, F.S.

(3) Any person alleging voter fraud may file a written complaint with the Division using Form DS-DE 34, titled "Complaint, Voter Registration or Voting" (Eff. 9/98), which is hereby incorporated by reference and available from the Division at Room 316, R.A. Gray Building, 500 South Bronough Street, Tallahassee, Florida 32399-0250. To be legally sufficient, a complaint must:

(a) Allege an act or acts of voter fraud as defined in subsection (1) above; and

(b) Contain allegations that have been stated with particularity. Mere recitation of statutory language, vague generalizations, absence of specific facts, or hearsay will not support a legally sufficient complaint.

(4) If the Division determines that the complaint is legally sufficient, it shall forward the complaint to the Florida Department of Law Enforcement for further investigation. Otherwise, the Division shall dismiss the complaint for legal deficiency.

*Specific Authority 106.22(9) FS. Law Implemented 97.012(12), 106.22(11) FS. History—New 9-21-98.*

# **Florida Voter Fraud Issues**

## **An FDLE Report And Observations**

### **January 5, 1998**

---

#### **Overview:**

With the passage of the 1993 National Motor Voter Law followed by Florida's own implementation legislation (Chapter 94-224, Laws of Florida) to comply with the National Motor Voter Law, the process by which one may register to vote or update one's registration has been greatly simplified. Unfortunately, the simplifications implemented also make it easier for possible fraud since once one is registered, the Motor Voter Laws also made absentee ballots available for any reason. The nation and this state must now reconcile the clash between the philosophy of the Motor Voter laws in promoting virtually "no questions asked" voter registration and voting, with the significant potential for fraud and corruption such a system has promoted.

The Department of Law Enforcement is not charged with principal responsibility to monitor Florida election issues, and does not hold itself out to be the expert agency on election law issues. The Department has, in the past several years, been called upon several times to conduct criminal investigations of specific allegations of election fraud or other misconduct, and has noted basic "trends" in election fraud both within Florida and across the nation.

The following is offered by FDLE to prompt debate and consideration of the issue whether, based on the nation's and Florida's experience since 1993, more protections to help prevent fraud are needed in our election laws. Recognizing that Florida's options may be somewhat restricted by the national law's requirement, and concerns about avoiding a "dual registration system" in which certain standards apply for state elections while others apply for federal elections, FDLE suggests that more registration and absentee ballot integrity protections are required if Florida voter fraud is to be reduced.

#### **The Basic Types Of Fraud Encountered:**

FDLE's experience in recent years, including cases predating the 1993 and 1994 "Motor Voter" changes, suggests the areas that are "ripe" for potential fraud fall primarily into these categories:

- **Voter Registration Fraud:** – Minimal identification and citizenship proof requirements provide ample opportunity for voter registration fraud. This includes specialized "changes of address" done solely to allow a vote in a particular election, when in fact, no actual change of address has occurred.
- **Absentee Ballot Fraud:** – The desire to facilitate the opportunity for each person to vote has resulted in increased opportunity to use absentee ballots improperly. (Once one has registered fraudulently, he or she can obtain an absentee ballot for every election thereafter if he or she wishes. The lack of "in-person, at-the-polls" accountability makes absentee ballots the "tool of choice" for those inclined to commit voter fraud.)
- **Illegally or Improperly "Assisting" Others To Vote Their Absentee Ballot:** – Those inclined to do so can capitalize on others' access to an absentee ballot by voting their ballot for them, often with the actual voter not knowing what has occurred. This offers tremendous opportunity for vote fraud, particularly to those who have access to the ill or infirm or those who do not have the ability to resist the influence of another as they are urged to vote in a "required" manner. It also encourages those inclined to commit voter fraud to seek to utilize absentee ballots provided to those whose interest in voting is marginal or non-existent.
- **Vote-Buying:** - Securing votes by payment or other "rewards" or the "selling of one's vote"– is an age-old problem that still exists.

This report does not address campaign financing concerns. The Florida Legislature through CS/HB 461, 281 and 75 (Chapter 97-13, Laws of Florida), implemented several campaign finance reforms. These reforms were a step in the right direction, and while more campaign finance reform may be desirable, the focus of this report is on voter fraud concerns. 1

We are not alone in experiencing voter fraud problems. The State of California has been dealing with similar issues, as has the State of Georgia, among other states. Some of the potential responses under consideration in those states will be identified for consideration of whether they should be implemented in Florida.

**A Realization—Voter Fraud Has Greater Impact On Local Elections But It Affects The Integrity Of Our Democracy In All Elections.**

The impact of fraud on elections is more often and most significantly felt in local elections. It is in municipal or county elections that the difference of a relatively small number of ballots can change the election results. It is in such elections that anyone prone to committing fraud can anticipate that the fraudulent activity may pay off with his or her candidate of choice being elected by reason of the activity. However, many national elections or statewide elections have been settled by a relatively small vote margin. If the options for fraud are not adequately preempted by criminal sanctions, greater voter registration integrity efforts, or other steps, the public's confidence in the integrity of our free election system could be lost. Few issues strike so closely to the heart of our democracy as does the issue of maintaining fair and legitimate elections.

In a 1975 case involving an election whose outcome hinged on the validity of absentee ballots, the Florida Supreme Court discussed the basic issues of preserving the sanctity of the ballot and the integrity of our elections process. The Court's discussion remains as timely as ever. In Boardman v. Esteva, 323 So.2d 259 (1975) the Court included at page 269 of its opinion a review of the essentials necessary to maintain a valid election:

**In summary, we hold that the primary consideration in an election contest is whether the will of the people has been effected. In determining the effect of irregularities on the validity of the absentee ballots cast, the following factors shall be considered:**

- (a) the presence or absence of fraud, gross negligence, or intentional wrong doing;**
- (b) whether there has been substantial compliance with the essential requirements of the absentee voting law; and**
- (c) whether the irregularities complained of adversely affect the sanctity of the ballot and the integrity of the election.**

**The underlying concern of the election officials in making the initial determination as to the validity of the absentee ballots is whether they were cast by qualified registered voters, who were entitled to vote absentee and did so in a proper manner.**  
(Emphasis added.)

Indeed, the essential responsibility in Florida elections is to assure that ballots are cast by qualified registered voters, who were entitled to vote, and who have done so in a proper manner. With the continued movement toward more relaxed voting standards and methods, it is important that Florida also realistically addresses the potential for fraud in a manner that assures this responsibility is met.

**FDLE's Historical Perspective—A Brief Review of Cases of Interest**

**MIAMI, November, 1997, Mayoral Elections.** This case is still active and details of the investigation cannot be revealed. However, the basic allegations of

election misconduct are known and can be generally discussed. The primary allegation is that absentee ballots were being made available for sale and that absentee ballots were being purchased by person(s) supporting one or more candidates in the election. By reason of the investigation into the specific allegations that surfaced, FDLE determined there appeared to be widespread absentee ballot voter fraud in the City elections.

The types of absentee ballot voter fraud alleged to have occurred include:

- **Someone voting on behalf of someone else.**
- **The purchasing or selling of absentee ballots or another's vote.**
- **Non-City of Miami residents voting.**
- **Changing of ballots.**
- **False statements or information being provided with regard to address information or changes of addresses on voter registrations.**
- **Possible use of certain addresses within the City limits as the "new address" for persons not residing within the City; done with the apparent sole purpose of permitting voting in the municipal election.**
- **Voting by absentee ballots under the name of deceased persons.**
- **Voting in the election by non-U.S. citizens.**

The allegations currently under investigation could constitute criminal violations, including, but not necessarily limited to, these violations of Chapter 104:

- **False swearing; submission of false voter registration information (a 3<sup>rd</sup> Degree felony; F.S. 104.11);**
- **Changing an elector's ballot (a 3<sup>rd</sup> Degree felony, F.S. 104.021);**
- **Fraud in connection with casting of a vote (a 3<sup>rd</sup> Degree felony, F.S. 104.041);**
- **Corruptly influencing voting (a 1<sup>st</sup> Degree felony, F.S. 104.061);**
- **Voting a fraudulent ballot (a 3<sup>rd</sup> Degree felony, F.S. 104.16);**
- **Perjury-related violations (1<sup>st</sup> Degree misdemeanor, F.S. 837.012)**

While not engaged in the criminal investigation, the Dade County Grand Jury is reviewing the matter with an intent to recommend improvements in the local elections process. A challenge seeking to overturn the recent election is pending in court in Miami. After the fact that the Miami election was under investigation became known, similar allegations regarding other elections held in Dade County have been received by FDLE and are under review. Two arrests have been made in the subject investigation, with further arrests anticipated.

**HIALEAH 1993 November Mayoral Elections:** Allegations were made regarding the use of absentee ballots which were cast during the 1993 runoff election, and with regard to particular campaign workers who witnessed the ballots. The basic misconduct alleged was that campaign workers were witnessing ballots that were not completed in their presence, and that campaign workers were completing ballots or causing ballots to be completed without the actual voter's knowledge or assent for the vote as cast. The matter was reviewed by the Dade State Attorney's Office, which obtained a transfer to the Palm Beach State Attorney's Office pursuant to an Executive Order of the Governor on the

029037

basis of a conflict by reason of a personal relationship between one of the subjects of the allegation and the State Attorney. The matter was also reviewed by the U.S. Attorney's Office.

No criminal charges were filed, but the election was invalidated by a civil court. A final report issued on September 30, 1996, by the Palm Beach State Attorney's Office included in its summary this finding:

**The decision not to file charges should not be considered as an endorsement of the conduct of this election. However, it is not within the jurisdiction of this office to condemn the actions of campaign workers who may have engaged in unethical conduct. We leave for others to determine whether this is conduct that we want to condone in our society. Until such time as the legislature addresses the inadequacies of the present legislative authority, the State is not authorized to address this matter in criminal court....**

**DAYTONA BEACH 1993 Commission Election:** FDLE's investigation established grounds to believe that campaign supporters obtained a number of absentee ballots and solicited votes prior to election day. The investigation led FDLE to believe that the candidate himself distributed the ballots, influenced the marking of ballots and obtained signatures of persons as witnesses who did not actually witness the elector's casting and signing of his or her absentee ballot. Some ballots were witnessed only by one witness. A Volusia County Grand Jury heard the case and issued a Presentment, while not indicting any persons involved. The Grand Jury expressed concerns that conduct such as the witness irregularities, the number of absentee ballots outstanding, the direct handling of such ballots by a candidate and his campaign workers, were not more specifically prohibited by Florida law.

**HARDEE COUNTY 1992 Sheriff's Election:** FDLE's investigation established grounds to believe that three campaign supporters obtained a quantity of absentee ballots on behalf of their candidate and subsequently solicited votes prior to the election. A number of these ballots were found to contain irregularities involving the witnessing. In some cases, the actual vote (via a punch out ballot) was completed by the campaign supporter. A Hardee County Grand Jury reviewed the case that no criminal intent was involved. A new election was ordered, however.

**DIXIE COUNTY 1992 Sheriff's Election:** FDLE's investigated allegations that a campaign supporter obtained a number of absentee ballots and then took them to sick and elderly throughout the county and "assisted" them in voting. During the process they were encouraged to vote for a specific candidate. The worker then allegedly took the ballots and later had them falsely witnessed. No compensation for the "votes" was made. No one was arrested in this matter.

**BAKER COUNTY 1990 School Board Election:** One arrest and conviction resulted from this investigation which demonstrated that a campaign supporter

recruited and transported voters to the County Courthouse where they obtained an absentee ballot to be marked in accordance with the worker's directions. In return, each such voter was paid \$10 by the campaign supporter.

**DIXIE COUNTY 1988 Supervisor of Elections Election:** One arrest and conviction in federal court resulted from this investigation. The investigation established that the Supervisor of Elections, herself a candidate, gave groups of absentee ballots to selected supporters. These were taken to poor and infirm voters where, in exchange for \$10 to \$20, the voters' votes were secured. The absentee ballots were witnessed by campaign workers and then returned to the candidate, the Supervisor of Elections.

**LAFAYETTE COUNTY 1984 County Commission Election:** Five arrests and convictions in federal court resulted from this vote-buying investigation. The supporter of a candidate secured a large number of absentee ballots and took them to the poorer sections of the county. For a payment of \$25 to \$35 and a bottle of whiskey, supplied by the candidate, a voter's vote was "bought." The voter completed the absentee ballot, and the candidate's worker would have the ballots falsely witnessed later prior to return to the Supervisor of Elections.

***Observations and Concerns Derived From FDLE's Investigations***

- **The absentee ballot is the "tool of choice" for those who are engaging in election fraud.**

The absentee ballot's very nature makes it the mechanism to use when trying to capitalize on a voter's infirmities or desire to make some quick money. Both federal and Florida law make absentee ballots available to anyone who seeks them, with no requirement of "justification" for not appearing in person at the polls. Given this easy access to absentee ballots, the "tool of choice" will remain popular among those who corrupt the elections process.

- **The absentee ballot's integrity is only as good as the weakest link in the voter registration process, and the voter registration process is extremely open to fraud and abuse.**

Once registered to vote, any person may request and utilize an absentee ballot without ever having to appear in person to vote. If the voter registration process does not require significant proof of citizenship, address, and identity, then those inclined to commit fraud will capitalize on the process by successfully registering those who have no right to vote, and then "facilitate" their (illegal) vote by absentee ballot.

- **Voter registration and absentee ballot fraud can be expected to increase unless steps are taken to stop it.**

Voter registration fraud is occurring throughout the nation. The National Center For Policy Analysis' "Policy Digest" for December 1996-February 1997 related that multi-state voting, fake registrations, and repeat voting by an individual in the same election are becoming problems. It reports that in Chicago, 150,000 voters registered more than once, with 90,000 registering three or more times. Thousands of mentally handicapped voters were assisted in registering in Illinois. In reality, it appears that Florida's ability to maintain the integrity of its voter registration rolls may be no better than Illinois'. If this is the case, then perhaps Florida should review how truly effective its current efforts at maintaining voter registration integrity are, and consider options such as specialized audits of registration rolls or other efforts to avoid problems like those encountered in Chicago. While the national Motor Voter Law may restrict the state's ability to "cull" its voter registration rolls to the extent the rolls once were reviewed and updated, focused efforts to assure integrity may still be done.

- **The elderly are often exploited by others to commit absentee ballot fraud.**

It appears that the elderly voter or elderly witness to another's absentee ballot are often targeted for use in fraud schemes, perhaps because some of these voters may be easily manipulated or influenced by those in whom they have previously placed their trust. Such persons might be a condominium association representative, a community "leader," or even just a stranger who approaches an elderly person with an absentee ballot in hand.

- **Those fighting fraud should utilize the sense of community identity and pride to make citizens more aware of how they can help prevent voter fraud.**

Many Floridians may not be aware of how their timely report of suspected wrongdoing could facilitate the discovery of voter fraud before it occurs or as it is occurring. Such timely reporting could stop problems before they grow to the point that an entire election's integrity is questioned. A greater emphasis on promoting a "zero tolerance" to voter fraud in all of Florida is needed, with an appeal to each voter's sense of community and civic pride as a means of motivating citizen interest in assisting in the state's anti-fraud efforts. An explanation of why a zero tolerance is so important could help citizens understand their responsibilities in fighting fraud.

- **Under current law, there is little effective review of what is claimed on one's registration form.**

Relatively easy change-of-address procedures, implemented by the motor voter laws, makes it easy to "move" into an election zone for the express purpose of voting in a particular local election, with little or no scrutiny of whether the "move" is truly legitimate or not. Indeed, the recent changes in the registration

requirements have eliminated virtually any ability by Supervisors of Elections to independently verify whether the information provided on a registration form is in fact, accurate.

- **Additional steps to prevent absentee ballot fraud are needed.**

In 1996, Florida made numerous revisions to Chapter 101, attempting to address absentee ballot fraud and related issues. A limit of no more than two absentee ballots per election may be secured by a third party other than a member of one's immediate family. F.S. 101.62(4)(b). However, under F.S. 101.62(1), a person may request, with no verification, in person, by phone or by mail a personal absentee ballot. Under F.S. 101.64, the requirement that an absentee ballot be witnessed by a notary or two separate witnesses has been eliminated. Now, only one witness need to sign an absentee ballot. With no more scrutiny or justification for such a ballot than is provided by current law, easy access to absentee ballots remains a reality in Florida. Any person may pick up the phone and request an absentee ballot, no questions asked. Unfortunately, any person inclined to use that ballot fraudulently, may now do so with less fear of becoming known than in the past when tighter standards were applied.

- **Florida's present registration and absentee ballot procedures lack safeguards that could help prevent fraud.**

To a great extent, Florida's absentee voting and voter registration is based on a "trust me" level of scrutiny. While the goal of incorporating more voters into the process is laudatory, perhaps we have begun to see that the "Motor Voter" approach is in need of returning some "common sense" safeguards to the registration and absentee ballot process. Those inclined to defraud the process are capitalizing on the philosophy of "easy registration and easy voting" under our current laws. It makes good sense that safeguards be implemented that recognize the potential for fraudulent exploitation of the elections process. If a ballot is only as good as the weakest link in the registration process, then should not Florida seek to better regulate, monitor, audit and investigate its voter registration process?

- **Florida requires little verification of registration information.**

Florida currently does not require a voter registrant to provide a Social Security number or Florida Driver's License number. In fact, in 1997, Florida dropped the requirement that a registrant provide gender, race or ethnicity information when registering. When registering, Florida requires merely an "indication" that the registrant is a U.S. Citizen, is not a convicted felon, or is not adjudicated mentally incapacitated. While submitting a false voter registration application is a third degree felony (as of 1/1/98), the current trend to require little if any verifying information at the time one registers makes effective auditing, review, or investigative follow-up virtually useless to pursue. (Florida law *allows* the

applicant to volunteer the information, but does not *require* that it be provided as a requisite for registration.) *In reality, Florida has implemented a standard that is in essence little more than "trust me at my word alone" in registering to vote.*

- **Non-Citizens registering to vote and voting is a national problem, and has been alleged to have occurred in Florida.**

The FBI and the U.S. Attorneys office in Dallas are examining whether non-U.S. citizens are on Dallas County's roll of registered voters, according to an Associated Press article by Michelle Mittelstadt, dated 9/19/97. The article reports that the investigation has been slowed because INS officials in Washington are refusing to cooperate with investigators. U.S. Attorney Michael Uhl sought INS assistance by comparing the computerized tape containing the names of those who voted in the Dallas County November, 1996 and May, 1997 elections against INS' computerized records to determine if voting by foreigners occurred. Assuming that cooperation between the INS and the U.S. Attorney's office can be restored, the results of Dallas' inquiry are worth watching.

Non-U.S. citizens have registered, and have been found to have voted in other states. *Florida could be experiencing the same problem. (Non-citizen voting is one of the several allegations currently under investigation in regard to the Miami mayoral election.)* The federal Illegal Immigration Reform and Immigrant Responsibility Act (Title 18 U.S. Code, Section 611) makes it a federal crime for noncitizens to vote in federal elections, with maximum penalties of deportation or imprisonment. Likewise, Florida requires its registered voters to be United States citizens (F.S. 97.041) and criminalizes making a false voter registration (F.S. 104.011—a 3<sup>rd</sup> degree felony as of 1/1/98) but unless Florida (and other states) have a way to truly verify a registrant's eligibility with something more than the basic "trust me at what I've said" level of accountability, state and local officials can do little to stop the potential registration (and subsequent voting) fraud. In addressing this concern, Florida should consider requiring documented proof of one's citizenship when registering to vote.

- **Florida should consider capitalizing on its coming "centralized statewide voter file," by implementing significant additional safeguards.**

Florida has moved toward implementing a centralized statewide voter file. It is to be established and run by the Division of Elections as implemented under Chapter 97-13, Laws of Florida, which became effective 1/1/98. If, and when, all of Florida's voter registration records could be centrally housed in this file, then any polling place or registration processing site could maintain on-line access the central file to determine whether a person has already voted in a particular election or whether the person is registered to vote in more than one jurisdiction. If sufficient identifying information were available in the voter file, the file could be "run" against other state and federal databases to determine whether deceased

persons, convicted felons, or others appear to have been inappropriately maintained on the state's voter registration rolls. If sufficient identifying information were available in the voter file, routine audits of registration rolls could be performed to help identify areas of potential fraud concern.

However, since Florida's registration requirements do not include essential verifying information such as a Social Security Number, Florida Driver's License number, proof of becoming a naturalized U.S. citizen, or even race, gender, or ethnicity, the ability of any reviewer to truly determine one's identity in the voter file will be severely hampered, if not completely defeated. Consequently, if the voter file is to reach its full potential for fighting fraud, a requirement of significant registration verification information must be returned to Florida's voter registration procedures.

- **At-the-poll identity verification standards should be reviewed to determine if enhancement is warranted.**

Actual false impersonation at the polls continues to occur regularly, although use of absentee ballots appears to be the preferred method of committing fraud. While false impersonation is a felony, being able to prove the conduct is difficult. A poll worker's ability to recognize the person who showed up and voted under another's name is severely compromised by the sheer number of faces that poll worker will encounter on election day. Making a crucial identification of a perpetrator is a task that would tax virtually any person's memory or ability to recall. Poll workers are not experts at handwriting analyses, and most will confess that if a signature on a poll registry resembles the signature on a voter registration card or other signed identification, the presumption is that the person is in fact who he or she purports to be. There is no method of conducting even a cursory follow-up check on persons suspected by a poll worker.

Some system of identity verification should be warranted. When we seek to utilize a credit card, we may be asked a crucial piece of information normally known only to a few people, such as our mother's maiden name. Yet no such "identity check" verification option is included in our elections process. Poll workers have no "confidential" verification information upon which to rely when they suspect someone is not who he or she claims to be. Some sort of readily usable "verification" of identity information would greatly reduce the chances of one successfully voting under a false identity. Perhaps some sort of enhanced identity verification information could be incorporated in Florida's voter registration process.

**Other states' voter fraud responses and experiences.**

**California** has encountered similar problems. Their frustration with the present system appears to have reached a degree of crisis greater than Florida has expected to date. Among California's proposed or implemented responses are:

- **"Zero tolerance to voter fraud."** Bill Jones, Secretary of State in California has established a goal of "100 percent participation by all eligible California voters with a tough zero tolerance policy for fraud." <sup>2</sup>
  - **"Voter Fraud Hotline" and "Handbook."** As part of California's anti-voter fraud efforts, a statewide Voter Fraud Hotline (1-800-345-VOTE) has been established to allow any person to report any witnessed suspected election fraud or campaign abuses. The Secretary of State's Office in California has printed a small, pocket sized, "Voter Fraud Prevention Handbook" that briefly describes the requirements under law for registering to vote, voting at a poll, voting by absentee ballot, and "campaign do's and don'ts." <sup>3</sup> Included in the book's responses regarding "Absentee Ballots" is this advice: "...your vote is secret and you should not let anyone handle your ballot in any way...Pay close attention to deadlines, and under no circumstances permit any campaign workers to handle your ballot or fill in your choices. Be sure to refuse any offer from them to return your ballot for you. If they offer to do so, they are breaking the law. (EC Section 18371, 18403, 18577)." Florida is in need of similar and repeated advice to its citizens.
  - **"Voter Eligibility Verification Act."** In April, 1997, California saw introduced the "Voter Eligibility Verification Act." It seeks to provide local election officials the authority to make inquiries with the Social Security Administration and the Immigration and Naturalization Service to verify the citizenship of people who have submitted a voter registration application.
  - **Aggressive Anti-Fraud Efforts By The California Secretary of State:** In 1996, the California Secretary of State's Office uncovered evidence of voter fraud and dropped 727 noncitizens from the voter rolls. A few months later it discovered voting irregularities and ordered a complete review of Orange County, California's 1.3 million residents registered to vote in the state's general election.
- 
- **Federal elections subject to alleged fraud, too.** For example, in November, 1996, California Republican Representative Bob Dornan was deposed by Democrat Loretta Sanchez in an election determined by only a 984 vote margin. Dornan has alleged the crucial "upset" total resulted from "noncitizen voting."
  - **Georgia's response to voter fraud:** In a press release dated January 7, 1997, Georgia Secretary of State Lewis Massey announced his proposal of several anti-election fraud measures, including a provision which will require citizens to present identification before receiving a ballot at their polling place. Other changes proposed included making all election code violations a felony, increasing the maximum fine and imprisonment that could be imposed for such violations, including a printed warning to all absentee ballot instructions and return envelopes describing the penalties for vote buying or selling, and implementation of the U.S. Postal Service's National Change of Address or alternative database systems to insure the accuracy and timeliness of the state's voters list.
  - **Louisiana experiences:** Louisiana State Representative Louis "Woody" Jenkins has charged that 2,600 "phantom voters" and 10,000 more questionable ballots were cast in his U.S. Senate race, which he lost by 5,788 votes.

- **Illinois' experience:** As noted earlier in this report, Chicago has to deal with the reality that persons were registering to vote more than once, a substantial number of which had registered to vote three times in different precincts. Auditing efforts taken to assure the integrity of the voter rolls are being done.

**SUMMARY:** A balance between promoting the vote and maintaining the integrity of the elections process must be carefully secured. While Florida's move toward "Internet voting" and "voting by mail" represents a laudatory effort to expand the opportunity to vote, it also expands the opportunity to commit voter fraud. Absent the inclusion in voter registration records of significant personal identifier information that is not currently required of Florida voters, the opportunities to defraud the election process will abound through any voting method, be it absentee ballot, electronic voting, or by-mail voting. Indeed, with each step taken that does not include a process that requires sufficient identification verification, the opportunity for fraud increases.

The above-noted observations and concerns are based upon FDLE's experience in investigations and upon national trends. Below, developed in part upon FDLE's experience and drawn from a variety of sources, are several suggestions of ways in which Florida's elections process may be better protected against fraud. It is possible that some of the suggestions may already be in place in one form or another in some areas of the state. The suggestions are intended to promote debate and consideration of what steps are needed in our state and local elections processes to better insure the integrity of our elections.

**Anti-Fraud Steps Florida May Wish To Consider Implementing:**

- Promote a **"zero tolerance" approach to voter fraud** by making significant efforts to elevate community awareness and opportunity to report fraud.
- Enhancing the state's ability to ferret out potential fraud before it occurs **by implementing significant and meaningful proof requirements in voter registrations.** No longer simply accept one's "representation" that the form is correct. Instead, require proof of citizenship, and current residency. Is production of a Social Security card or a phone bill or power bill receipt showing one's residence too onerous a burden to place on one who seeks to vote? Surely not.
- Consider a "reverse absentee ballot process" that sends a **poll worker to the absentee voter** with the ballot. Instead of sending the ballot to "points unknown" and having it returned for after-the-fact verification that is less than acceptable, why not fund absentee ballot vote collection agents who will deliver a ballot upon request to any registered voter. The collection

agent could then wait while the ballot is completed and could serve as a state-bonded witness that the ballot has been filled out correctly by the person to whom the ballot was provided. The process might cost more in personnel time and expense, but after-the-fact ballot verification could be eliminated, thereby offsetting some of the costs, and the much greater value of substantially curtailing absentee ballot fraud could be obtained.

- As an alternative to the "reverse absentee ballot" idea, in the minimum, **return to an enhanced absentee ballot witnessing requirement.** An absentee ballot verification, including verification of the identity of the person voting, should be required, with the sealing of the ballot being witnessed by two or more witnesses or a notary, as was once the standard in Florida.
- All absentee ballots should have **prominently printed warnings** regarding the violations of law that could occur in their use, and the penalties attached.
- A **voter fraud hotline** like California's should be considered. The toll free number could be printed on all absentee ballots.
- **Make vote-buying and absentee ballot fraud too expensive for those inclined to do it by offering a reward of a substantial sum of money to any person providing information to law enforcement that results in the conviction of a person for voter fraud.** Make the state's payoff for information resulting in a conviction much greater than the profit from accepting a vote buying payoff or participating in absentee ballot fraud.
- Return to a requirement of **personal appearance before a government official to register to vote and require the registrant to produce sufficient verification** information.
- **Require drivers license and/or social security numbers on voter registration cards** and as part of the information contained on one's absentee ballot.
- Require **foreign-born citizens to provide their naturalization number** on their voter registration card.
- Require **documented proof of residency** in the form of a power bill, phone bill, or other regular mailing to the claimed address, in order to help prevent the "move" made for the sole purpose of voting in a local election.
- With implementation of sufficient specific voter registration verification information, **implement the state's centralized voter file to its greatest**

**extent**, including running voter registration records against all available government databases that could identify fraud attempts.

- With sufficient verification information in the data base, **place all poll voting places "on line"** to the data base for instant verification of registration status and to prevent multiple voting at different locations by the same person.
- **Commit to a statewide review of registration records to determine if non-citizens or others have wrongly registered to vote.** Consider offering a brief "grace period" in which any person who has illegally registered may, without fear of punishment, appear and voluntarily remove his or her name from the voter records. (Allow the person's name to be retained in the databases so that if he or she attempts to register at a subsequent date, the effort will receive special scrutiny to verify his or her eligibility to vote.)
- **Require proof of residency and identity** when appearing at a poll to vote AND when requesting an absentee ballot. **Issue the absentee ballot in the name of the verified requestor only, and prevent the requestor from voting any other way unless the ballot is returned unvoted.** Require, as necessary, additional information to verify identity, such as the person's mother's maiden name, etc.
- **Aggressively use existing databases and processes to identify those who claim they are not "residents" or citizens in order to be excused from jury duty or other obligations, then claim they are a resident or citizen for purposes of registering to vote.** Citizenship and its responsibilities should not be something one claims or denies when convenient.
- Consider **tough alternatives to criminal sanctions** for those who are found to have engaged in voter fraud. FDLE's experience demonstrates that often "criminal intent" is often difficult to establish, even though questionable vote conduct occurs. Give the Attorney General or another entity the authority to seek civil sanctions and civil fines when criminal sanctions will not be sought.
- **Expand candidate disqualification sanctions.** Florida does not provide a blanket disqualification from holding office for those convicted of voter or election misconduct. For example, while a convicted felon may not vote, Florida law disqualifies a person from holding office upon felony conviction of F.S. 104.071 (remuneration by candidate for services, support, etc.) and F.S. 104.271 (making false or malicious charges against, or about an opposing candidate.) Not every election related conviction will disqualify one from office-holding. The list of offenses that, once committed,

disqualifies a person from holding office should be expanded to cover any voter fraud activity.

- **Enhance registration and absentee ballot process audit efforts.** Recognize that such efforts require a level of highly-specialized expertise to ferret out voter fraud around the state before it occurs and rises to a criminal level. Local jurisdictions may not have the resources to support such an effort, so consideration should be given to providing the effort at the state level.
- **Publish and distribute to each registered voter a "Voter Fraud Prevention Handbook"** similar to that used in California, including a voter fraud hotline toll free number to report suspected abuses, and, if implemented, to provide information that could be used to fund one's reward when a fraud perpetrator is convicted.
- **Consider requiring notification of the death of an individual to the Supervisor of Elections as a requisite prior to the settling of one's estate in court either by reason of a will or without.** Proof of notification would be necessary in order to close out the estate's matter in court. Require the Supervisors of election to report any received notices of death to the central database within a short period of time, and to remove the person from all active voting rolls.

*This list is not exhaustive, but is offered as the "starting point" for potential legislative consideration and review. None of the suggestions should be deemed "FDLE proposals." They are offered as the basis to promote discussion rather than as finalized proposals.*

*Florida Department of Law Enforcement*

**COMPLAINT**  
For Alleged Voter Fraud in  
**Voter Registration or Voting**  
(Section 106.22(11), Florida Statutes)

*Room 316, R.A. Gray Building, 500 South Bronough Street, Tallahassee, Florida 32399-0250  
Telephone 1-877-868-3737 (1-877-VOTERFRAUD)*

The Division of Elections has authority to conduct preliminary investigations into any irregularities or fraud involving voter registration or voting and report its findings to the State Attorney for the judicial circuit in which the alleged violation occurred for prosecution, where warranted.

**PERSON BRINGING COMPLAINT**

Name \_\_\_\_\_ Home Phone \_\_\_\_\_ Work Phone \_\_\_\_\_  
Address \_\_\_\_\_ County \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_ Zip Code \_\_\_\_\_

**PERSON AGAINST WHOM COMPLAINT IS BROUGHT (limit one person per form)**

Name \_\_\_\_\_ Work Phone \_\_\_\_\_  
Address \_\_\_\_\_ County \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_ Zip Code \_\_\_\_\_  
Title of office or position held or sought \_\_\_\_\_

Have you filed this complaint with the:

## **FOCUS OF CURRENT RESEARCH**

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

## **PURPOSE OF WORKING GROUP**

Given the preliminary research and EAC authority under  
HAVA ----

## **WHERE DOES EAC GO FROM HERE?**

**NOT** to debate what other agencies or organizations should  
or should not be doing.

## Development of:

- nationwide statistics and methods of identifying, deterring, and investigating [redacted] in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating [redacted] [section 241(b)(7)].

## The Federal Crime of Election Fraud

-- Prepared by  
Craig C. Donsanto<sup>1</sup>

The material that follows addresses the role of the United States Department of Justice in criminal matters that arise out of the balloting process, i.e. election fraud.

This paper seeks to answer the most frequently asked questions concerning the federal law enforcement role in election matters. Particularly, what sort of election-related conduct is potentially actionable as a federal crime, what specific statutory theories apply to "frauds" occurring in elections lacking federal candidates on the ballot, what federalism, procedural, and policy considerations impact on the federalization of this type of case, and how Assistant United States Attorneys (AUSAs) should respond to this type of complaint.

An effective federal role in prosecuting crimes against the electoral process is critical to the proper functioning of American democracy. The integrity of the voting process stands at the very heart of our system of representative government. Where elections are corrupted, arbitrary and corrupt government inevitably follow. Rooting out corruption in the election process, and bringing those responsible for it to swift and sure justice, is an important national law enforcement priority.

---

<sup>1</sup> Director, Election Crimes Branch, Public Integrity Section, Criminal Division, United States Department of Justice.

The views expressed in this paper are solely those of its author, and do not necessarily reflect the policy of the United States Department of Justice on the issues addressed. This paper creates no procedural or substantive rights for private parties, and cannot be relied upon by those whose circumstance may fall within the discussion herein.

\* **What sort of activities are prosecutable as federal "voter fraud" crimes?**

The federal concept of "voter fraud" applies only to activity that is appropriately remedied through criminal prosecution, as distinguished from other less severe remedies such as election contest litigation or administrative relief.

In assessing the appropriateness of the criminal remedy to a given set of facts, federal prosecutors should keep in mind that our society tolerates behavior in election campaigns that it does not tolerate in commercial, personal, or government relations. Thus as a general rule, the federal crime of "voter fraud" embraces only organized efforts to corrupt of the election process itself: i.e., the registration of voters, the casting of ballots, and the tabulation and certification of election results.

This definition excludes all activities that occur in connection with the political campaigning process, unless those activities are themselves illegal under some other specific law or prosecutive theory. Examples of the latter would include such things as stealing an opponent's campaign property, breaking into an opponent's headquarters, some transactions that are illegal under campaign financing laws. On the other hand, most things that candidates do or say about one another on the campaign trail, are generally not appropriated remedied through criminal prosecution.

This definition also excludes isolated acts of individual wrongdoing that are not part of an organized effort to corrupt the voting process. If such isolated acts of "fraud" are to be subjected to criminal penalties, that is a task for the states not the federal government to do. Indeed, there is a still-unresolved constitutional issue that dates back to the 19th century concerning whether

the federal courts have authority to hear criminal cases involving isolated incidents of electoral fraud. See e.g., Blitz v. United States, 153 U.S. 308 (1894).

Finally, this definition excludes mistakes and other gaffs which inevitably occur in the administration of the usually hectic election day polling process. Mistakes happen. They can have significant impact on the outcome of close elections. Where mistakes occur on a significant enough level to potentially affect the outcome of an election, the appropriate remedy is an election contest brought by the loser seeking civil judicial redress through the appropriate state election contest process. But mistakes in election administration are not appropriately remedied through criminal prosecution.

In addition to the qualitative limitations on the concept of "criminal" election fraud set out above, the task of prosecuting election fraud offenses in federal court is further complicated by the constitutional limits that are placed on federal power over the election process. The conduct of elections is primarily a state rather than a federal activity. See U.S. Constit. Art I, Secs. 2 and 4. Consequently, there are only a limited number of federal statutes and prosecutive theories available to address "voter frauds," and an overall imperative for federal authorities to give way to state and local enforcement in most -- but not all -- situations involving voting. With these considerations in mind, there are essentially four types of federal "election fraud:"

– **First**, there are schemes to purposely and corruptly register voters who either do not exist, or who are known by the putative defendant to be ineligible to vote under applicable state law.

– **Second**, there are schemes to cast, record or fraudulently tabulate votes for voters who do not participate in the voting act at all. This includes such activities as schemes by poll

managers to stuff ballot boxes, schemes to impersonate nonvoting individuals either at the polls or via absent voter ballot, and schemes by vote canvassers to alter vote tallies.

– **Third**, there are schemes to corrupt the voting act of voters who do participate in the voting act to a limited extent. These include such things as schemes to "assist" voters in such a manner that the voter does not knowingly consent to electoral preferences that are placed on the ballot, schemes to pay voters for voting, schemes to intimidate voters through physical or economic means, schemes to cast multiple ballots, and schemes to induce voters to validate ballot documents (usually absentee ballots) by misrepresenting what the document is.

– Finally, there are schemes to knowingly prevent voters qualified voters from voting. These include such activities as destroying voter registrations or ballots, preventing people known to be qualified to vote from doing so, schemes to tamper with computer equipment that most United States election discripts use to tabulate votes, and physically disrupting order within open polling locations.

**\* When is it appropriate for federal prosecutors to intervene in election "fraud" matters?**

The Constitution gives primary responsibility for conducting elections and safeguarding the voting process to the states, not to the federal government. The federal role in matters involving the conduct of elections is a limited one. See e.g., ACORN v. Edgar, 56 F.3d 791 (7th Cir. 1995); Voting Rights Coalition v. Wilson, 60 F.3d 1411 (9th Cir. 1995). Thus, as a general rule the task of policing the integrity of the election process -- including the prosecution of people who violate local or state election laws carrying criminal penalties -- lies with local and state authorities, to which federal power normally should yield.

There are four principal situations where deferral to state or local enforcement authorities may not be appropriate. If any of these factors is present in a pattern of conduct, it may be appropriate to prosecute it federally -- to the extent that this is possible under available federal laws. These four situations are:

1. Federal affect. Where the objective of the conduct is to corrupt the outcome of a federal elective contest, or where the consequential effect of the corrupt conduct impacts upon the vote count for federal office (e.g., Anderson v. United States, 411 U.S. 211 (1974)).

2. Civil rights. Where the object of the scheme is to discriminate against racial, ethnic or language minority groups, the voting rights of which have been specifically protected by federal statues such as the Voting Rights Act, 42 U.S.C. § 1973 et seq.

3. Prosecutor of last resort. Where federalization is required in order to redress longstanding patters of electoral fraud, either at the request of state or local authorities, or in the face of longstanding inaction by state authorities who appear to be unwilling or unable to respond under local law.

4. Link to other crimes. Where there is a factual basis to believe that fraudulent registration or voting activity is sufficiently connected to other from of criminal activity that perusing the voter fraud angle will yield evidence useful in the prosecution of other categories of federal offense.

\* **What are the advantages of prosecuting election frauds in federal courts?**

There are four procedural advantages to prosecuting election frauds in federal courts.

These are:

- Voter fraud investigations are labor intensive. Local law enforcement agencies often lack the manpower and the financial resources to take these cases on.

- Voter fraud matters are always politically sensitive and very high profile endeavors at the local level. Local prosecutors (who are usually themselves elected) often shy away from prosecuting them for that reason.

- The successful prosecution of voter fraud cases demands that critical witnesses (including voters whose voting acts have been co-opted) be examined under oath before criminal charges based on their testimony are filed. Many states lack the broad grand jury process which exists in the federal system.

- The defendants in voter fraud cases are apt to be politicians -- or agents of politicians -- and it is often impossible for either the government or the defendant to obtain a fair trial in a case that is about politics and is tried to a locally-drawn jury. The federal court system provides for juries to be drawn from broader geographic base, thus often avoiding this problem.

\* **What federal statutes are available to federalize frauds that occur in all elections – Federal as well as Non-Federal?**

The fact that the United States Constitution leaves election administration primarily with the states severely diminishes the number and scope of federal laws on this subject where there are no federal candidates on the ballot. Most elections in the United States are nonfederal in the sense that no candidates for federal office are on the ballot. Moreover, as a general rule election fraud is a far more common feature of local elections than it is of federal ones since local politics usually affects people's daily lives more directly than does national politics.

Federal criminal laws dealing directly with elections are generally confined to prohibiting fraudulent activities that occur in "mixed" elections, where federal candidates (i.e., Senate, Congress or President), are on the ballot. National elections such as these occur only two or three times in a two-year election cycle. Thus, a major challenge to the development of an effective federal law enforcement initiative against electoral fraud has been to adapt federal criminal statutes aimed at activities other than voting to the most common varieties of election frauds identified above.

The federal criminal prosecutive theories currently in use to federalize election frauds in all elections include the following:

- Schemes by polling officers "acting under color of law" to violate their duty under state law to safeguard the integrity of the election process through purposefully allowing void ballots to be cast ("stuffed") in the ballot box, or by intentionally rendering fraudulent vote tallies, can be prosecuted as civil rights violations under 18 U.S.C. 241/242 per U.S. v. Olinger, 759 F.2d 1293 (7th Cir. 1985) and its progeny. These two statutes prohibit, among many other things, intentional denigration by public officers acting under color of law of the "one-person-one-vote" principle of Equal Protection that is guaranteed in the 5th and 14th Amendments of the Constitution. Schemes to manipulate voting equipment and to stuff ballot boxes normally require physical access to voting equipment that can only be achieved through authority conferred by state law, thus satisfying the "state action" jurisdictional peg in these two statute in ballot manipulation schemes. Due to a quirk in the law, this theory is not available for use when the object of the scheme is to obtain and record illegal votes obtained through vote buying -- even where an election officer is used to ensure that bought voters vote right. The cases that

require this result are United States v. Bathgate, 246 U.S. 220 (1918); United states v. McLean, 808 F.2d 1044 (4th Cir. 1988).

- Schemes to stimulate or reward voter registration by offering or giving voters things having monetary value violate the "payment for registering" clause of 42 U.S.C. § 1973i(c). Currently all State voter registration laws are make voter registration "unitary" in nature, in the sense that a registrant becomes simultaneously entitled to vote for all candidates -- federal and nonfederal alike. In these situations, the "unitary" nature of the registration act provides a sufficient federal nexus to permit federal regulation, and it thus does not matter what particular election the subjects were interested in affecting or when the payments were made. See United States v. Cianciulli, 482 F.Supp. 585 (E.D. Pa. 1979).

- Schemes to register voters fraudulently through providing election officials materially false information about the voter's eligibility for the franchise can be prosecuted in some situations without regard to when the underlying activity took place. As with payments for registering, this is because of the "unitary" nature of the registration act. However, the specific federal statutes that apply to fraudulent registration schemes do impose some limits on the prosecution of this type of case in nonfederal election years:

- The "false registration information" clause of 42 U.S.C. § 1973i(c) reaches only schemes to provide false information concerning a voter's "name, address or period of residence in the voting district." Schemes to provide other categories of false information (e.g., citizenship) are not reached by this statute, regardless of how material that information may be to determining voter eligibility.

– The recently-enacted National Voter Registration Act (NVRA) contains a new criminal provision that reaches schemes to provide any materially significant piece of information concerning entitlement to the federal franchise under state law. 42 U.S.C. § 1973gg-10(2)(B). This new criminal law is broader than Section 1973i(c) in terms of the categories of false information to which it applies. It took effect on January 1, 1995.

– Schemes to obtain and cast ballots that are materially defective (and thus "void" under local law) in non-federal elections can be prosecuted under the Federal Mail Fraud Statute, 18 U.S.C. § 1341, when the United States Mails (a Federal instrumentality) are used to further the scheme. The "fraud" in this situation lies in generating ballots that the defendants can be shown to have known were materially deficient under state election law, and in causing a false vote count by concealing those material defects from the vote tabulating authority. Federal jurisdiction rests on the fact that the mails are a federal instrumentality.

- The Travel Act, 18 U.S.C. § 1951, is a federal statute that makes it a felony to travel across state lines or to mail items intrastate in aid of activity that constitutes "bribery" under the law of one or more of the states involved in the interstate travel. Schemes to pay voters can be prosecuted under this statute in those states where paying voters is treated as a "bribery" offense. At the current time (1996), 30 of the 50 states treat vote buying as a "bribery" offense, and in those states this activity can thus be prosecuted under Section 1951. Most vote buying schemes do not involve inter-state travel. However, they do often rely on the absentee voting process, and thereby use the United States Mails. Thus the availability of the Travel Act allows for the federalization of vote buying schemes using the absentee balloting process.

\* **What additional statutes are available to federalize election fraud when federal candidates are on the ballot?**

In addition to the statutes and prosecutive theories given above, there are several specific criminal laws in the United States Code that address electoral frauds which take place when a federal candidate is on the ballot.

- 42 U.S.C. § 1973i(c) prohibits specific types of voter frauds, when they occur in connection with an election where there are federal candidates on the ballot. The most prominent of these are schemes to provide election officers with false information concerning voters' names, addresses, or one's period of residence in the election district in order to qualify to vote; and schemes to pay voters. The payment for voting portion of this statute requires only that the payment be intended to influence the voter to participate in the election. It does not require that the voter be paid to vote for federal candidates, or for any specific candidate. United States v. Bowman, 636 F.2d 1003 (5th/11 Cir. 1981); Dansereau v. Ulmer, (Ak. S.Ct. 1995). The statute does not, however, criminalize payments that are intended merely to make it easier for a voter to get to the polls, United States v. Lewin, 467 F.2d 1132 (7th Cir. 1972). Nor does it prohibit payments made for actions short of voting -- such as endorsing candidates.

- 18 U.S.C. § 597 prohibits making expenditures for the specific purpose of stimulating voters to cast ballots for candidates seeking the federal offices of Senator, Congressman or President. This is an old statute that does require a specific intent to affect a specific election.

- 42 U.S.C. 1973i(e) prohibits "voting more than once" in elections where federal candidates are on the ballot.

- 42 U.S.C. § 1973gg-10(2) prohibits furnishing any significantly false information to an election officer for the purpose of voting in a federal election. Whether a statement is significantly false is determined by whether its importance to voter eligibility under the law of the state in which the vote was tendered. This is a new statute that was added by the National Voter Registration Act of 1993, and it took effect in most states on January 1, 1995.

- 18 U.S.C. 594 prohibits intimidating voters for the specific purpose of inducing them to cast ballots for one or more federal officers (i.e. Senators, Congressman, Presidents).

- 42 U.S.C. § 1973gg-10(1) prohibits voter intimidation in any election where federal candidates are on the ballot regardless of the objective of the defendant to influence specific election contests. This is another facet of the new statute criminal law enacted through the NVRA. With respect to both this statute and Section 594, "intimidation" means actual duress caused by physical or economic threats.

- Finally, 18 U.S.C. § 608 prohibits all the above forms of election fraud when they occur in connection with votes cast by Americans living abroad under the provisions of the Uniformed and Overseas Citizens Absentee Voting Act, which in the principle means by which American citizens living abroad vote by absentee ballot.

\* **How should federal prosecutors evaluate election fraud complaints?**

Information concerning election irregularities comes from a wide variety of sources of varying degrees credibility and in varying degrees of factual specificity. The evaluation of such complaints usually requires prosecutors to address four questions:

- First, does the substance of the complaint -- assuming it can be proven through investigation -- suggest a potential crime? The sort of activity that is usually treated as "criminal" under federal law is summarized above.

- Second, is the complaint sufficiently fact-specific that it provides leads for investigators to pursue? In order to support a criminal investigation, a complaint must be reliable, as well as sufficiently fact-specific to provide logical leads by which a federal preliminary investigation can confirm -- or disprove -- that a federal crime may have occurred along the lines of the offenses discussed above. As most of these offenses deal with frauds that are aimed at defects in individual registration or voting acts, the incoming facts in a complaint should normally specific registration or voting acts that the complainant believes to have been corrupted, or provide leads to the detection of such specific corrupted voting acts. If the facts contained in the complaint fail to meet this standard, the complainant is normally told that (s)he has not sufficient information to allow evaluation and is encouraged to obtain and provide the additional factual detail needed for preliminary evaluation.

- Third, is there a federal statute that can be used to federalize the criminal activity at issue?

- Finally, is a special federal interest in the matter that warrants federalization rather than deferral to state law enforcement? The four most commonly asserted bases for federalization of election "fraud" crimes are also discussed above.

\* **What investigative procedures should be avoided in election fraud matters?**

Investigation of election irregularities by federal authorities always present unique issues of federalism insofar as this principle concerns the constitutionally based primacy of state

responsibility over election administration. Such investigations also have the potential to "chill" lawful voting activity and to interfere with the state vote certification process. All federal election fraud investigations must avoid the following procedural pitfalls:

- Non-interference in elections. Overt federal investigation of election fraud matters should be held to a bare minimum necessary to preserve evidence and elicit the evaluative facts until the election in which the alleged "fraud" occurred has been certified. Once a federal criminal investigation is conducted openly in a matter concerning an as-yet unresolved election, the investigation will inevitably become a central feature in the election's outcome. Yet the issue of "who won" is an issue for state -- not a federal prosecutor - to perform. Absent allegations of civil rights abuse actionable under the Voting Rights Act, it is not a proper function of federal criminal justice to interfere with the conduct of elections, the tabulation of votes, the resolution of election contest litigation, or the certification of winners. In most instances, this process is concluded within a few weeks of an election.

Thus, in election matters lacking Voting Rights Act overtones, and except where as is absolutely necessary to preserve evidence or to round out a seemingly valid complaint to a point where an analysis can be performed on it, no overt federal investigation should be conducted in election fraud matters before the outcome of the election at issue has been certified by appropriate state authorities. The only exception to this rule is where a very limited pre-election inquiry is determined to be absolutely necessary in order to preserve evidence or to round out a seemingly valid complaint to a point where an federalization evaluation can be performed.

- Interviewing voters during active voting periods. Most voting fraud investigations require that individual voters at some point be questioned concerning the

circumstances under which they voted (or did not vote). Such interviews should generally not be conducted immediately prior to an election or while voting is taking place. This is because having federal agents interview citizens about the circumstances under which they voted (or did not vote) can easily "chill" lawful voting activity by the interviewees, as well as voters similarly situated. This is not an appropriate result. Thus, the Public Integrity Section should be consulted before any investigative action is taken that anticipates interviews of individual voters during a period of active voting in their respective jurisdiction.

- Seizing official election documentation. The investigation and proof of election "fraud" matters customarily rely heavily upon the usually voluminous documentation that the election process produces. Usually, this documentation -- or at least a part of it -- must at some point be obtained by federal authorities perusing criminal election fraud matters. In federal election years, a federal statute enacted in 1960 requires that this important documentation be retained intact for at least 22 months following the election. However, in nonfederal election years, the retention of this documentation is governed solely by state laws which in most states allow its destruction following 30 to 90 days after the election. This means that in nonfederal elections, there is a time-sensitivity to securing federal possession of important election records once a decision has been made to federalize a given inquiry. However, seizing or subpoenaing official election records into federal custody may deprive state authorities of materials they may require to tabulate, canvass and certify the results of elections. No action should be taken that deprives the state of records it needs to perform this state activity, and Public Integrity should be consulted before any attempt to secure such records is made.

- Investigative activity inside open polls. As noted previously in this paper, the task of conducting elections and determining their outcomes is a uniquely state function. Most states closely regulate who may be inside polling places while they are open and during the time when ballots are being tabulated and election results canvassed. In most states,<sup>2</sup> these "poll access" provisions do not anticipate that federal law enforcement personnel be admitted to such places at such times.<sup>3</sup>

In addition, 18 U.S.C. § 592 prohibits the stationing of "armed men" at places where voting activity is taking place. The FBI has determined that this statute applies to Special Agents, who are authorized to carry arms. Anyone who directs an "armed force" to enter a polling location can be subject under this old post Civil War statute to felony penalties.

In view of the above, no federal investigative activity should be done inside open polling places, or in locations where votes are being processed, tabulated or canvasses, without prior consultation with the Public Integrity Section of Justice Department Headquarters.

Along similar lines, there is no authority for federal criminal law enforcement personnel to serve as poll watchers in elections. This is probably the most frequently asked question concerning the federal role in election matters. The only exception lies in Illinois (where state law is uniquely broad), and in matters of racial and language minority voting discrimination falling under the Voting Rights Act.

---

<sup>2</sup> Illinois is a notable exception.

<sup>3</sup> These state poll access laws are superseded by the federal Voting Rights Act in matters involving discrimination in the franchise based on racial or language minority status. However, absent evidence of an intent to discriminate based on these federal statutory factors, the administration of the election process is a function of local and state law to which we in the federal law enforcement community should defer.

## CONCLUSION

Allow me to conclude this paper with an editorial of March 19, 2004, in the Big Sandy News of Eastern Kentucky concerning a recent election fraud prosecution in a rural jurisdiction in the Appalachian Mountains of Eastern Kentucky. The editorial comments on the sentencing of Donnie Newsome, the County Judge-Executive of Knott County, for vote buying. This editorial appears here with the permission of the Big Sandy News, whose late Publisher and Editor, Scott Perry, as an Eastern Kentucky newspaper man, led a strong charge against public corruption and took a proactive role in the fight.

In Kentucky, county judge-executives are the chief operating officers of county government, and, as such, occupy a position of substantial power. Judge Newsome's conviction culminated a series of vote buying cases the Public Integrity Section and the United States Attorney's Office for the Eastern District of Kentucky jointly prosecuted during 2003 and early 2004 arising out of a scheme to pay voters for voting in the 1998 primary. This series of cases ultimately resulted in the indictment of 16 defendants. Twelve of these defendants were convicted, three were acquitted, and one had his case dismissed.

The highlight of this series of election fraud cases was the conviction of Knott County Judge-Executive Donnie Newsome for for vote buying in violation of 42 U.S.C. § 1973i(c). Thereafter, the defendant cooperated with the prosecution and received a sentence reduction recommendation under U.S.S.G. §5K1.1. On March 16, 2004, he was sentenced to serve 26 months in prison.<sup>4</sup>

---

<sup>4</sup> The sentencing judge indicated that had it not been for the downward departure recommended by the prosecution, he was prepared to sentence Newsome to five years' imprisonment.

The following editorial, reprinted here in its entirety, presents an eloquent and concise statement of why the investigation and prosecution of electoral corruption are important law enforcement priorities of the Justice Department.

*Vote fraud sentencing sad, encouraging*  
- - by Susan Allen

*Tuesday's sentencing in federal court of Knott County Judge-Executive Donnie Newsome and campaign worker Willard Smith on vote buying charges was both a sad and encouraging day for Eastern Kentucky.*

*Sad the people of Knott County were effectively robbed of their voting rights by Newsome and others dolling out cash to buy a public office.*

*Sad that, as Federal Judge Danny C. Reeves pointed out, some people in Knott and other counties think that elections are supposed to be bought and the only reason to go to the polls is to get their pay off.*

*Sad those seeking public office in Knott County, and most assuredly in other counties, target poor, handicapped, addicted and uneducated voters to carry out their scheme to secure public office and a hefty paycheck.*

*Sad that voters in Knott and other counties have been reduced by years and years of political corruption to truly believing that selling their vote is not wrong, it's the norm.*

*Sad that Eastern Kentuckians have pretty much been left to the mercy of the political machines which serve as dictators of their lives, from their home towns all the way to Frankfort.*

*Sad that generations sacrificed their lives and their children's lives to the political bosses for mere bones from their local leaders while now their kids are dying from drug overdoses which, we strongly suspect, are directly tied to the years of iniquity and demoralization.*

*Sad that even today some elected officials continue the abuse and either refuse or can't comprehend the impact of their past and current atrocities against their own people.*

*Sad that Judge Reeves could see and completely understand during just a one week trial the utter hopelessness and apathy in the area people feel regarding the so-called democratic process.*

*Sad that our state lawmakers have piddled away their time during this legislative session on petty political issues without even proposing laws that would bar convicted felons, especially vote buyers from retaining their offices while appealing their verdicts.*

*Sad that Donnie Newsome continues to rule Knott County from a jail cell.*

*Tuesday's events were encouraging in that prosecutors (AUSA E.D. Ky.) Tom Self and (Public Integrity Section Trial Attorney) Richard Pilger were willing to fight the hard battle for the people of Knott County, which hopefully will lead to at least a grassroots effort for people to take back their towns.*

*Encouraging that some light has been shed on the workings of the dark political underworld which might shock the good people of Eastern Kentucky into action, at least for their children's future.*

*Encouraging that what might be perceived as a baby step with Newsome's conviction could finally lead to that giant step Eastern Kentuckians must surely be ready to take to recapture control of their own destinies.*

*Encouraging that federal authorities have pledged to continue the fight they have started to restore to the people the right to govern themselves without dealing with a stacked deck.*

*Encouraging that Judge Reeves and prosecutors did see that the Knott Countians who sold their votes, in some cases for food, were victims of Newsome's plot and didn't need to be punished further.*

*Encouraging that there's some branch of government, in this case on the federal level, not shy about taking on political power houses, knowing the obstacles in their way will be many.*

*Encouraging that Newsome's lips have loosened regarding others involved in similar schemes to buy public office, even though we suspect it has nothing to do with righting the wrongs, only a self-serving move to spend less days behind bars.*

*Encouraging that maybe, for once, we are not in this fight alone and have a place to turn to for help when we are willing to stand up to the machine.*

*The feds have helped us take that first step toward getting back what is rightfully ours which has been traded away by others in the past in back room deals. Not only do they need our help, they need our help.*

*This time, let's not let ourselves down.*

# KEY FINDINGS

---

- ***Voter fraud is the “intentional corruption of the electoral process by the voter.”*** This definition covers knowingly and willingly giving false information to establish voter eligibility, and knowingly and willingly voting illegally or participating in a conspiracy to encourage illegal voting by others. All other forms of corruption of the electoral process and corruption committed by elected or election officials, candidates, party organizations, advocacy groups or campaign workers fall under the wider definition of ***election*** fraud.
- ***Voter fraud is extremely rare.*** At the federal level, records show that only 24 people were convicted of or pleaded guilty to illegal voting between 2002 and 2005, an average of eight people a year. The available state-level evidence of voter fraud, culled from interviews, reviews of newspaper coverage and court proceedings, while not definitive, is also negligible.
- ***The lack of evidence of voter fraud is not because of a failure to codify it.*** It is not as if the states have failed to detail the ways voters could corrupt elections. There are hundreds of examples drawn from state election codes and constitutions that illustrate the precision with which the states have criminalized voter and election fraud. If we use the same standards for judging voter fraud crime rates as we do for other crimes, we must conclude that the lack of evidence of arrests, indictments or convictions for any of the practices defined as voter fraud means very little fraud is being committed.
- ***Most voter fraud allegations turn out to be something other than fraud.*** A review of news stories over a recent two year period found that reports of voter fraud were most often limited to local races and individual acts and fell into three categories: unsubstantiated or false claims by the loser of a close race, mischief and administrative or voter error.
- ***The more complex are the rules regulating voter registration and voting, the more likely voter mistakes, clerical errors, and the like will be wrongly identified as “fraud.”*** Voters play a limited role in the electoral process. Where they interact with the process they confront an array of rules that can trip them up. In addition, one consequence of expanding voting opportunities, i.e. permissive absentee voting systems, is a corresponding increase in opportunities for casting unintentionally illegal ballots if administrative tracking and auditing systems are flawed.
- ***There is a long history in America of elites using voter fraud allegations to restrict and shape the electorate.*** In the late nineteenth century when newly freed black Americans were swept into electoral politics, and where blacks were the majority of the electorate, it was the Democrats who were threatened by a loss of power, and it was the Democratic party that erected new rules said to be necessary to respond to alleged fraud by black voters. Today, the success of voter registration drives among minorities and low income people in recent years threatens to expand the base of the Democratic party and tip the balance of power away from the Republicans. Consequently, the use of baseless voter fraud allegations for partisan advantage has become the exclusive domain of Republican party activists.

029077

- ***The historically disenfranchised are often the target of voter fraud allegations.*** Fraud allegations today typically point the finger at those belonging to the same categories of voters accused of fraud in the past – the marginalized and formerly disenfranchised, urban dwellers, immigrants, blacks, and lower status voters. These populations are mostly found among those still struggling for full inclusion in American life.
- ***Better data collection and election administration will improve the public discussion of voter fraud and lead to more appropriate policies.*** We need better data, better election administration, transparency and more responsible journalism to improve public understanding of the legitimate ways in which electoral outcomes can be distorted and manipulated. This will help ensure that new laws and rules to prevent fraud are narrowly targeted to solve legitimate problems rather than used as a strategy to shape the electorate for partisan advantage.

# INTRODUCTION

---

The claim that voter fraud threatens the integrity of American elections is itself a fraud. It is being used to persuade the public that deceitful and criminal voters are manipulating the electoral system. No available evidence suggests that voters are intentionally corrupting the electoral process, let alone in numbers that dilute and cancel out "the lawful votes of the vast majority of Americans."<sup>1</sup> The lack of evidence is not due to a failure to codify voter fraud as a crime, nor is it due to the inability or unwillingness of local law enforcement agencies to investigate or prosecute potential cases of voter fraud. In fact, when we probe most allegations of voter fraud we find errors, incompetence and partisanship. The exaggerated fear of voter fraud has a long history of scuttling efforts to make voting easier and more inclusive, especially for marginalized groups in American society. With renewed partisan vigor fantasies of fraud are being spun again to undo some of the progress America has made lowering barriers to the vote.

The purpose of this report is to disentangle the myth from the reality and to separate the politics of voter fraud from legitimate administrative concerns about the integrity of the electoral process. To make the argument, we present a usable definition of voter fraud, discuss the problem of evidence, and explain how and why the dynamics of electoral competition drive the use of baseless fraud claims in American politics. We present several contemporary examples to illustrate how poor election administration and voter mistakes are misleadingly labeled "fraud." Recent allegations against voter registration campaigns highlight the need for an analysis sensitive to the partisanship and race and class issues just beneath the surface of most voter fraud claims. The last section of the report makes policy recommendations for improving public understanding and removing the canard of voter fraud from the election reform debate. The appendix discusses what to look for in evaluating voter fraud allegations.

<sup>1</sup> U.S. Senate Republican Policy Committee, "Putting An End to Voter Fraud," (February 15, 2005); available online at [http://rpc.senate.gov/\\_files/Feb1504VoterFraudSD.pdf](http://rpc.senate.gov/_files/Feb1504VoterFraudSD.pdf).

# DEFINING VOTER FRAUD

Conceptual clarity is important in evaluating evidence of fraud. We begin with a discussion of what voter fraud is and what it is not. The first problem in defining voter fraud is that as a crime, it defies precise legal meaning. In fact, there is no single accepted legal definition of voter fraud. We have fifty different state electoral systems and fifty state criminal codes governing the administration of elections, plus a federal code that applies in national elections, and no uniform standards. In fact, some states do not actually criminalize 'voter fraud,' although they all criminalize acts that are commonly lumped together under the term, such as illegal voting, providing false information to register to vote, and multiple voting.<sup>2</sup> The legal incoherence contributes to popular misunderstandings.

We need a basic definition of voter fraud that cuts through the confusion without violating the way voter fraud is diversely treated in state and federal law. We can start with the U.S. Department of Justice's definition of *election fraud* and apply it to election crimes committed by *voters*. The Justice Department defines election fraud as "conduct that corrupts the process by which ballots are obtained, marked, or tabulated; the process by which election results are canvassed and certified; or the process by which voters are registered."<sup>3</sup> Voter fraud is a sub-category of election fraud, or the intentional corruption of the electoral process by voters.

*Voter fraud is the intentional corruption of the electoral process by voters.*

This covers *knowingly and willingly* giving false information to establish voter eligibility, and *knowingly and willingly* voting illegally or participating in a conspiracy to encourage illegal voting by others.<sup>4</sup> Apparent acts of fraud that result from voter mistakes or isolated individual wrongdoing or mischief making not aimed at corrupting the voting process should not be considered fraud, though sometimes these acts are prosecuted as such.<sup>5</sup> All other forms of corruption of the electoral process and corruption committed by elected or election officials, candidates, party organizations, advocacy groups or campaign workers fall under the wider definition of *election fraud*.<sup>6</sup>

<sup>2</sup> There are many examples of states that criminalize what we think of as voter fraud without calling it voter fraud. Georgia, for example, has no election code offense for "voter fraud," but it does provide stiff penalties for "repeat voting" and "voting by unqualified elector." See, for example O.C.G.A. § 21-2-560 et seq. In New Hampshire, the crime of voting more than once is called "wrongful voting." See, N.H.R.S. § 63-659.34. In Alaska, voter impersonation, voting more than once, and registering to vote without being entitled to register are all simply called "voter misconduct." See, Ala. Statutes § 15.56.040 et seq.

<sup>3</sup> Craig C. Donsanto and Nancy Stewart, *Federal Prosecution of Election Offenses*, 6<sup>th</sup> Edition, U.S. Department of Justice, Criminal Division, Public Integrity Section (January 1995), 21 (herein cited as 'DOJ Manual').

<sup>4</sup> Fraud is commonly defined as "deception *deliberately* practiced with a view to gaining an unlawful or unfair advantage" (*emphasis added*). See *Webster's Revised Unabridged Dictionary*, Version published 1913 by the C. & G. Merriam Co. (Springfield, Mass.), under the direction of Noah Porter, D.D., LL.D. Criminal intent is a feature of the election crime codes of most states and the federal system, although a showing of intent is not always required to obtain a conviction for some forms of voter fraud such as "alien voting" (voting by a non-citizen).

<sup>5</sup> The proper venue for challenging mistakes that may have affected the outcome of an election is to follow state statutory procedures for an election challenge or contest. See, Barry H. Weinberg, *The Resolution of Election Disputes: Legal Principles That Control Election Challenges* (Washington, D.C.: IFES, 2006).

<sup>6</sup> This definition of voter fraud is simpler and more coherent than others offered. See, for example, U.S. Election Assistance Commission, *Election Crimes: An Initial Review and Recommendations for Future Study* (December 2006), 13-16, available online

029030

Allegations of "voter fraud" should be analyzed to determine 1) who is alleged to have committed the fraud, and 2) which stage of the electoral process is alleged to have been corrupted. This approach will go a long way toward clarifying whether electoral integrity is being breached and what needs to be done to secure the process (see the appendix for further discussion of how to identify fraud).

---

at [www.eac.gov/docs/Voter%20Fraud%20&%20Intimidation%20Report%20-POSTED.pdf](http://www.eac.gov/docs/Voter%20Fraud%20&%20Intimidation%20Report%20-POSTED.pdf) (herein cited as 'EAC Report'). Moreover, although it is simple, it preserves the meaning of "fraud" in the electoral context as outlined by the Justice Department. The Department's manual for training U.S. Attorneys in investigating and prosecuting election crimes divides "election frauds" into two categories, one that involves the participation of voters and another that does not. Those election fraud crimes involving the participation of voters include vote buying schemes, absentee ballot frauds, voter intimidation schemes, migratory-voting (or floating-voter) schemes, and voter 'assistance' frauds, in which the wishes of the voters are ignored or not sought. See, Donsanto and Stewart (1995), 22-24. Acts of voter intimidation which are included in the election fraud definitions offered in both the EAC Report and the DOJ Manual are excluded here. While the intimidation of voters certainly corrupts the electoral process, it is a crime that more directly involves the deprivation of rights guaranteed by law and for that reason should be treated separately from acts of deceit.

# VOTER FRAUD AND THE PROBLEM OF EVIDENCE

---

How prevalent is voter fraud? A 2005 U.S. Senate Republican Policy Committee report claimed that “voter fraud continues to plague our nation’s federal elections, diluting and canceling out the lawful votes of the *vast majority of Americans*” (emphasis added).<sup>7</sup> This would be shocking if it were true. But the Committee made it without providing a single piece of evidence to support or clarify the claim. It cited no surveys, no statistics, no studies, no credible evidence whatsoever to back up its warning that election results are routinely distorted by fraud in the United States.

## ***Evidence of voter fraud like all other crimes comes from law enforcement efforts to combat it***

The Committee cited no data because there is very little to cite. Evidence of voter fraud like evidence of other forms of criminal behavior is primarily produced by law enforcement efforts to detect and prosecute it. And the available evidence here suggests that voters rarely commit voter fraud.<sup>8</sup> As in the case of all other kinds of crime, it is simply unacceptable to allege law breaking without providing at least some supporting evidence.

What is that evidence? At the national level, a major new project at the U.S. Department of Justice, the Ballot Access and Voting Integrity Initiative (BAVII) has resulted in only a handful of convictions.<sup>9</sup> According to the Attorney General, since the inception of the program in 2002, “we’ve made enforcement of election fraud and corruption offenses a top priority.”<sup>10</sup> The result? Government records show that only 24 people were convicted of or pleaded guilty to illegal voting between 2002 and 2005, an average of eight people a year. This includes 19 people who were ineligible to vote, five because they were still under state supervision for felony convictions, and 14 who were not U.S. citizens; and five people who voted twice in the same election, once in Kansas and again in Missouri.<sup>11</sup>

<sup>7</sup> U.S. Senate Republican Policy Committee (2005).

<sup>8</sup> The idea that voter fraud is first and foremost a crime reaches substantially the federal concept of election fraud which “applies only to activity that is appropriately remedied through criminal prosecution, as distinguished from other less severe remedies such as election contest litigation or administrative relief.” See, Craig C. Donsanto, “The Federal Crime of Election Fraud,” prepared for the Russian election reform website, Democracy.Ru, n.d.; available online at [www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html).

<sup>9</sup> On the origins of BAVII, see Jeffrey Toobin, “Annals of Law: Poll Positions,” *The New Yorker* (September 20, 2004). Very little information about the program’s overall scope and performance has been released by the Justice Department’s Public Integrity Section; annual press releases announce the numbers of investigations and convictions obtained, and the Public Integrity Section’s annual reports to Congress briefly discuss some of the cases, but efforts to acquire more information about the program have been stymied by the Criminal Division’s failure to respond to a Freedom of Information Act request filed in July 2005. Nevertheless, it is difficult to imagine that the Department would withhold information about closed cases of deceitful voters, and therefore likely that the limited information it has released so far is all there is.

<sup>10</sup> Prepared Remarks of Attorney General Alberto R. Gonzales, Ballot Access and Voting Integrity Symposium, Washington, D.C. (October 4, 2005).

Source: U. S. Department of Justice, Criminal Division, Public Integrity Section, *Election Fraud Prosecutions & Convictions, Ballot Access & Voting Integrity Initiative, October 2002 – September 2005* (n.d).

In addition, the BAVII uncovered several vote buying schemes that have resulted in the convictions or guilty pleas of about 30 people, though most of those convicted were party and election officials, candidates for public office and elected officials, and in one case, the commander of a local VFW post. The vote buying cases involved a handful of elections in the Appalachia regions of eastern Kentucky and West Virginia, East St. Louis, Illinois and Caldwell County, North Carolina.

The available state-level evidence of voter fraud, culled from interviews, reviews of newspaper coverage and court proceedings, while not definitive, is also negligible.<sup>12</sup> There are no reliable, officially compiled, national or even statewide statistics on voter fraud.<sup>13</sup> Even though many criminal acts associated with "voter fraud" are classified as felonies, voter fraud fails to appear in the F.B.I.'s uniform crime reports. There are no publicly available criminal justice databases that include voter fraud as a category of crime. No states collect and publish statistics on voter fraud.<sup>14</sup>

### ***The lack of evidence is not due to a failure to codify voter fraud as a crime***

If fraud is such a persistent concern of those who run elections, government agencies responsible for election administration should collect statistics on it, as they do in other serious matters, certainly other crimes. It is not as if the states have failed to detail the ways voters could corrupt elections. There are hundreds of examples drawn from state election codes and constitutions that illustrate the precision with which the states have criminalized voter and election fraud.

If we use the same standards for judging voter fraud crime rates as we do for other crimes, which is to calculate the incidence of crime from law enforcement statistics on arrests, indictments and convictions, we must conclude that the lack of evidence of arrests, indictments or convictions for any of the practices defined as voter fraud means very little fraud is being committed relative to the millions of votes cast each year in state, local and federal elections.

<sup>12</sup> Lori Minnite and David Callahan, *Securing the Vote: An Analysis of Election Fraud* (New York: Dēmos: A Network for Ideas and Action, 2003). The author is engaged in a more thorough analysis of state-level voter fraud data and investigations which will be published in her forthcoming book. To-date, the findings only confirm Minnite and Callahan's earlier conclusions.

<sup>13</sup> This is an urgent concern. Law professor Spencer Overton persuasively argues for a more empirical cost-benefit approach to evaluating the value and constitutionality of new restrictive photo identification voting requirements. As Overton notes, this approach is hampered by the lack of systematic data on fraud. See, Spencer Overton, "Voter Identification," *Michigan Law Review* 105(2007), 631-682.

<sup>14</sup> The California Secretary of State's Office compiled information on electoral fraud cases referred to its office from 1994 to 2003. The data were analyzed in an unpublished conference paper (see, R. Michael Alvarez and Frederick J. Boehmke, "Contemporary Election Fraud: A Quantitative Analysis of Election Fraud Cases in California," paper prepared for Election Fraud Conference, Center for Public Policy and Administration, The University of Utah, and the Caltech/MIT Voting Technology Project, Salt Lake City, Utah, September 29-30, 2006; available online at [www.vote.caltech.edu/events/2006/FraudConf/AlvBmk-paper.pdf](http://www.vote.caltech.edu/events/2006/FraudConf/AlvBmk-paper.pdf)), but they are not publicly available.

### **Examples Of How States Criminalize "Voter Fraud"**

- In Texas, a person can be convicted of a third degree felony if he or she "votes or attempts to vote in an election in which the person knows the person is not eligible to vote; knowingly votes or attempts to vote more than once in an election; or knowingly impersonates another person and votes or attempts to vote as the impersonated person."<sup>i</sup>
- California's election code has dozens of provisions that prohibit illegal activity associated with elections. It prohibits fraudulent registration, including registering under a false name, registering under a false address, and registering a non-existent person. It makes it a felony for a person to vote in an election that he or she is not entitled to vote in, to vote more than once, or impersonate another voter. Moreover, it is a felony in California to "give, offer, or promise any office, place, or employment, or promise to procure or endeavor to procure any office, place, or employment to or for any voter, or to or for any other person, in order to induce that voter at any election to vote or not vote for a particular candidate."<sup>ii</sup>
- Pennsylvania law gives the power to monitor elections to county boards of elections, and imposes a substantial number of penalties on people engaging in election fraud. Giving or receiving money in exchange for voting a certain way in an election can bring up to seven years in prison and \$15,000 in fines. Any person convicted of perjury "regarding any material matter or thing relating to any subject being investigated, heard, determined or acted upon by any county board of elections, or member thereof, or by any court or judge thereof, judge of election, inspector of election, or overseer" can receive up to five years in prison and a \$10,000 fine. Any person voting when they are not registered to vote, or voting more than once can be punished the same.<sup>iii</sup>
- Nineteenth century language in the Alabama Constitution disqualifies from voting "all idiots and insane persons" and those convicted of crimes like murder, arson, and rape, but also wife battering, bigamy, sodomy, miscegenation and vagrancy. It also disqualifies from voting any person convicted of "selling or offering to sell his vote or the vote of another, or of buying or offering to buy the vote of another, or of making or offering to make a false return in any election by the people or in any primary election to procure the nomination or election of any person to any office, or of suborning any witness or registrar to secure the registration of any person as an elector."<sup>iv</sup>
- In Minnesota, it is a felony to submit more than one absentee ballot, assist another in submitting more than one absentee ballot, or alter another's absentee ballot in any way.<sup>v</sup>

<sup>i</sup> Tex. Gov't Code Ann. § 64.012.

<sup>ii</sup> Cal. Gov't Code § 18520.

<sup>iii</sup> 25 Pa. Stat. Ann. Art. XVIII, generally.

<sup>iv</sup> Constitution of Alabama (1901), Section 182.

<sup>v</sup> Minn. Stat. Ann. § 203B.03.

## ***The lack of evidence of voter fraud is not due to law enforcement agencies ignoring their duties***

Even if crime reports underestimate true crime rates because some crimes go unreported or undetected, or because criminal behavior is sometimes addressed by means other than prosecution, crime is still measured as a function of law enforcement efforts to address it. Under the rule of law, enforcement efforts establish the core evidence of crime. It is difficult to conceive of whole categories of criminal behavior that go almost completely undetected or ignored by law enforcement officials at all levels of government across the U.S. today. And yet, those who believe there is a lot of voter fraud despite the lack of evidence frequently fall back on this argument. When confronted they charge the paucity of evidence is due to the government's failure to undertake the investigations and prosecutions that would produce it.<sup>15</sup> A more plausible explanation is that voters are not committing fraud, leaving little to investigate or prosecute.

## ***The lack of evidence of voter fraud is not due to the inability of law enforcement agencies to pursue voter fraud investigations***

Some argue that local officials are ill-equipped to detect voter fraud and poorly motivated to pursue investigations and prosecutions of voter fraud given their lack of expertise and resources and the public's demand for attention to more serious or violent crimes.<sup>16</sup> If election crime, perhaps like international securities fraud or organized crime, were beyond the ken of local officials to investigate, then we might expect a dearth of prosecutions and little evidence of voter fraud. This is another explanation offered by those who argue that there is a lot of fraud despite the lack of evidence. Local officials, the argument goes, can't or won't prosecute fraud for a variety of reasons. The detection and prosecution of voter fraud, however, is not beyond the ken of local officials. In fact, as the Justice Department manual on how to investigate and prosecute election crime argues, "there are several reasons why election crime prosecutions may present an easier means of obtaining convictions than do other forms of public corruption." They are, 1) "election crimes usually occur largely in public," 2) "election crimes often involve many players," and 3) "election crimes tend to leave a paper trail."<sup>17</sup> Without any evidence to support it, the notion that local law enforcement officials are unable or unwilling to investigate or prosecute voter fraud lacks merit. But, as the saying goes, if you repeat a rumor enough times people will start to believe it.

<sup>15</sup> Recently, a federal appeals court judge repeated the rumor that, "...the absence of [voter fraud] prosecutions [in Indiana] is explained by the endemic under enforcement of minor criminal laws (minor as they appear to the public and prosecutors, at all events)." See, *Indiana Democratic Party v. Rokita*, U.S. Court of Appeals, 7<sup>th</sup> Circuit, Case No. 06-2218, 7. This is a contentious issue, but like most allegations of voter fraud, one that fails to rise above the level of anecdote.

<sup>16</sup> For example, in affirming the lower court's decision upholding Indiana's new photo identification law, U.S. Court of Appeals Judge Richard Posner proposed the idea that as a crime, voter fraud is analogous to littering. See also Donsanto and Stewart, asserting, "...local law enforcement is often not equipped to prosecute election offenses" (1995, 8), and Donsanto's subsequent statement that, "Voter fraud investigations are labor intensive. Local law enforcement agencies often lack the manpower and the financial resources to take these cases on." (Donsanto, n.d.) Here, Donsanto, the director of the Elections Crimes Branch of the Justice Department's Public Integrity Section since its inception in 1978, undermines a claim he makes earlier in a *University of Baltimore Law Review* article, that, "Most election fraud is easily recognized." If it's easily recognized, why would local law enforcement agencies lack the manpower and resources to take on investigations and prosecutions? See, Craig C. Donsanto, "Federal Jurisdiction Over Local Vote Fraud," *University of Baltimore Law Review* 13(1), 4.

<sup>17</sup> Donsanto and Stewart (1995), 6.

# “FRAUD” THAT IS NOT FRAUD

---

A review of hundreds of news reports on voter fraud appearing over a recent two year period found that with few exceptions, fraud allegations and cases reported in the press were limited to local electoral contests and individual acts, and fell into three basic categories:

- 1) *unsubstantiated or false allegations of voter fraud made by the losers of close elections;*<sup>18</sup>
- 2) *mischief; and,*
- 3) *claims that later turn out to be based on cases of voter error or administrative mistakes, not fraud.*

*Here are some examples:*

## *Examples of fraud alleged by election losers*

- Pittsburgh City Council President Bob O'Connor lost a close primary race to incumbent Mayor Tom Murphy and charged voter fraud cost him the election. Pittsburgh election officials allowed the two campaigns to review balloting while monitoring each other. Mayor Murphy's campaign found 81 ineligible voters in a sampling of 71 of the city's 404 precincts. The *Pittsburgh Post-Gazette* reviewed Murphy's data and found only three clearly improper ballots. The O'Connor campaign claimed it found 142 votes cast by people whose voter registration cards were missing but would not share its data with the *Post-Gazette* for independent verification.<sup>19</sup>
- The Pasco County Canvassing Board of Port Richey, Florida, denied a request for a recount filed by Bob Leggiere who lost to the incumbent by nine votes. Leggiere claimed that voter fraud and 11 ballots that did not register a vote for mayor were the cause of his defeat. He charged that owners of a gambling boat operation voted illegally because their boat, which was their legal residence, was outside the city limits, suggesting that "because of their gambling boat interests, they have attempted to take control of the city elections." The canvassing board informed Leggiere that he needed to file a protest with the board or a complaint in court, which he declined to do.<sup>20</sup>

## *Examples of fraud as mischief*

- A Ventura County, California woman was arrested and charged with voter fraud when her ex-husband noticed the names of two of their underage children on a list of registered voters in the March 2000 primary and turned her in. The woman was charged with fraudulently registering her 10- and 15-year old daughters, one of her daughter's friends, her ex-husband who was already registered, and a number of fictitious people.<sup>21</sup>

<sup>18</sup> For a discussion of fraud and the sore loser, see Michelle L. Robinson, "Issue in the Third Circuit: Election Fraud – Winning At All Costs," *Villanova Law Review* 40 (1995), 869+.

<sup>19</sup> James O'Toole, "Voting Errors Suggest No Fraud," *Pittsburgh Post-Gazette* (June 17, 2001), B17.

<sup>20</sup> Chase Squires and Matthew Waite, "Fraud Alleged in Port Richey Vote," *St. Petersburg Times* (April 12, 2001), B4.

<sup>21</sup> "Woman Faces Vote Fraud Charges," *The San Diego Union-Tribune* (October 29, 2000), A3.

029086

- Prosecutors in West Palm Beach, Florida agreed not to charge a woman who registered her poodle, "Cocoa Fernandez," as a Republican on the condition that the woman stay out of trouble for a year. She averted a third-degree felony charge carrying a maximum 5-year prison term and a \$5,000 fine.<sup>22</sup>
- A story appeared in the Marquette University student paper that 174 of 1,000 students surveyed said they voted more than once in the November 2000 presidential election. Another 170 claimed to have voted for write-in candidates, but the official canvass of the voting precincts surrounding the Marquette campus recorded only 12 write-in votes for president. One student told ABC News, the *Milwaukee Journal Sentinel* and the Marquette student paper that he voted four times. He later recanted when a list of voters from his precinct did not include his name at all. The Milwaukee County District Attorney said he had no evidence of any student voting more than once. The student who told the media he voted four times was later charged with selling other students fake Ohio drivers licenses he printed using his dorm room computer.<sup>23</sup>

### **Examples of fraud as voter error**

- The *Milwaukee Journal Sentinel* conducted a two-month review of 203,000 votes cast in Milwaukee and found that 361 felons still under state supervision cast votes in 2000. This was in violation of an "often misunderstood state law" that disqualifies felons on probation or parole from voting. Ninety percent of the 361 illegal votes were cast by African Americans living in central city neighborhoods, most with convictions for welfare fraud, forgery and other property offenses. The newspaper reasoned that the illegal votes probably went to Al Gore, since 92 percent of African Americans in the state voted for Gore. They estimated that if disqualified felons elsewhere in the state voted illegally at the same rate obtained in Milwaukee, as many as 1,100 illegal votes could have been cast statewide, a significant number given Gore's margin of victory was only 5,708 votes. None of the illegal voters contacted by the paper knew they were prohibited from voting, and a review of parole and probation procedures suggested they were never informed.<sup>24</sup> Charges were filed against three people but later dropped when prosecutors couldn't prove those charged knew they were breaking the law.
- A voter inadvertently filled out five ballots in a local election in Montgomery County, Texas. "It (the five ballots, sic) was just handed to me and I just put them in the box," said the culprit, 52-year old Ruben Jones, "I wasn't paying attention." An election judge allowed one of Jones' votes to count resulting in a tie at 83 votes each between two candidates who were then forced into a run-off. Fraud was charged. The city attorney acknowledged the judge's mistake but could not overturn his decision to allow one of the votes to count. There was no provision in Texas election law for overruling an election judge on such matters.<sup>25</sup>

Examples of cases of administrative incompetence and mistakes leading to misplaced allegations of voter fraud in St. Louis and Milwaukee are discussed in detail below.

<sup>22</sup> "In Brief/Florida: No Charges, But Pooch Can't Punch Ballot," *Los Angeles Times* (December 17, 2001), A23.

# THE POLITICS OF VOTER FRAUD CLAIMS

---

There are many reasons why electoral reform is difficult to achieve, chief among them the benefits the *status quo* bestows on politicians in charge of making the rules. Voting rights advocates working to expand the electorate and make voting easier for more citizens must also overcome recurring arguments that reform will encourage more voter fraud. Indeed, the specter of voter fraud has been manipulated by elites to restrict and shape the electorate for nearly two centuries.

## *The Late Nineteenth Century and the “Good Government” Defense*

The electoral reforms of the Progressive era dismantled Populist voting majorities and reflected the reformers' class and anti-immigrant biases. Following the turmoil of the election of 1896 when new immigrants, struggling farmers, and wage workers flooded into the electorate, wealthy elites pressed for tighter regulation of the electoral process. They promoted personal voter registration systems that had the effect of de-mobilizing the poor and working classes.<sup>26</sup> The reformers' rhetoric fastened on fraud and the need to eliminate it in order to protect 'the Democracy.' The perception of fraud and widespread electoral corruption gave their efforts moral ballast which obscured the class conflict at the center of the struggle for the vote.

*The specter of voter fraud has  
been manipulated by elites to  
restrict and shape the electorate  
for nearly two centuries.*

For Progressive era elites, voter registration was good government and universal voting was directly associated with corruption and voter fraud.<sup>27</sup>

Municipal reformers drawn from the ranks of the new middle and upper class professional strata assumed the lower classes possessed inferior moral capacities that produced unscrupulous behavior in politics. They wrestled control of government away from the older political machine organizations by imposing administrative reforms on the electoral process. These reforms deliberately privatized and personalized the social act of voting in order to undercut the machine's capacity to mobilize majorities through ethno-religious and other group-based appeals.<sup>28</sup>

<sup>26</sup> Frances Fox Piven and Richard A. Cloward, *Why Americans Don't Vote and Why Politicians Want It That Way* (Boston: Beacon Press, 2000), 91-2.

<sup>27</sup> Dayna Cunningham, "Who Are To Be Electors? A Reflection on the History of Voter Registration in the U.S.," *Yale Law and Policy Review* 9(2) (1991), 383.

<sup>28</sup> After the Civil War, the electorate was demobilized in different ways in the North and South. Black disenfranchisement was pursued through the use of violence and terror, and institutionalized through the re-writing of Southern state constitutions between 1890 and 1910. Mississippi pioneered the "Southern system" of burdensome residency requirements, periodic registration, poll taxes, literacy and "understanding" requirements, and exacting disqualification provisions, all designed to strip black men of the vote without reliance on overt racial classifications (Cunningham (1991), 377). There is a large scholarly literature on this subject. See, for example, classic works by V.O. Key, *Southern Politics in State and Nation* (New York: A.A. Knopf, 1949); and J. Morgan Kousser, *The Shaping of Southern Politics: Suffrage Restriction and the Establishment of the One-Party South, 1880-1910* (New Haven: Yale University Press, 1974). On efforts to reshape the electorate outside of the South during this period, see, Walter Dean Burnham, "The Appearance and Disappearance of the American Voter," in Walter Dean Burnham, *The Current Crisis in American Politics* (New York: Oxford University Press, 1983); and Paul Kleppner, *Who Voted? The Dynamics of Electoral Turnout, 1870-1980* (New York: Praeger, 1982). For a fascinating account of how nineteenth century voters behaved at the polls on Election Day, see Richard Franklin Bensel, *The American Ballot Box in the Mid-Nineteenth Century* (New York: Cambridge University Press, 2004).

Much has been written about the colorful and varied forms of political corruption in the nineteenth century.<sup>29</sup> The debate over the extent of fraud among scholars, however, has failed to settle the question of whether it accounted for the extraordinarily high levels of turnout that disappeared with the adoption of personal voter registration systems.<sup>30</sup> Nor is it certain that the new voter registration laws were responsible for reducing the election fraud they were aimed at eliminating. But, election fraud documented by the reformers usually involved organized efforts by election officials and politicians, not by the voters who were the intended target of restrictive reforms like voter registration.<sup>31</sup>

Nevertheless, voting rights have been won. Most of the conditions that once gave rise to what we would characterize as fraudulent practices today, such as ballots produced and distributed by the political parties, have changed. In the nineteenth century, election fraud was sometimes perpetrated by partisans acting together to steal elections. Local party organizations competed for voters and controlled votes through patronage, and the stakes were high. In those days, parties, patronage and fraud were intertwined. Today, local party organizations are weak to nonexistent, in part because their access to patronage has all but disappeared. They no longer control lucrative franchises, run police and fire departments, set utility rates or build large-scale public works. The demise of local parties and patronage over the last century has undermined the logic and eroded the means of committing voter fraud.

*The demise of local parties and patronage over the last century has undermined the logic and eroded the means of committing voter fraud.*

### ***The Civil Rights Era and Beyond***

With each significant effort to protect and extend the right to vote, opponents have argued that the expansion of the franchise, whether through federal protections for voting rights or through reduced structural barriers to the franchise, would lead to more voter fraud. The threat of fraud was taken up by congressional opponents of the Voting

Rights Act of 1965; it was raised in the conflict over extending the Act during the first Reagan Administration; and again, in more recent debates over the National Voter Registration Act.<sup>32</sup> It is the very success of these reforms that explains why fraud claims have re-emerged as a principle form of voter intimidation. The victories of the civil rights movement make it no longer easy or acceptable to suppress voting through the use of terrorism or violence, or with a poll tax or a literacy test. Today the intimidation is more subtle.

The dynamics of electoral competition in a two-party plurality system also contribute to the resurrection of the specter of voter fraud. When elections are close, the logic of competition drives opponents to fierce conflict. The winner in a two-party system needs only one vote more than his or her opponent; 51 percent of the votes wins it all, 49 percent wins nothing. Competing parties in

<sup>29</sup> See, for example, Glenn C. Altschuler and Stuart M. Blumin, *Rude Republic: Americans and Their Politics In the Nineteenth Century* (Princeton: Princeton University Press, 2000); and Tracy Campbell, *Deliver the Vote: A History of Election Fraud, an American Political Tradition – 1724-2004* (New York: Carroll & Graf, 2005).

<sup>30</sup> See, Piven and Cloward (2000), 25-6, discussing the work of Walter Dean Burnham, Philip Converse, Paul Kleppner and Jerrold G. Rusk. See also, Howard W. Allen and Kay Warren Allen, "Vote Fraud and Data Validity," in Jerome M. Clubb, William H. Flanigan, and Nancy H. Zingale, eds., *Analyzing Electoral History: A Guide to the Study of American Voter Behavior* (Beverly Hills: Sage Publications, Inc., 1981), 153-194.

<sup>31</sup> See Cunningham (1991), 384, citing Joseph P. Harris, *Election Administration in the United States* (Washington, D.C.: The Brookings Institution, 1934).

<sup>32</sup> For an important account of the movement to reform voter registration laws leading to the passage of the National Voter Registration Act of 1993, see Margaret M. Groarke, *Expanding Access to the Vote: An Analysis of Voter Registration Reform in the United States, 1970-1993* (Ph.D. diss., Department of Political Science, City University of New York, 2000).

close elections fight hard to maximize their chances of winning that 51 percent<sup>33</sup> because the closer the election, the fewer the number of voters that are needed to shift victory to one party or the other. Tight elections produce the biggest pay-off for the smallest shifts in vote share.

Theoretically, parties or campaigns can produce a shift by expanding votes for themselves or constraining votes for their opponents, or even pursuing both practices at the same time. But expanding the vote carries higher risks for incumbents. Elected officials try to preserve the majorities that elect them and are wary of the threat new voters pose. Both parties, therefore, are wary of expansion. Since the success of the Voting Rights Act prohibits them from carving out their majorities in ways that directly violate laws protecting voting rights, they shape and manage their electorates by more subtle means, through the rules that govern the electoral process. Both parties seek to control, enforce and bend electoral rules to their advantage. As the political scientist, E.E. Schattschneider once observed,

In politics as in everything else it makes a great difference whose game we play. The rules of the game determine the requirements for success. . . . and go to the heart of political strategy.<sup>34</sup>

For example, today, Republican party officials and incumbents support restrictive interpretations of the rules governing voter qualifications when they anticipate that tightening access to the vote will hurt their rivals.

They insist that the votes of legitimate, qualified voters are threatened by the votes of ineligible voters, justifying their support for restrictive identification requirements.<sup>35</sup>

The Democrats resist these efforts when they think the new rules will threaten their own party base; but if the new rules aren't likely to threaten the base, the Democrats, whose elected officials share the same interest in a stable, predictable electorate as their Republican colleagues, compromise and endorse new restrictions. The Democrats' concession to the inclusion

of an identification requirement for first time voters who register to vote by mail in the Help America Vote Act of 2002 (HAVA), in the face of widespread opposition on the part of voting rights advocates, is a case in point.<sup>36</sup> New HAVA voter identification requirements apply to a diffuse category of new voters whose party loyalties were unknown and therefore in adding this rule at the national level, neither party could claim an uncontested advantage or disadvantage. In the partisan wrangling over the bill, the important questions about the extent of voter fraud and the effectiveness of new rules in combating it were lost.

*Given the particular party and competitive dynamics of the current period, the use of baseless voter fraud allegations for partisan advantage has become the exclusive domain of Republican party activists.*

<sup>33</sup> Or a plurality when the occasional third party candidate is in the race.

<sup>34</sup> E.E. Schattschneider, *The Semisovereign People: A Realist's View of Democracy in America* (New York: Holt, Rinehart and Winston, 1960), 48-49.

<sup>35</sup> U.S. Senate, Republican Policy Committee (2005).

<sup>36</sup> Emily Pierce, "Senate Standoff Over Voter Fraud Provision Threatens to Sink Election Bill," *CQ Monitor News* (February 28, 2002); Karen Foerstel with Emily Pierce, "Hopes for Quick Accord on Election Standards Bill Face Liberals' Objections," *CQ Weekly - Elections* (April 13, 2002), 957; Geoffrey Gray, "Schumer's Identity Politics: Civil Rights Advocates Fight Compromise on Election Reform," *The Village Voice* (April 3-9, 2002), 42; Gabrielle B. Ruda, "Note: Picture Perfect: A Critical Analysis of the Debate on the 2002 Help America Vote Act," *Fordham Urban Law Journal* 31 (November 2003), 235.

In a competitive electoral environment it is easier and safer for the parties to try to stabilize the base and reduce the opposition's support than it is for either to recruit new voters. Given the particular party and competitive dynamics of the current period, the use of baseless voter fraud allegations for partisan advantage has become the exclusive domain of Republican party activists.

Take the American Center for Voting Rights (ACVR). This organization established a presence on the Internet in March 2005, just six days before a Republican-controlled U.S. House Administration Committee hearing on problems in the 2004 Ohio election, and was the only "voting rights" group allowed to testify. Although ACVR claims it is nonpartisan, its founders, leadership, and staff have strong ties to the Republican party.<sup>37</sup> Its report on "Voter Fraud, Intimidation and Suppression in the 2004 Presidential Election," professes to be "the most comprehensive and authoritative review of the facts surrounding allegations of vote fraud, intimidation and suppression made during the 2004 presidential election." It is little more than a compendium of poorly scrutinized newspaper articles sensationalizing election shenanigans allegedly instigated in all but two instances by Democrats.<sup>38</sup> Despite the not so veiled partisanship and absence of credentials, ACVR has achieved remarkable influence advocating for strict, government-issued photo identification requirements and promoting the idea that American elections are riddled with voter fraud. Its leader, attorney and political operative, Mark F. (Thor) Hearne, II, is a serial expert witness before Congress and other government bodies on the need for photo ID. His testimony repeatedly relies for evidence on anecdotes and misleading news reports that grossly overstate the problem of voter fraud.<sup>39</sup>

The systematic use of baseless voter fraud allegations is strategic and in this sense rational, if unethical. In the late nineteenth century when freedmen were swept into electoral politics and where blacks were the majority of the electorate, it was the Democrats who were threatened by a loss of power, and it was the Democratic party that erected new rules they claimed were necessary to respond to the alleged fraud of black voters.

Today, the success of voter registration drives among minorities and low income people in recent years threatens to expand the base of the Democratic party and tip the balance of power away from the Republicans. Therefore, it is not difficult to understand why party operatives might seek to strategically generate enough public support for new restrictions on the vote that will disproportionately hinder opposition voters.<sup>40</sup> These efforts are misleadingly labeled "the electoral integrity" movement because after two hundred years struggling for the vote and winning it from below, ordinary voters are not so easily discredited in the name of democracy. Efforts to do so must appeal to misplaced moral sensibilities like the idea that "integrity" trumps rights. In the end, baseless voter fraud claims are essentially political acts because the contested history of party, race and class in American politics makes them so.

<sup>37</sup> See bradblog.com ([www.bradblog.com/ACVR.htm](http://www.bradblog.com/ACVR.htm)) for a collection of articles on the ACVR by Brad Friedman and his colleagues.

<sup>38</sup> Dimitri Vassilaros, "Study' is Political Fraud," *Pittsburgh Tribune-Review* (August 8, 2005); available online at: [www.pittsburghlive.com/x/pittsburghtrib/s\\_360812.html](http://www.pittsburghlive.com/x/pittsburghtrib/s_360812.html).

<sup>39</sup> Hearne is listed as an "academic advisor" to the Commission on Federal Election Reform (the Carter-Baker Commission), despite his lack of academic credentials. For Hearne's testimony before government bodies, see, Testimony of Mark F. (Thor) Hearne, II, on "Voter Fraud in Ohio in the 2004 Presidential Election," U. S. House of Representatives, Committee on House Administration, March 21, 2005; "Regarding the Continuing Need for Federal Examiners and Observers to Ensure Electoral Integrity," Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Senate Committee on the Judiciary, Subcommittee on the Constitution Civil Rights and Property Rights, July 10, 2006; "Assessing the Conduct of the 2006 Mid-term Elections," Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Elections Assistance Commission, December 7, 2006.

<sup>40</sup> There is strong empirical evidence suggesting restrictive photo identification requirements place a disproportionate burden on low income people and minorities. See, Brennan Center for Justice at NYU School of Law and Spencer Overton, "Response to the Report of the 2005 Commission on Federal Election Reform," 2005; available online at [www.carterbakerdissent.com](http://www.carterbakerdissent.com). Overton served as a commissioner on the 2005 Commission on Federal Election Reform.

# THE USUAL SUSPECTS

## *The Historically Disenfranchised Are Often the Alleged Perpetrators of Voter Fraud*

Fraud allegations typically point the finger at those belonging to the same categories of voters accused of fraud in the past – the marginalized and formerly disenfranchised, urban dwellers, immigrants, blacks, and lower status voters. The targeting is not overt, the language is rarely explicitly racial. Instead, fraud claims tap into older elite associations of political corruption with minorities, big city machine organizations, and the poor. Allegations of voter fraud resonate with the public because they revive a familiar culture of corruption and legends about election fraud that enliven American political history. Today, the alleged culprits are mostly found among those still struggling for full inclusion in American life. This makes them suspect. That they are more likely to identify with one party than the other makes them doubly vulnerable to fraud accusations and to the collateral damage of high stakes competitive partisan politics.

*Fraud claims tap into older elite associations of political corruption with minorities, big city machine organizations, and the poor.*

## *Why Voter Registration Drives Are Vulnerable to Fraud Claims*

Since at least the 1960s, the voter registration drive has played a central role in black politics and broader efforts to engage the electoral participation of low-income groups.<sup>41</sup> The intensity of voter registration activities has waxed and waned over the years, with a recent upsurge in third party voter registration drive activity since the disputed 2000 presidential election. By 2004, approximately 12 million registered voters (or 8.5 percent of all registered voters) had registered as a result of a voter registration drive.<sup>42</sup>

## *How Americans Were Registered To Vote in 2004 (Numbers in Thousands)<sup>43</sup>*

	Voters	Percent
Went to a town hall or county/government registration office	34,657	24.5
At a department of motor vehicles agency	27,126	19.2
By mail	17,642	12.5
Filled out form at a registration drive	11,973	8.5
Registered at polling place	9,118	6.4
Filled out a form at a school, hospital, or on campus	8,078	5.7
Through a public assistance agency	1,094	0.8
Other	8,819	6.2
Don't know	22,901	16.2
<b>TOTAL</b>	<b>141,408</b>	<b>100%</b>

Source: U.S. Dept. of Commerce, Bureau of the Census. Current Population Survey, November 2004: Voter Supplement File.

<sup>41</sup> In the 1980s, white Christian conservatives and other middle class groups adopted the registration drive with considerable success, but it remains an iconic expression of black political aspiration.

<sup>42</sup> U.S. Dept. of Commerce, Bureau of the Census. Current Population Survey, November 2004: Voter Supplement File [Computer file]. ICPSR04272-v1. Washington, DC: U.S. Dept. of Commerce, Bureau of the Census [producer], 2005. Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributor], 2006-01-16; author's calculations.

<sup>43</sup> The table reports method of registration for all registered voters, excluding missing cases. The data are estimates with sampling and non-sampling error, and are weighted by age, sex, race, Hispanic ancestry, and state of residence to partially correct for bias due to under-coverage.

Those registering through drives were more likely to be people of color and of lower income than other registered voters.

### Method of Registration by Race and Income<sup>44</sup>

Filled Out Form at Registration Drive	
Race	
Whites only, non-Hispanic	8.9
Blacks only, non-Hispanic	15.2
Hispanic (all races)	15.5
Asian only, non-Hispanic	12.7
Others	10.1
Total Annual Family Income	
Less than \$15,000	11.6
\$15,000 or more	10.0

Source: U.S. Dept. of Commerce, Bureau of the Census. Current Population Survey, November 2004: Voter Supplement File.

The number of low income drive registrants is three times the number of low income voters registering at public assistance agencies mandated by the National Voter Registration Act of 1993 (NVRA) to provide registration opportunities. Just four percent of registered voters with total annual family income below \$15,000 (approximately 470,000 people) were registered to vote through a public assistance agency. This compares to approximately 1,328,000 low income voters, or 11.6 percent of those with less than \$15,000 in annual family income, who said they were registered through a registration drive.<sup>45</sup> It is clear that despite the intent of NVRA to open registration opportunities to low income Americans, thousands of eligible citizens would be left out of the electoral process were it not for the third party groups who register and encourage them to vote.

Competitive or high interest elections like those of the last six years increase incentives to mobilize voters, including the recruitment of new voters – not only to the parties, but to all the other groups who believe they have a stake in the outcome. The use of thousands of volunteers and temporary workers in these drives contributes to the potential for mistakes and duplication in the registration process. This is one of the consequences of essentially “outsourcing” voter registration to the private sector rather than placing the burden of registration on the state as is done in many of the European democracies.<sup>46</sup> If voter registration were mandatory like paying taxes, voter registration drives would not be necessary.

<sup>44</sup> The table compares only those registered voters who could identify their method of registration. Data on income are limited to people living in families. Family income is the combined income of all family members over the previous year and includes money from jobs, net income from business, farm or rent, pensions, dividends, interest, Social Security payments and any other money income received by family members who are 15 years of age or older.

<sup>45</sup> U.S. Dept. of Commerce (2005); author’s calculations. For an analysis of the recent drop off in implementation of the agency-based requirements of the NVRA, see *Ten Years Later, A Promise Unfulfilled: The National Voter Registration Act in Public Assistance Agencies, 1995-2005*, a report compiled by Demos, A Network for Ideas and Action; ACORN; and Project Vote (July 2005); available online at [http://projectvote.org/fileadmin/ProjectVote/pdfs/Tens\\_Years\\_Later\\_A\\_Promise\\_Unfulfilled.pdf](http://projectvote.org/fileadmin/ProjectVote/pdfs/Tens_Years_Later_A_Promise_Unfulfilled.pdf).

<sup>46</sup> The National Commission on Election Reform Task Force on the Federal Election System notes that, “the registration laws in force throughout the United States are among the world’s most demanding... [and are] one reason why voter turnout in the United States is near the bottom of the developed world.” National Election Commission, *Report of the Task Force on the Federal Election System*, chapter 2 “Voter Registration,” (July 2001), 3; available online at [www.tcf.org/Publications/ElectionReform/NCFER/hansen\\_chap2\\_voter.pdf](http://www.tcf.org/Publications/ElectionReform/NCFER/hansen_chap2_voter.pdf).

029093

With the upsurge in voter registration activity has come more media attention to the handful of cases in which organizations have been accused of submitting fraudulent registration applications to local elections officials. No amount of fraud in the registration process is acceptable, but the accusations that voter fraud "is breaking out all over"<sup>47</sup> as a result of "a coordinated effort by members of some organizations to rig the electoral system through voter registration fraud" that put "thousands of fictional voters"<sup>48</sup> on the rolls are unsupported by any credible evidence anyone has been able to bring to bear. In fact, the suspicions about a vast "left-wing" or "Liberal Democrat-sponsored" conspiracy to commit voter registration fraud border on the paranoid.<sup>49</sup>

According to available government data, between October 2002 and September 2005, the federal government prosecuted just 33 people for various misdemeanor and felony crimes related to any form of election fraud that could have involved voter registration.<sup>50</sup> All but two people indicted were prosecuted for falsifying information about *their own* eligibility to vote, including: 20 people in four states who were prosecuted for registering or voting but who were ineligible under state law because they lacked U.S. citizenship; and ten people who voted in the 2004 presidential election in Milwaukee who were prosecuted for falsely certifying that they were eligible to vote when they were still under state supervision for felony convictions.<sup>51</sup> Ten of the 33 – five of the non-citizen cases and five of the felon cases – were either acquitted of the charges against them or had their indictments dismissed.<sup>52</sup> At least 19 of the 23 people convicted were alleged to have voted illegally because they were ineligible to vote, but notably, these people registered to vote and voted using their real names, hardly acts of conspiracy or of criminals trying to get away with committing fraud. Only two people were prosecuted for crimes related to fabricated voter registration applications for other people. One pleaded guilty to making false statements to a grand jury in connection with 11 fraudulent registration forms. The other, a St. Martinsville, Louisiana city councilwoman running in a hotly contested race for re-election in 2002, pleaded guilty to conspiring to submit false address

*Between October 2002 and September 2005, the federal government prosecuted just 33 people for various misdemeanor and felony crimes related to any form of election fraud that could have involved voter registration.*

<sup>49</sup> See, for example, the postings of "Dean," on [democratvotefraud.blogspot.com](http://democratvotefraud.blogspot.com) (accessed in October 2006). This blog collects dozens of news articles from the 2004 election, most of which report allegations of campaign dirty tricks and voter registration fraud, and discuss protests against new "anti-fraud" measures adopted in some states like Ohio, all perpetrated by Democrats or their supporters. Under the title, "Liberal Democrat Vote Fraud," Dean explains, "We all saw the results of the 2000 American election. This time, I'm personally going to fight back in the only way that I can, with a blog that documents as many news reports about Democrat fraud as I can."

<sup>50</sup> U.S. Department of Justice, Criminal Division, Public Integrity Section, "Election Fraud Prosecutions and Convictions; Ballot Access and Voting Integrity Initiative, October 2002 – September 2005" (n.d.); available online at <http://cha.house.gov/media/pdfs/DOJdoc.pdf>. Several of these people technically were not charged with voter registration fraud, but with making false statements to government agencies (i.e., a driver's license bureau or the INS) regarding their citizenship status or eligibility to vote. This number includes cases of illegal voting due to ineligibility, assuming they must have involved registration fraud, even if it wasn't charged.

<sup>51</sup> One of those convicted, Kimberly Prude, worked as an election inspector in Milwaukee. As of February 2006, Prude was appealing her conviction. See, *United States of America v. Kimberly E. Prude*, "Criminal Complaint," United States District Court, Eastern District of Wisconsin, Case No. 2:05-CR-00162-RTR (June 22, 2005).

<sup>52</sup> In the ten cases of alleged illegal felon voting in Milwaukee, one defendant was acquitted at trial and four had their charges dismissed. Among the dismissals evidence was presented which suggested defendants did not knowingly commit fraud.

information on two voter registration cards for people who did not live in her district. Those people voted to help the councilwoman win re-election by a slim margin.<sup>53</sup>

### Federal Prosecutions of Voter Registration Fraud 2002 – 2005

VOTER REGISTRATION	DISPOSITION				
	Dismissed	Acquitted	Pleaded Guilty	Convicted	Total
<b>False claim of eligibility</b>					
Non-citizen	4	1	3	13	21
Felon	4	1	3	2	10
<b>False statements to grand jury about (1) voter registration forgeries</b>			1		1
<b>Conspiracy to submit false information on (2) voter registration applications</b>			1		1
<b>TOTAL</b>	<b>8</b>	<b>2</b>	<b>8</b>	<b>15</b>	<b>33</b>

\* All but two of those charged with making false claims about their eligibility to register (two non-citizens who were convicted) were also charged with casting a false or fraudulent ballot, as reported above.

Source: U. S. Department of Justice, Criminal Division, Public Integrity Section, *Election Fraud Prosecutions & Convictions, Ballot Access & Voting Integrity Initiative, October 2002 – September 2005* (n.d).

Registration drives in recent years have been more effective in registering low income voters than the agency-based requirements of the NVRA. Successful voter drives hold the potential for adding significant new numbers of voters to the rolls and threatening the balance of power between the two parties. Their effectiveness has made them a target for fraud allegations. Their own sporadic failings in the production of duplicate or improperly filled out registration cards, sloppy oversight, poor quality control, and occasional fraud have only fueled the allegations. Such problems are inevitable as long as voter registration is not mandated or universal.

# CASE STUDIES

---

The following case studies are illustrative of the politics of voter fraud claims. They do not tell us anything about the incidence of voter fraud in American elections today. That question is central and addressed above. It has always been difficult to measure fraud or even specify it, and it is important to stress that until better evidence comes to light, we will not be able to compile comprehensive statistics on levels of cheating by voters. Researchers are hampered in studying voter fraud because government agencies fail to track it and are often unresponsive to information requests. We can, however, make educated guesses from the available evidence, and what studies there are suggest voters rarely commit fraud. It is only in the public interest that we learn from real cases of voter fraud so that we can better understand where our electoral systems are truly vulnerable. Spurious cases of fraud like those discussed here are equally instructive because they expose the shrewd and partisan manipulation that makes real election reform so difficult.

The case studies presented below demonstrate the ways these partisan interests, database and clerical errors and incompetent electoral administration are sometimes exploited to exaggerate the problem of voter fraud. The intent of the exaggeration is to intimidate the general public and even law makers into believing that American elections face a security threat from a rising tide of deceitful and criminal voters. Unfortunately, in numerous places election administration is in crisis, and in general, faces much larger challenges from changing technology, inadequate resources, poor staffing and training, and especially, partisan manipulation. These are real issues deserving of attention, good ideas, resources and a democratic spirit. They won't be adequately addressed as long as the voter fraud hoax confuses and distracts us from confronting them.

## *ACORN and the Mac Stuart Affair*

One important example of how the politics of fraud claims are used to manipulate the public about the threat of voter fraud is the political pillorying of ACORN for alleged wide scale registration fraud in the 2004 and 2006 election cycles.

ACORN (Association of Community Organizations for Reform Now) is the largest community-based organization of low and moderate income people in the U.S. It organizes locally and has developed ballot campaigns for a range of issues such as campaign finance reform and raising the minimum wage. Opponents of ACORN's minimum wage ballot initiative program deployed allegations of voter registration fraud, which then generated official investigations, media coverage and litigation, as a strategy to undermine ACORN's ability to qualify and pass referenda in several states.<sup>54</sup> One of these cases involved a disgruntled former employee named Mac Stuart who for a while became a cause célèbre of ACORN's enemies and the pundits who fuel the fraud paranoia. The Mac Stuart affair is instructive because it highlights how politics construct the fraud debate.

In November 2003, Mac Stuart was hired by Florida ACORN and put to work as a petition gatherer collecting signatures supporting the placement of a Florida Minimum Wage Amendment on the

<sup>54</sup> "ACORN Defeats Anti-Voter Legal Attacks; Group's Voter Registration Efforts Vindicated as Baseless Lawsuits Collapse," *Common Dreams Progressive Newswire* (December 14, 2005); Joni James, "Voter Fraud Charges Collapse," *St. Petersburg Times* (December 15, 2005).

029096

2004 ballot. When Stuart was fired for suspicion of his involvement in an illegal check cashing scheme a few months later, he filed a Florida whistle blower lawsuit against ACORN claiming the organization engaged in a variety of illegal practices. He was represented by partisan attorneys at Rothstein, Rosenfeldt, Adler, a Fort Lauderdale law firm, and spoke secretly with an official at the Florida Chamber of Commerce which was in the midst of opposing ACORN's efforts to raise the state's minimum wage. Stuart provided his attorneys with 179 applications, many of them for Republican registrants, he claimed had been collected and withheld by ACORN.<sup>55</sup>

In the course of petitioning for signatures, ACORN workers conducted voter registration activities to ascertain whether signatories were registered to vote. Stuart's lawsuit claimed that petitioners were paid an additional \$2.00 for each completed registration card they collected; that ACORN illegally copied the voter registration cards its workers collected and sold its lists for a profit; that ACORN committed fraud by failing to deliver registration cards for people who designated "Republican" as their party affiliation, and otherwise collected cards from ineligible individuals such as convicted felons. Stuart maintained that in July 2004, he refused to participate in these illegal activities and was fired in retaliation under the pretext that he had attempted to cash another person's check.<sup>56</sup>

His lawyers filed a second suit against ACORN on behalf of 11 people whose names were among the allegedly withheld voter registration applications Stuart had provided.<sup>57</sup> Rothstein, Rosenfeldt, Adler attorneys claimed ACORN had deprived their clients of their constitutional right to vote and committed fraud against them.

After Stuart was fired, he held a news conference and contacted television and print news reporters claiming that "[t]here was a lot of fraud committed" by ACORN, asserting the organization knowingly submitted thousands of invalid registration cards while storing away cards for people designating their party affiliation as Republican. Stuart's allegations were immediately picked up by news organizations such as the *Washington Times*, the *Florida Times-Union*, and other Florida newspapers, and began to spread on rightwing Internet blogs. The Florida Department of Law Enforcement took the unusual step of announcing an investigation into ACORN.<sup>58</sup> In fact, for a while, Stuart's assertions were taken as fact and repeatedly reported as evidence that ACORN routinely engaged in fraud to promote its "radical political agenda."<sup>59</sup> That is, until the real facts about Stuart came to light and his case collapsed in court.

### ***Fraud charges collapse but the damage continues***

ACORN denied, and Stuart failed to prove, that canvassers were paid by the card to collect voter registration applications. ACORN's copying of voter registration applications was an element of their quality control program and well within the bounds of Florida law.<sup>60</sup> Finally, ACORN denied, and Stuart failed to produce evidence, that the organization prejudiced Republican voter registration applicants or misleadingly solicited registration cards from ineligible applicants. ACORN countersued Stuart for defamation and libel. On December 6, 2005, the matter of

<sup>58</sup> News Release, "FDLE Investigates Statewide Voter Fraud," Florida Department of Law Enforcement (October 21, 2004).

<sup>59</sup> Quoting Mike Flynn, Director of Legislative Affairs for the Employment Policies Institute; see Press Release, "ACORN's Voter Fraud in Ohio is Part of Larger Pattern," Employment Policies Institute (August 11, 2006). See, also, Meghan Clyne, "ACORN and the Money Tree," *National Review Online* (October 31, 2004); and American Center for Voting Rights, "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," ACVR Legislative Fund Report (August 2, 2005), 41-44; available online at [www.ac4vr.com/reports/072005/080205report.pdf](http://www.ac4vr.com/reports/072005/080205report.pdf).

<sup>60</sup> Nothing in Florida's election code prohibits private, third-party voter registration organizations from photocopying the voter registration applications they collect before submitting them to local elections officials.

**Mac Stuart v. ACORN** was dismissed with prejudice by a federal judge, exonerating ACORN of any and all wrongdoing.<sup>61</sup> ACORN prevailed in their counterclaims and won a judgment of defamation against Stuart.

ACORN also prevailed in the second Rothstein, Rosenfeldt, Adler suit. Shortly after it was filed, nine of the 11 plaintiffs asked to be dismissed from the case. As ACORN's lawyers deposed the remaining two plaintiffs it became clear that their lawyers had not asked them if they were qualified to vote, if they had completed the applications Stuart had given the attorneys or whether the plaintiffs were in fact Republicans. One of the two was not qualified to vote, neither remembered completing the application used as the basis for the complaint and both said that, inconsistent with their applications, they were not Republicans and never would have checked off that they were. Stuart was inconsistent in his testimony in how he obtained the applications in the first place.<sup>62</sup> This case, too, was dismissed with prejudice.

The Florida Department of Law Enforcement investigation found no evidence of illegal or fraudulent activity by ACORN. A public records request by Project Vote asking all Florida counties for any documents related to voter fraud elicited just three alleged cases of illegal activity, only one of which involved temporary ACORN workers.<sup>63</sup>

The problem is that the end of this story has received considerably less media attention than the unfounded claims of organized voter fraud on the part of ACORN. Opponents of ACORN continue to spread false rumors that the organization engages in voter fraud. For example, the Employment Policies Institute (EPI) issues dozens of press releases and "reports" attacking ACORN every year. EPI is a non-profit organization that in 2004 paid over \$600,000 in "management" fees to its executive director's publicity firm which lobbies on behalf of the hotel, restaurant, alcoholic beverages and tobacco industries.<sup>64</sup> Those industries are opposed to ACORN's efforts to raise the minimum wage in Florida and elsewhere. As late as July 2006, months after ACORN was fully vindicated in court, EPI was still claiming they engaged in a "pattern and practice" of voter fraud, citing the Mac Stuart affair as more evidence of ACORN's "widespread practice of fraud."<sup>65</sup>

### ***Voter fraud allegations used to restrict voter registration programs***

With ACORN under a cloud, Florida passed a law that carried stiff penalties for organizations failing to turn in voter registration applications later than ten days after they were collected. The law's reporting requirements were so draconian the League of Women Voters ended 77 years of voter registration activity in the state because it feared it could not comply and would be bankrupted if there were problems with just 16 registration forms collected by its volunteers. A federal judge later blocked the implementation of the law as unconstitutional.<sup>66</sup>

<sup>61</sup> Joni James, "Voter Fraud Charges Collapse," *St. Petersburg Times* (December 15, 2005).

<sup>62</sup> Telephone interview with Brian Mellor, Senior Counsel, Project Vote (April 13, 2006).

<sup>63</sup> Mellor interview (2006).

<sup>64</sup> Employment Policies Institute, "2004 Form 990, Return of Organization Exempt From Income Tax," U.S. Department of the Treasury, Internal Revenue Service, Schedule A.

<sup>65</sup> A "pattern and practice" of wrongdoing evokes conspiracy and as a legal term refers to the crime of racketeering. See, Employment Policies Institute, *Rotten ACORN: America's Bad Seed* (July 2006), 18-19; available online at [www.rottenacorn.com/downloads/060728\\_badSeed.pdf](http://www.rottenacorn.com/downloads/060728_badSeed.pdf). In fact, ACORN, along with America Coming Together, the NAACP Voter Fund, and the Ohio AFL-CIO were defendants in an Ohio lawsuit that alleged the groups conspired to engage in a series of "predicate" or related acts of forgery, document tampering and drug trafficking in order to produce fraudulent voter registration cards. See, *Rubick v. America Coming Together, et al.*, State of Ohio, County of Wood, Court of Common Pleas, Case No. 04-CV650 (2004). Plaintiffs' complaint argued each fraudulent card submitted represented a predicate act. Under the federal Racketeer Influenced and Corrupt Organizations Act or RICO, a person or group can be charged with racketeering by a U.S. Attorney if they commit any two of 35 crimes (27 federal crimes and eight state crimes) within a 10-year period and the prosecutor believes those charged committed the crimes with similar purpose or results.

<sup>66</sup> *League of Women Voters of Florida v. Cobb*, U.S. District Court, Southern District of Florida, "Order Granting in Part and Denying in Part Plaintiff's Motion for Preliminary Injunction and Granting in Part and Denying in Part Defendant's Motion to

## The Perils of List Matching

A common source of fraud claims is a list matching exercise gone wrong. The ready availability of high powered computing capacity and an ever expanding range of public records databases, have created a cottage industry of software programs and list management consultants ready to match lists for hire.

When databases contain errors or compile data differently, matching them against one another can cause a high degree of what statisticians call "false positive" errors or matches that are not really matches. A prime example is the infamous felon purge list compiled by a private firm for the Florida Secretary of State's office in 2000. That list joined data on convicted felons with the voter registration rolls using rules that matched only the first four letters of the first name, 90 percent of the last name and an approximate date of birth.<sup>67</sup> The result was a highly inaccurate list of people whom the Secretary of State wanted to prevent from voting.<sup>68</sup>

## Voting in Connecticut and beyond

In October 2002, the Republican National Committee (RNC) claimed that in the course of "updating" its voter files, it discovered over 722,000 people nationwide were registered to vote in more than one state, and that at least 600 of these had voted more than once in a single election. In Connecticut, the Secretary of State was alarmed. The RNC released a report that said 7,700 registered voters in Connecticut were also on the rolls in other states and that 54 of them had voted more than once in the 2000 election. Secretary Susan Bysiewicz, a Democrat, asked the RNC for the names of the duplicate registrants and voters. "I am surprised by the numbers," she said, "it sounds like a lot. We have two million (registered) voters, so I suppose it's possible; but in four years we haven't prosecuted one instance of voter fraud."<sup>69</sup>

At first the RNC refused to release the names and criticized Bysiewicz for not finding the problem first. When they finally turned over the names of the 54 alleged double voters, Bysiewicz found their claims baseless. Her office conducted a week long investigation of every suspect voter produced by the RNC and found that 29 had never voted in Connecticut, but did vote in another state; 18 voted in Connecticut, but not in the other state named in the report; four names had different birth dates than those on the RNC list, and three were turned over to criminal investigators because out-of-state data could not be obtained for verification.<sup>70</sup>

---

Dismiss," Case No. 06-21265-CIV (August 28, 2006).

<sup>67</sup> Greg Palast, "Florida's 'Disappeared Voters': Disenfranchised by the GOP," *The Nation*, (February 5, 2001); and Palast, *The Best Democracy Money Can Buy* (Sterling, Virginia: Pluto Press, 2002), 6-43.

<sup>68</sup> The U.S. Civil Rights Commission conducted an investigation into the 2000 election in Florida and concluded, "Many people appear on the [felon purge] list incorrectly." One in seven people on the felon purge list supplied to the supervisor of the Miami-Dade election office was erroneously listed and therefore put at risk of disenfranchisement. These people were disproportionately African American. See, U.S. Civil Rights Commission, *Voting Irregularities in Florida During the 2000 Presidential Election* (2001), chapter 1. See also a disclaimer for the inaccuracy of the felon purge list posted on ChoicePoint's website ("Choicepoint's Mythical Role in Elections Past and Present," posted August 7, 2006; available online at [www.choicepoint.com/news/statement\\_08072006.html](http://www.choicepoint.com/news/statement_08072006.html)). ChoicePoint is the parent company of Database Technologies (DBT), the firm hired for the period 1998 to 2000 by the Florida Division of Elections to create its voter exception list. ChoicePoint claims, "DBT Online was not required to provide a list of exact name matches. Rather, the matching logic only required a 90 percent name match, which produced "false positives" or partial matches of the data. Moreover, the Division of Elections required that DBT Online perform 'nickname matches' for first names and to 'make it go both ways.' Thus, the name Deborah Ann would also match the name Ann Deborah. At a meeting in early 1999, the supervisors of elections expressed a preference for exact matches on the list as opposed to a 'fairly broad and encompassing' collection of names. DBT Online advised the Division of Elections that it could produce a list with exact matches. Despite this, the Division of Elections nevertheless opted to cast a wide net for the exclusion lists."

<sup>70</sup> Press release, "Voter Fraud Claims by Republican Party Unfounded," Office of the Secretary of State Susan Bysiewicz (October 22, 2002); see also, "Bysiewicz: Double Voting Report Wrong," *The Associated Press State and Local Wire* (October 22, 2002).

### ***Double dipping in New Jersey***

A few years later, in time for the next federal election cycle, the New Jersey state Republican party (RSC) claimed it had researched voter registration files in a number of states and found evidence of multiple voting. In September 2005, the state party sent a stern letter to New Jersey Attorney General Peter Harvey threatening a lawsuit for failing to enforce state election laws governing the voter registration rolls.<sup>71</sup>

The basis for the RSC claims was their own “exhaustive investigation” of voter files from New Jersey’s 21 counties, matched internally county to county on first name, last name and date of birth, as well as against the voter registration files of five other states, New York, Pennsylvania, Florida, North Carolina and South Carolina. In addition, the RSC matched the New Jersey county files against lists of deceased persons from state and federal databases and other commercially available lists. Based on their analysis, the RSC said it found evidence of widespread multiple voting in the November 2004 general election – 4,397 people alleged to have voted more than once in New Jersey, and 6,572 people who “appear to have” voted in New Jersey and another state. Moreover, the RSC claimed that 4,755 dead people had voted and warned the problem could be even worse since the state’s rolls contained tens of thousands of duplicate records and the names of some well known felons in the state.

There is little doubt that New Jersey’s county voter registration lists contained registration records for people who moved away or died. The existence of so-called “deadwood” on voter registration records across the country is well-known. But the presence of deadwood is not in and of itself evidence of voter fraud.

A subsequent more thorough analysis of the data files the RSC supplied to the state suggests major problems with the accuracy of the RSC analysis and therefore the veracity of their claims. The Brennan Center for Justice working with Dr. Michael McDonald, an elections expert at George Mason University, concluded that “these lists simply do not prove what they purport to prove.”<sup>72</sup> Their report uncovered methodological errors in the RSC’s list matching techniques, such as omitting middle initials and suffixes like “Jr.,” which resulted in the listing of duplicate records for the same person then counted by the RSC as voting twice (from the same address). Mismatches of different people were presumed to be the same person, and again counted as voting twice. Statistical and database experts know that relying solely on non-unique identifiers such as name and date of birth to match records produces a high rate of false positives.<sup>73</sup> The Brennan Center/McDonald detailed analysis of the alleged 4,397 double votes recorded in the New Jersey county voter files accounted for them all as the likely product of false positives, errors in the data, duplicate records for the same person, and the statistical likelihood that two people will share the same name and birth date.

### ***Voting from the grave in Detroit***

Yet one more example of the damage flawed list matching efforts can inflict comes from an oft-cited news item appearing in the *Detroit News* in February 2006. The article, written by Lisa M. Collins, was headlined, “In Mich. Even Dead Vote,” and continued, “From Holland to Detroit,

<sup>71</sup> Letter from Mark D. Sheridan to Hon. Peter C. Harvey, dated September 15, 2005. Copy in author’s possession. Election administration is decentralized to the county level in New Jersey, with the Attorney General serving as the state’s chief elections officer.

<sup>72</sup> The Brennan Center for Justice at NYU School of Law and Dr. Michael McDonald, “Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General,” December 2005, 11; available online at [www.brennancenter.org/dynamic/subpages/download\\_file\\_35010.pdf](http://www.brennancenter.org/dynamic/subpages/download_file_35010.pdf).

<sup>73</sup> Ted Selker and Alexandre Buer, “Voter Removal From Registration List Based on Name Matching Is Unreliable,” Voting Technology Project – MIT Media Laboratory, October 28, 2004; available online at <http://72.14.209.104/search?q=cache:diE40vkjeLoJ:www.vote.caltech.edu/reports/purging-vrdb.pdf+&hl=en&gl=us&ct=clnk&cd=1>.

votes were cast by 132 dead people; Detroit's voting records are riddled with inaccuracies, casting doubt on elections' integrity."<sup>74</sup> The allegations of voting from the grave in Detroit, a poor and majority black city, are repeatedly cited by conservative bloggers in their litany of purported evidence that voter fraud is rampant in America.

But a full reading of the article itself indicates that the News did not attribute these irregularities to voter fraud. Instead, they suggested the irregularities were more likely due to clerical errors.<sup>75</sup> Influential Republican political operative, Mark F. (Thor) Hearne, paid counsel to the Bush-Cheney 2004 re-election campaign and a member of the U.S. Elections Assistance Committee's Voter Fraud – Voter Intimidation Working Group, as well as Missouri's HAVA Advisory Commission, nevertheless repeated the misleading allegations of dead people voting in Detroit when he testified before a U.S. Senate panel in July 2006.<sup>76</sup> Versions of his testimony have appeared as a feature article in the magazine of the Bar Association of Metropolitan St. Louis,<sup>77</sup> and again as testimony given to the U.S. Elections Assistance Commission in December 2006.<sup>78</sup>

This time the list matching was not performed by an elected official and presidential campaign co-chair, as it was in Florida, or a political party, as it was in the Connecticut and New Jersey examples. It was done by a newspaper which presented no assurances that it had the kind of expertise in computer programming, statistics, or records management required to make an accurate evaluation.<sup>79</sup>

On March 5, 2006, the News printed a letter from Kelly Chesney, the Communications Director for the Michigan's Republican Secretary of State, which challenged the implication that dead people were voting in Michigan. Chesney reported that an analysis of the 132 alleged deceased voters found that this was the number of absentee ballots mailed out to voters who subsequently died in the weeks before Election Day. Of the 132 absentee ballots, she said "97 were never returned, and 27 were voted and returned prior to the voters' deaths."<sup>80</sup> This substantial correction to the implications of voter fraud in Michigan has been roundly ignored by activists who continue to cite what is now an out-dated news item reporting erroneous information.

<sup>74</sup> Lisa M. Collins, "In Mich. Even Dead Vote," *The Detroit News* (February 6, 2006).

<sup>75</sup> "Clerical errors [in the Michigan voter file are] so pervasive that it is difficult to determine in many instances who actually voted;" and citing Mark Grebner, the list vendor and political consultant upon whose research the News relied, "...Grebner says he's never found evidence of organized fraud in Detroit." See, Collins (2006).

<sup>76</sup> Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Senate Committee on the Judiciary, Subcommittee on the Constitution, Civil Rights and Property Rights, "Regarding the Continuing Need for Federal Examiners and Observers to Ensure Electoral Integrity," July 10, 2006.

<sup>77</sup> Mark F. (Thor) Hearne, II, "The Missouri Voter's Protection Act: Real Election Reform for All Missouri Voters," *St. Louis Lawyer*, June, 2006; available online at [www.bamsl.org/members/stlawyer/archive/06/june06.html#feature](http://www.bamsl.org/members/stlawyer/archive/06/june06.html#feature).

<sup>78</sup> Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Elections Assistance Commission, "Assessing the Conduct of the 2006 Mid-term Elections," December 7, 2006.

<sup>79</sup> In fact, the News admitted in the article that they "did not review every vote cast, but instead targeted voter records based on several factors, such as the voter's birth year or voting history. Though limited and somewhat random searches were done, each search found voting records in error or highlighted names of voters who in fact could not have voted." This is hardly an adequate methodology.

<sup>80</sup> Editorial and Opinions, Special Letter, "Claims That the 'Dead' Voted Were Wrong," *Detroit News* (March 5, 2006).

## ***St. Louis: More Bad Lists, Even Worse Election Administration***

St. Louis, another majority black city with budget problems, presents a case study for how the mishandling of voter registration and elections procedures can be misperceived as fraud.

### ***Whose mess on Election Day 2000?***

There is little doubt that in the past St. Louis experienced election fraud and public corruption. St. Louis politics were long organized by political machines and fraud has a storied past which for some, at least, condemns the politics of the present.<sup>81</sup> In 2000, the historical memory of fraudulent elections, bribery, conspiracies, ballot tampering, and voting from the grave colored the rush to judgment when administrative mismanagement and shockingly poor record-keeping combined to produce troubling election irregularities.<sup>82</sup> Before the irregularities could be sorted out, they were seized upon by partisans. One of them, Missouri's senior Republican senator, Kit Bond, claimed the problems were evidence of a [Democratic party-driven] "major criminal enterprise designed to defraud voters," instead of what an extensive federal probe later determined to them to be – procedural incompetence and official failure to abide by the law.<sup>83</sup>

For many voters attempting to cast ballots in the 2000 presidential election, Election Day in St. Louis was a chaotic mess. Many long-time voters were told that they were not registered to vote when they showed up at polling sites where they had cast ballots in the past. To re-establish their legitimacy, many of these rejected voters were told to go down to the St. Louis Election Board's headquarters at 300 North Tucker Boulevard and cast a ballot there since the phone lines to the Board were jammed and election judges staffing the polling sites were unable to establish whether such voters' names had been moved to an "inactive" list of registered voters.<sup>84</sup>

### ***The illegal "Inactive" list***

It was this controversial inactive list and the failure of the St. Louis Elections Board to comply with the NVRA that later formed the basis for a federal lawsuit alleging the Board "denied or significantly impaired the voting rights" of thousands of city voters before the election.<sup>85</sup>

Missouri law requires bi-partisan control of election administration. Local boards of election have equal representation of Democrats and Republicans as do positions staffed by the boards. The St. Louis Board has had problems maintaining accurate voter registration rolls, and leading up to the 2000 election, there were still no clear rules for specifying when a voter should be dropped from the rolls.<sup>86</sup>

<sup>81</sup> Secretary of State Matt Blunt, *Mandate For Reform: Election Turmoil in St. Louis, November 7, 2000* (July 24, 2001); available online at (herein cited as 'Blunt Report'), 39-46.

<sup>82</sup> For an excellent example of the rush to judgement, see chapter four, 'Politically Active after Death,' in John Fund's *Stealing Elections: How Voter Fraud Threatens Our Democracy* (San Francisco: Encounter Books, 2004).

<sup>83</sup> For a tale of Depression-era ballot tampering linked to public corruption and waterfront development schemes in St. Louis, see chapter 7 "The Real Foundations of the Gateway Arch," in Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition, 1742-2004* (New York: Carroll & Graf Publishers, 2005). See also, Bruce Rushton, "Dead Man Voting," *Riverfront Times* (April 24, 2002). For Sen. Bond's remarks, see Carolyn Tuft, "Bond Wants Federal Investigation of Problems at City Polls; He Accuses Democrats of 'Criminal Enterprise' in Keeping Polls Open Late; Democrats Criticize Election Board," *St. Louis Post-Dispatch* (November 10, 2000), A1. According to the *Riverfront Times*, "In his letters to...two federal agencies, Bond wrote...of a 'deliberate scheme' planned in advance so unregistered voters could vote illegally: 'There is reason to believe that collusion existed to commit voter fraud and voter fraud occurred on a wide scale throughout the city of St. Louis.'" See, Safir Ahmed, "Slimin' the City: When It Comes to Election Day Problems in St. Louis, the Politicians' Rhetoric Doesn't Match the Reality," *Riverfront Times* (November 15, 2000).

<sup>86</sup> Office of the State Auditor of Missouri, Board of Election Commissioners, City of St. Louis, Missouri, Report No. 2004-40 (May

Between 1994 and 2000, the Board conducted a series of mail canvasses of its voter registration rolls, none of which complied with the requirements of the NVRA.<sup>87</sup> Based on these improper canvasses, the Board removed more than 50,000 names of voters who had been on the rolls in 1996, and “made no effort to notify inactive voters that their registration status had changed, that their names would not appear on the voter registration lists provided to election judges in each voting precinct, or that they would face additional administrative steps on election day before they would be permitted to vote.”<sup>88</sup> This number represented roughly 40 percent of the total number of votes cast in St. Louis in the 1996 election, and was about twice the national and state averages for the proportion of inactive voters on the rolls.<sup>89</sup> Moreover, for all elections it conducted after 1994, the Board failed to provide precinct election judges a list of any of the voters it had designated as “inactive.” This failure created mass confusion at polling sites when many legitimate voters showed up to vote and were told they were no longer registered.<sup>90</sup>

In the days leading to the November 7, 2000, election, the unprecedented administrative reclassification of thousands of active voter registration records in the overwhelmingly Democratic city was seen by Democrats, including national party officials with the Gore-Lieberman campaign, as an illegitimate Republican party-sponsored effort to restrict Democratic voting. When he spoke at a Gore-Lieberman campaign event, Democratic Congressional hopeful William Lacy Clay, Jr., told supporters not to “let anyone turn you away from the polls,” and warned, “If it requires leaving the polls open a little longer, we’re going to get a court order to do it.”<sup>91</sup>

### **The showdown**

In fact, this is exactly what happened. Voters stood in line for hours. First, they had to check in with precinct workers, then, for those whose names were no longer on the precinct voter registration lists, they stood in another line to plead their case before their precinct’s election judge.<sup>92</sup> When many of these officials were unable to confirm their registration status with headquarters because they couldn’t get through to elections officials at the Board, they sent voters down to the Board’s office to try to resolve the problems on their own. According to news reports, “It made for a wild hour at Board’s downtown office,

where hundreds of voters turned away from the polls because they were not registered or had problems voting filled the lobby throughout the day. By early evening, the lobby was shoulder to shoulder with people who wanted to vote.”<sup>93</sup>

In the afternoon, the Democrats and the Gore-Lieberman campaign filed suit in a state circuit court requesting the polls remain open for an additional three hours to accommodate voters victimized by the inaccessible and inaccurate inactive list.

<sup>88</sup> St. Louis Election Board Consent Order, 4.

<sup>89</sup> In 1996, 122,003 votes were cast in the general election in the City of St. Louis. In 2002, according to records from the Federal Election Commission, both nationwide and for the state of Missouri, 12 percent of all voters on the rolls were classified as “inactive,” compared to 22 percent in the City of St. Louis. See, Mo. State Auditor’s Report, 15.

<sup>90</sup> St. Louis Election Board Consent Order, 4.

<sup>91</sup> David Scott, “Ashcroft, Talent Decide Against Pursuing St. Louis Voter Fraud Claims,” *Associated Press* (November 8, 2000).

<sup>92</sup> The State Auditor found that the St. Louis Election Board frequently failed to secure the minimum number of precinct-level election judges as required by state law. Section 115.081, RSMo 2000, mandates four election judges, two from each major political party, for each polling place at each primary and general election, or about 1,600 election judges per major election. The Auditor found that the Board has not been able to attract more than 1,200 such judges in recent elections. See, Mo. State Auditor’s Report, 24.

<sup>93</sup> Scott (2000); see also, Ahmed (2000).

St. Louis Circuit Judge Evelyn Baker complied, but her order was overturned within 45 minutes of the regular poll closing time (7 PM) by a three-judge appeals panel. The St. Louis City Board of Elections successfully argued she lacked jurisdiction to change state law. Elections officials estimated that only about 100 extra people had been permitted to vote by Judge Baker's order. Republican officials charged there may have been a "preconceived plan" to misuse the judicial process to keep the polls open longer than their statutorily mandated closing time, as well as an "organized campaign" (by the Democrats) to abuse the procedure by which voters obtain court orders to vote, resulting in voter fraud and the casting of hundreds of illegal votes.<sup>94</sup>

In a 51-page report, Republican Secretary of State Matt Blunt outlined the possible violations of law committed in the City of St. Louis by alleged illegal voters. He referred to an unspecified conspiracy "to create bedlam so that election fraud could be perpetrated,"<sup>95</sup> and to corrupt election judges put in place to manipulate the results of the election. The report claimed that, 1) 342 persons obtained court orders to vote even though the information provided by them on affidavits suggested they were properly disqualified from voting; 2) 62 convicted federal felons and 52 Missouri felons voted in either the City of St. Louis or St. Louis County; 3) 14 votes were cast in the names of dead people; 4) that there was a high probability of multiple voting by dozens of people; 5) 79 votes were cast by people registering to vote from vacant lots; and 6) 45 election judges were not registered to vote and therefore disqualified to serve.

Many of Blunt's allegations have been disproved or significantly weakened by the discovery of major records management problems at the Elections Board that resulted in grossly inaccurate voter rolls. The *St. Louis Post-Dispatch* conducted a canvass of over 2,000 alleged vacant lot addresses from which thousands of St. Louis voters were supposedly registered and found buildings on virtually all of them. The lots had been misclassified by the city assessor or misread by elections officials. They concluded that "most of the 79 people on the state's suspect voter list from last fall probably shouldn't be on it," including the city's budget director whose ten-year old condominium was mislabeled as a vacant lot.<sup>96</sup>

The claim that more than 100 felons may have illegally voted is also unreliable since the data upon which it was based was inconclusive, as the report itself admits.<sup>97</sup> Later investigations by the State Auditor did find that three years after the 2000 election fiasco, St. Louis's voter rolls still included the names of over 2,000 felons prohibited by state law from voting or registering to vote. But the Auditor found no conspiracy to commit voter fraud on the part of voters and questioned instead why the Elections Board had failed to remove the names from their lists when they had been provided with monthly and quarterly felony conviction reports from state and federal authorities.

Like the Blunt Commission, the State Auditor also found thousands of duplicate records of voters registered to vote in St. Louis and elsewhere in the state, but only 28 instances across three recent election cycles in which a voter may have voted more than once. Without further investigation it is impossible to know whether these 28 cases represent actual illegal behavior or are more likely the product of clerical errors in the Board's voter registration files.

Throughout the months following the election, Republicans and Democrats alike called for a federal investigation, each side charging the other with fraud or with suppressing the vote. Both sides expected to be vindicated. The federal investigation provided a decisive end to the Blunt Commission's allegation that corrupt election judges allowed hundreds of patently unqualified voters to vote.

### ***St. Louis Board of Elections forced into federal consent decree***

After an F.B.I. investigation that involved subpoenaing *all* of the registration and voting records from the St. Louis Elections Board for the months before the election, the Justice Department made a surprise announcement. They told the Board they were planning to sue them for violating the NVRA and threatening the voting rights of thousands of eligible voters in St. Louis by erroneously purging their records from the active voter file. The Board was forced into a consent decree that stipulated how they would change their procedures for maintaining accurate registration records, complying with federal requirements for notifying voters of their status on the list, and with handling voters whose names are not on the active voter list on election day.

Four years after the St. Louis Elections Board signed the consent decree acknowledging these failures, Mark (Thor) Hearne, the St. Louis lawyer and influential Republican activist, submitted

***Four years after the St. Louis Elections Board signed the consent decree acknowledging these failures, Mark (Thor) Hearne, the St. Louis lawyer and influential Republican activist, submitted Senate testimony that included citations to materials he produced after 2002 that ignored the Board's culpability and repeated misleading allegations of voter fraud in St. Louis.***

## *Milwaukee: The Coup de Grâce*

In 2000, Vice President Al Gore won Wisconsin by just under 6,000 votes out of more than 2.5 million cast. Heading into the last months of the 2004 presidential campaign candidates George W. Bush and John Kerry were neck-and-neck in the polls in Wisconsin and the race was once again projected to be razor close. As a battleground state Wisconsin attracted attention from the national campaigns and a host of non-profit and political consulting organizations that poured money, staff and volunteers into the state to increase voter registration before Election Day.

By September, the voter registration drives and heightened national interest in Wisconsin as a battleground state led elections director Kevin Kennedy to report that elections officials across the state had been swamped by an unprecedented increase of over 200,000 new applications submitted by mail.<sup>99</sup> The intensified focus on Wisconsin by outside voter registration groups pouring their volunteers into the state was unparalleled in recent elections, an anomaly associated with Wisconsin's swing state status and the closeness of the presidential contest – in Wisconsin and the nation – just four years before.<sup>100</sup>

Pre-election news coverage in Wisconsin focused on three controversies: problems associated with some of the voter registration drives; a dispute between county and city officials over the number of ballots to be printed and provided to the city of Milwaukee; and a flap over thousands of alleged “bad addresses” on Milwaukee's voter registration list.

Procedural breakdowns and discrepancies in the voter registration records were associated with what Kennedy called “volume” problems, but they helped create a climate of suspicion about the quality of record keeping at the Milwaukee elections commission and the commission's ability to run a “clean” election.<sup>101</sup> The pre-election disputes repeatedly invoked the language of “voter fraud,” though no evidence was produced that voters were intentionally committing it. The climate of distrust made it difficult to see clerical mistakes, illegible handwriting, and workload problems leading to backlogged voter registration applications as human error or problems related to resource issues. Instead, foul-ups and mistakes were assumed to be evidence of fraud perpetrated by partisans trying to “steal elections.”

*Imperfect voter registration drives and simple human error, however, are not the same as voter fraud, nor do they inevitably lead to fraudulent voting.*

### ***Voter registration problems***

Intensified political competition and the influx of outside organizations, campaign workers and volunteers into Wisconsin in the months and weeks before the election contributed to an inevitably flawed voter registration process. Duplicate registration cards, improperly filled out cards, cards from people who are not eligible to vote or who don't live in the district in which the card was submitted are not uncommon in the chaotic pre-election atmosphere of an intense political campaign. Imperfect voter registration drives and simple human error, however, are not the same as voter fraud, nor do they inevitably lead to fraudulent voting. As the Milwaukee case demonstrates, however, these deficiencies are easily exploited by partisans.

<sup>99</sup> Tom Kertscher, “Deputy Registrar May Have Violated State Election Law; He Says He Didn't Witness Forms He Signed,” *Milwaukee Journal-Sentinel* (October 1, 2004), B1.

<sup>100</sup> Jenny Price, “Voter Registration Efforts Ramped Up In Wisconsin,” *Associated Press State & Local Wire* (October 10, 2004). Since voters can register to vote on Election Day, pre-election voter registration drives have been less common in Wisconsin than elsewhere.

<sup>101</sup> Price (2004).

## **How many ballots for Milwaukee?**

As stories of potential voter registration fraud circulated in the press, a political fight erupted in Milwaukee. In October the chief elections official in Milwaukee asked the county elections board for 260,000 extra ballots in anticipation of record turnout. Under Wisconsin law counties print and pay for all ballots for their localities. Milwaukee county elections officials rejected the request, with County Executive Scott Walker writing in support of the county board's decision to give Milwaukee roughly the same number of ballots it had received in the previous presidential election. In 2000, the number of ballots on hand exceeded the eligible voting population in Milwaukee by at least 200,000. But in planning for the number of ballots needed, local officials must compensate for the fact that in order to scan and count the ballots after they are cast, a bar code is assigned that prevents ballots from being counted outside the ward in which they are issued. In other words, unused ballots can't be moved around from ward to ward to cover shortfalls. Estimating probable turnout involves estimating turnout in each ward rather than citywide. This could have the effect of inflating the overall estimated number of ballots needed citywide. In 2004 Milwaukee requested 938,000 ballots for a voting population of about 424,000. The county board agreed to give the city 679,000 ballots, and a firestorm of protest erupted when County Executive Walker defended the decision by suggesting that he was concerned about potential voter fraud and didn't want people to be able to "grab" extra ballots at the polling site.<sup>102</sup>

Milwaukee Mayor Tom Barrett accused Walker of trying to foment chaos at the polls and suppress the central city vote. Barrett is a Democrat and served as a state co-chair of John Kerry's campaign, while Walker is a Republican and served as state co-chair of George W. Bush's campaign. In press reports, the dispute was repeatedly referred to as "ugly," generating partisan recrimination on both sides. On the morning of October 14, about a hundred protesters, including students, elected officials and union activists, stormed Walker's office while he was meeting with municipal election clerks, chanting, "Let the people have their voice!" and demanding that Walker issue the extra ballots to Milwaukee. Wisconsin Governor Jim Doyle intervened by asking the state elections board to help resolve the dispute and offered state aid to pay for the extra ballots. The next day Walker and Barrett held a joint press conference on the steps of Milwaukee city hall to announce a compromise between the city and county: the county would supply the extra ballots, giving the city the 938,000 ballots it originally requested, the city would split the cost, estimated at about \$40,000, and promise to return all unused ballots to the county election commission to ensure that all ballots were accounted for.<sup>103</sup> Approximately 665,000 unused ballots were later returned to the county board of elections.<sup>104</sup>

## **Inaccurate lists of "potentially fraudulent voters"**

At 4:57 p.m. on Wednesday, October 27, 2004, three minutes before the legal deadline for filing a complaint with the city elections commission, the state Republican Party challenged the validity of 5,619 names on the city voter rolls. State GOP chairman Rick Graber said, "This is a black eye on the city of Milwaukee and the state of Wisconsin. These 5,600 addresses could be used to allow fraudulent voting. Whether it's deliberate or not, something's wrong when you have people

<sup>102</sup> Dave Umhoefer and Greg J. <sup>103</sup> Associated Press, "Governor Sends Election Board Into Milwaukee Ballot Fray," *Capital Times* (October 15, 2004), 4A; Dave Umhoefer and Steve Schultze, "Doyle Joins Rift Over Ballot Supply; Governor Seeks State Inquiry; After Protest, Walker Agrees to Review City's Request," *Milwaukee Journal-Sentinel* (October 15, 2004), A1.

<sup>104</sup> Greg J. Borowski, "665,000 Unused Ballots Returned; Review Finds City's Original Allotment Would Have Been Sufficient," *Milwaukee Journal-Sentinel* (November 25, 2004), B1.

from addresses that don't exist."<sup>105</sup> First the local elections board voted 3-0 when the board's lone Republican appointee joined the two Democrats in finding the challenge lacked sufficient evidence. The Milwaukee City Attorney, Grant Langley, conducted a review that he said in a letter to the city elections commission executive director casts "doubt on the overall accuracy" of the list supplied by the state GOP.<sup>106</sup>

Then, just four days before Election Day the state GOP demanded that Milwaukee city officials require identification from 37,180 people it said its review of the city's voter rolls turned up as living at questionable addresses. The list was produced in the same manner as the first list of 5,619 names using a computer program to match data from the city's voter database with a U.S. Postal Service list of known addresses. It included 13,300 cases of incorrect apartment numbers and 18,200 cases of missing apartment numbers. City Attorney Langley, a non-partisan officeholder, called the GOP's request, "outrageous," adding, "We have already uncovered hundreds and hundreds and hundreds of addresses on their (original list) that do exist. Why should I take their word for the fact this new list is good? I'm out of the politics on this, but this is purely political."<sup>107</sup> Langley's review did find some addresses that do not appear to exist, and the *Milwaukee Journal-Sentinel* did its own limited investigation, finding 68 questionable addresses. "Others, though," it said, "were likely to be clerical errors."<sup>108</sup>

By Monday, officials from the state GOP and the City of Milwaukee worked out an agreement on how the registrations of voters with addresses challenged by the GOP would be dealt with at the polls. The list of 37,000 was pared back down to 5,512 and the city agreed to provide poll workers with the names of people in their wards from the list whose addresses appeared to be incomplete or inaccurate. Those people would be flagged if they showed up to vote and asked to show identification and/or re-register to update their records.<sup>109</sup> At the time Wisconsin law did not require pre-registered voters to show identification to vote at the polls, they only needed to state their name and address to receive a ballot.<sup>110</sup> The compromise deal with the Republican party imposed an identification requirement not mandated by law on people who made their way onto the GOP's list.

### ***Who bears responsibility for sloppy records and procedural meltdown?***

The *Journal-Sentinel* reviewed Milwaukee's voting records and found a number of unexplained discrepancies. The most troubling finding from the newspaper's detailed computer analysis was that as many as 1,242 votes, three-quarters of them cast by people registering on site on election day, appeared to have come from invalid addresses. Another 1,305 registration cards with discernible flaws such as missing addresses or missing names were accepted from voters on election day who were then allowed to vote.<sup>111</sup>

<sup>109</sup> "Milwaukee Vote Deal Reached on Dubious Addresses," *The Capital Times* (November 1, 2004), 5A.

<sup>110</sup> Wisconsin allows for election day registration. Same-day registration rules require new registrants to show some form of proof of residency, or, for those lacking proof, another registered voter may vouch for them.

<sup>111</sup> Greg J. Borowski, "Over 1,200 Voters Addresses Found Invalid; Some Mistakes Easily Explained, But Milwaukee Flaws Raise Concerns About Shoddy Record Keeping, Possible Fraud," *Milwaukee Journal-Sentinel* (January 25, 2005), A1; Greg J. Borowski, "Fraud or Bumbling, Voter Problems Still Unnerving to Public," *Milwaukee Journal-Sentinel* (January 30, 2005), A1.

The newspaper opined on its own investigation and reporting:

Republicans are quick to jump on the discrepancies, real or imagined, in voting data in Milwaukee as proof of widespread fraud in the big city. In their minds, the *Journal Sentinel's* findings fit that pattern. A more plausible explanation, however, is that the findings reflect the unfortunate tendency of voting systems throughout America to err.<sup>112</sup>

By the end of January, the Mayor had appointed an internal task force to review the city's electoral procedures, and federal and county law enforcement agencies began a joint investigation into whether breakdowns in procedure, poor record-keeping, human error or fraud explained the discrepancies. On February 10, the bipartisan Joint Legislative Audit Committee of the state legislature voted unanimously to direct auditors to review voter registration and address verification procedures. All of these investigations produced clear evidence that Milwaukee's Board of Elections was overwhelmed by its own incompetence and under-staffing on election day, resulting in massive record-keeping problems. Poll workers failed to follow procedures; the number of votes cast in Milwaukee failed to match the number of people recorded as voting; same day registration cards were not filled out properly and follow up was not performed when post-registration address verification efforts identified address discrepancies; some voters were allowed to register to vote in the wrong ward.

### ***The dénouement***

The scrutiny from federal, state and local law enforcement and elections officials produced several reports, an intensive review of voter registration practices in a number of Wisconsin cities, many recommendations for improving election administration and voter registration procedures, several later-vetoed photo ID bills in the state legislature, a variety of other legislative proposals, and very little conclusive evidence of voter fraud.

Widespread ignorance among the public and elections officials alike of Wisconsin's seldom enforced felony disenfranchisement laws account for the hundreds of ineligible felons post-election audits have found voted since 2000. Alleged illegal felon voting constitutes nearly all of the "voter fraud" reported on by the media in Wisconsin over the last six years, and represents most of the handful of cases prosecuted by the federal government. Wisconsin election crime laws require the establishment of a willful effort to defraud. Most of those identified as ineligible have not been prosecuted because they were never informed that they lost their voting rights until they completed their entire sentence. Until recently, Wisconsin's voter registration application form did not clearly indicate that felons on probation or parole were ineligible to vote. One of the federal cases against the dozen or so people charged with illegal (felon) voting in the 2004 election was dropped when it was revealed that the defendant had registered to vote on election day in Milwaukee using his state offender ID card.<sup>113</sup>

Little*, "Motion to Dismiss Indictment," United States District Court, Eastern District of Wisconsin, Case No. 05-CR-172 (LSA) (March 14, 2006).

# POLICY RECOMMENDATIONS

---

This report has illustrated how the public is being manipulated about the problem of voter fraud.

Voting is a right, it's not a gift and it's not a privilege. Moreover, we can't have a democracy without the voters, and that means all voters, contributing to self-government. Therefore, layers upon layers of rules and bureaucracy to administer elections do not serve us well if they hinder electoral participation, which they do especially when the electorate expands. It is simply naïve to argue that the rules have nothing to do with turnout. On the other hand, it's true, the rules don't on their own increase turnout – issues, passion, competition, good candidates, effective communication and a diverse media – these are some of the factors that contribute to higher levels of electoral participation. But high interest campaigns and elections present precisely those conditions under which a complex regime of rules will have a depressing effect. When voter interest is high, partisans exploit the rules to determine the size and shape of the electorate they want.

Today partisans use the threat of voter fraud as an intimidation tactic. As our history shows, it is an old and reliable instrument for shaping the electorate by influencing the rules and procedures governing access to the vote. It is difficult to openly suppress voting in a democratic culture. The threat of fraud, however, if it's real, is enough to scare most people into accepting new rules that undermine the electoral participation of other voters - the unfortunate price, we are told, we must pay to keep our elections clean. The unraveling logic of this argument should be obvious. Unfortunately, reason flies out the window when we're scared.

We need better data, better election administration, transparency and more responsible journalism to improve public understanding of the legitimate ways in which electoral outcomes can be distorted and manipulated. Specifically:

1. States' chief elections officers should collect and maintain data on fraud allegations and enforcement activities and routinely report this information to the public. The data and methods used to collect it should be transparent and in the public domain.
2. To protect the right to vote and improve public confidence in the electoral process improvements to statewide, centralized voter registration databases must continue. Accurate registration records and methods for instantaneously certifying voter eligibility are the best defense against voter fraud.
3. To minimize mistakes, clerical errors, and duplication, state and local elections officials need to develop good, cooperative working partnerships with third party voter registration organizations that do a service to democracy by encouraging more people to register and vote.
4. States can go further and reduce the need for registration drives by fully implementing the agency-based voter registration requirements of NVRA and instituting same-day voter registration procedures. Ultimately, the states and federal government should provide a means to automatic universal voter registration.
5. To improve public understanding of voter fraud and more balanced reporting, state elections and law enforcement officials should educate journalists to ask for and recognize evidence of fraud when reporting on fraud allegations.

# APPENDIX: HOW TO IDENTIFY VOTER FRAUD

---

Elections are instruments of democracy. They are the mechanisms for choosing representatives of the people's will, and they are widely regulated by law. Many different actors participate in the electoral process. Legislators and administrators make and implement the rules, candidates organize campaigns to run for office, voters cast their ballots, administrators count the ballots and elected officials certify the results.

The voters' role is simple – to make choices about candidates by casting legal ballots. Voters don't set deadlines for registering to vote, nor do they make the rules about how ballots are designed, displayed, or marked. They don't decide where the polls are located, when they are open, or what voting technology will be used. Voters have nothing to do with receiving completed ballots, determining valid ballots, counting or recounting ballots, tallying election results, or ensuring that the vote totals are accurate.

*Voters, like all other actors or groups in the electoral process, can only corrupt that part to which they have access.*

Voters, like all other actors or groups in the electoral process, can only corrupt that part to which they have access. They can do this directly, for example, by providing false information about their identity and/or eligibility in order to vote illegally, or indirectly through participation in a conspiracy, usually with others who have more authority and access to the marking and counting of ballots than the voters themselves possess.

*If the alleged fraud does not involve voters it should not be considered voter fraud.*

The first step in confronting any allegation of voter fraud is to identify who is alleged to have committed the fraud and to figure out if any voters are involved. If the alleged fraud does not involve voters it should not be considered voter fraud.

The second step is to identify which part of the electoral process was corrupted by fraud. Given their limited access, voters can only corrupt the registration and voting phases. They can't corrupt the vote tallying and counting phases where most election fraud has occurred in the past because they lack access to votes after they've cast them.<sup>114</sup> A fraudulent ballot

<sup>114</sup> The most thorough analysis of election fraud in the early twentieth century is the landmark 1929 study of voter registration procedures for the Brookings Institution by the inventor of the punch card voting machine, Joseph P. Harris. See, Joseph P. Harris, *The Registration of Voters in the U.S.* (Baltimore: The Lord Baltimore Press, 1929). Harris was a public administration reformer who promoted government modernization and the use of scientific administrative practices to remove politics from the business of governing. He concluded that elections were more badly managed than just about any other area of public administration and that political machines were responsible for much of the fraud he analyzed. The case studies of election fraud in Chicago, Philadelphia and Louisville, Kentucky, Harris presents all involved large scale conspiracies orchestrated by politicians and political machines which Harris thought rigged elections through ballot box stuffing and the manipulation of the count. His conclusion that most fraud occurred during the vote counting stage spurred him to invent the Votomatic Vote Recorder (the first punch card voting machine) which Harris hoped would reduce opportunities for election fraud by removing the ballot counting function from precinct workers. See, Joseph P. Harris, *Oral History*, interview by Harriet Nathan, Regional Oral History Office, The Bancroft Library, University of California, Berkeley, California, 1980, available from <http://bancroft.berkeley.edu/ROHO/Vote/>.

029111

is one that was not cast legally. But the definition of a legal ballot varies according to the rules that qualify eligible voters to vote and govern the procedures for casting a ballot in the different states.

### ***Fraud in Voter Registration***

To its earliest proponents, voter registration was intended as an anti-fraud safeguard. Registration fraud is typically punished less severely than fraud in voting and this is as it should be. What matters most to the integrity of electoral outcomes is the casting and counting of an illegal ballot. A person who provides false information on a voter registration application but never casts a ballot is less of a threat to electoral integrity than one who negates or dilutes the will of the voters by casting an illegal ballot. This is not to say that voter registration fraud is a negligible crime or should be tolerated. The available evidence suggests voter registration fraud is rare, but when it does occur, if it goes undetected it can compromise the accuracy of the voter rolls. When it's caught it burdens the elections and law enforcement officials who find it and must address it.

Since voters can perpetrate it, even if they rarely do, for purposes of this report we will consider voter registration fraud a form of voter fraud, along with all forms of illegal voting. However, when voter registration fraud is committed by a campaign volunteer or a paid canvasser, we should not consider the crime 'voter fraud.'<sup>15</sup> Doing so only adds to public confusion about what should be done to eliminate opportunities for fraud.

### ***Fraud in Voting***

Under most state and federal laws a vote is considered illegal when it is cast improperly by an unqualified or ineligible voter. The voter must be qualified and the vote cast according to the rules governing the act of voting under state and federal law. Both elements – the voter and the act of voting – must be legal or the vote is illegal.

### ***The difference between an eligible and a qualified voter***

To be legal, an **eligible** voter must be **qualified** by the state to vote. This raises questions about the difference between an 'eligible' voter and a 'qualified' voter. The centuries long struggle for the franchise in the U.S. established a common law right to vote and constitutional bans on voter discrimination by race, color, gender, or age (over the age of 18), but no constitutional right to vote. The lack of an affirmative right to vote in the Constitution and the delegation of authority to the states to determine voter qualifications and oversee election administration are peculiar features of American democracy. The Constitution explicitly grants the states the power to set voter qualifications, reserving authority to Congress to regulate only "the times, places and manner of holding elections for Senators and Representatives."<sup>16</sup>

***"Eligible" voters are those whose age and citizenship status, and in some cases absence of a felony conviction allows them to be credentialed or "qualified" by the states as legitimate or legal voters. "Qualified" voters, therefore, are those eligible voters who complete a state's procedures for casting a legal ballot.***

Because the Constitution vests power to 'qualify' voters in the states, as long as they do not unconstitutionally discriminate against people by race, color, gender or age, they may make different rules for qualifying voters, and they do. This is why the definition of a legal vote varies across the states, especially with regard to residency and felony disqualification rules. Consider,

<sup>15</sup> For an example of how the voter fraud label is commonly misused, see "2 Signature Gatherers Sentenced in Orange County Voter Fraud Case," *Associated Press* (1/4/07), 17 News Online, available online at [www.kget.com/news/state/story.aspx?content\\_id=6b487526-37ac-43e9-a5b0-496674b9d5e1](http://www.kget.com/news/state/story.aspx?content_id=6b487526-37ac-43e9-a5b0-496674b9d5e1).

<sup>16</sup> But, "the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators." See, U.S. Constitution, Article I, section 4.

for example, the ballot of an otherwise eligible and qualified voter with a felony conviction who is no longer under state supervision. If that citizen lived in Maine and registered to vote by or on Election Day, his or her vote would count as a legal ballot. If that citizen lived and voted in Florida where a felony conviction eliminates the right to vote until clemency is granted, he or she could be prosecuted for casting an illegal ballot.

In fact, states make lots of rules for qualifying voters. The most important is the requirement that all eligible voters register. All states except North Dakota require eligible voters to register before casting a ballot.<sup>117</sup> Thus, all states except North Dakota qualify eligible voters by requiring them to meet certain conditions in order to register their names on the rolls of legitimate or valid voters. Voter registration, therefore, is a means of voter qualification, and in nearly all states, otherwise eligible voters must be registered properly or the vote they cast is illegal.<sup>118</sup> In addition, ineligible voters, such as those disqualified by state law for a felony conviction or because they do not possess U.S. citizenship,<sup>119</sup> could register to vote either mistakenly or by deceit, thus appearing on the voter rolls as 'qualified' voters despite their ineligibility. Their votes would be treated as legal votes when in fact they would be illegal.

There are a few known cases of ineligible persons such as non-citizens making it on to the voter registration rolls due to a misunderstanding about who has the right to vote in American elections, or to mistakes made by elections officials who misinformed such applicants or failed to note their lack of citizenship. One involves the case of Mohsin Ali, a long-time legal permanent resident living in Florida at the time of his arrest for "alien voting." He pleaded guilty but claimed a clerk in the Department of Motor Vehicles issued a voter registration application to him when he renewed his license. In a letter begging the judge to intercede with immigration authorities considering Ali's deportation back to Pakistan, Ali claimed he told the clerk he was a Florida resident but not a U.S. citizen.<sup>120</sup> He states that the clerk told him as the husband of an American citizen he was eligible to vote. When Ali received a voter registration card in the mail he assumed he was qualified to vote and voted in the 2000 presidential election.<sup>121</sup>

Voters have limited access to the electoral process, but where they do interact with it they confront an array of rules that can trip them up and change depending on where they live. The more rules and restrictions, the more stumbling blocks voters face when trying to cast legal ballots. For example, in Pennsylvania where a voter must qualify with an excuse when applying for an absentee ballot, it is illegal to vote that ballot if the voter's plans change and he or she remains physically present at home (barring a disability that prohibits the voter from visiting the polling place). A voter must apply for an absentee ballot a full week before Election Day. What happens if plans change or the business trip gets canceled and the voter is present on Election Day, after all? If that voter then mails in the ballot instead of striking out for the line at the polling place, that voter is breaking the law in Pennsylvania. Who knew? Who wouldn't make

<sup>117</sup> North Dakota repealed its voter registration law in 1951. To vote in North Dakota eligible voters must have proper identification showing their name and current address. If they lack identification, they may still vote by filing a voter's affidavit attesting to their identity and address, or if a poll worker knows them and can vouch for them. Poll workers use lists of previous voters to track voting on Election Day.

<sup>118</sup> The courts have dealt with the question of whether voter registration is an unconstitutional burden on the vote by using a balancing test, weighing the alleged burden on rights against a state's legitimate interest in ensuring electoral integrity. State laws mandating voter registration have been upheld repeatedly by the Supreme Court as reasonable administrative burdens on the right to vote ("a person does not have a federal constitutional right to walk up to a voting place on election day and demand a ballot," *Marston v. Lewis*, 410 U.S. 679, 680, (1973)).

<sup>119</sup> Federal law does not require persons be U.S. citizens to vote, but all states do, as it is their constitutional prerogative to set citizenship as a condition for voter eligibility and qualification.

<sup>120</sup> Letter from Mohsin Ali to the Honorable William C. Sherrill, Jr., Chief U.S. Magistrate Judge, U.S. District Court, Tallahassee, Florida; dated November 3, 2006. The judge denied Ali's request.

<sup>121</sup> *U.S. v. Mohsin Ali*, U.S. District Court, Northern District of Florida, Tallahassee Division, Case No. 4:05cr47-WCS.

things easier and drop the ballot in the mailbox? The more complex are the rules regulating voter registration and voting, the more likely voter mistakes, clerical errors, and the like will be wrongly identified as “fraud.”

Eligible voters may nevertheless fail to *qualify* as legal voters because they fail to register properly – usually their ballots would be considered illegal. Illegal ballots, however, may also result from qualified – or properly registered – voters failing to follow the rules for casting a ballot under state law. As the following table suggests, expanding rules create more ways to cast an illegal ballot than a legal one.

**Voter Eligibility, Voter Registration and Legal Balloting**

Voter	Registered	Voter Is	Vote Is Cast	Ballot
Eligible	Yes	Qualified	Properly	Legal
	Yes	Qualified	Improperly	Illegal
Not Eligible	No	Not Qualified	Properly or Improperly	Illegal
	Yes	Improperly Qualified	Properly	Illegal
			Improperly	Illegal
	No	Not Qualified	Properly or Improperly	Illegal

As states and localities continue to loosen restrictions on the time and place for casting a legal ballot, qualified voters will face more options for casting their ballots. The lack of uniformity increases complexity of the rules and unintended consequences proliferate. For example, the growth of early and mail voting is generally considered positive because these reforms make voting more convenient by opening up more avenues for casting legal ballots. Voters in many

*But one consequence of expanding voting opportunities is a corresponding increase in opportunities for casting unintentionally illegal ballots if administrative tracking and auditing systems are flawed.*

states may now cast their ballots at a town clerk’s office two weeks before the election, by mail, or in person at the polling booth on Election Day. But one consequence of expanding voting opportunities is a corresponding increase in opportunities for casting unintentionally illegal ballots if administrative tracking and auditing systems are flawed.

In fact, several recent cases of alleged voter fraud involved legal voters who mailed in their ballots and then showed up at the polls on Election Day because they either forgot mailing in their ballots or, distrusting the absentee balloting process, wanted to be sure that their votes were counted by voting again. They used their real names to try to vote twice because they were confused.<sup>122</sup> Poor record management on the part of elections officials was the problem, but voters got the blame. As the options and rules expand they increase the possibility that voter misunderstandings will be labeled ‘voter fraud.’

<sup>122</sup> See, for example, Susan Greene and Karen Crummy, “Voter Fraud Probed in State; Double Dippers. *Flavors Unrepeated*, Denver Post (March 24, 2005).

Dear Mr. Hurst:

Hope all is well. Thanks for your request for the May Standards Board materials. Attached are the DRAFT documents that we provided to the Standards Board members for the May meeting. Note that these are not final papers, but works in progress. I'm also providing the information for Sheila Banks, who is Special Assistant to Commissioner Hillman, sbanks@eac.gov, and she can be reached at 202-566-3100. Ms. Banks can assist you with further Standards Board questions.

Thanks very much.

Adam Ambrogi

## **REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES**

---

### **1. Introduction and Report Background**

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve implementation of the requirements for voters to show identification pursuant to [statute or regulation citation] It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

### **2. Voter Identification –Background and Approach of the Study**

Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The burden of providing required ID documents on the voter may be greater at the polls on Election Day than at the time of registration. The burden of checking ID, even as simple as a signature match, can be much greater on election workers at the polls than on those registering voters. Poll workers may be faced with long lines and limited time. This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>1</sup> The emphasis here is on Voter ID on Election Day and afterwards as election judges evaluate provisional

---

<sup>1</sup> As the Carter-Baker Commission noted, photographic ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify identification. Commission on Federal Election Reform, pp 46-47.

## FINAL D R A F T

ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

This analysis takes a view of voter ID issues broader than the rather narrow identification requirements in HAVA. Much of the national ferment over voter ID goes beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those casting a ballot for the first time who had not registered in person. The controversy in the states over voter ID stems from the HAVA requirements, goes beyond those requirements, and sets the context for the analysis here.<sup>2</sup>

Identification is often described as the critical step in protecting the integrity of the ballot, the process that ensures that the potential voter is eligible and permitted to cast a ballot and one ballot only. In fact, ensuring ballot integrity requires a perspective that takes in the entire voting process. Protecting the integrity of the ballot requires more than preventing the ineligible from voting. It also should ensure that all those who are eligible and want to vote can cast a ballot that counts, and that they can effectively cast a ballot for the candidate of their choice. The protection effort must take into account all forms of voting, including absentee ballots, and embrace each step in the process. A voting system that establishes onerous requirements for voters to identify themselves may prevent the ineligible from voting, but it may also prevent the eligible from casting a ballot. If the ID requirements of a ballot protection system block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or forget to bring to the polls the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This analysis does not include consideration of the incidence of vote fraud, the forms that it takes, nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. The EAC has commissioned a separate study of vote fraud and instructed us not to address that issue in this research.

---

<sup>2</sup> Harvard Law Review 119:1127. "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA. . . . HAVA makes explicit that it shall not 'be construed to prevent a State from establishing election technology and administration requirements that are more strict than' HAVA itself provides. The states have accepted the invitation. "

## FINAL D R A F T

Nonetheless, a broad view of ballot integrity is needed to appreciate the background and context of this narrower study. We explore the inter-relationships between Voter ID requirements and Provisional Voting and estimate the effects of various voter id requirements on turnout and on the casting of provisional ballots.

Voters lacking required ID, or who have ID that does not reflect their current address, may be able to vote only by casting a provisional ballot.<sup>3</sup> To the extent that stricter voter ID requirements divert more voters to the provisional ballot, voter ID requirements can put stress on the already pressured management of the polling place. Administering provisional ballots is more expensive than the normal ballot. Scrutiny of ID can create lines at the polling places, lines made longer as voters are diverted to the provisional voting line. Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle that will keep more citizens from the polls. A review of voter identification practices should keep in mind that America's problem may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes will be more effective if based on clear standards --legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

- Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?
- How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>4</sup>
- How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity

---

<sup>3</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>4</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

029121

## FINAL D R A F T

that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>5</sup>

- How cost-effective is the system? Does it increase the security of the ballot at an affordable cost, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.
- If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>6</sup>
- Does it comply with the letter and spirit of Voting Rights Act?
- The seventh question is more difficult to measure than those described in the 6 questions outlined above. The Voter ID requirements should have a neutral result on the composition of the qualified electorate. That is, those requirements should not be designed to reduce the turnout of particular groups of voters who may have a propensity to support one party over another. Whatever the requirement may be, all citizens should be able to comply with it easily and at no or minimal cost.

### Summary of findings and conclusions

Voter turnout at the state level in 2004 declined where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Including other factors beyond voter id requirements diminishes the influence of voter ID on turnout. But the analysis still offers some support for the hypothesis that as the burden of voter identification

---

<sup>5</sup> In New York, in 2004, disparities in training and voting information were made all too apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>6</sup> For example, the Carter-Baker Commission accompanied its recommendation for a national voter ID card with a recommendations for an affirmative effort by the states to reach out and register the unregistered, to use the new Voter ID regime as a means to enroll more voters.

029122

## FINAL D R A F T

requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>7</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

### Recommendations for consideration and action by the EAC

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice that before states adopt a change described as increasing ballot security, states should publish an analysis of the number of eligible, potential voters that the new requirement may keep away from the polls or be permitted to cast only a provisional ballot as well as an estimate of the number of ineligible voters who will be prevented from voting.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. The data should be analyzed to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent and should describe the dynamics of voter ID in preserving the security of the ballot?

---

<sup>7</sup> Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject.

## FINAL D R A F T

- Useful information could be supplied by exit polling. It would identify those who had cast a provisional ballot and ask why they were unable to cast a regular ballot. Answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
- Polling to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter id requirements on electoral participation.
- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three criteria: the convenience of the voter, the total time allowed to evaluate ballots<sup>8</sup>, and the safe harbor provision in presidential elections.

---

<sup>8</sup> Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

**FINAL D R A F T**

**3. Voter ID and Turnout**

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, *Voter ID Requirements*. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility.

^In Florida and Louisiana, states that required a photo id in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

^^In these states in 2004, voters lacking a photo ID could vote by providing other ID.

\*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

\*\*State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

\*\*\*Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

\*\*\*\*Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

\*\*\*\*\*Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compare to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

\*\*\*\*\*Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

In 9 states, voters were required merely to state their names so that poll workers could locate them in the registration book. In 14 states, voters signed their names. In 8 states, voters' signatures were matched with a specimen signature. In 15 states voters had to show some form of ID, not necessarily an official picture ID. And in 5 states, voters were required to show an official photo ID, although in 2004 voters who lacked a picture ID could execute an affidavit and vote a regular ballot.

029126

## FINAL D R A F T

This neat assignment of each state to one of a few categories may fail to reflect actual practice at a polling place. Like any system run by fallible people it is subject to wide variation in practice. Voters may be confronted with demands for identification at variance with state statutes or legislation. Other voters may be waved through the process without a look at any document, no matter what the regulations may say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters may encounter.

It is not practical to attempt to capture the wide variety of how voter ID requirements may be actually implemented across the nation's tens of thousands of polling places. Recognizing that means that the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

### Effect of Voter ID requirements on Turnout

#### Summary of Findings and Conclusions

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau.<sup>9</sup>

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each

---

<sup>9</sup> See Appendix \_\_\_ for the full report on voter ID and turnout.

## FINAL D R A F T

level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

### Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous. a form of identification, and providing a form of photo identification.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

029123

**FINAL D R A F T**

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	63.1 %	State Name	61.3 %
Sign Name	58.6 %	Sign Name	60.4 %
Match Signature	62.1 %	Match Signature	59.2 %
Provide Non-Photo ID	57.8 %	Provide Non-Photo ID	57.6 %
Provide Photo ID	57.3 %	Swear Affidavit	58.7 %
Average Turnout (All States)	59.6 %		

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political-- also affect voter participation. Multivariate models that take into account other predictors place the effects of voter identification in a more accurate context. To consider that broader context, our multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground for president, governor or senate voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-

029129

## FINAL D R A F T

Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line.

In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line.

Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. (Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting.) Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age in years, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note

029130

## FINAL D R A F T

that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

### Discussion and Conclusions of the Analysis

The results presented here give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

029131

## FINAL D R A F T

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.
- Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.
- Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.
- Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the elderly, while they would be slightly less likely to vote as requirements range from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

The data examined in this analysis could not capture the dynamics of how identification requirements might lower turnout. Do these requirements dampen turnout because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most

029132

**FINAL D R A F T**

effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

029133

#### 4. Litigation over Voter ID Requirements

There have been a handful of cases challenging identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether or not laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on cases challenging requirements that voters present some form of identifying documents if the photo identification is the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*,

029134

## FINAL D R A F T

Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. The court's decision in this case indicates that courts are likely to look strictly on photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions

029135

**FINAL D R A F T**

suggest that best practice may be to conform to the NVRA's limitation on requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

029135

## FINAL D R A F T

### 5. Developments since 2004

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

This information would allow a more informed judgment to be brought to bear in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

029137

## FINAL D R A F T

HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### 6. Conclusions

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.<sup>10</sup> The dynamics of Voter ID requirements—how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That research might address that, so far as may be

---

<sup>10</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." The exclusion of voters through restrictive ID requirements could affect election outcomes as much as fraud by voters at the polls. *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 18, 2009 38

## FINAL D R A F T

necessary to reduce vote fraud, could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended by our colleague Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed.<sup>11</sup>

---

<sup>11</sup> "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they *register* to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote. These electronic photos should satisfy the anti-fraud concerns of conservatives as much as printed photos that citizens would be required to bring to the polls. . . . Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier."

### APPENDIX –Court Decisions and Literature on Voter Identification and Related Issues

#### Court Decisions

#### Summary of Relevant Cases:

#### Challenges Prevailed:

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### Challenges Rejected:

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

029141

## FINAL D R A F T

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

### *McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

### *Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

### *Perez v. Rhiddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

### **Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

#### ***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

029142

## FINAL D R A F T

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

### ***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

### **Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

#### ***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

#### ***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

029143

## FINAL D R A F T

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

### ***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

### ***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

029144

## FINAL D R A F T

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

### ***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

### ***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

### **Current Litigation Concerning Voter ID Issues<sup>12</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>12</sup> As of January 2, 2006

029145

## FINAL D R A F T

### **Georgia** (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>13</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>14</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

### **Indiana** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

---

<sup>14</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

029148

## FINAL D R A F T

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>15</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>15</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

All-

About a week ago you received a copy of the Eagleton draft report on Voter Identification. As you know, Eagleton will be coming to EAC on April 3 to do a project close-out meeting with the agency.

Should you have comments or edits that you would like me to pass along to Eagleton, regarding their draft report on Voter ID, please get them to me by **COB Friday, March 24**. so that I may pass them along to Eagleton for inclusion in their final document.

Thank you

Subject Revised Voter ID Paper

Karen,

Attached is a new draft of the Voter ID paper, revised to take into account the comments you gave us on Tuesday as well as some points raised recently by other reviewers. We'll be bringing hard copies of this draft with us to Monday's briefing. If you could distribute the new "Executive Summary" (pages 1 – 5) in advance to those who will take part in the meeting on Monday, I think the discussion would be improved.

Our train is scheduled to get into Union Station at 10:30 on Monday. Barring Amtrak delays, we should arrive at your offices shortly before 11.

Tom O'Neill

# **FINAL DRAFT REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES**

---

## **Report Background**

This report to the United States Election Assistance Commission (EAC) presents an analysis of voter identification requirements across the country and makes recommendations for best practices to improve implementation of voter ID requirements at the polls. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under a contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

## **Executive Summary**

### Methods

To explore the effects of voter ID requirements on electoral participation in 2004, as measured by turnout, we gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. We assigned each state to one of five categories based on its ID requirements. The five categories are progressively more rigorous based on the demands they make on both voters<sup>1</sup> (and, to some extent) on election workers. The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample,

---

<sup>1</sup> Even the most relaxed provisions for identification at the polls — anything stricter than the honor system used in North Dakota — will impose some burden on particular voters. *Harvard Law Review* 119:1146

## FINAL D R A F T

which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents are not uniformly and conveniently available to all voters.

We collected data on turnout in all counties to permit an estimate of the relationship between the rigor of the ID requirements and the level of turnout. This aggregate analysis is useful, but does not provide valid estimates on the effects of different kinds of ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates.) To allow that analysis, we used the Census Bureau's Current Population Survey from November 2004, which asked a large sample of Americans about their experience in the election. It has the disadvantage of relying on self reports by respondents about their registration status, citizenship, and experience in the polling place, but it provides the demographic data needed to supplement the aggregate analysis.

To understand the legal issues raised by voter ID requirements, we collected and analyzed the few major cases that have been decided on this issue. The decisions so far suggest the constitutional and other constraints to policies on voter ID requirements.

### Findings

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack precise information on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.

Voter turnout at the state level in 2004 was lower in states where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required

029163

## FINAL D R A F T

voters to state their names, compared to 57.3 percent in states that required photo identification. Those figures, however, probably overstate the effect since the inclusion of other factors beyond voter ID requirements in the analysis diminishes the extent of influence of voter ID on turnout. After taking account of the other factors, the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or people living below the poverty line.

Our analysis of litigation suggests that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not now sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>2</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

A voting system that requires voters to produce an identify document or documents may indeed prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the

---

<sup>2</sup> Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject.

## FINAL D R A F T

ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

### Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous Voter ID requirements affect the decision by potential voters to go or stay away from the polls-- are not well understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice the publication of a “Voting Impact Statement” by states considering changing their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that a proposed stricter ID requirement may keep away from the polls or be permitted to cast only a provisional ballot; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should analyze this publish an analysis of this information to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. The states should also be encouraged to use this information to increase the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections.
  - Useful information could be supplied by exit polling or surveys of voters by local election officials. It would make clear why those who cast a provisional ballot

029165

## FINAL D R A F T

were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.

- Polling to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots<sup>3</sup>, and the safe harbor provision in presidential elections.
- Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional.

### Background and Approach of the Study

Establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The stress on voters to provide required ID documents may be greater at the polls on Election Day than when registering. The pressures arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may be faced with long lines and limited time.

---

<sup>3</sup> Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

## FINAL D R A F T

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>4</sup> The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks broadly at voter ID issues and goes beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures on voter ID goes ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. The controversy in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.<sup>5</sup>

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.<sup>6</sup> Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and , if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

---

<sup>4</sup> As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

<sup>5</sup> Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

<sup>6</sup> "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

029167

## FINAL D R A F T

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has informed us that it has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our analysis of the effects of voter ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.<sup>7</sup> Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- can divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.<sup>8</sup> And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the

---

<sup>7</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>8</sup> The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

029169

## FINAL D R A F T

polls. In conducting this analysis, we were sensitive to the observation that the problem with American elections may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes can be more effective if based on clear standards –legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?<sup>9</sup>
2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>10</sup>
3. How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>11</sup>
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.<sup>12</sup> A thorough, objective

---

<sup>9</sup> “Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . .” Harvard Law Review 127:1144 (2006)

<sup>10</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

<sup>11</sup> In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state’s voter identification requirement actually was. Tova Wang, “Warning Bell in Ohio,” December 5, 2005. Website, the Foundation for National Progress.

<sup>12</sup> “Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at

## FINAL D R A F T

impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>13</sup>
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. Does the Voter ID requirement have a neutral result on the composition of the qualified and eligible electorate? ID requirements should not be designed to, or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another. Whatever the requirement may be, can all citizens comply with it easily and at no or minimal cost?

### **Voter ID and Turnout**

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, *Voter ID Requirements*. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID.

This neat assignment in the following table and map of each state to one category no doubt fails to reflect actual practice at many polling places. Like any system run by fallible people, the voter ID process is subject to wide variation in practice. Voters may be confronted with demands for identification different from the directives in state statutes or regulation. Some voters may be waved through the process without a look at any document, no matter what the regulations say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters actually encounter.

---

administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." *Harvard Law Review* 127:1144 (2006)

<sup>13</sup> For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen Hasen's has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," *62 Washington and Lee Law Review* 937 (2005).

^In Florida and Louisiana, states that required a photo id in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

^^In these states in 2004, voters lacking a photo ID could vote by providing other ID.

\*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

\*\*State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

\*\*\*Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

\*\*\*\*Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

\*\*\*\*\*Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compare to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

\*\*\*\*\*Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

**Figure 1**

**Voter ID Requirements 2004**

## FINAL D R A F T

Since it is not practical to attempt to capture the wide variety of how voter ID requirements are actually implemented across the nation's tens of thousands of polling places, the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

### Effect of Voter ID requirements on Turnout

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau.<sup>14</sup>

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

---

<sup>14</sup> See Appendix \_\_\_ for the full report on voter ID and turnout.

029173

## FINAL D R A F T

### Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit is regarded as the most rigorous.

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

029174

**FINAL D R A F T**

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	63.1 %	State Name	61.3 %
Sign Name	58.6 %	Sign Name	60.4 %
Match Signature	62.1 %	Match Signature	59.2 %
Provide Non-Photo ID	57.8 %	Provide Non-Photo ID	57.6 %
Provide Photo ID	57.3 %	Swear Affidavit	58.7 %
Average Turnout (All States)	59.6 %		

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political-- also affect voter participation. Multivariate models that take into account other predictors can place the effects of voter identification in a more accurate context. The multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line. In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. The decline in turnout is particularly noticeable in counties with concentrations of Hispanic residents or individuals who live below the poverty line. Determining if the reduction in turnout is, in fact, among the Hispanic or poor residents of those counties requires further research at the individual level.

## FINAL D R A F T

Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting. Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

029176

## FINAL D R A F T

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

### Discussion and Conclusions of the Analysis

The results give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.

029177

## FINAL D R A F T

- Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.
- Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.
- Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the self-reports of elderly voters, while indicating that they would be slightly less likely to vote as ID requirements become stricter, do not show a dramatic effect.

The data examined in this analysis could not capture the dynamics of how identification requirements lower turnout. Do know the voter ID and stay away from the polls because they cannot or do not want to meet them? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

It is important to note that the 2004 data do not allow us to draw conclusions about the effect of laws such as those recently passed in Georgia and Indiana, which require government-issued photo ID. No such laws were in place in 2004, and the five states that then required photo ID at the time allowed voters who signed an affidavit or provided another form of identification to cast a regular ballot.

029178

## FINAL D R A F T

### Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*,

029179

## FINAL D R A F T

Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. The court's decision in this case indicates that courts are likely to look strictly on photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions

029180

## FINAL D R A F T

suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

### **Developments since 2004**

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

### **State Voter Databases and Voter ID**

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

029181

## FINAL DRAFT

HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### 6. Conclusions

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.<sup>15</sup>

The dynamics of Voter ID requirements—how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in

---

<sup>15</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

029182

## FINAL D R A F T

the states would be improved by additional research sponsored by the EAC. So far as it may be necessary to reduce vote fraud made possible by inadequate voter ID, the research could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended elsewhere by one of the authors of this report, Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed.<sup>16</sup>

---

<sup>16</sup> "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they *register* to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote. . . Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier. "

### APPENDIX –Court Decisions and Literature on Voter Identification and Related Issues

#### Court Decisions

#### Summary of Relevant Cases:

#### Challenges Prevailed:

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### Challenges Rejected:

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

029185

## FINAL D R A F T

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

### *McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

### *Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

### *Perez v. Rhiddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

### **Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

#### ***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

029186

## FINAL D R A F T

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

### ***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

### **Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

#### ***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

#### ***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

## FINAL D R A F T

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

### ***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

### ***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

029188

## FINAL D R A F T

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

### ***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

### ***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

### **Current Litigation Concerning Voter ID Issues<sup>17</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>17</sup> As of January 2, 2006

029189

## FINAL D R A F T

### **Georgia** (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>18</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>19</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

### **Indiana** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

---

<sup>18</sup> Litigation documents are available at the Election Law @ Moritz website.

<http://moritzlaw.osu.edu/electionlaw/litigation/index.php>

<sup>19</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

029190

## FINAL D R A F T

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>20</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>20</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

**U.S. ELECTION ASSISTANCE COMMISSION**

**Status Report on the  
Voting Fraud-Voter Intimidation Research  
Project**

**May 17, 2006**

**029202**

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. Interviews with DOJ personnel indicate that the Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance in this area. While the Election Crimes Branch, Public Integrity Section, continues to maintain an aggressive pursuit of systematic schemes to corrupt the electoral process (including voter suppression), it also has increased prosecutions of individual instances of felon, alien, and double voting.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, in addition to pursuing systematic election corruption schemes, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

### NEWS ARTICLES

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

#### **Absentee Ballots**

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota, and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

029208

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio, and Pennsylvania.

#### **“Dead Voters and Multiple Voting”**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

U.S. ELECTION ASSISTANCE COMMISSION  
STANDARDS BOARD MEETING

Taken at the Hamilton Crown Plaza Hotel  
1001 14th Street, Northwest  
Washington, D.C.

Taken on the date of:  
Tuesday, May 23, 2006

21 start time: 10:00 o'clock, a.m.  
22 Taken before: Pauline Jansen, court reporter

- 1 AGENDA:  
2 Brief Welcoming Remarks                      Commissioner Ray Martinez  
3 EAC Staff Presentations:  
4 Legal on-line Information  
5 Clearinghouse                                      Julie Hodgkins  
6 Design for Democracy                              Karen Lynn-Dyson

052306

7 Public Access Portals Edgardo Cortes  
8 Spanish and Asian Language  
9 Working Groups Edgardo Cortes  
10 Standards Board Plenary Session: Peggy Nighswonger  
11 1) Adoption of Parliamentary  
12 2) Adoption of Agenda  
13 3) Review of Meeting  
14 4) Review of Present Standards Board Bylaws  
15 5) Briefing on Re-adoption of Standards Board Charter  
16 6) Election of Executive Board Vacancy  
17 DISCUSSION DRAFT REPORT ON PROVISIONAL VOTING  
18 Presenters: Thomas O'Neill and Edward Foley  
19 DISCUSSION: RESEARCH ON POLL WORKER RECRUITMENT,  
20 TRAINING AND RETENTION  
21 Presenters: Jennifer Collins-Foley and Abby Horn

1 P-R-O-C-E-E-D-I-N-G-S  
2 MR. MARTINEZ: Good afternoon, everybody.  
3 Please continue with your lunch. We are going to get  
4 started with the program. And what I am going to do for  
5 a quick two or three minutes is just to lay the  
6 groundwork if you will and try to let you all know what  
7 we are going to attempt to accomplish over the next  
8 couple of days. And give you an idea as to what issues  
9 we hope to put in front of you et. Cetera.  
10 Again I am Ray Martinez. I am a Commissioner  
11 with the U.S. Elections Assistance Commission. I do  
12 want you to recognize my esteemed colleague the former  
13 Secretary of State of the great State of Colorado and  
14 now Commissioner with EAC, Betty Davidson. Madame  
Page 2

029214

15 Commissioner if you will stand up ( Applause).

16           what we hope to accomplish-- well, we are  
17 here to discuss and get advice, the EAC, to get advice  
18 from our Statutory Advisory Boards. We have two main  
19 Statutory Advisory Boards created by(inaudible) which  
20 is our government statute. One is the Board of Advisors  
21 which is meeting up on the second floor and is  
22 conducting concurrent meetings doing and hearing

□

4

1 exactly the same issues that you all will be hearing  
2 about as well.

3           we have a presenter upstairs and as soon as  
4 they are done we switch places and we will run  
5 concurrent agenda with the Board of Advisors up stairs.

6           And of course our second important Advisory  
7 Board committee is this great body right here and that  
8 is the 110 Member Standards Board.

9           what we have done in preparing your agenda  
10 for this particular meeting is different from what we  
11 did in Denver last September, In Denver last September  
12 we had a very important issue that we had to put before  
13 our two Statutory Advisory Boards and the Board of  
14 Advisors met separately for that meeting in a different  
15 location.

16           what we did is focus on the voluntary voting  
17 system guidelines lines back in Denver back in  
18 september of last year. We broke up into break out  
19 sessions on the various aspects of the BBSG, security,

20 accessibility human factors et cetera. We had a very  
21 productive meeting about the voluntary voting system  
22 guidelines.

0

5

1           For this particular meeting what you have is  
2 an agenda full of Commissions and working EAC research  
3 projects. Just about our full research agenda will be  
4 presented to you throughout the next two days. And the  
5 reason for us to do that is because the EAC-- a very  
6 important function of the EAC in addition to working as  
7 your full partner in implementing the various  
8 requirements in HAVA will also be a national clearing  
9 house for best practices on election administration.  
10 And to be able to fully play and fulfill that role as  
11 an agency it is incumbent upon us to commission  
12 objective and professional and sound research so we can  
13 fully inform our partners in the election community and  
14 in the advocacy community, all our stake holders as to  
15 what we find our best practices in election  
16 administration.

17           So you will hear a series of presentations  
18 that begin almost immediately as soon as I get off the  
19 podium here. They will start to tell you here are the  
20 things that we are working. And the goal that we want  
21 to try to accomplish in the next day and a half is to  
22 get your candid advice of what we are working on. I

□

6

1 strongly encourage as much feed back questions whether  
2 they are positive or challenging. We want to get a  
3 sense of direction on the projects we are going to be  
4 presenting to you over the next day and a half. So we  
5 want to encourage your candid interaction as you hear  
6 these presentations and we need to get fully informed  
7 as to the direction that we are headed.

8           So the goal of this meeting is to give you a  
9 full briefing of all of our research projects we are  
10 working on. If you look at the agenda you will see at  
11 the end of the next day and a half, meaning tomorrow  
12 afternoon, you will have a two block. And that block  
13 can be extended even further if necessary for a plenary  
14 session time were you will be able to talk among  
15 yourselves as members of the Standards Board and to  
16 discuss what you heard from the EAC and if necessary  
17 if it is so desired pass resolutions and speak formally  
18 as a Standards Board, as an Advisory Board as to your  
19 collective opinion about the work that we are doing  
20 here.

21           We truly value the feed back we get from all  
22 of you. We don't just meet in a vacuum. I see so many

0

7

1 faces out in this room that we at the EAC call on just  
2 about every day for advice and for input.

3           So it is a very unique situation for us to  
4 have so many of you that we call upon almost daily to  
5 have you all collectively in the same room and to be  
6 able to draw from your vast experience and expertise  
7 for the next day and a half. We feel very fortunate to  
8 have you here. We are very thankful that you have  
9 traveled a great distance for many of you to spend the  
10 next day and a half with us. Thank you in advance.

11           So with that let me say I do need to  
12 announce anybody that needs to have an interpreter or  
13 signage can come and sit in the front row or we will  
14 make better accommodations for you to have a better  
15 view of the interpreter. This meeting is open to the  
16 public as have all of our Standards Board meetings have  
17 been. So there is a section in the back where non  
18 Standards Board Members are present. However Q and A  
19 and actual interaction is limited to the Standards  
20 Board members who are present. The members of the  
21 public who are here may observe but they may not ask  
22 questions or engage in any of the discussions or

1 presentations. It is strictly for the members of the  
2 Standards Board.

3           After we do some quick presentations here for  
4 the remainder of our lunch hour this meeting will be  
5 turned over the members of your executive board,  
6 meaning your acting chair, Peggy Nighswonger and her  
7 colleagues on the Executive Board, will then come up to  
8 the head table and begin to work you through the agenda  
9 and solicit your feed back.

10           So with that I will go ahead and ask our  
11 first presenter, our current General Counsel, Julie  
12 Thompson Hodgkins to come up and give us a brief  
13 presentation on our Legal Resources web page. After  
14 that we will have three more presentations. And then we  
15 will take a break and go into your first Plenary  
16 session. Julie, if you will come up, please.

17           MS. THOMPSON-HODGKINS: Thank you Mr. Martinez  
18 and welcome everyone to Washington D.C. I am so pleased  
19 to be the first presenter. To be able to talk about,  
20 well, what is a small project for EAC, but one that I  
21 hope will bring a lot of value to the election.

22           Just to briefly give you a little insight

1 into this project I remember the days back when I was a  
2 State Election Administrator being general counsel for  
3 the Department of Elections in Louisiana thinking it  
4 really would be nice to have one source to be able to  
5 go to take a look at all of the laws, all of the  
6 regulations, all of the cases country wide that dealt  
7 with elections.

8 I remember those days when you got frantic  
9 calls from the Legislature wanting to know how another  
10 state dealt with provisional voting or casting ballots  
11 or absentee voting or what have you and wishing I had a  
12 resource.

13 Actually at the Denver meeting I took a  
14 little poll of a few of you asking what you would think  
15 about EAC putting together this kind of resource. And  
16 it got some support. I brought it to the Commissioners  
17 and said, you know, hey what do you think about this?  
18 And they thought it was a good idea to.

19 So what we are doing is putting together a  
20 website to provide access for all of you, all the  
21 members of the public, to legal materials related to  
22 elections. It will provide you with up to date

0

10

1 information, current statues, current cases, and in a  
2 format that is user friendly.

3 we decided to start this project with a

4 rather simple focus and that is State and Federal  
5 elections. Anything from State Constitutions, Federal  
6 Constitutions, Federal law, such as Help America Vote  
7 Act, and NVRA, The Voting Rights Act. Certainly the  
8 Voting Accessibility for the Elderly and Handicapped,  
9 ADA and the rehab act. Anything that we could think of  
10 either in the Federal or State arena in terms of  
11 Legislation that would impact the elections process.

12           We are also going to have State Statutes.  
13 Constitutions, Administrative Rules and Regs. They will  
14 be categorized by state and by topical area. So if  
15 you're interested in knowing how California deals with  
16 provisional voting you can go to California and take a  
17 look at Provisional Voting Statutes or cases. The same  
18 thing with voting equipment and various other  
19 categories.

20           However if you are looking for a broader  
21 search you will also be able to key in the terms that  
22 you're interested in finding and take a look across all

D

11

1 of the States to see a sort of panorama of how that  
2 particular topic is dealt with.

3           As far as the cases are concerned we asked  
4 our contractor to summarize the cases for you at the  
5 beginning so that you didn't have to read the whole

6 case in order to determine whether or not it was  
7 something that really applied to your particular  
8 situation. You will also have a link to the full text  
9 of that decision. We started with a narrow focus and  
10 that is State and Federal elections particularly Help  
11 America Vote Act and the NVRA, and those issues which  
12 would be the most important to you guys as you are  
13 implementing HAVA.

14 As far as the time line is concerned on this  
15 project our contractor is just about finished  
16 identifying all of the resources that we need to be  
17 contained in the data base. They are in the process of  
18 summarizing those cases. And we will be populating that  
19 data base.

20 I am thrilled actually today to be able to  
21 give you a little bit of a preview of the data base. I  
22 hope you guys can see this. The text is a little small.

□

12

1 But these are some screen shots that we have. And this  
2 a look into the actual key word search where you would  
3 be able to enter in for instance: "Cast Ballot". And  
4 pull up cases, statutes, regulations that deal with how  
5 various different states are casting ballots. You can  
6 also of course, as I told you before, search by  
7 category or by state. So there will be a browsing  
8 function there that you can go to those into a drop

9 down menu and choose from various different sources.

10 And this is sort of an example of what the  
11 results page would look like. The information that you  
12 will be needing.

13 We are very excited about this. I hope that  
14 you guys share the excitement and hope this will be a  
15 great resource for you. This is another little screen  
16 shot here of browsing a particular record for a single  
17 state.

18 If you have any questions, comments anything  
19 that I can answer right now I would be happy to take  
20 questions.

21 MS. LYNN BAILEY: (Georgia) when do you  
22 anticipate that project will be available for the

□

13

1 public.

2 MS. THOMPSON-HODGKINS: I believe the tract  
3 that the contractor is on right now we should have this  
4 up by mid July. They are well into identifying all of  
5 the resources. There are quite a number of cases that  
6 they have summarized. But we try to ask them to do that  
7 on a priority bases, the newest cases first so that we  
8 can get that information out to you in that time frame.

9 BRAD CLARK: (California) will this be  
10 available to a regular EAC website? Will there be a be

11 a link to that legal resources.

12 MS. THOMPSON-HODGKINS: That is correct. There  
13 will be a link to Legal Resources Clearing House or  
14 Legal resources. You will be able to just go get that  
15 right off the EAC page.

16 The court Reporter has asked me to tell those  
17 who are speaking to identify yourselves so we will know  
18 who is speaking. Thank you so much for this opportunity  
19 to come and talk to you about this. I will be around  
20 for the next day and a half. So if any other questions  
21 come up with regard to Legal Resource Clearing House or  
22 in regard to anything else please do not hesitate to

□

14

1 come and find me.

2 MR. MARTINEZ: I think Julie actually makes a  
3 good point at the end. And that is our staff will be  
4 around for the next couple of days. The presentations  
5 that you're hearing today at lunch are going to be kind  
6 of rushed because we are trying to get you as much  
7 information as we can. And we are starting with this  
8 lunch hour. But after the lunch hour the presentations  
9 that you will have will be issue specific. You will not  
10 not have four in a one hour block of time. There will  
11 be a time when you will get a ten or fifteen minute  
12 presentation with about thirty to forty minutes to ask  
13 questions on a particular issue.

14           So these are the ones we thought we could do  
15 rather quickly. But still even so we encourage you to  
16 ask to ask questions even if it means we need to  
17 readjust our agenda this afternoon.

18           Okay. Our next presenter-- I am going to ask  
19 Karen Lynn-Dyson who is our research manager. Karen  
20 manages all of our research agenda. And Karen, why  
21 don't you come on up to the microphone if you don't  
22 mind. And Karen will introduce our next presenter who

□

15

1 will give a very a quick, brief, presentation. This  
2 project is on the work that we are doing to redesign or  
3 to offer more user friendly designs for various  
4 products that our presenter will explain to you. Karen  
5 come on up.

6           MS. KAREN LYNN-DYSON: I just want to  
7 reiterate what Commission Martinez said in terms of my  
8 availability to everyone here over the next couple of  
9 days. Am the individual responsible for oversight for  
10 all of the agencies research works and projects. I look  
11 forward very much to hearing from you all, your  
12 concerns, you issues, things you would like to see us  
13 addressing or addressing in more detail.

14           We have with us today Rick Grafe who is the  
15 CEO of the American Institute of Graphic Art. This

16 project which the Elections Assistance Commission is  
17 contracted for is one that Commissioner Martinez  
18 indicated where we are trying to provide to you all a  
19 series of best practices on ballot design and on  
20 signage. And with these best practices and these  
21 exhibits, if you will, of possibilities for approaches  
22 to ballot design and polling place signage we will take

0

16

1 into consideration literacy, readability, usability  
2 alternate languages, braille, audio accessibility and  
3 ADA compliance.

4 The American Institute of Graphic Art is the  
5 professional association of design. It has some 17,000  
6 designers working in a variety of communication media.  
7 And they through their Design for Democracy which is  
8 their non profit affiliate can assist you all,  
9 government agencies, in finding national or local  
10 professional designers and researchers who can help you  
11 on a for hire basis to implement some of these designs.

12 So with that very brief introduction I am  
13 going to Mr. Grafe Korfe go ahead and describe to you  
14 all the work they have been doing for the EAC on this  
15 contract

16

17 DESIGN FOR DEMOCRACY

18 MR. RICK KORFE:

19 All right. Thank you Karen. Again I am Rick  
20 Grafe sic) I want to thank you, Karen and also  
21 Commissioner Martinez. And I think some of the comments  
22 that he made are so very critical to what we want to

□

17

1 share with you. That is he talked about the importance  
2 of best practices; he talked about the importance of  
3 research; and he talked about how critical input is.  
4 And I think all of those are reflected in what we are  
5 trying to share with you today.

6 This is going to be very brief. And one of  
7 the reasons it is going to be brief is that this isn't  
8 really about you listening to me it is really about our  
9 me listening to you.

10 Our project is effective design in election  
11 administration (sic) and as Karen pointed out Sign  
12 for Democracy is an initiative for AIGA which has been  
13 around since 1999.

14 It eventually focused on clear communication  
15 and more thoughtful experiences in public sphere so we  
16 can trust in government and increase citizen  
17 participation.

18 The specific project we are working on is  
19 aimed at building expertise, or building from our  
20 expertise, experience and new research to create models

21 for optical scan electronic ballots and also for  
22 polling place signage.

0

18

1           Now the exhibits we actually created are  
2 under Tab five in your binders. And I mention that  
3 because I am going to do something that is a little  
4 unusual in talking about design. And that is I am not  
5 going to show you the designs because what we really  
6 want to do is gain your input. And there is an  
7 opportunity for you to look at the work under tab five  
8 and get a sense of it. And also in a room right across  
9 the hall we have two staff people, user specialists and  
10 researchers who are there to gain your input on various  
11 of the exhibits that are over there.

12           So during the next day, well actually two  
13 days, we will have the room, again, right across the  
14 hall. There is Elizabeth Hare, our Project Director and  
15 Mary Kwan who is our experienced strategist and  
16 usability specialist strategist. And they both will be  
17 over there looking for your input on some the exhibits.  
18 The exhibits are things like this. And while they are  
19 all drafts the intention is to get your reaction so we  
20 can refine them.

21           I want to mention now a couple of things  
22 quickly about designers and try to disavow you of

□

19

1 certain preconceptions about about design. What we are  
2 talking about here is not people in flip flops and long  
3 pony tails who are trying to design this stuff. And we  
4 are not talking about arrogant artists wearing all  
5 black. What we are talking about are professionals who  
6 can take an experience and define and break it down  
7 into the small pieces that make an experience, like the  
8 voting experience, like the election experience and  
9 break it up into segments. And research how people  
10 react to information and then craft a solution.

11           So what we are really talking about is a  
12 process, a designing process, a way of thinking about a  
13 problem and the election process itself.

14           We broke it down into identification,  
15 orientation, instruction, action, is the voting part,  
16 completion. And what you do is you look at the election  
17 process and say what are all the pieces and how do  
18 people relate to that.

19           And out of that what we are going to do is we  
20 are going to propose to you guidelines that respect a  
21 number of issues, that respects a number of issues. It  
22 respects HAVA compliance; it will respect need to adapt

□

20

1 materials for local applications; it will always to  
2 seek to find clarity and simplicity in what we are  
3 doing. And it will also reflect the need to respond to  
4 the technical requirements of voting equipment.

5           So right now our approach, and what happened  
6 to our project, right now our approach will deal with  
7 guidelines on the content, on what information is  
8 really needed by people at various stages.

9           You will deal with the voting system  
10 implication of course responding to the technical  
11 issues. It will deal with layout systems, the way  
12 people work through information. We know patterns that  
13 are most effective. And we will share those with you as  
14 well as issues of layout that reflect the needs of  
15 different technical systems. And also principles of  
16 design so that materials being adapted for the local  
17 level there are certain principles that you will know  
18 to follow.

19           what you see here are twelve stages in the  
20 design process. And I need to mention this again to  
21 point out that when you are dealing with a designer you  
22 shouldn't just expect them to design a ballot.

□

1           You should deal with designers who are  
2 actually asking you more about the process of design.  
3 And the issues that are highlighted, five and six,  
4 gather information and develop prototype ideas is a  
5 stage that we are at. With that, that is an important  
6 stage.

7           We need to understand how people need, use  
8 information. What information is needed and then you  
9 develop prototypes which are like the draft examples  
10 you will see across the hall and then you gain greater  
11 information.

12           This is one case where when we talk about  
13 testing we are not testing to figure out how well we  
14 have done. We are testing to inform what we do. So the  
15 idea here is that we have materials for you to react to  
16 and it is your reaction that is as critical as it is to  
17 what we bring to the project.

18           I know that for many dealing with this issue  
19 isn't traumatic but it is a tough one because ballots  
20 have been developed over the years and they have  
21 accommodated a huge amount of information, a huge  
22 amount of requirements that are very local. And most

1 people in this room, and most people in most of the

2 elections systems, feel very strongly, they feel the  
3 issues we are confronting are unique. And they are  
4 concerned that all of the challenges they have already  
5 faced be accommodated in the outcome.

6           Let me assure you that that is exactly why we  
7 want to hear from you. Understanding what you bring  
8 about, what is important, is actually critical for us  
9 to be able to adapt to something that you can use  
10 effectively at the local level.

11           One of the advantages of the work we have  
12 done. One of the advantages of the work that we have  
13 done our election design project team has already  
14 worked with election officials in Cook County, Illinois  
15 and the state of Oregon. And so in terms of the  
16 testing process we have actually have not only the  
17 kinds of test that we do in order to perform research,  
18 to understand how people can best understand the issues  
19 and answer the ballot. But also we have had field  
20 testing and post election use. And we bring to the  
21 project here not only that experience but also certain  
22 things that are true of virtually any information

23

1 design issue.

2           And our objective here is useful usable  
3 design. And our core team and what we bring to it,  
4 among other things, in addition to that experience, we

5 bring what we know from other research in terms of how  
6 people use information. And we know that there are  
7 certain principles that we will share with you that  
8 regardless of how your design evolves that you need to  
9 keep in mind and that is the design is not because it  
10 makes things look pretty but because it makes things  
11 useful. It makes things usable. They are effective.  
12 They are clear, they are simple.

13           These are things like using clear capital  
14 letters; not center lining type; keep the number of  
15 type variations down; understand information hierarchy;  
16 and using graphics to help illustrate points. We will  
17 share those things. And that's where we start.

18           Then we have our own panel of experts and  
19 project advisors that advise us and become part of that  
20 process of testing. Are we making the right conclusion  
21 when we are coming us with certain solutions?

22           And the next critical aspect is all of you.

□

24

1 That's why we will be here for two days because we need  
2 to hear from you the issues that are most important to  
3 you and make sure we can accommodate them.

4           And then of course there are the voters as  
5 well. We look to them and their response in two ways.  
6 One is through putting together some test situations

7 with prototypical or typical voters in advance and also  
8 the outcomes of actual use.

9           The concept we are taking here is we want to  
10 create a design that is simple enough to address  
11 exceptional means. And by dealing with the needs at the  
12 extremes, the exceptional needs, and making something  
13 simple and clear for them we believe we will meet  
14 everyone's requirements.

15           So in this next round of testing that we do  
16 we are going to include people from 18 to 21 years of  
17 age, 65 to 80 and address the kind of issues that Karen  
18 pointed are the object of the issues and that is  
19 dealing with literacy issues, readability, usability,  
20 alternate languages, braille and audio accessibility  
21 and ADA compliance. And then in addition we will try to  
22 see what the requirements are for localization, for low

0

25

1 experience levels and also for cultural obstacles.  
2 Ultimately again the outcome will be models that are  
3 other compliant, capable for local variability, easy to  
4 implement and sensitive to technical requirements.

5           The next stage will be some tests that we  
6 will do in the field, task based usability testing. We  
7 plan to do it on the east coast, midwest and west  
8 coast. And certainly if any of you want to be involved  
9 in this be sure to let Elizabeth or Mary know because

10 we have not selected sights yet. And the testing will  
11 be putting together, presumably, test labs and bring in  
12 volunteers to actually use the information.

13 I mention we will be in the room across the  
14 hall in the McPhearson Square Room, oh, I guess  
15 tomorrow is in the Board Room, it is not across the  
16 hall. So in the McPhearson Square Room, all day today  
17 until 6 o'clock. And tomorrow it will be in the Board  
18 room which is also on this level Board Room one I  
19 believe from 10 a.m., to 6 p.m. And you can also  
20 respond and even if it is not responding to what you  
21 see sharing with us your concerns.

22 Now what is this? We also want to get your

□

26

1 feed back on line. But this is one of those slides from  
2 hell. You know you try to come up with a simple  
3 solution, especially for designers who talk about  
4 simplicity. You try to come up with a simple solution  
5 and you get a URL that no one can remember. So we will  
6 skip that. We are looking for a survey monkey to do  
7 another job.

8 Nest, you can use this link on the Home page  
9 of Design for Democracy.org./participate URL there is  
10 a link of that on line survey which is going to be  
11 available through the end of the month for any of your

12 comments on any materials in Tab 5. And again: Design  
13 for Democracy.org/participate. And that will be up for  
14 ten more days, until the end of the month to gather  
15 your comments.

16           There are the names of Mary and Elizabeth who  
17 we be here the next two says seeking your input. And we  
18 certainly welcome it in any way or form you choose to  
19 get it to us. But it is critical for us to hear from  
20 all of you on this in order to accommodate your needs.  
21 Thank you.

22           MR. MARTINEZ: Any questions on this

□

27

1 particular presentation? Okay. Great thank you.

2           It occurs to me as I was listening to that  
3 presentation that perhaps this room could have been  
4 designed a little better for our meeting. Howard is  
5 that you behind the pillar? I think so. So our  
6 apologies for columns that are blocking the view, not  
7 that you want to see us up here anyway. But hopefully  
8 you can hear us back there, Howard.

9           What we want to do next, the final  
10 presentation both of this presentations on Public  
11 Access Portals and Spanish and Asian Language Working  
12 Groups that we have assembled will be presented by  
13 Edgardo Cortes who is one of our research specialists  
14 at the EAC. He will talk to you very quickly about

15 these issues and give you a chance to ask questions.

16 I also want to say about the previous  
17 presentation we reached our to Design for Democracy and  
18 to pull together best practices on ballot design and  
19 polling place signage et cetera. Based upon the input  
20 and urging from many of you out there we actually got a  
21 lot of feed back from, in particular, our Board of  
22 Advisors, upstairs, that this was a useful project for

0

28

1 us to do with a lot of positive feedback from election  
2 officials who had worked with Design for Democracy. And  
3 we felt they were an important group to bring in. Have  
4 them do some templates and some best practice  
5 documents that we could put out for your consumption to  
6 see if you want to follow up with any of their work.  
7 And that is why you heard that presentation.

8 Okay. The following two presentations very  
9 quickly, Edgardo Cortes with the EAC staff:

10

11

12 PUBLIC ACCESS PORTALS & SPANISH & ASIAN

13 LANGUAGE WORKING GROUPS .

14

15 MR. CORTES:

16 Thank you Mr. Vice Chairman. Give me just a

029237

17 minute to set this up.

18           Good afternoon, everyone, my name is Edgardo  
19 Cortes. I have been with EAC since late July of last  
20 year. Prior to that I used to run a National Voter  
21 Registration campaign that was funded by the government  
22 of Puerto Rico as well as did some political

0

29

1 consulting work for a couple of campaigns around the  
2 country. Probably working with Peggy Sims dealing with  
3 all the requirement payments issues, the HAVA funding  
4 questions that come in, the College Board Approval  
5 Programs, any NVRA issues that come up and so anything  
6 I am Peggy's backup for that. So a lot of stuff you  
7 send in to us she and I work on getting your responses  
8 to.

9           First thing I am going to talk about is the  
10 Public Access Portal Project that we have been working  
11 on since last fall. We awarded a contract to  
12 Publius.org to conduct a study which will examine and  
13 create a best practices document about Public Access  
14 Portals.

15           Publius is a non partisan, non profit 501C3  
16 based out of Detroit Michigan. They have been in  
17 existence for about ten years now. And actually got  
18 their start setting up an information web site like  
19 this for the state of Michigan.

20           The methods up here is essentially from the  
21 research that is ongoing, it is kind of a color coded  
22 map as to what sorts of web sites by available by

0

30

1 state. You can see some of them have state wide sites  
2 available. Some just have independent jurisdictions,  
3 half sites. Some are county based. And you can also see  
4 there are quite a few states that don't have anything  
5 set up so far. So those are kind of-- in terms of the  
6 research that is a visual representation of what they  
7 have looked at so far.

8           They have from September through December  
9 what they did was they went out and started doing an  
10 initial search of what web sites were out there and who  
11 is running them. And to this point they have identified  
12 and reviewed approximately 425 state, county and local  
13 web sites that provide information to voters.

14           of those 425 what they did was, starting in  
15 January, they started a more comprehensive look at a  
16 much smaller section of those, approximately fifty.  
17 what they have done is they are going in an ah, number  
18 one, going through the process of looking up  
19 information on the site, capturing what information is  
20 provided, how it is being provided all those sorts of  
21 things.

□

31

1 interviews so far, finance reviews with the  
2 administrator that run these sites, with the IG folks.  
3 And what they have done in terms of those 50 sites they  
4 really went out and got a variety of state, county and  
5 local web sites to look at. They focused on urban and  
6 rural web sites, you know various that were urban and  
7 rural. They looked at as much geographic diversity as  
8 possible so that the Best Practices Document that comes  
9 out in the end will address some of the regional  
10 differences that might exist in terms of how  
11 information is presented. And will look at the  
12 differences throughout the states.

13           A couple facts about the web site. The  
14 actual first source of these informational web sites  
15 actually date back to around 1996, when the Internet,  
16 the use was not very wide spread yet. And so they  
17 really advanced a lot between then and now.

18           In terms of their initial research one of the  
19 things that they have found to be the most popular  
20 function-- when we went into this we really thought  
21 that the big questions were people wanting the check  
22 their registrations status, their voter registration

□

32

1 status. And to know where their polling place was  
2 located.

3 That was one of the reasons we received this  
4 project, the kind of internal, initial research that we  
5 did to prepare to let this out a contractor indicated  
6 that those were the two big questions.

7 what we actually found is that aside from  
8 those, those are very important actually, but one of  
9 the things that draws people most to these sites are  
10 the sites that have candidate information and sample  
11 ballot information on the sites. which is something  
12 they are taking a look at in terms of what ways that  
13 can be readily presented to folks. And what they found  
14 is that sites that have the usage increases  
15 dramatically once that information goes up closer to  
16 election time. Once those sites put that information up  
17 the usage goes up.

18 Another interesting thing that we were able  
19 to take a look at this year, and it is going into the  
20 final report actually, is Louisiana set up a web site  
21 to provide voter information to displaced voters. Folks  
22 that were displaced after Hurricane Katrina. And they

□

33

1 set up this web site so that those folks, prior to the  
2 special election in New Orleans, would be able to, from  
3 anywhere in the country, go in and access not only the  
4 information of, you know, the dates and everything,  
5 but were able to get information on the absentee ballot  
6 process, were able to down load applications for  
7 absentee ballots and really provided a lot of  
8 information and was kept up to date. So Publius was  
9 actually able to, because of the timing of our project  
10 was actually able to look at from beginning to end this  
11 process and has spoken with folks in Louisiana about  
12 it. And that is one of the things we will be dealing  
13 with in the final report which we might be able to use  
14 in the future for other studies as well.

15           One of the things that may or may not  
16 surprise you is that number one there is a lot of  
17 interest at all levels for providing these sites. It is  
18 has really been an issue of resources up until now as  
19 to whether or not jurisdictions provide these sites and  
20 how advanced they are.

21           One of the things through the phone calls and  
22 interviews that they have done with existing sites is a

□

1 lot of the smaller jurisdictions and the counties have  
2 been kind of stalling further development of these  
3 sites because there is a lot of concern out there about  
4 how the switch to a statewide voter registration list  
5 is going to impact states providing this information  
6 whether or not it is going to be done at a state level.  
7 And kind of remove the need for them to have it at the  
8 local level. So that is one of the concerns that has  
9 come up during the research as well.

10           One thing that shouldn't surprise anybody is  
11 there is no one promotion strategy for these sites that  
12 works. Every location that has them is different as to  
13 how they get the word out about them and how they draw  
14 people to those sites.

15           In terms of timing, just go give everybody an  
16 idea, they have been doing this research for a while  
17 now. They are hoping to-- we are hoping to have the  
18 draft document ready by mid to late summer. So July or  
19 August we are hoping to have a draft document available  
20 which we will-- I will work with the Commissioner to  
21 make sure that we are able to distribute that to both  
22 the Standards Board and the Board of Advisors for

D

35

1 people to be able to look at it, give their feed back  
2 before it goes into the final version which we hope if

3 we can get the draft in mid Summer and we are hoping  
4 that sometime in the early Fall we will be able to have  
5 a final document out there.

6           In terms of the time line we realize it is an  
7 election year. We realize this information is going out  
8 in the Fall. One of the things that we realized early  
9 on was that even last Fall it was to the point where it  
10 was pretty much too late for states and jurisdictions to  
11 implement the suggestions that were going to come out of  
12 this in time to impact this year's elections. So what  
13 we are really hoping to get out of this document is  
14 that it will be available toward the end of this cycle  
15 so that once we get into next year and people start  
16 looking toward the '08 Presidential elections. And we  
17 have gotten past the HAVA deadlines and everybody's  
18 attention starts to shift this information will be out  
19 there so that states, and counties and local  
20 jurisdictions can take the information in here and be  
21 able to implement these sites with enough time to make  
22 them functional and work out all the bugs and

□

36

1 everything before we move into the election year. So  
2 that's what we are looking at in terms of time lines  
3 for this project.

4           I will take questions about both of these  
5 after I finish the second topic

6

7

SPANISH AND ASIAN LANGUAGES WORKING GROUPS.

8

9 Many of you know there have been a lot demographic  
10 changes in the country and a lot of-- particularly in  
11 the past decade there is a lot of jurisdictions that  
12 have sizeable populations that fall under Section 203  
13 of Voting Rights Act, or who will soon be, and a lot  
14 jurisdictions. And lot of jurisdictions that didn't  
15 before now have to provide information in alternative  
16 languages.

17

          We have seen it and we realize the issues  
18 that come up in terms of jurisdictions that have never  
19 dealt with alternative languages or to some of the  
20 issues that come up and how can they implement this  
21 properly.

22

          Prior to my getting here the work had already

□

37

1 started on these projects. It was decided by the  
2 Commission that we should-- really what we should do is  
3 to bring together some working groups that consist of  
4 election administrators, advocacy organizations,  
5 different people that deal with the issues that come up  
6 and deal with them first hand and let us know what sort  
7 of research we can conduct that will help you in that

8 process.

9 HAVA section 241, which is the section that  
10 talks about the studies of election administrations one  
11 of the things that it charges the EAC to do is conduct  
12 research on making information most convenient,  
13 accessible and easy to use for voters including voters  
14 with limited proficiency in the English language. So  
15 that is actually in HAVA. And one of our mandates is to  
16 go out there and find information to make it easier to  
17 provide or to administer elections using alternative  
18 languages.

19 The way we started out was last August we had  
20 the first meeting of the Spanish language working  
21 group. We had that at the EAC offices. And the reason  
22 we chose to deal with the Spanish language first is

□

38

1 number one it is largest alternative language that  
2 folks are dealing with. Most of the-- the majority of  
3 jurisdictions out there that deal with alternative  
4 languages have been dealing with Spanish. And that  
5 really has been because of the growing population size  
6 it has been an issue that a lot of knew jurisdictions  
7 have had to deal with. So we wanted to bring that group  
8 together and see what sort of things we could do. That  
9 was in early August.

10 The next group we decided to bring together  
Page 34

029246

11 was a group to discuss access to different Asian  
12 languages. Under Section 203 of the Voting Rights Act  
13 there are actually five Asian languages, Asian and  
14 Pacific Islander languages that are covered and that  
15 certain jurisdictions have to provide information in  
16 those languages. That is Chinese, Japanese, Korean,  
17 Vietnamese and Tadolwin (sic). So that working group we  
18 actually had at the end of April, so just about a month  
19 ago we brought that group together.

20           we are looking toward the future, hopefully  
21 sometime next year to be able to bring together a  
22 working group dealing with native American languages.

0

39

1 And that one is going to be really interesting because  
2 with a lot of languages we are talking about languages  
3 that have no written form, they are all spoken  
4 languages. And so that presents a whole additional set  
5 of issues when you're talking about administering  
6 elections and providing information in an alternative  
7 language that you can't write.

8           So basically what all three of these groups  
9 are meant to do is provide the EAC with, or help us in  
10 accessing what sort of language specific projects we  
11 can conduct as an agency.

12           Some of the things that have already come up

13 and that we are actually are working towards is number  
14 one creating translation dictionaries of election  
15 terminology to have a document that would provide a  
16 whole list of election terms and provide a translation  
17 from English to whatever the alternative language is.  
18 The first one we are working on is actually English to  
19 Spanish. And so we are also looking towards doing the  
20 five Asian languages.

21           And one of the biggest complaints we have  
22 gotten in terms of, and I am sure you have all heard,

□

40

1 in terms of trying to provide this information is that  
2 the translation services that are out there aren't  
3 always the best. And when election information gets  
4 translated a lot of time it is a literal translation  
5 and the meaning is really lost when you translate it to  
6 the other language.

7           So we are hoping by providing this tool for  
8 election administrators it can help you all meet the  
9 needs of the communities that you are serving, and the  
10 electorate that you serve.

11           The other project that we actually are  
12 working and we hope to have ready by mid summer is  
13 providing a translation of the National Voter  
14 Registration form. We have the Spanish language  
15 version, the updated one already up on our website.

16 Both the English and the Spanish were recently updated.  
17 But the form hasn't been translated into the five Asian  
18 languages since the FEC first created the initial voter  
19 registration form. So it has been quite a while. And we  
20 are hoping to get that done fairly quickly so that  
21 those jurisdiction can have voter registration forms  
22 available in those languages later this year.

41

1           And then finally we are-- one of the roles of  
2 these groups is to provide us not only with the feed  
3 back but to help us prioritize. I mean there is all  
4 these questions all the time for different research  
5 projects that you all think would be useful. And by  
6 bringing these groups together we are hoping to  
7 establish some sort of priority for what we can do  
8 short term to get some immediate assistance out there  
9 and then look at what we can do long term in terms of  
10 these issues.

11           So that is pretty much what the language  
12 groups are doing. So I can take some questions.

13           MR. MARTINEZ: We can move very quickly for  
14 some questions or comments from anybody out there? Any  
15 questions or comments about Public Access Portals or  
16 the working groups we have assembled, Secretary  
17 Kidmeyer.

18 SECRETARY KIDMEYER: A question in regards to  
19 dialects how do you handle dialects even though it is  
20 the same language?

21 MR. CORTES: That is actually one of the  
22 things we spent a lot of time on actually during both

0

42

1 working groups. The Spanish language translations are  
2 the first ones we are working on so I can tell you a  
3 little bit about how we are going to handle that.

4 One of the suggestions we had was to bring  
5 together a group of language experts, academics to  
6 review the work we are doing in terms of translation.  
7 But the other thing that we are doing is we are going  
8 to look at what the regional differences are and  
9 provide alternative terms to reference the same thing.

10 For instance the word ballot is translated  
11 into Spanish is different if you go to Florida if you  
12 go to New York , if you go to California. They all use  
13 different terms for that. In the instances were we can  
14 provide some sort of standard translation term that  
15 everybody understands or alternatively for those were  
16 that doesn't exist to provide, you know, multiples  
17 translations so that depending on where you're at you  
18 can look and see what sort of populations you are  
19 coming from.

20 A lot has to do with country of origin. So

21 providing that information you will be able to go to  
22 the list and say well my jurisdiction has a very large

□

43

1 Puerto Rican population this is probably the  
2 translation form I should use.

3 MR. MARTINEZ: Other questions please? Yes,  
4 John.

5 JOHN LINDBACK: It is a really basic  
6 question. I don't understand the difference between a  
7 Public Access Portal and conventional website. Because  
8 we have had a ton of information out there on a  
9 conventional website. When you talk Public Access  
10 Portals what do you mean exactly?

11 MR. CORTES: It is essentially a voter  
12 information website. And what they are looking at is a  
13 website where you can go in and get information as far  
14 as registration status. It is a polling state  
15 locations, candidate information, all those very  
16 specific election information.

17 We do realize that most states do have basic  
18 sites, whether it is the Chief Election Officer or the  
19 local jurisdictions that have polling place hours and  
20 those things. We are really looking at sites that open  
21 further and are more interactive in terms of the  
22 information that people can pull from them.

0

44

1           MR. MARTINEZ: And some states, I think, have  
2 more experience in putting forth what is regarded as  
3 Public Access Portals. I am looking at Sarah Ball  
4 Johnson who is right next to you because I think  
5 Kentucky is one of the states that has been something  
6 like this for a while. She is whispering to you right  
7 now.

8           I broke my own rule. When you raises your  
9 hand to speak if you can introduce yourself, state your  
10 name for the court reporter. And I apologize, Secretary  
11 Mary Kiffmeyer and John Lindback from Oregon. Mary  
12 Kiffmeyer from Minnesota.

13           Any other questions or comments on anything  
14 that was presented, please.

15           Okay. Edgardo, thank you very much. I  
16 appreciate your work.

17           Again as a quick background what we are  
18 presenting to you over the next day and a half, and  
19 what we just started with the first four presentations  
20 are research projects that are grounded in some place  
21 in our government statute, within HAVA.

22           We are either wearing a hat of producing a

0

45

1 national clearing house of best practices; or we are  
2 wearing a hat of having to produce voluntary guidance  
3 to help clarify title free requirements. So there are  
4 different hats that the EAC will wear statutorily that  
5 when we wear the hat we want to wear it in the manner  
6 that is consistent with the advice that we get from our  
7 statutory boards, and that is you.

8           Again what we do proactively is to try to  
9 reach out to all of you, as many as we can  
10 individually, throughout the course of our fiscal year,  
11 asking you to participate in working groups, many of  
12 you have done so, seeking your advice through our  
13 fiscal year. We have a chance to get you all in one  
14 room once or twice a year to put it all in front of you  
15 and solicit your candid feedback.

16           So again I encourage your questions. And it  
17 doesn't have to happen in this hour. We can continue  
18 this conversation throughout the duration of the next  
19 day and a half I am going to turn the mic over, after  
20 the break, to your Executive Board and they will  
21 commence the official gavel of your Standards Board  
22 Meeting. So thank you very much for being here once.

1 Thank you for what I know will be a productive day and  
2 a half. The four Commissioners will be in and out  
3 because we have the Board of Advisors going on  
4 simultaneously two floors above you we will be  
5 alternating in and out. But all four Commissioners will  
6 be around for the next couple of days. We look forward,  
7 I certainly look forward to engaging in conversation  
8 both with the body collectively and all of you  
9 individually.

10 So with that Madam Chair, I have 1:25 if you  
11 want to allow for a ten break we can just go five  
12 minutes off your schedule. I have 1:25 if we can  
13 reassemble at 1:35. Thank you very much.

14 ( Recess from 1:25 to 1:45 P.M.)

15 MS. NIGHTSWONGER: Okay. Commission Martinez  
16 has already welcomes you and I would also like to  
17 welcome you to our meeting here of the National  
18 Standards Board. And I am only here because Mike left  
19 us. He had the nerve to go out on us. And you all  
20 probably got that email about him getting a new  
21 fantastic job. So he kind of left me hanging out here.  
22 So all of you are going to have to be very patient with

1 me today and tomorrow and please don't throw tomatoes  
Page 42

2 at me from the crowd. I will try to get someone up here  
3 in a few minutes to help keep me in line.

4           Before we begin to day I guess I should call  
5 this meeting to order first of all. I don't have a  
6 gavel. I don't know if Adam took it or what happened. I  
7 would like to just talk about a couple of ground  
8 rules that I'd like to put in place here and that is  
9 for our Court Reporter here is going to be taking the  
10 minutes, the official minutes of this meeting so we  
11 really do need to speak in a microphone when we go to  
12 the floor. And we are going to have some roving mics  
13 so that you don't always have to get out of your seat.  
14 So if you will raise your hand I will call on you and  
15 the people carrying the mic will get a microphone to  
16 you. And I would like you to address the group with  
17 your name and where you are from please. And then you  
18 can give your question or whatever. So if you can just  
19 try to do that. That way we will know who is talking  
20 and what they are saying and we can hear very well.

21           The first thing we need to do is call the  
22 role. So I would like to have Bill Campbell if you

□

48

1 would go ahead and do that. If you would respond when  
2 he call your name so we can make sure we have a quorum  
3 at this meeting.

4 MR. CAMPBELL: I will read the state name and  
5 then the members.  
6 Alabama, Nancy Worley.  
7 MS. WORLEY: Here.  
8 MR. CAMPBELL: Luke Cooley (no response).  
9 Alaska, Whitney Brewster.  
10 MS. BREWSTER: Here.  
11 MR. CAMPBELL: Shelly Crowden?  
12 MS. CROWDEN: Here.  
13 MR. CAMPBELL: American Samoa? Soliai T.  
14 Fuimaono?  
15 MR. FUIMAONO: Here.  
16 MR. CAMPBELL: FILIVAA MAGEO? (No response).  
17 MR. CAMPBELL: Arizona? Kevin Tyne.  
18 MR. TYNE: Here.  
19 MR. CAMPBELL: Mitch Etter?  
20 MR. ETTER: Here.  
21 MR. CAMPBELL: Arkansas, Charlie Daniels? (No  
22 response) .

14 MS. WESOLOWSKI: Here.  
15 MR. CAMPBELL: Wyoming, Peggy Nightswonger?  
16 MS. NIGHTSWONGER: Present.  
17 MR. CAMPBELL: Julie Freese?  
18 MS. FREESE: Here  
19 .  
20 MS. NIGHTSWONGER I believe we need 56  
21 members for a quorum, so we will figure this out.  
22 MR. CAMPBELL: Is there anyone that did not

□

57

1 respond to the roll call?

2 MS. NIGHTSWONGER: Okay. We have a sufficient  
3 number of members to conduct business. We will move  
4 ahead.

5 Before we get started here with some other  
6 things on the agenda I would like to introduce the  
7 Executive Board if I could. Probably most of you know  
8 who they are but I'd like them to stand so you can make  
9 sure you know what their face looks like in case you  
10 want to bombard them with a problem or an issue that  
11 you're having.

12 Actually is the room okay? I want to ask  
13 that. Is anyone too hot or too cold or do we care that  
14 they are uncomfortable?

15 So if I could just have you stand when I call  
16 your name. First of all Indiana Secretary of State Todd  
17 Rokita. And Vermont's Secretary of State Deborah  
18 Markowitz. Oregon Director of Elections John Lindback.  
19 Kentucky Executive Director Sarah Ball Johnson. City  
20 Clerk of Woburn, Massachusetts Bill Campbell who is up  
21 here with me. And Clark County Registrar of Voters,  
22 Harvard Lomax. And last but not least, even though he

0

58

1 came last Natchitoches Clerk of the Court, Louie  
2 Bernard. And Louie do you want to come up. You have  
3 something to say. I am almost afraid to call him to the  
4 table. So that's your Executive Board. And I really  
5 appreciate all of them and the help they haven given  
6 me. Now you know what they look like in case you have  
7 forgotten since Denver.

8 MR. BERNARD: I was asked to be the chaperon  
9 for the Executive Board when we were first elected. I  
10 was not here last night. I have nothing to do with last  
11 night. I don't know what they did and I don't want to  
12 know what they did.

13 It is very good to see all of you. I couldn't  
14 come in until this morning. Beverly Kauffman and I flew  
15 up together from Houston. We just happened to meet up,  
16 it is good to be here and see all these familiar faces  
17 again.

18 As most of you know Ray Martinez has  
19 announced that he will be leaving the EAC in June. I am  
20 personally very pleased about that because anyone who  
21 has worked with Ray, you know how pushy he can be  
22 (laughter). For almost two years we all have had the

0

1 honor and privilege to work with this tireless and  
2 selfless man. And we all better people for and a better  
3 EAC for him having come our way.

4 I don't know about you, I sense in this  
5 country a partisanship that almost strangles everything  
6 we try to do. Our Commissioner since the day I came in  
7 here at the meeting in Houston. I've always been amazed  
8 how they seem to get along and work together with one  
9 another. I have no doubt that behind closed doors when  
10 we go home they may holler and scream but there is an  
11 outward appearance that lets try to respect each other  
12 and accomplish something for the entire  
13 group. And I think that is a good thing to do.

14 Ray Martinez has been at the heart of all  
15 that is positive, that has happened with EAC in this  
16 relatively short period of time.

17 He is one of the four, what I call one of the  
18 four T-Rex's at the EAC but the endearing quality  
19 about Ray is that he doesn't know he is one of those.  
20 He is a man of great humility. He is a man of great  
21 sincerity and he is someone more than anything else  
22 respects someone's point of view.

□

1 where I come from the nicest thing that can  
2 be said about a man is that he is truly a gentleman.

3 And I think without question, despite if you agree with  
4 everything that Ray has said or done, that Ray Martinez  
5 is truly a gentleman.

6 Ray, the Executive Board and the Standards  
7 Board would like to wish the very best in all that  
8 comes down your way in the future we want to give to  
9 you our heartfelt appreciation for all you have done  
10 for us.

11 I think it would be a shame for anybody to be  
12 a part of any organization and leave without being able  
13 to say they made a difference. I don't think Ray  
14 Martinez has anything to worry about when it comes to  
15 having made a difference at the EAC.

16 So I will close it by allowing Peggy to  
17 present this plaque. And Ray I just want to tell you  
18 that on behalf of all of us it is not an original  
19 blessing but it is something that I feel is very  
20 appropriate as you leave, the old Irish blessing, we  
21 would all say to you:

22 "May the Road rise to meet you.

□

61

1 May the wind be always at your back.  
2 May the sun shine warm upon your face.  
3 May the rain fall softly upon your fields.  
4 And until we all meet again may the Lord.

5 Hold you in the palm of His hand."

6

7 Ray, would you come forward you. (Applause).

8 Presented to Ray Martinez III for selfless

9 and exemplary service to the Elections Assistance

10 Standards Board, our heartfelt thanks for going the

11 extra mile for America's voters this 23rd day of May

12 2006, by a very appreciative Executive Board.

13 MR. MARTINEZ: Thank you very much. I am

14 going to get out of your way quickly. I can not thank

15 you, Louie, for the wonderful words and my thanks to

16 all of the members of the Executive Board. I have had

17 the distinct privilege of working very closely now for

18 the past year that I feel like I am a close friend with

19 each and every one of them for a very long time now. I

20 am so appreciative.

21 And you know I am still the Commissioner for

22 at least a few more weeks and I am going to savor every

0

62

1 moment of it because has been truly for me the most

2 fulfilling professional experience in my life.

3 In my household growing up in south Texas

4 public service meant something. And I am proud to say

5 to my family and all my friends that I have tried to

6 fulfill that. So I thank you very much. It is with

7 genuine sincerity it has been a privilege for me, a

8 real privilege and honor, to work with all of you. So  
9 thank you very much now get to work.

10 (Applause).

11 MS. NIGH SWONGER: Thank you Commissioner.

12 The first order of business is we need to  
13 a appoint a Parliamentarian. And Julie has been so kind  
14 to do that for us in the past. She too has left us. I  
15 don't know what is going on here. Everyone is leaving  
16 us.

17 So I would like to open this up. I am sure  
18 many of you are Parliamentarians and would love the  
19 opportunity to sit up here beside me and keep me in  
20 line. So is there anyone who would like to do that  
21 today? Don't be shy. We know who you are. Some on.  
22 Nobody? Lou, what do you think.

□

63

1 MR. BERNARD: I think they are being shy.

2 I know there is someone out there who can do  
3 it. You don't want me.

4 MS. NIGH SWONGER: Anybody? I really do need  
5 help, honest. Secretary Kiffmeyer, oops she is still  
6 deciding here. Thank you so much for volunteering, if  
7 you will come up and take the seat on my left. Are you  
8 right handed.

9 MS. KIFFMEYER: Either hand will do.

10 MS. NIGH SWONGER: Thank you so much.

11 The next thing on our agenda here, and I  
12 think all of you got an agenda I hope. They were in  
13 your books. If you need an agenda please raise your  
14 hand we can get you one for today's meeting. As we look  
15 down over the agenda we are going to do a little bit of  
16 Board business here. And then following that we will  
17 move into some presentations from the EAC.

18 If we can move ahead with the agenda the  
19 chair will entertain a motion to adopt the agenda if we  
20 could first.

21 MS. BARTHOLOMEW: I so move.

22 MS. NIGH SWONGER: All in favor?

□

64

1 ( Aye).

2 MS. NIGH SWONGER: Opposed? I hear no opposed,  
3 okay. The Aye's have it and we have an agenda.

4 As for the minutes in your book, behind Tab 4  
5 I believe it is we have a synthesis of the Denver  
6 meeting. I don't know about you but I probably would  
7 like to look over those a little bit. And I was  
8 wondering if we can postpone talking about the minutes  
9 until tomorrow sometime. That would give you tonight  
10 to look over the minutes of the synthesis of what was  
11 done in the Denver meeting.

12 I think that would be better. There is quite

13 a lot for you to read after just picking up your books.  
14 So we will postpone that on the agenda until tomorrow  
15 that would work better.

16           Okay. You all have your books. And I think  
17 the books are pretty self explanatory. Everything is  
18 tabbed and put together very nicely. So we will be  
19 working from the agenda. As you notice all of the  
20 presenters have information in our books. And you will  
21 find them behind the tabs as indicated in your book.

22           Right now we do have some discussion about

□

1 our bylaws when we were in Denver last year as many of  
2 you probably remember. And we actually adopted our  
3 bylaws when we were in Denver. But I am going to ask  
4 Kevin Kennedy if he would come up. Kevin worked on the  
5 original bylaws committee, or whatever that committee  
6 was called, when we were trying to establish bylaws.  
7 And I would like him to give us a brief presentation on  
8 sort of what is going on and the history.

9           I know many of you are new to our Board  
10 because someone has left and you have been appointed  
11 to this position and you may not even know some of the  
12 things that have gone on in the past. So Kevin if you  
13 would just give us a brief presentation about that I  
14 would appreciate it.

15 MR. KENNEDY: Thank you. First I would like  
16 to welcome Peggy to this new position. And challenge her  
17 during the course of this meeting to pronounce the name  
18 of the New Mexico Secretary of State and the Travis  
19 County clerk (laughter).

20 MS. NIGH SWONGER: I have been working at it.

21 MR. KENNEDY: The minutes-- I'm sorry. The  
22 bylaws are set up behind Tab 2. And as Peggy said were

0

66

1 adopted at the last meeting. The minutes provide a  
2 very good summary of the fact that we had three motions  
3 to change those bylaws. All three of those bylaws  
4 failed. So what you see in front of you are the bylaws.

5 I would like to draw your attention to a few  
6 sections of that so that your familiar with it because  
7 as a new organization. I think this tells you how we  
8 are going to operate. It is a point of reference.

9 One of the motions that failed dealt with  
10 Section 23 on authority, page one on how to treat non  
11 partisan members of the Commission of the Standards  
12 Board.

13 I'd also want to make sure you are familiar  
14 with the Procedures of Nominating of new members of the  
15 Board, members of the Executive Board that are set out  
16 on page 2 of the materials under Section 4.

17 Section C of the bylaws themselves, the  
Page 60

029272

18 Chair, on page 3 certain duties of a client, we have  
19 two standing committees according to the bylaws. One is  
20 a nominating committee. So there will be some action on  
21 that towards the end of the year. And our President  
22 will appoint a Chair for that committee and the Board

0

67

1 will find members.

2           The same is true of the bylaws committee. A  
3 Chair will be appointed in the interim. And committee  
4 members will volunteer for that. That is in Section 4F,  
5 on page 3.

6           The final thing we had some questions that  
7 failed at the last meeting dealing on how we establish  
8 quorum. And whether or not we use proxy votes. And if  
9 you look at Section 5-- I'm sorry, Section 6 on page 8  
10 it describes the voting procedures.

11           Section 7 proposes how we handle the actual  
12 bylaws for the committee. And with Section 7 I will  
13 point out the committee wants us to establish and be  
14 charged with developing a forum. My experience of  
15 working with this group in the last year in putting a  
16 these bylaws together is that there is no shortness of  
17 ideas on how to come up with rules and regulations. One  
18 of the proposals is there will be a sample form so that  
19 we can have a very orderly process in doing this.

20 I think it is very important for all of the  
21 members to take the time to review the materials that  
22 are on pages one through ten before the next meeting,

0

68

1 if you have ideas on changes to the bylaws. In terms of  
2 that my guess is that the Bylaws Committee will have a  
3 form in place.

4 And what I would like to do for my final  
5 comment before is there any questions is to point out  
6 these initial set of bylaws would not have happened if  
7 it were not for Joanne Armbruster, Bill Campbell, Tonni  
8 Bartholomew, Howard Sholl all made dedicated attempts  
9 to review these bylaws, make suggestions and edit the  
10 initial document that was put together by Julie  
11 Horowits (sic) so with that unless there are any  
12 questions that is mu summary.

13 MS. NIGH SWONGER: I think I might before take  
14 questions from the floor. I think a little apology to  
15 the Executive Board I believe we asked for people who  
16 had an interest in working on the bylaws committee to  
17 indicate that somehow while we were at the Denver  
18 meeting. And we never really formally asked for that.  
19 So I would just indicate that right now that if you  
20 want to look at our bylaws and propose any changes we  
21 do need a committee to work on that. So I would really  
22 like you to let me know if you have any interest in

□

69

1 doing that because I think it is out job to appoint a  
2 Bylaws Committee. Seven members?

3 MR. KENNEDY: Seven members.

4 MS. NIGHSWONGER:

5 So if you have an interest on working on bylaws I  
6 would really challenge you to let me know that. You can  
7 email me. My email address is in the book. And I would  
8 be happy to hear you about that. Any questions for  
9 Kevin?

10 MS. Nighswonger: One thing that I failed to  
11 mention. It was just a little housekeeping thing. In  
12 the book where the members are listed. Behind Tab 3. I  
13 want you all to really take a good look at that list  
14 and also the bios for all of the members of the  
15 Standards Board because I think there are some people  
16 who thing that maybe they were left out, or maybe their  
17 bio isn't correct, or it is an old one. Anyway please  
18 look at that while you're here at this meeting and make  
19 sure that everything on your information is correct.  
20 Read your bio. And if there are any changes to anything  
21 on that page or in that section I would suggest you get  
22 hold of Adam. You can email Adam at the EAC and he will

□

70

1 get those changes made before we send out anymore  
2 mailings or meet again. So it you will take a look at  
3 that that will be great.

4           Okay. I think I would like to call  
5 Commissioner Martinez to the front again. He is going  
6 to review and present the Standards Board charter. And  
7 we can talk about that little bit.

8           MR. MARTINEZ: Thank you, Madam Chair.

9           One person, and actually I believe you have  
10 heard his name over and over again, but needs to be  
11 properly introduced is Adam Ambrosi(sic) who is my  
12 special assistant and who had helped to pull together  
13 all of the logistics and all of the preparations for  
14 this meeting. He has done a terrific job. He did it in  
15 Denver. Adam is your point of contact for anything that  
16 you need. He will be floating around here for the next  
17 couple of days and will be available to help in any  
18 way. So that is who Adam Ambrosi is.

19           The Charter that we took up, the Federal  
20 Advisory Act, governs advisory committees to Federal  
21 agencies. It requires that we adopt a charter in the  
22 next couple of days.

□

71

1 MS. NIGH SWONGER: If you don't have a copy of  
2 the charter it is outside on the table.

3 MR. MARTINEZ: Adam can you get a stack of  
4 copies and make them available.

5 MS. NIGH SWONGER: Maybe we can them pass out.

6 MR. MARTINEZ: Right.

7 MS. NIGH SWONGER: I am sorry. I meant to do  
8 that.

9 MR. MARTINEZ: Yes i should have done that.  
10 But we have them up front and Adam will get a stack and  
11 walk down the center isle here and pass them out.

12 The Charter, Madam Chair, is required under  
13 the Federal Advisory Committee Act and it essentially,  
14 I have a copy of one in front of me this is the Charter  
15 that governed the authority of this Advisory Committee  
16 for the past two years. And it simply has to be  
17 readopted. It is required to be readopted. And we  
18 readopt it every two years. And you have reached the  
19 two year mark.

20 Essentially the Charter reiterates it just  
21 takes the authority and responsibilities that come  
22 straight out of our governing statute which is the Help

□

72

1 America Vote Act puts it into a Charter type of format  
2 and says, here are your responsibilities, here is how  
3 we are going to carry out those responsibilities. It a  
4 s pretty straight forward document. And we will ask  
5 that you all will allow for the Charter to be adopted  
6 once again.

7 And, Madam Chair, of course, if there is any  
8 questions or if there is a desire to wait until your  
9 plenary session tomorrow in case anybody has any  
10 questions or concerns obviously I don't think that is a  
11 problem from our perspective. It is just before you  
12 leave here at the close of business tomorrow we  
13 obviously need to readopt your Charter. As it is now  
14 about to expire. Thank you. Back to you Madam Chair.

15 MS. NIGH SWONGER: Thank you, Commissioner. I  
16 need a motion.

17 MS. VIGIL-GORON: Rebecca Vigil-Gorom from  
18 the State of New Mexico. I make a motion for adoption  
19 if there is no objection from the other members.

20 MR. KENNEDY; I will second that motion. I am  
21 Kevin Kennedy.

22 MS. NIGH SWONGER: All in favor?

0

73

1 (Ayes from the audience).

2 MS. NIGH SWONGER: Opposed? Motion carries.

3 MR. MARTINEZ: Thank you very much.

4 MS. NIGH SWONGER: I'm sorry. I am out of  
5 order. We did not have discussion. Too late the motion  
6 carried.

7 would like to introduce my secretary, Joe  
8 Meyer. I am so nervous about this you all conduct  
9 these meetings a lot on a local level. This is not  
10 like we do in Wyoming. We take a sot gun and when  
11 someone is out of order we just shoot it. (laughter) I  
12 guess that would go over big here.

13 Okay. Next item on our agenda is the  
14 election of our Executive Board vacancy. With Mike  
15 leaving that left a vacancy on the Standards Board and  
16 on the Executive Board. Now when we went to figure out  
17 how to figure out how to fill this vacancy nothing was  
18 very clear about that in our Bylaws. So there is  
19 something for you to do.

20 So what the Board talked about-- many of you,  
21 or all of you, should have received emails from Adam  
22 with the names of the people who are interested in

□

74

1 filling that vacancy. What the Executive Board talked  
2 and decided to do because we didn't have a nominating  
3 committee either, which is something that we need to  
4 appoint and get a nominating committee before our next  
5 meeting. We decided to go ahead and throw that out for

6 people to put their names in for that position. We did  
7 have four people that showed interest for that  
8 position. And I believe Adam set their bios out, that  
9 are over there on the table. That is another thing that  
10 is on the table. So if you don't have them with you  
11 maybe raise your hand and we can get you a copy of that  
12 also.

13           what we decided to do is take these names-- I  
14 would like the four people who did submit their names  
15 and their bio to give us a two or three minute  
16 introduction to themselves so that we will know their  
17 face and know who they really are. And I am going to  
18 give them that opportunity. And then we would like to  
19 pass out a paper ballot. And we are going to let all  
20 the voting members vote for one person that he would  
21 like to fill this vacancy on the Executive Board. And  
22 we have a very responsible Counting Board that is going

□

75

1 to handle those ballots for us. Did everyone get a copy  
2 of the bios?

3           MR. CAMPBELL: Can I say something?

4           MS. NIGHSWONGER: Yes, Bill, you can say  
5 anything that you want.

6           MR. CAMPBELL: The bylaws do provide a method  
7 by which a method is filled. And that is the Executive  
8 Board Interim appointment. But we, as an Executive

9 Board, have discussed this. We took the message and  
10 hold closely the message that we received when we were  
11 first appointed or elected as an Executive Board and  
12 that is we never want the full Board to feel that we  
13 are trying to usurp any authority. And although you  
14 have delegated it to us we decided the best practice  
15 although it was only a four or five month period was  
16 actually wait to hold the position vacant and have the  
17 full election take place today.

18           So the by laws do have a provision that it  
19 didn't have to have sufficient information to allow us  
20 to set up that election today. We have a Nominating  
21 Committee and deadlines to next February. So I hope you  
22 understand how we got here and how we tried to limit

□

76

1 the selection process without limiting the selection  
2 process and that the Bylaws Committee will know that  
3 one of their first tasks is to try to work out how this  
4 interim election will be can be made.

5           MS. NIGH SWONGER: Secretary Markowitz?

6           MS. MARKOWITZ: I am sorry for not thinking  
7 about this morning at our Executive Board meeting  
8 preparing for this today. But under Roberts Rules in  
9 order to have a paper ballot for elections we need to  
10 have a vote to do so. So I will actually so move.

11 MS. NIGHSWONGER: It is in the regular bylaws  
12 already.

13 MS. MARKOWITZ; Oh, good so it's in the  
14 regular bylaw. But thank you. Anyone else on our board  
15 want to make any comments about how we came to this  
16 process?

17 Okay. If not I'd like to introduce the four  
18 people. And if you would just step to the microphone.  
19 First I am going to call Carol Johnson who is the  
20 Deputy City Clerk from Manchester, New Hampshire.  
21 Anything you want to say, you can tell us about  
22 yourself.

□

77

1 MS. JOHNSON: Good afternoon, my name is  
2 Carol Johnson. I am from Manchester, New Hampshire and  
3 I am the local election official. I have been in this  
4 municipal business for 29 years, hopefully I don't look  
5 it. So I have been around for a while. I am a certified  
6 municipal clerk. I have been involved in the City  
7 Clerk's Office since 1988. It was not my first  
8 introduction to elections but that is where I started  
9 helping run them for the city.

10 I guess somebody said to me very nicely in  
11 the hallway a little while ago that with every great  
12 act there are some unattended consequences which is why  
13 I responded to the email.

14           My bio is not contained in the book which is  
15 why I am mentioning that although I have been around  
16 for a couple of years. I am a certified municipal  
17 clerk. I have worked as the mediator, if you will, with  
18 the State and a lot of local election officials in the  
19 process of delving out the processes that Howard has  
20 brought us.

21           And the reason for responding to all of that  
22 was I think local election officials are the ones that

□

78

1 frequently advise State because we are in the nitty  
2 gritty and we are in with the details of it. And we  
3 frequently work with other municipal and local election  
4 officials and help get through the process in a  
5 positive manner which is not always easy talk but  
6 usually we can get there.

7           The Standards Board is very much that. It is  
8 in an advisory capacity but the devil is in the detail.  
9 And I think this is the Board that needs to focus on  
10 those details for the EAC. So with that I will part  
11 company because we have a lot on our agenda today.  
12 Thank you.

13           MS. NIGHSWONGER: Thank you, Carol. Okay,  
14 Sandi Wasolowski. I hope I said that correctly Sandi is  
15 the Franklin City Clerk. She is from Franklin,

16 Wisconsin.

17 MS. WASOLOWSKI: Thank you. I am Sandi

18 Wasolowski. You pronounced it pretty close.

19 I am the Director of Clerk Services, City  
20 Clerk for the city of Franklin, Wisconsin. As a local  
21 election official I represent 1850  
22 local election officials in the state of Wisconsin. I

□

79

1 have been involved in the administration of election  
2 since 1976. So for some 30 years that has been my  
3 desire my strong field.

4 I have been on the Standards Board since its  
5 inception. I briefly was the State of Wisconsin  
6 elections director and HAVA coordinator. I was-- I  
7 returned to the city of Franklin after a few months of  
8 doing that for the state. The weather in Washington has  
9 taken my throat and voice.

10 You can see on the bio that I have been  
11 involved with the state of Wisconsin HAVA State Plan  
12 Committee. I was a former member of the SVRS, the State  
13 Regulation Administration Steering Committee. I was-- I  
14 am still on the Standards Board for the state of  
15 Wisconsin. I am a member of the International Institute  
16 of Municipal Clerks. I am also a member of the  
17 Wisconsin Municipal Clerks Association. I am the past  
18 president of the Metro Milwaukee Municipal Clerks

19 Association.

20 I would be honored to fill the unexpired term  
21 of Mike. And I will be brief and that is it.

22 MS. NIGH SWONGER: Thank you. You all have

□

80

1 weird names, Ed Szczesniak, they are worse than my  
2 name Ed is from New York. He is Onondaga County  
3 Commissioner of Elections for Syracuse.

4 MR. SZCZESNIAK: Thank you. Good afternoon.

5 The reason I responded positively I was  
6 selected and I was honored by back in 2003, January, to  
7 be selected to be as a local official on this Standards  
8 Board.

9 what I have attempted to do over the years is  
10 attend every meeting and be as active as I can in this  
11 particular group. I think it is a meaningful role for a  
12 very meaningful organization, the Election Assistance  
13 Commission in terms of the revolutionary impact it is  
14 having on elections administrations across this  
15 country.

16 Being from New York as you see I feel a  
17 little overwhelmed by three women and myself on this  
18 floor of candidates here. But what I want to say  
19 is rather than read through all my notes I have been  
20 involved in all levels from the local town level as a

21 candidate, as a party official right through county  
22 level, state level and national level in terms of

81

1 involvement in the party as well with elections.

2 I think I have a fair understanding what it  
3 looks like at the County level. And I happen to be from  
4 New York State. But we have had the distinction of  
5 being the only state that has had DOG lawsuit against  
6 it to enforce HAVA. And I won't take responsibility for  
7 the lawsuit. But I know the difficulty that you all  
8 are going through in terms of trying to make this work.  
9 And the time lines that Congress has set for us to try  
10 to make this work.

11 I think that participating in things like the  
12 Standards Board goes a long way toward making sure  
13 everyone understands how things are happening at the  
14 local level to make this thing happen. I think our  
15 mission, if there is one, is to have a can do attitude  
16 to make this system work whether it is through Best  
17 Practices or whatever. We can share that knowledge and  
18 do it right at the county level as well as the State  
19 level and of course it all becomes the Federal level.

20 So with that I would honored if you would  
21 consider me to be the replacement for the unexpired  
22 term. Thank you very much.

□

82

1 MS. NIGH SWONGER: There are other people  
2 trying to get rid of met to.

3 Last but not least Tonni Bartholomew, is the  
4 City Clerk of Troy, Michigan.

5 MS. BARTHOLOMEW: Thank you very much for  
6 letting me have this opportunity to speak to you. I too  
7 am very interested in this Directors position on the  
8 Executive Board. I am a local clerk for a Municipality  
9 of about 90,000 people. I do everything from recruit  
10 people to code the devices. I have been involved at  
11 various levels in the State. I do instructions for the  
12 MNL as well as the Michigan Tactical Association and I  
13 have been involved on various advisory boards for the  
14 state of Michigan. I am currently Voter File Advisory  
15 Board. I was on the JEC for the State Devices for the  
16 State of Michigan.

17 If you talk to people from Michigan they will  
18 say I am a very detailed person. I am all about all  
19 about code standards and laws and if it says do it they  
20 we do it. I think I can lend that kind of expertise  
21 from my experience which I am much older than I look, I  
22 have been involved with elections since 1986,'87. And

1 I would really like the opportunity to serve you and  
2 serve the people of the United States.

3 MS. NIGHSWONGER: Thank you, Tonni. How many  
4 of us can say we are older than we look?

5 okay. If there is no objections we will  
6 proceed with the lucky new candidate to join us on this  
7 Executive Board. Oh yes, did we get the ballots past  
8 out? would you pass the ballots out please and while  
9 you are doing that I want to remind you to vote for  
10 one, please do not over vote or under vote, vote for  
11 one. And if you can you can fold your ballot in half  
12 once. I am going to have Sarah and John collect the  
13 ballots. Sarah I am going to ask you to take this side  
14 of the room, on my right. John if you will collect the  
15 ballots on the left side of the room please. Todd would  
16 you like to get the map? So if you will mark your  
17 ballot and fold it in half they will pick up your  
18 ballot. And then we will have a group of people who  
19 will be counting the votes and we will announce to you  
20 on one of our breaks who the lucky person is.

21 Oh, yes, is there anyone in the room that did  
22 not respond to the first roll call? That is one thing I

1 want to ask you. Julie as been running around trying to  
2 track down her luggage. That is always a hard thing.

3 Sara John and Todd are going to be picking up  
4 the ballots and I would like to remind you that voting  
5 members only will be marking the ballots. Polls are  
6 officially closed.

7 Again I would like to remind you before we  
8 close this session of our meeting I would just like to  
9 remind you if you are interested in serving on a  
10 nominating committee before the next meeting we will  
11 have to utilize a nominating committee in order to  
12 get-- Phil I believe there are two more positions on  
13 our Board that will be vacant by people-- Oh, three?  
14 One State and two local. If you're interested in  
15 serving on a nominating committee I would appreciate  
16 getting information about that so we can do this  
17 process appropriately at our next meeting.

18 Thank you so much. And we will move on into  
19 the next portion of our meetings. If I can get  
20 Commissioner Martinez' attention. He is in the hallway  
21 there. We will move on to our next report on Getting a  
22 report on Provisional Voting. So will the panel who

□

1 going to be talking on Provisional Voting if you can

052306

2 come on up here we will give you our seats.

3 MR. MARTINEZ: We will move into our next  
4 presentation. We are, by my watch, about 11 minutes  
5 off schedule right now. So we will make up the time  
6 during break, or at some point we will figure out how  
7 to do that. I know some of you had plans after the  
8 meeting is over to get out of the hotel and so forth.  
9 So we will try to honor our agenda as closely as  
10 possible.

11 Out next pane will give us an important  
12 presentation on Provisional Voting. The Help America  
13 Vote Act requires as all of you know that the EAC at a  
14 minimum consider the development of voluntary guidance  
15 on any of the Title 3 requirements the Title 3  
16 requirements of course for those of us with voting  
17 systems that require section 301, State wide  
18 voter Registration Voter Data Basis and Voter ID for  
19 certain voters that are in Section 303 and Section 302  
20 which is Provisional Voting and Poling Place Signage.  
21 So in looking at that mandate that the EAC developed  
22 Voluntary Guidance on Provisional Voting, we felt we

□

86

1 needed to commission some sound research and analysis  
2 on the issue of provisional voting.

3 we turned for that task to the Eagleton--  
4 Tom, forgive me is it Eagleton Institute, yes, I almost

Page 78

029290

5 lost it there, at Rutgers University. And in turn  
6 Eagleton Institute also brought in Moritz School of Law  
7 at the Ohio State University and thus we have Professor  
8 Edward Foley.

9 Tom O'Neil is the Project Manager, the lead  
10 consultant, if you will, to the EAC for the study that  
11 has been conducted on provisional voting. They will  
12 give you the details. We have been working with Tom now  
13 for perhaps the last eight or ten months perhaps longer  
14 than that. Lots of discussions about the issue. Tom  
15 will present, as well as professor Ed Foley who is the  
16 director of Election Law at Moritz program, an expert,  
17 well known national expert on election law issues  
18 covering the whole gamut of election law from  
19 redistricting to election administration.

20 We are very pleased to have their  
21 participation in this project. And particularly please  
22 to have them here today to present the draft product of

□

87

1 what they have been working on and to answer your  
2 questions. What we have asked our presenters to do is  
3 give you an audio visual presentation that will be  
4 short and to the point we hope. After which our counsel  
5 Julie Thompson-Hodgkins is here. She is listed as the  
6 resource person and she will lead the discussion upon

7 the end of the presentation. And we hope that you will  
8 be-- that you will not be shy in asking questions and  
9 give us your opinions and advice on the work product  
10 you are about to hear about.

11 With that, Tom, I will give you the podium  
12

13 DISCUSSION: DRAFT REPORT ON PROVISIONAL VOTING  
14 Presenters: Thomas O'Neill, Provisional Voting/ Voter  
15 Identification  
16 Tim Vercellotti, Eagleton Institute.  
17 Edward Foley, Election Law @ Moritz School  
18 of Law .

19 MR. O'NEIL: Thank you Commissioner Martinez,  
20 I am happy to be here. We regard the presentation we  
21 are making at this meeting as phase of our research. We  
22 are going to be presenting our final draft, report and

□

88

1 recommendations. And we hope that it will elicit from  
2 you comments and questions that will become part and  
3 parcel of our research efforts to understand the  
4 dynamics of provisional voting in 2004 and going  
5 forward. And we hope that the states have much to learn  
6 from one another in the provisional voting process and  
7 that we can do something to act as a catalyst in that  
8 mutual learning exercise that all of you are engaged in  
9 here as members of this Board.

10           As as Commissioner Martinez said we are  
11 looking at provisional voting. We have been working on  
12 this project just shy of a year. And today you're to  
13 going to the see sum of what we have concluded and our  
14 recommendations to the EAC. In term what we are  
15 recommending to the EAC is that they make  
16 recommendations for Best Practices to States and  
17 localities to improve the functioning of the  
18 provisional voting system.

19           Commissioner Martinez described the parties  
20 that are doing this, the Eagleton Institute of Politics  
21 at Rutgers State University in New Jersey, the Moritz  
22 College of Law at the Ohio State University which is

D

89

1 well known for the website it maintains on election law  
2 all around the county.

3           Ed Foley and I are happy to be up here on the  
4 podium but we represent a larger group. This is the  
5 project management team. The principal investigators  
6 Dr. Ruth Mandel, the Director of the Eagleton Institute  
7 of Politics. With us here today, from the Project  
8 Management Team, are Ingrid Reed, Ansa Cadgie from the  
9 Moritz College of Law and one of our lead researchers  
10 Tim Bersolli, Assistant Director from the Center of  
11 Public Interest Polling that undertook the survey of

12 local election officials on which some of our findings  
13 are based.

14 We proceeded by looking at six questions that  
15 the EAC raised with us. And those questions are  
16 displayed on this slide they are basic, they are  
17 important and some of them I have to tell you are very  
18 hard indeed to answer.

19 How do states prepare for HAVA's  
20 Provisional Voting Requirements?. How did preparation  
21 and performance vary between states that previously had  
22 some form of provisional ballot and those that did not?

□

90

1 We will be coming back to that issue several times via  
2 this report. And so we have developed a short hand for  
3 it. We call them Old states and New States. And I hope  
4 you will bear with me. If you come from one of those  
5 Old States we don't mean it personally.

6 How did litigation effect the implementation  
7 of provisional voting? How effective was provisional  
8 voting in enfranchising qualified ? Did state and  
9 local processes provide for consistent counting of  
10 provisional ballots? Did local election officials have  
11 a clear understanding on how to implement provisional  
12 voting?

13 To answer those questions we undertook  
14 several steps. Our aim being throughout this to provide

15 the EAC with a strategy to engage the states in a  
16 continuing effort to strengthen the provisional voting  
17 process and increase the consistency, this is  
18 important, increase the consistency by which  
19 provisional voting was administered. Particularly  
20 consistency within the State as opposed to consistency  
21 on the States.

22 we surveyed 400 local election officials. we

□

91

1 reviewed the EAC election day survey. We analyzed the  
2 states experience with provisional voting mostly on a  
3 statistical basis. we collected the provisional voting  
4 statutes and regulations for each State in the country.  
5 And in fact part of our deliverables to the EAC was a  
6 continuum of those statutes and regulations. And they  
7 will all be on one CD rom for easy access. And we  
8 analyzed the litigation that took place concerning  
9 provisional voting issues in 2004.

10 summary of findings, again looking at this  
11 consistency issue which is so important. There was  
12 considerable variation among the States. HAVA allows  
13 the States considerable latitude in how to implement  
14 provisional voting including deciding who beyond the  
15 required categories of voters should receive  
16 provisional ballots. And how to determine which

17 provisional ballots should be counted. We had just shy  
18 of two million ballots cast in 2004 and 63 percent of  
19 them were counted.

20           Now the variation of among the States is  
21 enormous. The percentage of provisional ballot in the  
22 total vote varied by a factor of a thousand. From as

□

92

1 high as seven percent in Alaska to Vermont's six one  
2 thousands of one percent. Now that's like the lobster  
3 production between Maine and Utah. You don't find that  
4 large a difference among States on measures like this.  
5 So there is an enormous variation.

6           And the portion of the provisional ballots  
7 counted varied significantly from 96 percent in Alaska  
8 to 6 percent in Delaware. We don't need to tell you is  
9 that the percentage of total votes cast rises in terms  
10 of provisional votes being a greater that becomes more  
11 and more significant in closer elections. If the  
12 election margin of victory is two percent but seven  
13 percent in provisional ballots that is a very  
14 different scenario than if one percent was of ballots  
15 are provisional but the victory was ten percent.

16           There are some sources of the variation among  
17 the States. Number one that jumped out at us was  
18 experience. The share of provisional ballots in the  
19 total vote was six times greater in States that had

20 used provisional ballots before than in States where  
21 the provisional ballot was new before.

22 MR. VERCELLOTTI: It is good to be an old

93

1 State.

2 MR. O'NEILL: In the 25 states, 25 States  
3 that had experience with provisional balloting 18 were  
4 new.

5 Administrative arrangements. Simple  
6 administrative differences also I think go a long way  
7 in explaining the variation in the use of provisional  
8 ballots.

9 The time to evaluate ballots. How much time  
10 after the election do you give officials to determine  
11 whether a provisional ballot should be counted? States  
12 that provided less than a week, counted a little bit  
13 more of a third of the provisional ballots counted.  
14 States that permitted more than two weeks counted 61  
15 percent. That time factor is important.

16 And voter registration data basis. States  
17 with voter registration data basis, and there were only  
18 a few of them in 2004, counted an average of only 20  
19 percent of the provisional ballots cast. States without  
20 those data basis counted twice that number.

21 MR. FOLEY: If I can just underscore these two

22 points that you're going to hear throughout this

□

94

1 presentation the importance of both of them. In other  
2 words the time to evaluate the ballots increasing the  
3 the accuracy is a very important finding. And it leads  
4 to an issue on how to trade off the value of accuracy  
5 verses speed or completeness of finality of the  
6 election. And we will be talking ore about that.

7           Likewise another theme that will run  
8 throughout this presentation is the important  
9 relationship between the provisional voting system as  
10 one component of an overall election system with the  
11 registration data basis. Those two subsystems if you  
12 will are very much integrated as you know.

13           And they will be increasingly integrated  
14 under HAVA and under centralized voter data basis.

15           MR. O' NEILL: Now turning from looking at  
16 variation across States to variation within States.

17           we gathered county election-- provisional  
18 ballot data for 20 States. Had we been able to get data  
19 from all of the States at a county level the ranges and  
20 variation I am reporting to you might be wider than  
21 what we found. So bear that in mind. The rate of  
22 counting provisional ballots within the same State

0

95

1 varied by as much as 90 to 100 percent among counties  
2 in the State. The resources available to administer  
3 provisional voting varied significantly within the same  
4 State.

5           The election day study found that staffing  
6 problems appeared to be particularly acute in  
7 jurisdictions in the lower income and education  
8 category. Small rural jurisdictions, large poor urban  
9 jurisdictions have higher rates of inadequate training  
10 for poll workers. The jurisdictions in poorer areas  
11 reported more inactive voter registrations and more  
12 provisional ballots cast. Richer areas had more poll  
13 workers per polling place and reported lower rates of  
14 staffing problems per precinct.

15           There are other effects that go beyond what  
16 is going on at the State other than socio-economic. Some  
17 reports from the States suggest possible sources of  
18 lack of consistency. You know Iowa cast some  
19 provisional not signed in the assigned precincts. Even  
20 thought the States policy was to count only those  
21 ballots cast in the correct precinct. So you could see  
22 how that would enlarge the variation among counties in

□

96

1 the percentage of provisional votes that were cast.  
2 similar kinds of free lancing were going on in  
3 Washington state.

4 MR. FOLEY:: Another theme that we found.  
5 There is a difference between the rules on the books  
6 and the rules as they were enforced in practice. And  
7 that obviously is of concern potentially in respect to  
8 litigation when we get to that point.

9 MR. O'NEILL: Turning to from this sort of  
10 summary in terms of what the variation was all about to  
11 some of the details of the answers we developed in each  
12 of the questions that were put to us by the EAC.

13 First how did States prepare for the  
14 provisional voting requirement? Most election  
15 officials we talked to in our survey received  
16 provisional voting instructions from State government.  
17 But the type and amount of that instructions varied  
18 very widely across the States. Almost all of them  
19 provided training or written instruction to precinct  
20 public poll workers. Only in about one in ten made  
21 available to poll workers the voter registration data  
22 base. Equally rare was training or written procedures

□

1 for poll workers to understand how provisional ballots  
2 would be evaluated.

3           Second question, how did preparation and  
4 performance vary between States, the old States and the  
5 new States? The local election officials in the old  
6 States felt more confident about exercising their  
7 responsibilities for provisional voting. As we earlier  
8 18 States were new to provisional voting, 25 others had  
9 experience.

10           The New State officials I thought they did  
11 not receive enough information more frequently and felt  
12 and felt more funding was necessary to educate voters  
13 about, their rights to cast a provisional ballot.  
14 Ballot .

15           Local Officials in the old states counted  
16 more ballots, were better prepared to direct voters to  
17 their correct precincts with maps and other types of  
18 information. And regarded provisional voting as easy to  
19 implement.

20           Officials from new states were more likely to  
21 believe that voters needed more information where to  
22 vote and to feel that provisional voting created

□

1 unnecessary problems. There was much less if a response  
2 than from officials in the old states.

3 MR. FOLEY: One could abstract from that  
4 provisional voting is a dynamic process. It is not  
5 static, it's not that HAVA created provisional voting  
6 and now we have it and we are done. There is a learning  
7 curve here. It is not an all or nothing situation.  
8 There are shades of gray involved. Sometimes it is sold  
9 as a safety mechanism, or fail safe. But the ability  
10 for it to perform as a fail safe is dependant on  
11 various factors. It's not automatic.

12 MR. O'NEILL: Question three: How did  
13 litigation effect the implementation of provisional  
14 voting?

15 Litigation before the election clarified  
16 voters rights. To sue in federal Court to remedy  
17 violations of HAVA; to receive provisional ballots even  
18 though they wouldn't be counted; have the voters be  
19 directed to the right precinct. And most of the  
20 litigations occurred to late to influence how states  
21 implemented provisional voting in the year 2004. Even  
22 with that finding I think it is a fair assessment to

1 say that pre election litigation was more successful in  
2 changing the dynamic of at least the rules. And to  
3 clarify what the rules were going into election day.  
4 And therefore could be perceived as having some utility  
5 in the process. Post election litigation only invited

6 more complexity, more problems, more uncertainty and  
 7 usually unsuccessful from the litigants perspective and  
 8 obviously for complicated from the administrative  
 9 perspective as well.

10           How effective was provisional voting in  
 11 enfranchising qualified voters?

12           And I suggested at the outset some of these  
 13 questions were very hard to answer. And this was among  
 14 the hardest. To know the answer to how effective was  
 15 provisional voting in providing that fail safe that Ed  
 16 just mentioned and you show up and your not on the  
 17 registration rolls how effective is getting that  
 18 provisional to you? Ideally to know that we have to  
 19 know the decisions that were made in 200,000 precincts  
 20 around the country. And we would have to know the  
 21 criteria that the evaluators of provisional ballot used  
 22 when the process came to them to decide which ones

100

1 counted and which ones didn't. And there is a  
 2 considerable element of individual eccentricity in  
 3 making these decisions. It is hard to predict and  
 4 therefore we had to look for a more abstract way to  
 5 have some kind of number to attach effectiveness. If  
 6 that batter hits the ball one third of the time as it  
 7 comes across the plate it is .333. So we are aiming for

8 something not quite as precise as Ted Williams 405 but  
9 something that would at least put us in the order of  
10 magnitude.

11           we know that 1.2 million voters, or about  
12 one percent of the turnout, got to vote by provisional  
13 ballot who otherwise would have been turned away. But  
14 what is the denominator of that? what do you divide  
15 into? well in 2000 the CalTech MIT voting technology  
16 estimated that two and a half million to four million  
17 votes were lost in the 2000 Presidential election  
18 because of registration mix ups or confusion at the  
19 polling place.

20           Now registration mix up and confusion at the  
21 polling place are pretty good description of what is  
22 going to put someone in the line for provisional ballot

□

101

1 instead of to get on the regular machine. So 1.2  
2 million voters casting a provisional ballot and maybe  
3 two and a half to three million figure in the number of  
4 them who were there but didn't get one, we figure that  
5 provisional balloting might just have been 50 percent  
6 effective in 2004. It's an approximation but it  
7 indicates something I think we all will agree about  
8 which is there is room for improvement.

9           Indeed legislative activity in the states  
10 following the 2004 election leads us to believe that

11 the states themselves recognized that they were not  
12 satisfied with the effectiveness of their provisional  
13 voting systems and made efforts to improve that through  
14 legislation.

15           Question five: Did state and local processes  
16 provide for consistent counting of provisional  
17 ballots?

18           Again this is a topic of considerable  
19 interest. As we have already talked about there was  
20 little consistency among states and within states. That  
21 the use of provisional ballots was not distributed  
22 evenly across the country. In fact six states accounted

□

102

1 for two thirds of all the provisional ballots cast. The  
2 share of provisional ballots in the total vote was six  
3 times greater in experiences states than in new states.  
4 The more rigorous the state's voter ID requirements the  
5 smaller percentage of provisional ballots that were  
6 counted. And new states with registration data bases  
7 counted 20 percent of the ballots past. Those without  
8 data bases counted more than double that rate, 44  
9 percent.

10           MR. FOLEY: And I can add to that. The most  
11 common reason why a provisional ballot was not counted  
12 in most states it was reported that the provisional

13 voter was not a registered voter. That was the reason  
14 given. What is poorly understood unfortunately at this  
15 point is what underlies the reason why that voter was  
16 not registered according to the system, yet that voter  
17 attested that to believing he or she was registered by  
18 HAVA. And what our research has shown, as Tom just  
19 suggested, is that there is a considerable variation  
20 both among states and within states as the method for  
21 checking whether or not the provisional voter is  
22 registered.

□

1           The methods and the processes that the system  
2 uses to try to verify whether this ballot should count  
3 varied considerably. And there is very little rule  
4 guidance as to what that methodology should be.

5           So an important part of our presentation  
6 today is the need to better understand that and to  
7 develop more guidelines. The theme here is there is  
8 just a lot of difference just about the mechanics on  
9 how to go about determining whether this voter is even  
10 an eligible.

11           MR. O'NEILL: Continuing on with the  
12 consistency question.

13           States that allowed out of precinct ballots  
14 counted 65 percent of the provisional ballots cast.  
15 States that recognized only ballots cast in the proper

16 precinct counted 42 percent. In old states the  
17 difference was greater than that 52 percent were  
18 counted in states requiring new district ballots and 70  
19 percent were counted in those allowing other precinct  
20 ballots.

21           This aspect of the consistency issue takes us  
22 back to the time question. Fourteen states permitted

□

104

1 less than a week to evaluate provisional ballots, they  
2 counted 35 percent of the ballots. Fifteen states  
3 between one and two weeks, they counted 47 percent of  
4 the ballot. And 14 states that permitted more than two  
5 weeks they counted 61 percent of the ballots. Just the  
6 administrative handling of the ballots makes a  
7 difference in the performance of the state.

8           Conclusions with this? The states have  
9 latitude on how they meet under the HAVA requirements.  
10 A considerable degree of variation among the states are  
11 to be expected. And here is the interesting observation  
12 about that. If the variation among the states reflects  
13 differences in their political cultures it is likely to  
14 persist. If it reflects a learning curve for the new  
15 states figuring out how to do this provisional ballot  
16 thing then consistency among the states is likely to be  
17 achieved much more quickly than if some states have a

18 fundamental philosophic objection to the concept of the  
19 provisional ballot.

20           Questions six: Did local election officials  
21 have a clear understanding on how to implement  
22 provisional voting?

□

105

1           what we did was ask the local officials  
2 themselves to characterize understanding. From a sample  
3 of about 400 of them around the country eight out of  
4 ten reported receiving instructions from state  
5 government; four out of ten, only four out of ten I  
6 should say, felt poll workers needed more training to  
7 understand their responsibilities.

8           Moving back now from asking the local  
9 officials themselves for some kind of objective  
10 evaluation on how the process was managed. The lack of  
11 consistency among and within states indicates the  
12 differences in how our election officials understand  
13 their responsibilities and managed the 2004 election.

14           In thinking through this body of information  
15 we have to recognize the existence of inconsistency of  
16 understanding between the states and within the states.  
17 Particularly of concern are the inconsistencies within  
18 a state. And that we need to forge away to approach  
19 this as a learning experience, a way to understand and  
20 explain the rules by which each state governs

21 provisional voting .

22                   And we will phrase this as a set of

□

106

1 questions. Does the provisional ballot system  
2 distribute, collect, record and tally provisional  
3 ballots with sufficient accuracy as to be seen as  
4 procedurally legitimate by both supporters and  
5 opponents of the winning candidate. That is the acid  
6 test here.

7                   Second: Does the provisional balloting  
8 system place administrative demands on local  
9 jurisdictions that are realistically related to the  
10 staff and other resources available to fulfill those  
11 demand?

12                   Third: Is the variation within state great  
13 enough to cause concern that the system might not be  
14 administered uniformly from county to county.

15                   MR. FOLEY: I just want to act on Tom's point  
16 about the acid test of legitimacy. The reason why  
17 clarity is so important to that is again because the  
18 provisional votes matter as you know when there is a  
19 close race and when there is a dispute about what to do  
20 with these ballots. Should they be verified or not?  
21 And if the rules for that process are unclear and  
22 disputable that casts everything in doubt. It casts the

□

107

1 process in doubt; it casts the results of the election  
2 in doubt. So clarity is the first and most important  
3 value for bringing legitimacy to the process. Because  
4 it will be a process that unfolds after election day in  
5 the heat of the moment. And to avoid litigation, and  
6 particularly destabilizing litigation, clarity has to be  
7 the first priority.

8 MR. O'NEILL: In looking for clarity a place  
9 the states often turn to is the history of litigation.  
10 Litigation coming out of the 2004 election clarified  
11 the right of voters to receive provisional ballots even  
12 though the election officials were certain they would  
13 not be counted. And lawsuits prompted election  
14 officials to take better care in instructing precinct  
15 officials on how to notify voters about the needs and  
16 go to the correct precinct in order to cast a countable  
17 ballot. Those are the issues of clarity like we have  
18 just been discussing.

19 We recommending to the EAC that it recommend  
20 as Best Practices to states the promulgation of clear  
21 standards for evaluating provisions ballots. And  
22 provide training for the officials who will apply those

0

108

1 ballots. we believe they should provide materials to  
2 local jurisdictions. To train polling workers on such  
3 procedures as how to locate polling places for  
4 potential voters who show up at the wrong place. And  
5 to think that the only permissible requirement to  
6 obtain a provisional ballot is an affirmation by that  
7 voter standing in front of a local election official  
8 that that voter is registered in the jurisdiction and  
9 eligible to vote in an election for federal office. And  
10 poll workers need the training to understand their duty  
11 to give those voters a provisional ballot.

12 MR. FOLEY: And on that point, on the voters  
13 affirmation, it's their sincere belief that they think  
14 that they are registered. The polling place is not the  
15 time or place to verify eligibility in determining  
16 whether the voter is correct or not.

17 And in that sense as a working rule, as a  
18 practical matter given long lines in a high turn out  
19 election, you know if a voter asks for provisional  
20 ballot they really ought to get one. Then you can  
21 figure out what to do with it later the one question  
22 that can be asked is: Do you really think you are

□

109

1 registered? If they think they are registered they  
2 should get that provisional ballot. It should not be a  
3 complicated process to administer provisional voting at  
4 the precinct.

5           There maybe complexities that are unavoidable  
6 after election day. And again it might be best to  
7 minimize those complexities as we get into. But it is  
8 very, very important to stream line the process at the  
9 polling place itself. And so it should be virtually  
10 automatic that if a voter says: I think I am entitled  
11 to vote; that they get the provisional ballot.

12           MR. O'NEILL: We believe the general way the  
13 states can most effectively pursue improvements in the  
14 provisional voting process is to take a quality  
15 improvement approach.

16           Defining quality begins in asking how well  
17 the system works now. But figuring it out to how open  
18 it is to error, recognition and correction. And by  
19 asking how well our provisional voting process is  
20 connected to the other parts of the machine that they  
21 need to be well characterized to the registration and  
22 voter identification names. So to do all that requires

□

110

1 a systematic quality improvement program that starts by  
Page 100

029312

2 collecting data that is not now generally available.

3           The data collected should insure a list of  
4 the specific reasons why provisional ballots were not  
5 counted; measures of variance among jurisdictions,  
6 counties or even precincts; a hard look at the time  
7 actually required to evaluate the ballots by  
8 jurisdiction and then comparing that to what the  
9 statute or regulation allows in that state. If it is  
10 simply unrealistic what kind of changes are needed? And  
11 an accurate and timely report on provisional votes cast  
12 and counted by jurisdiction down to the precinct level  
13 so you can spot anomalies and take a look at where more  
14 poll worker training may necessary to get them up to  
15 the standard you would like the entire state operate  
16 at.

17           MR. FOLEY: Just to give an example of this.  
18 Most of you know about Washington State's experience  
19 with its gubernatorial election in 2004. That  
20 illustrated several things about this process. One of  
21 which was this issue is the provisional voter  
22 registered? And in some localities the answer came

0

111

1 back yes, and this was not true by the way of only  
2 Washington State, this occurred in other states in  
3 lower profile races. So the answer comes down back "no,

4 we have looked at our data base, our files and we don't  
5 have this voter as a registered voter." Then the  
6 question arises well they are not in the system but did  
7 you go back to the original voter registration card and  
8 see for whatever reason that card for a new registrant  
9 was not entered in the system in the run up to this  
10 particular election? Sure enough it turned out there  
11 were a substantial number of voters in Washington  
12 state, and elsewhere, that had submitted timely  
13 registration forms; that had submitted timely  
14 registration forms; had submitted procedurally proper  
15 registration forms and they should have been in the  
16 system but were not through no fault of their own.

17 That's the very thing that a provisional  
18 voting fail safe is supposed to protect against. But it  
19 couldn't protect against it if the only checking  
20 mechanism is to go back to the data base as opposed to  
21 going back to the original voter registration card. The  
22 reason why the poll book, the precinct official has,

□

112

1 didn't the registered voter is because they weren't in  
2 the system to begin with. So there was a match between  
3 what the poll book said and what the system said but  
4 the misstep was getting that card entered in the system  
5 in the first place given the high volume of new  
6 registrations filed at the deadline.

7           The courts ordered those forms to be entered  
8 into the system and ordered those provisional ballots  
9 to count several weeks after the election had already  
10 be certified.

11           So here is an example of where the  
12 methodology used and the process used determined what  
13 does it mean to be a registered voter really matters  
14 which is why there has to specific standards on that.

15           And that gets into the finality point, or the  
16 timing point that we have already talked about. If it  
17 takes, five, six, eight weeks to add those hundreds of  
18 voters to the certified total you run up against  
19 serious deadlines. You have past certification  
20 deadlines. In some cases you have past inauguration  
21 deadline. You have past the Federal so called safe  
22 harbor deadline for Presidential races.

□

113

1           So there was an ability to increase accuracy  
2 that had outcome determinative effects in terms of who  
3 was the winner of the governor's race in Washington.  
4 That final certification occurred two days before New  
5 Year's Eve. So again accuracy verses timing is a these  
6 that needs to be evaluated as you specify what are best  
7 practices for implementing the evaluation process.

8           MR. O'NEILL: The heart of this quality

9 approach for improving the provisional voting process  
10 is to access each stage of the provisional voting  
11 process. Before the election the better the voters  
12 understand their rights and obligations the easier the  
13 system will be to manage and the more legitimate the  
14 appearance of the process.

15           At the polling place? Avoiding error at the  
16 polling place will allow more voters to cast a regular  
17 ballot and all others who requested cast a provisional  
18 ballot. In the evaluation process the clarity of the  
19 criteria for evaluating voter eligibility is critical  
20 to a sound process for deciding which of the cast  
21 provisional ballots should be counted.

22           And post election we believe the best practice

0

114

1 is for states to consider how to complete, as Ed was  
2 just saying, all the steps in the evaluation of  
3 ballots and challenges to that determinations within  
4 the five weeks available in Presidential elections it  
5 is important to provide timely information to voters  
6 about the disposition of their provisional ballot. For  
7 instance having cast a provisional ballot this time are  
8 they now registered for future elections. They should  
9 know that. If not what do they need to do to be  
10 covered?

11           As I said at the opening we look at this  
Page 104

029316

12 briefing as an opportunity to continue our research by  
13 hearing from you. The detailed examination of each  
14 stage in the provisional voting process we hope can lay  
15 the foundation that each state needs to improve its  
16 system.

17           Efforts to improve provisional voting may be  
18 most effective as a part of a broader effort to  
19 strengthen voting systems. Collecting and analyzing  
20 data about those systems will enable states to  
21 identify which aspects of the registration and  
22 electoral process are most important into the

□

115

1 provisions voting process. Responsible officials  
2 can then look to their registration system, their  
3 identification requirements, poll worker training, as  
4 ways to reduce the need for voters to cast their ballot  
5 provisionally and evaluate them consistently. Thank you  
6 and we are looking forward to our discussion.

7           MR. FOLEY: Likewise. Thank you.

8           And just one more general remark to share  
9 with you before turning it over for questions and so  
10 forth. If 2004 was a learning experience in terms of  
11 the provisional voting process. And we saw stresses  
12 imposed on that system and we were asking could the  
13 provisional voting process handle the stresses of a

14 close election and the demands put on it. I think right  
15 now, two years later in 2006 we are in an interesting  
16 situation because there has been reaction to 2004, as  
17 Tomb said. There has been new legislation.

18           Some of that new legislation has alleviated  
19 some of the stresses that were imposed onto the  
20 provisional voting system, having increased its ability  
21 to be the fail safe that HAVA and Congress spoke of.

22           But some of the legislation and some of the

□

116

1 developments candidly put more stresses on the  
2 provisional voting system. It is possible that as we go  
3 forward in elections this Fall and in the future we  
4 will see higher rates of provisional ballots past, not  
5 lower rates more demands in terms of how to evaluate  
6 them. Some of this again is maybe good and important  
7 for understandable reasons, but as the data bases get  
8 rolled out and as there are complexities in terms of  
9 rolling out the data bases that may cause more  
10 questions to be asked about the eligibility of a  
11 registered voter. And that may cause that voter to cast  
12 a provisional ballot whereas in the past the question  
13 would not have been raised and would have cast a  
14 regular ballot.

15           Likewise in the states without the voter ID  
16 requirements those new requirements may raise questions

17 about eligibility causing more votes to be cast as  
18 provisional votes in stead of regular votes.

19           So that has created a rather interesting  
20 phenomenon and that HAVA said from a voting rights  
21 perspective, if you will, said we saw the situation in  
22 which a voter went to vote, turned up at the voting

□

117

1 place on election day believing that they were entitled  
2 and then finding that they were purged, sometimes  
3 erroneously purged, and they were turned away. So what  
4 provisional voting was designed to do is to make sure  
5 no one was ever turned away like that. They could at  
6 least cast a provisional ballot and then we could ask  
7 questions.

8           Some of the new legislation and some of the  
9 new demands being put on the system have instead of  
10 saying this is really for the voter. They are saying  
11 this a reason to check eligible voters and therefore  
12 instead of using a provisional ballot to give the voter  
13 an opportunity so that they are not cast away we are  
14 going to use this provisional ballot so that the voter  
15 doesn't case a regular ballot. we are going to put  
16 them in the question mark category rather than the yes  
17 category which is different than putting them in the  
18 question mark category rather than the no category. But

19 as that happens more questions marks get raised so  
20 more stress gets put on the system. Thank you.

21 MS. HODGKINS: Thank you Mr. O'Neill and  
22 Professor Foley. Members of the Standards Board we

118

1 have about 35 minutes until the end of this session  
2 for your discussion, comments. I know many of you have  
3 questions about perhaps the methodology, their  
4 conclusions maybe experiences you would like to share.  
5 I am going to be here to make sure this is an orderly  
6 process. And as you had in your previous session there  
7 are several hand held mics that are around the room.

8 If you will indicate to me that you're  
9 interested in making a statement will recognize you and  
10 then we bring a mic to you and let you speak. Please do  
11 remember to identify yourself before you start speaking  
12 Mr. Szczesniak?

13 MR. SZCZESNIAK: Yes. I guess through from  
14 the presentation I got the sense that many states as  
15 part of your survey have coworkers make the  
16 determination as to whether or not the provisional  
17 ballot was a good deal or not; is that correct, or was  
18 I misunderstanding something.

19 MR. O'NEILL: We did not mean to imply that.

20 MR. SZCZESNIAK: That's good because it  
21 didn't make any sense to me.

MR. FOLEY: It is after determination. And

□

1 sometimes it's two after the facts that the process  
2 gets wrapped up. Sometimes it is two weeks. So there is  
3 considerable variation on how long the boards take to  
4 process the provisionals.

5 MR. O'NEILL: Another comment is many people  
6 that do put that out are the old states. But it is  
7 truly a fail safe provision and we focus that in the  
8 training of the inspectors, poll workers so they  
9 understand that nobody leaves the polling place  
10 without having had the opportunity to vote either on  
11 the machine, by court order or by provisional ballot.

12 MR. SZCZESNIAK: But many people cast a  
13 ballot thinking they are registered voters and they  
14 aren't. There is a requirement that we do not put in  
15 our poll box any inactive voters whether active or not.  
16 Many people who show up at the right place but they  
17 just can't. We give them the affidavit and we check  
18 them out and give them a chance.

19 Some reason they are not counted is that  
20 people have moved within out jurisdiction. They are in  
21 the right church and the wrong pew. They are still  
22 eligible to vote but now with the new requirement and

□

120

1 because of federal lawsuits says right church wrong pew  
2 that's okay. But if they are in the wrong church they  
3 just can't be counted. So we tell them to go to the  
4 right polling place if they want to get counted.

5 MS. HODGKINS: Mr. Kennedy?

6 MR. KENNEDY: Kevin Kennedy from Wisconsin. I  
7 have a question about the methodology in the sense that  
8 you have 43 states that do not include the six states  
9 with election day registration?

10 MR. O'NEILL: That is correct, yes .

11 MS. HODGKINS: Yes, ma'am behind Al.

12 MS. ROUST: Sue Roust from South Dakota. On  
13 page eight of your handout at the top that says: "EAC  
14 should recommend to the states that they" and one of  
15 the bullet points is: " Make clear the only permissible  
16 requirement to obtain a provisional ballot is an  
17 affirmation that the voter is registered in the  
18 jurisdiction and eligible to vote in a federal  
19 election."

20 Are you saying that you feel that the EAC  
21 should recommend that on that question of do you have  
22 to be at the right precinct or you just have to be

□

121

1 eligible to be registered anywhere in the jurisdiction.  
2 Are you saying that the EAC should come down on the  
3 side that if you go to the wrong precinct that your  
4 registered somewhere in that jurisdiction that you  
5 should be allowed to vote or that your provisional  
6 ballot should count?

7 MR. FOLEY: Well first of all it is our  
8 understanding in examining the case law that has  
9 developed on this that HAVA itself does not require the  
10 states to adopt the so called wrong precinct you count  
11 the ballot rule.

12 So it couldn't be mandated as a matter of  
13 what HAVA requires. In terms of-- if EAC considers  
14 itself in a position to provide best practice type  
15 recommendations that aren't necessarily HAVA  
16 requirements then it could be considered whether or not  
17 as a policy matter is there something advisable. And  
18 actually in reference to the New York litigation it  
19 seemed that a middle step position is that if a state  
20 is going to allow for multiple precincts to exist  
21 within the same location and the voter shows up at the  
22 correct location but ends up in the wrong line at that

□

1 location could that be considered attributable to  
2 administrative error as opposed to voter error? That  
3 was the holding of the New York case.

4 So that the voter should get the benefit of  
5 the doubt if they go to the right place even if they  
6 ended up in the wrong line. And we thought as a policy  
7 matter that was appropriate to recommend as best  
8 practices. Beyond that probably it makes sense to say  
9 that as a matter of Federalism in federal law it's  
10 really up to the state whether to go beyond that.

11 MS. HODGKINS: Mr. Clark.

12 MR. CLARK: Bradley Clark from California.

13 I was just curious.

14 How you on methodology how you selected your  
15 400 jurisdictions to survey?

16 MR. O'NEILL: It was a stratified random  
17 sample we looked for size, a mix of size, a mix of  
18 urban and suburban and then selected randomly from  
19 within that. We have our poll director here if you  
20 would like more details.

21 MS. HODGKINS: Mr. Sholl.

22 MR. SHOLL: Howard Sholl from Delaware. I

□

1 have a few comments.

2 First of all in your analysis you seemed to  
Page 112

3 forget there are different types of provisional  
4 ballots. By that I mean in Delaware we had 300 and some  
5 odd provisional ballots that were cast between 400.000  
6 people and you were saying we were doing a very good  
7 job. Well, actually if you would count our fail safe if  
8 someone changes an address instead of sending them to a  
9 different a different polling or giving them a  
10 provisional ballot we made every effort to qualify them  
11 and let them vote normal. So instead of having 6  
12 percent rate that we counted you count the 6 or 7  
13 thousand change of addresses that we did at the polling  
14 place we ended up counting 95 percent of our so called  
15 provisional ballots.

16           So there is a difference of what a state  
17 calls a provisional ballot. You will find that it  
18 varies across the country and that could effect your  
19 analysis to some degree.

20           Second of all. You are very correct  
21 information needs to be distributed to the election  
22 officials and their friends. It also needs to go to the

0

124

1 media who consistently misrepresented what provisional  
2 voting was. The media in the Philadelphia market said  
3 you can vote anywhere you want to. Well that wrong in  
4 Pennsylvania, that was wrong in Delaware and I don't

5 know about New Jersey. But people picked up information  
6 from elsewhere in the country and misrepresented it to  
7 their populations. So the media needs a heck of a lot  
8 of education about what provisional voting is so they  
9 don't misrepresent it to the voter, because we can't  
10 counter what the media blitz misrepresents.

11 MR. FOLEY: Well that underscores what we  
12 were saying were A this is a dynamic evolving process  
13 and not static. We couldn't agree more with that point.  
14 Secondly we agreed very much as Tom said that there  
15 were challenges, methodological challenges in terms of  
16 finding the right data, evaluating the right data, and  
17 one theme in our recommendation, and you know-- besides  
18 we are a snapshot or synopsis of the larger report. But  
19 one theme is that a very helpful role that the EAC can  
20 play is that of data collection, data consistency in  
21 terms of terminology or data classification of data. So  
22 we hope that through this cycle of empirical studies is

□

125

1 just the first in a series of cycles of empirical  
2 studies that increase knowledge and increase  
3 understanding of the mechanics of the process.

4 MR. O'NEILL: Can I respond also.

5 MS. HODGKINS: Sure.

6 MR. O'NEILL: Mr. Shall you said that there  
7 are different kinds of provisional ballots in Delaware.

8 Is there more than one category of provisional ballot  
9 that you report? Or are there some sorts of things that  
10 provisional ballots aren't really provisional ballots  
11 as we have been referring to? When you talk about  
12 qualifying voters for instance to make sure that they  
13 can vote a regular ballot?

14 MR. SHOLL: Howard Sholl from Delaware.

15 No, we call a provisional ballot exactly  
16 what it is it is a provisional ballot. It's the last  
17 chance to vote. So that's what we report, we don't  
18 report fail safe, what we call fail safe voting call.  
19 We update your address at the polling place, we verify  
20 the registration and we let them vote it. That's not in  
21 our lingo a provisional ballot. But it is in the lingo  
22 of other states what a provisional ballot is.

□

126

1 So when you're looking at Delaware verses  
2 Ohio verses California you're looking at apples and  
3 oranges.

4 MR. O'NEILL: Thank you.

5 MR. HODGKINS: The lady in the back and then  
6 we will come over here for Mr. Lomax.

7 MS. ANDERSON: Sharon Anderson from Minnesota.

8 My question is about limiting the study to 43  
9 states that do not now have election day registration,

10 and I guess North Dakota doesn't have registration at.  
11 I am curious about studying those EDR states in the  
12 future. And the reason that I ask that is I have spent  
13 my entire 27 years in the county office is riveted with  
14 election day registration. And certainly on election  
15 day in those EDR states is moving that whole decision  
16 making process to election day. And one of the slides  
17 that you were showing is training between the poll  
18 workers makes a big difference, I can assure you that  
19 makes a huge difference when you are a EDR state. So my  
20 question is based in the thought that perhaps perhaps  
21 things to be learned from EDR states that could improve  
22 the provisional ballot process.

□

127

1 MS. HODGKINS: Mr. Lomax?

2 MR. LOMAX: Harvey Lomax, Clark county,  
3 Nevada.

4 I guess your sources of variation you listed  
5 is the experience of the state and how long a time the  
6 state has given to resolve the provisional ballot. Yet  
7 I would suggest kind of piggy backing on what Howard  
8 said that the laws of the state-- if you take the laws  
9 of California and Nevada and look at the laws of who  
10 past the provisional ballot. They drive (sic) more the  
11 number of provisional ballots cast, how long it takes  
12 to resolve those issues and how many are going to be

13 excepted. And most of that has to do with how people  
14 changes in address and if you allow changes in address  
15 up to the last minute.

16 In Nevada for instance no changes in address  
17 are allowed. So all we are dealing with are they  
18 registered or are they not registered. That's pretty  
19 much it. So it doesn't take us as long. And you're  
20 going to have a much higher rejection rate.

21 Just on the side a different issue. I can  
22 also speak loud and clear not all voters who show up

□

128
