<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

---

<sup>4</sup> See Transcript of EAC Public Meeting, February 8, 2007, page 109.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject your questions

Pam,

Per your question, Congressman Hinchey requested that the following be sent to the House Appropriations Committee, Subcommittee on Financial Services and General Government: EAC's assessment report on CIBER, Inc., the draft report submitted to EAC regarding voter fraud and intimidation, and the draft report submitted to EAC concerning voter identification. The assessment report on CIBER, Inc. and the final culmination of the voter fraud and intimidation research - Election Crimes: An Initial Review and Recommendations for Further Study – are available at [www.eac.gov](http://www.eac.gov), but we also provided hard copies to the committee.

Regarding the voter ID research project, as I mentioned at our Feb. public meeting EAC Chair Donetta Davidson requested that staff review the initial research provided by Eagleton and produce a final report, which would include recommendations for further study on this subject. However, we provided the Committee the initial information Eagleton provided to EAC.

Regarding the voter fraud and intimidation research, we provided the Committee EAC's final report and all of the information provided by the consultants. At a May 2006 public meeting of our Standards Board and Board of Advisors, the EAC project manager for this research presented a staff update on the project. Go here to view the public meeting agenda, page 3. The update the project manager gave at this public meeting has been made available to anyone who asked for it, and I've attached it for your review. The final culmination of this project can be found here. Go to page 24, where you will find links to attachments, which provide the data reviewed by the consultants. The commissioners adopted this report, including four recommendations for further study at a public meeting in Dec. 2006. The final report includes all of the recommendations put forth by the consultants as well the research they provided. (Consultants provided 16 suggestions for further study. See pages 16-22.)

Please let me know if you would like to speak with EAC Chair Davidson if you need sound or something for attribution. She'd also be glad to discuss our approach for these research projects. Again, my direct number is 202-566-3103 or you can reach me on my cell after 5:30 at 202-243-9476.

**U.S. ELECTION ASSISTANCE COMMISSION**

**Status Report on the  
Voting Fraud-Voter Intimidation Research  
Project**

**May 17, 2006**

030322

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. Interviews with DOJ personnel indicate that the Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance in this area. While the Election Crimes Branch, Public Integrity Section, continues to maintain an aggressive pursuit of systematic schemes to corrupt the electoral process (including voter suppression), it also has increased prosecutions of individual instances of felon, alien, and double voting.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, in addition to pursuing systematic election corruption schemes, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots "for cause" only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

### NEWS ARTICLES

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

#### Absentee Ballots

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota, and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate;  
and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from "battleground" states. There were several such reports out of Florida, Ohio, and Pennsylvania.

#### **"Dead Voters and Multiple Voting"**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

Pam,

Per your question, Congressman Hinchey requested three documents be sent to the House Appropriations Committee Subcommittee on Financial Services and General Government: EAC's assessment report on CIBER, Inc., the draft report submitted to EAC regarding voter fraud and intimidation, and the draft report submitted to EAC concerning voter identification. The assessment report on CIBER, Inc. and the final culmination of the voter fraud and intimidation research – Election Crimes: An Initial Review and Recommendations for Further Study -- are available at [www.eac.gov](http://www.eac.gov), but we also provided hard copies to the committee.

Regarding the voter ID research project, as I mentioned at our Feb. public meeting EAC Chair Donetta Davidson requested that staff review the initial research provided by Eagleton and produce a final report, which would include recommendations for further study on this subject. However, we provided the Committee the initial information Eagleton provided to EAC.

Regarding the voter fraud and intimidation research, we provided the Committee EAC's final report and all of the information provided by the consultants. At a May 2006 public meeting of our Standards Board and Board of Advisors, the EAC project manager for this research presented a staff update on the project. Go here to view the public meeting agenda, page 3. The update the project manager gave at this public meeting has been made available to anyone who asked for it. The final culmination of this project can be found here. Go to page 24, where you will find links to attachments, which provide the data reviewed by the consultants. The commissioners adopted this report, including four recommendations for further study at a public meeting in Dec. 2006. The final report includes all of the recommendations put forth by the consultants as well the research they provided. (Consultants provided 16 suggestions for further study. See pages 16-22.)

Please let me know if you would like to speak with EAC Chair Davidson if you need something for attribution. She'd also be glad to discuss our approach to both of these research projects. Again, my direct number is 202-566-3103 or

Pam Fessler of NPR called, wanting to know if we had submitted the docs requested by Congressman Hinchey. I said yes, and she wanted to know what they asked for, specifically regarding the voter fraud report. I thought the easiest thing to do would be to send her the letter we sent to the committee. What do you think about that?

Deleted: Releases Initial Research

WASHINGTON – The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive, multi-year study focused on voter identification laws after concluding that initial research covering only one election cycle was not sufficient to draw any conclusions. The Commission declined to adopt a report based on the initial research, but to release all of the information to the public. The information is available at [www.eac.gov](http://www.eac.gov).

Deleted: concluding

Deleted: that

Deleted: ing

“Many new voter identification laws have been enacted recently, and the Commission began working to determine the impact of these new laws,” said EAC Chair Donetta Davidson. “However, after careful consideration of the initial research conducted by our contractor, the Commission decided this important issue deserves a more in-depth research approach and that it should be examined beyond only one election cycle. The bottom line is that the research raises more questions than provides answers.”

Comment [C1]: I would add some of the language from the other document on this topic that we already approved. The action we took was to not adopt the report due to our concerns but to release all info to the public. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

Deleted: declined to adopt the report.

Deleted: ¶

EAC's future research on this topic will be expanded to include more than one election cycle, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC comprehensive research approach will undertake the following activities:

Deleted: issue a report based upon the initial research conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, but voted to make all of the research available.

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

Deleted:

Deleted: "

030336

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###

RA

# EAC Study of Voter Identification Requirements

## Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, [www.eac.gov](http://www.eac.gov).

## EAC Declines to Adopt Draft Report

---

<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

#### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

---

<sup>4</sup> See Transcript of EAC Public Meeting, February 8, 2007, page 109.

- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject FOR YOUR APPROVAL: VoterID Draft Press Release

Commissioners,

Attached is a draft press release about Commission actions surrounding the voter ID research. Please get your comments/edits back to me by Friday morning, and let me know if you have any questions. I will coordinate with Karen and Julie regarding its release, and tomorrow I will present you with a recommended strategy for the announcement of your decision. (Of course, it will not go out before the delivery of a related letter.)

(202) 566-3100

**WASHINGTON** – The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive, multi-year study on the impact of voter identification laws in the states based upon initial efforts that focused on the 2004 election cycle. The Commission also voted to provide all of the initial research conducted by its consultant, Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics. The information is available at [www.eac.gov](http://www.eac.gov).

“Many new voter identification laws have been enacted recently, and the Commission began working to determine the impact of these new laws,” said EAC Chair Donetta Davidson. “However, after careful consideration of the initial research conducted by our contractor, the Commission decided this important issue deserves a more in-depth research approach and that it should be examined beyond only one election cycle.”

EAC’s strategy for moving forward is based upon an examination of the initial research and the testimony and discussion of this research at the Commission’s February 8, 2007 public meeting. For more information about the meeting agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

EAC’s future research on this topic will be expanded to include more than one election cycle, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC comprehensive research approach will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). Subject for electionline

This incorporates Julie's suggestions. I haven't heard from Peg.

The document that was requested by the subcommittee is considered predecisional under the Freedom of Information Act (FOIA), but of course we will provide it to the subcommittee because they are exempt from FOIA. However, the commission adopted a final report on election crimes at a Dec. 2006 public meeting. The final report was based on the research provided by the consultants and additional information gathered by EAC staff. It is available on our website -- go here. The report includes all of the data reviewed by the consultants. (See links on page 24.) It also includes all of the recommendations for further study that the consultants put forth. Ultimately, the commission adopted four of those recommendations.

As a small agency, EAC often works with contractors, consultants and experts to gather data and conduct research. After the commission receives the initial data or information, staff then works to incorporate this information into a final EAC report.

Subject Draft response - is this okay?

Dan,

Just to follow up. The document that was requested by the subcommittee is predecisional. It is also covered under an exemption to FOIA -- deliberative process privilege. However, we are providing this to the congressional subcommittee because they are exempt from FOIA. Please do not hesitate to contact us should you have any questions or if we can be of assistance.

Subject info request re: House Appropriations subcommittee hearing

030358

Bryan -

As I mentioned on the phone, I am seeking information as a follow up to the House Appropriations Subcommittee on Financial Services. At the hearing, Rep. Maurice Hinchey, D-N.Y., requested that the EAC submit the original version of a report written by Tova Wang and Job Serebrov. Chairwoman Davidson said she would provide the original report (I believe) within three days. Is that still the case? Will the subcommittee have the original report, as submitted by the consultants, on Monday? And if so, may we have a copy as well?

Thanks,  
Dan

# EAC Statement on Future Study of Voter Identification Requirements

## Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election - November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>1</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>2</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

**Deleted:** The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.¶

## EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

**Deleted:** consideration of

**Deleted:**

<sup>1</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>2</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>3</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

**Deleted:** research  
**Deleted:** chose to employ in order to  
**Deleted:** and the potential variation in  
**Deleted:** based on the type of voter identification requirements

**Deleted:** on that point

**Deleted:**

**Deleted:** EAC is not adopting the report submitted by the Contractor and, therefore, is not releasing the

**Deleted:**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be

<sup>3</sup> See EAC Public Testimony, February 8, 2007, page 109.

covered in the study and timelines for completing an EAC study on voter identification.

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject Re: Latest draft of the EAC Voter ID statement 

Attached, please find my edits. My intention was to try to explain in English how the Contractor conducted the study in the 2nd graph of the background statement. I realize I left some information out; for example, how he ran the numbers based on maximum and minimum id requirements. I am open to any suggestions on how to better describe what they did; however, despite reading the report and Appendix C many times, I am still do not understand exactly how the study was conducted. I think we should run the 2nd graph by the Contractor to ensure its accuracy.

# EAC Statement on Future Study of Voter Identification Requirements

## Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election, November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>1</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>2</sup> The contractor and the EAC agree that the report raises more questions than provides answers.<sup>3</sup>

**Deleted:** Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.¶

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

## EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the

<sup>1</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>2</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

<sup>3</sup> See EAC Public Testimony, February 8, 2007, page 109.

implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements and the potential variation in turnout rates based on the type of voter identification requirements. EAC is not adopting the report submitted by the Contractor and, therefore, is not releasing the report.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Study the effects, including voter turnout, voter registration, and fraud, of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various

Subject Voter ID, Fraud & Intimidation--Need your input

Hello all,

A columnist from the WaPo has asked for info about both the voter ID and the fraud and intimidation reports. This was prompted by the accusation that the president was concerned that the fired prosecutors were not aggressively pursuing voter fraud cases. She had heard that we were refusing to release this information, so I am trying to demonstrate otherwise, as well as show that we have discussed these projects numerous times in public meetings. Please take a look at my draft email to her and let me know if you have any suggestions. She needs to hear back from me by 4 p.m. Thanks for your help with this.

Ms. Cocco,

Per your questions, go [here](#) to view the testimony regarding voter ID from our Feb. 2 public meeting. As I mentioned, at this meeting EAC Chair Donetta Davidson requested that staff review the initial research provided by Eagleton and produce a final report, which would include recommendations for further study on this subject. Currently, staff is working to finalize the voter ID report.

Regarding the voter fraud and intimidation research, at a May 2006 public meeting of our Standards Board and Board of Advisors, the EAC project manager for this research presented a staff update on the project. Go [here](#) to view the agenda, page 3. The document you referred to was the update the project manager gave at this public meeting, and it has been made available to anyone who asked for it. The final culmination of this project can be found [here](#), and links to the attachments provided by the consultants are available by going to page 24 of this report. The commissioners adopted this report at a [public meeting in Dec. 2006](#).

As a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for these projects. After EAC receives the initial data, the agency reviews the data for accuracy and then releases a final report.

Subject Widespread Voter Fraud is a myth, says new Project Vote  
report

Hello, Peg.

I thought you might be interested in the fraud report that Project Vote just released.

Widespread "voter fraud" is a myth promulgated to suppress voter participation, according to a new Project Vote report released today. "The Politics of Voter Fraud" finds that fraudulent voting, or the intentional corruption of the voting process by voters, is extremely rare. Yet, false or exaggerated claims of fraudulent voting are commonly made in close electoral contests, and later cited by proponents of laws that restrict voting. The report is authored by Lorraine Minnite, Ph.D., Barnard College, Columbia University.

Best regards,

Jo-Anne

# KEY FINDINGS

---

- **Voter fraud is the “intentional corruption of the electoral process by the voter.”** This definition covers knowingly and willingly giving false information to establish voter eligibility, and knowingly and willingly voting illegally or participating in a conspiracy to encourage illegal voting by others. All other forms of corruption of the electoral process and corruption committed by elected or election officials, candidates, party organizations, advocacy groups or campaign workers fall under the wider definition of **election** fraud.
- **Voter fraud is extremely rare.** At the federal level, records show that only 24 people were convicted of or pleaded guilty to illegal voting between 2002 and 2005, an average of eight people a year. The available state-level evidence of voter fraud, culled from interviews, reviews of newspaper coverage and court proceedings, while not definitive, is also negligible.
- **The lack of evidence of voter fraud is not because of a failure to codify it.** It is not as if the states have failed to detail the ways voters could corrupt elections. There are hundreds of examples drawn from state election codes and constitutions that illustrate the precision with which the states have criminalized voter and election fraud. If we use the same standards for judging voter fraud crime rates as we do for other crimes, we must conclude that the lack of evidence of arrests, indictments or convictions for any of the practices defined as voter fraud means very little fraud is being committed.
- **Most voter fraud allegations turn out to be something other than fraud.** A review of news stories over a recent two year period found that reports of voter fraud were most often limited to local races and individual acts and fell into three categories: unsubstantiated or false claims by the loser of a close race, mischief and administrative or voter error.
- **The more complex are the rules regulating voter registration and voting, the more likely voter mistakes, clerical errors, and the like will be wrongly identified as “fraud.”** Voters play a limited role in the electoral process. Where they interact with the process they confront an array of rules that can trip them up. In addition, one consequence of expanding voting opportunities, i.e. permissive absentee voting systems, is a corresponding increase in opportunities for casting unintentionally illegal ballots if administrative tracking and auditing systems are flawed.
- **There is a long history in America of elites using voter fraud allegations to restrict and shape the electorate.** In the late nineteenth century when newly freed black Americans were swept into electoral politics, and where blacks were the majority of the electorate, it was the Democrats who were threatened by a loss of power, and it was the Democratic party that erected new rules said to be necessary to respond to alleged fraud by black voters. Today, the success of voter registration drives among minorities and low income people in recent years threatens to expand the base of the Democratic party and tip the balance of power away from the Republicans. Consequently, the use of baseless voter fraud allegations for partisan advantage has become the exclusive domain of Republican party activists.

- ***The historically disenfranchised are often the target of voter fraud allegations.*** Fraud allegations today typically point the finger at those belonging to the same categories of voters accused of fraud in the past – the marginalized and formerly disenfranchised, urban dwellers, immigrants, blacks, and lower status voters. These populations are mostly found among those still struggling for full inclusion in American life.
- ***Better data collection and election administration will improve the public discussion of voter fraud and lead to more appropriate policies.*** We need better data, better election administration, transparency and more responsible journalism to improve public understanding of the legitimate ways in which electoral outcomes can be distorted and manipulated. This will help ensure that new laws and rules to prevent fraud are narrowly targeted to solve legitimate problems rather than used as a strategy to shape the electorate for partisan advantage.

# INTRODUCTION

---

The claim that voter fraud threatens the integrity of American elections is itself a fraud. It is being used to persuade the public that deceitful and criminal voters are manipulating the electoral system. No available evidence suggests that voters are intentionally corrupting the electoral process, let alone in numbers that dilute and cancel out “the lawful votes of the vast majority of Americans.”<sup>1</sup> The lack of evidence is not due to a failure to codify voter fraud as a crime, nor is it due to the inability or unwillingness of local law enforcement agencies to investigate or prosecute potential cases of voter fraud. In fact, when we probe most allegations of voter fraud we find errors, incompetence and partisanship. The exaggerated fear of voter fraud has a long history of scuttling efforts to make voting easier and more inclusive, especially for marginalized groups in American society. With renewed partisan vigor fantasies of fraud are being spun again to undo some of the progress America has made lowering barriers to the vote.

The purpose of this report is to disentangle the myth from the reality and to separate the politics of voter fraud from legitimate administrative concerns about the integrity of the electoral process. To make the argument, we present a usable definition of voter fraud, discuss the problem of evidence, and explain how and why the dynamics of electoral competition drive the use of baseless fraud claims in American politics. We present several contemporary examples to illustrate how poor election administration and voter mistakes are misleadingly labeled “fraud.” Recent allegations against voter registration campaigns highlight the need for an analysis sensitive to the partisanship and race and class issues just beneath the surface of most voter fraud claims. The last section of the report makes policy recommendations for improving public understanding and removing the canard of voter fraud from the election reform debate. The appendix discusses what to look for in evaluating voter fraud allegations.

<sup>1</sup> U.S. Senate Republican Policy Committee, “Putting An End to Voter Fraud,” (February 15, 2005); available online at [http://rpc.senate.gov/\\_files/Febl504VoterFraudSD.pdf](http://rpc.senate.gov/_files/Febl504VoterFraudSD.pdf).

# DEFINING VOTER FRAUD

---

Conceptual clarity is important in evaluating evidence of fraud. We begin with a discussion of what voter fraud is and what it is not. The first problem in defining voter fraud is that as a crime, it defies precise legal meaning. In fact, there is no single accepted legal definition of voter fraud. We have fifty different state electoral systems and fifty state criminal codes governing the administration of elections, plus a federal code that applies in national elections, and no uniform standards. In fact, some states do not actually criminalize 'voter fraud,' although they all criminalize acts that are commonly lumped together under the term, such as illegal voting, providing false information to register to vote, and multiple voting.<sup>2</sup> The legal incoherence contributes to popular misunderstandings.

We need a basic definition of voter fraud that cuts through the confusion without violating the way voter fraud is diversely treated in state and federal law. We can start with the U.S. Department of Justice's definition of **election fraud** and apply it to election crimes committed by **voters**. The Justice Department defines election fraud as "conduct that corrupts the process by which ballots are obtained, marked, or tabulated; the process by which election results are canvassed and certified; or the process by which voters are registered."<sup>3</sup> Voter fraud is a sub-category of election fraud, or the intentional corruption of the electoral process by voters.

**Voter fraud is the intentional corruption of the electoral process by voters.**

This covers **knowingly and willingly** giving false information to establish voter eligibility, and **knowingly and willingly** voting illegally or participating in a conspiracy to encourage illegal voting by others.<sup>4</sup> Apparent acts of fraud that result from voter mistakes or isolated individual wrongdoing or mischief making not aimed at corrupting the voting process should not be considered fraud, though sometimes these acts are prosecuted as such.<sup>5</sup> All other forms of corruption of the electoral process and corruption committed by elected or election officials, candidates, party organizations, advocacy groups or campaign workers fall under the wider definition of **election fraud**.<sup>6</sup>

<sup>2</sup> There are many examples of states that criminalize what we think of as voter fraud without calling it voter fraud. Georgia, for example, has no election code offense for "voter fraud," but it does provide stiff penalties for "repeat voting" and "voting by unqualified elector." See, for example O.C.G.A. § 21-2-560 et seq. In New Hampshire, the crime of voting more than once is called "wrongful voting." See, N.H.R.S. § 63-659.34. In Alaska, voter impersonation, voting more than once, and registering to vote without being entitled to register are all simply called "voter misconduct." See, Ala. Statutes § 15.56.040 et seq.

<sup>3</sup> Craig C. Donsanto and Nancy Stewart, *Federal Prosecution of Election Offenses*, 6<sup>th</sup> Edition, U.S. Department of Justice, Criminal Division, Public Integrity Section (January 1995), 21 (herein cited as 'DOJ Manual').

<sup>4</sup> Fraud is commonly defined as "deception *deliberately* practiced with a view to gaining an unlawful or unfair advantage" (*emphasis added*). See *Webster's Revised Unabridged Dictionary*, Version published 1913 by the C. & G. Merriam Co. (Springfield, Mass.), under the direction of Noah Porter, D.D., LL.D. Criminal intent is a feature of the election crime codes of most states and the federal system, although a showing of intent is not always required to obtain a conviction for some forms of voter fraud such as "alien voting" (voting by a non-citizen).

<sup>5</sup> The proper venue for challenging mistakes that may have affected the outcome of an election is to follow state statutory procedures for an election challenge or contest. See, Barry H. Weinberg, *The Resolution of Election Disputes: Legal Principles That Control Election Challenges* (Washington, D.C.: IFES, 2006).

<sup>6</sup> This definition of voter fraud is simpler and more coherent than others offered. See, for example, U.S. Election Assistance Commission, *Election Crimes: An Initial Review and Recommendations for Future Study* (December 2006), 13-16; available online

Allegations of “voter fraud” should be analyzed to determine 1) who is alleged to have committed the fraud, and 2) which stage of the electoral process is alleged to have been corrupted. This approach will go a long way toward clarifying whether electoral integrity is being breached and what needs to be done to secure the process (see the appendix for further discussion of how to identify fraud).

---

at [www.eac.gov/docs/Voter%20Fraud%20&%20Intimidation%20Report%20-POSTED.pdf](http://www.eac.gov/docs/Voter%20Fraud%20&%20Intimidation%20Report%20-POSTED.pdf) (herein cited as 'EAC Report'). Moreover, although it is simple, it preserves the meaning of “fraud” in the electoral context as outlined by the Justice Department. The Department’s manual for training U.S. Attorneys in investigating and prosecuting election crimes divides “election frauds” into two categories, one that involves the participation of voters and another that does not. Those election fraud crimes involving the participation of voters include vote buying schemes, absentee ballot frauds, voter intimidation schemes, migratory-voting (or floating-voter) schemes, and voter ‘assistance’ frauds, in which the wishes of the voters are ignored or not sought. See, Donsanto and Stewart (1995), 22-24. Acts of voter intimidation which are included in the election fraud definitions offered in both the EAC Report and the DOJ Manual are excluded here. While the intimidation of voters certainly corrupts the electoral process, it is a crime that more directly involves the deprivation of rights guaranteed by law and for that reason should be treated separately from acts of deceit.

# VOTER FRAUD AND THE PROBLEM OF EVIDENCE

---

How prevalent is voter fraud? A 2005 U.S. Senate Republican Policy Committee report claimed that “voter fraud continues to plague our nation’s federal elections, diluting and canceling out the lawful votes of the *vast majority of Americans*” (emphasis added).<sup>7</sup> This would be shocking if it were true. But the Committee made it without providing a single piece of evidence to support or clarify the claim. It cited no surveys, no statistics, no studies, no credible evidence whatsoever to back up its warning that election results are routinely distorted by fraud in the United States.

## ***Evidence of voter fraud like all other crimes comes from law enforcement efforts to combat it***

The Committee cited no data because there is very little to cite. Evidence of voter fraud like evidence of other forms of criminal behavior is primarily produced by law enforcement efforts to detect and prosecute it. And the available evidence here suggests that voters rarely commit voter fraud.<sup>8</sup> As in the case of all other kinds of crime, it is simply unacceptable to allege law breaking without providing at least some supporting evidence.

What is that evidence? At the national level, a major new project at the U.S. Department of Justice, the Ballot Access and Voting Integrity Initiative (BAVII) has resulted in only a handful of convictions.<sup>9</sup> According to the Attorney General, since the inception of the program in 2002, “we’ve made enforcement of election fraud and corruption offenses a top priority.”<sup>10</sup> The result? Government records show that only 24 people were convicted of or pleaded guilty to illegal voting between 2002 and 2005, an average of eight people a year. This includes 19 people who were ineligible to vote, five because they were still under state supervision for felony convictions, and 14 who were not U.S. citizens; and five people who voted twice in the same election, once in Kansas and again in Missouri.<sup>11</sup>

<sup>7</sup> U.S. Senate Republican Policy Committee (2005).

<sup>8</sup> The idea that voter fraud is first and foremost a crime reaches substantially the federal concept of election fraud which “applies only to activity that is appropriately remedied through criminal prosecution, as distinguished from other less severe remedies such as election contest litigation or administrative relief.” See, Craig C. Donsanto, “The Federal Crime of Election Fraud,” prepared for the Russian election reform website, Democracy.Ru, n.d.; available online at [www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html).

<sup>9</sup> On the origins of BAVII, see Jeffrey Toobin, “Annals of Law: Poll Positions,” *The New Yorker* (September 20, 2004). Very little information about the program’s overall scope and performance has been released by the Justice Department’s Public Integrity Section; annual press releases announce the numbers of investigations and convictions obtained, and the Public Integrity Section’s annual reports to Congress briefly discuss some of the cases, but efforts to acquire more information about the program have been stymied by the Criminal Division’s failure to respond to a Freedom of Information Act request filed in July 2005. Nevertheless, it is difficult to imagine that the Department would withhold information about closed cases of deceitful voters, and therefore likely that the limited information it has released so far is all there is.

<sup>10</sup> Prepared Remarks of Attorney General Alberto R. Gonzales, Ballot Access and Voting Integrity Symposium, Washington, D.C. (October 4, 2005).

<sup>11</sup> U. S. Department of Justice, Criminal Division, Public Integrity Section, *Election Fraud Prosecutions & Convictions, Ballot Access & Voting Integrity Initiative, October 2002 – September 2005* (n.d.).

## Federal Prosecutions for Illegal Voting 2002 – 2005

CASTING A FALSE BALLOT	DISPOSITION				
	Dismissed	Acquitted	Pleaded Guilty	Convicted	Total
<b>False claim of eligibility</b>					
Non-citizen	4	1	3	11	19
Felon	4	1	3	2	10
<b>Multiple voting</b>	3	1	5		9
<b>TOTAL</b>	<b>11</b>	<b>3</b>	<b>11</b>	<b>13</b>	<b>38</b>

Source: U. S. Department of Justice, Criminal Division, Public Integrity Section, *Election Fraud Prosecutions & Convictions, Ballot Access & Voting Integrity Initiative, October 2002 – September 2005* (n.d).

In addition, the BAVII uncovered several vote buying schemes that have resulted in the convictions or guilty pleas of about 30 people, though most of those convicted were party and election officials, candidates for public office and elected officials, and in one case, the commander of a local VFW post. The vote buying cases involved a handful of elections in the Appalachia regions of eastern Kentucky and West Virginia, East St. Louis, Illinois and Caldwell County, North Carolina.

The available state-level evidence of voter fraud, culled from interviews, reviews of newspaper coverage and court proceedings, while not definitive, is also negligible.<sup>12</sup> There are no reliable, officially compiled, national or even statewide statistics on voter fraud.<sup>13</sup> Even though many criminal acts associated with "voter fraud" are classified as felonies, voter fraud fails to appear in the F.B.I.'s uniform crime reports. There are no publicly available criminal justice databases that include voter fraud as a category of crime. No states collect and publish statistics on voter fraud.<sup>14</sup>

### ***The lack of evidence is not due to a failure to codify voter fraud as a crime***

If fraud is such a persistent concern of those who run elections, government agencies responsible for election administration should collect statistics on it, as they do in other serious matters, certainly other crimes. It is not as if the states have failed to detail the ways voters could corrupt elections. There are hundreds of examples drawn from state election codes and constitutions that illustrate the precision with which the states have criminalized voter and election fraud.

If we use the same standards for judging voter fraud crime rates as we do for other crimes, which is to calculate the incidence of crime from law enforcement statistics on arrests, indictments and convictions, we must conclude that the lack of evidence of arrests, indictments or convictions for any of the practices defined as voter fraud means very little fraud is being committed relative to the millions of votes cast each year in state, local and federal elections.

<sup>12</sup> Lori Minnite and David Callahan, *Securing the Vote: An Analysis of Election Fraud* (New York: Dēmos: A Network for Ideas and Action, 2003). The author is engaged in a more thorough analysis of state-level voter fraud data and investigations which will be published in her forthcoming book. To-date, the findings only confirm Minnite and Callahan's earlier conclusions.

<sup>13</sup> This is an urgent concern. Law professor Spencer Overton persuasively argues for a more empirical cost-benefit approach to evaluating the value and constitutionality of new restrictive photo identification voting requirements. As Overton notes, this approach is hampered by the lack of systematic data on fraud. See, Spencer Overton, "Voter Identification," *Michigan Law Review* 105(2007), 631-682.

<sup>14</sup> The California Secretary of State's Office compiled information on electoral fraud cases referred to its office from 1994 to 2003. The data were analyzed in an unpublished conference paper (see, R. Michael Alvarez and Frederick J. Boehmke, "Contemporary Election Fraud: A Quantitative Analysis of Election Fraud Cases in California," paper prepared for Election Fraud Conference, Center for Public Policy and Administration, The University of Utah, and the Caltech/MIT Voting Technology Project, Salt Lake City, Utah, September 29-30, 2006; available online at [www.vote.caltech.edu/events/2006/FraudConf/AlvBmk-paper.pdf](http://www.vote.caltech.edu/events/2006/FraudConf/AlvBmk-paper.pdf)), but they are not publicly available.

### **Examples Of How States Criminalize “Voter Fraud”**

- In Texas, a person can be convicted of a third degree felony if he or she “votes or attempts to vote in an election in which the person knows the person is not eligible to vote; knowingly votes or attempts to vote more than once in an election; or knowingly impersonates another person and votes or attempts to vote as the impersonated person.”<sup>i</sup>
- California’s election code has dozens of provisions that prohibit illegal activity associated with elections. It prohibits fraudulent registration, including registering under a false name, registering under a false address, and registering a non-existent person. It makes it a felony for a person to vote in an election that he or she is not entitled to vote in, to vote more than once, or impersonate another voter. Moreover, it is a felony in California to “give, offer, or promise any office, place, or employment, or promise to procure or endeavor to procure any office, place, or employment to or for any voter, or to or for any other person, in order to induce that voter at any election to” vote or not vote for a particular candidate.<sup>ii</sup>
- Pennsylvania law gives the power to monitor elections to county boards of elections, and imposes a substantial number of penalties on people engaging in election fraud. Giving or receiving money in exchange for voting a certain way in an election can bring up to seven years in prison and \$15,000 in fines. Any person convicted of perjury “regarding any material matter or thing relating to any subject being investigated, heard, determined or acted upon by any county board of elections, or member thereof, or by any court or judge thereof, judge of election, inspector of election, or overseer” can receive up to five years in prison and a \$10,000 fine. Any person voting when they are not registered to vote, or voting more than once can be punished the same.<sup>iii</sup>
- Nineteenth century language in the Alabama Constitution disqualifies from voting “all idiots and insane persons” and those convicted of crimes like murder, arson, and rape, but also wife battering, bigamy, sodomy, miscegenation and vagrancy. It also disqualifies from voting any person convicted of “selling or offering to sell his vote or the vote of another, or of buying or offering to buy the vote of another, or of making or offering to make a false return in any election by the people or in any primary election to procure the nomination or election of any person to any office, or of suborning any witness or registrar to secure the registration of any person as an elector.”<sup>iv</sup>
- In Minnesota, it is a felony to submit more than one absentee ballot, assist another in submitting more than one absentee ballot, or alter another’s absentee ballot in any way.<sup>v</sup>

<sup>i</sup> Tex. Gov’t Code Ann. § 64.012.

<sup>ii</sup> Cal. Gov’t Code § 18520.

<sup>iii</sup> 25 Pa. Stat. Ann. Art. XVIII, generally.

<sup>iv</sup> Constitution of Alabama (1901), Section 182.

<sup>v</sup> Minn. Stat. Ann. § 203B.03.

### ***The lack of evidence of voter fraud is not due to law enforcement agencies ignoring their duties***

Even if crime reports underestimate true crime rates because some crimes go unreported or undetected, or because criminal behavior is sometimes addressed by means other than prosecution, crime is still measured as a function of law enforcement efforts to address it. Under the rule of law, enforcement efforts establish the core evidence of crime. It is difficult to conceive of whole categories of criminal behavior that go almost completely undetected or ignored by law enforcement officials at all levels of government across the U.S. today. And yet, those who believe there is a lot of voter fraud despite the lack of evidence frequently fall back on this argument. When confronted they charge the paucity of evidence is due to the government's failure to undertake the investigations and prosecutions that would produce it.<sup>15</sup> A more plausible explanation is that voters are not committing fraud, leaving little to investigate or prosecute.

### ***The lack of evidence of voter fraud is not due to the inability of law enforcement agencies to pursue voter fraud investigations***

Some argue that local officials are ill-equipped to detect voter fraud and poorly motivated to pursue investigations and prosecutions of voter fraud given their lack of expertise and resources and the public's demand for attention to more serious or violent crimes.<sup>16</sup> If election crime, perhaps like international securities fraud or organized crime, were beyond the ken of local officials to investigate, then we might expect a dearth of prosecutions and little evidence of voter fraud. This is another explanation offered by those who argue that there is a lot of fraud despite the lack of evidence. Local officials, the argument goes, can't or won't prosecute fraud for a variety of reasons. The detection and prosecution of voter fraud, however, is not beyond the ken of local officials. In fact, as the Justice Department manual on how to investigate and prosecute election crime argues, "there are several reasons why election crime prosecutions may present an easier means of obtaining convictions than do other forms of public corruption." They are, 1) "election crimes usually occur largely in public," 2) "election crimes often involve many players," and 3) "election crimes tend to leave a paper trail."<sup>17</sup> Without any evidence to support it, the notion that local law enforcement officials are unable or unwilling to investigate or prosecute voter fraud lacks merit. But, as the saying goes, if you repeat a rumor enough times people will start to believe it.

<sup>15</sup> Recently, a federal appeals court judge repeated the rumor that, "...the absence of [voter fraud] prosecutions [in Indiana] is explained by the endemic under enforcement of minor criminal laws (minor as they appear to the public and prosecutors, at all events)." See, *Indiana Democratic Party v. Rokita*, U.S. Court of Appeals, 7<sup>th</sup> Circuit, Case No. 06-2218, 7. This is a contentious issue, but like most allegations of voter fraud, one that fails to rise above the level of anecdote.

<sup>16</sup> For example, in affirming the lower court's decision upholding Indiana's new photo identification law, U.S. Court of Appeals Judge Richard Posner proposed the idea that as a crime, voter fraud is analogous to littering. See also Donsanto and Stewart, asserting, "...local law enforcement is often not equipped to prosecute election offenses" (1995, 8), and Donsanto's subsequent statement that, "Voter fraud investigations are labor intensive. Local law enforcement agencies often lack the manpower and the financial resources to take these cases on." (Donsanto, n.d.) Here, Donsanto, the director of the Elections Crimes Branch of the Justice Department's Public Integrity Section since its inception in 1978, undermines a claim he makes earlier in a *University of Baltimore Law Review* article, that, "Most election fraud is easily recognized." If it's easily recognized, why would local law enforcement agencies lack the manpower and resources to take on investigations and prosecutions? See, Craig C. Donsanto, "Federal Jurisdiction Over Local Vote Fraud," *University of Baltimore Law Review* 13(1), 4.

<sup>17</sup> Donsanto and Stewart (1995), 6.

# “FRAUD” THAT IS NOT FRAUD

---

A review of hundreds of news reports on voter fraud appearing over a recent two year period found that with few exceptions, fraud allegations and cases reported in the press were limited to local electoral contests and individual acts, and fell into three basic categories:

- 1) *unsubstantiated or false allegations of voter fraud made by the losers of close elections;*<sup>18</sup>
- 2) *mischief; and,*
- 3) *claims that later turn out to be based on cases of voter error or administrative mistakes, not fraud.*

## **Here are some examples:**

### **Examples of fraud alleged by election losers**

- Pittsburgh City Council President Bob O'Connor lost a close primary race to incumbent Mayor Tom Murphy and charged voter fraud cost him the election. Pittsburgh election officials allowed the two campaigns to review balloting while monitoring each other. Mayor Murphy's campaign found 81 ineligible voters in a sampling of 71 of the city's 404 precincts. The *Pittsburgh Post-Gazette* reviewed Murphy's data and found only three clearly improper ballots. The O'Connor campaign claimed it found 142 votes cast by people whose voter registration cards were missing but would not share its data with the *Post-Gazette* for independent verification.<sup>19</sup>
- The Pasco County Canvassing Board of Port Richey, Florida, denied a request for a recount filed by Bob Leggiere who lost to the incumbent by nine votes. Leggiere claimed that voter fraud and 11 ballots that did not register a vote for mayor were the cause of his defeat. He charged that owners of a gambling boat operation voted illegally because their boat, which was their legal residence, was outside the city limits, suggesting that "because of their gambling boat interests, they have attempted to take control of the city elections." The canvassing board informed Leggiere that he needed to file a protest with the board or a complaint in court, which he declined to do.<sup>20</sup>

### **Examples of fraud as mischief**

- A Ventura County, California woman was arrested and charged with voter fraud when her ex-husband noticed the names of two of their underage children on a list of registered voters in the March 2000 primary and turned her in. The woman was charged with fraudulently registering her 10- and 15-year old daughters, one of her daughter's friends, her ex-husband who was already registered, and a number of fictitious people.<sup>21</sup>

<sup>18</sup> For a discussion of fraud and the sore loser, see Michelle L. Robinson, "Issue in the Third Circuit: Election Fraud – Winning At All Costs," *Villanova Law Review* 40 (1995), 869+.

<sup>19</sup> James O'Toole, "Voting Errors Suggest No Fraud," *Pittsburgh Post-Gazette* (June 17, 2001), B17.

<sup>20</sup> Chase Squires and Matthew Waite, "Fraud Alleged in Port Richey Vote," *St. Petersburg Times* (April 12, 2001), B4.

<sup>21</sup> "Woman Faces Vote Fraud Charges," *The San Diego Union-Tribune* (October 29, 2000), A3.

- Prosecutors in West Palm Beach, Florida agreed not to charge a woman who registered her poodle, "Cocoa Fernandez," as a Republican on the condition that the woman stay out of trouble for a year. She averted a third-degree felony charge carrying a maximum 5-year prison term and a \$5,000 fine.<sup>22</sup>
- A story appeared in the Marquette University student paper that 174 of 1,000 students surveyed said they voted more than once in the November 2000 presidential election. Another 170 claimed to have voted for write-in candidates, but the official canvass of the voting precincts surrounding the Marquette campus recorded only 12 write-in votes for president. One student told ABC News, the *Milwaukee Journal Sentinel* and the Marquette student paper that he voted four times. He later recanted when a list of voters from his precinct did not include his name at all. The Milwaukee County District Attorney said he had no evidence of any student voting more than once. The student who told the media he voted four times was later charged with selling other students fake Ohio drivers licenses he printed using his dorm room computer.<sup>23</sup>

### **Examples of fraud as voter error**

- The *Milwaukee Journal Sentinel* conducted a two-month review of 203,000 votes cast in Milwaukee and found that 361 felons still under state supervision cast votes in 2000. This was in violation of an "often misunderstood state law" that disqualifies felons on probation or parole from voting. Ninety percent of the 361 illegal votes were cast by African Americans living in central city neighborhoods, most with convictions for welfare fraud, forgery and other property offenses. The newspaper reasoned that the illegal votes probably went to Al Gore, since 92 percent of African Americans in the state voted for Gore. They estimated that if disqualified felons elsewhere in the state voted illegally at the same rate obtained in Milwaukee, as many as 1,100 illegal votes could have been cast statewide, a significant number given Gore's margin of victory was only 5,708 votes. None of the illegal voters contacted by the paper knew they were prohibited from voting, and a review of parole and probation procedures suggested they were never informed.<sup>24</sup> Charges were filed against three people but later dropped when prosecutors couldn't prove those charged knew they were breaking the law.
- A voter inadvertently filled out five ballots in a local election in Montgomery County, Texas. "It (the five ballots, sic) was just handed to me and I just put them in the box," said the culprit, 52-year old Ruben Jones, "I wasn't paying attention." An election judge allowed one of Jones' votes to count resulting in a tie at 83 votes each between two candidates who were then forced into a run-off. Fraud was charged. The city attorney acknowledged the judge's mistake but could not overturn his decision to allow one of the votes to count. There was no provision in Texas election law for overruling an election judge on such matters.<sup>25</sup>

Examples of cases of administrative incompetence and mistakes leading to misplaced allegations of voter fraud in St. Louis and Milwaukee are discussed in detail below.

<sup>22</sup> "In Brief/Florida: No Charges, But Pooch Can't Punch Ballot," *Los Angeles Times* (December 17, 2001), A23.

# THE POLITICS OF VOTER FRAUD CLAIMS

---

There are many reasons why electoral reform is difficult to achieve, chief among them the benefits the *status quo* bestows on politicians in charge of making the rules. Voting rights advocates working to expand the electorate and make voting easier for more citizens must also overcome recurring arguments that reform will encourage more voter fraud. Indeed, the specter of voter fraud has been manipulated by elites to restrict and shape the electorate for nearly two centuries.

## ***The Late Nineteenth Century and the “Good Government” Defense***

The electoral reforms of the Progressive era dismantled Populist voting majorities and reflected the reformers' class and anti-immigrant biases. Following the turmoil of the election of 1896 when new immigrants, struggling farmers, and wage workers flooded into the electorate, wealthy elites pressed for tighter regulation of the electoral process. They promoted personal voter registration systems that had the effect of de-mobilizing the poor and working classes.<sup>26</sup> The reformers' rhetoric fastened on fraud and the need to eliminate it in order to protect 'the Democracy.' The perception of fraud and widespread electoral corruption gave their efforts moral ballast which obscured the class conflict at the center of the struggle for the vote.

***The specter of voter fraud has been manipulated by elites to restrict and shape the electorate for nearly two centuries.***

For Progressive era elites, voter registration was good government and universal voting was directly associated with corruption and voter fraud.<sup>27</sup>

Municipal reformers drawn from the ranks of the new middle and upper class professional strata assumed the lower classes possessed inferior moral capacities that produced unscrupulous behavior in politics. They wrestled control of government away from the older political machine organizations by imposing administrative reforms on the electoral process. These reforms deliberately privatized and personalized the social act of voting in order to undercut the machine's capacity to mobilize majorities through ethno-religious and other group-based appeals.<sup>28</sup>

<sup>26</sup> Frances Fox Piven and Richard A. Cloward, *Why Americans Don't Vote and Why Politicians Want It That Way* (Boston: Beacon Press, 2000), 91-2.

<sup>27</sup> Dayna Cunningham, "Who Are To Be Electors? A Reflection on the History of Voter Registration in the U.S.," *Yale Law and Policy Review* 9(2) (1991), 383.

<sup>28</sup> After the Civil War, the electorate was demobilized in different ways in the North and South. Black disenfranchisement was pursued through the use of violence and terror, and institutionalized through the re-writing of Southern state constitutions between 1890 and 1910. Mississippi pioneered the "Southern system" of burdensome residency requirements, periodic registration, poll taxes, literacy and "understanding" requirements, and exacting disqualification provisions, all designed to strip black men of the vote without reliance on overt racial classifications (Cunningham (1991), 377). There is a large scholarly literature on this subject. See, for example, classic works by V.O. Key, *Southern Politics in State and Nation* (New York: A. A. Knopf, 1949); and J. Morgan Kousser, *The Shaping of Southern Politics: Suffrage Restriction and the Establishment of the One-Party South, 1880-1910* (New Haven: Yale University Press, 1974). On efforts to reshape the electorate outside of the South during this period, see, Walter Dean Burnham, "The Appearance and Disappearance of the American Voter," in Walter Dean Burnham, *The Current Crisis in American Politics* (New York: Oxford University Press, 1983); and Paul Kleppner, *Who Voted? The Dynamics of Electoral Turnout, 1870-1980* (New York: Praeger, 1982). For a fascinating account of how nineteenth century voters behaved at the polls on Election Day, see Richard Franklin Bensel, *The American Ballot Box in the Mid-Nineteenth Century* (New York: Cambridge University Press, 2004).

Much has been written about the colorful and varied forms of political corruption in the nineteenth century.<sup>29</sup> The debate over the extent of fraud among scholars, however, has failed to settle the question of whether it accounted for the extraordinarily high levels of turnout that disappeared with the adoption of personal voter registration systems.<sup>30</sup> Nor is it certain that the new voter registration laws were responsible for reducing the election fraud they were aimed at eliminating. But, election fraud documented by the reformers usually involved organized efforts by election officials and politicians, not by the voters who were the intended target of restrictive reforms like voter registration.<sup>31</sup>

Nevertheless, voting rights have been won. Most of the conditions that once gave rise to what we would characterize as fraudulent practices today, such as ballots produced and distributed by the political parties, have changed. In the nineteenth century, election fraud was sometimes perpetrated by partisans acting together to steal elections. Local party organizations competed for voters and controlled votes through patronage, and the stakes were high. In those days, parties, patronage and fraud were intertwined. Today, local party organizations are weak to nonexistent, in part because their access to patronage has all but disappeared. They no longer control lucrative franchises, run police and fire departments, set utility rates or build large-scale public works. The demise of local parties and patronage over the last century has undermined the logic and eroded the means of committing voter fraud.

***The demise of local parties and patronage over the last century has undermined the logic and eroded the means of committing voter fraud.***

***The Civil Rights Era and Beyond***

With each significant effort to protect and extend the right to vote, opponents have argued that the expansion of the franchise, whether through federal protections for voting rights or through reduced structural barriers to the franchise, would lead to more voter fraud. The threat of fraud was taken up by congressional opponents of the Voting

Rights Act of 1965; it was raised in the conflict over extending the Act during the first Reagan Administration; and again, in more recent debates over the National Voter Registration Act.<sup>32</sup> It is the very success of these reforms that explains why fraud claims have re-emerged as a principle form of voter intimidation. The victories of the civil rights movement make it no longer easy or acceptable to suppress voting through the use of terrorism or violence, or with a poll tax or a literacy test. Today the intimidation is more subtle.

The dynamics of electoral competition in a two-party plurality system also contribute to the resurrection of the specter of voter fraud. When elections are close, the logic of competition drives opponents to fierce conflict. The winner in a two-party system needs only one vote more than his or her opponent; 51 percent of the votes wins it all, 49 percent wins nothing. Competing parties in

<sup>29</sup> See, for example, Glenn C. Altschuler and Stuart M. Blumin, *Rude Republic: Americans and Their Politics In the Nineteenth Century* (Princeton: Princeton University Press, 2000); and Tracy Campbell, *Deliver the Vote: A History of Election Fraud, an American Political Tradition – 1724-2004* (New York: Carroll & Graf, 2005).

Allen and Kay Warren Allen, "Vote Fraud and Data Validity," in Jerome M. Clubb, William H. Flanigan, and Nancy H. Zingale, eds., *Analyzing Electoral History: A Guide to the Study of American Voter Behavior* (Beverly Hills: Sage Publications, Inc., 1981), 153-194.

<sup>31</sup> See Cunningham (1991), 384, citing Joseph P. Harris, *Election Administration in the United States* (Washington, D.C.: The Brookings Institution, 1934).

<sup>32</sup> For an important account of the movement to reform voter registration laws leading to the passage of the National Voter Registration Act of 1993, see Margaret M. Groarke, *Expanding Access to the Vote: An Analysis of Voter Registration Reform in the United States, 1970-1993* (Ph.D. diss., Department of Political Science, City University of New York, 2000).

close elections fight hard to maximize their chances of winning that 51 percent<sup>33</sup> because the closer the election, the fewer the number of voters that are needed to shift victory to one party or the other. Tight elections produce the biggest pay-off for the smallest shifts in vote share.

Theoretically, parties or campaigns can produce a shift by expanding votes for themselves or constraining votes for their opponents, or even pursuing both practices at the same time. But expanding the vote carries higher risks for incumbents. Elected officials try to preserve the majorities that elect them and are wary of the threat new voters pose. Both parties, therefore, are wary of expansion. Since the success of the Voting Rights Act prohibits them from carving out their majorities in ways that directly violate laws protecting voting rights, they shape and manage their electorates by more subtle means, through the rules that govern the electoral process. Both parties seek to control, enforce and bend electoral rules to their advantage. As the political scientist, E.E. Schattschneider once observed,

In politics as in everything else it makes a great difference whose game we play. The rules of the game determine the requirements for success. . . . and go to the heart of political strategy.<sup>34</sup>

For example, today, Republican party officials and incumbents support restrictive interpretations of the rules governing voter qualifications when they anticipate that tightening access to the vote will hurt their rivals.

They insist that the votes of legitimate, qualified voters are threatened by the votes of ineligible voters, justifying their support for restrictive identification requirements.<sup>35</sup> The Democrats resist these efforts when they think the new rules will threaten their own party base; but if the new rules aren't likely to threaten the base, the Democrats, whose elected officials share the same interest in a stable, predictable electorate as their Republican colleagues, compromise and endorse new restrictions. The Democrats' concession to the inclusion

of an identification requirement for first time voters who register to vote by mail in the Help America Vote Act of 2002 (HAVA), in the face of widespread opposition on the part of voting rights advocates, is a case in point.<sup>36</sup> New HAVA voter identification requirements apply to a diffuse category of new voters whose party loyalties were unknown and therefore in adding this rule at the national level, neither party could claim an uncontested advantage or disadvantage. In the partisan wrangling over the bill, the important questions about the extent of voter fraud and the effectiveness of new rules in combating it were lost.

***Given the particular party and competitive dynamics of the current period, the use of baseless voter fraud allegations for partisan advantage has become the exclusive domain of Republican party activists.***

<sup>33</sup> Or a plurality when the occasional third party candidate is in the race.

<sup>35</sup> U.S. Senate, Republican Policy Committee (2005).

<sup>36</sup> Emily Pierce, "Senate Standoff Over Voter Fraud Provision Threatens to Sink Election Bill," *CQ Monitor News* (February 28, 2002); Karen Foerstel with Emily Pierce, "Hopes for Quick Accord on Election Standards Bill Face Liberals' Objections," *CQ Weekly - Elections* (April 13, 2002), 957; Geoffrey Gray, "Schumer's Identity Politics: Civil Rights Advocates Fight Compromise on Election Reform," *The Village Voice* (April 3-9, 2002), 42; Gabrielle B. Ruda, "Note: Picture Perfect: A Critical Analysis of the Debate on the 2002 Help America Vote Act," *Fordham Urban Law Journal* 31 (November 2003), 235.

In a competitive electoral environment it is easier and safer for the parties to try to stabilize the base and reduce the opposition's support than it is for either to recruit new voters. Given the particular party and competitive dynamics of the current period, the use of baseless voter fraud allegations for partisan advantage has become the exclusive domain of Republican party activists.

Take the American Center for Voting Rights (ACVR). This organization established a presence on the Internet in March 2005, just six days before a Republican-controlled U.S. House Administration Committee hearing on problems in the 2004 Ohio election, and was the only "voting rights" group allowed to testify. Although ACVR claims it is nonpartisan, its founders, leadership, and staff have strong ties to the Republican party.<sup>37</sup> Its report on "Voter Fraud, Intimidation and Suppression in the 2004 Presidential Election," professes to be "the most comprehensive and authoritative review of the facts surrounding allegations of vote fraud, intimidation and suppression made during the 2004 presidential election." It is little more than a compendium of poorly scrutinized newspaper articles sensationalizing election shenanigans allegedly instigated in all but two instances by Democrats.<sup>38</sup> Despite the not so veiled partisanship and absence of credentials, ACVR has achieved remarkable influence advocating for strict, government-issued photo identification requirements and promoting the idea that American elections are riddled with voter fraud. Its leader, attorney and political operative, Mark F. (Thor) Hearne, II, is a serial expert witness before Congress and other government bodies on the need for photo ID. His testimony repeatedly relies for evidence on anecdotes and misleading news reports that grossly overstate the problem of voter fraud.<sup>39</sup>

The systematic use of baseless voter fraud allegations is strategic and in this sense rational, if unethical. In the late nineteenth century when freedmen were swept into electoral politics and where blacks were the majority of the electorate, it was the Democrats who were threatened by a loss of power, and it was the Democratic party that erected new rules they claimed were necessary to respond to the alleged fraud of black voters.

Today, the success of voter registration drives among minorities and low income people in recent years threatens to expand the base of the Democratic party and tip the balance of power away from the Republicans. Therefore, it is not difficult to understand why party operatives might seek to strategically generate enough public support for new restrictions on the vote that will disproportionately hinder opposition voters.<sup>40</sup> These efforts are misleadingly labeled "the electoral integrity" movement because after two hundred years struggling for the vote and winning it from below, ordinary voters are not so easily discredited in the name of democracy. Efforts to do so must appeal to misplaced moral sensibilities like the idea that "integrity" trumps rights. In the end, baseless voter fraud claims are essentially political acts because the contested history of party, race and class in American politics makes them so.

<sup>37</sup> See [bradblog.com](http://bradblog.com) ([www.bradblog.com/ACVR.htm](http://www.bradblog.com/ACVR.htm)) for a collection of articles on the ACVR by Brad Friedman and his colleagues.

<sup>38</sup> Dimitri Vassilaros, "'Study' is Political Fraud," *Pittsburgh Tribune-Review* (August 8, 2005); available online at: [www.pittsburghlive.com/x/pittsburghtrib/s\\_360812.html](http://www.pittsburghlive.com/x/pittsburghtrib/s_360812.html).

<sup>39</sup> Hearne is listed as an "academic advisor" to the Commission on Federal Election Reform (the Carter-Baker Commission), despite his lack of academic credentials. For Hearne's testimony before government bodies, see, Testimony of Mark F. (Thor) Hearne, II, on "Voter Fraud in Ohio in the 2004 Presidential Election," U. S. House of Representatives, Committee on House Administration, March 21, 2005; "Regarding the Continuing Need for Federal Examiners and Observers to Ensure Electoral Integrity," Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Senate Committee on the Judiciary, Subcommittee on the Constitution Civil Rights and Property Rights, July 10, 2006; "Assessing the Conduct of the 2006 Mid-term Elections," Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Elections Assistance Commission, December 7, 2006.

<sup>40</sup> There is strong empirical evidence suggesting restrictive photo identification requirements place a disproportionate burden on low income people and minorities. See, Brennan Center for Justice at NYU School of Law and Spencer Overton, "Response to the Report of the 2005 Commission on Federal Election Reform," 2005; available online at [www.carterbakerdissent.com](http://www.carterbakerdissent.com). Overton served as a commissioner on the 2005 Commission on Federal Election Reform.

# THE USUAL SUSPECTS

## *The Historically Disenfranchised Are Often the Alleged Perpetrators of Voter Fraud*

Fraud allegations typically point the finger at those belonging to the same categories of voters accused of fraud in the past – the marginalized and formerly disenfranchised, urban dwellers, immigrants, blacks, and lower status voters. The targeting is not overt, the language is rarely explicitly racial. Instead, fraud claims tap into older elite associations of political corruption with minorities, big city machine organizations, and the poor. Allegations of voter fraud resonate with the public because they revive a familiar culture of corruption and legends about election fraud that enliven American political history. Today, the alleged culprits are mostly found among those still struggling for full inclusion in American life. This makes them suspect. That they are more likely to identify with one party than the other makes them doubly vulnerable to fraud accusations and to the collateral damage of high stakes competitive partisan politics.

***Fraud claims tap into older elite associations of political corruption with minorities, big city machine organizations, and the poor.***

## **Why Voter Registration Drives Are Vulnerable to Fraud Claims**

Since at least the 1960s, the voter registration drive has played a central role in black politics and broader efforts to engage the electoral participation of low-income groups.<sup>41</sup> The intensity of voter registration activities has waxed and waned over the years, with a recent upsurge in third party voter registration drive activity since the disputed 2000 presidential election. By 2004, approximately 12 million registered voters (or 8.5 percent of all registered voters) had registered as a result of a voter registration drive.<sup>42</sup>

## **How Americans Were Registered To Vote in 2004** (Numbers in Thousands)<sup>43</sup>

	Voters	Percent
Went to a town hall or county/government registration office	34,657	24.5
At a department of motor vehicles agency	27,126	19.2
By mail	17,642	12.5
Filled out form at a registration drive	11,973	8.5
Registered at polling place	9,118	6.4
Filled out a form at a school, hospital, or on campus	8,078	5.7
Through a public assistance agency	1,094	0.8
Other	8,819	6.2
Don't know	22,901	16.2
<b>TOTAL</b>	<b>141,408</b>	<b>100%</b>

Source: U.S. Dept. of Commerce, Bureau of the Census. Current Population Survey, November 2004: Voter Supplement File.

<sup>41</sup> In the 1980s, white Christian conservatives and other middle class groups adopted the registration drive with considerable success, but it remains an iconic expression of black political aspiration.

Washington, DC: U.S. Dept. of Commerce, Bureau of the Census [producer], 2005. Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributor], 2006-01-16; author's calculations.

<sup>43</sup> The table reports method of registration for all registered voters, excluding missing cases. The data are estimates with sampling and non-sampling error, and are weighted by age, sex, race, Hispanic ancestry, and state of residence to partially correct for bias due to under-coverage.

Those registering through drives were more likely to be people of color and of lower income than other registered voters.

**Method of Registration by Race and Income<sup>44</sup>**

Filled Out Form at Registration Drive	
<b>Race</b>	
Whites only, non-Hispanic	8.9
Blacks only, non-Hispanic	15.2
Hispanic (all races)	15.5
Asian only, non-Hispanic	12.7
Others	10.1
<b>Total Annual Family Income</b>	
Less than \$15,000	11.6
\$15,000 or more	10.0

Source: U.S. Dept. of Commerce, Bureau of the Census. Current Population Survey, November 2004: Voter Supplement File.

The number of low income drive registrants is three times the number of low income voters registering at public assistance agencies mandated by the National Voter Registration Act of 1993 (NVRA) to provide registration opportunities. Just four percent of registered voters with total annual family income below \$15,000 (approximately 470,000 people) were registered to vote through a public assistance agency. This compares to approximately 1,328,000 low income voters, or 11.6 percent of those with less than \$15,000 in annual family income, who said they were registered through a registration drive.<sup>45</sup> It is clear that despite the intent of NVRA to open registration opportunities to low income Americans, thousands of eligible citizens would be left out of the electoral process were it not for the third party groups who register and encourage them to vote.

Competitive or high interest elections like those of the last six years increase incentives to mobilize voters, including the recruitment of new voters – not only to the parties, but to all the other groups who believe they have a stake in the outcome. The use of thousands of volunteers and temporary workers in these drives contributes to the potential for mistakes and duplication in the registration process. This is one of the consequences of essentially “outsourcing” voter registration to the private sector rather than placing the burden of registration on the state as is done in many of the European democracies.<sup>46</sup> If voter registration were mandatory like paying taxes, voter registration drives would not be necessary.

<sup>44</sup> The table compares only those registered voters who could identify their method of registration. Data on income are limited to people living in families. Family income is the combined income of all family members over the previous year and includes money from jobs, net income from business, farm or rent, pensions, dividends, interest, Social Security payments and any other money income received by family members who are 15 years of age or older.

<sup>45</sup> U.S. Dept. of Commerce (2005); author’s calculations. For an analysis of the recent drop off in implementation of the agency-based requirements of the NVRA, see *Ten Years Later, A Promise Unfulfilled: The National Voter Registration Act in Public Assistance Agencies, 1995-2005*, a report compiled by Dēmos, A Network for Ideas and Action; ACORN; and Project Vote (July 2005); available online at [http://projectvote.org/fileadmin/ProjectVote/pdfs/Tens\\_Years\\_Later\\_A\\_Promise\\_Unfulfilled.pdf](http://projectvote.org/fileadmin/ProjectVote/pdfs/Tens_Years_Later_A_Promise_Unfulfilled.pdf).

<sup>46</sup> The National Commission on Election Reform Task Force on the Federal Election System notes that, “the registration laws in force throughout the United States are among the world’s most demanding...[and are] one reason why voter turnout in the United States is near the bottom of the developed world.” National Election Commission, *Report of the Task Force on the Federal Election System*, chapter 2 “Voter Registration,” (July 2001), 3; available online at [www.tcf.org/Publications/ElectionReform/NCFER/hansen\\_chap2\\_voter.pdf](http://www.tcf.org/Publications/ElectionReform/NCFER/hansen_chap2_voter.pdf).

With the upsurge in voter registration activity has come more media attention to the handful of cases in which organizations have been accused of submitting fraudulent registration applications to local elections officials. No amount of fraud in the registration process is acceptable, but the accusations that voter fraud "is breaking out all over"<sup>47</sup> as a result of "a coordinated effort by members of some organizations to rig the electoral system through voter registration fraud" that put "thousands of fictional voters"<sup>48</sup> on the rolls are unsupported by any credible evidence anyone has been able to bring to bear. In fact, the suspicions about a vast "left-wing" or "Liberal Democrat-sponsored" conspiracy to commit voter registration fraud border on the paranoid.<sup>49</sup>

According to available government data, between October 2002 and September 2005, the federal government prosecuted just 33 people for various misdemeanor and felony crimes related to any form of election fraud that could have involved voter registration.<sup>50</sup> All but two people indicted were prosecuted for falsifying information about *their own* eligibility to vote, including: 20 people in four states who were prosecuted for registering or voting but who were ineligible under state law because they lacked U.S. citizenship; and ten people who voted in the 2004 presidential election in Milwaukee who were prosecuted for falsely certifying that they were eligible to vote when they were still under state supervision for felony convictions.<sup>51</sup> Ten of the 33 – five of the non-citizen cases and five of the felon cases – were either acquitted of the charges against them or had their indictments dismissed.<sup>52</sup> At least 19 of the 23 people convicted were alleged to have voted illegally because they were ineligible to vote, but notably, these people registered to vote and voted using their real names, hardly acts of conspiracy or of criminals trying to get away with committing fraud. Only two people were prosecuted for crimes related to fabricated voter registration applications for other people. One pleaded guilty to making false statements to a grand jury in connection with 11 fraudulent registration forms. The other, a St. Martinsville, Louisiana city councilwoman running in a hotly contested race for re-election in 2002, pleaded guilty to conspiring to submit false address

***Between October 2002 and September 2005, the federal government prosecuted just 33 people for various misdemeanor and felony crimes related to any form of election fraud that could have involved voter registration.***

<sup>49</sup> See, for example, the postings of "Dean," on [democratvotefraud.blogspot.com](http://democratvotefraud.blogspot.com) (accessed in October 2006). This blog collects dozens of news articles from the 2004 election, most of which report allegations of campaign dirty tricks and voter registration fraud, and discuss protests against new "anti-fraud" measures adopted in some states like Ohio, all perpetrated by Democrats or their supporters. Under the title, "Liberal Democrat Vote Fraud," Dean explains, "We all saw the results of the 2000 American election. This time, I'm personally going to fight back in the only way that I can, with a blog that documents as many news reports about Democrat fraud as I can."

<sup>50</sup> U.S. Department of Justice, Criminal Division, Public Integrity Section, "Election Fraud Prosecutions and Convictions; Ballot Access and Voting Integrity Initiative, October 2002 – September 2005" (n.d.); available online at <http://cha.house.gov/media/pdfs/DOJdoc.pdf>. Several of these people technically were not charged with voter registration fraud, but with making false statements to government agencies (i.e., a driver's license bureau or the INS) regarding their citizenship status or eligibility to vote. This number includes cases of illegal voting due to ineligibility, assuming they must have involved registration fraud, even if it wasn't charged.

<sup>51</sup> One of those convicted, Kimberly Prude, worked as an election inspector in Milwaukee. As of February 2006, Prude was appealing her conviction. See, *United States of America v. Kimberly E. Prude*, "Criminal Complaint," United States District Court, Eastern District of Wisconsin, Case No. 2:05-CR-00162-RTR (June 22, 2005).

<sup>52</sup> In the ten cases of alleged illegal felon voting in Milwaukee, one defendant was acquitted at trial and four had their charges dismissed. Among the dismissals evidence was presented which suggested defendants did not knowingly commit fraud.

information on two voter registration cards for people who did not live in her district. Those people voted to help the councilwoman win re-election by a slim margin.<sup>53</sup>

### Federal Prosecutions of Voter Registration Fraud 2002 – 2005

VOTER REGISTRATION	DISPOSITION				
	Dismissed	Acquitted	Pleaded Guilty	Convicted	Total
<b>False claim of eligibility</b>					
Non-citizen	4	1	3	13	21
Felon	4	1	3	2	10
<b>False statements to grand jury about (1) voter registration forgeries</b>					
Conspiracy to submit false information on (2) voter registration applications			1		1
<b>TOTAL</b>	<b>8</b>	<b>2</b>	<b>8</b>	<b>15</b>	<b>33</b>

\* All but two of those charged with making false claims about their eligibility to register (two non-citizens who were convicted) were also charged with casting a false or fraudulent ballot, as reported above.

Source: U. S. Department of Justice, Criminal Division, Public Integrity Section, *Election Fraud Prosecutions & Convictions, Ballot Access & Voting Integrity Initiative, October 2002 – September 2005* (n.d).

Registration drives in recent years have been more effective in registering low income voters than the agency-based requirements of the NVRA. Successful voter drives hold the potential for adding significant new numbers of voters to the rolls and threatening the balance of power between the two parties. Their effectiveness has made them a target for fraud allegations. Their own sporadic failings in the production of duplicate or improperly filled out registration cards, sloppy oversight, poor quality control, and occasional fraud have only fueled the allegations. Such problems are inevitable as long as voter registration is not mandated or universal.

<sup>53</sup> Press Release, "St. Martinsville Woman Sentenced in Federal Court for Voter Fraud Charges," U.S. Attorney's Office, Western District of Louisiana (January 18, 2006); available online at: [www.usdoj.gov/usao/law/news/wd/20060118c.html](http://www.usdoj.gov/usao/law/news/wd/20060118c.html).

## CASE STUDIES

---

The following case studies are illustrative of the politics of voter fraud claims. They do not tell us anything about the incidence of voter fraud in American elections today. That question is central and addressed above. It has always been difficult to measure fraud or even specify it, and it is important to stress that until better evidence comes to light, we will not be able to compile comprehensive statistics on levels of cheating by voters. Researchers are hampered in studying voter fraud because government agencies fail to track it and are often unresponsive to information requests. We can, however, make educated guesses from the available evidence, and what studies there are suggest voters rarely commit fraud. It is only in the public interest that we learn from real cases of voter fraud so that we can better understand where our electoral systems are truly vulnerable. Spurious cases of fraud like those discussed here are equally instructive because they expose the shrewd and partisan manipulation that makes real election reform so difficult.

The case studies presented below demonstrate the ways these partisan interests, database and clerical errors and incompetent electoral administration are sometimes exploited to exaggerate the problem of voter fraud. The intent of the exaggeration is to intimidate the general public and even law makers into believing that American elections face a security threat from a rising tide of deceitful and criminal voters. Unfortunately, in numerous places election administration is in crisis, and in general, faces much larger challenges from changing technology, inadequate resources, poor staffing and training, and especially, partisan manipulation. These are real issues deserving of attention, good ideas, resources and a democratic spirit. They won't be adequately addressed as long as the voter fraud hoax confuses and distracts us from confronting them.

### *ACORN and the Mac Stuart Affair*

One important example of how the politics of fraud claims are used to manipulate the public about the threat of voter fraud is the political pillorying of ACORN for alleged wide scale registration fraud in the 2004 and 2006 election cycles.

ACORN (Association of Community Organizations for Reform Now) is the largest community-based organization of low and moderate income people in the U.S. It organizes locally and has developed ballot campaigns for a range of issues such as campaign finance reform and raising the minimum wage. Opponents of ACORN's minimum wage ballot initiative program deployed allegations of voter registration fraud, which then generated official investigations, media coverage and litigation, as a strategy to undermine ACORN's ability to qualify and pass referenda in several states.<sup>54</sup> One of these cases involved a disgruntled former employee named Mac Stuart who for a while became a cause célèbre of ACORN's enemies and the pundits who fuel the fraud paranoia. The Mac Stuart affair is instructive because it highlights how politics construct the fraud debate.

In November 2003, Mac Stuart was hired by Florida ACORN and put to work as a petition gatherer collecting signatures supporting the placement of a Florida Minimum Wage Amendment on the

<sup>54</sup> "ACORN Defeats Anti-Voter Legal Attacks; Group's Voter Registration Efforts Vindicated as Baseless Lawsuits Collapse," *Common Dreams Progressive Newswire* (December 14, 2005); Joni James, "Voter Fraud Charges Collapse," *St. Petersburg Times* (December 15, 2005).

2004 ballot. When Stuart was fired for suspicion of his involvement in an illegal check cashing scheme a few months later, he filed a Florida whistle blower lawsuit against ACORN claiming the organization engaged in a variety of illegal practices. He was represented by partisan attorneys at Rothstein, Rosenfeldt, Adler, a Fort Lauderdale law firm, and spoke secretly with an official at the Florida Chamber of Commerce which was in the midst of opposing ACORN's efforts to raise the state's minimum wage. Stuart provided his attorneys with 179 applications, many of them for Republican registrants, he claimed had been collected and withheld by ACORN.<sup>55</sup>

In the course of petitioning for signatures, ACORN workers conducted voter registration activities to ascertain whether signatories were registered to vote. Stuart's lawsuit claimed that petitioners were paid an additional \$2.00 for each completed registration card they collected; that ACORN illegally copied the voter registration cards its workers collected and sold its lists for a profit; that ACORN committed fraud by failing to deliver registration cards for people who designated "Republican" as their party affiliation, and otherwise collected cards from ineligible individuals such as convicted felons. Stuart maintained that in July 2004, he refused to participate in these illegal activities and was fired in retaliation under the pretext that he had attempted to cash another person's check.<sup>56</sup>

His lawyers filed a second suit against ACORN on behalf of 11 people whose names were among the allegedly withheld voter registration applications Stuart had provided.<sup>57</sup> Rothstein, Rosenfeldt, Adler attorneys claimed ACORN had deprived their clients of their constitutional right to vote and committed fraud against them.

After Stuart was fired, he held a news conference and contacted television and print news reporters claiming that "[t]here was a lot of fraud committed" by ACORN, asserting the organization knowingly submitted thousands of invalid registration cards while storing away cards for people designating their party affiliation as Republican. Stuart's allegations were immediately picked up by news organizations such as the *Washington Times*, the *Florida Times-Union*, and other Florida newspapers, and began to spread on rightwing Internet blogs. The Florida Department of Law Enforcement took the unusual step of announcing an investigation into ACORN.<sup>58</sup> In fact, for a while, Stuart's assertions were taken as fact and repeatedly reported as evidence that ACORN routinely engaged in fraud to promote its "radical political agenda."<sup>59</sup> That is, until the real facts about Stuart came to light and his case collapsed in court.

### ***Fraud charges collapse but the damage continues***

ACORN denied, and Stuart failed to prove, that canvassers were paid by the card to collect voter registration applications. ACORN's copying of voter registration applications was an element of their quality control program and well within the bounds of Florida law.<sup>60</sup> Finally, ACORN denied, and Stuart failed to produce evidence, that the organization prejudiced Republican voter registration applicants or misleadingly solicited registration cards from ineligible applicants. ACORN countersued Stuart for defamation and libel. On December 6, 2005, the matter of

<sup>55</sup> Brittany Wallman and Alva James-Johnson, "Filled-In Voter Forms Surface," *South Florida Sun-Sentinel* (October 27, 2004); Jeremy Milarsky, "Ex-Worker Sues Activist Group," *South Florida Sun-Sentinel* (October 21, 2004).

<sup>58</sup> News Release, "FDLE Investigates Statewide Voter Fraud," Florida Department of Law Enforcement (October 21, 2004).

<sup>59</sup> Quoting Mike Flynn, Director of Legislative Affairs for the Employment Policies Institute; see Press Release, "ACORN's Voter Fraud in Ohio is Part of Larger Pattern," Employment Policies Institute (August 11, 2006). See, also, Meghan Clyne, "ACORN and the Money Tree," *National Review Online* (October 31, 2004); and American Center for Voting Rights, "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," ACVR Legislative Fund Report (August 2, 2005), 41-44; available online at [www.ac4vr.com/reports/072005/080205report.pdf](http://www.ac4vr.com/reports/072005/080205report.pdf).

<sup>60</sup> Nothing in Florida's election code prohibits private, third-party voter registration organizations from photocopying the voter registration applications they collect before submitting them to local elections officials.

*Mac Stuart v. ACORN* was dismissed with prejudice by a federal judge, exonerating ACORN of any and all wrongdoing.<sup>61</sup> ACORN prevailed in their counterclaims and won a judgment of defamation against Stuart.

ACORN also prevailed in the second Rothstein, Rosenfeldt, Adler suit. Shortly after it was filed, nine of the 11 plaintiffs asked to be dismissed from the case. As ACORN's lawyers deposed the remaining two plaintiffs it became clear that their lawyers had not asked them if they were qualified to vote, if they had completed the applications Stuart had given the attorneys or whether the plaintiffs were in fact Republicans. One of the two was not qualified to vote, neither remembered completing the application used as the basis for the complaint and both said that, inconsistent with their applications, they were not Republicans and never would have checked off that they were. Stuart was inconsistent in his testimony in how he obtained the applications in the first place.<sup>62</sup> This case, too, was dismissed with prejudice.

The Florida Department of Law Enforcement investigation found no evidence of illegal or fraudulent activity by ACORN. A public records request by Project Vote asking all Florida counties for any documents related to voter fraud elicited just three alleged cases of illegal activity, only one of which involved temporary ACORN workers.<sup>63</sup>

The problem is that the end of this story has received considerably less media attention than the unfounded claims of organized voter fraud on the part of ACORN. Opponents of ACORN continue to spread false rumors that the organization engages in voter fraud. For example, the Employment Policies Institute (EPI) issues dozens of press releases and "reports" attacking ACORN every year. EPI is a non-profit organization that in 2004 paid over \$600,000 in "management" fees to its executive director's publicity firm which lobbies on behalf of the hotel, restaurant, alcoholic beverages and tobacco industries.<sup>64</sup> Those industries are opposed to ACORN's efforts to raise the minimum wage in Florida and elsewhere. As late as July 2006, months after ACORN was fully vindicated in court, EPI was still claiming they engaged in a "pattern and practice" of voter fraud, citing the Mac Stuart affair as more evidence of ACORN's "widespread practice of fraud."<sup>65</sup>

### ***Voter fraud allegations used to restrict voter registration programs***

With ACORN under a cloud, Florida passed a law that carried stiff penalties for organizations failing to turn in voter registration applications later than ten days after they were collected. The law's reporting requirements were so draconian the League of Women Voters ended 77 years of voter registration activity in the state because it feared it could not comply and would be bankrupted if there were problems with just 16 registration forms collected by its volunteers. A federal judge later blocked the implementation of the law as unconstitutional.<sup>66</sup>

<sup>62</sup> Telephone interview with Brian Mellor, Senior Counsel, Project Vote (April 13, 2006).

<sup>63</sup> Mellor interview (2006).

<sup>64</sup> Employment Policies Institute, "2004 Form 990, Return of Organization Exempt From Income Tax," U.S. Department of the Treasury, Internal Revenue Service, Schedule A.

<sup>65</sup> A "pattern and practice" of wrongdoing evokes conspiracy and as a legal term refers to the crime of racketeering. See, Employment Policies Institute, *Rotten ACORN: America's Bad Seed* (July 2006), 18-19; available online at [www.rottenacorn.com/downloads/060728\\_badSeed.pdf](http://www.rottenacorn.com/downloads/060728_badSeed.pdf). In fact, ACORN, along with America Coming Together, the NAACP Voter Fund, and the Ohio AFL-CIO were defendants in an Ohio lawsuit that alleged the groups conspired to engage in a series of "predicate" or related acts of forgery, document tampering and drug trafficking in order to produce fraudulent voter registration cards. See, *Rubick v. America Coming Together, et al.*, State of Ohio, County of Wood, Court of Common Pleas, Case No. 04-CV650 (2004). Plaintiffs' complaint argued each fraudulent card submitted represented a predicate act. Under the federal Racketeer Influenced and Corrupt Organizations Act or RICO, a person or group can be charged with racketeering by a U.S. Attorney if they commit any two of 35 crimes (27 federal crimes and eight state crimes) within a 10-year period and the prosecutor believes those charged committed the crimes with similar purpose or results.

<sup>66</sup> *League of Women Voters of Florida v. Cobb*, U.S. District Court, Southern District of Florida, "Order Granting in Part and Denying in Part Plaintiff's Motion for Preliminary Injunction and Granting in Part and Denying in Part Defendant's Motion to

## The Perils of List Matching

A common source of fraud claims is a list matching exercise gone wrong. The ready availability of high powered computing capacity and an ever expanding range of public records databases, have created a cottage industry of software programs and list management consultants ready to match lists for hire.

When databases contain errors or compile data differently, matching them against one another can cause a high degree of what statisticians call "false positive" errors or matches that are not really matches. A prime example is the infamous felon purge list compiled by a private firm for the Florida Secretary of State's office in 2000. That list joined data on convicted felons with the voter registration rolls using rules that matched only the first four letters of the first name, 90 percent of the last name and an approximate date of birth.<sup>67</sup> The result was a highly inaccurate list of people whom the Secretary of State wanted to prevent from voting.<sup>68</sup>

## Voting in Connecticut and beyond

In October 2002, the Republican National Committee (RNC) claimed that in the course of "updating" its voter files, it discovered over 722,000 people nationwide were registered to vote in more than one state, and that at least 600 of these had voted more than once in a single election. In Connecticut, the Secretary of State was alarmed. The RNC released a report that said 7,700 registered voters in Connecticut were also on the rolls in other states and that 54 of them had voted more than once in the 2000 election. Secretary Susan Bysiewicz, a Democrat, asked the RNC for the names of the duplicate registrants and voters. "I am surprised by the numbers," she said, "it sounds like a lot. We have two million (registered) voters, so I suppose it's possible; but in four years we haven't prosecuted one instance of voter fraud."<sup>69</sup>

At first the RNC refused to release the names and criticized Bysiewicz for not finding the problem first. When they finally turned over the names of the 54 alleged double voters, Bysiewicz found their claims baseless. Her office conducted a week long investigation of every suspect voter produced by the RNC and found that 29 had never voted in Connecticut, but did vote in another state; 18 voted in Connecticut, but not in the other state named in the report; four names had different birth dates than those on the RNC list, and three were turned over to criminal investigators because out-of-state data could not be obtained for verification.<sup>70</sup>

<sup>68</sup> The U.S. Civil Rights Commission conducted an investigation into the 2000 election in Florida and concluded, "Many people appear on the [felon purge] list incorrectly." One in seven people on the felon purge list supplied to the supervisor of the Miami-Dade election office was erroneously listed and therefore put at risk of disenfranchisement. These people were disproportionately African American. See, U.S. Civil Rights Commission, *Voting Irregularities in Florida During the 2000 Presidential Election* (2001), chapter 1. See also a disclaimer for the inaccuracy of the felon purge list posted on ChoicePoint's website ("Choicepoint's Mythical Role in Elections Past and Present," posted August 7, 2006; available online at [www.choicepoint.com/news/statement\\_08072006.html](http://www.choicepoint.com/news/statement_08072006.html)). ChoicePoint is the parent company of Database Technologies (DBT), the firm hired for the period 1998 to 2000 by the Florida Division of Elections to create its voter exception list. ChoicePoint claims, "DBT Online was not required to provide a list of exact name matches. Rather, the matching logic only required a 90 percent name match, which produced "false positives" or partial matches of the data. Moreover, the Division of Elections required that DBT Online perform 'nickname matches' for first names and to 'make it go both ways.' Thus, the name Deborah Ann would also match the name Ann Deborah. At a meeting in early 1999, the supervisors of elections expressed a preference for exact matches on the list as opposed to a 'fairly broad and encompassing' collection of names. DBT Online advised the Division of Elections that it could produce a list with exact matches. Despite this, the Division of Elections nevertheless opted to cast a wide net for the exclusion lists."

### ***Double dipping in New Jersey***

A few years later, in time for the next federal election cycle, the New Jersey state Republican party (RSC) claimed it had researched voter registration files in a number of states and found evidence of multiple voting. In September 2005, the state party sent a stern letter to New Jersey Attorney General Peter Harvey threatening a lawsuit for failing to enforce state election laws governing the voter registration rolls.<sup>71</sup>

The basis for the RSC claims was their own "exhaustive investigation" of voter files from New Jersey's 21 counties, matched internally county to county on first name, last name and date of birth, as well as against the voter registration files of five other states, New York, Pennsylvania, Florida, North Carolina and South Carolina. In addition, the RSC matched the New Jersey county files against lists of deceased persons from state and federal databases and other commercially available lists. Based on their analysis, the RSC said it found evidence of widespread multiple voting in the November 2004 general election – 4,397 people alleged to have voted more than once in New Jersey, and 6,572 people who "appear to have" voted in New Jersey and another state. Moreover, the RSC claimed that 4,755 dead people had voted and warned the problem could be even worse since the state's rolls contained tens of thousands of duplicate records and the names of some well known felons in the state.

There is little doubt that New Jersey's county voter registration lists contained registration records for people who moved away or died. The existence of so-called "deadwood" on voter registration records across the country is well-known. But the presence of deadwood is not in and of itself evidence of voter fraud.

A subsequent more thorough analysis of the data files the RSC supplied to the state suggests major problems with the accuracy of the RSC analysis and therefore the veracity of their claims. The Brennan Center for Justice working with Dr. Michael McDonald, an elections expert at George Mason University, concluded that "these lists simply do not prove what they purport to prove."<sup>72</sup> Their report uncovered methodological errors in the RSC's list matching techniques, such as omitting middle initials and suffixes like "Jr.," which resulted in the listing of duplicate records for the same person then counted by the RSC as voting twice (from the same address). Mismatches of different people were presumed to be the same person, and again counted as voting twice. Statistical and database experts know that relying solely on non-unique identifiers such as name and date of birth to match records produces a high rate of false positives.<sup>73</sup> The Brennan Center/McDonald detailed analysis of the alleged 4,397 double votes recorded in the New Jersey county voter files accounted for them all as the likely product of false positives, errors in the data, duplicate records for the same person, and the statistical likelihood that two people will share the same name and birth date.

### ***Voting from the grave in Detroit***

Yet one more example of the damage flawed list matching efforts can inflict comes from an oft-cited news item appearing in the *Detroit News* in February 2006. The article, written by Lisa M. Collins, was headlined, "In Mich. Even Dead Vote," and continued, "From Holland to Detroit,

<sup>71</sup> Letter from Mark D. Sheridan to Hon. Peter C. Harvey, dated September 15, 2005. Copy in author's possession. Election administration is decentralized to the county level in New Jersey, with the Attorney General serving as the state's chief elections officer.

<sup>73</sup> Ted Selker and Alexandre Buer, "Voter Removal From Registration List Based on Name Matching Is Unreliable," Voting Technology Project – MIT Media Laboratory, October 28, 2004; available online at <http://72.14.209.104/search?q=cache:diE40vkjeLoj:www.vote.caltech.edu/reports/purging-vrdb.pdf+&hl=en&gl=us&ct=clnk&cd=1>.

votes were cast by 132 dead people; Detroit's voting records are riddled with inaccuracies, casting doubt on elections' integrity."<sup>74</sup> The allegations of voting from the grave in Detroit, a poor and majority black city, are repeatedly cited by conservative bloggers in their litany of purported evidence that voter fraud is rampant in America.

But a full reading of the article itself indicates that the News did not attribute these irregularities to voter fraud. Instead, they suggested the irregularities were more likely due to clerical errors.<sup>75</sup> Influential Republican political operative, Mark F. (Thor) Hearne, paid counsel to the Bush-Cheney 2004 re-election campaign and a member of the U.S. Elections Assistance Committee's Voter Fraud – Voter Intimidation Working Group, as well as Missouri's HAVA Advisory Commission, nevertheless repeated the misleading allegations of dead people voting in Detroit when he testified before a U.S. Senate panel in July 2006.<sup>76</sup> Versions of his testimony have appeared as a feature article in the magazine of the Bar Association of Metropolitan St. Louis,<sup>77</sup> and again as testimony given to the U.S. Elections Assistance Commission in December 2006.<sup>78</sup>

This time the list matching was not performed by an elected official and presidential campaign co-chair, as it was in Florida, or a political party, as it was in the Connecticut and New Jersey examples. It was done by a newspaper which presented no assurances that it had the kind of expertise in computer programming, statistics, or records management required to make an accurate evaluation.<sup>79</sup>

On March 5, 2006, the News printed a letter from Kelly Chesney, the Communications Director for the Michigan's Republican Secretary of State, which challenged the implication that dead people were voting in Michigan. Chesney reported that an analysis of the 132 alleged deceased voters found that this was the number of absentee ballots mailed out to voters who subsequently died in the weeks before Election Day. Of the 132 absentee ballots, she said "97 were never returned, and 27 were voted and returned prior to the voters' deaths."<sup>80</sup> This substantial correction to the implications of voter fraud in Michigan has been roundly ignored by activists who continue to cite what is now an out-dated news item reporting erroneous information.

<sup>74</sup> Lisa M. Collins, "In Mich. Even Dead Vote," *The Detroit News* (February 6, 2006).

<sup>75</sup> "Clerical errors [in the Michigan voter file are] so pervasive that it is difficult to determine in many instances who actually voted;" and citing Mark Grebner, the list vendor and political consultant upon whose research the News relied, "...Grebner says he's never found evidence of organized fraud in Detroit." See, Collins (2006).

<sup>76</sup> Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Senate Committee on the Judiciary, Subcommittee on the Constitution, Civil Rights and Property Rights, "Regarding the Continuing Need for Federal Examiners and Observers to Ensure Electoral Integrity," July 10, 2006.

<sup>77</sup> Mark F. (Thor) Hearne, II, "The Missouri Voter's Protection Act: Real Election Reform for All Missouri Voters," *St. Louis Lawyer*, June, 2006; available online at [www.bamsl.org/members/stlawyer/archive/06/june06.html#feature](http://www.bamsl.org/members/stlawyer/archive/06/june06.html#feature).

<sup>78</sup> Testimony of Mark F. (Thor) Hearne, II, Before the U.S. Elections Assistance Commission, "Assessing the Conduct of the 2006 Mid-term Elections," December 7, 2006.

<sup>79</sup> In fact, the News admitted in the article that they "did not review every vote cast, but instead targeted voter records based on several factors, such as the voter's birth year or voting history. Though limited and somewhat random searches were done, each search found voting records in error or highlighted names of voters who in fact could not have voted." This is hardly an adequate methodology.

<sup>80</sup> Editorial and Opinions, Special Letter, "Claims That the 'Dead' Voted Were Wrong," *Detroit News* (March 5, 2006).

## **St. Louis: More Bad Lists, Even Worse Election Administration**

St. Louis, another majority black city with budget problems, presents a case study for how the mishandling of voter registration and elections procedures can be misperceived as fraud.

### **Whose mess on Election Day 2000?**

There is little doubt that in the past St. Louis experienced election fraud and public corruption. St. Louis politics were long organized by political machines and fraud has a storied past which for some, at least, condemns the politics of the present.<sup>81</sup> In 2000, the historical memory of fraudulent elections, bribery, conspiracies, ballot tampering, and voting from the grave colored the rush to judgment when administrative mismanagement and shockingly poor record-keeping combined to produce troubling election irregularities.<sup>82</sup> Before the irregularities could be sorted out, they were seized upon by partisans. One of them, Missouri's senior Republican senator, Kit Bond, claimed the problems were evidence of a [Democratic party-driven] "major criminal enterprise designed to defraud voters," instead of what an extensive federal probe later determined to them to be – procedural incompetence and official failure to abide by the law.<sup>83</sup>

For many voters attempting to cast ballots in the 2000 presidential election, Election Day in St. Louis was a chaotic mess. Many long-time voters were told that they were not registered to vote when they showed up at polling sites where they had cast ballots in the past. To re-establish their legitimacy, many of these rejected voters were told to go down to the St. Louis Election Board's headquarters at 300 North Tucker Boulevard and cast a ballot there since the phone lines to the Board were jammed and election judges staffing the polling sites were unable to establish whether such voters' names had been moved to an "inactive" list of registered voters.<sup>84</sup>

### **The illegal "Inactive" list**

It was this controversial inactive list and the failure of the St. Louis Elections Board to comply with the NVRA that later formed the basis for a federal lawsuit alleging the Board "denied or significantly impaired the voting rights" of thousands of city voters before the election.<sup>85</sup>

Missouri law requires bi-partisan control of election administration. Local boards of election have equal representation of Democrats and Republicans as do positions staffed by the boards. The St. Louis Board has had problems maintaining accurate voter registration rolls, and leading up to the 2000 election, there were still no clear rules for specifying when a voter should be dropped from the rolls.<sup>86</sup>

<sup>81</sup> Secretary of State Matt Blunt, *Mandate For Reform: Election Turmoil in St. Louis, November 7, 2000* (July 24, 2001); available online at (herein cited as 'Blunt Report'), 39-46.

<sup>82</sup> For an excellent example of the rush to judgement, see chapter four, 'Politically Active after Death,' in John Fund's *Stealing Elections: How Voter Fraud Threatens Our Democracy* (San Francisco: Encounter Books, 2004).

<sup>83</sup> For a tale of Depression-era ballot tampering linked to public corruption and waterfront development schemes in St. Louis, see chapter 7 "The Real Foundations of the Gateway Arch," in Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition, 1742-2004* (New York: Carroll & Graf Publishers, 2005). See also, Bruce Rushton, "Dead Man Voting," *Riverfront Times* (April 24, 2002). For Sen. Bond's remarks, see Carolyn Tuft, "Bond Wants Federal Investigation of Problems at City Polls; He Accuses Democrats of 'Criminal Enterprise' in Keeping Polls Open Late; Democrats Criticize Election Board," *St. Louis Post-Dispatch* (November 10, 2000), A1. According to the *Riverfront Times*, "In his letters to...two federal agencies, Bond wrote...of a 'deliberate scheme' planned in advance so unregistered voters could vote illegally: 'There is reason to believe that collusion existed to commit voter fraud and voter fraud occurred on a wide scale throughout the city of St. Louis.'" See, Safir Ahmed, "Slimin' the City: When It Comes to Election Day Problems in St. Louis, the Politicians' Rhetoric Doesn't Match the Reality," *Riverfront Times* (November 15, 2000).

<sup>86</sup> Office of the State Auditor of Missouri, Board of Election Commissioners, City of St. Louis, Missouri, Report No. 2004-40 (May

Between 1994 and 2000, the Board conducted a series of mail canvasses of its voter registration rolls, none of which complied with the requirements of the NVRA.<sup>87</sup> Based on these improper canvasses, the Board removed more than 50,000 names of voters who had been on the rolls in 1996, and “made no effort to notify inactive voters that their registration status had changed, that their names would not appear on the voter registration lists provided to election judges in each voting precinct, or that they would face additional administrative steps on election day before they would be permitted to vote.”<sup>88</sup> This number represented roughly 40 percent of the total number of votes cast in St. Louis in the 1996 election, and was about twice the national and state averages for the proportion of inactive voters on the rolls.<sup>89</sup> Moreover, for all elections it conducted after 1994, the Board failed to provide precinct election judges a list of any of the voters it had designated as “inactive.” This failure created mass confusion at polling sites when many legitimate voters showed up to vote and were told they were no longer registered.<sup>90</sup>

In the days leading to the November 7, 2000, election, the unprecedented administrative reclassification of thousands of active voter registration records in the overwhelmingly Democratic city was seen by Democrats, including national party officials with the Gore-Lieberman campaign, as an illegitimate Republican party-sponsored effort to restrict Democratic voting. When he spoke at a Gore-Lieberman campaign event, Democratic Congressional hopeful William Lacy Clay, Jr., told supporters not to “let anyone turn you away from the polls,” and warned, “If it requires leaving the polls open a little longer, we’re going to get a court order to do it.”<sup>91</sup>

### **The showdown**

In fact, this is exactly what happened. Voters stood in line for hours. First, they had to check in with precinct workers, then, for those whose names were no longer on the precinct voter registration lists, they stood in another line to plead their case before their precinct’s election judge.<sup>92</sup> When many of these officials were unable to confirm their registration status with headquarters because they couldn’t get through to elections officials at the Board, they sent voters down to the Board’s office to try to resolve the problems on their own. According to news reports, “It made for a wild hour at Board’s downtown office,

where hundreds of voters turned away from the polls because they were not registered or had problems voting filled the lobby throughout the day. By early evening, the lobby was shoulder to shoulder with people who wanted to vote.”<sup>93</sup>

In the afternoon, the Democrats and the Gore-Lieberman campaign filed suit in a state circuit court requesting the polls remain open for an additional three hours to accommodate voters victimized by the inaccessible and inaccurate inactive list.

26, 2004), 10; (herein cited as ‘Mo. State Auditor’s Report’).

<sup>87</sup> Section 8(d)(2) of 42 U.S.C. 1973gg-6(d). See, St. Louis Election Board Consent Order, 3.

<sup>88</sup> St. Louis Election Board Consent Order, 4.

<sup>89</sup> In 1996, 122,003 votes were cast in the general election in the City of St. Louis. In 2002, according to records from the Federal Election Commission, both nationwide and for the state of Missouri, 12 percent of all voters on the rolls were classified as “inactive,” compared to 22 percent in the City of St. Louis. See, Mo. State Auditor’s Report, 15.

<sup>90</sup> St. Louis Election Board Consent Order, 4.

<sup>91</sup> David Scott, “Ashcroft, Talent Decide Against Pursuing St. Louis Voter Fraud Claims,” *Associated Press* (November 8, 2000).

<sup>92</sup> The State Auditor found that the St. Louis Election Board frequently failed to secure the minimum number of precinct-level election judges as required by state law. Section 115.081, RSMo 2000, mandates four election judges, two from each major political party, for each polling place at each primary and general election, or about 1,600 election judges per major election. The Auditor found that the Board has not been able to attract more than 1,200 such judges in recent elections. See, Mo. State Auditor’s Report, 24.

<sup>93</sup> Scott (2000); see also, Ahmed (2000).

St. Louis Circuit Judge Evelyn Baker complied, but her order was overturned within 45 minutes of the regular poll closing time (7 PM) by a three-judge appeals panel. The St. Louis City Board of Elections successfully argued she lacked jurisdiction to change state law. Elections officials estimated that only about 100 extra people had been permitted to vote by Judge Baker's order. Republican officials charged there may have been a "preconceived plan" to misuse the judicial process to keep the polls open longer than their statutorily mandated closing time, as well as an "organized campaign" (by the Democrats) to abuse the procedure by which voters obtain court orders to vote, resulting in voter fraud and the casting of hundreds of illegal votes.<sup>94</sup>

In a 51-page report, Republican Secretary of State Matt Blunt outlined the possible violations of law committed in the City of St. Louis by alleged illegal voters. He referred to an unspecified conspiracy "to create bedlam so that election fraud could be perpetrated,"<sup>95</sup> and to corrupt election judges put in place to manipulate the results of the election. The report claimed that, 1) 342 persons obtained court orders to vote even though the information provided by them on affidavits suggested they were properly disqualified from voting; 2) 62 convicted federal felons and 52 Missouri felons voted in either the City of St. Louis or St. Louis County; 3) 14 votes were cast in the names of dead people; 4) that there was a high probability of multiple voting by dozens of people; 5) 79 votes were cast by people registering to vote from vacant lots; and 6) 45 election judges were not registered to vote and therefore disqualified to serve.

Many of Blunt's allegations have been disproved or significantly weakened by the discovery of major records management problems at the Elections Board that resulted in grossly inaccurate voter rolls. The *St. Louis Post-Dispatch* conducted a canvass of over 2,000 alleged vacant lot addresses from which thousands of St. Louis voters were supposedly registered and found buildings on virtually all of them. The lots had been misclassified by the city assessor or misread by elections officials. They concluded that "most of the 79 people on the state's suspect voter list from last fall probably shouldn't be on it," including the city's budget director whose ten-year old condominium was mislabeled as a vacant lot.<sup>96</sup>

The claim that more than 100 felons may have illegally voted is also unreliable since the data upon which it was based was inconclusive, as the report itself admits.<sup>97</sup> Later investigations by the State Auditor did find that three years after the 2000 election fiasco, St. Louis's voter rolls still included the names of over 2,000 felons prohibited by state law from voting or registering to vote. But the Auditor found no conspiracy to commit voter fraud on the part of voters and questioned instead why the Elections Board had failed to remove the names from their lists when they had been provided with monthly and quarterly felony conviction reports from state and federal authorities.

Like the Blunt Commission, the State Auditor also found thousands of duplicate records of voters registered to vote in St. Louis and elsewhere in the state, but only 28 instances across three recent election cycles in which a voter may have voted more than once. Without further investigation it is impossible to know whether these 28 cases represent actual illegal behavior or are more likely the product of clerical errors in the Board's voter registration files.

Throughout the months following the election, Republicans and Democrats alike called for a federal investigation, each side charging the other with fraud or with suppressing the vote. Both sides expected to be vindicated. The federal investigation provided a decisive end to the Blunt Commission's allegation that corrupt election judges allowed hundreds of patently unqualified voters to vote.

<sup>97</sup> Blunt Report, 24, note 63.

### ***St. Louis Board of Elections forced into federal consent decree***

After an F.B.I. investigation that involved subpoenaing *all* of the registration and voting records from the St. Louis Elections Board for the months before the election, the Justice Department made a surprise announcement. They told the Board they were planning to sue them for violating the NVRA and threatening the voting rights of thousands of eligible voters in St. Louis by erroneously purging their records from the active voter file. The Board was forced into a consent decree that stipulated how they would change their procedures for maintaining accurate registration records, complying with federal requirements for notifying voters of their status on the list, and with handling voters whose names are not on the active voter list on election day.

Four years after the St. Louis Elections Board signed the consent decree acknowledging these failures, Mark (Thor) Hearne, the St. Louis lawyer and influential Republican activist, submitted Senate testimony that included citations to materials he produced after 2002 that ignored the Board's culpability and repeated misleading allegations of voter fraud in St. Louis.<sup>98</sup>

***Four years after the St. Louis Elections Board signed the consent decree acknowledging these failures, Mark (Thor) Hearne, the St. Louis lawyer and influential Republican activist, submitted Senate testimony that included citations to materials he produced after 2002 that ignored the Board's culpability and repeated misleading allegations of voter fraud in St. Louis.***

<sup>98</sup> Hearne (June 2006), (July 10, 2006), and (December 2006).

## ***Milwaukee: The Coup de Grâce***

In 2000, Vice President Al Gore won Wisconsin by just under 6,000 votes out of more than 2.5 million cast. Heading into the last months of the 2004 presidential campaign candidates George W. Bush and John Kerry were neck-and-neck in the polls in Wisconsin and the race was once again projected to be razor close. As a battleground state Wisconsin attracted attention from the national campaigns and a host of non-profit and political consulting organizations that poured money, staff and volunteers into the state to increase voter registration before Election Day.

By September, the voter registration drives and heightened national interest in Wisconsin as a battleground state led elections director Kevin Kennedy to report that elections officials across the state had been swamped by an unprecedented increase of over 200,000 new applications submitted by mail.<sup>99</sup> The intensified focus on Wisconsin by outside voter registration groups pouring their volunteers into the state was unparalleled in recent elections, an anomaly associated with Wisconsin's swing state status and the closeness of the presidential contest – in Wisconsin and the nation – just four years before.<sup>100</sup>

Pre-election news coverage in Wisconsin focused on three controversies: problems associated with some of the voter registration drives; a dispute between county and city officials over the number of ballots to be printed and provided to the city of Milwaukee; and a flap over thousands of alleged “bad addresses” on Milwaukee’s voter registration list.

Procedural breakdowns and discrepancies in the voter registration records were associated with what Kennedy called “volume” problems, but they helped create a climate of suspicion about the quality of record keeping at the Milwaukee elections commission and the commission’s ability to run a “clean” election.<sup>101</sup> The pre-election disputes repeatedly invoked the language of “voter fraud,” though no evidence was produced that voters were intentionally committing it. The climate of distrust made it difficult to see clerical mistakes, illegible handwriting, and workload problems leading to backlogged voter registration applications as human error or problems related to resource issues. Instead, foul-ups and mistakes were assumed to be evidence of fraud perpetrated by partisans trying to “steal elections.”

***Imperfect voter registration drives and simple human error, however, are not the same as voter fraud, nor do they inevitably lead to fraudulent voting.***

### ***Voter registration problems***

Intensified political competition and the influx of outside organizations, campaign workers and volunteers into Wisconsin in the months and weeks before the election contributed to an inevitably flawed voter registration process. Duplicate registration cards, improperly filled out cards, cards from people who are not eligible to vote or who don’t live in the district in which the card was submitted are not uncommon in the chaotic pre-election atmosphere of an intense political campaign. Imperfect voter registration drives and simple human error, however, are not the same as voter fraud, nor do they inevitably lead to fraudulent voting. As the Milwaukee case demonstrates, however, these deficiencies are easily exploited by partisans.

<sup>99</sup> Tom Kertscher, “Deputy Registrar May Have Violated State Election Law; He Says He Didn’t Witness Forms He Signed,” *Milwaukee Journal-Sentinel* (October 1, 2004), B1.

<sup>100</sup> Jenny Price, “Voter Registration Efforts Ramped Up In Wisconsin,” *Associated Press State & Local Wire* (October 10, 2004). Since voters can register to vote on Election Day, pre-election voter registration drives have been less common in Wisconsin than elsewhere.

<sup>101</sup> Price (2004).

## **How many ballots for Milwaukee?**

As stories of potential voter registration fraud circulated in the press, a political fight erupted in Milwaukee. In October the chief elections official in Milwaukee asked the county elections board for 260,000 extra ballots in anticipation of record turnout. Under Wisconsin law counties print and pay for all ballots for their localities. Milwaukee county elections officials rejected the request, with County Executive Scott Walker writing in support of the county board's decision to give Milwaukee roughly the same number of ballots it had received in the previous presidential election. In 2000, the number of ballots on hand exceeded the eligible voting population in Milwaukee by at least 200,000. But in planning for the number of ballots needed, local officials must compensate for the fact that in order to scan and count the ballots after they are cast, a bar code is assigned that prevents ballots from being counted outside the ward in which they are issued. In other words, unused ballots can't be moved around from ward to ward to cover shortfalls. Estimating probable turnout involves estimating turnout in each ward rather than citywide. This could have the effect of inflating the overall estimated number of ballots needed citywide. In 2004 Milwaukee requested 938,000 ballots for a voting population of about 424,000. The county board agreed to give the city 679,000 ballots, and a firestorm of protest erupted when County Executive Walker defended the decision by suggesting that he was concerned about potential voter fraud and didn't want people to be able to "grab" extra ballots at the polling site.<sup>102</sup>

Milwaukee Mayor Tom Barrett accused Walker of trying to foment chaos at the polls and suppress the central city vote. Barrett is a Democrat and served as a state co-chair of John Kerry's campaign, while Walker is a Republican and served as state co-chair of George W. Bush's campaign. In press reports, the dispute was repeatedly referred to as "ugly," generating partisan recrimination on both sides. On the morning of October 14, about a hundred protesters, including students, elected officials and union activists, stormed Walker's office while he was meeting with municipal election clerks, chanting, "Let the people have their voice!" and demanding that Walker issue the extra ballots to Milwaukee. Wisconsin Governor Jim Doyle intervened by asking the state elections board to help resolve the dispute and offered state aid to pay for the extra ballots. The next day Walker and Barrett held a joint press conference on the steps of Milwaukee city hall to announce a compromise between the city and county: the county would supply the extra ballots, giving the city the 938,000 ballots it originally requested, the city would split the cost, estimated at about \$40,000, and promise to return all unused ballots to the county election commission to ensure that all ballots were accounted for.<sup>103</sup> Approximately 665,000 unused ballots were later returned to the county board of elections.<sup>104</sup>

## **Inaccurate lists of "potentially fraudulent voters"**

At 4:57 p.m. on Wednesday, October 27, 2004, three minutes before the legal deadline for filing a complaint with the city elections commission, the state Republican Party challenged the validity of 5,619 names on the city voter rolls. State GOP chairman Rick Graber said, "This is a black eye on the city of Milwaukee and the state of Wisconsin. These 5,600 addresses could be used to allow fraudulent voting. Whether it's deliberate or not, something's wrong when you have people

<sup>102</sup> Dave Umhoefer and Greg J. Borowski and Dave Umhoefer, "Walker-Barrett Ballot Dispute Heats Up More; County, City Accuse the Other of Trying to Make Election Day Controversy," *Milwaukee Journal-Sentinel* (October 14, 2004), B1.

<sup>103</sup> Associated Press, "Governor Sends Election Board Into Milwaukee Ballot Fray," *Capital Times* (October 15, 2004), 4A; Dave Umhoefer and Steve Schultze, "Doyle Joins Rift Over Ballot Supply; Governor Seeks State Inquiry; After Protest, Walker Agrees to Review City's Request," *Milwaukee Journal-Sentinel* (October 15, 2004), A1.

<sup>104</sup> Greg J. Borowski, "665,000 Unused Ballots Returned; Review Finds City's Original Allotment Would Have Been Sufficient," *Milwaukee Journal-Sentinel* (November 25, 2004), B1.

from addresses that don't exist."<sup>105</sup> First the local elections board voted 3-0 when the board's lone Republican appointee joined the two Democrats in finding the challenge lacked sufficient evidence. The Milwaukee City Attorney, Grant Langley, conducted a review that he said in a letter to the city elections commission executive director casts "doubt on the overall accuracy" of the list supplied by the state GOP.<sup>106</sup>

Then, just four days before Election Day the state GOP demanded that Milwaukee city officials require identification from 37,180 people it said its review of the city's voter rolls turned up as living at questionable addresses. The list was produced in the same manner as the first list of 5,619 names using a computer program to match data from the city's voter database with a U.S. Postal Service list of known addresses. It included 13,300 cases of incorrect apartment numbers and 18,200 cases of missing apartment numbers. City Attorney Langley, a non-partisan officeholder, called the GOP's request, "outrageous," adding, "We have already uncovered hundreds and hundreds and hundreds of addresses on their (original list) that do exist. Why should I take their word for the fact this new list is good? I'm out of the politics on this, but this is purely political."<sup>107</sup> Langley's review did find some addresses that do not appear to exist, and the *Milwaukee Journal-Sentinel* did its own limited investigation, finding 68 questionable addresses. "Others, though," it said, "were likely to be clerical errors."<sup>108</sup>

By Monday, officials from the state GOP and the City of Milwaukee worked out an agreement on how the registrations of voters with addresses challenged by the GOP would be dealt with at the polls. The list of 37,000 was pared back down to 5,512 and the city agreed to provide poll workers with the names of people in their wards from the list whose addresses appeared to be incomplete or inaccurate. Those people would be flagged if they showed up to vote and asked to show identification and/or re-register to update their records.<sup>109</sup> At the time Wisconsin law did not require pre-registered voters to show identification to vote at the polls, they only needed to state their name and address to receive a ballot.<sup>110</sup> The compromise deal with the Republican party imposed an identification requirement not mandated by law on people who made their way onto the GOP's list.

### ***Who bears responsibility for sloppy records and procedural meltdown?***

The Journal-Sentinel reviewed Milwaukee's voting records and found a number of unexplained discrepancies. The most troubling finding from the newspaper's detailed computer analysis was that as many as 1,242 votes, three-quarters of them cast by people registering on site on election day, appeared to have come from invalid addresses. Another 1,305 registration cards with discernible flaws such as missing addresses or missing names were accepted from voters on election day who were then allowed to vote.<sup>111</sup>

<sup>105</sup> Greg J. Borowski, "GOP Fails To Get 5,619 Names Removed From Voting Lists: City Commission Says Party Didn't Prove Case; Challenges Could Move to Polling Places," *Milwaukee Journal-Sentinel* (October 29, 2004), A1.

<sup>107</sup> Greg J. Borowski, "Election 2004: GOP Demands IDs of 37,000 in City; City Attorney Calls New List of Bad Addresses 'Purely Political,'" *Milwaukee Journal-Sentinel* (October 31, 2004): A1.

<sup>108</sup> Borowski (October 31, 2004).

<sup>109</sup> "Milwaukee Vote Deal Reached on Dubious Addresses," *The Capital Times* (November 1, 2004), 5A.

<sup>110</sup> Wisconsin allows for election day registration. Same-day registration rules require new registrants to show some form of proof of residency, or, for those lacking proof, another registered voter may vouch for them.

<sup>111</sup> Greg J. Borowski, "Over 1,200 Voters Addresses Found Invalid; Some Mistakes Easily Explained, But Milwaukee Flaws Raise Concerns About Shoddy Record Keeping, Possible Fraud," *Milwaukee Journal-Sentinel* (January 25, 2005), A1; Greg J. Borowski, "Fraud or Bumbling, Voter Problems Still Unnerving to Public," *Milwaukee Journal-Sentinel* (January 30, 2005), A1.

The newspaper opined on its own investigation and reporting:

Republicans are quick to jump on the discrepancies, real or imagined, in voting data in Milwaukee as proof of widespread fraud in the big city. In their minds, the *Journal Sentinel's* findings fit that pattern. A more plausible explanation, however, is that the findings reflect the unfortunate tendency of voting systems throughout America to err.<sup>112</sup>

By the end of January, the Mayor had appointed an internal task force to review the city's electoral procedures, and federal and county law enforcement agencies began a joint investigation into whether breakdowns in procedure, poor record-keeping, human error or fraud explained the discrepancies. On February 10, the bipartisan Joint Legislative Audit Committee of the state legislature voted unanimously to direct auditors to review voter registration and address verification procedures. All of these investigations produced clear evidence that Milwaukee's Board of Elections was overwhelmed by its own incompetence and under-staffing on election day, resulting in massive record-keeping problems. Poll workers failed to follow procedures; the number of votes cast in Milwaukee failed to match the number of people recorded as voting; same day registration cards were not filled out properly and follow up was not performed when post-registration address verification efforts identified address discrepancies; some voters were allowed to register to vote in the wrong ward.

### ***The dénouement***

The scrutiny from federal, state and local law enforcement and elections officials produced several reports, an intensive review of voter registration practices in a number of Wisconsin cities, many recommendations for improving election administration and voter registration procedures, several later-vetoed photo ID bills in the state legislature, a variety of other legislative proposals, and very little conclusive evidence of voter fraud.

Widespread ignorance among the public and elections officials alike of Wisconsin's seldom enforced felony disenfranchisement laws account for the hundreds of ineligible felons post-election audits have found voted since 2000. Alleged illegal felon voting constitutes nearly all of the "voter fraud" reported on by the media in Wisconsin over the last six years, and represents most of the handful of cases prosecuted by the federal government. Wisconsin election crime laws require the establishment of a willful effort to defraud. Most of those identified as ineligible have not been prosecuted because they were never informed that they lost their voting rights until they completed their entire sentence. Until recently, Wisconsin's voter registration application form did not clearly indicate that felons on probation or parole were ineligible to vote. One of the federal cases against the dozen or so people charged with illegal (felon) voting in the 2004 election was dropped when it was revealed that the defendant had registered to vote on election day in Milwaukee using his state offender ID card.<sup>113</sup>

Little*, "Motion to Dismiss Indictment," United States District Court, Eastern District of Wisconsin, Case No. 05-CR-172 (LSA) (March 14, 2006).

# POLICY RECOMMENDATIONS

---

This report has illustrated how the public is being manipulated about the problem of voter fraud.

Voting is a right, it's not a gift and it's not a privilege. Moreover, we can't have a democracy without the voters, and that means all voters, contributing to self-government. Therefore, layers upon layers of rules and bureaucracy to administer elections do not serve us well if they hinder electoral participation, which they do especially when the electorate expands. It is simply naïve to argue that the rules have nothing to do with turnout. On the other hand, it's true, the rules don't on their own increase turnout – issues, passion, competition, good candidates, effective communication and a diverse media – these are some of the factors that contribute to higher levels of electoral participation. But high interest campaigns and elections present precisely those conditions under which a complex regime of rules will have a depressing effect. When voter interest is high, partisans exploit the rules to determine the size and shape of the electorate they want.

Today partisans use the threat of voter fraud as an intimidation tactic. As our history shows, it is an old and reliable instrument for shaping the electorate by influencing the rules and procedures governing access to the vote. It is difficult to openly suppress voting in a democratic culture. The threat of fraud, however, if it's real, is enough to scare most people into accepting new rules that undermine the electoral participation of other voters - the unfortunate price, we are told, we must pay to keep our elections clean. The unraveling logic of this argument should be obvious. Unfortunately, reason flies out the window when we're scared.

We need better data, better election administration, transparency and more responsible journalism to improve public understanding of the legitimate ways in which electoral outcomes can be distorted and manipulated. Specifically:

1. States' chief elections officers should collect and maintain data on fraud allegations and enforcement activities and routinely report this information to the public. The data and methods used to collect it should be transparent and in the public domain.
2. To protect the right to vote and improve public confidence in the electoral process improvements to statewide, centralized voter registration databases must continue. Accurate registration records and methods for instantaneously certifying voter eligibility are the best defense against voter fraud.
3. To minimize mistakes, clerical errors, and duplication, state and local elections officials need to develop good, cooperative working partnerships with third party voter registration organizations that do a service to democracy by encouraging more people to register and vote.
4. States can go further and reduce the need for registration drives by fully implementing the agency-based voter registration requirements of NVRA and instituting same-day voter registration procedures. Ultimately, the states and federal government should provide a means to automatic universal voter registration.
5. To improve public understanding of voter fraud and more balanced reporting, state elections and law enforcement officials should educate journalists to ask for and recognize evidence of fraud when reporting on fraud allegations.

# APPENDIX: HOW TO IDENTIFY VOTER FRAUD

---

Elections are instruments of democracy. They are the mechanisms for choosing representatives of the people's will, and they are widely regulated by law. Many different actors participate in the electoral process. Legislators and administrators make and implement the rules, candidates organize campaigns to run for office, voters cast their ballots, administrators count the ballots and elected officials certify the results.

The voters' role is simple – to make choices about candidates by casting legal ballots. Voters don't set deadlines for registering to vote, nor do they make the rules about how ballots are designed, displayed, or marked. They don't decide where the polls are located, when they are open, or what voting technology will be used. Voters have nothing to do with receiving completed ballots, determining valid ballots, counting or recounting ballots, tallying election results, or ensuring that the vote totals are accurate.

***Voters, like all other actors or groups in the electoral process, can only corrupt that part to which they have access.***

Voters, like all other actors or groups in the electoral process, can only corrupt that part to which they have access. They can do this directly, for example, by providing false information about their identity and/or eligibility in order to vote illegally, or indirectly through participation in a conspiracy, usually with others who have more authority and access to the marking and counting of ballots than the voters themselves possess.

***If the alleged fraud does not involve voters it should not be considered voter fraud.***

The first step in confronting any allegation of voter fraud is to identify who is alleged to have committed the fraud and to figure out if any voters are involved. If the alleged fraud does not involve voters it should not be considered voter fraud.

The second step is to identify which part of the electoral process was corrupted by fraud. Given their limited access, voters can only corrupt the registration and voting phases. They can't corrupt the vote tallying and counting phases where most election fraud has occurred in the past because they lack access to votes after they've cast them.<sup>114</sup> A fraudulent ballot

<sup>114</sup> The most thorough analysis of election fraud in the early twentieth century is the landmark 1929 study of voter registration procedures for the Brookings Institution by the inventor of the punch card voting machine, Joseph P. Harris. See, Joseph P. Harris, *The Registration of Voters in the U.S.* (Baltimore: The Lord Baltimore Press, 1929). Harris was a public administration reformer who promoted government modernization and the use of scientific administrative practices to remove politics from the business of governing. He concluded that elections were more badly managed than just about any other area of public administration and that political machines were responsible for much of the fraud he analyzed. The case studies of election fraud in Chicago, Philadelphia and Louisville, Kentucky, Harris presents all involved large scale conspiracies orchestrated by politicians and political machines which Harris thought rigged elections through ballot box stuffing and the manipulation of the count. His conclusion that most fraud occurred during the vote counting stage spurred him to invent the Votomatic Vote Recorder (the first punch card voting machine) which Harris hoped would reduce opportunities for election fraud by removing the ballot counting function from precinct workers. See, Joseph P. Harris, *Oral History*, interview by Harriet Nathan, Regional Oral History Office, The Bancroft Library, University of California, Berkeley, California, 1980, available from <http://bancroft.berkeley.edu/ROHO/Vote/>.

is one that was not cast legally. But the definition of a legal ballot varies according to the rules that qualify eligible voters to vote and govern the procedures for casting a ballot in the different states.

### ***Fraud in Voter Registration***

To its earliest proponents, voter registration was intended as an anti-fraud safeguard. Registration fraud is typically punished less severely than fraud in voting and this is as it should be. What matters most to the integrity of electoral outcomes is the casting and counting of an illegal ballot. A person who provides false information on a voter registration application but never casts a ballot is less of a threat to electoral integrity than one who negates or dilutes the will of the voters by casting an illegal ballot. This is not to say that voter registration fraud is a negligible crime or should be tolerated. The available evidence suggests voter registration fraud is rare, but when it does occur, if it goes undetected it can compromise the accuracy of the voter rolls. When it's caught it burdens the elections and law enforcement officials who find it and must address it.

Since voters can perpetrate it, even if they rarely do, for purposes of this report we will consider voter registration fraud a form of voter fraud, along with all forms of illegal voting. However, when voter registration fraud is committed by a campaign volunteer or a paid canvasser, we should not consider the crime 'voter fraud.'<sup>115</sup> Doing so only adds to public confusion about what should be done to eliminate opportunities for fraud.

### ***Fraud in Voting***

Under most state and federal laws a vote is considered illegal when it is cast improperly by an unqualified or ineligible voter. The voter must be qualified and the vote cast according to the rules governing the act of voting under state and federal law. Both elements – the voter and the act of voting – must be legal or the vote is illegal.

### ***The difference between an eligible and a qualified voter***

To be legal, an *eligible* voter must be *qualified* by the state to vote. This raises questions about the difference between an 'eligible' voter and a 'qualified' voter. The centuries long struggle for the franchise in the U.S. established a common law right to vote and constitutional bans on voter discrimination by race, color, gender, or age (over the age of 18), but no constitutional right to vote. The lack of an affirmative right to vote in the Constitution and the delegation of authority to the states to determine voter qualifications and oversee election administration are peculiar features of American democracy. The Constitution explicitly grants the states the power to set voter qualifications, reserving authority to Congress to regulate only "the times, places and manner of holding elections for Senators and Representatives."<sup>116</sup>

***"Eligible" voters are those whose age and citizenship status, and in some cases absence of a felony conviction allows them to be credentialed or "qualified" by the states as legitimate or legal voters. "Qualified" voters, therefore, are those eligible voters who complete a state's procedures for casting a legal ballot.***

Because the Constitution vests power to 'qualify' voters in the states, as long as they do not unconstitutionally discriminate against people by race, color, gender or age, they may make different rules for qualifying voters, and they do. This is why the definition of a legal vote varies across the states, especially with regard to residency and felony disqualification rules. Consider,

<sup>115</sup> For an example of how the voter fraud label is commonly misused, see "2 Signature Gatherers Sentenced in Orange County Voter Fraud Case," *Associated Press* (1/4/07), 17 News Online, available online at [www.kget.com/news/state/story.aspx?content\\_id=6b487526-37ac-43e9-a5b0-496674b9d5ef](http://www.kget.com/news/state/story.aspx?content_id=6b487526-37ac-43e9-a5b0-496674b9d5ef).

<sup>116</sup> But, "the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators." See, U.S. Constitution, Article I, section 4.

for example, the ballot of an otherwise eligible and qualified voter with a felony conviction who is no longer under state supervision. If that citizen lived in Maine and registered to vote by or on Election Day, his or her vote would count as a legal ballot. If that citizen lived and voted in Florida where a felony conviction eliminates the right to vote until clemency is granted, he or she could be prosecuted for casting an illegal ballot.

In fact, states make lots of rules for qualifying voters. The most important is the requirement that all eligible voters register. All states except North Dakota require eligible voters to register before casting a ballot.<sup>117</sup> Thus, all states except North Dakota qualify eligible voters by requiring them to meet certain conditions in order to register their names on the rolls of legitimate or valid voters. Voter registration, therefore, is a means of voter qualification, and in nearly all states, otherwise eligible voters must be registered properly or the vote they cast is illegal.<sup>118</sup> In addition, ineligible voters, such as those disqualified by state law for a felony conviction or because they do not possess U.S. citizenship,<sup>119</sup> could register to vote either mistakenly or by deceit, thus appearing on the voter rolls as 'qualified' voters despite their ineligibility. Their votes would be treated as legal votes when in fact they would be illegal.

There are a few known cases of ineligible persons such as non-citizens making it on to the voter registration rolls due to a misunderstanding about who has the right to vote in American elections, or to mistakes made by elections officials who misinformed such applicants or failed to note their lack of citizenship. One involves the case of Mohsin Ali, a long-time legal permanent resident living in Florida at the time of his arrest for "alien voting." He pleaded guilty but claimed a clerk in the Department of Motor Vehicles issued a voter registration application to him when he renewed his license. In a letter begging the judge to intercede with immigration authorities considering Ali's deportation back to Pakistan, Ali claimed he told the clerk he was a Florida resident but not a U.S. citizen.<sup>120</sup> He states that the clerk told him as the husband of an American citizen he was eligible to vote. When Ali received a voter registration card in the mail he assumed he was qualified to vote and voted in the 2000 presidential election.<sup>121</sup>

Voters have limited access to the electoral process, but where they do interact with it they confront an array of rules that can trip them up and change depending on where they live. The more rules and restrictions, the more stumbling blocks voters face when trying to cast legal ballots. For example, in Pennsylvania where a voter must qualify with an excuse when applying for an absentee ballot, it is illegal to vote that ballot if the voter's plans change and he or she remains physically present at home (barring a disability that prohibits the voter from visiting the polling place). A voter must apply for an absentee ballot a full week before Election Day. What happens if plans change or the business trip gets canceled and the voter is present on Election Day, after all? If that voter then mails in the ballot instead of striking out for the line at the polling place, that voter is breaking the law in Pennsylvania. Who knew? Who wouldn't make

<sup>117</sup> North Dakota repealed its voter registration law in 1951. To vote in North Dakota eligible voters must have proper identification showing their name and current address. If they lack identification, they may still vote by filing a voter's affidavit attesting to their identity and address, or if a poll worker knows them and can vouch for them. Poll workers use lists of previous voters to track voting on Election Day.

<sup>118</sup> The courts have dealt with the question of whether voter registration is an unconstitutional burden on the vote by using a balancing test, weighing the alleged burden on rights against a state's legitimate interest in ensuring electoral integrity. State laws mandating voter registration have been upheld repeatedly by the Supreme Court as reasonable administrative burdens on the right to vote ("a person does not have a federal constitutional right to walk up to a voting place on election day and demand a ballot," *Marston v. Lewis*, 410 U.S. 679, 680, (1973)).

<sup>119</sup> Federal law does not require persons be U.S. citizens to vote, but all states do, as it is their constitutional prerogative to set citizenship as a condition for voter eligibility and qualification.

<sup>120</sup> Letter from Mohsin Ali to the Honorable William C. Sherrill, Jr., Chief U.S. Magistrate Judge, U.S. District Court, Tallahassee, Florida; dated November 3, 2006. The judge denied Ali's request.

<sup>121</sup> *U.S. v. Mohsin Ali*, U.S. District Court, Northern District of Florida, Tallahassee Division, Case No. 4:05cr47-WCS.

things easier and drop the ballot in the mailbox? The more complex are the rules regulating voter registration and voting, the more likely voter mistakes, clerical errors, and the like will be wrongly identified as “fraud.”

*Eligible* voters may nevertheless fail to *qualify* as legal voters because they fail to register properly – usually their ballots would be considered illegal. Illegal ballots, however, may also result from qualified – or properly registered – voters failing to follow the rules for casting a ballot under state law. As the following table suggests, expanding rules create more ways to cast an illegal ballot than a legal one.

**Voter Eligibility, Voter Registration and Legal Balloting**

Voter	Registered	Voter Is	Vote Is Cast	Ballot
Eligible	Yes	Qualified	Properly	Legal
			Improperly	Illegal
Not Eligible	No	Not Qualified	Properly or Improperly	Illegal
	Yes	Improperly Qualified	Properly	Illegal
			Improperly	Illegal
	No	Not Qualified	Properly or Improperly	Illegal

As states and localities continue to loosen restrictions on the time and place for casting a legal ballot, qualified voters will face more options for casting their ballots. The lack of uniformity increases complexity of the rules and unintended consequences proliferate. For example, the growth of early and mail voting is generally considered positive because these reforms make voting more convenient by opening up more avenues for casting legal ballots. Voters in many

states may now cast their ballots at a town clerk’s office two weeks before the election, by mail, or in person at the polling booth on Election Day. But one consequence of expanding voting opportunities is a corresponding increase in opportunities for casting unintentionally illegal ballots if administrative tracking and auditing systems are flawed.

***But one consequence of expanding voting opportunities is a corresponding increase in opportunities for casting unintentionally illegal ballots if administrative tracking and auditing systems are flawed.***

In fact, several recent cases of alleged voter fraud involved legal voters who mailed in their ballots and then showed up at the polls on Election Day because they either forgot mailing in their ballots or, distrusting the absentee balloting process, wanted to be sure that their votes were counted by voting again. They used their real names to try to vote twice because they were confused.<sup>122</sup> Poor record management on the part of elections officials was the problem, but voters got the blame. As the options and rules expand they increase the possibility that voter misunderstandings will be labeled ‘voter fraud.’

<sup>122</sup> See, for example, Susan Greene and Karen Crummy, “Voter Fraud Probed in State; Double Dippers, Felons Targeted,” *Denver Post* (March 24, 2005).

**Claims of “Voter Fraud” Often Manufactured, Exaggerated for Political Purposes,  
Says New Report from Project Vote**

(Washington, DC) Widespread “voter fraud” is a myth promulgated to suppress voter participation, according to a new Project Vote report released today. “The Politics of Voter Fraud” finds that fraudulent voting, or the intentional corruption of the voting process by voters, is extremely rare. Yet, false or exaggerated claims of fraudulent voting are commonly made in close electoral contests, and later cited by proponents of laws that restrict voting. The report is authored by Lorraine Minnite, Ph.D., Barnard College, Columbia University.

“I set out to study what situations generated incidents of voter fraud and, after researching the laws and examining the existing evidence, I found that voter fraud did not occur with enough frequency or was enough of a significant factor in elections to model or study,” Minnite said. “Instead, in this report, I examined circumstances in which claims of voter fraud were made and how they came to receive widespread public attention.”

Analysis of federal government records concludes that only 24 people were convicted of or pleaded guilty to illegal voting between 2002 and 2005, an average of eight people a year. The available state-level evidence of fraudulent voting, culled from interviews, reviews of newspaper coverage and court proceedings paints a similar picture.

“We shouldn’t base public policy on urban legends but on sound facts. It’s clear from this report that fraudulent voting isn’t threatening the integrity of our elections; we *do* know that erecting additional bureaucratic obstacles to voting discourages legitimate voters,” said Project Vote Deputy Director Michael Slater.

The report includes case studies in which accusations of “voter fraud” received widespread media attention. Each one demonstrates the way in which partisan politics exploit administrative errors or minor problems to create the illusion of systemic fraud.

While there is little evidence of fraudulent voting, the case is clear that voting rules restrict voter turnout. A recent study by the Eagleton Institute of Politics at Rutgers University found that laws requiring voters to show a document establishing identity reduce minority voter turnout. Researchers found that in the 2004 election, all voters, in states requiring voters to present documentation establishing their identity at the polls, were 2.7 percent less likely to vote than voters in states where no documentation was required. Latinos were 10 percent less likely to vote, Asian-Americans 8.5 percent less likely to vote and African Americans 5.7 percent less likely to vote.

A survey by the Brennan Center for Justice at New York University School of Law found that 11 percent of Americans, more than 21 millions citizens, did not have a current

030415

government-issued photo ID. Low-income, minority and elderly Americans disproportionately lack current government-issued photo ID.

To help improve public understanding and make the electoral system as efficient as possible, the report recommends: better voter fraud data collection and dissemination by states' chief elections officers, maintenance of accurate voter registration databases, cooperative relationships between non-partisan civic groups engaged in voter registration and elections officials, education of the media, and the institution of automatic universal voter registration.

###

*Project Vote is the leading technical assistance and direct service provider to the civic participation community. Since its founding in 1982, Project Vote has provided professional training, management, evaluation and technical services on a broad continuum of key issues related to voter engagement and participation in low-income and minority communities.*

Commissioner,  
I responded to a FOIA request from them on Nov. 27. They asked for the draft fraud report prepared by Tova and Job, which we did not provide on the grounds that it was a pre-decisional document. Would you like me to paste the contents of the letter in an email to you?

Subject People For

I know that People For the American Way delivered petitions to EAC about release of the Fraud report but I need to know what other communications EAC has had with People For about the study.

Was it represented on the study's working group? If so, by whom? Did they write to us and did we answer? Did anybody from there talk with anybody at EAC about the study and our work? Thanks.

**U.S. ELECTION ASSISTANCE COMMISSION**  
**1225 New York Ave. NW – Suite 1100**  
**Washington, DC 20005**

November 27, 2006

Mr. Ralph Neas  
President  
People for the American Way  
2000 M Street, NW  
Suite 400  
Washington, DC 20036

Dear Mr. Neas:

Thank you for your Freedom of Information Act (FOIA) request regarding the U.S. Election Assistance Commission's research on voter fraud and intimidation. The document you requested on voter fraud and intimidation is protected from release under FOIA. Specifically, the responsive information is protected by the Deliberative Process Privilege and exempted from release under 5 U.S.C. §552(b)(5). As you may know, the Deliberative Process Privilege protects intra-agency documents that are (1) predecisional in nature and (2) part of the deliberative process. In other words, the documents must be part of a process that recommends or presents opinions on a policy matter before that matter is adopted. Such documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors; (2) to protect against premature disclosure of proposed policies; and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action.

The report you have requested is an intra-agency document that is not yet complete and has not been reviewed and approved by the Commissioners (the relevant policy makers). An initial draft of the document was created by two contract employees with the support of EAC staff. The contract employees were hired pursuant EAC's authority to hire consultants and experts under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees at issue were closely supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. Communications with contract employees are intra-agency communications for the purposes of FOIA.<sup>1</sup> Work continues to proceed on the draft.

---

<sup>1</sup> Department of the Interior v. Klamath Water Users Protective Association, 532 U.S. 1, 9-11 (2001) and Hertzberg v. Veneman, 273 F. Supp. 2d 67, 76 n.2 (D.D.C. 2003).

Similarly, the document you have requested constitutes a recommendation on a policy matter. The purpose or subject of the draft report at issue is to make an EAC determination on how voter fraud should be studied by the Agency. This is to be done by (1) assessing the nature and quality of information that presently exists on the subject matter; (2) defining the terms and scope of EAC study as proposed under HAVA; (3) determining what is to be studied; and (4) determining how it is to be studied. Clearly, EAC's interpretation of HAVA and its determination of what it will study and how it will use its resources are matters of Agency policy. This policy can only be made by the EAC's duly appointed Commissioners. This has not yet been done. Thus, any draft created by staff is a proposal or recommendation on a policy matter and clearly both predecisional and deliberative.

For these reasons, the draft document you have requested is exempt from release. We expect the report to be made final and approved by the Commission in December. It will be made public at that time. Upon its release you may obtain a copy of it at [www.eac.gov](http://www.eac.gov).

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Jeannie Layson  
Director of Communications  
U.S. Election Assistance Commission

Mr. Hasen,

I write to point out incorrect information you posted on your website on December 11, 2006. You wrote: "Note what's missing compared to the earlier version leaked to the USA Today Newspaper." No one at the EAC leaked anything to USA Today. The reporter asked for a copy of the staff report about the fraud research that was presented at a public meeting in May to our Board of Advisors and the Standards Board, and the EAC provided it to him. This information was presented and discussed at a meeting that was open to the public, so we provided materials distributed at the meeting to anyone who requested it. The staff report about the fraud project was also distributed to the members of both advisory boards. Go [here](#) to view the Federal Register notice about the public meeting at which this project and many others were discussed.

The statement you attribute to one of the consultants is absolutely correct. As stated by their contract, these consultants were hired so that the EAC could "...obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation."

As for your reference to what's "missing compared to the earlier version," the report contains the summaries of every interview conducted by the consultants as well as every book, article, report or case that was reviewed. It does not contain the synopsis of those interviews, which were written by the consultants. EAC provided the individual summaries so readers could reach their own conclusions about the substance of the interviews.

EAC's interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision. These are not, nor should they be, determinations or decisions made by consultants. The EAC has the ultimate responsibility for the reports it issues, and it is incumbent upon the agency to conduct due diligence to ensure reports, data or any other information is complete and accurate before it is adopted by the Commission.

As someone with a public platform who writes about matters regarding election administration, I would appreciate it if you would consider extending the same professional courtesy most journalists do and contact the agency if you have questions or concerns in the future about EAC policy or actions. You may reach me directly at 202-566-3103 if I can ever be of assistance. Thank you for your consideration in this matter.

Sincerely,

Jeannie Layson

**More on FL-13, and a Role for the EAC?**

When I saw [this headline](#) on the *Sarasota Herald Tribune* web page, I

030427

thought it must have been about the FL-13 race.

Over on the election law listserv, Doug Johnson, responding to my commentary calling for the House to investigate the problems and declare a revote in the FL-13 race, suggested that perhaps the EAC is better situated to conduct an investigation than the House of the problems in the FL-13. I'm afraid we might not be able to count on the EAC to conduct an investigation that is well-funded, tough, and fair. Politics appears to be creeping in to decisions of the EAC's advisory board, and there's real concern about the EAC's vote fraud report. Note what's missing compared to the earlier version leaked to the USA Today newspaper. Tova Wang, who authored the draft report for the EAC, issued the following statement to me: "My co-consultant and I provided the EAC with a tremendous amount of research and analysis for this project. The EAC released what is their report yesterday."

The EAC has also lost two commissioners, one Republican and one Democrat, who appeared to be tough-minded and fair. I am very worried about the fairness and non-partisanship of the new rumored nominees. In short, the EAC has to prove it is up to the task of fair and serious inquiry before it could be trusted with something like an investigation of the FL-13.

Julie and Jeannie:

Thank you for the quick turn around on drafting a response to Tova Wang.

I have made substantial edits because I think the first draft offered too much information, which is not germane to Tova's complaint. Additionally, too much verbiage masks the strength of our good report and seemed to obscure the main points in our response.

I hope you will find the attached helpful.

December 8, 2006

Ms. Tova Wang  
(Address)  
(Address)

Dear Ms. Wang:

We are writing in response to your December 7, 2006 memorandum. As you know, the U.S. Election Assistance Commission (EAC) issued its first report on election crimes last week, based in large part on the work that was done for EAC by Job and you. The report contains the full and complete summaries of every interview conducted as well as every book, article, report or case that was reviewed. Rather than provide the synopsis of these interviews, EAC provided the individual summaries so readers could reach their own conclusions about the substance of the interviews.

Upon reviewing initial information about the Department of Justice interviews contained in the status report that was provided to the EAC Standards Board and EAC Board of Advisors and the information provided at the working group meeting in May 2006, those persons interviewed at the Department of Justice did not agree with certain characterizations of their statements contained in these materials. Therefore, EAC exercised its responsibility to make clarifying edits. The Department of Justice is an important prosecutorial agency engaged in enforcing Federal anti-fraud and anti-intimidation laws. Thus, it was important to EAC to assure that the summary of their comments did not lend confusion to an already complex and hotly-debated topic.

The report on voting fraud and voter intimidation will stand as adopted on December 7, 2006. Again, we thank you for the contributions you made to the EAC's initial research of these important issues.

Sincerely,

**Deleted:** The U.S. Election Assistance Commission believes that voting fraud and voter intimidation are very important, complex topics that should be studied and reported on fairly and accurately. As a clearinghouse of election administration information, EAC is committed to providing complete and comprehensive information to the election community and the public. ¶

**Deleted:** ¶

(Address)

Dear Ms. Wang:

The U.S. Election Assistance Commission believes that voting fraud and voter intimidation are very important, complex topics that should be studied and reported on fairly and accurately. As a clearinghouse of election administration information, EAC is committed to providing complete and comprehensive information to the election community and the public.

In its December 2006 report on voting fraud and voter intimidation, EAC honored this commitment by providing the readers of its report with the full and complete summaries of every interview conducted as well as every book, article, report or case that was reviewed. It is incumbent upon us to provide them with the best and most complete data and research that we can. Rather than provide only the synopsis of these interviews, EAC provided the readers with the entire summaries created by the consultants so readers could reach their own conclusions about the substance of the interviews.

With regard to the interviews of two of the personnel from the Department of Justice, EAC made clarifying edits. Upon reviewing initial information about their interviews contained in the status report provided to the EAC Standards Board and EAC Board of Advisors and the information provided by the consultants at the working group meeting, those persons interviewed did not agree with certain characterizations of their statements contained in these materials. The Department of Justice is an important prosecutorial agency engaged in enforcing Federal anti-fraud and anti-intimidation laws. Thus, it was important to EAC to assure that the summary of their comments did not lend confusion to an already complex and hotly-debated topic.

Because of the lack of organization and cohesion in the draft provided by the consultants, that document would have led to greater confusion and division regarding the issues of voting fraud and voter intimidation. As such, EAC revised the draft report and provided the entirety of the supporting documentation to the public.

For these reasons, the report on voting fraud and voter intimidation will stand as adopted on December 7, 2006.

Subject Revised Final Agenda - Public Mtg 12-07

The Chairman has approved the revised final agenda. Additions are under "New Business."

Julie, you are allotted an estimated 10 minutes for the Fraud and Intimidation Report, including Q & A  
Tom, your portion is allotted an estimated 5 minutes for the Administrative Manual Adoption, including Q & A.  
Brian/Gavin, please note: you are collectively allotted 15 minutes for your portion, and an anticipated 20 min for your  
Q & A.

Thanks.

## U.S. Election Assistance Commission Public Meeting Agenda

1225 New York Avenue, NW  
Suite 150  
Washington, DC  
Thursday, December 7, 2006  
10:00 AM - 3:30 PM EST

**Call to Order** (Chairman DeGregorio)

**Pledge of Allegiance** (Chairman DeGregorio)

**Roll Call**

**Adoption of Agenda** (Chairman DeGregorio)

**Welcoming Remarks** (Chairman DeGregorio)

### **OLD BUSINESS:**

- **Correction and Approval of Minutes from the October 26, 2006 Meeting** (Chairman DeGregorio)
- **Report of the Executive Director** (Thomas Wilkey)

### **NEW BUSINESS:**

- **Election of Officers for 2007**
- **Adoption of Fraud and Intimidation Report** (Julie Thompson-Hodgkins)
- **Adoption of Administrative Manual - Policy and Procedures** (Thomas Wilkey)
- **Review and Adoption of EAC Certification Program** (Brian Hancock, Director, Voting Systems Certification, U. S. EAC and Gavin Gilmour, Deputy General Counsel, U. S. EAC)

## **Break**

- **Assessing the 2006 Election**

### **Panel 1: Election Officials**

- The Honorable Deborah Markowitz, President, National Association of State Secretaries and Vermont Secretary of State
- Kevin J. Kennedy, President, National Association of Election Directors, and Executive Director, Wisconsin State Elections Board
- R. Doug Lewis, Executive Director, Election Center
- Elizabeth "Libby" Ensley, IACREOT Director-At-Large, Election Officials Election Commissioner

**12:30 PM – 1:15 PM      Lunch**

### **Panel 2: Organizations and Academics**

- Mary G. Wilson, President, League of Women Voters of the United States
- Jonah Goldman, Director, National Campaign for Fair Elections, Lawyers' Committee on Civil Rights
- Mark (Thor) F. Hearne, II - Partner, Lathrop & Gage, L.C.
- Dan Seligson, Editor, electionline.org

### **Panel 3: Election Technology Representative**

- John S. Groh, Chair, Technology Electronics Council

**Commissioners' Closing Remarks**

**Adjournment**

Subject Brennan Center FOIA request

Just reminding you guys that I need all of Tom's emails and/or correspondence regarding the FOIA request below. I need this info by the end of the day. We interpret that this request does not cover emails or correspondence among staff--only b/w Tom and the parties mentioned below. The best and most efficient way is to print everything and bring it to me. I will review all of the documents and determine what is applicable to this request, as well as redact any information not applicable.

I need each of you to respond affirmatively or negatively to the FOIA request below. **If you have no documents in your possession related to this request , please reply to me with the words "no records."** If you have records, please identify them in an e-mail reply and attach them to the e-mail. If the document is not electronic, hand deliver them to me. Also, if you believe any of these related documents should be withheld, please provide a brief memo stating the reason for your position.

I need this information and/or a response by **COB December 5, 2006**. If you cannot comply by this date, please provide notification and an estimated time when you will provide the information and the reason why you cannot comply by the original deadline. Thanks for your cooperation. See request below:

Wendy Weiser of the Brennan Center for Justice has submitted a FOIA request for the voting fraud report prepared by our consultants and the voter ID report, as well as the following information:

"In the event that the EAC denies my renewed request for the voter ID and voting fraud reports or delays another week in providing those materials, we respectfully request copies of (1) all requests for proposals and contracts relating to the voter ID and voting fraud reports; and (2) all written and electronic communications concerning the voter ID and voting fraud reports between the EAC and (a) the Eagleton Institute of Politics, (b) the Moritz College of Law, (c) Tova Wang, (d) Job Serebrov, and (e) any other individuals or entities, including but not limited to outside reviewers."

Subject Re: Revised summaries of interviews with Donsanto and Tanner 

Attached are my comments and suggested edits to this section. They should show up in green; at least that is the color on my screen.

I feel very strongly and therefore I recommend that EAC explain that it made clarifying edits to some of the text in the summaries of the DOJ interviews. The consultants provided us with lots of material and that is the only section we changed. If we don't offer a straightforward explanation, then I think we invite more problems and headaches. I offered suggested language in the attached.

DOJ Interviews.doc

030444

**Interview with Craig Donsanto, Director, Elections Crimes Branch, Public Integrity Section, U.S. Department of Justice**  
January 13, 2006

The Department of Justice's (DOJ) Election Crimes Branch is responsible for supervising federal criminal investigations and prosecutions of election crimes.

Questions

*How are Prosecution Decisions Made?*

Craig Donsanto must approve all investigations that go beyond a preliminary stage, all charges, search warrant applications and subpoenas and all prosecutions. The decision to investigate is very sensitive because of the public officials involved. If a charge seems political, Donsanto will reject it. Donsanto gives possible theories for investigation. Donsanto and Noel Hillman will decide whether to farm out the case to an Assistant U.S. Attorney (AUSA). Donsanto uses a concept called predication. In-other-words, there must be enough evidence to suggest a crime has been committed. The method of evaluation of this evidence depends on the type of evidence and its source. There are two types of evidence---factual (antisocial behavior) and legal (antisocial behavior leading to statutory violations). Whether an indictment will be brought depends on the likelihood of success before a jury. Much depends on the type of evidence and the source. Donsanto said he "knows it when he sees it." Donsanto will only indict if he is confident of a conviction assuming the worst case scenario – a jury trial.

A person under investigation will first receive a target letter. Often, a defendant who gets a target letter will ask for a departmental hearing. The defendant's case will be heard by Donsanto and Hillman. On occasion, the assistant attorney general will review the case. The department grants such hearings because such defendants are likely to provide information about others involved.

Deleted:  
Deleted:  
Deleted:  
Deleted: easily

The Civil Rights Division, Voting Rights Section makes its own decisions on prosecution. The head of that division is John Tanner. There is a lot of cooperation between the Voting Section and the Election Crimes Branch.

*Does the Decision to Prosecute Incorporate Particular Political Considerations within a State Such as a One Party System or a System in which the Party in Power Controls the Means of Prosecution and Suppresses Opposition Complaints?*

Yes. Before, the department would leave it to the states. Now, if there is racial animus involved in the case, there is political bias involved, or the prosecutor is not impartial, the department will take it over.

Deleted: 1

*Does it Matter if the Complaint Comes from a Member of a Racial Minority?*

No. But if the question involves racial animus, that has also always been an aggravating

| factor, making it more likely the department will take it over

Deleted: D

*What Kinds of Complaints Would Routinely Override Principles of Federalism?*

Federalism is no longer big issue. DOJ is permitted to prosecute whenever there is a candidate for federal office on the ballot.

*Are There Too Few Prosecutions?*

DOJ can't prosecute everything.

*What Should Be Done to Improve the System?*

The problem is asserting federal jurisdiction in non-federal elections. It is preferable for the federal government to pursue these cases for the following reasons: federal districts draw from a bigger and more diverse jury pool; the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected; DOJ has more resources – local prosecutors need to focus on personal and property crimes---fraud cases are too big and too complex for them; DOJ can use the grand jury process as a discovery technique and to test the strength of the case.

In *U.S. v. McNally*, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to “fix” *McNally*, did not include voter fraud.

As a result, the department needs a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce. The department has drafted such legislation, which was introduced but not passed in the early 1990s. A federal law is needed that permits prosecution in any election where any federal instrumentality is used.

*Other Information*

| The Department has held four symposia for District Election Officers (DEOs) and FBI agents since the initiation of the Ballot Access and Voting Integrity Initiative. In 2003, civil rights leaders were invited to make speeches, but were not permitted to take part in the rest of the symposium. All other symposia have been closed to the public.

Deleted: (Peg will be sending us the complete training materials used at those sessions. These are confidential and are the subject of FOIA litigation).

There are two types of attorneys in the division: prosecutors, who take on cases when the jurisdiction of the section requires it; the US Attorney has recused him or herself; or when the US Attorney is unable to handle the case (most frequent reason) and braintrust attorneys who analyze the facts, formulate theories, and draft legal documents.

| Cases

Deleted: :

Formatted: Underline

Donsanto provided us with three case lists: cases still being investigated as of January 13, 2006 – confidential; election fraud prosecutions and convictions as a result of the Ballot Access and Voting Integrity Initiative October 2002-January 13, 2006; and cases closed for lack of evidence as of January 13, 2006.

Deleted: Open  
Deleted: (  
Deleted: )

If we want more documents related to any case, we must get those documents from the states. The department will not release them to us.

Although the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate complaints of fraud, *the number of cases that the department is investigating and the number of indictments the department is pursuing are both up dramatically.*

Since 2002, the department has brought more cases against alien voters, felon voters, and double voters than ever before. Previously, cases were only brought against conspiracies to corrupt the process rather than individual offenders acting alone. For deterrence purposes, the Attorney General decided to add the pursuit of individuals who vote when not eligible to vote (noncitizens, felons) or who vote more than once. The department is currently undertaking three pilot projects to determine what works in developing the cases and obtaining convictions and what works with juries in such matters to gain convictions:

Comment [GH1]: ??conspiracies  
Deleted: when there was a pattern or scheme  
Deleted: .  
Deleted: Charges were not brought against individuals – those cases went unprosecuted. This change in direction, focus, and level of aggression was by the decision of the Attorney General. The reason for the change was for deterrence purposes.  
Deleted: ¶  
Formatted: Bullets and Numbering  
Formatted: Bullets and Numbering

1. Felon voters in Milwaukee.
2. Alien voters in the Southern District of Florida. FYI – under 18 USC 611, to prosecute for “alien voting” there is no intent requirement. Conviction can lead to deportation. Nonetheless, the department feels compelled to look at mitigating factors such as was the alien told it was OK to vote, does the alien have a spouse that is a citizen.
3. Double voters in a variety of jurisdictions.

Formatted: Bullets and Numbering

The department does not maintain records of the complaints that come in from DEOs, U.S attorneys and others during the election that are not pursued by the department. Donsanto asserted that U.S. attorneys never initiate frivolous investigations.

*According to the new handbook, the department can take on a case whenever there is a federal candidate on the ballot*

**Interview with John Tanner, Chief, Voting Section, Civil Rights Division, U.S. Department of Justice**

Deleted: Director

February 24, 2006

The Department of Justice's (DOJ) Voting Section is charged with the civil enforcement of the Voting Rights Act, the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), the National Voter Registration Act (NVRA), and Title III of the Help America Vote Act (HAVA).

Authority and Process

The Voting Section, in contrast to the Public Integrity Section as Craig Donsanto described it, typically focuses only on systemic problems resulting from government action or inaction, not problems caused by individuals. Indeed, the section never goes after individuals because it does not have the statutory authority to do so. In situations in which individuals are causing problems at the polls and interfering with voting rights, the section calls the local election officials to resolve it.

Deleted: Note: Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. Mr. Tanner would not give us any information about or data from the section's election complaint in-take phone logs; data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws; and would give us only a selected few samples of attorney-observer reports, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. He would not discuss in any manner any current investigations or cases the section is involved in. He also did not believe it was his position to offer us recommendations as to how his office, elections, or the voting process might be improved.¶

Federal voting laws enforced by the section only apply to state action, so the section only sues state and local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. Doing it this way has been most effective – for example, while the section used to have the most observers in the South, with systematic changes forced upon those jurisdictions, the section now does not get complaints from the South.

The section can get involved even where there is no federal candidate on the ballot if there is a racial issue under the 14<sup>th</sup> and 15<sup>th</sup> Amendments.

When the section receives a complaint, attorneys first determine whether it is a matter that involves individual offenders or a systemic problem. When deciding what to do with the complaint, the section errs on the side of referring it criminally to avoid having any civil litigation complicate a possible criminal case.

- Deleted: s
- Deleted: looks
- Deleted: at
- Deleted: have made it so now
- Deleted: of
- Deleted: because they do not want
- Deleted: to

When a complaint comes in, the attorneys ask questions to see if there are even problems there that the complainant is not aware are violations of the law. For example, in the Boston case, the attorney did not just look at Spanish language cases under section 203, but also brought a Section 2 case for violations regarding Chinese and Vietnamese voters. When looking into a case, the attorneys look for specificity, witnesses and supporting evidence.

Often, lawsuits bring voluntary compliance.

Voter Intimidation

Many instances of what some people refer to as voter intimidation are more unclear now. For example, photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera. It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation.

The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.

The inappropriate use of challengers on the basis of race would be a violation of the law. Mr. Tanner was unaware that such allegations were made in Ohio in 2004. He said there had never been a formal investigation into the abusive use of challengers.

Deleted: n

Mr. Tanner said a lot of the challenges are legitimate because you have a lot of voter registration fraud as a result of groups paying people to register voters by the form. They turn in bogus registration forms. Then the parties examine the registration forms and challenge them because 200 of them, for example, have addresses of a vacant lot.

However, Mr. Tanner said the department was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama, as was referenced in a February 23 Op-Ed in USA Today. Mr. Tanner reiterated the section takes racial targeting very seriously.

Deleted: D

Refusal to provide provisional ballots would be a violation of the law that the section would investigate.

Deceptive practices are committed by individuals and would be a matter for the Public Integrity Section. Local government would have to be involved for the Voting Section to become involved.

Deleted: voting

Deleted: s

Unequal implementation of ID rules, or asking minority voters only for ID would be something the section would go after. Mr. Tanner was unaware of allegations of this in 2004. He said this is usually a problem where you have language minorities and the poll workers cannot understand the voters when they say their names. The section has never formally investigated or solely focused a case based on abuse of ID provisions. However, implementation of ID rules was part of the Section 2 case in San Diego. Mr. Tanner reiterated that the section is doing more than ever before.

When asked about the section's references to incidents of vote fraud in the documents related to the new state photo identification requirements, Mr. Tanner said the section only looks at retrogression, not at the wisdom of what a legislature does. In Georgia, for example, everyone statistically has identification, and more blacks have ID than whites. With respect to the letter to Senator Kit Bond regarding voter ID, the section did refer to the perception of concern about dead voters because of reporting by the Atlanta Journal-Constitution. It is understandable that when you have thousands of bogus registrations that there would be concerns about polling place fraud. Very close elections make this even more of an understandable concern. Putting control of registration lists in the hands

of the states will be helpful because at this higher level of government you find a higher level of professionalism.

It is hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. However, the enforcement of federal law over the years has made an astounding difference so that the level of discrimination has plummeted. Registration of minorities has soared, as can be seen on the section's website. Mr. Tanner was unsure if the same was true with respect to turnout, but the gap is less. That information is not on the section's website.

The section is not filing as many Section 2 cases as compared to Section 203 cases because many of the jurisdictions sued under Section 2 in the past do not have issues anymore. Mr. Tanner said that race based problems are rare now.

NVRA has been effective in opening up the registration process. In terms of enforcement, Mr. Tanner said they do what they can when they have credible allegations. There is a big gap between complaints and what can be substantiated. Mr. Tanner stated that given the high quality of the attorneys now in the section, if they do not investigate it or bring action, that act complained of did not happen.

#### Recommendations

Mr. Tanner did not feel it was appropriate to make recommendations.

Consultants Note: Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. We did not have access to any information about or data from the section's election complaint in-take phone logs or data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws. Only a selected few samples of attorney-observer reports were provided, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. Mr. Tanner would not discuss any current investigations or cases the section is involved in.

EAC made clarifying edits to this portion of the consultants' report.

**Comment [GH2]:** The consultants did not say, "we contend," and I do not think EAC should put words in their mouth, so to speak.

**Deleted:** We contend that

**Formatted:** Highlight

**Formatted:** Highlight

**Formatted:** Highlight

**Comment [GH3]:** I feel quite strongly that EAC needs to acknowledge that it edited this portion of the consultants' report because of all the materials they submitted and that we are attaching as appendices, this is the only section we are changing.

Subject Revised summaries of interviews with Donsanto and Tanner

Commissioners,

Per your request, please see attached the proposed edits to the summaries of the interviews with Craig Donsanto and John Tanner.

Please get me your comments by Monday COB so that we can finalize this document in time for the meeting next week.

Juliet Thompson Hodgkins

(202) 566-3100 Summaries of Interviews with Donsanto-Tanner redacted-revised.doc

030451

**Interview with Craig Donsanto, Director, Elections Crimes Branch, Public Integrity Section, U.S. Department of Justice**  
January 13, 2006

The Department of Justice's (DOJ) Election Crimes Branch is responsible for supervising federal criminal investigations and prosecutions of election crimes.

Questions

*How are Prosecution Decisions Made?*

Craig Donsanto must approve all investigations that go beyond a preliminary stage, all charges, search warrant applications and subpoenas and all prosecutions. The decision to investigate is very sensitive because of the public officials involved. If a charge seems political, Donsanto will reject it. Donsanto gives possible theories for investigation. Donsanto and Noel Hillman will decide whether to farm out the case to an Assistant U.S. Attorney (AUSA). Donsanto uses a concept called predication. In-other-words, there must be enough evidence to suggest a crime has been committed. The method of evaluation of this evidence depends on the type of evidence and its source. There are two types of evidence--factual (antisocial behavior) and legal (antisocial behavior leading to statutory violations). Whether an indictment will be brought depends on the likelihood of success before a jury. Much depends on the type of evidence and the source. Donsanto said he "knows it when he sees it." Donsanto will only indict if he is confident of a conviction assuming the worst case scenario – a jury trial.

A person under investigation will first receive a target letter. Often, a defendant who gets a target letter will ask for a departmental hearing. The defendant's case will be heard by Donsanto and Hillman. On occasion, the assistant attorney general will review the case. The department grants such hearings because such defendants are likely to provide information about others involved.

Deleted:  
Deleted:  
Deleted: easily

The Civil Rights Division, Voting Rights Section makes its own decisions on prosecution. The head of that division is John Tanner. There is a lot of cooperation between the Voting Section and the Election Crimes Branch.

*Does the Decision to Prosecute Incorporate Particular Political Considerations within a State Such as a One Party System or a System in which the Party in Power Controls the Means of Prosecution and Suppresses Opposition Complaints?*

Yes. Before, the department would leave it to the states. Now, if there is racial animus involved in the case, there is political bias involved, or the prosecutor is not impartial, the department will take it over.

Deleted: .]

*Does it Matter if the Complaint Comes from a Member of a Racial Minority?*

No. But if the question involves racial animus, that has also always been an aggravating

factor, making it more likely the department will take it over

Deleted: D

*What Kinds of Complaints Would Routinely Override Principles of Federalism?*

Federalism is no longer big issue. DOJ is permitted to prosecute whenever there is a candidate for federal office on the ballot.

*Are There Too Few Prosecutions?*

DOJ can't prosecute everything.

*What Should Be Done to Improve the System?*

The problem is asserting federal jurisdiction in non-federal elections. It is preferable for the federal government to pursue these cases for the following reasons: federal districts draw from a bigger and more diverse jury pool; the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected; DOJ has more resources – local prosecutors need to focus on personal and property crimes---fraud cases are too big and too complex for them; DOJ can use the grand jury process as a discovery technique and to test the strength of the case.

In *U.S. v. McNally*, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to “fix” *McNally*, did not include voter fraud.

As a result, the department needs a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce. The department has drafted such legislation, which was introduced but not passed in the early 1990s. A federal law is needed that permits prosecution in any election where any federal instrumentality is used.

*Other Information*

The Department has held four symposia for District Election Officers (DEOs) and FBI agents since the initiation of the Ballot Access and Voting Integrity Initiative. In 2003, civil rights leaders were invited to make speeches, but were not permitted to take part in the rest of the symposium. All other symposia have been closed to the public.

Deleted: (Peg will be sending us the complete training materials used at those sessions. These are confidential and are the subject of FOIA litigation).

There are two types of attorneys in the division: prosecutors, who take on cases when the jurisdiction of the section requires it; the US Attorney has recused him or herself; or when the US Attorney is unable to handle the case (most frequent reason) and braintrust attorneys who analyze the facts, formulate theories, and draft legal documents.

Cases

Deleted: ;  
Formatted: Underline

Donsanto provided us with three case lists: cases still being investigated as of January 13, 2006 – confidential; election fraud prosecutions and convictions as a result of the Ballot Access and Voting Integrity Initiative October 2002-January 13, 2006; and cases closed for lack of evidence as of January 13, 2006.

Deleted: Open  
Deleted: (  
Deleted: )

If we want more documents related to any case, we must get those documents from the states. The department will not release them to us.

Although the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate complaints of fraud, *the number of cases that the department is investigating and the number of indictments the department is pursuing are both up dramatically.*

Since 2002, the department has brought more cases against alien voters, felon voters, and double voters than ever before. Previously, cases were only brought against conspiracies to corrupt the process rather than individual offenders acting alone. For deterrence purposes, the Attorney General decided to add the pursuit of individuals who vote when not eligible to vote (noncitizens, felons) or who vote more than once. The department is currently undertaking three pilot projects to determine what works in developing the cases and obtaining convictions and what works with juries in such matters to gain convictions:

Deleted: when there was a pattern or scheme  
Deleted: .  
Deleted: Charges were not brought against individuals – those cases went unprosecuted. This change in direction, focus, and level of aggression was by the decision of the Attorney General. The reason for the change was for deterrence purposes.  
Deleted: ¶  
Formatted: Bullets and Numbering  
Formatted: Bullets and Numbering

1. Felon voters in Milwaukee.
2. Alien voters in the Southern District of Florida. FYI – under 18 USC 611, to prosecute for “alien voting” there is no intent requirement. Conviction can lead to deportation. Nonetheless, the department feels compelled to look at mitigating factors such as was the alien told it was OK to vote, does the alien have a spouse that is a citizen.
3. Double voters in a variety of jurisdictions.

Formatted: Bullets and Numbering

The department does not maintain records of the complaints that come in from DEOs, U.S attorneys and others during the election that are not pursued by the department. Donsanto asserted that U.S. attorneys never initiate frivolous investigations.

*According to the new handbook, the department can take on a case whenever there is a federal candidate on the ballot*

Deleted: Director

February 24, 2006

The Department of Justice's (DOJ) Voting Section is charged with the civil enforcement of the Voting Rights Act, the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), the National Voter Registration Act (NVRA), and Title III of the Help America Vote Act (HAVA).

Authority and Process

The Voting Section, in contrast to the Public Integrity Section as Craig Donsanto described it, typically focuses only on systemic problems resulting from government action or inaction, not problems caused by individuals. Indeed, the section never goes after individuals because it does not have the statutory authority to do so. In situations in which individuals are causing problems at the polls and interfering with voting rights, the section calls the local election officials to resolve it.

Deleted: Note: Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. Mr. Tanner would not give us any information about or data from the section's election complaint in-take phone logs; data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws; and would give us only a selected few samples of attorney-observer reports, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. He would not discuss in any manner any current investigations or cases the section is involved in. He also did not believe it was his position to offer us recommendations as to how his office, elections, or the voting process might be improved.¶

Federal voting laws enforced by the section only apply to state action, so the section only sues state and local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. Doing it this way has been most effective – for example, while the section used to have the most observers in the South, with systematic changes forced upon those jurisdictions, the section now does not get complaints from the South.

The section can get involved even where there is no federal candidate on the ballot if there is a racial issue under the 14<sup>th</sup> and 15<sup>th</sup> Amendments.

When the section receives a complaint, attorneys first determine whether it is a matter that involves individual offenders or a systemic problem. When deciding what to do with the complaint, the section errs on the side of referring it criminally to avoid having any civil litigation complicate a possible criminal case.

Deleted: s  
Deleted: looks  
Deleted: at  
Deleted: have made it so now  
Deleted: of  
Deleted: because they do not want  
Deleted: to

When a complaint comes in, the attorneys ask questions to see if there are even problems there that the complainant is not aware are violations of the law. For example, in the Boston case, the attorney did not just look at Spanish language cases under section 203, but also brought a Section 2 case for violations regarding Chinese and Vietnamese voters. When looking into a case, the attorneys look for specificity, witnesses and supporting evidence.

Often, lawsuits bring voluntary compliance.

Voter Intimidation

Many instances of what some people refer to as voter intimidation are more unclear now. For example, photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera. It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation.

The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.

The inappropriate use of challengers on the basis of race would be a violation of the law. Mr. Tanner was unaware that such allegations were made in Ohio in 2004. He said there had never been a formal investigation into the abusive use of challengers.

Deleted: n

Mr. Tanner said a lot of the challenges are legitimate because you have a lot of voter registration fraud as a result of groups paying people to register voters by the form. They turn in bogus registration forms. Then the parties examine the registration forms and challenge them because 200 of them, for example, have addresses of a vacant lot.

However, Mr. Tanner said the department was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama, as was referenced in a February 23 Op-Ed in USA Today. Mr. Tanner reiterated the section takes racial targeting very seriously.

Deleted: D

Refusal to provide provisional ballots would be a violation of the law that the section would investigate.

Deceptive practices are committed by individuals and would be a matter for the Public Integrity Section. Local government would have to be involved for the Voting Section to become involved.

Deleted: voting

Deleted: s

Unequal implementation of ID rules, or asking minority voters only for ID would be something the section would go after. Mr. Tanner was unaware of allegations of this in 2004. He said this is usually a problem where you have language minorities and the poll workers cannot understand the voters when they say their names. The section has never formally investigated or solely focused a case based on abuse of ID provisions. However, implementation of ID rules was part of the Section 2 case in San Diego. Mr. Tanner reiterated that the section is doing more than ever before.

When asked about the section's references to incidents of vote fraud in the documents related to the new state photo identification requirements, Mr. Tanner said the section only looks at retrogression, not at the wisdom of what a legislature does. In Georgia, for example, everyone statistically has identification, and more blacks have ID than whites. With respect to the letter to Senator Kit Bond regarding voter ID, the section did refer to the perception of concern about dead voters because of reporting by the Atlanta Journal-Constitution. It is understandable that when you have thousands of bogus registrations that there would be concerns about polling place fraud. Very close elections make this even more of an understandable concern. Putting control of registration lists in the hands

of the states will be helpful because at this higher level of government you find a higher level of professionalism.

It is hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. However, the enforcement of federal law over the years has made an astounding difference so that the level of discrimination has plummeted. Registration of minorities has soared, as can be seen on the section's website. Mr. Tanner was unsure if the same was true with respect to turnout, but the gap is less. That information is not on the section's website.

The section is not filing as many Section 2 cases as compared to Section 203 cases because many of the jurisdictions sued under Section 2 in the past do not have issues anymore. Mr. Tanner said that race based problems are rare now.

NVRA has been effective in opening up the registration process. In terms of enforcement, Mr. Tanner said they do what they can when they have credible allegations. There is a big gap between complaints and what can be substantiated. Mr. Tanner stated that given the high quality of the attorneys now in the section, if they do not investigate it or bring action, that act complained of did not happen.

#### Recommendations

Mr. Tanner did not feel it was appropriate to make recommendations.

Note: We contend that Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. We did not have access to any information about or data from the section's election complaint intake phone logs or data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws. Only a selected few samples of attorney-observer reports were provided, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. Mr. Tanner would not discuss any current investigations or cases the section is involved in.

Tom,  
I know you haven't responded to my FOIA request b/c of what you've got going on, but I wanted to bring it to your attention b/c I'm pretty sure you've got some related emails. According to Karen, you and John Weingardt had email exchanges primarily after June 30. I'll need to get all of those and any letters or any other correspondence b/w the two of you. I asked for everyone to submit what they have by Monday. Perhaps Bert can begin gathering this info. See the original request below.

030458

I need each of you to respond affirmatively or negatively to the FOIA request below. **If you have no documents in your possession related to this request , please reply to me with the words "no records."** If you have records, please identify them in an e-mail reply and attach them to the e-mail. If the document is not electronic, hand deliver them to me. Also, if you believe any of these related documents should be withheld, please provide a brief memo stating the reason for your position.

I need this information and/or a response by **COB December 5, 2006**. If you cannot comply by this date, please provide notification and an estimated time when you will provide the information and the reason why you cannot comply by the original deadline. Thanks for your cooperation. See request below:

Wendy Weiser of the Brennan Center for Justice has submitted a FOIA request for the voting fraud report prepared by our consultants and the voter ID report, as well as the following information:

"In the event that the EAC denies my renewed request for the voter ID and voting fraud reports or delays another week in providing those materials, we respectfully request copies of (1) all requests for proposals and contracts relating to the voter ID and voting fraud reports; and (2) all written and electronic communications concerning the voter ID and voting fraud reports between the EAC and (a) the Eagleton Institute of Politics, (b) the Moritz College of Law, (c) Tova Wang, (d) Job Serebrov, and (e) any other individuals or entities, including but not limited to outside reviewers."

Please let me know if you would like a copy of the FOIA request.

EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY

**INTRODUCTION**

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and, at times, even the correct application of state or federal laws to the voting process. Past study of this topic has been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the existence and enforcement of election crimes in this country.

Deleted: true

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation was a topic that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

Deleted: U.S. Election Assistance Commission (

Deleted: )

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding that had to first be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

Deleted: That

Deleted: is well beyond the

Deleted: be

To accomplish these tasks, EAC employed two consultants, who worked with EAC staff and interns to conduct the research that forms the basis of this report. Consultants were chosen based upon their experience with the topic and to assure a bipartisan representation in this study. The consultants and EAC staff were charged (1) to research the current state of information on the topic of voter fraud and voter intimidation; (2) to develop a uniform definition of voter fraud and voter intimidation; and (3) to propose recommended strategies for researching this subject.

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

**EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books.

Deleted: What the world knows

There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

### Reports and Studies of Voter Fraud and Intimidation

Over the years, there have been a number of studies conducted about the concepts of voter fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “\_”:

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection (is this DOJ?) program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District

Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate, because there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, even legal practices, that allege suppression of the vote.

Deleted: . Generally, speaking t

Deleted: they

Deleted: suppress

One point of agreement is that absentee voting and voter registration by third-party groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of voters of a certain party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### Interviews with Experts

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Pat Rogers**  
Attorney, New Mexico

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Lori Minnite**  
Barnard College, Columbia University

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Neil Bradley**  
ACLU Voting Rights Project

**Chandler Davidson**  
Rice University

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Tracey Campbell**  
Author, *Deliver the Vote*

**Douglas Webber**  
Assistant Attorney General, Indiana

**Heather Dawn Thompson**

Director of Government Relations,  
National Congress of American Indians

**Kevin Kennedy**  
Executive Director  
State Board of Elections, Wisconsin

**Jason Torchinsky**  
Assistant General Counsel,  
American Center for Voting Rights

**Evelyn Stratton**  
Justice  
Supreme Court of Ohio

**Robin DeJarnette**  
Executive Director,  
American Center for Voting Rights

**Tony Sirvello**  
Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Harry Van Sickle**  
Commissioner of Elections,  
Pennsylvania

**Joseph Rich**  
Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Joseph Sandler**  
Counsel  
Democratic National Committee

**Craig Donsanto**  
Director, Public Integrity Section  
U.S. Department of Justice

**John Ravitz**  
Executive Director  
New York City Board of Elections

**John Tanner**  
Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Sharon Priest**  
Former Secretary of State, Arkansas

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it was the most likely type of fraud to be discovered and due to the stiff penalties associated with this type of fraud.

Deleted: , citing as reasons that  
Deleted: that there are stiff

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Deleted: the location of  
Deleted: s

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states,

enforcement is left to the county or district attorney, and in others enforcement is managed by the state’s attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute crimes related to elections involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement, including those who allege that prosecutions are not sufficiently aggressive and those who feel that the current laws are sufficient for prosecuting fraud and intimidation.

Deleted: that

A summary of the each of the interviews conducted is attached as Appendix “ \_\_\_ ”.

### Case Law and Statutes

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from appeal courts. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Deleted: over

Deleted: a

Deleted: situation

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem (WHY DID IT “SEEM” THIS WAY? IS THERE EVIDENCE?) that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “ \_\_\_ ”.

### Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charge and prosecutions of voter fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

Deleted: is and what is not

Deleted: In order to

Deleted: come up with

### New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud, n. 1.** A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voter fraud” does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, “voter fraud” does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

Deleted: n otherwise

To further complicate matters, the phrases “voter fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the civil division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voter fraud” and “voter intimidation” that would serve as the basis of a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

**The Definition of an Election Crime for Purposes of this Study**

Deleted: What is an

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Deleted: ,  
Deleted: ,  
Deleted: ,  
Deleted: ,

Generally speaking, election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

Deleted: that  
Deleted: knowing

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

*Acts of Deception*

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter’s precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate at one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

Deleted: regarding  
Deleted: regarding

*Acts of Coercion*

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person’s right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or delay the process of voting;

Deleted: able thing

- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

Deleted: able thing

***Acts of Damage or Destruction***

- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

Deleted: for the purpose of enabling the voter to vote his or her ballot

Deleted: he

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;

- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

### What is not an Election Crime for Purposes of this Study

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All crimes or civil violations related to campaign finance reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes,” and actions that do not rise to the level of criminal activity, such as a misdemeanor, relative felony or felony, are not “election crimes.”

### RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

Deleted: study

Deleted: developed recommendations. In addition, the working group and some of the persons interviewed

#### *Recommendation 1: Conduct More Interviews*

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

Deleted: people in

#### *Recommendation 2: Follow Up on Media Research*

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, many of the articles contained information about investigations into such activities or even charges brought. (THIS SENTENCE CONTRADICTS WHAT WAS SAID EARLIER ABOUT THE LACK OF MEDIA ARTICLES ON FOLLOW UP.) Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

#### *Recommendation 3: Follow Up on Allegations Found in Literature Review*

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

**Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline**

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Deleted: 1-800  
Deleted: where  
Deleted: over  
Deleted: over

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

Deleted: 200,000  
Deleted: a good deal of  
Deleted: those in the nature of

**Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice**

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety in ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” (NOT SURE WHAT THIS MEANS) from Election Day.

Deleted: Although a

**Recommendation 6: Review Reports Filed By District Election Officers**

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

**Recommendation 7: Attend Ballot Access and Voting Integrity Symposium**

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys’ Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of

the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

**Recommendation 8: Conduct Statistical Research**

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- o Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- o Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

Deleted: historically

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. (WHAT WOULD WE SURVEY THEM ABOUT?) The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

Deleted: . The sample

**Recommendation 9: Explore Improvements to Federal Law**

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

**Recommendation 10: Use Observers to Collect Data on Election Day**

Use observers to collect data regarding fraud and intimidation at the polls in on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation.

**Recommendation 11: Study Absentee Ballot Fraud**

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

Deleted: them

Deleted: .

**Recommendation 12: Use Risk Analysis Methodology to Study Fraud**

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” (WHAT DOES THIS MEAN?) and the impact of the fraud.

Deleted: can

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons actually voted.

Deleted: voters

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

Deleted: actually

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

**Accepted Recommendations**

There has never been a comprehensive study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a

comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

Deleted: what

Deleted: are

In order to further its goal of developing a comprehensive data set regarding election crimes, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

#### *Survey Chief Election Officers Regarding Administrative Complaints*

Likely sources of complaints concerning voting crimes are the administrative complaint processes that states were required to establish as a part of complying with HAVA. Those complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints under those procedures with the state's chief election official, and those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

Deleted: can

#### *Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred*

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

Deleted: This

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

***Analyze Survey Data in Light of State Laws and Procedures***

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

**CONCLUSION**

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but

## **PFAW Presses Election Assistance Commission to Release Report Debunking Myth of Voter “Fraud”**

Despite requests, the Election Assistance Commission is refusing to release a report written months ago that reportedly pokes holes in the widespread myth that voter fraud is rampant in America. EAC Chairman Paul S. DeGregorio Thursday denied a request by People For the American Way Foundation (PFAWF) to make the taxpayer-funded findings available to the public in time for the November elections, now less than three weeks away. PFAWF President Ralph G. Neas said the information should be released immediately and questions whether the report is being suppressed for political reasons.

The existence of the report was revealed days ago by *USA Today*, which reported that instances in which non-eligible persons attempt to pass themselves off as voters and somehow cast fraudulent votes are exceedingly rare. PFAWF’s sister advocacy organization, People For the American Way, has launched a petition drive asking the commissioners to release the report, since it will refute rampant allegations of voter fraud which have led to restrictive voting requirements.

“As we approach the elections, the last thing election officials need is to labor under the false impression that ineligible people are trying to pass themselves off as qualified voters at the polls. They should be focusing on ways to keep the path to the ballot box clear for as many eligible voters as possible, instead of looking for nonexistent fraud that will slow down the process and possibly even discourage eligible voters,” said PFAW President Ralph G. Neas. “We need to raise confidence in our elections process, not allow harmful myths to stand – especially when the government has findings available to refute them.”

Neas sent a letter on behalf of PFAW Foundation to the EAC earlier this week asking that the report be made available to the public, but on Thursday the EAC denied the request. The report was written by by Tova Wang, an elections scholar at the Century Foundation think tank, and Job Serebroy, an Arkansas attorney, and has been in the hands of the EAC commissioners for more

030481

than four months.

Neas said the report has critical implications for election legislation around the country. During the past few years, a number of states have passed legislation to combat supposed “voter fraud” through overly restrictive identification requirements and other impediments to the ballot box. According to USA Today, the report found such voter fraud to be exceedingly rare.

“We have plenty of problems to deal with. We’ve all seen long lines, unreliable voting equipment, purges that wrongly remove eligible voters from the roll. It turns out the problem is not that bad people are trying to vote, but that too many qualified voters are discouraged from voting. This report apparently confirms what common sense has told us for years – we need to make it easier for eligible voters to cast a vote that counts, not harder,” said Neas. “Instead of fighting nonexistent fraud, these restrictive new laws will discourage voters – people like senior citizens, students and disabled voters who may not have drivers’ licenses or other forms of ID required by these new laws. That’s just wrong, and is clearly not supported by the evidence.”

Neas said the new laws are often politically motivated. The misleadingly-named right-wing group the American Center for Voting Rights has supported extremely restrictive laws by pointing to supposed voting fraud.

“Any law that disadvantages certain groups of voters – like senior citizens and students – should be suspect. If the voters are disadvantaged, which political parties and candidates stand to gain? The same question should be asked about the reason the release of this report has been delayed. Is there a political motivation?” he asked. “Has this study been buried because anti-voter activists like the American Center for Voting Rights find its conclusions inconvenient? That’s unacceptable. The Commissioners of the EAC have had this report for months, even as they have testified before Congress on critical legislation that could have been informed by the report’s findings. It’s unconscionable.”

Laws passed in several states this year raise barriers to the ballot box that would prevent poor, elderly, and minority voters from casting a ballot. PFAW’s sister organization, People For the American Way Foundation, has challenged laws in Ohio, Missouri, and Arizona; in all three, the laws were either struck down or stayed until after the November election. Yet restrictions still in effect in a number of states could harm voters. One such provision, stringent ID requirement, has been likened to a modern day poll tax.

Said Neas, "All American citizens have a vested interest in having fair and open elections. This report contains valuable information that can help us do that. The EAC should release the report immediately, no matter what the political implications may be and hold public hearings to discuss the findings."

PFAW's petition can be found at [www.ReleaseTheReport.com](http://www.ReleaseTheReport.com).

Subject Research Project Descriptions

Jeannie:

Here are the changes I suggested for the Vote Count-Recount and the Voting Fraud-Voter Intimidation research projects. I don't think they will help the current situation much, as the original VF-VI description already stated that it is preliminary research. As it is preliminary research, we did not expect that it would provide a total picture of voting fraud and voter intimidation in this country. We just wanted to get some sense of what is going on, and a better idea of the direction future EAC research on the subject should take. To ensure that the research would be balanced, we had consultants and project working group members from opposing sides of the political spectrum.

According to folks intimately familiar with the development of HAVA, disputes over the extent to which voting fraud and voter intimidation existed caused Congress to add the study of these subjects to EAC's list of research projects. Given the nature of the subject (most offenders try to hide their activities, sufficient evidence is hard come by with some types of activity, and prosecution of offenses may not occur for political or budgetary reasons), it is doubtful that we will ever have completely reliable statistics on occurrences of voting fraud and voter intimidation, but we may be able to obtain better statistics than anyone else has. And we should be able to identify where in the voting process most offenses tend to occur and to explore alternatives for addressing vulnerabilities that leave the process open to corruption.

Rev Descriptions for Web Site Descriptions of Vote Counts- Recounts and Voting Fraud Research 9-6-06.doc

030484

**Vote Counts and Recounts**

Section 241(b)(13) of HAVA allows EAC to study the laws and procedures used by each state that govern recounts of ballots cast in elections for Federal office, contests of determinations regarding whether votes are counted in such elections, and standards that define what will constitute a vote on each type of voting equipment used in the state to conduct elections for Federal office. The law also authorizes EAC to identify best practices that are used by States for recounts and contests. Consequently, in FY 2005, EAC began conducting research to develop best practices on vote count and recount laws and procedures. A major tasks associated with this research is the review of literature for methodologies used to establish best practices and developing definitions of what constitutes a best practice with respect to vote counts, recounts, and election contests. Major tasks specifically associated with the vote count research include: (1) reviewing and analyzing data collected on definitions of what constitutes a vote for each state by voting system, including processes for handling and counting ballots, provisions for observing the count, types of accounting and auditing procedures used to ensure an accurate accounting of each ballot cast, and time periods provided between unofficial election night tallies and certification of official results; (2) drafting a comprehensive report that includes the data analysis and state-by-state summary of definitions of what constitutes a vote for each voting system and the laws and procedures used to tally ballots; and (3) identifying best practices related to vote counting. Major tasks specifically associated with recount and election contest research include: (1) reviewing and analyzing states' recount and contest laws and procedures; (2) drafting a comprehensive report that includes the data analysis and the State-by-State summary of recount and contest laws and procedures; and (3) identifying best practices with respect to recounts and election contests. After conducting the research, EAC will provide election officials throughout the country with recommended best practices for vote counts recounts, and contested elections; however, jurisdictions may not be permitted to implement these practices until their State election authority or their State legislature has determined which are appropriate to implement in the State.

Sections 241(b)(6) and (7) allow EAC to conduct and make available to the public studies regarding nationwide statistics and methods of identifying, deterring, and investigating voting fraud in election for Federal office; and identifying, deterring, and investigating methods of voter intimidation. Building on this reference to studies of voting fraud and voting intimidation, EAC is conducting preliminary research on these issues. Activities include: (1) identifying what constitutes voting fraud and voter intimidation affecting Federal elections; (2) performing background research, including Federal and state-by-state administrative and case law review related to voting fraud and voter intimidation and a review of current voting fraud and voter intimidation activities taking place with key government agencies and civic and advocacy organizations; (3) identifying and convening a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation; and (4) writing a report summarizing the key findings, including suggestions for specific EAC activities to address these topics.

Subject RE: and the drama continues...

Jeannie,

I can't help what the bloggers do. And I didn't say this was some sort of cover-up by the EAC. Several people had mentioned the fraud study to me and said nothing was ever issued. I asked the chairman about that, and he told me what could be given to me was whatever had been discussed at the May meeting, nothing more. I asked for that, and you guys provided it. But it wasn't distributed publicly, right?

The bottom line from our point of view was that two consultants, from different political perspectives, had reached an interesting conclusion about fraud. We understand it isn't final, and we understand the EAC hasn't put its imprimatur on it. But we still found it newsworthy. I'm sorry if the story has been wrongly interpreted by some. It certainly was not my intention.

Rich,

I don't mean to beat a dead horse, but your article has really left the wrong impression. Go [here](#) and [here](#). Our [federal register notice](#) clearly stated that an update on our research activities was part of the agenda. And the document you have is just an update for the project, not a final or even a draft report. It's even called a STATUS report -- there is a difference b/w a preliminary report and an update. All of this was discussed at a meeting that was open to the public, but that was not mentioned in your article.

Nothing we can do now, but I really feel we got some unfair treatment here.

Subject AP voter fraud story posted

**Report: Voter fraud may be overstated**

By WILL LESTER  
Associated Press Writer  
Oct 11, 4:40 PM EDT  
October 11, 2006

WASHINGTON (AP) – The most common form of voter fraud involves absentee ballots, including forgery and coercion in getting older or ailing voters to fill them out, according to a preliminary report to the U.S. Election Assistance Commission.

But the report, delivered in May, suggested that reports of polling place fraud involving "dead" voters and voting by felons and non-citizens might be overstated. The researchers said there is far more anecdotal evidence about voter fraud than specific verifiable claims.

"On balance, more researchers find it to be less of a problem than is commonly described in political debate," the report said.

"Many times people put their own partisan spin on voter fraud and voter intimidation," EAC Chairman Paul DeGregorio said Wednesday.

DeGregorio said the report was only preliminary and cautioned that more investigation is needed to understand the amount of voter fraud in this country.

"Many times you see people attempting to commit fraud, but it never gets to the level of being reported," said DeGregorio, a former elections official in St. Louis. He noted a case of more than 1,400 suspect voter registration cards being investigated in St. Louis.

The preliminary report was prepared by Tova Wang, an elections expert at the Century Foundation think tank and Job Serebrov, an Arkansas attorney.

Conservatives have argued the problem of voter fraud is severe in some states, while liberals generally argue that voters face too many restrictions.

New state laws requiring voters to present identification at polling places have faced legal challenges in states such as Arizona and Georgia.

"It's absolutely a serious problem," said Thor Hearne, counsel to the American Center for Voting Rights. "It's an unfortunate reality, particularly in battleground states."

Those problems include voter fraud and voter intimidation, he said.

The final voter fraud report is expected after the Nov. 7 midterm elections, DeGregorio said.

I would hope that we can refer to it as a status report on the research project (prepared by EAC staff based upon information available at the time from our consultants, Tova and Job). Calling it a preliminary report has given rise to some confusion. That confusion has led to complaints from project working group members and requests from outsiders, who mistakenly think that EAC has released the document written by our consultant that fully reports on the preliminary research into voting fraud and voter intimidation and makes recommendations for future EAC action. --- Peggy

Mr. Chairman,

Will Lester of the Associated Press wants to interview you briefly via phone about the preliminary fraud report. I recommend you accomodate him, as he has dutifully covered EAC, and plans to include us in a story next week about the election lanscape. He has requested a copy of the preliminary report, which I am sending to him. He only needs a few minutes, and as we discussed, i think the message is that these are preliminary findings that we presented to our advisory boards to get their input. When the final report is complete, we will release it. You can also use some of the talking pts from your speech, such as the challenge related to the very definition of the term "fraud," as people define it differently. How about I set it up for noon?

The only question he asked that I don't know the answer to is when we expect the final report. Peg... please weigh in on this.

Mr. Chairman,  
Will Lester of the Associated Press wants to interview you briefly via phone about the preliminary fraud report. I recommend you accomodate him, as he has dutifully covered EAC, and plans to include us in a story next week about the election lanscape. He has requested a copy of the preliminary report, which I am sending to him. He only needs a few minutes, and as we discussed, i think the message is that these

030497

are preliminary findings that we presented to our advisory boards to get their input. When the final report is complete, we will release it. You can also use some of the talking pts from your speech, such as the challenge related to the very definition of the term "fraud," as people define it differently. How about I set it up for noon?

The only question he asked that I don't know the answer to is when we expect the final report. Peg... please weigh in on this.

Commissioners,

As you requested, I provided Tom and Julie a draft response to USA Today to accompany the docs requested by Richard Wolf. Julie revised it as follows and Tom agrees. Please let me know ASAP if you concur.

030500

Rich,

As we discussed, here are the docs you asked about that were presented at the board meetings in May and links to the meeting agenda. There are two reports: (1) a draft report produced by Eagleton Institute concerning provisional voting; and (2) a status report produced by EAC contractors regarding research being conducted on voter fraud and intimidation. The reports were presented by the contractors to the Standards Board and Board of Advisors for their input. This type of input is required for any guidance issued by EAC and is desired for any product that we provide to the election community and the public. Based on the input that was received from these boards, particularly regarding the questionable information contained in Eagleton's provisional voting report, EAC has not issued the Eagleton draft report as a final EAC document. As for the voter fraud and intimidation status report, it is merely an update on the status of the research conducted by the EAC contractors. A report and recommendations on future actions regarding this topic will be produced after EAC review of the preliminary research.

**Remarks by Paul DeGregorio  
Chairman, US Election Assistance Commission  
Voter Fraud/Intimidation Conference – Salt Lake City, Utah  
Center for Public Policy & Administration  
September 29, 2006**

Good afternoon, ladies and gentlemen. My name is Paul DeGregorio and I am the Chairman of the U.S. Election Assistance Commission. I would like to extend my thanks to Michael Alvarez, Thad Hall and Susan Hyde for organizing this conference and for inviting me to speak with you this afternoon.

My remarks today will focus on Voter Fraud and Voter Intimidation and how HAVA and the EAC address these issues.

The subject of voter fraud and voter intimidation can be a highly contentious issue. Since the 2004 election there has been a lot of discourse and writing about what constitutes election fraud and voter intimidation and how prevalent each may be in our society. While there are no clear numbers on the incidents of voter fraud and voter intimidation, what is clear is that the many groups are concerned about both issues and it is imperative that we continue to study and address them.

As you know, the EAC was created by The Help America Vote Act or "HAVA". HAVA represents the first major piece of federal legislation on national election reforms. Among other provisions, Section 241 of HAVA requires the EAC to conduct research on election administration issues. Among the tasks the EAC is to execute is the development of nationwide statistics and

methods of identifying, deterring, and investigating voting fraud and voter intimidation in elections for Federal office.

In September of 2005 the Commission hired consultants to begin a study of voting fraud and voter intimidation. This research project is charged with the development of a clear definition of what constitutes voting fraud and voter intimidation in Federal elections; identifying current activities of key government agencies, civic advocacy groups, and other organizations regarding these topics; the establishment of a working group of experts to discuss these issues; and production of a report to the EAC summarizing the findings that includes recommendations for future research if any. Our staff is reviewing the report that was submitted to the EAC last month and we expect to share our findings in the near future.

The lack of any solid statistics regarding voter fraud and intimidation can be attributed to two major factors. First is because there is wide disagreement about the definitions for the terms "fraud" and "intimidation." Some only consider it fraud if it falls under the criminal definitions of fraud. While others consider any form of an ineligible voter attempting to vote as fraud. I have even had it suggested to me that election officials who allow voters to cast ballots on touch screen machines without a voter-verified paper trail is election fraud. If that's the case, then we have a whole lot of fraud occurring out there.

The term intimidation is also wrought with ambiguity. Some only consider it intimidation if there is a physical or mental advantage of one party over the other, while others consider any difficulty in

the voting process as being intimidation. Because of these definitional differences there has been no clear way to study the amount of fraud or intimidation because everyone is using a different definition to help shape the statistics.

Also skewing the statistics about election fraud and voter intimidation is the political agenda or bias from both sides that accompanies much of the literature about the topic. Oftentimes we see fiery rhetoric on this issue that appears to me to want to “scare” people into voting or not voting. As a result of this political bias and the ambiguity that accompanies the terms “fraud” and “intimidation,” it is difficult to know when something has risen to the level to be considered fraud or simply is an accusation with no backing.

HAVA has several provisions that not only help to combat fraud but also make voting easier. Most notably section 303 of HAVA which requires each state to create “... a single, uniform, official, centralized, interactive, computerized statewide voter registration list...” This database is to be maintained at the state level and is to contain the name and registration information of every legally registered voter in the State.

The Statewide voter registration database is to serve as the single system for storing and managing the official list of registered voters throughout the state. It will be coordinated with other agencies databases within the state in order to insure the residence status of the voter.

The Statewide Voter Database serves a very important and specific function. It helps to prevent opportunities for fraud by allowing state election officials to check their registration information against the databases of other agencies in order to insure the status of the voters. Under HAVA, state election officials are given the right to remove those names that have been checked against state agency death records. Used correctly and efficiently, this would clearly help eliminate the problem of the use of a deceased person's name to vote or allow authorities to go after those who sign a dead person's name in the initiative or candidate petition process.

Also in section 303 of HAVA, State election officials are required to regularly update the registration list, removing only those individuals who are ineligible to vote in that election while updating the status of those eligible to vote. It is in this way that HAVA is helping to eliminate opportunities for fraud by eliminating ineligible voters from registration lists, while easing the process for those voters who are eligible.

One issue that has become particularly contentious is the issue of voter identification to combat voter fraud. As many of you know voter identification laws have lead to suits in Georgia, Indiana, Missouri, Ohio and Arizona with more to follow as states pass more identification laws.

In 2005-2006 the EAC commissioned research on voter identification practices in the 2004 election. To the surprise of no one the study found a lot of disagreement regarding the need for

voter identification laws and the way these laws should be applied.

Those in favor of voter identification laws argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. They propose stricter voter identification requirements to prevent one form of voter fraud -- that being multiple voting or voting by those who are not eligible.

However, opponents argue that stricter ID laws interfere with legitimate voter's access to the ballot. They fear that some voters may lack convenient access to the required ID documents. Both sides assert that their policy will engender faith in the electoral process among citizens.

At the heart of this entire debate is the balance that needs to be struck between allowing those who are eligible to vote the ability to vote while preventing those who are not eligible to vote from voting.

From my own personal experience in traveling the world to improve the election process, especially in emerging democracies in Eastern Europe, Africa and Asia, I witnessed little, if any, resistance to ID requirements, including photo ID requirements. Indeed, I believe the Carter-Baker Commission has cited this phenomenon in their recommendations on this issue. In the recent Presidential election in Haiti, which is the poorest country in the Western Hemisphere, voters were required to show a photo ID to cast ballots. Statistics provided by IFES showed that over 3 million Haitian citizens, or about 80% of the voting age population,

registered to vote at centers that took their picture and fingerprints, and that produced the ID they used on Election Day. These IDs were paid for by the Organization of American States. On Election Day, 60% of the registered Haitians went to the polls, used their IDs, and cast ballots in the presidential election. By the way the 60% turnout matched the 2004 turnout in the US presidential election.

I cite this example and the Carter-Baker study to suggest that the first step that should be taken in order to find this balance is that more research needs to be conducted on the issue of voter identification. As was noted by the EAC's research, the amount of evidence available on how voter identification laws impacted both voter turnout and voter fraud is limited, at best. As more and more states implement these laws more information needs to be gathered in order to discover if these laws are preventing fraud, and what their impact is on voter turnout.

Courts have also greatly disagreed on the impact of voter identification laws. A recent decision in Georgia granted a preliminary injunction to enjoin the State of Georgia from requiring photo identification to be able to cast a ballot in person. The court in reaching its decision concluded that the injury to a voter who couldn't get the proper identification in time to vote was great and could not be tolerated. The court did point out that a State has a legitimate and important interest in attempting to combat voter fraud and in turn ensure the integrity of its elections.

This case is a perfect example of the struggle that legislatures, election officials, and courts are having with the issue of voter

fraud and voter identification. Most, if not all, recognize voter fraud as something that compromises the integrity of elections, but to what level are we willing to burden the legitimate voter to prevent this fraud from occurring?

Voter intimidation also has little valuable statistical information available. Again this is because “voter intimidation” is difficult to define and has rarely been prosecuted.

Many of the accusations of voter intimidation are brought against poll workers, most of whom are unaware of the possible intimidation taking place. For instance many of the accusations of intimidation by poll workers stem from poll workers making improper demands for identification, or poll workers questioning voters in what is a manner perceived as aggressive or intimidating. The solution to this problem is simple, proper poll worker training. Through proper training poll workers will know when and how ID or other verification documents are to be presented and the proper way to question voters at the polls. Also revisions to challenger laws can bring about more clarity about appropriate challenges and therefore less accusations of voter intimidation.

As more statistics are kept and the form and frequency of voter intimidation is better understood, states will be better prepared to prevent instances of voter intimidation and further improve the integrity of their elections. The EAC will continue work in this area so that we can hopefully see less rhetoric and more voter participation and trust in our elections.

Since I will be leaving the EAC in the not-too-distant future, I would like to take a few minutes to discuss the immense accomplishments of the EAC since I became a commissioner in December of 2003:

First, we distributed the 3 billion dollars that Congress appropriated to the states to improve their voting equipment and processes. This was truly an historic event in the field of American election administration.

Also, the EAC delivered the HAVA-mandated voluntary voting system guidelines (VMSG) within proscribed the 9-month deadline. As we develop future versions of the guidelines, we will be looking into the use of new technology and devices, as well as new software that is being created for current voting systems. Next Monday we will publish in the Federal Register the draft of our new Voting System Certification Program that we expect to finalize in December. I think you will find that this program will be a lot more rigorous and transparent than anything we have ever seen before. I encourage you to review it and give us your comments.

During the past 33 months we have issued guidance to states on statewide databases, accessibility requirements and how to use HAVA funds. And our new Inspector General and his staff are working vigorously to audit and account for the funds we distributed. On a daily basis we answer questions and offer guidance for election officials throughout the USA and indeed from all over the world.

In order to further support local election officials in this crucial election year we have released quick start guides on new voting systems, voting system security and testing, and poll worker recruitment and training. These guides provide a snapshot of processes and procedures for local election administrators to use when implementing new voting systems and security and testing older ones. It includes tips on receiving and testing equipment, poll worker training, security issues, and Election Day operations. In 2007, as part of our Clearinghouse responsibilities, we plan to distribute more comprehensive and detailed guides on these same important subjects.

In addition to the research projects that we have begun regarding election fraud and intimidation, we have several other research and data collection projects underway that will provide election officials and the public with valuable data to be used to improve the integrity of our elections. Already underway are studies on a number of topics including effective designs for ballots, polling places and websites; best practices for poll worker training, recruitment and retention, a study on vote count and recount procedures and the 2006 Election Day survey.

The HAVA College Poll Worker Program has awarded a total of almost \$1 Million in grants to help recruit a new generation of poll workers. Research is underway to find the best methods to recruit train and retain college poll workers.

We are also working hard to make sure the public is kept up to date on the future of elections and how it will affect the voting process. During tenure as Chairman we have held six public

meetings throughout the country. The topics that we have covered in these meetings include: How voting systems are certified, The National Voter Registration Act, Vote Count and Recount Procedures, Poll Workers, Effective management guidelines for voting systems, effective ballot and polling place designs, better ways to serve military and other overseas voters, voter information websites, and the EAC voting system certification program. As you can see, with a staff of just 23 people--and that number includes the Commissioners--we have accomplished a great deal in our short period of existence.

Twenty one years ago, I was probably the only one in this room who was heavily engaged as a professional election administrator. I have seen a lot of change since that time and no more so than in the past 5 years. Since the passage of HAVA, the nation has experienced significant changes in the electoral process. New voting systems have been purchased, replacing the antiquated systems that had been in place for decades. New statewide databases are in place. No one should be turned away at the polls anymore as provisional voting is the law of the land. Disabled voters, elderly voters and voter with language barriers have new tools that make it easier for them to cast their ballot.

Is America better off for all this change? You bet we are.  
Is the system perfect and free from errors, flaws, fraud and intimidation? Certainly not.

On November 7<sup>th</sup>, can voters have full trust and confidence in the election results that come out of all of these new devices, laws and procedures? In my view, they certainly can.

It's been an honor for me to have served at this historic time on this small but remarkable federal agency that touches the lives of every American. During my time on the commission, I have come to know many of you and of your deep conviction to help American improve and strengthen our system of democracy. And I want to thank you for your work and for the strong support you have given me and the commission since our start a mere 3 years ago.

You may know that during the 10 years preceding my appointment to the EAC, I worked as hard as I could to improve the election process in many emerging democracies throughout the globe. Whether it was in Congo or Cambodia, Russia or Romania, Slovakia or Sierra Leone, those 10 years were truly a wonderful opportunity that allowed me to touch the hearts and minds of many peoples, and experience firsthand the many similarities and few differences we actually have among each other in this world. I will be forever grateful to President George W. Bush for giving me the opportunity to do and experience the exact same thing in the United States of America while on the EAC. Thank you.

Jeannie,

I sat next to SoS Markowitz at today's hearing and peered down at her schedule for yesterday and today. She did interviews with the Wall Street Journal, NBC/CNBC and CNN while in DC yesterday and today. Apparently her staff had set up these interviews so that she could talk to the media about issues relating to voting systems and the upcoming election.

Subject Response to USA Today request

All,

Richard Wolf of USA Today called again today. I told him I would send him the documents made public at the advisory board meeting in May. I'm sending the following items from the notebook given to board members: Tab 11 on Provisional Voting and Tab 13 on Voter Fraud.

Bryan

Subject Media request - USA Today

All

Richard Wolf of USA Today called and asked for the following. Jeannie and I ask that you consider this carefully and let us know ASAP what to provide .

(1) The status report on voter fraud and consultant update that was presented to the advisory boards in May, 2006.

(2) The status of the required guidance document on provisional voting and voter ID that is referenced in the following passage in today's Electionline Weekly by Doug Chapin.

In addition to the EAC's considerable election management responsibilities (especially in the area of voting equipment certification and testing), the agency has key policy issues to resolve in the immediate to near-term future, including a required guidance document on provisional voting and voter ID (now nearly two years overdue) and continued regulatory oversight over state implementation of "motor voter". This latter issue will almost certainly involve questions about the intersection of state and federal laws on voter registration - questions which divided the Commission when applied to Arizona, and could divide it again as Republicans and Democrats continue their traditional struggle to balance access to the franchise with concerns about the potential for fraud at the polls.

Thanks,  
Bryan

Subject Media request - USA Today

All

Richard Wolf of USA Today called and asked for the following. Jeannie and I ask that you consider this carefully and let us know ASAP what to provide .

(1) The status report on voter fraud and consultant update that was presented to the advisory boards in May, 2006.

(2) The status of the required guidance document on provisional voting and voter ID that is referenced in the following passage in today's Electionline Weekly by Doug Chapin.

In addition to the EAC's considerable election management responsibilities (especially in the area of voting equipment certification and testing), the agency has key policy issues to resolve in the immediate to near-term future, including a required guidance document on provisional voting and voter ID (now nearly two years overdue) and continued regulatory oversight over state implementation of "motor voter". This latter issue will almost certainly involve questions about the intersection of state and federal laws on voter registration - questions which divided the Commission when applied to Arizona, and could divide it again as Republicans and Democrats continue their traditional struggle to balance access to the franchise with concerns about the potential for fraud at the polls.

Thanks,  
Bryan

Subject your inquiry

Mr. Michels,  
Responses to your questions are below. Please call me directly if I can be of further assistance.  
202-566-3103.

*1. When will EAC receive the preliminary report on voter intimidation and voting fraud?*

We anticipate that we will have a draft final report from our consultants in 2-3 weeks, after our consultants have had time to review the transcript from the project Working Group meeting, which was not available until last week. This transcript will provide the comments made during the Working Group meeting.

*2. When we receive the preliminary report, what is the EAC process to formulate a final product that will be made public?*

First, Commissioners and EAC staff will review the preliminary draft. Then a draft will be submitted to the EAC Standards Board and EAC Advisory Board for review and comment. This second step is taken in accordance with the Help America Vote Act (HAVA) §247, which requires EAC to carry out its duties under Title II, Subtitle C (Studies and Other Activities to Promote Effective Administration of Federal Elections) in consultation with the Standards Board and the Board of Advisors.

*3. When will we make this research available to the public? What form will it be in?*

The final report cannot be made public until it has been accepted by the Commissioners. Normally, this does not happen until the researcher(s) submit a final report that has been revised to address clarifications and corrections deemed necessary through the review process described above. The time it takes for the researchers to produce this final report will depend, somewhat, on the number of clarifications and corrections deemed necessary.

As the researchers were charged with conducting preliminary background research on voting fraud and voter intimidation in the U.S., this report will not include recommended best practices. It will summarize the preliminary research as well as the deliberations of our project Working Group. It also will include recommendations for future EAC activity related to the development of: (1) methods of identifying, deterring, and investigating voting fraud and voter intimidation; and (2) nationwide statistics on voting fraud.

Please note that EAC initiated this preliminary research on voting fraud and voter intimidation in accordance with HAVA §241, which requires EAC to conduct research on election administration issues, including the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [§241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [§241(b)(7)].

At its 2005 meeting, EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

Jeannie

We suspect that someone from the Voting Fraud-Voter Intimidation Project Working Group has been talking to reporters, tipping them off about what we are finding in our preliminary study, and referring them to our consultants (although the information could have come from anyone on the EAC boards, too). Apparently, the U.S. News & World Report reporter who contacted me also contacted both consultants working on the project.

Based on my recommendation, Tova Wang and, possibly, Job Serebrov, who are on EAC personal services contracts for our voting fraud and voter intimidation research, will seek further clarification from you about what they can and cannot say to reporters and in public fora about vote fraud and voter intimidation and about EAC's research. I have previously advised Tova and Job not to discuss the work they are doing for us as this is EAC research, the Commissioners have not yet received and accepted the final report, and the Commission has not approved their speaking about the EAC research.

Tova plans to call you tomorrow (Tuesday, June 27) about the issue. In addition to the reporter's inquiry, she has been invited to speak on the subject at the summer conference of the National Association of State Legislatures. She has plenty of knowledge of the subject in her own right (apart from our study), but is having trouble differentiating between her own work and the work she is doing for us. Please, just let me know what you advise her to do.

Subject RE: New Information 

Denise,

Per our conversation, EAC is conducting several activities regarding voting fraud and voter intimidation through our research mandate and the guidance we issued regarding the implementation of the statewide voter registration lists (will cut down on fraud; produce cleaner voter rolls). Please let me know if you have questions or if you need more info. Also, I'd be glad to help if you already written something, and you just need help filling in the specifics or making the connection b/w the two activities below. My direct number is 202-566-3103.

#### STATEWIDE VOTER REG. LISTS

HAVA mandates that every state have a statewide voter registration list in place by Jan. 1, 2006. In July 2005, the EAC issued its first set of voluntary guidance to assist states in developing their statewide voter registration databases. This important requirement – designed with the dual goal of improving accuracy of voting lists while also reducing the possibility of fraud – has been a particularly difficult requirement for many states to implement. Some states, such as Michigan and Kentucky, have served as national models for such a system. And yet, most states had no such systems in place when HAVA was passed, so the EAC has worked diligently by seeking broad public input to provide interpretive guidance, as well as technical assistance to states through an on-going partnership we have established with the National Academies of Science. EAC plans to issue future guidance on interoperability, security, matching protocols and information sharing related to these statewide databases.

#### VOTING FRAUD AND VOTER INTIMIDATION RESEARCH

Section 241 enumerates a number of periodic studies of election administration issues that the EAC may elect to conduct. "On such periodic basis as the Commission may determine, the Commission shall conduct and make available to the public studies regarding the election administration issues described in subsection (b)." Sections 241(b)(6) and (7) list the following election administration issues: nationwide statistics and methods of identifying, deterring, and investigating voting fraud in election for Federal office; and identifying, deterring, and investigating methods of voter intimidation. Building on this reference to studies of voting fraud and voter intimidation, EAC is conducting preliminary research on these issues. Activities include: (1) identify what constitutes voting fraud and voter intimidation affecting Federal elections; (2) perform background research,

030526

including Federal and state-by-state administrative and case law review related to voting fraud and voter intimidation and a review of current voting fraud and voter intimidation activities taking place with key government agencies and civic and advocacy organizations; (3) identify and convene a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation; and (4) write a report summarizing the key findings, including suggestions for specific activities to address these topics.

Subject Re: Status: Preliminary Research on Voting Fraud/Voter Intimidation 

History  This message has been replied to

Both Tova and Job are working together on Voting Fraud AND Voter Intimidation. They are conducting interviews together and reviewing the same resource materials. The only real split in responsibilities is that Job is identifying relevant case law for both to review by perusing search results from inquiries based on search terms to which both agreed, and Tova is doing the same initial culling of voting fraud/voter intimidation news articles found using search terms to which both agreed. (These initial reviews are to identify relevant case law and news articles, and to dump the false drops.) The reason for the two consultants is that, given the politically sensitive nature of the topics, the Commission wanted consultants who have represented opposing philosophies. The Project Working Group that will be reviewing initial research results and providing input to EAC, also has representatives from opposing camps.

I'm afraid to provide an estimated report release date because these are very sensitive issues and the Commissioners may take some considerable time before they agree to release a report. (Look at the delay in releasing the Rutgers study on provisional voting and voter ID.) -- Peggy

**Carter-Baker Report: Some Bad Fixes for the Wrong Problems**  [Printer-Friendly](#)

Tova Andrea Wang, The Century Foundation, 9/19/2005

It is truly shocking how, given all the problems in the voting system and continued disenfranchisement, the terms of the debate have shifted to that of so-called "ballot integrity." It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as "partial birth abortion" or "death tax." The latest example of this is the just released report of the commission on election reform co-chaired by Jimmy Carter and James Baker.

The 2001 bi-partisan commission co-chaired by former President Carter and Gerald Ford, which The Century Foundation co-sponsored and I was on the staff of (and which had an entirely different membership), had a very different approach. There were differences about how best to implement the recommendations of the report. However, while we were concerned with accuracy and preventing fraud, we did not see that as a goal that was in conflict with ensuring the right to vote.

It was the 2001 commission that promoted the idea of statewide voter registration databases, so that we could both prevent fraud and ensure every registered voter was on the voting list the list and able to vote. We proposed the idea that any voter who comes to the polls and does not appear on the list be given a provisional ballot. We stated that when a felon completes his sentence, he should get his voting rights back. We enumerated several ways to ensure that "no individual, group or community [holds] a justified belief that the electoral process works less well for some than for others." We even recommended an election day holiday!

030537

This stands in stark contrast to the entire tenor of the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation.

In addition to proposing limited felon re-enfranchisement and providing negligible input into the very important and controversial provisional ballot questions, the report really focuses on requiring all voters to present government issued photo ID, such as the REAL ID, in order to vote, and promoting the expensive and complex idea of making all statewide databases "interoperable" nationwide. As I and others have documented repeatedly (see [here](#), [here](#), and [here](#)) voter fraud at the polling place is not our major problem, and identification requirements serve to disenfranchise many groups of voters.

Here's what the problems are in American elections today: too few—not too many—people vote; the voter registration system is not working for voters or elections administrators; voters are still systematically disenfranchised, due to such policies as felon disenfranchisement, flawed felon purges, inaccessible polling sites, misallocation of voting machines, and inappropriate challenges at the polls; voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices; and there is a general mistrust of the election system by the American people.

Why don't we start there instead.

Subject Employing Tova Wang and others to start writing " Trends in Election Administration"

History

✉ This message has been replied to.

Tom and Jeannie-

At yesterday's research briefing, the Commissioners approved the concept of a series of scholarly articles that would cover various "Trends in Election Administration"

There was general agreement that the EAC would produce, by the end of this year, two of these articles that might be on topics such as early voting, restoration of felon rights, vote centers, etc.

I'd like to have a brief meeting the end of this week or the beginning of next with you, Jeannie and myself to go over some of the finer points of this idea and to put in place a process to get this project moving.

Shall we meet Friday morning at 11:00?

I'd like for us to identify the writers we want to use and the process we will use to determine the selection of topics for articles. As the Chair suggested, we should also discuss in some detail, the editorial guidelines we will use that will guide the work that our writers will do for us.

Thanks

K

Subject The "Fraud/Intimidation" Report

Tom:

In light of your announcement this morning about Peg's continued illness, I am asking who has taken the responsibility to complete EAC internal review of the information that was submitted to us by the consultants and what is the timeline for completion of that review?

I am taking far too much criticism on this to just idly sit by saying "I don't know" when EAC will release the information.

Thank you,  
Gracia

Need you to let me know if this response is okay ASAP:

EAC staff presented a status report about this research project to our advisory boards at a public meeting in May. Since then, we've received a draft from the consultants and EAC staff is currently reviewing the data to ensure it is accurate and complete. After we've completed this process, we'll release a final report.

## **PFAW Presses Election Assistance Commission to Release Report Debunking Myth of Voter "Fraud"**

Despite requests, the Election Assistance Commission is refusing to release a report written months ago that reportedly pokes holes in the widespread myth that voter fraud is rampant in America. EAC Chairman Paul S. DeGregorio Thursday denied a request by People For the American Way Foundation (PFAWF) to make the taxpayer-funded findings available to the public in time for the November elections, now less than three weeks away. PFAWF President Ralph G. Neas said the information should be released immediately and questions whether the report is being suppressed for political reasons.

The existence of the report was revealed days ago by *USA Today*, which reported that instances in which non-eligible persons attempt to pass themselves off as voters and somehow cast fraudulent votes are exceedingly rare. PFAWF's sister advocacy organization, People For the American Way, has launched a petition drive asking the commissioners to release the report, since it will refute rampant allegations of voter fraud which have led to restrictive voting requirements.

"As we approach the elections, the last thing election officials need is to labor under the false

impression that ineligible people are trying to pass themselves off as qualified voters at the polls. They should be focusing on ways to keep the path to the ballot box clear for as many eligible voters as possible, instead of looking for nonexistent fraud that will slow down the process and possibly even discourage eligible voters,” said PFAW President Ralph G. Neas. “We need to raise confidence in our elections process, not allow harmful myths to stand – especially when the government has findings available to refute them.”

Neas sent a letter on behalf of PFAW Foundation to the EAC earlier this week asking that the report be made available to the public, but on Thursday the EAC denied the request. The report was written by Tova Wang, an elections scholar at the Century Foundation think tank, and Job Serebrov, an Arkansas attorney, and has been in the hands of the EAC commissioners for more than four months.

Neas said the report has critical implications for election legislation around the country. During the past few years, a number of states have passed legislation to combat supposed “voter fraud” through overly restrictive identification requirements and other impediments to the ballot box. According to USA Today, the report found such voter fraud to be exceedingly rare.

“We have plenty of problems to deal with. We’ve all seen long lines, unreliable voting equipment, purges that wrongly remove eligible voters from the roll. It turns out the problem is not that bad people are trying to vote, but that too many qualified voters are discouraged from voting. This report apparently confirms what common sense has told us for years – we need to make it easier for eligible voters to cast a vote that counts, not harder,” said Neas. “Instead of fighting nonexistent fraud, these restrictive new laws will discourage voters – people like senior citizens, students and disabled voters who may not have drivers’ licenses or other forms of ID required by these new laws. That’s just wrong, and is clearly not supported by the evidence.”

Neas said the new laws are often politically motivated. The misleadingly-named right-wing group the American Center for Voting Rights has supported extremely restrictive laws by pointing to supposed voting fraud.

“Any law that disadvantages certain groups of voters – like senior citizens and students – should be suspect. If the voters are disadvantaged, which political parties and candidates stand to gain? The same question should be asked about the reason the release of this report has been delayed. Is there a political motivation?” he asked. “Has this study been buried because anti-voter

activists like the American Center for Voting Rights find its conclusions inconvenient? That's unacceptable. The Commissioners of the EAC have had this report for months, even as they have testified before Congress on critical legislation that could have been informed by the report's findings. It's unconscionable."

Laws passed in several states this year raise barriers to the ballot box that would prevent poor, elderly, and minority voters from casting a ballot. PFAW's sister organization, People For the American Way Foundation, has challenged laws in Ohio, Missouri, and Arizona; in all three, the laws were either struck down or stayed until after the November election. Yet restrictions still in effect in a number of states could harm voters. One such provision, stringent ID requirement, has been likened to a modern day poll tax.

Said Neas, "All American citizens have a vested interest in having fair and open elections. This report contains valuable information that can help us do that. The EAC should release the report immediately, no matter what the political implications may be and hold public hearings to discuss the findings."

PFAW's petition can be found at [www.ReleaseTheReport.com](http://www.ReleaseTheReport.com).

RE: October 18, 2006 Letter

Dear Mr. Neas:

Your letter of October 18, 2006 requests the release of EAC's Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group's concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study -- finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud -- as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,

Paul S. DeGregorio  
Chairman

Re: FOIA Request

Dear Ms. Layson:

In accordance with the Freedom of Information Act, 5 U.S.C. § 552, I am writing on behalf of People For the American Way to request a copy of a study concerning voter fraud conducted by Tova Wang and Job Serebrov and presented to the EAC in report form sometime subsequent to May 2006.

As you may know, I wrote to the EAC on October 18, 2006 on behalf of People For the American Way Foundation, asking for a copy of the report of this study. On October 19, I received a letter from Paul S. DeGregorio, Chair of the EAC, denying the request. (A copy of Mr. DeGregorio's letter is attached.) According to Mr. DeGregorio, the report was a "draft" and would not be released. However, as even Mr. DeGregorio's letter underscores, the report we are seeking is not a "draft" but rather the *authors'* report of their study of voter fraud. That the Commission may, in the words of Mr. DeGregorio, "release a final report from this study" does not make the study itself a draft. In any event, the Commission should not, and in our view cannot, withhold from public disclosure this important study, which was funded by federal taxpayers.

In accordance with FOIA, I would appreciate your furnishing the requested report to us at your earliest convenience, and no later than 20 working days from today. If you deny this request in whole or in part, please cite the specific exemption(s) that you maintain allows the Commission to withhold the release of this report in whole or in part, and, as also required by law, please release any segregable portion of the report that remains after the exempted material has been deleted. We are willing to pay the statutory fee for the copying of this report.

FOIA Request

Subject FW: Shame on hiding report finding low voter fraud

Bryan,

This article slamming the EAC ran in a major Washington newspaper on Tuesday (the link is <http://www.spokesmanreview.com/opinion/story.asp?ID=156039>, and the text is included below). All I've heard about the report is what USA Today mentioned, plus Tom Wilkey told me that the report is currently being worked on for a near-future release.

I'm planning to respond to this article on the issue of whether voter fraud is widespread, and wanted to also defend the EAC's actions, which I think were wise. It sounds like the news editors just conjectured what happened, as they indicated no attempt to find out for sure why the report was withheld.

In responding to them, it would be nice to have your side of the story to help me accurately explain what happened. Can you give me any comments on why the report was held? Was it because the EAC was trying to help those who are "peddling suspicions of voter fraud"?

Any thoughts you have would be helpful.

Cordially,

Jonathan

Editorial

## **Our view: Fraudulent fears**

### **Shame on hiding report finding low voter fraud**

October 24, 2006

Proponents of stringent election laws designed to stop fraud surely don't want to hear that there's little evidence of chicanery. That's probably why the results of a federal study on the matter, which was delivered in May, were kept quiet.

Many states have adopted restrictions on voter registration and polling place practices, and the U.S. House of Representatives passed a photo-identification bill aimed at poll-site voting. The Senate is expected to take up the issue next year.

The premise behind all of this legislation is that fraud is widespread. But the U.S. Election Assistance Commission, which was established by Congress to ensure voting integrity, commissioned a study that questions that assumption. USA Today obtained the study four months after its completion and recently reported on the findings:

"There is widespread but not unanimous agreement that there is little polling-place fraud, or at least much less than is claimed, including voter impersonation, 'dead' voters, non-citizen voting and felon voters."

That's an awfully inconvenient summation for those who back stricter voting laws and consistently assert that there's rampant fraud while providing scant proof.

Voter fraud is a highly politicized issue. The congressional bill on photo IDs drew the support of 98 percent of Republicans and the opposition of 98 percent of Democrats. And voters in Washington state lived through the partisan wrangling after the razor-thin victory by Chris Gregoire in the 2004 gubernatorial election, when mistakes were quickly relabeled "fraud."

When a favorite candidate loses a close race, partisans attack the system of voting. It happened in Florida in 2000 and in Washington state in 2004. What's interesting about the federal commission's study is that it points to the system that most reforms would not touch as having the highest potential for fraud.

Absentee balloting is more susceptible to manipulation, the report states, via coercion and forgery. But it's polling places that have been placed under heavy scrutiny by reformers.

030550

The lack of focus on mail-in balloting is probably a political calculation, because it's popular. Most counties in Washington state have moved to that system.

Politicians can get more mileage hyping the possibility of votes by illegal immigrants and felons, but their solutions can serve to discourage voting by honest citizens.

Unfortunately, the federal commission has played into the hands of those peddling suspicions by choosing not to release its report to the public.

The public deserves to know what is happening with its election systems as it weighs the merit of various reform proposals. But a commission that was formed to zero in on real problems has undermined its credibility by sitting on a report that highlights them.

## Deliberative Process Privilege

To Jeannie Layson/EAC/GOV@EAC  
cc jthompson@eac.gov  
bcc  
Subject Re: questions from NYT 

Jeannie:

1. The "widespread but not unanimous agreement" quote from the consultants' draft addressed perceived election fraud in the **polling place**. It did not address the perceived frequency of other election fraud. EAC wrote the language for the final report after reviewing all of the information submitted by the consultants (summaries of interviews, articles and books, case law, and incidents reported in the press), not just the consultants' draft report.

2. Intimidation - The difference between the draft and the report is due to differing definitions of intimidation. Intimidation, under federal law, has to include physical or economic threat; however, our consultants took a broader view of the term and included incidents in which voters were made to feel uneasy or unwelcome. Some of the literature and interviews suggest that still others define intimidation to include mistakes made by harried workers on election day and state laws and practices that are perceived to make voter participation more difficult (challenger laws, voter identification laws, polling place locations, and distribution of voting machines).

3. What is the question here? Most egregious instances of fraudulent voter registration applications are caught before the "applicants" names are ever added to the rolls -- so no **voting** fraud results. Based on the information we have, most instances seem to be the result of operatives who are paid to register voters and who submit the false applications in order to receive that pay, not because they want to influence the outcome of an election.

4. EAC organized the content of its report in the manner that seemed most suitable. In this case, EAC conclusions were presented after the information upon which conclusions were based. I'm not sure what the reporter means by referring to conclusions in the appendices, unless he is referring to the consultants' conclusions, which are not necessarily EAC's.

5. Do we know which interviewees raised this issue? The reason for outsourcing EAC research is that we don't have the resources in-house to do the job ourselves. EAC hired bipartisan "expert" consultants to do this research (including the interviews) for us. The agency would not normally verify the summaries with the interviewees unless there were indications that the summaries generally were inaccurate. It would not be cost effective for us to routinely verify everything submitted by our consultants' and contractors.

Subject Draft letter to Tova Wang's attorney – different than other  
pending letter

Commissioners & Tom,

Curtis Crider informed me yesterday evening that Tova Wang through her counsel is refusing to talk to the Inspector General's office as a part of the ongoing review based on the contract clause that she has asked to be relieved from. It is clear that this clause does not in any way limit her ability to talk to EAC (the part with which she contracted) and EAC's Office of Inspector General is a division of EAC. As such, I have prepared a letter to go to her counsel today stating these facts. I do not in any way opine on the waiver issue, but rather clarify that EAC's Office of Inspector General is a part of EAC and that she is not precluded by this clause from talking to Curtis or any member of the investigative team that he has assembled.

Unless there is opposition, I will send this out by 10:30 this morning. Thanks for your quick review. Let me know if you have any questions.

RE: Interview of Ms. Wang by EAC Inspector General

Mr. Joseph:

EAC is currently considering the request made by Ms. Wang regarding the confidentiality clause which she signed as a part of her contract with U.S. Election Assistance Commission. As I am sure you can appreciate, EAC takes very seriously the contract provisions that it and Ms. Wang entered into and is carefully weighing her request concerning waiver of any of those provisions.

However, the EAC Inspector General has brought to my attention the fact that you and your client believe that this clause impacts her ability to speak to the EAC Inspector General and/or its contact investigators regarding the contract, her work product and the final report derived from her work product. The contract clause in question does not limit in any way Ms. Wang's ability to speak to a representative of EAC, including any representative of the EAC Office of Inspector General, regarding these matters.

I trust that this clarifies any concerns that you or your client may have regarding cooperating with the Inspector General's current review of the contract in question, the study that was conducted in part by Ms. Wang, and any product that resulted from that contract and study. However, if you have any additional questions regarding this matter, please do not hesitate to contact me.

Sincerely,

Juliet T. Hodgkins

It is clear that this clause does not in any way limit her ability to talk to EAC (the part with which she contracted) and EAC's Office of Inspector General is a division of EAC. As such, I have prepared a letter to go to her counsel today stating these facts. I do not in any way opine on the waiver issue, but rather clarify that EAC's Office of Inspector General is a part of EAC and that she is not precluded by this clause from talking to Curtis or any member of the investigative team that he has assembled.

Unless there is opposition, I will send this out by 10:30 this morning. Thanks for your quick review. Let me know if you have any questions.

letter to Wang's attorney re discussion with IG.doc

RE: Interview of Ms. Wang by EAC Inspector General

Mr. Joseph:

EAC is currently considering the request made by Ms. Wang regarding the confidentiality clause which she signed as a part of her contract with U.S. Election Assistance Commission. As I am sure you can appreciate, EAC takes very seriously the contract provisions that it and Ms. Wang entered into and is carefully weighing her request concerning waiver of any of those provisions.

However, the EAC Inspector General has brought to my attention the fact that you and your client believe that this clause impacts her ability to speak to the EAC Inspector General and/or its contact investigators regarding the contract, her work product and the final report derived from her work product. The contract clause in question does not limit in any way Ms. Wang's ability to speak to a representative of EAC, including any representative of the EAC Office of Inspector General, regarding these matters.

I trust that this clarifies any concerns that you or your client may have regarding cooperating with the Inspector General's current review of the contract in question, the study that was conducted in part by Ms. Wang, and any product that resulted from that contract and study. However, if you have any additional questions regarding this matter, please do not hesitate to contact me.

Sincerely,

Juliet T. Hodgkins  
General Counsel

Subject Re: Eagleton Study

Gracia,

I have given the Eagleton Voter ID study a quick read.

Here are my comments (numbers refer to page numbers):

- 3. Of the scholars involved, the ones I know are very well respected by their peers.
  - 4. Of the peer review group, the ones I know are also respected and represent quite different positions on the political spectrum.
  - 6. A good statement of the tentative nature of their findings, after having clearly stated the two points of view at issue.
  - 6-7. Limitations of model made clear.
  - 10-11. Findings-and their tentative nature--elaborated on.
  - 10-12. Ideas for further research are excellent.
  - 13-15. The summary of research on determinants of turnout includes the major studies by the top-ranked people in this subspecialty within political science.
- Remainder of paper: Analysis sound and straightforward, with appropriate caveats entered. The writing, by the way, is lucid and easy to grasp by the educated lay person--something that cannot be said for many reports of this kind in government documents and academic journals!

In short, my reading of this paper leads me to believe its findings are carefully stated and fully justified, with the appropriate caveats regarding interpretation. I would be surprised if this paper, had it been submitted to a top-ranked, peer-reviewed political science journal, perhaps in abbreviated form, were not accepted for publication.

Cordially,

Chandler

Thanks. Please note that Eagleton did 2 studies for us (under one contract). One on Provisional Voting and one on Voter ID.

It is the Voter I D study that I'd appreciate you taking a look at.

Many thanks again.

**U.S. ELECTION ASSISTANCE COMMISSION**1225 NEW YORK AVENUE, N.W., SUITE 1100  
WASHINGTON, D.C. 20005

May 24, 2005

Mr. Keith Osterhage, Director  
Office of Research and Sponsored Programs  
Rutgers, The State University of New Jersey  
3 Rutgers Plaza  
New Brunswick, New Jersey 08901

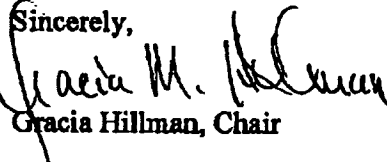

Dear Mr. Osterhage:

Enclosed is a signed contract in the amount of \$560,002.00 for the provision of research assistance to the U.S. Election Assistance Commission (EAC) for the development of voluntary guidance on provisional voting and voter identification procedures. The EAC has accepted the basic proposal submitted by the Eagleton Institute of Politics and has also elected to include the optional survey of local election officials. This proposal was evaluated as providing the best value to the government through a competitive source selection process. The proposal is incorporated by reference into the contract.

The U.S. Election Assistance Commission (EAC) was created by the Help America Vote Act of 2002 (HAVA) and is charged with assisting the States in meeting the election reform requirements mandated by this legislation. One of the EAC's principal tasks is to provide guidance to the States on the interpretation of HAVA and its requirements. The provisional voting and voter identification effort that will be supported by this contract is a major element of EAC's Fiscal Year 2005 research agenda. The objective of this work is to develop guidance on these topics that States can utilize in the 2006 election cycle.

To acknowledge your receipt and acceptance of this contract, please countersign and date below and return one copy of this letter to the attention of Carol A. Paquette, Interim Executive Director.

We look forward to working with Rutgers University and the Eagleton Institute on this very important research effort.

Sincerely,  
  
Gracia Hillman, Chair

Keith Osterhage  
Rutgers, The State University of New Jersey

May 24, 2005

**CONTRACT TO PROVIDE RESEARCH ASSISTANCE TO THE EAC FOR THE DEVELOPMENT OF VOLUNTARY GUIDANCE ON PROVISIONAL VOTING AND VOTER IDENTIFICATION PROCEDURES**

**0.0 Background:** Sec. 302(a) of HAVA requires that all States allow the casting of provisional ballots in instances where a voter declares their eligibility to vote but their name does not appear on the official list of eligible voters, or an election official asserts that a voter is not eligible to vote. This section describes several requirements for implementation of provisional voting, but the States have considerable latitude in specifying how to carry out these requirements. The EAC seeks to examine how provisional voting was implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 Federal elections.

HAVA Sec. 303(b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC seeks to examine how these voter identification requirements were implemented in the 2004 elections and to prepare guidance on this topic for the 2006 elections.

One of the remedies for a voter not having an acceptable proof of identity is to allow the voter to cast a provisional ballot, either at the polling place or by mail. This linkage between these two HAVA sections provides a rationale for conducting research on these topics in parallel. However, it is anticipated that two separate guidance documents will result.

**1.0 Objective:** The objective of this contract is for EAC to obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics in time for implementation for the 2006 Federal elections. The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

**2.0 Scope:** In general the Contractor shall be responsible for all research and analysis activities, including the conduct of public hearings for fact finding and public comment purposes. However, in light of the need to get started on this work, the EAC conducted a public hearing on provisional voting on February 23, 2005.

An initial framework for provisional voting policy has been set by the court decisions rendered on the election procedures utilized in the 2004 election. The 6<sup>th</sup> Circuit decision, in particular, has drawn some boundaries which must be given

030561

due regard in the course of considering future policy alternatives for provisional voting.

Notice of public meetings and hearings is required to be published in the Federal Register. The Contractor shall be responsible for preparing the notice documents, and the EAC will submit the notices and cover the cost of publication. In addition, draft guidance documents must be published in the Federal Register to obtain public comment prior to their adoption. Again, the Contractor will work with the EAC to prepare the draft documents for publication, which the EAC will submit and pay for the cost of publication. Comments received will be provided to the Contractor for analysis and incorporation into the final guidance documents, as appropriate.

### **3.0 Specific Tasks**

For ease of reference, following task 3.3 the remaining tasks are listed separately under the headings of Provisional Voting and Voter Identification Requirements. It is anticipated that the work on these two topics will be conducted essentially concurrently.

- 3.1 Update the project work plan, as required. The Contractor shall update and deliver the Project Plan not later than 10 days after contract award. This plan shall describe how the Contractor will accomplish each of the project tasks, including a timeline indicating major milestones. A single document will be prepared to include both provisional voting and voter identification tasks. The updated Project Plan shall be formally briefed to the EAC Project Manager and lead Commissioner.
- 3.2 Submit monthly progress reports. The Contractor shall submit a monthly progress report within 2 weeks of the end of each month. This report shall provide a brief summary of activities performed and indicate progress against the timeline provided in the Project Plan. Any issues that could adversely affect schedule should be identified for resolution. Budget status shall also be provided.
- 3.3 Conduct periodic briefings for the EAC. The Contractor shall periodically meet with the EAC Project Manager and the lead Commissioner for this work to discuss research findings and progress. The Project Plan should make allowance for this activity. The number and frequency of briefings will be determined by the Contractor Project Manager and the EAC Project Manager as the work progresses. The Contractor may also be required to periodically brief the full Commission on their work.

### Provisional Voting

- 3.4 Collect and analyze State legislation, administrative procedures, and court cases. An understanding of the disparities and similarities of how provisional voting was implemented around the country will provide a baseline for the consideration of future approaches. Seventeen States never had provisional voting before HAVA was enacted, while many other States did. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

Topics of particular interest include the following:

- How did States prepare for the onset of the HAVA provisional ballot requirement?
- How did this vary between States that had previously had some form of provisional ballots and those that did not?
- How did litigation affect the implementation?
- How effective was provisional voting in enfranchising qualified voters?
- Did State and local processes provide for consistent counting of provisional ballots?
- Did local election officials have a clear understanding of how to implement provisional voting?

- 3.5 Recommend alternative approaches for future implementation of provisional voting. The Contractor shall conduct a literature review to identify other research results and data available on this topic. The EAC Election Day Survey, for example, contained several questions on provisional voting. The EAC will make these survey data available to the Contractor. Based on their analysis of available research and the results of Task 4.5, the Contractor shall diagnose the problems and challenges of provisional voting implementation and hypothesize alternative approaches.

The Contractor shall assess the efficacy of these alternatives in relation to the following inter-related policy objectives: (1) enabling the maximum number of eligible voters to cast ballots that will be counted; (2) providing procedural simplicity for voters, poll workers, and election officials; (3) minimizing opportunity for voter fraud; and (4) maintaining a reasonable workload for election officials and poll workers. Additional policy considerations may be identified in the course of this research effort. The Contractor shall document and brief these alternatives to the Commission.

- 3.6 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors and Standards Board. EAC will convene a meeting or teleconference of the Boards for the discussion of this document. The Contractor shall provide the document in advance and participate in the meeting to answer questions and

record comments.

- 3.7 **Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC, the Board of Advisors and the Standards Board and prepare the draft guidance for publication in the Federal Register by the EAC.**
- 3.8 **Arrange one public hearing for receiving public comment on draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. EAC will handle publicity for the meeting.**
- 3.9 **Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.**

#### Voter Identification Requirements

- 3.10 **Collect and analyze State legislation, administrative procedures, and court cases. It is assumed that the collection of information for analysis of voter identification requirements will be performed concurrently with the research for Task 4.5. An understanding of the disparities and similarities of how voter identification requirements were implemented around the country will provide a baseline for the consideration of future approaches. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.**
- 3.11 **Convene a half day public hearing on the topic of voter identification requirements. This hearing should occur early in the research process as an informational hearing where all points of view on this topic can be aired. The Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC. The Contractor shall identify three panels of three to four speakers each. The Contractor shall arrange for speaker attendance to include travel and per diem expenses. The EAC will provide publicity for the hearing. The Contractor shall prepare a document summarizing the proceedings and containing all testimony provided.**
- 3.12 **Recommend alternative approaches for future implementation of HAVA voter identification requirements. The Contractor shall conduct a literature review to identify other research results and data available on this topic. Based on their analysis of available research and the results of Task 4.11, the Contractor shall diagnose the problems and challenges of voter identification and hypothesize alternative approaches. The Contractor shall**

coordinate with the EAC to identify appropriate policy objectives by which to assess these alternatives. The Contractor shall document and brief these alternatives to the Commission.

- 3.13 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors and Standards Board. EAC will convene a meeting or teleconference of the Boards for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.
- 3.14 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC, the Board of Advisors and the Standards Board and prepare the draft guidance for publication in the Federal Register by the EAC.
- 3.15 Arrange a second public hearing for receiving public comment on the draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. EAC will handle publicity for the hearing.
- 3.16 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.
- 4.0 Contract Type. The contract type will be Time and Materials in the amount of \$560,002.00.
- 5.0 Place of performance. The principal place of performance will be the Contractor's place of business. Meetings and occasional work efforts may be performed at the EAC offices. Some travel will be required.
- 6.0 Period of Performance. The period of performance is from date of award until December 30, 2005.
- 7.0 Schedule of Deliverables:
1. Updated project plan – 10 days after contract award
  2. Progress reports – monthly
  3. Briefings – as required
  4. Analysis report on provisional voting, including compendium of legislation, procedures and litigation - TBD
  5. Alternatives report on provisional voting – TBD

6. Preliminary draft guidance on provisional voting - TBD
  7. Draft guidance on provisional voting for publication - 9/2005
  8. Public hearing on draft guidance - 30 days after publication
  9. Final guidance on provisional voting for EAC adoption - 10/2005
  10. Analysis report on voter identification requirements, including compendium of legislation, procedures and litigation - TBD
  11. Public hearing on voter identification requirements - TBD
  12. Summary of voter identification requirements hearing - TBD
  13. Alternatives report on voter identification requirements - TBD
  14. Preliminary draft guidance on voter identification requirements - TBD
  15. Draft guidance on voter identification requirements for publication - 11/2005
  16. Public hearing on draft guidance - 30 days after publication
  17. Final guidance on voter identification requirements to EAC for adoption - 12/2005
- 8.0 Inspection and Acceptance Criteria. Final inspection and acceptance of all work performed, reports, and other deliverables will be performed at the offices of the EAC. The Contracting Officer's Representative for this effort will be Karen Lynn-Dyson. She will review and approve all work on behalf of the Commission.
- 9.0 Invoicing. Invoices may be submitted monthly using Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal. Invoices shall be mailed to the attention of Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington D.C. 20005.
- 10.0 Accounting and Appropriation Data: Funds in the amount of \$560,002.00 are available for this task order.
- 11.0 General Provisions:
- 11.1 Proposal Incorporated. The Contractor's proposal is incorporated by reference into the statement of work.
  - 11.2 Inspection/Acceptance. The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The EAC reserves the right to inspect and review any products or services that have been tendered for acceptance. The EAC may require correction or re-performance of nonconforming items at no increase in contract price. The EAC must exercise its post-acceptance rights within ten (10) days after the defect was discovered or should have been discovered.
  - 11.3 Contract Terms. Should there be a conflict between the contract clauses included in this document and the "Purchase Order Terms and Conditions" on the back of GSA Form 300, which is used to record contract financial

030566

data, the contract clauses in this document shall take precedence.

**11.4 Changes.** Changes in the terms and conditions of this Contract may be made only by written agreement signed by authorized representatives of both parties.

**11.5 Disputes.** This Contract is subject to the Contract Disputes Act of 1978, as amended (41 U.S.C. 601-613). The Contractor shall proceed diligently with performance of this Contract, pending final resolution of any dispute arising under the Contract.

**11.6 Excusable Delays.** The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as, acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the EAC, in writing, as soon as possible after the beginning of an excusable delay. The Contractor shall explain the basis for the excusable delay, and correct the problem as soon as possible. The Contractor shall notify the EAC, in writing, at the end of the delay.

**11.7 Other compliances.** The Contractor shall comply with all applicable Federal, State and local laws, executive orders, rules and regulations applicable to its performance under this contract.

**11.8 Compliance with laws unique to Government contracts.** The Contractor agrees to comply with 31 U.S.C. 1352 relating to limitations on the use of appropriated funds to influence certain Federal contracts; 18 U.S.C. 431 relating to officials not to benefit; 40 U.S.C. 327 *et seq.*, Contract Work Hours and Safety Standards Act; 41 U.S.C. 51-58, Anti-Kickback Act of 1986; 41 U.S.C. 265 and 10 U.S.C. 2409, relating to whistle blower protections; 49 U.S.C. 40118, Fly American, and 41 U.S.C. 423 relating to procurement integrity.

**11.9 Limitation of Government Liability.** The Contractor is not authorized to make expenditures or incur obligations exceeding the total amount allocated to the contract. The Contractor is required to notify the Contracting Officer's Representative when 75% of funding has been obligated.

**11.10 Termination for convenience.** The EAC, by written notice, may terminate this contract without fault, in whole or in part, when it is in the best interest of the government. In the event of contract termination for convenience, the rights, duties, and obligations of the parties, including compensation to the Contractor, shall be in accordance with Part 49 of the Federal Acquisition Regulations in effect on the date of this contract.

Subject Feedback on Draft Statement

Karen:

Following up on yesterday's briefing about the Draft Statement on the Voter ID study, here is my feedback.

1. I agree that we should send out all of the appendices. I think EAC needs to send out as much information as we have available at this time from the Eagleton study..

2. The statement should clarify that at a minimum we are looking to compare 2008 voter participation stats with the 2004 stats used in the Eagleton report. (FYI - The term voter participation includes registration and turnout.)

Perhaps that explanation should be the fourth paragraph on Page 1, explaining why EAC decided to not perform an analysis at this time of the impact of voter id requirements on turnout.

3. I agree that the last section of the statement should include EAC's intention to convene a (one) large working group of advocates, academics (statisticians included) and election officials to discuss what the next EAC study on this topic should cover and what the timeframe for such study should be.

Lastly, I read this as a draft and "assume" it will be edited to take care of grammatical and spelling errors.

Thanks,

Subject Further to the Eagleton Study

I forgot to add the following comment.

If the Eagleton testimony from February 8 is not included as an attachment to our Statement, then at the very least I think our statement should inform the reader that Eagleton testified on Feb 8 and the statement is posted on our website.

Subject Comments on Eagleton's response

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton's numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election's statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.

2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates(FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.(FN3)" Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."

3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9).

4. There is no number 4.

5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for

030570

others. But, as for me, this statement is true.

6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton. The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

7. See response to #2, above.

8. See response to #1, above.

9. See response to #3, above.

10. See response to #6, above.

11. I believe that the Commission must act on this report. Merely stating what we will do in the future will not distance us from this work and will result in media and others quoting Eagleton's work as an "EAC" report. It has been my understanding that the consensus of the group is to "decline to adopt." I believe that this is the right action.

My flight departs at 9:20 a.m. (EDT) and I do not arrive until 12:15 p.m. (EDT). However, if you have questions concerning my comments, I will be around tonight and will be available tomorrow afternoon by Blackberry.

## EAGLETON INSTITUTE OF POLITICS

To: Tom Wilkey

From: John Weingart, Eagleton Institute of Politics

Date: March 28, 2007

Re: Comments on March 26, 2007 draft EAC memo regarding the Eagleton-Moritz Voter Identification Report

Tom:

Thanks for your request yesterday that we provide comments on this draft memo. I also appreciate your plan to let us review your press release in draft when it is available. ?

Yes

In brief, we find the memo to contain inaccuracies and to incorporate a hostile tone that seems to criticize us for performing the study and analysis you hired us to prepare. Moreover, you suggest the need for further study as if it is a criticism of our work when, in fact, it is our report that recommends such additional work. I hope you are able to incorporate the following considerations in a revised edition before you distribute it further:

1. *"The contractor used a single election's statistics to conduct this analysis."*

That is correct. But we only focused on 2004 because a number of states changed their identification requirements from 2000 to 2004.

2. *"The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote."*

The assertion about eligibility is simply incorrect. We gathered this voting data by county and did not rely entirely on the Census Bureau. The aggregate data relied on an estimate of citizens of voting age for each county in 2004. The formula we used to estimate citizens of voting age came from the EAC's own Election Day Study. While some of the citizens of voting age population may not have voted, the individuals in the estimate were considered to be citizens and therefore were eligible to vote. The individual data from the Current Population Survey were limited to respondents who said they were citizens and registered to vote. Therefore they were eligible to vote.

3. *"The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout."*

As we showed in Appendix C to the Voter Identification Report, the analysis of the aggregate data revealed that non-photo identification and signature match requirements were negatively related to turnout when compared with states that simply required voters to state their name. This

effect did not vary by racial or ethnic groups. The use of the word "so" at the start of the second sentence suggests that we moved on to the individual-level data because we found no clear correlation in the aggregate data. That is a false inference. It was our work plan all along to analyze both aggregate and individual-level data to provide the most complete analysis possible. The higher turnout rate in the CPS data is easy to explain. Turnout in this case is the percentage of registered voters who said they voted. National turnout data is typically calculated according to the percentage of citizens of voting age who turn out (not taking into account registration status). The smaller denominator in the CPS turnout calculation contributes to the higher percentage. Your draft memo does not take that into account. We said as much in footnote 13 in Appendix C to the Voter Identification Report: "The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted."

5. *"Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as 'state your name.' "* To say that being asked to "state your name" is to "require no identification at all" is simply wrong. To give one's name is to identify oneself. We relied on this category to make comparisons to the other, more stringent, requirements.

6. *"The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians."*

The term "questioned" in this context appears to be synonymous with the terms "challenged" or "doubted." The peer review group certainly raised important questions, but we believe we addressed all of the questions to the group's satisfaction. It is not clear to what you refer when you allude to an "independent working group." If another review group was involved, we were never given the opportunity to respond to its questions.

7. *Background: Contractor used two sets of data to estimate turnout rates...*  
Correct as noted in #2 above.

8. *Page 2: The Contractor used a single election's statistics to conduct this analysis.*  
This was essentially what you asked us to do. If the Commission feels in retrospect that it erred in shaping the contract and wants to acknowledge that, you should do so.

9. *Page 2: was conducted that produced only some evidence of correlation between voter identification and turnout*  
The phrase "only some correlation" is a most unusual one. That we showed "some correlation" is a significant finding yet the sentence as written appears to dismiss or even ridicule it.

10. *...were questioned by independent working and peer review groups...*  
Sec #6 above.

Comments on Draft EAC Memo

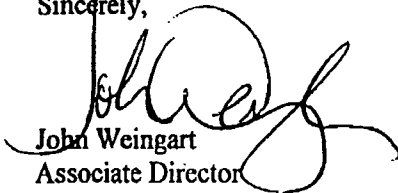

3

*11. Recommendations (1) EAC should... decline to adopt the draft report provided by Eagleton.* While the recommendations are, of course, the Commission's call, we believe the report provides information that could be very useful to states now considering making changes to their voter identification protocols and requirements. Accordingly, we believe the Commission would be providing a service by adopting and actively distributing the report.

We recognize that voter identification is a controversial subject that has become much more politicized in the years since the EAC awarded this contract and even in the many months since we submitted this report to you. We also recognize that it is a complex subject to analyze. Nevertheless, we believe, to be both accurate and fair, this memo requires the significant changes I have listed above.

If you would like to discuss this, please don't hesitate to call me at my office at (732) 932-9384 x290. Thanks.

Sincerely,

John Weingart  
Associate Director  
Eagleton Institute of Politics

Subject Re: Review of Voter ID Statement

History: This message has been replied to.

Karen:

The estimate of citizens of voting-age population controls for the percentage of the voting-age population that might have been non-citizens in 2004. We calculated the citizens of voting-age population using the following approach (this is a direct quote from Appendix C to our final Voter Identification report to the EAC):

"In the aggregate data, determining the percentage of the voting-age population that has U.S. citizenship posed a methodological challenge. The Census Bureau gathers information on the citizenship status of adults ages 18 and older only during the decennial census. While the Census Bureau provides annual estimates of the population to account for changes between decennial censuses, the bureau does not offer estimates for the proportion of the adult population who are citizens as part of the annual estimates. To address this issue I estimated the 2004 citizen voting-age population for each county using a method reported in the analysis of the 2004 Election Day Survey conducted for the U.S. Election Assistance Commission (U.S. Election Assistance Commission, 2005). I calculated the percentage of the 2000 voting-age population who were citizens in 2000, and applied that percentage to the July 1, 2004 estimates for voting-age population in each county. In other words, I assumed that the percentage of the voting-age population that had U.S. citizenship in 2004 was similar to the percentage of the voting-age population who were citizens in 2000."

I hope this addresses the issue. If it doesn't, let us know and Tim Vercellotti or I will be happy to elaborate.

Thanks,

John

## EAGLETON INSTITUTE OF POLITICS

---

April 19, 2007

Donetta Davidson, Chair  
U.S. Election Assistance Commission  
1225 New York Avenue, NW  
Suite 1100  
Washington, D.C. 20005

Dear Chair Davidson:

I am attaching a copy of a memo I am sending to Adam Abroggi, Counsel for the Senate Committee on Rules and Administration, responding to his request for information about the Eagleton Institute of Politics' contract with the EAC. If you or your staff notice any errors or significant omissions in my summary of our work and coordination with you, please let me know. Also, please don't hesitate to contact us if there are any other ways in which we can help you to advance informed public consideration of provisional voting, voter identification and the other important issues within your purview.

Sincerely,

John Weingart  
Associate Director

Cc: Tom Wilkey, Executive Director  
U.S. EAC

from: John Weingart, Associate Director  
Eagleton Institute of Politics

April 19, 2007

Adam

In response to your April 10<sup>th</sup> request, I have pulled together some information about the Eagleton Institute of Politics' contract with the U.S. Election Assistance Commission. Although I did not have a chance to do the thorough review, including comparing notes with all the members of our research team, that would be necessary to compile a full chronology of our work, I hope the following will be useful to you. I will be giving a copy of this memo to EAC Chair Donetta Davidson and Executive Director Tom Wilkey for any assistance it may offer them in responding to Senators Feinstein and Durbin's April 12<sup>th</sup> letter.

By way of background, Rutgers University's Eagleton Institute of Politics submitted a proposal to the EAC on March 25, 2005 to provide "research assistance to the Election Assistance Commission for the development of voluntary guidance on provisional voting and voter identification procedures." The proposal was submitted after extensive discussions with EAC Commissioners and staff that had begun on Election Day, 2004 when Eagleton had received a phone call from the EAC's then-Executive Director asking if the Institute would be interested in undertaking this work.

The proposal was prepared and submitted in partnership with the Moritz College of Law at Ohio State University. At the EAC's request, we proposed to handle the two research topics in sequence, first submitting a report on Provisional Voting and then preparing and submitting the report on Voter Identification. In describing the Voter Identification portion of the study, the proposal stated:

"We propose to test the hypothesis that more stringent voter ID requirements depress voter participation in general or for the poor, minorities and older voters in particular."

The proposal also included a plan to form a peer review group composed of scholars and practitioners in the areas of elections and voting to examine and comment on the research

The following pages provide a preliminary summary of our major contacts with the EAC during the course of the contract, with a focus on our work on Voter Identification. More extensive review of our files, including the monthly progress reports we submitted to the EAC, may find other relevant discussions, but this list at a minimum should provide a good overview.

**EAGLETON INSTITUTE OF POLITICS**

To: Adam Ambrogi, Counsel

---

**May 25, 2005** - Contract awarded

**May 26, 2005** - First meeting of Eagleton-Moritz team with EAC Commissioners and staff in Washington. After general discussion of EAC interest in both topics, Commissioner DiGregorio expresses concern that the composition of the project's peer review group was politically unbalanced. Eagleton had proposed including the following five individuals: R. Michael Alvarez, Professor of Political Science at California Institute of Technology; Martha E. Kropf, Assistant Professor of Political Science at the University of Missouri-Kansas City; Daniel H. Lowenstein, Professor of Law at UCLA; Tim Storey, Program Principal at the National Conference of State Legislatures; and Peter G. Verniero, former New Jersey Attorney General and Supreme Court Justice and current Counsel to Sills, Cummins, Epstein and Gross.

Commissioner DiGregorio subsequently suggests other names for our consideration. We are impressed by the list of people he provides and add three of them to the Peer Review Group: John C. Harrison, Professor of Law at the University of Virginia; Timothy G. O'Rourke, Dean of the Fulton School of Liberal Arts at Salisbury University; and Bradley Smith, Professor of Law at Capital University Law School. The Project Peer Review Group then had eight participants.

**July 28, 2005** - Brief EAC Commissioners at a public meeting at Cal Tech on progress on the research. Briefing includes this status report on the Voter ID phase of the work: "statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters will be complete in late August."

**August 9, 2005** - First telephone conference with Peer Review Group. Focus is draft Provisional Voting report.

**September 6, 2005** - Meet with the EAC in Washington. Brief the Commission on the status of the research on provisional voting.

**September 21, 2005** - Second telephone meeting of Project Peer Review Group.

**September 30, 2005** - Conference call with EAC Commissioner Martinez and three members of the staff. Commissioner Martinez indicates EAC is generally more comfortable playing the role of a national clearinghouse and therefore prefers to issue reports as "Best Practices" than as "Provisional Guidance." Staff says Eagleton emphasis should be on what states should do as opposed to suggesting how they would do it. Commissioner Martinez concludes meeting saying, "We have been very well served by all the work you and Moritz have done."

Feb. 22, 2006 - Conference call with Project Peer Review Group members after they have reviewed first draft of Voter Identification report. The Peer Reviewers suggest the statistical analysis: (1) Look at whether voter identification requirements are related to voter registration rates, as well as turnout; (2) Describe in further detail the basis for the aggregate and individual-level data analyses; (3) Clarify whether the report is examining turnout among citizens eligible to vote, or all individuals of voting age; (4) Stress in a footnote that Hispanics in the individual-level analysis are Hispanics who describe themselves as citizens who are eligible to vote; (5) Discuss in the Appendix the reasons why turnout rates appear to be higher in the Current Population Survey data than in other sources of data; and (6) Use predicted probabilities as opposed to odds ratios to describe the relationship between voter identification requirements and turnout.

*Eagleton subsequently revises draft of the statistical analysis to address all these issues.*

March 28, 2006 - Conference call with EAC staff and Eagleton-Moritz research team in advance of team's scheduled briefings of EAC Commissioners in Washington, D.C. on Provisional Voting and Voter Identification reports.

April 3, 2006 - Eagleton-Moritz morning meeting in Washington with EAC Commissioners Davidson and Hillman and staff members. Series of questions and responses on Voter ID methodology.

Commissioners ask whether respondents to the Current Population Survey might be non-citizens who said they were registered and voted. In a subsequent follow-up e-mail, Tim Vercellotti of Eagleton writes that the design of the CPS questionnaire skips non-citizens past questions about registration and voting. Commissioner Davidson asks if the team could examine the relationship between identification requirements and turnout over time. Team members respond that the information on state identification requirements for previous election cycles would require additional extensive research. Commissioner Hillman asks if the report could break out the relationship between voter identification and turnout for African-Americans with education levels of a high school diploma or less, or African-Americans below the poverty line.

*Subsequent analyses examined these subgroups as suggested.*

Eagleton-Moritz afternoon meeting with Commissioners DiGregorio and Martinez and EAC staff. Series of questions and answers. Commissioner DiGregorio concludes he is "disappointed" with the report. Commissioner Martinez says he "appreciates" it.

April 13, 2006 - Conference call between Eagleton and EAC staff. EAC requests that Eagleton convene a conference call of the Project Peer Review Group with EAC staff and/or Commissioners to discuss the statistical analysis of the effects of various Voter Identification requirements on turnout.

EAC staff also reports that the EAC is going to convene its own second peer review group to seek feedback on review by the Project Peer Review Group.

**(April 13, 2006 continued)**

EAC staff also reports that Eagleton is on the preliminary schedule to present Voter ID findings to the EAC's Advisory Board May meeting but that the date and location have not yet been set. EAC staff say they are "unsure where Voter ID project is going. We're going to have to see. We saw lines really drawn politically over Voter ID piece. We'll have to see what statements the agency chooses to make over this topic. It is the topic - It has nothing to do with you. The timing is such that Voter ID is a hot topic."

**April 28, 2006** -Eagleton informs EAC by email of its understanding of status of Voter ID project: "We presented our Voter ID research to the commissioners in April and are now revising it in line with their comments; that revised research paper will be discussed in mid-May by reviewers selected by the Commission. That date was set specifically to allow us to prepare a final report that would be ready for review by the Advisory Board on May 24; ...The appropriate conclusion for our work is a presentation of findings and recommendations for both Provisional Voting and Voter ID, 2 closely related topics, to the Commission at its public meeting in late June..."

**May 1, 2006** - EAC informs Eagleton that it is on the schedule to brief EAC Advisory Boards on both Provisional Voting and Voter ID on May 23 and 24, but asks that we plan on making four separate presentations to the boards over the two days.

**May 11, 2006** - Conference call on Voter Identification draft with some of original Project Peer Review group, second group of peer reviewers assembled by EAC, and EAC staff. Second group includes the three individuals noted in entry above for May 26, 2005.

One of new reviewers says that using a five-category ordinal variable in the statistical models to characterize the five types of voter identification requirements might rest on unrealistic assumptions. He recommends using five dichotomous variables, also known as dummy variables, for the requirements instead. He also recommends using predicted probabilities to assess the relationship between identification requirements and turnout in the individual-level data. Two of the original Project Peer Review Group recommend including analyses using the ordinal-level variables in the appendix for comparative purposes.

*Subsequent drafts incorporate all these suggestions.*

Two of new reviewers also recommend that the models assume age has a curvilinear effect on turnout, with turnout rising, then falling, as voters age. They recommend using both age and age-squared in the models, or age broken down into dummy variables.

*Subsequent drafts use a series of dummy variables to capture the curvilinear relationship between age and turnout.*

**(May 11, 2006 continued)**

One of original peer reviewers recommends further explanation clarifying that the turnout rates for the states using aggregate data make clear the rates for each state reflect an average of the turnout across the counties in the state. Same reviewer also recommends expanding the discussion of maximum and minimum requirements to add more detail about the distinctions between the two types of requirements.

*Subsequent drafts of the statistical analysis incorporate all these changes.*

One of new reviewers expresses concern about the omission of two important contextual predictors of turnout - the number of days between the close of registration and Election Day, and a measure of which states have Election Day registration.

*Subsequent analyses examine the effects of these variables on aggregate turnout.*

New reviewer also recommends breaking out Asian-American voters when looking at the relationship between voter identification and turnout.

*Subsequent drafts incorporate this suggestion by including Asian-Americans in the individual-level analyses.*

**May 23-24, 2006** - Research team briefs EAC Standards Board and EAC Board of Advisers in Washington, D.C. regarding the Provisional Voting report. The Voter Identification report, originally on the agenda, is dropped before the meeting.

**June 6 (?), 2006** - Letter from Project Director Tom O'Neill to Commissioner Paul DiGregorio responding to the Commission's hesitancy to publish best practices recommendation on Provisional Voting and questions on how to handle research on Voter ID. Excerpt from letter: "We hope the commission will use the reports, as intended from the outset of this project, as the basis for recommendations for better, if not best, practices to the states. If the Commission cannot decide to issue such recommendations to the states, we hope it will release the reports to provide the states and the broader elections community with this information, analysis and perspective on the issues. We recognize, based on the reactions at the Standards Board and, particularly, the Board of Advisors, that some of the findings, conclusions, and recommendations of the reports will be controversial with some of the Commission's constituencies. But we also believe, based on the comments of the Peer Review Group, the advisors assembled by the Commission, and our response to their critiques, that the reports are grounded in solid research by a well-qualified, nonpartisan team and that the reports will provide new information for the policy process. We believe this information will contribute to achieving the EAC mission of providing helpful information that the states may or may not choose to implement. . . . We believe our reports will prove useful to the states as they complete preparations for the 2006 elections."

**June 15, 2006** - EAC Executive Director writes to Eagleton saying "...The EAC Commissioners have reviewed and considered next steps with the voter identification draft report which Eagleton has prepared. While the final disposition of the results and findings of this study, on the part of the EAC, are still unclear, the Commissioners have asked that the final draft report of this study also be prepared and submitted to the EAC not later than June 30, 2006.

**June 29, 2006** - Eagleton-Moritz submits to the EAC its final reports on Provisional Voting and on Voter Identification referring to Voter ID paper as "final draft" at EAC request. First of five major recommendations on Voter ID from Eagleton-Moritz is:

The EAC should "encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted."

**August 16, 2006** - Eagleton writes to request that the EAC make "the two reports available for use by researchers, legislators, election officials and others interested in these topics." Letter notes: "That the EAC originally commissioned these studies to offer lessons for the 2006 elections based on experience in 2004 further supports the importance of quick action."

**August 31, 2006** - EAC Executive Director responds: "You may not release the draft report [on Voter ID]...as this report has not been finalized and has not been officially released by the EAC."

**February 8, 2007** - Eagleton presents voter identification findings to public meeting of the EAC in Washington. Transcript of the public meeting is available on the EAC web site.

**October 17, 2006** - EAC Executive Director responds to request from Brennan Center for Justice at NYU Law School sending "draft report on provisional voting, prepared by the Eagleton Institute of Politics and the Moritz College of Law." Letter notes, "EAC personnel are in the process of drafting a report about voter identification. The report will be made available upon completion."

**October 27, 2006** - Eagleton writes to EAC Executive Director saying, "We are...disappointed that you are not ready to do the same [release] our report on Voter Identification. We would appreciate knowing approximately when you expect to complete the review and consideration of advisory board concerns you mention to Ms. Weiser" [of the Brennan Center]

**March 30, 2007** - EAC posts Voter Identification paper on its web site and issues statement concluding of the report that "The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers."

Subject Re: Question-Voting Fraud-Voter Intimidation Report 

Tom:

I sent the consolidated draft of the report last week (minus the Nexis and case law charts) to the lawyers (with a cc: to you), along with the following comments:

- As you know, references to DOJ actions/responses have caused some concern at DOJ. But both consultants are adamantly opposed to EAC making substantive changes to their report. Perhaps using footnotes clearly labeled as EAC footnotes would be a method of addressing this issue?
- There are some recommendations regarding DOJ that we (the consultants and I) were told would not be supported by DOJ, and other references to DOJ, none of which have been reviewed by the department. I think we ought to give Craig Donsanto and John Tanner a chance to provide feedback on each of these sections.
- I am a little concerned about the naming of names, particularly in the section that addresses working group concerns. If we publish it as is, it might end up as fodder for some very negative newspaper articles.
- The report currently uses three different voices: third person, first person singular, first person plural. I think this looks really clumsy. If we are not actually making substantive changes, perhaps we could get away with making the presentation consistent in this regard.
- Because the consultants submitted the report in pieces, they did not include proper segues. I don't know if we should leave it as is, or insert them where needed.

03058E

The only comments I've received so far were from Gavin, who said, "I would put forth one point at the outset... if we are creating an EAC report, let create an EAC report. Tova and Job contract employees... I do not see why we can't use all, some or none of their work without footnote or comment."

The series of supporting charts can be found in the shared drawer under T:\RESEARCH IN PROGRESS\VOTING FRAUD-VOTER INTIMIDATION\Report\Consolidated Copy in the subfolders marked Case Charts and Nexis Charts. I continue to work on the formatting of these charts, but at least you and Edgardo can access them. (I would have attached copies to this message, but it would involve too many files.)

We may want to schedule a teleconference on this with the attorneys and Jeannie.

I hope you are feeling better. --- Peggy

Subject Question

Hi Peggy;

Sorry I missed you yesterday when you were here and hope you are beginning to feel better.

As you know the Voter Fraud and Intimidation Report is causing quite a stir.

Can you give me some ball park timeframe for how long it may take to wrap up our review and get a report to the Commissioners

Is there anything I can do to assist with getting you some help on this.

I know you have other things on your mind but I need to find a way to wrap this up soon.

Also I believe that there were some charts of some sort that were not included in the report we got from Tova and Job, are they available for Edgardo to find so that I may take a look at this.

Thanks so much and hope things are getting better for you.

Subject Re: The Fraud "Report" 

History:  This message has been replied to

I think it's good idea, especially considering the media coverage and controversy. I spoke with Todd Rokita today and he was not happy at all about what he has read and feels the status report was misleading as the working group session held the day after the report was given came to different conclusions.

We also should make mention on Thursday about the 4th anniversary of HAVA, which is this Friday. It could give us an opportunity to talk about the positive things that have happened in election reform since its passage. Much of the talking points our media advisors drafted talk about this.

I am recommending that we use Thursday's meeting, a public forum, to be on the record about this report.

My thought is that Tom should report the matter to us in his report. New Business?? Just stating the facts as they exist, including the nature of the study, how we have handled the numerous requests and inquiries that we have received, etc.

Please let me know what you think about this suggestion. Thanks.

Subject Interview w/Hazel Edney

Commissioner,

Hazel asked for a copy of the draft fraud report. I explained to her that staff was currently working to complete a final report, and I sent her the status report. However, she said she may not be interested in interviewing you if we cannot provide the draft report. She is going to touch base with me tomorrow, and I will let you know what she says.

Subject EAC Commissioned Report on Voter Fraud

Honorable EAC Commissioners,

I ask you to release the EAC commissioned report on voting fraud. Regardless of political persuasion, voting is the bedrock upon which our representative democracy is built. Because of this your responsibilities are great. Currently there has been a rush of litigation intended to protect against voter fraud. There are real concerns that these protections will decrease voter turnout, and likely decrease turnout disproportionately in minority groups. This will obviously affect the parties differently, thereby creating a tense environment and adding to the strife in our society today. It is important, you can not disagree, that any laws regulating voting practices are only created and passed with honorable intentions, since if the voting process itself is compromised the whole of our representative democracy is as well.

I respect you are in difficult circumstances, but it is better for the country to know the results of

030590

an objective report than to be litigated under subjective pretenses and in a disenfranchising manner. All people in this country who are citizens deserve to vote, and this report can help ensure that they continue to have that right free of trappings whose intentions are not true. Thank you for your work and time.

Sincerely,  
Dr. Michael D. Marsolek

Subject Report re voter fraud

Dear Mr. Whitener:

Thank you for taking the time to speak with me this morning. As you know, I was calling to request a copy of the complete report regarding voter fraud written by Tova Wang and Job Serebov. I am sending this in accordance with your request that I email our request for a copy of that report to you and that I "cc" Ms. Layson on the email.

I'd very much appreciate obtaining a copy of this report today. In the event that you can send it electronically or fax it, my contact information is below. If not, please let me know when and where I may pick it up

Thank you for your assistance.

**Subject:** NEED APPROVAL: Brennen Cen. letter

Commissioners,

I have not received input from everyone regarding the attached letter. It is a response to Wendy Weiser of the Brennan Center, who requested the staff voter fraud status report and the provisional voting draft report, both of which were presented to the Standards Bd. and the Bd. of Adv. at the May meeting. She also requested the draft voter ID report, which was not released at the May meeting. If possible, I'd like to get your input by the end of the day. The letter would go out under Tom's signature. Thank you.

Ms. Wendy R. Weiser  
Deputy Director, Democracy Program  
Brennan Center for Justice at NYU School of Law  
161 Avenue of the Americas, 12th Floor  
New York, NY 10013

Dear Ms. Wieser:

Thank you for your request for information regarding U.S. Election Assistance Commission (EAC) research projects on voter fraud and voter intimidation, provisional ballots and voter identification.

The status report on voter fraud and voter intimidation, prepared by EAC staff, and the draft report on provisional voting, prepared by the Eagleton Institute of Politics and the Moritz College of Law, are enclosed. EAC personnel are in the process of drafting a report about voter identification. The report will be made available upon completion.

Status documents about voter fraud and voter intimidation and provisional voting were presented to the EAC's Standards Board and Board of Advisors at a public meeting held in May 2006. Neither of these documents were final EAC reports. Per the Help America Vote Act (HAVA), the EAC works with its advisory boards to gather input on activities, including research projects. After discussing the provisional voting research with our advisory boards, they requested further research and clarification and noted that some of information was inaccurate or incomplete. Please see the attached resolutions passed by both entities outlining their concerns. As such, EAC is currently reviewing the draft report on provisional voting to address the concerns of the agency's advisory boards.

As a small agency of only 23 employees, including four commissioners, it is necessary for EAC to contract with third parties and experts to conduct research. The information provided by third parties is used by staff to develop EAC final policy or reports. No documents, drafts or third party recommendations submitted to EAC constitute official EAC policy or opinion and should not be identified or referred to as such.

Please note that our Standards Board and Advisory Board meetings are open to the public and are publicized on the EAC website at [www.eac.gov](http://www.eac.gov) and posted in the Federal Register.

Thank you for your interest, and let us know if we can be of further assistance.

Sincerely,

Tom Wilkey  
Executive Director

Subject Re: Don't Believe Everything You Read

Peg:

We saw both the USA Today article and a similar thing was reported on Rush Limbaugh's show naming both of us. I had a talk this morning with folks at the EAC. I told them at this point there needs to be a press release sent out by the Chairman saying just what you stated. This is the only way to rehabilitate the work we did, the Chairman's credibility, and our reputations. I also fear that if this is not done the EAC will begin to receive calls from Congressman and Senators regarding the "report" and its effect on voter ID requirements.

Peg, up to now Tova and I have refused to speak with the press at all out of respect for the EAC and its mission. We both stand by our work and its conclusions. We both also feel that if a statement (as well phrased as you did in this e-mail clarifying the issue) is not forthcoming from the Chairman then I will have to correct this error with the Press. I explained this in my conversation this morning with the EAC.

Tova and I worked hard to produce a correct, accurate and truthful report. I could care less that the results are not what the more conservative members of my Party wanted. Neither one of us was willing to conform results for political expediency. I think its important for me to note that I was very impressed with Tova's members of the Working Group and I can't say enough about Tova's partnership effort in this endeavor. While neither one of us really care about outside opinions, we do care that the Chairman was quoted or misquoted in a way that would disparage our year-long effort and all of the tax payer money that went into it. For this reason, we believe that a press release clarifying the situation is necessary from either the Chairman or from me.

Regards,

Job

Tova and Job:

I am home recuperating, but see that in my absence, a USA Today article has gotten everyone stirred up. The report to which the article refers is only the status report on the voting fraud-voter intimidation research project that was delivered to our Standards Board and Board of Advisors last spring. I provided a copy of this document to both of you. but have attached another copy for your information. This document is subject to public release because it was presented at a public meeting.

Due to internal resource allocation problems, your final report has not yet been reviewed by the Commissioners. It is considered a working document (not subject to public release) until it has completed the review process and the Commissioners have agreed to release it. There has been no attempt by the Commission to hold up the report. I bear responsibility for any delays in moving it along. Please be reassured that we would not release your report without letting you know.

**United States Election Assistance Commission – Board of Advisors Meeting**

**Meeting Minutes – April 27-28, 2005**

Herewith are the Minutes of the meeting of the United States Election Assistance Commission (EAC) Board Of Advisors held on Wednesday, April 27, through Thursday, April 28, 2005. The meeting convened on April 27 at 8:30 a.m. in Cambridge, Massachusetts at the Marriott Boston Cambridge Hotel, 2 Cambridge Center and adjourned at 12:41 p.m. on April 28, 2005.

**Call to Order:** Chair Lewis called the meeting to order at 8:30 a.m.

**Roll Call:** Chair Lewis called the roll and found present Secretary Chris Nelson, Ms. Mary Herrera, Secretary Mary Kiffmeyer, Secretary Rebecca Vigil-Giron, Mr. Tom Wilkey, Ms. Wendy Noren, Ms. Helen Purcell, Ms. Beverly Kaufman, Mr. David Orr, Mr. Tony Sirvello, Mr. J.R. Harding, Mr. Noel Hillman, Mr. Hans von Spakovsky, Ms. Polli Brunelli, Mr. Wesley Kliner, Mr. Thomas Shortbull, Mr. Joseph Crangle, Ms. Sue Sautermeister, and Secretary Robin Carnahan. Chair Lewis also recognized that Mr. Jim Dickson and Mr. Christopher Thomas were not present at roll call, but were scheduled to arrive later in the day.

**Changes in Agenda:** Chair Lewis asked that the Board not take any official votes until they adopted a set of bylaws in the following day's business session. He then announced that the EAC Commissioners' Q and A session would be moved to 8:30 AM the following day.

**Updates and Reports:** Chair Lewis asked each member to describe a few concerns they wished to address. The members raised concerns in an effort to improve the development process of the Voluntary Voting Systems Guidelines. (VVSG). Amongst the various concerns raised were members' desires to discuss and integrate public comment into the process; concerns regarding the states' lack of guidance in acquiring systems prior to the release of the final voting systems guidelines; the development of Board of Advisors bylaws; means to improve voter registration systems and reduce voter fraud; and various other obstacles facing EAC, State and local election officials in administering the mandates set forth in HAVA.

**EAC Update:** Thereafter, Chair Lewis introduced EAC EAC Chair Hillman, who provided the Board with an update on EAC. EAC EAC Chair Hillman gave a brief

summary of the challenges facing EAC, as well as milestones from the previous year, including its move in April 2004 to its new office space at 1225 New York Avenue, the publication of State plans, disbursements of requirements payments to States and issuance of best practices

payments being EAC EAC Chair Hillman went onto to discuss the schedule of

made to the states. She noted that Alaska, Guam and New York had not yet received any Title II payments because they had not met the administrative complaints procedures or five percent matching requirements, mandated by HAVA. Additionally, she noted the schedule of 2005 meetings and discussed EAC's intention to hold public hearings in the field.

EAC EAC Chair Hillman then reported on EAC's success in obtaining an

increase in its 2005 budget to \$10 million for its operating budget and \$4 million for research projects. These increases allowed EAC and the Technical Development Guidelines Committee (TGDC) to move forward with the National Institute of Science and Technology (NIST) on the development of the Voluntary Voting System Guidelines (VVSG). EAC EAC Chair Hillman indicated that of this \$14 million budget, approximately half is devoted including the development of guidance and VVSG. EAC's fiscal year 2006 budget request is approximately \$17 million.

Furthermore, EAC EAC Chair Hillman discussed the FY 2005 cap of 22 full-

time employees and EAC's efforts for FY 2006 to have that number increased to 26, so that EAC may properly take over lab accreditation, voting system certification and the ongoing review and auditing of all state reports. EAC has decided to contract out a lot of the work it could do internally if it had more staff. Chair Hillman then described how the budget request process works.

EAC EAC Chair Hillman then told the Board that the Commissioners would receive recommendations from the Technical Guidelines Development Committee (TGDC) by May 9th. Thereafter, the guidelines will be posted for public comment for 90 days, at the end of which, EAC will make changes to the VVSG as appropriate. During the comment period, EAC plans to hold 3 public hearings. The entire process should take approximately 120 days and is required by HAVA.

EAC EAC Chair Hillman provided a summary of the research and study projects EAC is working on, including issuing guidance on provisional voting, the impact of voter ID requirements, issuing statewide voter registration database guidance, studying and surveying Election Day 2004, UOCAVA, and NVRA as required under HAVA. The Election Day study will establish baseline information and statistics for further study and comparison. In addition, EAC will do a study on electronic voting and a report on Free Absentee Ballot Postage some time in the near future.

EAC EAC Chair Hillman stated that all EAC meetings, including those of the Board of Advisors and Standards Board, are open to the public. General Counsel Juliet Thompson stated that the Board would be able to have telephonic meetings concerning upcoming studies as long as they are published.

Mr. Noel Hillman stated his concern that EAC does not yet have an Inspector General to oversee the process of disbursing funds and offered his help in securing Inspector General services for EAC. EAC EAC Chair Hillman stated that the Commission has been working to establish a cooperative relationship with another agency for the use of Inspector General services and they are close to establishing such a relationship. Commissioner Soaries added that they are aware of the need to secure such services.

Commissioner Martinez commented on the interface between the Single State Audit Act and the duties of the Inspector General and stated that the Commissioners recently received guidance from GAO. In addition the Comptroller General has an obligation to audit funds at least once during the life of the funds.

Commissioner Martinez further commented that although the Commission reviewed the state plans that were submitted, its due diligence is limited to certification that a state had received a Title II payment, had filed a state plan published in the Federal Register, had an administrative complaint procedure in place, and had put up a 5 percent match. EAC will rely on the states to inform itself when it makes a material change to its plan, but will also perform audits to ensure that funds are being used for the intended purposes.

Chair Lewis expressed understanding that data collection at the local levels can sometimes be difficult, but stated that the first data collection instrument was thorough and served as a good benchmark.

Chair Lewis introduced Mr. Mike Sciortino, Chair of the Standards Board, who stated that the Board recently elected and organized an executive board. The executive board met in Washington, DC with members of the Advisory Board and National Academy of Sciences to develop a framework for the proposed guidance on Statewide Voter Registration Database List. Commissioner Martinez thanked Chair Sciortino for his leadership and guidance. Commissioner Martinez also indicated that the Standard Board's meetings would be transcribed and open to the public. Mr. Wilkey requested that the Voting Standards Subcommittee convene briefly during the break.

**Recess:** The meeting was recessed until 10:45 AM.

**Reconvene:** When the meeting reconvened, Chair Lewis stated that those wishing to propose changes to the bylaws should discuss proposals at 1:15 p.m. at the back of the room towards the end of the working lunch. He also indicated to the Board changes to the Board contact roster should be submitted to Sheila Banks at EAC, who contact information is on the last page of the roster of the Board of Advisors. Chair Lewis then asked Mr. Wilkey, Chair of the Board's Standards Committee, to provide an update on voting systems standards.

**Voting System Standards:** Mr. Wilkey stated that he would be available to review the TGDC's proposed Voluntary Voting System Guidelines over the next few days. He encouraged Board Members not to be intimidated by the technical data and to ask for help in understanding the guidelines when necessary. He described the voting standards process as open and transparent and expressed amazement at its progress. Mr. Wilkey then stated that the 1990 standards took five years to develop and that there was a gap of time during which election officials determined what changes should be made to the standards.

Under HAVA, the TGDC and NIST had to produce its product in nine months and Mr. Wilkey stated that it was a monumental effort. Mr. Wilkey suggested that members of his committee, members of the board who were on the TGDC and a parallel group from the standards board convene for a day to get a briefing on the document. Mr. Wilkey asked Ms. Thompson if the contents of that meeting would be displayed on the website or otherwise be made available for the two groups. Mr. von Spakovsky asked when the latest version would be available and Mr. Wilkey responded that it would probably be available in the middle of June and that it

would be available on the website. Mr. Wilkey then encouraged everyone to read the overview enclosed in the booklets as a start.

Chair Lewis suggested that the Board of Advisors work like a legislative body and listen to recommendations its committees make to it. Commissioner Martinez informed Mr. von Spakovsky that the Commission intends to transmit the initial set of recommendation to Board of Advisors members when they receive them.

Chair Lewis asked Commissioner Martinez if there was sufficient time for Mr. Wilkey's committee and TGDC members to get together during the 90-day period. Commissioner Martinez stated that there would be ample time and that HAVA requires a minimum period of 90 days for review but as the Chair suggested, that period may extend longer than 90 days if necessary to ensure due diligence. Secretary Kiffmeyer suggested that the Board try to give guidance as early in the process as possible. Commissioner DeGregorio then suggested to Chair Lewis to request that Board members who worked with NIST on the standards in the past discuss their experiences.

EAC EAC Chair Hillman stated that the EAC has encouraged Board Members to review information as it became available and has sent letters in advance of the dates documents would be posted so that they could plan accordingly. Mr. von Spakovsky indicated concern over when Board Members would be getting a draft of voting standards for comments and EAC EAC Chair Hillman stated that the Commissioners would take his suggestion under advisement that the Board get a draft when the Commissioners receive their draft.

Chair Lewis requested that Ms. Purcell and Mr. Harding comment on their experiences as members of TGDC. Ms. Purcell stated that the TGDC broke into three subcommittees and met by conference call every week or every other week. In addition the TGDC had several plenary sessions and planned to issue the recommended VVSG to the Commissioners by May 9, 2005. Ms. Purcell stated that she was on the Security and Transparency Subcommittee and worked on Voter Verified Paper Audit Trail (VVPAT). Ms. Purcell also brought attention to the fact that what has been accomplished by TDGC to date is on the NIST website.

Mr. Harding stated that the reason the TGDC broke into committees is because it was the only way to manage the work since the document is so large. The TGDC also informed the NIST

officials of election officials' limitations and practical needs and resources. Mr. Harding suggested that a process be developed so that Board members can ask prompt questions to narrow the focus of comments.

Ms. Noren encouraged everyone on the Advisory Board to read the documents on NIST's website and to digest the technical standards as part of their legal obligation. She also stated that the Advisory Board has a huge duty to assure that standards are in place for the 2006 election.

Ms. Purcell commented that most election officials have been using the same equipment for decades and that the goal is long-term. She also stated that she was impressed with how fast the NIST was able to assimilate election information and how much time they devoted to learning about elections.

Secretary Carnahan asked if Version 1 would be finalized on May 9, 2005 and if Version 2 would be available by December 31, 2005. Ms. Purcell responded that they were aiming to finalize Version 2 in November. Secretary Carnahan then asked if vendors that would be able to meet the new guidelines as required by state law.

Chair Lewis stated that it was a false expectation to have the standards coincide with the availability of new equipment in compliance with standards.

Mr. Dickson asked if the final point of the document would be May 9, 2005, or after the comment period and Chair Lewis responded that it would be after the comment period and publishing in the Federal Register. Chair Lewis also indicated that there could be changes between the May 9, 2005, version and what goes into the Federal Register. Mr. Dickson finally asked what the thinking was in terms of a one-time purchase and the existence of evolving standards. Mr. Harding responded that election officials would need to purchase equipment as well as maintenance agreements with their sums.

Secretary Vigil-Giron stated that her state (NM) was moving toward uniformity of all systems and looks forward to the enactment of standards as a positive evolution.

Mr. Orr expressed confusion about the difference between the reality of purchasing compliant systems and the reality of the legal obligation to purchase compliant systems. Chair Lewis responded

that the first legal basis is that machines bought in compliance with the 2002 standards are still operable. However, the reality is that some political groups will expect the standards to be adopted immediately. Chair Lewis understands the frustration that follows from such expectations, but it is the reality.

Commissioner Martinez reiterated a point Ms. Noren made, that each state has to look at its own state law to determine which guidelines to follow and what equipment will be in compliance. The Commissioner also indicated that guidelines on VVPAT were intended to be the first of several different ways to achieve independent verification. Guidelines on others would be addressed in future iterations of VVSG.

Secretary Nelson asked what impact Version 1 will have on ITA certification and Commissioner Martinez responded that the Commission will consider whether grandfathering is appropriate in that regard. The TGDC has indicated to the Commissioners that any policy on grandfathering should be decided by the EAC and not decided by the TGDC.

Secretary Kiffmeyer expressed her concern that the Board considers public perception and she complimented the Board on their discussion.

Mr. Dickson asked if putting the expectation of updates into a contract with vendors would result in their taking advantage of that reliance. Ms. Noren stated that there may be a holdup problem, but that with guidance from NIST and EAC, vendors should be able to offer more accurate pricing.

Mr. Kliner and Commissioner Martinez discussed how grandfathering standards could affect legislatures' ability to plan for implementing new guidelines. Commissioner Martinez discussed the possibility of issuing guidelines with an implementation date far enough in the future to allow states to effectuate the changes. Ms. Paquette cautioned that Volume 2, which is available on NIST's website, may not accurately represent the balance in security systems that EAC wishes to achieve.

**Recess and Reconvening:** The meeting recessed for lunch at 12:13 PM and reconvened at 1:34 PM.

**State Voter Registration Lists:** Commissioner Martinez informed that under sections

311 and 312 of HAVA, EAC is obligated to issue guidance on the implementation of the administrative requirements in Title III. This includes Voting System Standards under Sections 301-303.

Commissioner Martinez indicated that EAC convened a working group to recommend draft guidelines on Statewide Voter Registration Lists. Among the members who participated were Secretary Nelson, Secretary Vigil-Giron, Ms. Sautermeister, Ms. Noren and Mr. von Spakovsky.

Commissioner Martinez noted that tab 7 in the Board's briefing book contains the draft guideline, which was published in the Federal Register on April 18, 2005.

EAC EAC Chair Hillman stated that in conversations with Members of Congress, she has suggested that they reserve judgment about how and when HAVA dollars are spent until critical deadlines have been met by the States. Although states have an idea of the cost of replacing voting systems, many are finding that it will be much more expensive to develop, implement or update the voter registration. They may therefore have to amend their HAVA spending plans.

Secretary Kiffmeyer stated that it was not explicit in the language in the draft guidance that the state list be the official list. She also expressed concern about the definition of the word "expedited." Commissioner Martinez responded that the working group gave much attention to the language in Section 303(a)(1)(VI). As an example, Colorado elected to use a real-time transfer to comply with the expedited basis language in the statute. However, other states may interpret "expedited" differently. California currently plans that its statewide system will pull information from local databases, which will not happen instantaneously. The working group agreed that the term expedited should mean at least once every 24 hours.

Secretary Kiffmeyer stated that her question had more to do with the time between when a voter is issued a paper card and when it is entered into the system. Commissioner Martinez stated that once the information actually goes into the local official's database, the guidance recommends an upload every 24 hours. The 24-hour period does not start until the local official enters the information into the database.

Secretary Nelson stated that the working group recognized the problems election officials might have in getting many

registrations at once. He also thanked EAC and other members of the working group for a good and productive experience.

Mr. Dickson asked about obligations under Motor Voter and Commissioner Martinez indicated that the statute requires that there be coordination of the statewide voter registration list with "other agency databases." The statute also requires that there be regular coordination between the Statewide Voter Registration List and death records and felony status. Question 10 of the draft guidance deals with how the Statewide Voter Registration list should be coordinated with other registration databases, which includes agencies defined by NVRA. Commissioner Martinez indicated that there was a great deal of discussion in the working group about the obligations created under Motor Voter.

EAC Chair Hillman noted that EAC has fielded concern from various groups that certain social service agencies are not meeting their responsibilities under NVRA. In some cases, when the agencies are not meeting their obligations, election officials may not follow up with them.

Mr. Thomas stated that the data will show who is complying and who is not. He asserted that where less than 50 percent of a state's registrations come through motor vehicles, that state is probably not doing their job in those offices. Mr. Thomas noted that HAVA specifically does not use real-time language and although real-time may be a nice concept, he doesn't believe it's necessary. In his state of Michigan, they do an update every 24 hours. Mr. Thomas stated that the draft guidance do not sanction bottom-up systems that are not functional. He stated that functionality should include the NVRA purging processes.

Secretary Kiffmeyer stated that her state of Minnesota built a real-time system for \$5.3 million. She then asked Ms. Herrera how long it took to enter her state's 13,000 registrations. Ms. Herrera responded that it took about 3 weeks to enter all the registration forms because there were duplicates and other problems in verifying the entries.

Mr. Kliner was appreciative of the language in response to question 10 because the worry in Tennessee was that integration in real-time would increase the chance for a security breach. He indicated that he thought the 24 hour batch process would allay fears that local elections might have about computerized processes.

EAC Chair Hillman noted that this was the first time EAC put together a working group and the Commission was pleased that it went so well. Commissioner Martinez expressed his appreciation for the people who participated in the process and invited comments in the upcoming weeks.

**Other Topics:**

Chair Lewis asked if anyone had a subject matter they wished to discuss. Ms. Sautermeister emphasized the importance of the voter registration process, especially as it concerns states being able to share information. Chair Lewis stated that one of the long-term goals would be integration from state-to-state, but until the state databases are functional in that manner, it would be unlikely.

Ms. Purcell informed about changes being proposed by the state legislature to Arizona's voter laws. She noted one such measure that would require identification and disallow a person from receiving a ballot if they did not have identification.

Mr. Shortbull stated that South Dakota uses an affidavit system that he thinks works out well. He complimented Secretary of State Nelson on his efforts to work out glitches in the affidavit system. He expressed concerns that voter ID requirements could result in denial of civil rights. Commissioner Martinez stated that EAC is limited by NVRA and HAVA, but that Justice has enforcement authority under Title III of HAVA. HAVA does not preclude a state from imposing an ID requirement. HAVA also states in Section 303(b) that if someone is unable to vote because of a lack of ID, they should still be able to cast a provisional ballot.

Mr. Dickson stated that the Carter-Baker Commission is considering the issues of identification requirements and state interactive voter registration databases.

Chair Lewis stated that the Board would bypass a discussion of voter registration problems for another time and invited comments on the National Mail-In Registration Form.

Karen Lynn-Dyson introduced herself as the research manger for EAC. She advised the board about EAC's efforts to update the NVRA mail-in voter registration form. She also noted that EAC is considering the idea of a web-based form that would be able to be updated frequently. EAC will produce a Spanish version of the form and is looking at translating the form into six other languages. The final draft should be ready for public comment in July.

Chair Lewis asked if EAC has determined that a registration must have a driver's license number or other unique identifier in order to be a valid registration. Commissioner Martinez responded that EAC has not given an interpretation to that particular question. Mr. von Spakovsky of the Department of Justice stated that voter registration for Federal office cannot be accepted or processed by a state unless the application includes a driver's license or similar identification.

Mr. Wilkey pointed out the problem of the high number of citizens who cannot read or write. He recommended that EAC have the form reviewed by a literacy expert and commented on how some states use graphics to make the form easy to read and fill out.

Secretary Vigil-Giron pointed out that there are three provisions of the Voting Rights Act that are due to expire in 2007 that will affect minority voters. Thirty-six or 37 states were told that they had 5 percent language minority populations and had to include election materials in those languages.

**Provisional Voting:** Chairman Lewis stated that the next topic was provisional voting and that there may be additional time for other topics at the end. He asked for a starting point for the discussion.

Commissioner Martinez briefed the board on implementation of provisional voting. He noted the variance among states regarding when a provisional vote would be counted. He stated that 27 states in the country require that for a provisional vote to be counted, it had to have been cast in the voter's assigned precinct. Ohio is an example of one of those states.

Other states provide that if you vote in the correct county, but not the correct precinct, at least a partial ballot will count for Federal office. Georgia and New Mexico are examples of these states.

EAC will likely develop practices on implementing provisional voting. He noted that EAC held a public hearing on this issue in Columbus, Ohio and found that many states had not codified their provisional voting procedures. Florida is an example of one state that has codified its provisional voting procedures.

Commissioner Martinez further stated that EAC will undertake an effort to survey all states to determine how states are handling implementation of provisional voting.

EAC Vice Chair DeGregorio stated that the use of statewide databases throughout the country should help eliminate provisional voting for a lot of people. The overall goal is to have as few provisional ballots as possible. He also noted that EAC is collecting data on the numbers of provisional votes cast and counted in the 2004 election.

Several board members commented on various efforts being made by states and local jurisdictions to assure accurate voter lists and access to this information on Election Day by poll workers. Ms. Herrera asked why EAC hadn't come up with guidelines on how to count or process provisional ballots since provisional voting is a HAVA requirement. Commissioner Martinez responded that HAVA gives responsibility for methods of compliance and implementation to the states. EAC will issue guidance and best practices to inform jurisdictions but the states will have to promulgate their own procedures.

A general information discussion ensued about various procedures and rates of provisional votes cast and counted.

EAC Vice-Chair DeGregorio stated that preliminary statistics collected by EAC indicate that in states that had a statewide database in place for the 2004 election, about 6/10ths of one percent of registered voters used provisional ballots. In states that did not have a statewide database, the rate is about 1.4 percent, approximately double. However, there was no difference in ballots that were ultimately counted; 65 percent in states with a statewide voter registration system and 64.4 percent in states without a statewide voter registration system.

Chair Lewis stated that provisional voting was obviously a contentious issue because elected officials cannot agree on how to handle it. EAC Chair Hillman added that HAVA leaves it up to the states to define the jurisdiction and determine how and when a provisional ballot will be cast. Nonetheless, she encouraged the board to exercise its prerogative and provide advice and suggestions to EAC on how it should approach its various areas of responsibility.

**Studies and Data Collection:** Chair Lewis then introduced the next area of discussion, EAC studies and data collection.

EAC Chair Hillman pointed everyone to tab five of their binder, the Help America Vote Act tab. At the beginning of Section 241, it states that on a periodic basis, EAC shall conduct studies. Section

241 specifies 18 areas and a 19<sup>th</sup> on such other matters as EAC determines appropriate.

Sections 271 through 283 talk about grants for research on voting technology improvements and testing of equipment and technology, but those provisions are not funded by Congress, so EAC does not have money to provide grants for research on voting technology improvements or to do pilot program testing. EAC nonetheless is conscious of its role in certifying labs and will find money to do testing as appropriate.

Sections 302 through 305 address provisional voting, voting information, computerized statewide voter registration list requirements, minimum requirements and methods of implementation left to the discretion of the states. All of these sections govern the areas where EAC will issue guidance. EAC has put mechanisms in place to complete studies required by NVRA and overseas voting and EAC Chair Hillman anticipates that the data EAC collects in the 2006 election will guide the work it does afterwards.

EAC Chair Hillman noted that EAC has scoped out the basic framework for the 2006 research and study agenda. By the end of August 2005, EAC will have broadly identified its research agenda and study activities for 2007.

Commissioner Martinez stated that EAC is trying to use their appropriation for 2005 to focus on their obligations under the statute; development of voting system guidelines through NIST, the convening of statutory bodies, the development of guidance pursuant to Sections 311 and 312, and the mandated research. The only project that EAC is doing that is discretionary is the Election Day survey, which was sent to the states and was important for establishing a benchmark. Section 241 of HAVA has a laundry list of items that Congress has suggested and that EAC should research eventually. The question is whether there will be funds available to do some of the suggested research, and the Commissioners are interested in input from the Board on what areas of Section 241 EAC should explore.

Chair Lewis stated that during the break, he was approached by two officials, one state and one local, who requested that EAC invite comment from election officials before they release the Election Day survey to the public. Chair Lewis then asked if the Commissioners had determined what studies they planned to do in 2006 and 2007.

EAC Chair Hillman responded that EAC had not yet identified specific studies it would conduct but rather had established a broad framework that was included with its FY 2006 budget request.

Chair Lewis requested that members of the Board look at Section 241 and then facilitated a discussion that resulted in the board recommending prioritized areas of study under HAVA Section 241.

The top five areas recommended are:

- (8) Methods of recruiting, training and improving the performance of poll workers.
- (2) Ballot designs for elections for Federal office.
- (3) Methods of voter registration, maintaining secure and accurate lists of registered voters (including the establishment of a centralized, interactive, statewide voter registration list linked to relevant agencies and all polling sites) and ensuring that registered voters appear on the voter registration list at the appropriate polling site.
- (5) Methods of ensuring the accessibility of voting, registration, polling places and voting equipment to all voters, including individuals with disabilities (including the blind and visually impaired), Native American or Alaska Native citizens, and voters with limited proficiency in the English language.
- (4) Methods of conducting provisional voting.

**Recess:** The meeting recessed for the evening at 4:46 PM.

**Reconvening:** Chair Lewis reconvened the meeting at 8:30 a.m. on Thursday, April 28, 2005.

**Updates and Reports:** Chair Lewis outlined the agenda for the day's proceedings. The first session would be a Q and A session with EAC commissioners. After that would be a report of the Executive Director Search Committee, which would be conducted with the Board of Advisors members only. At the conclusion of the committee report, the meeting will be reopened to the public for adoption of bylaws and election of officers. After that, the board can vote on any issues.

Chair Lewis outlined the voting procedures to elect officers and answered questions accordingly.

Chair Lewis then invited the Board to pose questions to the Commissioners. Thereafter, the Commissioners would ask questions of the Board.

A number of issues were discussed during the Q and A session. Mr. Harding indicated that members of the Access Board were at EAC's disposal to assist in developing a VVSG that could be digested by the general public. The Commissioners answered various questions regarding anecdotal statements being made about the November 2004 election; possible means to increase voter turnout; VVPAT and possible alternatives; possible scenarios for jurisdictions not in compliance with HAVA come January 2006; access to EAC website; the voting systems certification and laboratory accreditation processes; the high rate of turnover amongst volunteers at groups that do voter registration training; and obstacles facing state and local election officials.

**Executive Director Search Committee Report:** The Board then met in Closed Session for 20-30 minutes to receive a report from its Executive Director Search Committee.

**Adoption of Bylaws:** Chair Lewis stated that the meeting was reopened to the public and that they would move on to the business section of the meeting. According to Robert's Rules, the group would read the bylaws and consider them as individual sections. After adoption of the bylaws and review of the proxies, there would be elections of officers. He then invited Ms. Kaufman, Chair of the Bylaws Committee, to go through the first reading of the bylaws.

Ms. Kaufman reported that the Bylaws Committee consisted of Beverly Kaufman, Chair, Wendy Noreen, Sue Sautermeister, Ernie Hawkins, and Doug Lewis. The first draft of recommended bylaws was distributed to the Board via e-mail prior to the meeting and copies were distributed on April 27. The Committee members in attendance had a mini-meeting on the 27th and were joined by other board members (Mr. von Spakovsky, Secretary Kiffmeyer, Nelson, and Mr. Crangle) who submitted recommendations for amendment. After the discussion, their suggestions were accepted and distributed to the board.

Mr. von Spakovsky moved to dismiss the reading because everyone in attendance had the bylaws in front of them and the friendly amendments had been accepted by the committee. He also moved to accept the bylaws. Secretary Vigil-Giron seconded the motion.

Secretary Kiffmeyer agreed with the dispensing of the reading, but had a question about a proposed amendment. Chair Lewis asked if Mr. von Spakovsky would amend his motion to dispense with the reading first and Mr. von Spakovsky agreed; Secretary Nelson seconded. Chair Lewis agreed that they would proceed without reading the bylaws and would proceed to the consideration.

As to Article 1, hearing no objections, Chair Lewis asked that all in favor of adopting Article 1 say, "aye." The Board voted to adopt Article 1.

Mr. Harding asked if Article 2 should cite the Federal Advisory Committee Act and Chair Lewis responded that he thought it was cited. Mr. Harding stated that the Article refers to the Act without a citation. Mr. Harding agreed with Chair Lewis that the Board could incorporate the citation by reference and attach them to future editions.

As to Article 2, hearing no objections, Chair Lewis asked that all in favor of adopting Article 2 say "aye." The Board voted to adopt Article 2.

Chair Lewis stated that Article 3 came straight from the law, but contained an incorrect item. Item I should read, "two members appointed by the International Association of Clerks, Recorders, Elections Officials, and Treasurers."

Mr. Hillman observed that he knew the language came from the law, but for the record, there is no such thing as the Office of Public Integrity in the Department of Justice. It is the Public Integrity Division of the Department of Justice. Chair Lewis asked that the correct information be sent to EAC.

As to Article 3, membership, hearing no objections, Chair Lewis asked that all in favor of adopting Article 3 say "aye". The Board voted to adopt Article 3.

As to Article 4, terms of service and filling of vacancies, Chair Lewis asked that all in favor of adopting Article 4 say "aye". The Board voted to adopt Article 4.

As to Article 5, officers, no one voiced an objection that the Board shall elect a Chair, Vice-Chair and Secretary; and the officers shall be elected by secret ballot, each position lasting for a period of one year, with no officer serving more than two consecutive terms in one office. Chair Lewis stated that he noticed while looking at the

bylaws that there was no indication of when elections or meetings would be held. Ms. Sautermeister explained that they only have to meet once a year and did not want to limit it to a certain meeting. Secretary Nelson suggested that it specify the required meeting as the first meeting each year. Mr. Thomas asked if the term of office would be affected with no meeting specified and Chair Lewis suggested that the term be one year or until the next election is held, to which Mr. Thomas agreed.

Secretary Vigil-Giron asked if the Parliamentarian is going to adopt rules of order or if the Board would adopt Robert's rules. Secretary Carnahan asked if the Committee suggested having party differences between the Chair and Vice Chair. Chair Lewis stated that he was hoping not to do that although he would consider it. There are some members of the group who cannot be identified with a particular political party and should not be ruled out because of that. Secretary Carnahan commented that EAC is separated by party and so are Secretaries of State. Chair Lewis indicated his understanding, but stated that some people in the group are not supposed to engage in partisan politics. Secretary Carnahan suggested that the Board categorize people as part of a party or independent or undeclared.

Ms. Kaufman stated that she agreed and that the Committee discussed the same issue but decided it would be better left to discussion. Mr. Dickson pointed out that the group had half an hour and asked that they deal with the issue expeditiously. Secretary Carnahan proposed an amendment to include a statement that the party filling a seat shall not fill the same seat two years in a row and that the Chair and Vice Chair should be from different parties. Chair Lewis suggested that one person being unaffiliated should not preclude their predecessor from also being unaffiliated. Secretary Vigil-Giron seconded. Chair Lewis asked if there was further discussion on the amendment that the Chair and Vice Chair be of different political parties. Mr. Hillman asked for guidance from the General Counsel and stated that he assumed that a Board of Advisors was an apolitical entity, so party identification might be unusual.

EAC Chair Hillman state that HAVA specifically says that appointment to the Board shall take into consideration party affiliation so there is a balance. Mr. von Spakovsky stated that in the year and a half that the Board has been operating, politics has not played a part in the Executive Committee and he did not wish to introduce politics now. There is a large mix of members on the Board, from all levels of government and Mr. von Spakovsky

stated that he does not want to know what political party each member affiliates with because it is unimportant to the Board's work.

Mr. Crangle stated that he thought most Americans look at party affiliation in terms of public image, and in that sense, it may be advisable to adopt the amendment. Mr. Hillman agreed with Mr. von Spakovsky about because he believes that identifying people with political parties suggests partisanship. Mr. Shortbull called the question and Chair Lewis asked for a vote on whether to adopt the procedure that the Chair and Vice Chair should be from different political parties. Nine were in favor and twelve were opposed, so the motion failed.

As to Article 5, added to the number 3 was "or until the next election." Added to number four was "for a specific office." And added as number 6 is "elections shall be held at the first meeting of each calendar year." Hearing no further comment, Chair Lewis asked that all in favor say "aye." The Board voted to adopt Article 5.

As to Article 6, duties of the officers, Chair Lewis asked all those in favor say "aye." The Board voted in favor of Article 6.

As to Article 7, meetings, Chair Lewis noted that the amendments notice went from 30 to 45 days and may be waived by a majority agreement of the members; meetings may be held by electronic means. EAC Chair Hillman asked that the number of meetings per calendar year be subject to the availability of funds. Hearing no further objections, Chair Lewis asked that all in favor say "aye." The Board voted to adopt Article 7.

EAC Chair Hillman asked about the waiver in Article 7. EAC is required to post a notice of all meetings in the Federal Register and wanted to be sure that they still provided for notice in the Federal Register. Ms. Noren suggested adding, "but not less than 14 days prior to" and Mr. von Spakovsky suggested to the extent permitted by law. It was his amendment and he intended that if there were an emergency, the group could waive the period. Chair Lewis agreed to change the language to "as permitted by law" and amended since it was already adopted.

As to Article 8, quorum and proxy voting, Chair Lewis suggested that proxies be given up to the day of the session. Mr. Crangle moved on the motion and Mr. Shortbull seconded. Thereafter, the Board voted to amend to subparagraph 2 of Article 8 to include the

words "up to the day of the meeting." The board voted to adopt Article 8.

As to Article 9, standing committees, Secretary Kiffmeyer suggested that E and F use parallel language since they require separate members from NASED and NASS. Secretary Vigil-Giron seconded the motion and Ms. Kaufman stated that she did not want to dilute the representation of IACREOT or NACRC as a result. Secretary Vigil-Giron stated that the goal was to represent different perspectives. Ms. Sautermeister asked if the motion only pertained to Voting Systems Standards Committee, to which Chair Lewis responded in the affirmative. He also noted that he would be objecting to it because it did not include a representative from the Elections Center. He suggested the addition of an H and an I and that the Election Center be represented. Secretary Kiffmeyer asked Chair Lewis if he was suggesting an amendment to the amendment proposed and he responded yes.

Mr. Nelson stated that his original intention in the language was to make sure that there was at least one person representing the state level organization, not to include someone from every organization. Ms. Herrera stated that it was important to separate Secretaries of State and State Election Directors since they certify and qualify machines. Chair Lewis suggested that they say one member from NACRC, IACREOT, the Election Center, NASS, and NASED be part of it, eliminating E through G, and the Committee would be 11 members instead of nine. The two added members would be the Election Center and dividing NASS and NASED.

Mr. Dickson asked if the Board was properly balancing interest groups in terms of groups that represent citizens and Chair Lewis responded that there would be five from the groups they just talked about and one from disabilities. Chair Lewis asked if they should add more groups from non-elections organizations. Mr. Kliner stated that if they expanded the groups, some of the people that would like to serve but are not affiliated could participate. Chair Lewis asked Secretary Nelson if it would be possible to say that the Chair can select members who are not part of the organizations and Secretary Nelson responded that he could have three at-large appointments from the board. Chair Lewis suggested that the Chair of the Board of Advisors select from people who are not already representative of the five organizations mentioned. Ms. Kaufman suggested restating the language to read each of the five organizations mentioned could have only one representative on the Committee.

Secretary Vigil-Giron asked if the group needed to correct the IACREOT name, and Chair Lewis pointed out that it did need to be corrected throughout. Mr. Dickson requested that the language be specific as to the pool from which the Chair could select members since he hoped the document would be around for many years.

The Board voted in favor of amending E to read, "One member, excluding the Chair, shall represent each of the following organizations."

Mr. Dickson moved to create subsection F, which would allow the Chair to select members who are not members specified in section E. Thereafter, the Board voted in favor of this amendment.

As to Article 9, hearing no objection, Chair Lewis asked that all in favor say "aye." The Board voted in favor of Article 9.

As to Article 10, amendments, Chair Lewis noted that the bylaws could be amended not less than 30 days prior to an annual meeting. Mr. Dickson asked if the bylaws can only be amended at something designated as an annual meeting. Secretary Kiffmeyer suggested not using the annual meeting language since they struck it in an earlier adoption. Chair Lewis suggested eliminating the word annual, which would include electronic meetings as well. Ms. Kaufman asked if they would still need a two-thirds vote to adopt bylaws and Secretary Nelson responded that two-thirds was correct.

As to Article 10, as amended, Chair Lewis asked that all in favor say "aye." The Board voted in favor of Article 10, as amended.

**Proxy Voting:**

EAC Chair Hillman expressed her hope that the availability of a proxy vote would not encourage people not to attend in person. Of the 37 members of the board eight are not very responsive and EAC is doing their best to work on them, but that does mean that 29 members are active and EAC Chair Hillman hopes to see a majority at every meeting.

Mr. Dickson suggested that the bylaws committee should decide on whether or not to limit the number of proxies. Chair Lewis stated that the issue would be assigned to the bylaws committee for recommendations at the next meeting. Secretary Kiffmeyer suggested that the bylaws reconcile the timing for getting proposing bylaw changes and getting information out to members

so that the Chair has a reasonable ability to get proposals and pass them on without it having to happen on the same day. Chair Lewis stated that ordinarily the proxies would be submitted to a Proxy committee to verify them as legitimate, but he suggested doing a quick adoption. There were proxies from David Orr, Wendy Noren, James Elekes, Ernie Hawkins, Jim Carnes, and Secretary Kiffmeyer. Chair Lewis responded to a question by indicating that the proxy would vote for those not present.

Mr. Crangle asked how people could vote by proxy before the adoption of the bylaws and Chair Lewis responded that he told everyone in advance that there would be proxies assuming the adoption of the bylaws. The Board voted to accept the proxies as submitted for this meeting.

Chair Lewis stated that Mr. Harding, Ms. Purcell, Ms. Kaufman, Director Brunelli, and the Chair would vote for themselves and their proxies. Chair Lewis counted 19 present and 6 proxies, with one non-voting member present. He got agreement that a majority would be 13 and passed around the ballots.

**Election of Officers:** Chair Lewis asked for nominations for Chair. Secretary Vigil-Giron nominated Mr. Crangle. Ms. Purcell nominated Ms. Kaufman. Each candidate made brief presentations about their interests in serving as Chair of the EAC Board of Advisors.

Votes were cast, Chair Lewis counted the votes and found that Ms. Kaufman received a majority of the votes with 18. Mr. Crangle moved to have the vote cast unanimously, Mr. Hillman seconded the motion and the Board voted in favor of the motion. Mr. Lewis congratulated Ms. Kaufman, who immediately assumed responsibilities as chair of the Board.

Chair Kaufman recognized Mr. Sirvello, who nominated Mr. von Spakovsky for the position of Vice-Chair. Secretary Vigil-Giron nominated Mr. Thomas. Mr. Shortbull stated that he was uneasy about having a member from the Department of Justice as an officer of Board.

The votes were cast and the ballots were counted with Mr. Thomas winning a majority with 14 votes.

Chair Kaufman asked for nominations for the office of Secretary. Mr. Shortbull nominated Secretary Vigil-Giron, who declined because of her duties as NASS President, but nominated Mr. Sirvello. Former Chair Lewis moved for nominations to cease,

which Ms. Herrera seconded. The Board voted in favor of the motion. Thereafter, The Board voted in favor of Mr. Sirvello as Secretary.

**Items for Action:**

Chair Kaufman thanked Mr. Lewis for his invaluable services as the Board's first chair. She stated that she has some huge shoes to fill and is grateful for the opportunity.

Mr. Dickson moved to have the Advisory Board urge EAC to engage experts to help with ballot design. The motion was seconded.

Mr. Harding asked what Mr. Dickson's intent was in suggesting the motion. Mr. Dickson stated that he wanted to get at the hard science of ballot design. Secretary Nelson asked if it was appropriate to direct the Commission to work with a particular organization. Chair Kaufman suggested that Mr. Dickson change the wording of his motion to soften the directive. Mr. Dickson agreed to insert "such as" so that other groups could be considered.

Chair Kaufman restated the motion moved that the Board urge EAC to engage experts to help with guidance on ballot design. Specifically, she moved that they reach out to those in low literacy, such as Democracy Design and simplified language. The Board voted in favor of the motion.

Ms. Purcell requested that suggestions on the VVSG from the Board members be e-mailed to Ms. Purcell or Mr. Harding.

Mr. Shortbull moved that the Executive Director report to be moved to EAC, which was seconded by Mr. Harding. The Board voted in favor of the motion.

Mr. Thomas moved to adjourn. The motion was seconded by Secretary Vigil-Giron.

**Adjournment:**

The meeting was adjourned at 12:41 P.M.

## Eagleton/Mortiz Timeline

<b>Date</b>	<b>Description</b>
01/12/05	EAC staff draft proposes SOW for Provisional Voting
01/13/05	EAC staff presents draft proposed SOW for Provisional Voting to Commissioners
01/17/05	EAC staff drafts proposed SOW for Voter ID
01/18-02/14/05	EAC staff, in consultation with the Commissioners, draft proposed combined SOW for Provisional Voting and Voter ID
02/17/05	EAC staff meets with Commissioners and distributes SOW and outline of contracting process via email for Commissioner approval
03/02/05	EAC staff and Commissioners meet to discuss Provisional Voting and Voter ID Contract
03/23/05	EAC staff discuss Evaluation Criteria for the Provisional Voting and Voter ID RFP via email
03/30/05	EAC staff discuss Technical Evaluation Criteria for Provisional Voting and Voter ID Contract via email
05/24/05	EAC Commissioners Approve Contract Award to Eagleton
05/25/05	Eagleton notified of Contract Award
05/26/05	EAC Commissioner, EAC staff, and Eagleton meet at EAC office. Political balance of Peer Review Group amongst topics discussed. Commissioner DeGregorio subsequently suggests additional Peer Review Group participants
06/03/05	EAC staff notifies bidders via email that Eagleton has been awarded the Contract
06/06/05	Eagleton submits Revised Workplan extending deadlines to EAC staff via email
06/07-06/17/05	EAC staff and Eagleton conduct email discussion regarding Eagleton's plans to survey local election officials
06/09/05	EAC staff notifies Eagleton via email that 06/06 Workplan is not an acceptable deliverable
06/17/05	EAC staff receives Eagleton's revised workplan via email
06/20/05	EAC staff receives Eagleton's revised workplan via email
06/23-07/15/05	EAC staff and Eagleton discuss Peer Review Group via email
06/23/05	EAC staff emails Eagleton's proposed Peer Review Group to the Commissioners
06/27/05	EAC staff and Commissioners discuss the proposed Peer Review Group at briefing
07/06-07/07/05	Eagleton emails EAC staff information regarding Eagleton's local election official survey
07/08/05	Eagleton submits response to EAC staff's suggestion for additional Peer Review Group, including a list of proposed members
07/12/05	EAC Commissioners and staff hold teleconference with Eagleton

07/14/05	EAC staff and Eagleton discuss sample size and budget allocation for survey of local election officials via email
07/14/05	EAC staff receives Eagleton June 2005 Progress Report via email
07/15/05	EAC staff and Eagleton hold teleconference approving the composition of Eagleton's Peer Review Group
07/15/05	EAC staff emails Final Agenda for 07/28/05 hearing to Eagleton
07/15-07/26/05	EAC staff and Eagleton discuss details of 07/28 hearing via email
07/19-07/21/05	EAC staff and Eagleton hold email discussion regarding Eagleton's proposal for research regarding provisional ballot design. EAC staff declines Eagleton's proposal for adding ballot design to the project
07/19-08/08/05	Dates for meeting with EAC staff discussed with Eagleton via email
07/28/05	EAC Public hearing held at Cal/Tech in Pasadena. Eagleton briefs EAC Commissioners on progress of research
08/01/05	EAC staff and Eagleton discuss Peer Review Group via email
08/04/05	Vice-Chair DeGregorio provides EAC staff with a list of centrist/conservative groups via email in regards to Peer Review Group recruitment. EAC staff forwards list to Eagleton
08/08/05	Meeting with Eagleton on 09/06 at the EAC confirmed via email
08/09/05	Eagleton holds first teleconference with Peer Review Group regarding Provisional Voting Report
08/15/05	EAC staff receives July 2005 Progress Report from Eagleton via email
08/19-09/02/05	Commissioners, EAC staff, and Eagleton discuss potential members of Peer Review Group via email
09/01/05	Eagleton submits materials to EAC staff for 09/06 briefing via email
09/01-09/03/06	Eagleton emails answers to questions regarding the Provisional Voting Report analysis to EAC staff. Additional materials Fed Exed to EAC
09/05/05	EAC staff receives copy of Eagleton's PowerPoint presentation and alternatives document for 09/06 meeting via email
09/06/05	Commissioners and EAC staff hold briefing with Eagleton to review Provisional Voting Draft of Analysis and Alternatives Paper and discuss outline and direction of the Preliminary Guidance Document
09/14/05	Eagleton sends email to EAC staff requesting EAC Commissioner feedback on Alternative Next Steps
09/15/05	EAC staff receives Eagleton August 2005 Progress Report via email
09/21/06	Eagleton holds second teleconference with Peer Review Group
09/30/05	Teleconference with Eagleton, EAC staff, and Commissioner Martinez to discuss general direction and objective of research
09/30/05	EAC staff receives Provisional Voting Survey Report from Eagleton via email
10/17/05	EAC staff receives September 2005 Progress Report and Peer Review Group Summary Comments from Eagleton via email
11/14/05	EAC staff receives October 2005 Progress Report via email
11/14/05	EAC staff meets with Eagleton regarding execution of surveys
11/15-11/23/05	EAC staff and Eagleton discuss the status of the reports and the process for completion of reports via email

11/15/05	Eagleton requests No-Cost Extension and EAC staff initiates process via email
11/28/05	EAC staff receives Eagleton's Provisional Voting Report via email
11/29/05	EAC staff contacts Eagleton via email to request more detailed invoices for the new fiscal year
12/13/05	EAC staff receives Eagleton November 2005 Progress Report via email
01/17/06	EAC staff receives Eagleton December 2005 Progress Report via email
01/25/06	EAC staff approves Eagleton's no-cost extension request and notifies Eagleton via email
02/16/06	EAC staff receives Eagleton January 2006 Progress Report and inquires as to status of Voter ID Report via email
02/22/06	Eagleton holds teleconference with Peer Review Group regarding Voter ID Report
02/23/06	EAC staff discusses comments/edits to Eagleton via email
03/15/06	EAC staff inquires into ETA for Eagleton's Voter ID Report via email
03/15/06	EAC staff receives Eagleton Draft Voter ID Report via email
03/16/06	Eagleton Draft Voter ID Report distributed via email to Commissioners for comment
03/16/06	Eagleton emails Voter ID Report Appendix to EAC staff
03/16/06	EAC staff receives Eagleton February 2006 Progress Report via email
03/17/06	EAC staff emails Eagleton requesting explanation for using CPS rather than Election Day Survey data
03/21/06	Eagleton responds via email to EAC staff's inquiry into reasoning for use of CPS data rather than Election Day Survey
03/24/06	EAC staff informs Eagleton via email that it has requested Commissioner feedback regarding the Draft Voter ID Report by COB
03/28/06	EAC staff poses a number of questions via email regarding Eagleton's statistical manipulations, use of Census data, and statements made in Voter ID Report
03/28/06	EAC staff sends email request to Eagleton for confirmation that final payment invoice information is forthcoming
03/28/06	EAC staff participates in teleconference with Eagleton project staff, sharing general thoughts and posing questions about data and statements in Voter ID Report
03/31/06	EAC staff receives Eagleton's Draft Voter ID Report for 04/03 meeting via email
04/03/06	Commissioners Hillman and Davidson, EAC staff, and Eagleton meet in the morning to discuss Voter ID Report. Commissioners DeGregorio and Martinez, EAC staff, and Eagleton meet in the afternoon to discuss Voter ID Report
04/06/06	EAC staff sends email to Eagleton inquiring into next steps for the final Provisional Ballot and Voter ID Reports
04/13/06	EAC staff has teleconference with Eagleton regarding next steps for the final Provisional Ballot and Voter ID Reports. EAC staff requests that Eagleton convene a teleconference with Peer Review Group and EAC staff and/or Commissioners to discuss statistical analysis and Voter ID

	Report. EAC also reports that it will convene second Peer Review Group to seek further feedback. Eagleton also provides EAC staff with an extension timeline via email
04/14/06	EAC staff receives Eagleton's March 2006 Progress Report via email
04/19/06	EAC staff begins to process Eagleton's No-cost Extension request
04/21/06	Eagleton formally requests No-Cost Extension via email
04/25-04/27/06	EAC staff has email discussion with Eagleton regarding project timeline over next several weeks, including peer review, teleconference, and presentations at board meetings and public hearing
04/26/06	EAC staff approves Eagleton's No-Cost Extension Request and notifies Eagleton via email
04/27/06	EAC staff requests final draft of Provisional Ballot Report from Eagleton via email
04/28/06	EAC staff notifies Eagleton via email of Peer Review Group that the EAC has selected for Voter ID Report and sets 05/11 deadline for review and teleconference
05/01/06	EAC staff contacts Voter ID Peer Review Group via email regarding review and 05/11 teleconference
05/04/06	Eagleton distributes Revised Voter ID Analysis to EAC staff via email
05/05/06	EAC staff distributes Revised Voter ID Analysis to 2 <sup>nd</sup> Peer Review Group via email
05/08/06	EAC staff inquires via email as to the status of the final report on Provisional Voting from Eagleton
05/08/06	EAC staff receives Eagleton's Draft Voter ID Report via email
05/09/06	EAC staff receives Eagleton Draft Voter ID Report and Appendices and Distributes to Peer Review Group via email
05/09/06	EAC staff informs Eagleton via email that the Commissioners will review the final Provisional Voting and Voter ID Reports at their 05/16 and 05/18 meeting and that materials for distribution to the Board of Advisors and Standards Board must be ready by 05/18
05/09-05/17/06	EAC staff and Eagleton discuss details regarding presentations to the 05/23 and 05/24 Standards Board and Board of Advisors Meetings via email
05/11/06	Teleconference between EAC staff, Eagleton, members of the original Peer Review Group, and additional Peer Review Group members selected by the EAC regarding Voter ID Draft Report
05/12/06	EAC staff receives Eagleton's Draft of Provisional Voting Report for Review by the Standards Board and Board of Advisors via email
05/16/06	Commissioners and EAC staff hold briefing to discuss the presentation of Eagleton's Draft of Provisional Voting Report to the Standards Board and Board of Advisors. EAC staff emails feedback to Eagleton
05/17/06	EAC staff receives Eagleton's Draft of Voter ID Report and Appendices for Review by the Standards Board and Board of Advisors via email. EAC staff emails the information to the Commissioners
05/18/06	Commissioners and EAC staff hold briefing to discuss the presentation of Eagleton's Draft of Voter ID Report to the Standards Board and

	Board of Advisors. Commissioners elect to delay Eagleton's presentation of the Voter ID Report
05/18-22/06	EAC discusses details of Provisional Voting presentation with Eagleton via email
05/23/06	Eagleton presents Provisional Voting Report to EAC Standards Board
05/24/06	Eagleton presents Provisional Voting Report to EAC Board of Advisors
06/06/06	Eagleton sends letter to Commissioner DeGregorio regarding Provisional Voting and Voter ID Reports
06/08-06/26/06	EAC staff and Eagleton discuss conclusion of the Contract via email
06/05/06	EAC Executive Director sends letter to Eagleton regarding lack of clarity and ETA for final results of Voter ID study
06/29/06	Final Provisional Voting and Voter ID Draft Reports received by EAC staff from Eagleton via email. Attachments sent Fed Ex
06/30/06	EAC staff sends letter to Eagleton regarding remaining tasks to close out Contract
07/05/06	Telephone conversation between Eagleton and EAC staff regarding EAC's 06/30/06 letter regarding remaining tasks to close out Contract
07/06/06	Eagleton emails written summary of remaining tasks to close out Contract to EAC staff
07/19/06	Eagleton submits June 2006 Progress Report via email
07/20/06	Eagleton submits April 2006 and May 2006 Progress Reports via email
08/16/06	Eagleton submits final letter regarding Study Release to EAC staff via email and requests release of both Reports
08/24/06	Commissioners and EAC staff hold briefing regarding Eagleton Provisional Voting Draft Report and EAC Statement
08/24-09/06/06	EAC Commissioners and staff discuss Eagleton Provisional Voting Draft Report and EAC Statement to be released
08/28/06	EAC staff notified via email by Michael McDonald that Eagleton has released data from Provisional Voting and Voter ID Reports
08/31/06	EAC Executive Director notifies Eagleton that it is not authorized to release the Voter ID Draft Report as the Report has not been finalized and has not been officially released by the EAC.
09/15/06	EAC Commissioners and staff discuss release of information from the Voter ID Report to Hill staffers
09/28-09/29/06	After meeting with EAC staff, HR Communications edits Eagleton Provisional Voting Report for clarity and tone. HR Communications emails edits to EAC staff
10/02/06	EAC staff emails the professionally edited draft of Provisional Voting Report to Commissioners
10/03/06	EAC Commissioners and staff discuss the Provisional Voting Report at briefing
10/03/06	Eagleton contract closed and \$2,910.77 balance remaining deobligated
10/04/06	EAC staff and Eagleton review via email what information has been released regarding the Eagleton Reports
10/27/06	Eagleton writes to EAC Executive Director requesting an approximate

	date of release for the Voter ID Report
01/23/07	Federal Reporter Notice published regarding 02/28/07 Public Hearing
01/30-02/06/07	EAC staff discusses Eagleton Voter ID Draft Report and potential talking points for Voter ID segment of Public Hearing
02/06/07	Eagleton submits draft text of Presentation for 02/08 EAC Public Hearing to EAC staff via email
02/08/07	EAC holds Public Hearing where Eagleton provides Testimony and submits Voter ID Draft Report
03/06/07	Commissioners and EAC staff hold briefing regarding Eagleton Draft Voter ID Report and EAC Draft Statement
03/07/07	Commissioner Davidson appears before House Appropriations Subcommittee on Financial Services
03/06-03/20/07	EAC staff and Eagleton discuss edits to Voter ID Draft Report via email
03/21-03/29/07	EAC staff, and Eagleton discuss edits to Press Statement accompanying release of Eagleton Voter ID Draft Report
03/30/07	EAC releases Eagleton Voter ID Draft Report and Statement, Commissioner Rodriguez and Eagleton interviewed by NPR

COMMENTS*

**EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY**

**INTRODUCTION**

*Confidential*  
Voting fraud and intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the correct application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted ~~some~~ research methodology on how to assess the existence and enforcement of election crimes in this country. *walking*

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC, as well as its advisory boards, felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding *12* was reached, a definition <sup>was</sup> had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area. *along side*

To accomplish these tasks, EAC employed two consultants, ~~Job Serebrov and Tova Wang~~,<sup>1</sup> who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and to assure a bipartisan representation in this study. The consultants and EAC staff were charged to (1) research the current state of information on the topic of voting

*under the supervision of*  
<sup>1</sup> Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

030623

fraud and voter intimidation; (2) develop a uniform definition of voting fraud and voter intimidation; and (3) propose recommended strategies for researching this subject.

EAC ~~consultants~~ reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to national Republican campaign committees and Republican candidates

**Robert Bauer**  
Chair of the Political Law Practice at the law firm of Perkins Coie, District of Columbia  
National Counsel for Voter Protection, Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St Louis, Missouri  
National Counsel to the American Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief, Voting Section, Civil Rights Division, U.S. Department of Justice

*Technical Advisor:*  
**Craig Donsanto**  
Director, Election Crimes Branch, U.S. Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

at what point do we stop harp on who... i.e. lots more to stop books + then speak of "EAC actions" ?

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

### **Reports and Studies of Voting fraud and Intimidation**

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.

- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

030632

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, even legal practices, that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### **Interviews with Experts**

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Lori Minnite**  
Barnard College, Columbia University

**Neil Bradley**  
ACLU Voting Rights Project

**Pat Rogers**  
Attorney, New Mexico

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Chandler Davidson**  
Rice University

**Tracey Campbell**

Author, *Deliver the Vote*

**Douglas Webber**

Assistant Attorney General, Indiana

**Heather Dawn Thompson**

Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**

Assistant General Counsel,  
American Center for Voting Rights

**Robin DeJarnette**

Executive Director,  
American Center for Voting Rights

**Harry Van Sickle**

Commissioner of Elections,  
Pennsylvania

**Tony Sirvello**

Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Sandler**

Counsel  
Democratic National Committee

**John Ravitz**

Executive Director  
New York City Board of Elections

**Sharon Priest**

Former Secretary of State, Arkansas

**Kevin Kennedy**

Executive Director  
State Board of Elections, Wisconsin

**Evelyn Stratton**

Justice  
Supreme Court of Ohio

**Joseph Rich**

Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Craig Donsanto**

Director, Public Integrity Section  
U.S. Department of Justice

**John Tanner**

Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it was the most likely type of fraud to be discovered, the stiff penalties associated with this type of fraud, and that it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state’s attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “3”.

**Case Law and Statutes**

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. <sup>Very few cases that are decided at the district court level are reported for public review.</sup> *decisions*

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “4”.

**Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters, *on the news? herolds?*
- multiple voting,
- felons voting.

*Ask Job?  
What is  
"Stealy  
lots?"*

*more detail*

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

### DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. ~~Upon further inspection, however,~~ It is apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and ~~appropriate~~ activities. To arrive at a common definition and list of activities that can be studied, EAC <sup>with AS&S</sup> assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC ~~in the future~~.

*Avoid word fraud?*

#### New Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud**, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime. *usu.*

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voting fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter

~~is fraud~~  
~~letter~~

registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing "voting fraud." Similarly, a person who knowingly provides false information to a voter about the location of the voter's polling place commits fraud on the voter.

*planning*  
*if given + plan wrong,*

The phrase "voting fraud" does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, "voting fraud" does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases "voting fraud" and "voter intimidation" are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as "voting fraud" and "voter intimidation" that would serve as the basis for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined "election crimes," a phrase that captures all crimes related to the voter registration and voting processes.

*decided to use the term*

*to use the term*

*purpose of this study*

### The Definition of an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

*Need transition to the crimes and determine*  
*use explained of why civil is being*  
*030537*  
*Need some*

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting (either early, absentee, or election day); vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

### ***Acts of Deception***

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

### ***Acts of Coercion***

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

***Acts of Damage or Destruction***

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;

- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

### What is not an Election Crime for Purposes of this Study

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes,” and actions that do not rise to the level of criminal activity, such as a misdemeanor, relative felony or felony, are not “election crimes.”

I found this was about gov.

### RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

#### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

#### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such

activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

### **Accepted Recommendations**

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

#### ***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition

what about  
statstat  
revenue

of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

***Analyze Survey Data in Light of State Laws and Procedures***

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from

areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

## CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

**EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY**

**INTRODUCTION**

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and at times even the correct application of state or federal laws to the voting process. Past study of this topic has been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, EAC has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the true existence and enforcement of election crimes in this country.

*Is it a  
phrase  
OR  
a separate  
concept?*

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the U.S. Election Assistance Commission (EAC) to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation was a topic that EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

*also discuss*

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. That type of research is well beyond the basic understanding that had to be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

*Good!  
Clear  
statements*

To accomplish these tasks, EAC employed two consultants, who along with EAC staff and interns conducted the research that forms the basis of this report. Consultants were chosen based upon their experience with the topic. In addition, consultants were chosen to assure a bipartisan representation in this study. The consultants and EAC staff were charged (1) to research the current state of information on the topics of voter fraud and voter intimidation, (2) to develop a uniform definition of voter fraud and voter intimidation, and (3) to propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voter fraud and intimidation. In addition, EAC consultants conducted interviews with selected

030647

experts in the field. Last, EAC consultants and staff presented their study to a working group that provided feed back. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to national Republican  
campaign committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited to produce this final report.

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. What the world knows about these issues comes largely from a very limited body of reports, articles and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation.

Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

### **Reports and Studies of Voter Fraud and Intimidation**

Over the years, there have been a number of studies conducted about the concepts of voter fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “ \_\_\_ ”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.

- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.

- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

**Books**

- John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

WJ  
GOWAN  
5/21/04

Voter intimidation is also a topic of some debate. Generally speaking there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation even legal practices that they allege suppress the vote.

One point of agreement is that absentee voting and voter registration by third-party groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of voters of a certain party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### **Interviews with Experts**

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Lori Minnite**  
Barnard College, Columbia University

**Neil Bradley**  
ACLU Voting Rights Project

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Pat Rogers**  
Attorney, New Mexico

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Chandler Davidson**  
Rice University

**Tracey Campbell**  
Author, *Deliver the Vote*

**Douglas Webber**  
Assistant Attorney General, Indiana

**Heather Dawn Thompson**  
Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**  
Assistant General Counsel,  
American Center for Voting Rights

030652

**Robin DeJarnette**  
Executive Director,  
American Center for Voting Rights

**Evelyn Stratton**  
Justice  
Supreme Court of Ohio

**Harry Van Sickle**  
Commissioner of Elections,  
Pennsylvania

**Tony Sirvello**  
Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Sandler**  
Counsel  
Democratic National Committee

**Joseph Rich**  
Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**John Ravitz**  
Executive Director  
New York City Board of Elections

**Craig Donsanto**  
Director, Public Integrity Section  
U.S. Department of Justice

**Sharon Priest**  
Former Secretary of State, Arkansas

**Kevin Kennedy**  
Executive Director  
State Board of Elections, Wisconsin

**John Tanner**  
Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud, citing as reasons that it was the most likely type of fraud to be discovered and that there are stiff penalties associated with this type of fraud.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, the location of polling places, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies

030653

have more time and resources but have limited jurisdiction. They can only prosecute crimes related to elections involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement, including those that allege that prosecutions are not sufficiently aggressive and those that feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “\_\_\_”.

### **Case Law and Statutes**

Consultants reviewed over 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from ~~appeal courts~~ <sup>COURTS OF APPEAL</sup>. This is not a surprising situation, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “\_\_\_”.

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation

throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charge and prosecutions of voter fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding of what is and what is not “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. In order to come up with a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

### New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud, n. 1.** A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voter fraud” does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, “voter fraud” does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly

030655

refuses to register to vote an otherwise legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

DOESN'T IT INVOLVE A VOTER?

To further complicate matters, the phrases “voter fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the civil division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voter fraud” and “voter intimidation” that would serve as the basis of a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

### **What is an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process, eligible persons to be excluded from the election process, ineligible votes to be cast in an election, eligible votes not to be cast or counted, or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Generally speaking, election crimes can be committed by voters, candidates, election officials, or any other members of the public that desire to criminally impact the result of an election. However, crimes that are based upon knowing or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

030656

*Acts of Deception*

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, regarding the date and time of the election or regarding a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate at one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once at the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

*Acts of Coercion*

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other valuable thing to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his vote in any election, or who requires or demands an examination or inspection by himself or another of an employee's ballot;

030657

DRAFT – DO NOT DISTRIBUTE

- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for registering to vote.

***Acts of Damage or Destruction***

- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments for the purpose of enabling the voter to vote his or her ballot;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as he intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

030658

### **What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All crimes or civil violations related to campaign finance reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes.” Last, actions that do not rise to the level of criminal activity, that is a misdemeanor, relative felony or felony, are not “election crimes.”

## **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can study the existence of election crimes. EAC consultants ~~developed recommendations~~. In addition, the working group, and some of the persons interviewed as a part of this study provided recommendations.

### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and parties should be interviewed. It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

### ***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a 1-800 voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints may provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety in ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and monitor field reports from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys’ Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys’ Offices. By attending the symposium researchers could learn more about the following how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the

030560

National Voter Registration Act, and the Help America Vote Act are described and explained to participants

***Recommendation 8: Conduct Statistical Research***

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have historically been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets. The sample must include a random set of counties where there have and have not been a large number of allegations

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls in on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation.

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers can use that risk analysis to rank the types of fraud based on the ease of commission and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether deceased voters or felons actually voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

**Accepted Recommendations**

There has never been a comprehensive study that gathered data regarding all claims, charges and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine what volume and type of election crimes are being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning voting crimes are the administrative complaint processes that states were required to establish as a part of complying with HAVA. Those complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints under those procedures with the state's chief election official and those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses can be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. This data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

030663

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

#### *Analyze Survey Data in Light of State Laws and Procedures*

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

### **CONCLUSION**

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and political pundits. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC through its clearinghouse role will collect and analyze data on election crimes throughout the country. <sup>This</sup> These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention and prosecution of election crimes.

comment*

**EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY**

**INTRODUCTION**

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and at times even the correct application of state or federal laws to the voting process. Past study of this topic <sup>have</sup> ~~has~~ been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, EAC has begun this phase one of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the true existence and enforcement of election crimes in this country.

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the U.S. Election Assistance Commission (EAC) to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation was a topic that EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. That type of research is well beyond the basic understanding that had to be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine, and in some cases limit, the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, who along with EAC staff and interns conducted the research that forms the basis of this report. Consultants were chosen based upon their experience with the topic. In addition, consultants were chosen to assure a bipartisan representation in this study. The consultants and EAC staff were charged (1) to research the current state of information on the topics of voter fraud and voter intimidation, (2) to develop a uniform definition of voter fraud and voter intimidation, and (3) to propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voter fraud and intimidation. In addition, EAC consultants conducted interviews with selected

030665

# DRAFT

experts in the field. Last, EAC consultants and staff presented their study to a working group that provided feed back. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to national Republican  
campaign committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*  
**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope, and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was ~~vetted and~~ edited to produce this final report.

## EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. What the world knows about these issues comes largely from a very limited body of reports, articles and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation.

FILE COPY

FILE COPY

FILE COPY

Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

### **Reports and Studies of Voter Fraud and Intimidation**

Over the years, there have been a number of studies conducted about the concepts of voter fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “\_\_”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.
- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.
- Alec Ewald, “A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law,” The Sentencing Project, November 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate. Generally speaking, there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, <sup>and</sup> even legal practices that they allege suppress the vote.

One point of agreement is that absentee voting and voter registration by third-party groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of voters of a certain party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

Is there anything we can say about absentee fraud? details focus only on VR and give no detail on absentee

### Interviews with Experts

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Stephen Ansolobehere**  
Massachusetts Institute of Technology

**Lori Minnite**  
Barnard College, Columbia University

**Chandler Davidson**  
Rice University

**Neil Bradley**  
ACLU Voting Rights Project

**Tracey Campbell**  
Author, *Deliver the Vote*

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Douglas Webber**  
Assistant Attorney General, Indiana

**Pat Rogers**  
Attorney, New Mexico

**Heather Dawn Thompson**  
Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**  
Assistant General Counsel,  
American Center for Voting Rights

**Robin DeJarnette**  
Executive Director,  
American Center for Voting Rights

**Harry Van Sickle**  
Commissioner of Elections,  
Pennsylvania

**Joseph Sandler**  
Counsel  
Democratic National Committee

**John Ravitz**  
Executive Director  
New York City Board of Elections

**Sharon Priest**  
Former Secretary of State, Arkansas

**Kevin Kennedy**  
Executive Director  
State Board of Elections, Wisconsin

**Evelyn Stratton**  
Justice  
Supreme Court of Ohio

**Tony Sirvello**  
Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Rich**  
Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Craig Donsanto**  
Director, Public Integrity Section  
U.S. Department of Justice

**John Tanner**  
Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud, citing as reasons that it was the most likely type of fraud to be discovered and that there are stiff penalties associated with this type of fraud.

*> awkward sentence*

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, the location of polling places, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies

have more time and resources but have limited jurisdiction. They can only prosecute crimes related to elections involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement, including those that allege that prosecutions are not sufficiently aggressive and those that feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “ \_\_\_ ”.

### **Case Law and Statutes**

Consultants reviewed over 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from appeal courts. This is not a surprising situation, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “ \_\_\_ ”.

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation

throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges, and prosecutions of voter fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding of what is and what is not “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. In order to come up with a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

### New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud**, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

~~indent~~ → Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voter fraud” does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, “voter fraud” does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly

refuses to register to vote an otherwise legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases “voter fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the **Civil Rights** Division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voter fraud” and “voter intimidation” that would serve as the basis of a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the ~~voter registration and voting processes~~.

### **What is an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception; acts of coercion; acts of damage or destruction; and failures or refusals to act.

~~Generally speaking,~~ Election crimes can be committed by voters, candidates, election officials, or any other members of the public that desire to criminally impact the result of an election. However, crimes that are based upon knowing or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

*Acts of Deception*

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, regarding the date and time of the election or regarding a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance<sup>to</sup> possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate <sup>in</sup> at one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter<sup>;</sup>;
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once at the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

~~Acts of Deception~~  
*Acts of Coercion*

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other valuable thing to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or ~~to~~ delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his vote in any election, or who requires or demands an examination or inspection by himself or another of an employee's ballot;

- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for registering to vote.

***Acts of Damage or Destruction***

- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments for the purpose of enabling the voter to vote his or her ballot;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as he intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

### **What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All crimes or civil violations related to campaign finance reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes.” Last, actions that do not rise to the level of criminal activity, that is a misdemeanor, relative felony or felony, are not “election crimes.”

### **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can study the existence of election crimes. EAC consultants developed recommendations. In addition, the working group and some of the persons interviewed as a part of this study provided recommendations.

#### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and parties should be interviewed. It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

#### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

#### ***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

**Recommendation 4: Review Complaints Filed With “ MyVote1” Voter Hotline**

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a ~~1-800~~<sup>1-800 free</sup> voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints may provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

} not scientific at all!  
definite bias

**Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice**

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation, attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and monitor field reports from Election Day.

**Recommendation 6: Review Reports Filed By District Election Officers**

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

→ election crimes?

**Recommendation 7: Attend Ballot Access and Voting Integrity Symposium**

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys’ Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys’ Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues <sup>are</sup> presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the

030677

National Voter Registration Act, and the Help America Vote Act are described and explained to participants,

***Recommendation 8: Conduct Statistical Research***

not statistical research  
^

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have historically been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets. The sample must include a random set of counties where there have and have not been a large number of allegations

what data would be collected?

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls ~~in~~ on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation.

Fed Gov already has observers

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers can use that risk analysis to rank the types of fraud based on the ease of commission and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

030678

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether deceased voters or felons actually voted.

MVRA  
ISSUES

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedures as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

**Accepted Recommendations**

There has never been a comprehensive study that gathered data regarding all claims, charges and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine what volume and type of election crimes are being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning <sup>election</sup> ~~voting~~ crimes are the administrative complaint ~~processes~~ <sup>procedures</sup> that states were required to establish as a part of complying with HAVA. Those complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints under those procedures with the state's chief election official and those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses can be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. This data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

### *Analyze Survey Data in Light of State Laws and Procedures*

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

## CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and political pundits. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. <sup>This</sup> ~~These~~ data not only will tell us what types of election crimes are committed ~~and where fraud exists~~, but also inform us of what factors impact the existence, prevention and prosecution of election crimes.

### EXECUTIVE SUMMARY

The Help America Vote Act of 2002 (HAVA) requires the U.S. Election Assistance Commission (EAC) to study a host of topics, including "voting fraud" and "voter intimidation." In 2005, EAC embarked on an initial review of the existing knowledge of voting fraud and voter intimidation. The goal of that study was to develop a working definition of "voting fraud" and "voter intimidation" and to identify research methodology to conduct a comprehensive, nationwide study of these topics.

EAC staff along with two, bipartisan consultants reviewed the existing information available about voting fraud and voter intimidation, including reading articles, books and reports; interviewing subject matter experts; reviewing media reports of fraud and intimidation; and studying reported cases of prosecutions of these types of crimes. It is clear from this review that there is a great deal of debate on the pervasiveness of fraud in elections as well as what constitute the most common acts of fraud or intimidation. There is also no apparent consensus on the meaning of the phrases "voting fraud" and "voter intimidation." Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal activities.

In order to facilitate future study of these topics, EAC developed a working definition of "election crimes." "Election crimes" are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

From EAC's review of existing information on the issue, it was apparent that there have been a number of studies that touched on various topics and regions of the country concerning voting fraud and intimidation, but that there had never been a comprehensive, nationwide study of these topics. EAC will conduct further research to provide a comprehensive, nationwide look at "election crimes." Future EAC study of this topic will focus on election-related, criminal activity and will not include acts that are exclusively civil wrongs, campaign finance violations, and violations of ethical provisions. EAC will study these concepts by surveying the states' chief election officials about complaints they received through their administrative complaint processes, election crime investigation units regarding complaints received and those referred to law enforcement, and law enforcement and prosecutorial agencies regarding complaints received and charges filed.

Privilege

## **INTRODUCTION**

Voting fraud and voter intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and voter intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the lawful application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a working definition of election crimes and adopted research methodology on how to assess the existence and enforcement of election crimes in the United States.

### **PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

*italics*  
EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. The initial study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,<sup>1</sup> who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and the need to assure a bipartisan representation in this study. The consultants and EAC staff were charged with (1) researching the current state of information on the topic

---

<sup>1</sup> Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

**December 2006**

---

of voting fraud and voter intimidation; (2) developing a uniform definition of voting fraud and voter intimidation; and (3) proposing recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

**The Honorable Todd Rokita**

Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**

Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**

Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**

Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**

Partner, Patton Boggs LLP  
Counsel to National Republican  
Campaign Committees and Republican  
candidates

**Robert Bauer**

Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**

Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**

Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**

Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants

or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

## EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and voter intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

### Reports and Studies of Voting fraud and Intimidation

Over the years, there <sup>hes?</sup> have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix "2":

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or voter intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 Presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

Office?

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary Findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

that is, voters who are...

Voter intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation! Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, including legal practices that allegedly cause vote suppression.

Can?

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. For example, a number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

**Interviews with Experts**

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

**U.S. Election Assistance Commission**  
**Election Crimes: An Initial Review and Recommendations for Future Study**

**December 2006**

Voting Section, Civil Rights Division  
U.S. Department of Justice

**John Tanner**  
Chief  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it is the most likely type of fraud to be discovered, there are stiff penalties associated with this type of fraud, and it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix "3".

## Case Law and Statutes

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix "4".

## Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters on voter registration list and/or voting,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information <sup>as to</sup> whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening <sup>as to</sup> the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a "battleground" or "swing" state, and the fact that there were reports of almost all types of voting fraud <sup>regarding</sup> and voter intimidation. However, these reports do not

December 2006

provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes "voting fraud" and "voter intimidation." Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future. As a result, EAC has adopted the use of the term "election crimes" for its future study.

### Current Terminology

The phrase "voting fraud" is really a misnomer for a concept that is much broader. "Fraud" is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud**, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu[ally] a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black's Law Dictionary, Eighth Edition, p. 685.

"Voting" is the act of casting votes to decide an issue or contest. Black's Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of "voting fraud," it means fraudulent or deceptive acts committed to influence the act of voting. Thus, a voter who intentionally impersonates another registered voter and attempts to vote for that person would be committing "voting fraud." Similarly, a person who knowingly provides false information to a voter about the location of the voter's polling place commits fraud on the voter. <sup>By?</sup> <sup>that</sup>

The phrase "voting fraud" does not capture a myriad of other criminal acts that are related to elections which are not related to the act of voting and/or do not involve an act of deception. For example, "voting fraud" does not capture actions or willful inaction in the voter registration process. When an election official willfully and knowingly refuses <sup>end?</sup>

to register to vote a legally eligible person it is a crime. This is a crime that involves neither the act of voting nor an act of deception.

To further complicate matters, the phrases "voting fraud" and "voter intimidation" are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

### New Terminology

The goal of this study was to develop a common definition of what is generically referred to as "voting fraud" and "voter intimidation" that would serve as the basis for a future, comprehensive study of the existence of these problems. Because the current terminology has such a variety of applications and meanings, "voting fraud" and "voter intimidation" can be read to encompass almost any bad act associated with an election. Such broad terminology is not useful in setting the boundaries of a future study. A definition must set parameters for future study by applying limitations on what is included in the concepts to be studied. The current terminology applies no such limitations.

*another word?*

Thus, EAC has adopted the use of the phrase "election crimes" to limit the scope of its future study. This term captures all crimes related to the voter registration and voting processes and excludes civil wrongs and non-election related crimes. EAC adopted this definition because it better represents the spectrum of activities that we are able to and desire to study. In addition, we recognize that the resources, both financial and human capital, needed to study all "voting fraud" and "voter intimidation," including criminal acts, civil actions, as well as allegations of voter suppression through the use of legal election processes are well beyond the resources available to EAC. Finally, by limiting this definition to criminal acts, EAC can focus its study on a set of more readily measurable data. Criminal behavior is readily defined through state and federal statutes and is prosecuted by government agencies. This is not the case with civil matters. Civil actions can be prosecuted by individuals and/or government entities. Furthermore, what constitutes civil action is far less defined, subject to change, and can vary from case to case. A more complete discussion of the concept of "election crimes" follows along with a list of excluded actions.

*activities that EAC does not define as . . . .*

## The Definition of an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or on election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

### *Acts of Deception*

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making or knowingly possessing a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;

December 2006

- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a materially false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

### Acts of Coercion

- Using, threatening to use, or causing [to be used] <sup>the use of?</sup> force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage, harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other things of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting; <sup>the</sup>
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable things in exchange for signing or refraining from signing a petition proposing an initiative; <sup>5</sup>
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other things of value in exchange for registering to vote. <sup>5</sup>

December 2006

### *Acts of Damage or Destruction*

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

### *Failure or Refusal to Act*

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

### **What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of "election crimes." All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not "election crimes" for purposes of this study and any future

study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Last, violations of ethical provisions and the Hatch Act are not “election crimes.” Similarly, civil or other wrongs that do not rise to the level of criminal activity (i.e., a misdemeanor, relative felony or felony) are not “election crimes.”

## RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

### *Recommendation 1: Conduct More Interviews*

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

### *Recommendation 2: Follow Up on Media Research*

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

### *Recommendation 3: Follow Up on Allegations Found in Literature Review*

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were ~~certainly~~ limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations ~~discovered~~ in the literature review.

identified

December 2006

**Recommendation 4: Review Complaints Filed With "MyVote1" Voter Hotline**

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

**Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice**

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and "monitor field reports" from Election Day.

**Recommendation 6: Review Reports Filed By District Election Officers**

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

**Recommendation 7: Attend Ballot Access and Voting Integrity Symposium**

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public

December 2006

Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- o Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- o Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future research ~~should~~ should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

***Recommendation 11: Study Absentee Ballot Fraud***

~~Because~~ <sup>Therefore,</sup> absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide

December 2006

recommendations on more effective measures for preventing fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, ~~the~~ EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

*the*  
***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, ~~the~~ EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

*be*  
Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

December 2006

## Accepted Recommendations

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

### *Survey Chief Election Officers Regarding Administrative Complaints*

The Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

December 2006

### *Analyze Survey Data in Light of State Laws and Procedures*

Once a reliable <sup>2w</sup> data set concerning the existence and enforcement of election crimes is assembled, a ~~real~~ analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available ~~to the~~ effort.

### CONCLUSION <sup>for the</sup>

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

Interview with Craig Donsanto, Director, Elections Crimes Branch, Public Integrity Section, U.S. Department of Justice  
January 13, 2006

FRAUD &  
INTIMIDATION  
REPORT  
FILE

The Department of Justice's (DOJ) Election Crimes Branch is responsible for supervising federal criminal investigations and prosecutions of election crimes.

Questions

*How are Prosecution Decisions Made?*

Craig Donsanto must approve all investigations that go beyond a preliminary stage, all charges, search warrant applications and subpoenas and all prosecutions. The decision to investigate is very sensitive because of the public officials involved. If a charge seems political, Donsanto will reject it. Donsanto gives possible theories for investigation. Donsanto and Noel Hillman will decide whether to farm out the case to an Assistant U.S. Attorney (AUSA). Donsanto uses a concept called predication. In-other-words, there must be enough evidence to suggest a crime has been committed. The method of evaluation of this evidence depends on the type of evidence and its source. There are two types of evidence---factual (antisocial behavior) and legal (antisocial behavior leading to statutory violations). Whether an indictment will be brought depends on the likelihood of success before a jury. Much depends on the type of evidence and the source. Donsanto said he "knows it when he sees it." Donsanto will only indict if he is confident of a conviction assuming the worst case scenario - a jury trial.

A person under investigation will first receive a target letter. Often, a defendant who gets a target letter will ask for a departmental hearing. The defendant's case will be heard by Donsanto and Hillman. On occasion, the assistant attorney general will review the case. ~~The department grants such hearings easily because such defendants are likely to provide information about others involved.~~

leave in?

The Civil Rights Division, Voting Rights Section makes its own decisions on prosecution. The head of that division is John Tanner. There is a lot of cooperation between the Voting Section and the Election Crimes Branch.

*Does the Decision to Prosecute Incorporate Particular Political Considerations within a State Such as a One Party System or a System in which the Party in Power Controls the Means of Prosecution and Suppresses Opposition Complaints?*

Yes. Before, the department would leave it to the states. Now, if there is racial animus involved in the case, there is political bias involved, or the prosecutor is not impartial, the department will take it over.

*Does it Matter if the Complaint Comes from a Member of a Racial Minority?*

030705

**Deliberative Process  
Privilege**

No. But if the question involves racial animus, that has also always been an aggravating factor, making it more likely the Department will take it over

*What Kinds of Complaints Would Routinely Override Principles of Federalism?*

Federalism is no longer big issue. DOJ is permitted to prosecute whenever there is a candidate for federal office on the ballot.

*Are There Too Few Prosecutions?*

DOJ can't prosecute everything.

*What Should Be Done to Improve the System?*

The problem is asserting federal jurisdiction in non-federal elections. It is preferable for the federal government to pursue these cases for the following reasons: federal districts draw from a bigger and more diverse jury pool; the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected; DOJ has more resources – local prosecutors need to focus on personal and property crimes---fraud cases are too big and too complex for them; DOJ can use the grand jury process as a discovery technique and to test the strength of the case.

In *U.S. v. McNally*, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to "fix" *McNally*, did not include voter fraud.

As a result, the department needs a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce. The department has drafted such legislation, which was introduced but not passed in the early 1990s. A federal law is needed that permits prosecution in any election where any federal instrumentality is used.

*Other Information*

The Department has held four symposia for District Election Officers (DEOs) and FBI agents since the initiation of the Ballot Access and Voting Integrity Initiative. In 2003, civil rights leaders were invited to make speeches, but were not permitted to take part in the rest of the symposium. All other symposia have been closed to the public. ~~(Peg will be sending us the complete training materials used at those sessions. These are confidential and are the subject of FOIA litigation).~~

There are two types of attorneys in the division: prosecutors, who take on cases when the jurisdiction of the section requires it; the US Attorney has recused him or herself; or when the US Attorney is unable to handle the case (most frequent reason) and braintrust attorneys who analyze the facts, formulate theories, and draft legal documents.

030706

Cases:

Formatted: Underline

Donsanto provided us with three case lists: Open cases (still being investigated) as of January 13, 2006 – confidential; election fraud prosecutions and convictions as a result of the Ballot Access and Voting Integrity Initiative October 2002-January 13, 2006; and cases closed for lack of evidence as of January 13, 2006.

~~If we want more documents related to any case, we must get those documents from the states. The department will not release them to us.~~

Do they care about this?

Although the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate complaints of fraud, *the number of cases that the department is investigating and the number of indictments the department is pursuing are both up dramatically.*

Since 2002, the department has brought more cases against alien voters, felon voters, and double voters than ever before. Previously, cases were only brought against conspiracies when there was a pattern or scheme to corrupt the process rather than individual offenders acting alone. For deterrence purposes, charges were not brought against individuals – those cases went un-prosecuted. This change in direction, focus, and level of aggression was by the decision of the Attorney General. The reason for the change was for deterrence purposes, he Attorney General decided to add the pursuit of individuals who vote when not eligible to vote (noncitizens, felons) or who vote more than once.

How is this different?

The department is currently undertaking three pilot projects to determine what works in developing the cases and obtaining convictions and what works with juries in such matters to gain convictions:

1. Felon voters in Milwaukee.
2. Alien voters in the Southern District of Florida. FYI – under 18 USC 611, to prosecute for “alien voting” there is no intent requirement. Conviction can lead to deportation. Nonetheless, the department feels compelled to look at mitigating factors such as was the alien told it was OK to vote, does the alien have a spouse that is a citizen.
3. Double voters in a variety of jurisdictions.

Formatted: Bullets and Numbering

Formatted: Bullets and Numbering

Formatted: Bullets and Numbering

The department does not maintain records of the complaints that come in from DEOs, U.S attorneys and others during the election that are not pursued by the department. Donsanto asserted that U.S. attorneys never initiate frivolous investigations.

~~According to the new handbook, the department can take on a case whenever there is a federal candidate on the ballot~~

Leave

**Interview with John Tanner, Director ~~Chief~~, Voting Section, Civil Rights Division,  
U.S. Department of Justice**

February 24, 2006

The Department of Justice's (DOJ) Voting Section is charged with the civil enforcement of the Voting Rights Act, the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), the National Voter Registration Act (NVRA), and Title III of the Help America Vote Act (HAVA).

Note: Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. Mr. Tanner would not give us any information about or data from the section's election complaint intake phone logs; data or even general information from the Interactive Case Management (ICM) system its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws; and would give us only a selected few samples of attorney observer reports, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. He would not discuss in any manner any current investigations or cases the section is involved in. He also did not believe it was his position to offer us recommendations as to how his office, elections, or the voting process might be improved.

Authority and Process

The Voting Section, in contrast to the Public Integrity Section as Craig Donsanto described it, typically focuses looks only onat systemic problems resulting from government action or inaction, not problems caused by individuals. Indeed, the section never goes after individuals because it does not have the statutory authority to do so. In situations in which individuals are causing problems at the polls and interfering with voting rights, the section calls the local election officials to resolve it.

Federal voting laws enforced by the section only apply to state action, so the section only sues state and local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. Doing it this way has been most effective – for example, while the section used to have the most observers in the South, with systematic changes forced upon those jurisdictions, have made it so now the section now does not get complaints from the South.

The section can get involved even where there is no federal candidate on the ballot if there is a racial issue under the 14<sup>th</sup> and 15<sup>th</sup> Amendments.

When the section receives a complaint, attorneys first determine whether it is a matter that involves individual offenders or a systemic problem. When deciding what to do

030709

with the complaint, the section errs on the side of referring it criminally to avoid having any ~~because they do not want civil litigation to complicate a possible criminal case.~~

When a complaint comes in, the attorneys ask questions to see if there are even problems there that the complainant is not aware are violations of the law. For example, in the Boston case, the attorney did not just look at Spanish language cases under section 203, but also brought a Section 2 case for violations regarding Chinese and Vietnamese voters. When looking into a case, the attorneys look for specificity, witnesses and supporting evidence.

Often, lawsuits bring voluntary compliance.

#### Voter Intimidation

Many instances of what some people refer to as voter intimidation are more unclear now. For example, photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera. It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation.

The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.

The inappropriate use of challengers on the basis of race would be a violation of the law. Mr. Tanner was unaware that such allegations were made in Ohio in 2004. He said there had never been a formal investigation into the abusive use of challengers.

Mr. Tanner said a lot of the challenges are legitimate because you have a lot of voter registration fraud as a result of groups paying people to register voters by the form. They turn in bogus registration forms. Then the parties examine the registration forms and challenge them because 200 of them, for example, have addresses of a vacant lot.

However, Mr. Tanner said the Department was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama, as was referenced in a February 23 Op-Ed in USA Today. Mr. Tanner reiterated the section takes racial targeting very seriously.

Refusal to provide provisional ballots would be a violation of the law that the section would investigate.

Deceptive practices are committed by individuals and would be a matter for the Public Integrity Section. Local government would have to be involved for the ~~voting~~ Voting Section to become involved.

Unequal implementation of ID rules, or asking minority voters only for ID would be something the section would go after. Mr. Tanner was unaware of allegations of this in 2004. He said this is usually a problem where you have language minorities and the poll workers cannot understand the voters when they say their names. The section has never

030710

formally investigated or solely focused a case based on abuse of ID provisions. However, implementation of ID rules was part of the Section 2 case in San Diego. Mr. Tanner reiterated that the section is doing more than ever before.

When asked about the section's references to incidents of vote fraud in the documents related to the new state photo identification requirements, Mr. Tanner said the section only looks at retrogression, not at the wisdom of what a legislature does. In Georgia, for example, everyone statistically has identification, and more blacks have ID than whites. With respect to the letter to Senator Kit Bond regarding voter ID, the section did refer to the perception of concern about dead voters because of reporting by the Atlanta Journal-Constitution. It is understandable that when you have thousands of bogus registrations that there would be concerns about polling place fraud. Very close elections make this even more of an understandable concern. Putting control of registration lists in the hands of the states will be helpful because at this higher level of government you find a higher level of professionalism.

It is hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. However, the enforcement of federal law over the years has made an astounding difference so that the level of discrimination has plummeted. Registration of minorities has soared, as can be seen on the section's website. Mr. Tanner was unsure if the same was true with respect to turnout, but the gap is less. That information is not on the section's website.

The section is not filing as many Section 2 cases as compared to Section 203 cases because many of the jurisdictions sued under Section 2 in the past do not have issues anymore. Mr. Tanner said that race based problems are rare now.

NVRA has been effective in opening up the registration process. In terms of enforcement, Mr. Tanner said they do what they can when they have credible allegations. There is a big gap between complaints and what can be substantiated. Mr. Tanner stated that given the high quality of the attorneys now in the section, if they do not investigate it or bring action, that act complained of did not happen.

#### Recommendations

Mr. Tanner did not feel it was appropriate to make recommendations.

Note: We contend that Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. We did not have access to any information about or data from the section's election complaint intake phone logs or data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws. Only a selected few samples of attorney-observer reports were provided, reports that every Voting Section

Formatted: Highlight

Formatted: Highlight

attorney who is observing elections at poll sites on Election Day is required to submit.  
Mr. Tanner would not discuss any current investigations or cases the section is involved  
in.

RE: October 16, 2006 Letter

Dear Congressman Holt:

Your letter of October 16, 2006 requests the release of EAC's Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

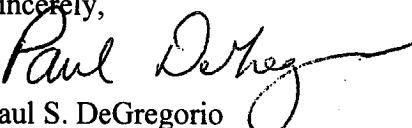

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group's concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study -- finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud -- as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,

  
Paul S. DeGregorio  
Chairman

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

**Voter Suppression & Intimidation:**

- Voter suppression efforts are sometimes racially based, and sometimes based on partisan considerations
- Hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. Many instances of what some people refer to as voter intimidation are more unclear now (e.g.; photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera). It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation
- The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.
- Some advocates assert that, given the additional resources and latitude given to the DOJ enforcement of acts such as double voting and noncitizen voting, there should be an equal commitment to enforcement of acts of intimidation and suppression cases.
- Examples:
  - spreading of false information, such as phone calls, flyers, and radio ads that intentionally mislead as to voting procedures, such as claiming that if you do not have identification, you cannot vote, and providing false dates for the election
  - Observers with cameras, which people associate with potential political retribution or even violence
  - Intimidating police presence at the polls
  - open hostility by poll workers toward minorities (racial and language), or poll workers asking intimidating questions;
  - groups of officious-looking poll watchers at the poll sites who seem to be some sort of authority looking for wrongdoing;
  - challenges
    - There are cases where challenger laws have been beneficial and where they have been abused (Brennan is currently working on developing a model challenger law)
    - No way to determine whether a challenge is in good or bad faith, and there is little penalty for making a bad faith challenge. The fact that there are no checks on the challenges at the precinct level, or even a requirement of concurrence from an opposing party challenger leads to the concern that challenge process will be abused. The voter on the other hand, will need to get majority approval of county election board members to defeat the challenge.
    - Especially in jurisdictions that authorize challenges, the use of challenge lists and challengers goes beyond partisanship to racial suppression and intimidation
  - instances where civic groups and church groups intimidate members to vote in a specific manner, not for reward, but under threat of being ostracized or even telling them they will go to hell.(AR, KY)
  - moving poll sites
  - having Indians vote at polling places staffed by non-Indians often results in incidents of disrespect towards Native voters, judges aren't familiar with Indian last names and are more dismissive of solving discrepancies with native voters
  - intimidation at the poll sites in court houses. Many voters are afraid of the county judges or county employees and therefore will not vote. They justifiably believe their ballots will be opened by these employees to see who they voted for, and if they voted against the county people, retribution might ensue. (AR)

**Fraud in Voting:**

*NOTE: Many interviewees appear to have made claims regarding the quantity and type of voting fraud based on incomplete data, their personal experience, or their impressions (e.g.; voting fraud*

030714

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

*has been confined to absentee ballots; there is no in person assumption of others' voter identities to vote).*

- The most commonly cited example of voting fraud mentioned was absentee ballot fraud (e.g.; vote selling involving absentee ballots, the filling out of absentee ballots en masse, people at nursing homes filling out the ballots of residents, and union leaders getting members to vote a certain way by absentee ballot).
- Many assert that impersonation, or polling place fraud, is probably the least frequent type because:
  - impersonation fraud is more likely to be caught and is therefore not worth the risk
  - unlike in an absentee situation, actual poll workers are present to disrupt impersonation fraud, for instance, by catching the same individual voting twice
  - if one votes in the name of another voter, and that voter shows up at the polls, the fraud will be discovered
  - one half to one quarter of the time the person will be caught (there is a chance the pollworker will have personal knowledge of the person, Georgia Secretary of State Cathy Cox has mentioned that there are many opportunities for discovery of in person fraud as well).
  - deterrent is that it's a felony, and that one person voting twice is not an effective way to influence an election. One would need to get a lot of people involved for it to work
- Vote buying still occurs and, in some cases, it is hard to distinguish between intimidation and vote buying.
- Tampering with ballots in transit between poll and election office is a concern (AR)

**Voter Registration:**

- Some assert that registration fraud is the major issue (esp unsupervised voter registration drives by political parties and advocacy groups that pay workers to register voters)
- Some assert that various groups abuse the existence of list deadwood to make claims about fraudulent voting.
- Some assert that when compiling such lists and doing comparisons, which are used as the basis for challenges, sound statistical methods must be utilized, and often are not. Matching protocols without faulty assumptions will have a 4 percent to 35 percent error rate—that's simply the nature of database work. Private industry has been working on improving this for years.
- If someone is on a voter list twice, that does not mean that voter has voted twice.
- Many problems will be addressed by the statewide database required under HAVA

**Enforcement:**

- States vary in their authority to intervene in and track voter intimidation-voter suppression and voting fraud cases (e.g.; in AR, enforcement is the responsibility of counties, in IN it is responsibility of State AG).
- Voter fraud and intimidation is difficult to prove. It is very hard to collect the necessary factual evidence to make a case, and doing so is very labor-intensive
- Some believe that voter suppression matters are not pursued formally because often they involve activities that current law does not reach.
- Only two interviewees assert that current state and federal codes seem sufficient for prosecuting fraud, and are not under-enforced (no need for additional laws).
- Some advocacy groups assert that the government does not engage in a sustained investigation of voter suppression matters or pursue any kind of resolution to them. There is a perception that the Department of Justice has never been very aggressive in pursuing cases of vote suppression, intimidation and fraud, and that choices DOJ has made with respect to where they have brought claims do not seem to be based on any systematic analysis of where the biggest problems are.
- Some advocates point out that, once the election is over, civil litigation becomes moot.

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

- The development of a pre-election challenge list targeted at minorities (some claim this has never been pursued, yet Mr. Tanner said the DOJ was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama), long lines due to unequal distribution of voting machines based on race, list purges based on race, unequal application of voter ID rules, and refusal to offer a provisional ballot on the basis of race would be VRA violations.
- DOJ asserts there is a big gap between complaints and what can be substantiated
- DOJ Voting Rights Section - Federal Voting Rights Act only applies to state action, so the section only sues State and local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. When deciding what to do with the complaint, the section errs on the side of referring it criminally because they do not want civil litigation to complicate a possible criminal case
- DOJ Election Crimes Branch – DOJ is permitted to prosecute whenever there is a candidate for federal office, but can't prosecute everything. Deceptive practices that are committed by individuals and would be a matter for the Public Integrity Section; local government would have to be involved for the voting section to become involved. The problem is asserting federal jurisdiction in non-federal elections. (In U.S. v. McNally, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to "fix" McNally, did not include voter fraud.)
- It is preferable for the federal government to pursue these cases for the following reasons:
  - federal districts draw from a bigger and more diverse jury pool;
  - the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected;
  - DOJ has more resources – local prosecutors need to focus on personal and property crimes---fraud cases are too big and too complex for them;
  - DOJ can use the grand jury process as a discovery technique and to test the strength of the case.
- Some assert that election crimes are not high on the priority list of either district attorneys or grand juries; therefore, complaints of election crime very rarely are prosecuted or are indicted by the grand jury.
- Political parties have devoted extraordinary resources into 'smoking out' fraudulent voters

**Recommendations Re Laws & Procedures:**

- It is important to keep clear who the perpetrators of the fraud are and where the fraud occurs because that effects what the remedy should be.
- Support Senator Barak Obama's bill for combating voter harassment and deceptive practices. (Many jurisdictions do not currently have laws prohibiting voter harassment and deceptive practices.)
- Support a new law that allows the DOJ to bring civil actions for suppression that are not race based, for example, deceptive practices or wholesale challenges to voters in jurisdictions that tend to vote heavily for one party.
- Support a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce (DOJ has drafted such legislation, which was introduced but not passed in the early 1990s.)
- Put stronger teeth in the voter fraud laws; step up enforcement against fraud and provide stiffer penalties as current penalties make the risk of committing fraud relatively low
- There should be increased resources dedicated to expanded DOJ monitoring efforts. This might be the best use of resources since monitors and observers act as a deterrent to fraud and intimidation.
- Some advocate that all election fraud and intimidation complaints should be referred to the State Attorney General's Office to circumvent the problem of local political prosecutions. The

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

Attorney General should take more responsibility for complaints of fraud because at the local level, politics interferes

- Some advocate greater resources for district attorneys. In addition, during election time, there should be an attorney in the DA's office who is designated to handle election prosecution
- Would be useful to have recommendations for prosecutors investigating fraudulent activity
- Better trained poll workers
- Polling places should be open longer, run more professionally but there needs to be fewer of them so that they are staffed by only the best, most professional people (Voting Centers).
- Move elections to weekends. This would involve more people acting as poll workers who would be much more careful about what was going on.
- A day should be given off of work without counting as a vacation day so that better poll workers are available.
- Early voting at the clerk's office is good because the people there know what they are doing. People would be unlikely to commit fraud at the clerk's office. This should be expanded to other polling places in addition to that of the county clerk.
- Many assert that the best defense against fraud will be better voter lists.
  - States should be urged to implement statewide voter lists in accordance with the Help America Vote Act ("HAVA"), the election reform law enacted by Congress in 2002 following the Florida debacle
  - Linking voter registration databases across states may be a way to see if people who are registered twice are in fact voting twice
  - New legislation or regulations are needed to provide clear guidance and standards for generating voter lists and purging voters, otherwise states could wrongfully disenfranchise eligible voters; purging must be done in a manner that uses the best databases, and looks at only the most relevant information
  - The process for preventing ineligible ex-felons from casting ballots needs to be improved
  - statewide registration databases should be linked to social service agency databases
- Challenge laws need to be reformed, especially ones that allow for pre-election mass challenges with no real basis. There is no one size fits all model for challenger legislation, but some bad models involving hurdles for voters lead to abuse and should be reformed. There should be room for poll workers to challenge fraudulent voters, but not for abuse. (KY has list of defined reasons for which they can challenge a voter, such as residency, and the challengers must also fill out paperwork to conduct a challenge) Last minute challenges should not be permitted
- False information campaigns should be combated with greater voter education, the media could do more to provide information about what is legal and what is illegal
- Improve the protective zone around polling places: the further vote suppressers can keep people away from the polls, the better.
- States should be encouraged to:
  - codify into law uniform and clear published standards for voter registration, challenges, voter ID, poll worker training, use and counting of provisional votes, the distribution of voting equipment and the assignment of official pollworkers among precincts, to ensure adequate and nondiscriminatory access
  - standardize forms
  - modify forms and procedures based on feedback from prosecutors
- Ensure good security procedures for the tabulation process and more transparency in the vote counting process
- Conduct post-election audits
- Many advocate eliminating "no excuse" absentee voting.
- Some recommend reducing partisanship in election administration, but others are skeptical of the feasibility of this

**SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY**

---

- Some strongly recommend requiring voter ID, while others strongly oppose it as a voter suppression tactic, asserting that states should not adopt requirements that voters show identification at the polls, beyond those already required by federal law (requiring that identification be shown only by first time voters who did not show identification when registering.) and that states could use signature comparisons.
- Political parties should monitor the processing of voter registrations and purging of registered by local election authorities on an ongoing basis to ensure the timely processing of registrations and changes, including both newly registered voters and voters who move within a jurisdiction or the state, and the Party should ask state Attorneys General to take action where necessary to force the timely updating of voter lists or to challenge, unlawful purges and other improper list maintenance practices.

**Future Study Recommendations:**

- Just because there was no prosecution, does not mean there was no vote fraud; very hard to come up with a measure of voter fraud short of prosecution
- EAC should conduct a survey of the general public that asks whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data
- EAC should work with the Census Bureau to have them ask different, additional questions in their Voter Population Surveys
- EAC should talk to private election lawyers

**1. Everyone does not define voting fraud and voter intimidation the same way.**

In some cases, what may have been honest administrative mistakes or errors due to poor poll worker training are lumped together with genuine voter suppression efforts and labeled as voter intimidation or voting fraud. Examples: (1) many authors consider certain voter suppression tactics to be voter intimidation that do not rise to the definition used in criminal enforcement of election crimes; (2) some charge that a DOJ ballot integrity measure in South Dakota was voter intimidation; and (3) some mistakes made in the maintenance of voter registration lists are labeled as fraud.

**2. There seems to be no systematic *nationwide* study that reports all (or most) verified instances of voting fraud and voter intimidation or suppression efforts in a particular election or a particular period in U.S. history.**

Some sources focus on certain areas of the country, which can bias the study if these areas are more or less susceptible to fraud and suppression. Some focus on the alleged (but not necessarily verified) misdeeds of one political party or another. Still others focus on unverified allegations reported to a toll-free phone line. In some cases, it is not clear if the incidents were intentional voter suppression or genuine poll worker mistakes (e.g.; not providing provisional ballots or in appropriately asking voters for ID). Minnite's study is as close as they get to a systematic study.

**3. There are a number of obstacles to gathering complete data on voting fraud and voter intimidation/suppression nationwide in any election.**

Authors often have limited resources (time and money) to collect such information. Investigation and prosecution of voting fraud and voter intimidation or suppression occurs at different levels of government (Federal, state and local). These investigations and prosecutions are not reported to and recorded by a central authority. Some voting fraud is inherently more difficult to identify and to prove than others (e.g.; impersonation of another voter at the polls is more difficult, due to the transient nature of some jurisdictions and the fact that impersonators not identified as a fraud at the polls are hard to identify later, than voter registration, vote buying, and absentee ballot fraud). At least some voting fraud and voter intimidation appears to go unreported and uninvestigated, and some prosecutions are unsuccessful due to local politics and law enforcement affiliations and the lack of sufficient resources at the Federal, state, and local levels to support the labor intensive effort.

**4. Most sources seem to agree that voter registration and absentee balloting fraud are the most common forms of voting fraud. Absentee ballot fraud often is accompanied by vote buying or voter coercion. Also frequently alleged were instances of ineligible voters (usually felons, but sometime non-citizens, under aged individuals, or non-residents) that voted. But not all agree that these are the only common forms of fraud.**

030719

Some contend that voting in the name of another at the polling place is common, but that such instances are extremely hard to prove. Most instances of ineligible voters voting were linked to improper voter list maintenance or confusion on the part of local election officials as to state law on felon disenfranchisement.

**5. A number of sources have identified numerous instances of attempted voter suppression, but no instances of voter intimidation that could be prosecuted under Federal criminal laws is alleged.**

Examples of voter suppression efforts include: (1) phone calls and mailings deliberately directing targeted voters to vote on the wrong day or to go to the wrong polling place, or that provide incorrect and threatening information about the voter qualifications and legal consequences of voting; (2) targeted, inappropriate challenges to voters at the polls or shortly before election day; (3) people posing as law enforcement agents at targeted polling places. When such tactics target minority communities, they may be attacked through civil action by DOJ under Voting Rights Act provisions, but they do not qualify for criminal penalties under Federal voter intimidation law. Currently, there is no Federal election law providing criminal penalties for voter suppression efforts. When the suppression adversely affects a political party, but does not have a racial component, DOJ may be hard pressed to pursue the matter unless other Federal criminal law has been violated (e.g.; suppression of phone banks in New Hampshire).

**6. Unsupervised voter registration drives by political parties and advocacy groups are a primary source of fraudulent voter registration applications and missing (perhaps deliberately) voter registration applications.**

The practice of paying persons to man voter registration drives (particularly, but not only, when the person is paid by the head) is a frequent source of fraudulent voter registration applications. Partisan drives have resulted in applications from persons of "the wrong party" being held back or destroyed. Therefore, while the applicant believes they have registered, the election official has no record of that registration.

**7. Many authors contend that proper implementation of the National Voter Registration Act of 1993 (NVRA) and the Help America Vote Act of 2002 (HAVA) will reduce or at least not increase the potential for fraud and voter suppression, but some argue that provisions in these laws increase the likelihood of fraud or voter suppression.**

Many argue that proper implementation of the list maintenance and fail-safe voting provisions of the NVRA and HAVA's requirements for the statewide voter registration list, voter ID for certain first-time voters, and provisional voting will reduce the potential for voting fraud and voter intimidation. Others argue that the list maintenance provisions of NVRA cause "dead wood" to be left on the voter rolls, providing opportunity for fraud, or that HAVA's voter ID and list matching requirements can be used as voter suppression tactics.

EAC-LESSONS LEARNED FROM LITERATURE RESEARCH  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

- 8. Proper recordkeeping and post-election auditing is an important key to identifying and preventing voting fraud, and for subsequent prosecution of such activities; but is not being done consistently.**
- 9. Poll worker recruitment and training is a key component to combating actions that are perceived as suppressing or intimidating voters.**
- 10. Both sides on election reform debates are using incomplete data to bolster their arguments.**

Subject Voter Fraud-Voter Intimidation Draft Report

Attached is a copy of the draft voter fraud-voter intimidation report that combines all of the pieces provided to me by the consultants, except for the voluminous Nexis research and case law charts. Tom wants to get this before the Commissioners ASAP, but I need some other eyes to look it over before we do. Although I've made some formatting changes to provide some consistency in presentation, and corrected a couple of glaring errors, I remain concerned about a number of issues:

- As you know, references to DOJ actions/responses have caused some concern at DOJ. But both consultants are adamantly opposed to EAC making substantive changes to their report. Perhaps using footnotes clearly labeled as EAC footnotes would be a method of addressing this issue?
- There are some recommendations regarding DOJ that we (the consultants and I) were told would not be supported by DOJ, and other references to DOJ, none of which have been reviewed by the department. I think we ought to give Craig Donsanto and John Tanner a chance to provide feedback on each of these sections.
- I am a little concerned about the naming of names, particularly in the section that addresses working group concerns. If we publish it as is, it might end up as fodder for some very negative newspaper articles.
- The report currently uses three different voices: third person, first person singular, first person plural. I think this looks really clumsy. If we are not actually making substantive changes, perhaps we could get away with making the presentation consistent in this regard.
- Because the consultants submitted the report in pieces, they did not include proper sequeways. I don't know if we should leave it as is, or insert them where needed.

Please let me know what you think. If it would help, we can schedule a teleconference. --- Peggy

## **Introduction**

### **Charge Under HAVA**

Under the Help America Vote Act, Pub. L. No. 107-252, 116 Stat. 1666 (2002) (“HAVA”), the United States Election Assistance Commission is charged with developing national statistics on voter fraud and developing methods of deterring and investigating voter fraud. Also, the Commission is charged with developing methods of identifying, deterring, and investigating methods of voter intimidation.

### **Scope of Project**

The Commission employed a bipartisan team of legal consultants, Tova Wang and Job Serebrov to develop a preliminary overview work product to determine the quantity and quality of vote fraud and voter intimidation that is present on a national scale. The consultants’ work is neither comprehensive nor conclusive. This first phase of an envisioned two-phase project was constrained by both time and funding. The consultants’ conclusions and recommendations for phase II will be contained in this report.

The consultants, working without the aid of a support staff, divided most of the work. However, the final work product was mutually checked and approved. They agreed upon the steps that were taken needed and the method employed. For all of the documentary sources, the consultants limited the time period under review from January 1, 2001 to January 1, 2006. The research performed by the consultants included interviews, an extensive Nexis search, a review of existing literature, and case research.

**Interviews:** The consultants chose the interviewees by first coming up with a list of the categories of types of people they wanted to interview. Then the consultants separately, equally filled those categories with a certain number of people. Due to time and resource constraints, the consultants had to pare down this list substantially – for instance, they had to rule out interviewing prosecutors altogether – but still got a good range of people to talk to. The ultimate categories were academics, advocates, elections officials, lawyers and judges. Although the consultants were able to talk to most of the people they wanted to, some were unavailable and a few were not comfortable speaking to them, particularly judges. The consultants together conducted all of the interviews, either by phone or in person. Then the consultants split up drafting the summaries. All summaries were reviewed and mutually approved. Most of the interviews were extremely informative and the consultants found the interviewees to be extremely knowledgeable and insightful for the most part.

**Nexis:** Initially, the consultants developed an enormous list of possible Nexis search terms. It soon became obvious that it would be impossible to conduct the research that way. As a result, consultant Wang performed the Nexis search by finding search term combinations that would yield virtually every article on a particular subject from the last

five years. Consultant Serebrov approved the search terms. Then Wang created an excel spreadsheet in order to break down the articles in way in which they could be effectively analyzed for patterns. Each type of fraud is broken down in a separate chart according to where it took place, the date, the type of election it occurred in, what the allegation was, the publication it came from. Where there was a follow up article, any information that that suggested there had been some further action taken or some resolution to the allegation was also included. For four very complicated and long drawn out situations – Washington State, Wisconsin, South Dakota in 2004, and the vote buying cases in a couple of particular jurisdictions over the last several years –written summaries with news citations are provided.

**Existing Literature:** Part of the selections made by the consultants resulted from consultant Wang's long-term familiarity with the material while part was the result of a joint web search for articles and books on vote fraud and voter intimidation and suggestions from those interviewed by the consultants. The consultants reviewed a wide range of materials from government reports and investigations, to academic literature, to reports published by advocacy groups. The consultants believe that they covered the landscape of available sources.

**Cases:** In order to properly identify all applicable cases, the consultants first developed an extensive word search term list. A WestLaw search was performed and the first one hundred cases under each word search term were then gathered in individual files. This resulted in a total of approximately 44,000 cases. Most of these cases were federal as opposed to state and appellate as opposed to trial. Consultant Serebrov analyzed the cases in each file to determine if they were on point. If he found that the first twenty cases were inapplicable, Serebrov would sample forty to fifty other file cases at random to determine applicability. If the entire file did not yield any cases, the file would be discarded. All discarded word search terms were recorded in a separate file. Likewise, if the file only yielded a few applicable cases, it would also be discarded. However, if a small but significant number of cases were on point, the file was later charted. The results of the case search were stark because relatively few applicable cases were found.

## Working Definition of Fraud and Intimidation

Note: The definition provided below is for the purposes of this EAC project. Most of the acts described come within the federal criminal definition of fraud, but some may not.

*what does this mean?*  
Election fraud is any intentional action, or intentional failure to act when there is a duty to do so, that corrupts the election process in a manner that can impact on election outcomes. This includes interfering in the process by which persons register to vote; the way in which ballots are obtained, marked, or tabulated; and the process by which election results are canvassed and certified.

Examples include the following:

- falsifying voter registration information pertinent to eligibility to cast a vote, (e.g. residence, criminal status, etc).;
- altering completed voter registration applications by entering false information;
- knowingly destroying completed voter registration applications (other than spoiled applications) before they can be submitted to the proper election authority;
- knowingly removing eligible voters from voter registration lists, in violation of HAVA, NVRA, or state election laws;
- intentional destruction by election officials of voter registration records or balloting records, in violation of records retention laws, to remove evidence of election fraud;
- vote buying;
- voting in the name of another;
- voting more than once;
- coercing a voter's choice on an absentee ballot;
- using a false name and/or signature on an absentee ballot;
- destroying or misappropriating an absentee ballot;
- felons, or in some states ex-felons, who vote when they know they are ineligible to do so;
- misleading an ex-felon about his or her right to vote; *knowledge is not an*
- voting by non-citizens who know they are ineligible to do so; *element*
- intimidating practices aimed at vote suppression or deterrence, including the abuse of challenge laws;
- deceiving voters with false information (e.g.; deliberately directing voters to the wrong polling place or providing false information on polling hours and dates);
- knowingly failing to accept voter registration applications, to provide ballots, or to accept and count voted ballots in accordance with the Uniformed and Overseas Citizens Absentee Voting Act;
- intentional miscounting of ballots by election officials;
- intentional misrepresentation of vote tallies by election officials;
- acting in any other manner with the intention of suppressing voter registration or voting, or interfering with vote counting and the certification of the vote.

*who?*

*who?*

*don't know  
that's not a crime*

*malfeasance  
malfeasance*

Voting fraud does not include mistakes made in the course of voter registration, balloting, or tabulating ballots and certifying results. For purposes of the EAC study, it also does not include violations of campaign finance laws.

DRAFT

## Summaries of Research Conducted

### Interviews

#### *Common Themes*

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, “dead” voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud, although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.
- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate – including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now and is focusing on matters such as noncitizen voting, double voting and felon voting. While the civil rights section continues to focus on systemic patterns of malfeasance, the public integrity section is focusing now on individuals, on isolated instances of fraud.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full

*What does this mean?*

*Not Fraud*

*DOJ disputes*

implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

**Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.
  - With respect to the civil rights section, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and the section has not pursued any such cases.
  - Craig Donsanto of the public integrity section says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases the department is investigating and the number of indictments the section is pursuing are both up dramatically. Since 2002, the department has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so it can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud. Of particular note, Sarah Ball Johnson, Executive Director of Elections for Kentucky, emphasized that having had an effective statewide voter registration database for more than thirty years has helped that state avoid most of the fraud problems that have been alleged elsewhere, such as double voting and felon voting.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment

*These are criminal matters*

- Several people advocate passage of Senator Barak Obama’s “deceptive practices” bill
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected nonpartisanly they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas is a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states’ office; increasing transparency in the process; and enacting conflict of interest rules.
- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the scheme contemplated in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

## **Nexis Research**

### ***Absentee Ballot Fraud***

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

### ***Voter Registration Fraud***

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people
- Fake names and other information on voter registration forms
- Illegitimate addresses used on voter registration forms
- Voters being tricked into registering for a particular party under false pretenses
- Destruction of voter registration forms depending on the party the voter registered with

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported on included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota and Wisconsin.

### ***Voter Intimidation and Suppression***

This is the area which had the most articles in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places.
- Improper demands for identification
- Poll watchers harassing voters
- Poll workers being hostile to or aggressively challenging voters
- Disproportionate police presence
- Poll watchers wearing clothes with messages that seemed intended to intimidate
- Insufficient voting machines and unmanageably long lines

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio and Pennsylvania.

### ***“Dead Voters and Multiple Voting”***

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking of voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person taking criminal advantage of that. In total, the San Francisco Chronicle found 5 such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### ***Vote Buying***

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations in three particular jurisdictions as detailed in the vote buying summary. There were more official investigations, indictments and convictions/pleas in this area. All of these cases are concentrated in the Midwest and South.

### ***Deceptive Practices***

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of voter registration forms. There were no reports of prosecutions or any other legal proceeding.

### ***Non-citizen Voting***

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case charges were filed against ten individuals. In one case a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this nexis search, remained just allegations of noncitizen voting.

### ***Felon Voting***

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem has been the large number of ineligible felons that remained on the voting list.

### ***Election Official Fraud***

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### ***Existing Research***

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books

written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the “second phase” of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund’s frequently cited book. Again, this is something that it is hoped will be addressed in the “second phase” of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.
- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

## Cases

After reviewing over 40,000 cases, the majority of which came from appeals courts, I have found comparatively very few which are applicable to this study. Of those that are applicable, no apparent thematic pattern emerges. However, it seems that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility. But because so few cases provided a picture of these current problems, I suggest that case research for the second phase of this project concentrate on state trial-level decisions.

## Methodology

The following is a summary of interviews conducted with a number of political scientists and experts in the field as to how one might undertake a comprehensive examination of voter fraud and intimidation. A list of the individuals interviewed and their ideas are available, and all of the individuals welcome any further questions or explanations of their recommended procedures.

- In analyzing instances of alleged fraud and intimidation, we should look to criminology as a model. In criminology, experts use two sources: the Uniform Crime Reports, which are all reports made to the police, and the Victimization Survey, which asks the general public whether a particular incident has happened to them. After surveying what the most common allegations are, we should conduct a survey of the general public that ask whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data collection. (Stephen Ansolobhere, MIT)
- Several political scientists with expertise in these types of studies recommended a methodology that includes interviews, focus groups, and a limited survey. In determining who to interview and where the focus groups should be drawn from, they recommend the following procedure:
  - Pick a number of places that have historically had many reports of fraud and/or intimidation; from that pool pick 10 that are geographically and demographically diverse, and have had a diversity of problems
  - Pick a number of places that have not had many reports of fraud and/or intimidation; from that pool pick 10 places that match the geographic and demographic make-up of the previous ten above (and, if possible, have comparable elections practices)

- Assess the resulting overall reports and impressions resulting from these interviews and focus groups, and examine comparisons and differences among the states and what may give rise to them.

In conducting a survey of elections officials, district attorneys, district election officers, they recommend that:

- The survey sample be large in order to be able to get the necessary subsets
- The survey must include a random set of counties where there have and have not been a large number of allegations

(Allan Lichtman, American University; Thad Hall, University of Utah; Bernard Grofman, UC – Irvine)

- Another political scientist recommended employing a methodology that relies on qualitative data drawn from in-depth interviews with key critics and experts on all sides of the debate on fraud; quantitative data collected through a survey of state and local elections and law enforcement officials; and case studies. Case studies should focus on the five or ten states, regions or cities where there has been a history of election fraud to examine past and present problems. The survey should be mailed to each state's attorney general and secretary of state, each county district attorney's office and each county board of elections in the 50 states. (Lorraine Minnite, Barnard College)
- The research should be a two-step process. Using LexisNexis and other research tools, a search should be conducted of news media accounts over the past decade. Second, interviews with a systematic sample of election officials nationwide and in selected states should be conducted. (Chandler Davidson, Rice University)
- One expert in the field posits that we can never come up with a number that accurately represents either the incidence of fraud or the incidence of voter intimidation. Therefore, the better approach is to do an assessment of what is most likely to happen, what election violations are most likely to be committed – in other words, a risk analysis. This would include an analysis of what it would actually take to commit various acts, e.g. the cost/benefit of each kind of violation. From there we could rank the likely prevalence of each type of activity and examine what measures are or could be effective in combating them. (Wendy Weiser, Brennan Center of New York University)
- Replicate a study in the United States done abroad by Susan Hyde of the University of California- San Diego examining the impact of impartial poll site observers on the incidence of election fraud. Doing this retrospectively would require the following steps:
  - Find out where there were federal observers
  - Get precinct level voting information for those places

- Analyze whether there was any difference in election outcomes in those places with and without observers, and whether any of these results seem anomalous.

Despite the tremendous differences in the political landscapes of the countries examined by Hyde in previous studies and the U.S., Hyde believes this study could be effectively replicated in this country by sending observers to a random sample of precincts. Rather than compare the incumbent's vote share, such factors such as voter complaints, voter turnout, number of provisional ballots used, composition of the electorate, as well as any anomalous voting results could be compared between sites with and without monitors.

For example, if intimidation is occurring, and if reputable monitors make intimidation less likely or voters more confident, then turnout should be higher on average in monitored precincts than in unmonitored precincts. If polling station officials are intentionally refusing to issue provisional ballots, and the polling station officials are more likely to adhere to regulations while being monitored, the average number of provisional ballots should be higher in monitored precincts than in unmonitored precincts. If monitors cause polling station officials to adhere more closely to regulations, then there should be fewer complaints (in general) about monitored than unmonitored precincts (this could also be reversed if monitors made voters more likely to complain).

Again, random assignment controls for all of the other factors that otherwise influence these variables.

One of the downsides of this approach is it does not get at some forms of fraud, e.g. absentee ballot fraud; those would have to be analyzed separately.

- Another political scientist recommends conducting an analysis of vote fraud claims and purging of registration rolls by list matching. Allegations of illegal voting often are based on matching of names and birth dates. Alleged instances of double voting are based on matching the names and birth dates of persons found on voting records. Allegations of ineligible felon (depending on state law), deceased, and of non-citizen voting are based on matching lists of names, birth dates, and sometimes addresses of such people against a voting records. Anyone with basic relational database skills can perform such matching in a matter of minutes.

However, there are a number of pitfalls for the unwary that can lead to grossly over-estimating the number of fraudulent votes, such as missing or ignored middle names and suffixes or matching on missing birth dates. Furthermore, there is a surprising statistical fact that a group of about three hundred people with the same first and last name are almost assured to share the exact same birth date, including year. In a large state, it is not uncommon for hundreds of Robert Smiths (and other common names) to have voted. Thus, allegations of vote fraud

or purging of voter registration rolls by list matching almost assuredly will find a large proportion of false positives: people who voted legally or are registered to vote legally.

Statistics can be rigorously applied to determine how many names would be expected to be matched by chance. A simulation approach is best applied here: randomly assign a birth date to an arbitrary number of people and observe how many match within the list or across lists. The simulation is repeated many times to average out the variation due to chance. The results can then be matched back to actual voting records and purge lists, for example, in the hotly contested states of Ohio or Florida, or in states with Election Day registration where there are concerns that easy access to voting permits double voting. This analysis will rigorously identify the magnitude alleged voter fraud, and may very well find instances of alleged fraud that exceed what might have otherwise happened by chance.

This same political scientist also recommends another way to examine the problem: look at statistics on provisional voting: the number cast might provide indications of intimidation (people being challenged at the polls) and the number of those not counted would be indications of "vote fraud." One could look at those jurisdictions in the Election Day Survey with a disproportionate number of provisional ballots cast and cross-reference it with demographics and number of provisional ballots discarded. (Michael McDonald, George Mason University)

- Spencer Overton, in a forthcoming law review article entitled *Voter Identification*, suggests a methodology that employs three approaches—investigations of voter fraud, random surveys of voters who purported to vote, and an examination of death rolls provide a better understanding of the frequency of fraud. He says all three approaches have strengths and weaknesses, and thus the best studies would employ all three to assess the extent of voter fraud. An excerpt follows:

#### *1. Investigations and Prosecutions of Voter Fraud*

Policymakers should develop databases that record all investigations, allegations, charges, trials, convictions, acquittals, and plea bargains regarding voter fraud. Existing studies are incomplete but provide some insight. For example, a statewide survey of each of Ohio's 88 county boards of elections found only four instances of ineligible persons attempting to vote out of a total of 9,078,728 votes cast in the state's 2002 and 2004 general elections. This is a fraud rate of 0.00000045 percent. The Carter-Baker Commission's Report noted that since October 2002, federal officials had charged 89 individuals with casting multiple votes, providing false information about their felon status, buying votes, submitting false voter registration information, and voting improperly as a non-citizen. Examined in the context of the 196,139,871 ballots cast between October 2002 and

August 2005, this represents a fraud rate of 0.0000005 percent (note also that not all of the activities charged would have been prevented by a photo identification requirement).

A more comprehensive study should distinguish voter fraud that could be prevented by a photo identification requirement from other types of fraud — such as absentee voting and stuffing ballot boxes — and obtain statistics on the factors that led law enforcement to prosecute fraud. The study would demand significant resources because it would require that researchers interview and pour over the records of local district attorneys and election boards.

Hard data on investigations, allegations, charges, pleas, and prosecutions is important because it quantifies the amount of fraud officials detect. Even if prosecutors vigorously pursue voter fraud, however, the number of fraud cases charged probably does not capture the total amount of voter fraud. Information on official investigations, charges, and prosecutions should be supplemented by surveys of voters and a comparison of voting rolls to death rolls.

## 2. *Random Surveys of Voters*

Random surveys could give insight about the percentage of votes cast fraudulently. For example, political scientists could contact a statistically representative sampling of 1,000 people who purportedly voted at the polls in the last election, ask them if they actually voted, and confirm the percentage who are valid voters. Researchers should conduct the survey soon after an election to locate as many legitimate voters as possible with fresh memories.

Because many respondents would perceive voting as a social good, some who did not vote might claim that they did, which may underestimate the extent of fraud. A surveyor might mitigate this skew through the framing of the question (“I’ve got a record that you voted. Is that true?”).

Further, some voters will not be located by researchers and others will refuse to talk to researchers. Photo identification proponents might construe these non-respondents as improper registrations that were used to commit voter fraud.

Instead of surveying all voters to determine the amount of fraud, researchers might reduce the margin of error by focusing on a random sampling of voters who signed affidavits in the three states that request photo identification but also allow voters to establish their identity through affidavit—Florida, Louisiana, and South Dakota. In

South Dakota, for example, only two percent of voters signed affidavits to establish their identity. If the survey indicates that 95 percent of those who signed affidavits are legitimate voters (and the other 5 percent were shown to be either fraudulent or were non-responsive), this suggests that voter fraud accounts for, at the maximum, 0.1 percent of ballots cast.

The affidavit study, however, is limited to three states, and it is unclear whether this sample is representative of other states (the difficulty may be magnified in Louisiana in the aftermath of Hurricane Katrina's displacement of hundreds of thousands of voters). Further, the affidavit study reveals information about the amount of fraud in a photo identification state with an affidavit exception—more voter fraud may exist in a state that does not request photo identification.

### 3. *Examining Death Rolls*

A comparison of death rolls to voting rolls might also provide an estimate of fraud.

Imagine that one million people live in state A, which has no documentary identification requirement. Death records show that 20,000 people passed away in state A in 2003. A cross-referencing of this list to the voter rolls shows that 10,000 of those who died were registered voters, and these names remained on the voter rolls during the November 2004 election. Researchers would look at what percentage of the 10,000 dead-but-registered people who "voted" in the November 2004 election. A researcher should distinguish the votes cast in the name of the dead at the polls from those cast absentee (which a photo identification requirement would not prevent). This number would be extrapolated to the electorate as a whole.

This methodology also has its strengths and weaknesses. If fraudulent voters target the dead, the study might overestimate the fraud that exists among living voters (although a low incidence of fraud among deceased voters might suggest that fraud among all voters is low). The appearance of fraud also might be inflated by false positives produced by a computer match of different people with the same name. Photo identification advocates would likely assert that the rate of voter fraud could be higher among fictitious names registered, and that the death record survey would not capture that type of fraud because fictitious names registered would not show up in the death records. Nevertheless, this study, combined with the other two, would provide important insight into the magnitude of fraud likely to exist in the absence of a photo identification requirement.

**Recommendations for Further EAC Activity**  
**on Voting Fraud and Voter Intimidation**

**Consultants' Recommendations**

***Recommendation 1: Conduct More Interviews*** X

Time and resource constraints prevented the consultants from interviewing the full range of participants in the process. As a result, we recommend that any future activity in this area include conducting further interviews.

In particular, we recommend that more election officials from all levels of government, parts of the country, and parties be interviewed. These individuals have the most direct inside information on how the system works -- and at times does not work. They are often the first people voters go to when something goes wrong and are often responsible for fixing it. They are the ones who must carry out the measures that are designed to both prevent fraud and voter intimidation and suppression. They will most likely know what, therefore, is and is not working.

It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers ("DEOs") and local district attorneys, as well as civil and criminal defense attorneys.

The Public Integrity Section of the Criminal Division of the Department of Justice has all of the 93 U.S. Attorneys appoint Assistant U.S. Attorneys to serve as DEOs for two years. DEOs are required to

- screen and conduct preliminary investigations of complaints, in conjunction with the FBI and PIN, to determine whether they constitute potential election crimes and should become matters for investigation;
- oversee the investigation and prosecution of election fraud and other election crimes in their districts;
- coordinate their district's (investigative and prosecutorial) efforts with DOJ headquarters prosecutors;
- coordinate election matters with state and local election and law enforcement officials and make them aware of their availability to assist with election-related matters;
- issue press releases to the public announcing the names and telephone numbers of DOJ and FBI officials to contact on election day with complaints about voting or election irregularities and answer telephones on election day to receive these complaints; and
- supervise a team of Assistant U.S. Attorneys and FBI special agents who are appointed to handle election-related allegations while the polls are open on election day.<sup>i</sup>

Given the great responsibilities of the DEOs, and the breadth of issues they must deal with, they undoubtedly are great resources for information and insight as to what types of fraud and intimidation/suppression are occurring in their districts.

In many situations, however, it is the local district attorneys who will investigate election fraud and suppression tactics, especially in local elections. They will be able to provide information on what has gone on in their jurisdictions, as well as which matters get pursued and why.

Finally, those who defend people accused of election related crimes would also be useful to speak to. They may have a different perspective on how well the system is working to detect, prevent, and prosecute election fraud.

***Recommendation 2: Follow Up on Nexis Research*** X

The Nexis search conducted for this phase of the research was based on a list of search terms agreed upon by both consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. However, without being able to go beyond the agreed search terms, it could not be determined whether there was any later determination regarding the allegations, investigation or charges brought. This leaves a gaping hole: it is impossible to know if the article is just reporting on “talk” or what turns out to be a serious affront to the system.

As a result, we recommend that follow up Nexis research be conducted to determine what, if any, resolutions or further activity there was in each case. This would provide a much more accurate picture of what types of activities are actually taking place.

***Recommendation 3: Follow Up on Allegations Found in Literature Review*** X

Similarly, many allegations are made in the reports and books that we analyzed and summarized. Those allegations are often not substantiated in any way and are inherently time limited by the date of the writing. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation.

Therefore, we recommend follow up to the literature review: for those reports and books that make or cite specific instances of fraud or intimidation, a research effort should be made to follow up on those references to see if and how they were resolved.

***Recommendation 4: Review Complaints File With MyVote1 Project Voter Hotline*** X

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a 1-800 voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint.

In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.<sup>ii</sup> The researchers in charge of this project have done a great deal of work to parse and analyze the data collected through this process, including going through the audio messages and categorizing them by the nature of the complaint. These categories include registration, absentee ballot, poll access, ballot/screen, coercion/intimidation, identification, mechanical, provisional (ballot).

We recommend that further research include making full use of this data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints should provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

**Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice**

✓ CRIMINAL DIVISION

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety in ways it tracks complaints of voter intimidation,<sup>iii</sup> the Section was extremely reluctant to provide the consultants with useful information. Further attempts should be made to obtain relevant data. This includes the telephone logs of complaints the Section keeps and information from the database – the Interactive Case Management (ICM) system – the Section maintains on complaints received and the corresponding action taken. We also recommend that further research include a review and analysis of the observer and monitor field reports from Election Day that must be filed with the Section.

**Recommendation 6: Review Reports Filed By District Election Officers**

✓

Similarly, the consultants believe it would be useful for any further research to include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. As noted above, the DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

**Recommendation 7: Attend Ballot Access and Voting Integrity Symposium**

✗

The consultants also believe it would be useful for any further activity in this area to include attendance at the next Ballot Access and Voting Integrity Symposium. According to the Department,<sup>iv</sup>

Prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices are required to attend annual training conferences on fighting election fraud and voting rights abuses... These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity

Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. As a result of these conferences, there is a nationwide increase in Department expertise relating to the prosecution of election crimes and the enforcement of voting rights.

By attending the symposium researchers could learn more about the following:

- How District Election Officers are trained, e.g. what they are taught to focus their resources on, how they are instructed to respond to various types of complaints
- How information about previous election and voting issues is presented
- How the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants

***Recommendation 8: Employ Academic or Individual to Conduct Statistical Research*** ✓

Included in this report is a summary of various methodologies political scientists and others suggested to measure voter fraud and intimidation. While we note the skepticism of the Working Group in this regard, we nonetheless recommend that in order to further the mission of providing unbiased data, further activity in this area include an academic institution and/or individual that focuses on sound, statistical methods for political science research.

***Recommendation 9: Explore Improvements to Federal Law***

Finally, consultant Tova Wang recommends that future researchers review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

According to Craig Donsanto, long-time Director of the Election Crimes Branch, Public Integrity Section, Criminal Division of the U.S. Department of Justice:

As with other statutes addressing voter intimidation, in the absence of any jurisprudence to the contrary, it is the Criminal Division's position that section 1973gg-10(1) applies only to intimidation which is accomplished through the use of threats of physical or economic duress. Voter "intimidation" accomplished through less drastic means may present violations of the Voting Rights Act, 42 U.S.C. § 1973i(b), which are enforced by the Civil Rights Division through noncriminal remedies.<sup>v</sup>

Mr. Donsanto reiterated these points to us on several occasions, including at the working group meeting.

7. MAYBE BUT TOO SOON TO TELL

As a result, researchers should examine if there is some way in which current law might be revised or new laws passed that would reach voter intimidation that does not threaten the voter physically or financially, but rather threatens the voter's right to vote as a tangible value in itself. Such an amendment or law would reach all forms of voter intimidation, no matter if it is motivated by race, party, ethnicity or any other criteria. The law would then *potentially* cover, for example, letters and postcards with language meant to deter voters from voting and both pre-election and Election Day challengers that are clearly mounting challenges solely on illegitimate bases.

In the alternative to finding a way to criminalize such behavior, researchers might examine ways to invigorate measures to deter and punish voter intimidation under the civil law. For example, there might be a private right of action created for voters or groups who have been subjected to intimidation tactics in the voting process. Such an action could be brought against individual offenders; any state or local actor where there is a pattern of repeated abuse in the jurisdiction that such officials did not take sufficient action against; and organizations that intentionally engage in intimidating practices. As a penalty upon finding liability, civil damages could be available plus perhaps attorney's fees.

Another, more modest measure would be, as has been suggested by Ana Henderson and Christopher Edley,<sup>vi</sup> to bring parity to fines for violations under the Voting Rights Act. Currently the penalty for fraud is \$10,000 while the penalty for acts to deprive the right to vote is \$5,000.

### **Working Group Recommendations**

#### ***Recommendation 1: Employ Observers To Collect Data in the 2006 and/or 2008 Elections*** X

At the working group meeting, there was much discussion about using observers to collect data regarding fraud and intimidation at the polls in the upcoming elections. Mr. Ginsberg recommended using representatives of both parties for the task. Mr. Bauer and others objected to this, believing that using partisans as observers would be unworkable and would not be credible to the public.

There was even greater concern about the difficulties in getting access to poll sites for the purposes of observation. Most states strictly limit who can be in the polling place. In addition, there are already so many groups doing observation and monitoring at the polls, administrators might object. There was further concern that observers would introduce a variable into the process that would impact the outcome. The very fact that observers were present would influence behavior and skew the results.

Moreover, it was pointed out, many of the problems we see now with respect to fraud and intimidation does not take place at the polling place, e.g. absentee ballot fraud and deceptive practices. Poll site monitoring would not capture this activity. Moreover, with

increased use of early voting, poll site monitoring might have to go on for weeks to be effective, which would require tremendous resources.

Mr. Weinberg suggested using observers in the way they are utilized in international elections. Such observers come into a jurisdiction prior to the election, and use standardized forms at the polling sites to collect data.

**Recommendation 2: Do a Study on Absentee Ballot Fraud**

X ALL OR NOTHING

The working group agreed that since absentee ballot fraud is the main form of fraud occurring, and is a practice that is great expanding throughout the country, it would make sense to do a stand-alone study of absentee ballot fraud. Such a study would be facilitated by the fact that there already is a great deal of information on how, when, where and why such practices are carried out based on cases successfully prosecuted. Researchers could look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

**Recommendation 3: Use Risk Analysis Methodology to Study Fraud<sup>1</sup>**

? PROBABLY NOT WOULD NOT SERVE OUR PURPOSES

Working group members were supportive of one of the methodologies recommended for studying this issue, risk analysis. As Mr. Bauer put it, based on the assumption that people act rationally, do an examination of what types of fraud people are most likely to commit, given the relative costs and benefits. In that way, researchers can rank the types of fraud that are the easiest to commit at the least cost with the greatest effect, from most to least likely to occur. This might prove a more practical way of measuring the problems than trying to actually get a number of acts of fraud and/or intimidation occurring. Mr. Greenbaum added that one would want to examine what conditions surrounding an election would be most likely to lead to an increase in fraud. Mr. Rokita objected based on his belief that the passions of partisanship lead people to not act rationally in an election.

**Recommendation 4: Conduct Research Using Database Comparisons**

NOT OUR PLACE

Picking up on a suggestion made by Spencer Overton and explained in the suggested methodology section, Mr. Hearne recommended studying the issue using statistical database matching. Researchers should compare the voter roll and the list of people who actually voted to see if there are “dead” and felon voters. Because of the inconsistent quality of the databases, however, a political scientist would need to work in an appropriate margin of error when using such a methodology.

**Recommendation 5: Conduct a Study of Deceptive Practices**

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of

CIVIL - DO WE WANT TO WANT TO THIS?

<sup>1</sup> See Appendix C, and section on methodology

0307

groups, including the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices, which may be available for review and analysis. This is also an area in which there is often tangible evidence, such as copies of the flyers and postcards themselves. All of this information should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

**Recommendation 6: Study Use of HAVA Administrative Complaint Procedure As Vehicle for Measuring Fraud and Intimidation**

POSSIBLE,

The EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

**Recommendation 7: Examine the Use of Special Election Courts**

X NOT OUR PLACE AT THIS TIME  
① THING AT A TIME.

Given that many state and local judges are elected, it may be worth exploring whether special election courts that are running before, during and after election day would be an effective means of disposing with complaints and violations in an expeditious manner. Pennsylvania employs such a system, and the EAC should consider investigating how well it is working to deal with fraud and intimidation problems.

DRAFT

## Key Working Group Observations and Concerns

### Working Group Observations

1. ***The main problems today are structural barriers to voting and administrative error.*** Mr. Perez observed that, in accordance with the research, the biggest issues today are structural barriers to voting, not stealing votes. Election administrators share this view. Election fraud is negligible, and to the extent it occurs, it needs to be prosecuted with stronger criminal laws. The biggest problem is properly preparing people, which is the responsibility of election administrators.
2. ***Most fraud and intimidation is happening outside of the polling place.*** Mr. Greenbaum observed that with respect to both voter fraud and voter suppression, such as deceptive practices and tearing up voter registration forms, most of that is taking place outside of the polling place.
3. ***This issue cannot be addressed through one study or one methodology alone.*** Mr. Weinberg observed that since there is such a variety in types of fraud and intimidation, one solution will not fit all. It will be impossible to obtain data or resolve any of these problems through a single method.
4. ***The preliminary research conducted for this project is extremely valuable.*** Several of the working group members complimented the quality of the research done and although it is only preliminary, thought it would be useful and informative in the immediate future.
5. ***The Department of Justice is exploring expanding its reach over voter suppression activities.*** In the context of the conversation about defining voter intimidation, Mr. Donsanto pointed out that while voter intimidation was strictly defined by the criminal law, his section is beginning to explore the slightly different concept of vote suppression, and how to pursue it. He mentioned the phone-jamming case in New Hampshire as an initial success in this effort. He noted that he believes that vote suppression in the form of deceptive practices ought to be a crime and the section is exploring ways to go after it within the existing statutory construct. Mr. Bauer raised the example of a party sending people dressed in paramilitary outfits to yell at people as they go to the polls, telling them they have to show identification. Mr. Donsanto said that under the laws he has to work with today, such activity is not considered corrupt. He said that his lawyers are trying to “bend” the current laws to address aggravated cases of vote suppression, and the phone-jamming case is an example of that. Mr. Donsanto said that within the Department, the term vote “suppression” and translating it into a crime is a “work in progress.”

6. **Registration fraud does not translate into vote fraud.** Ms. Rogers, Mr. Donsanto and others stated that although phony voter registration applications turned in by people being paid by the form was a problem, it has not been found in their experience to lead to fraudulent voters at the polls. Ms. Rogers said such people were motivated by money, not defrauding the election.
7. **Handling of voter fraud and intimidation complaints varies widely across states and localities.** Ms. Rogers and others observed that every state has its own process for intake and review of complaints of fraud and intimidation, and that procedures often vary within states. The amount of authority secretaries of state have to address such problems also is different in every state. Mr. Weinberg stated he believed that most secretaries of state did not have authority to do anything about these matters. Participants discussed whether secretaries ought to be given greater authority so as to centralize the process, as HAVA has mandated in other areas.

### Working Group Concerns

1. Mr. Rokita questioned whether the purpose of the present project ought to be on assessing the level of fraud and where it is, rather than on developing methods for making such measurements. He believed that methodology should be the focus, “rather than opinions of interviewees.” He was concerned that the EAC would be in a position of “adding to the universe of opinions.”
2. Mr. Rokita questioned whether the “opinions” accumulated in the research “is a fair sampling of what’s out there.” Ms. Wang responded that one of the purposes of the research was to explore whether there is a method available to actually quantify in some way how much fraud there is and where it is occurring in the electoral process. Mr. Rokita replied that “Maybe at the end of the day we stop spending taxpayer money or it’s going to be too much to spend to find that kind of data. Otherwise, we will stop it here and recognize there is a huge difference of opinion on that issue of fraud, when it occurs is obtainable, and that would possibly be a conclusion of the EAC.” Ms. Sims responded that she thought it would be possible to get better statistics on fraud and there might be a way of “identifying at this point certain parts in the election process that are more vulnerable, that we should be addressing.”
3. Mr. Rokita stated that, “We’re not sure that fraud at the polling place doesn’t exist. We can’t conclude that.”
4. Mr. Rokita expressed concern about working with a political scientist. He believes that the “EAC needs to be very careful in who they select, because all the time and effort and money that’s been spent up to date and would be spent in the future could be invalidated by a wrong selection in the eyes of some group.”

### **Appendix 3**

## **Excerpt from “Machinery of Democracy,” a Brennan Center Report**

### **APPENDIX C**

#### **BRENNAN CENTER TASK FORCE ON VOTING SYSTEM SECURITY, LAWRENCE NORDEN, CHAIR**

**Excerpted from pp. 8-19**

### **METHODOLOGY**

The Task Force concluded, and the peer review team at NIST agreed, that the best approach for comprehensively evaluating voting system threats was to: (1) identify and categorize the potential threats against voting systems, (2) prioritize these threats based upon an agreed upon metric (which would tell us how difficult each threat is to accomplish from the attacker’s point of view), and (3) determine, utilizing the same metric employed to prioritize threats, how much more difficult each of the catalogued attacks would become after various sets of countermeasures are implemented.

This model allows us to identify the attacks we should be most concerned about (*i.e.*, the most practical and least difficult attacks). Furthermore, it allows us to quantify the potential effectiveness of various sets of countermeasures (*i.e.*, how difficult the least difficult attack is after the countermeasure has been implemented). Other potential models considered, but ultimately rejected by the Task Force, are detailed in Appendix B.

### **IDENTIFICATION OF THREATS**

The first step in creating a threat model for voting systems was to identify as many potential attacks as possible. To that end, the Task Force, together with the participating election officials, spent several months identifying voting system vulnerabilities. Following this work, NIST held a Voting Systems Threat Analysis Workshop on October 7, 2005. Members of the public were invited to write up and post additional potential attacks. Taken together, this work produced over 120 potential attacks on the three voting systems. They are detailed in the catalogs annexed.<sup>20</sup> Many of the attacks are described in more detail at <http://vote.nist.gov/threats/papers.htm>.

The types of threats detailed in the catalogs can be broken down into nine categories: (1) the insertion of corrupt software into machines prior to Election Day; (2) wireless and other remote control attacks on voting machines on Election Day; (3) attacks on tally servers; (4) miscalibration of voting machines; (5) shut off of voting machine features intended to assist voters; (6) denial of service attacks; (7) actions by corrupt poll workers or others at the polling place to affect votes cast; (8) vote buying schemes; (9) attacks on ballots or VVPT. Often, the actual attacks

involve some combination of these categories. We provide a discussion of each type of attack in “Categories of Attacks,” *infra* at pp. 24–27.

### **PRIORITIZING THREATS: NUMBER OF INFORMED PARTICIPANTS AS METRIC**

Without some form of prioritization, a compilation of the threats is of limited value. Only by prioritizing these various threats could we help election officials identify which attacks they should be most concerned about, and what steps could be taken to make such attacks as difficult as possible. As discussed below, we have determined the level of difficulty for each attack where the attacker is attempting to affect the outcome of a close statewide election.<sup>21</sup>

There is no perfect way to determine which attacks are the least difficult, because each attack requires a different mix of resources – well-placed insiders, money, programming skills, security expertise, *etc.* Different attackers would find certain resources easier to acquire than others. For example, election fraud committed by local election officials would always involve well-placed insiders and a thorough understanding of election procedures; at the same time, there is no reason to expect such officials to have highly skilled hackers or first-rate programmers working with them. By contrast, election fraud carried out by a foreign government would likely start with plenty of money and technically skilled attackers, but probably without many conveniently placed insiders or detailed knowledge of election procedures.

Ultimately, we decided to use the “number of informed participants” as the metric for determining attack difficulty. An attack which uses fewer participants is deemed the easier attack.

We have defined “informed participant” as someone whose participation is needed to make the attack work, and who knows enough about the attack to foil or expose it. This is to be distinguished from a participant who unknowingly assists the attack by performing a task that is integral to the attack’s successful execution without understanding that the task is part of an attack on voting systems.

The reason for using the security metric “number of informed participants” is relatively straightforward: the larger a conspiracy is, the more difficult it would be to keep it secret. Where an attacker can carry out an attack by herself, she need only trust herself. On the other hand, a conspiracy that requires thousands of people to take part (like a vote-buying scheme) also requires thousands of people to keep quiet. The larger the number of people involved, the greater the likelihood that one of them (or one who was approached, but declined to take part) would either inform the public or authorities about the attack, or commit some kind of error that causes the attack to fail or become known.

Moreover, recruiting a large number of people who are willing to undermine the integrity of a statewide election is also presumably difficult. It is not hard to imagine two or three people agreeing to work to change the outcome of an election. It seems far less likely that an attacker could identify and employ hundreds or thousands of similarly corrupt people without being discovered.

We can get an idea of how this metric works by looking at one of the threats listed in our catalogs: the vote-buying threat, where an attacker or attackers pay individuals to vote for a particular candidate. This is Attack Number 26 in the PCOS Attack Catalog<sup>22</sup> (though this attack would not be substantially different against DREs or DREs w/ VVPT).<sup>23</sup> In order to work under our current types of voting systems, this attack requires (1) at least one person to purchase votes, (2) many people to agree to sell their votes, and (3) some way for the purchaser to confirm that the voters she pays actually voted for the candidate she supported. Ultimately, we determined that, while practical in smaller contests, a vote-buying attack would be an exceptionally difficult way to affect the outcome of a statewide election. This is because, even in a typically close statewide election, an attacker would need to involve thousands of voters to ensure that she could affect the outcome of a statewide race.<sup>24</sup>

For a discussion of other metrics we considered, but ultimately rejected, see Appendix C.

## **DETERMINING NUMBER OF INFORMED PARTICIPANTS**

### **DETERMINING THE STEPS AND VALUES FOR EACH ATTACK**

The Task Force members broke down each of the catalogued attacks into its necessary steps. For instance, Attack 12 in the PCOS Attack Catalog is “Stuffing Ballot Box with Additional Marked Ballots.”<sup>25</sup> We determined that, at a minimum, there were three component parts to this attack: (1) stealing or creating the ballots and then marking them, (2) scanning marked ballots through the PCOS scanners, probably before the polls opened, and (3) modifying the poll books in each location to ensure that the total number of votes in the ballot boxes was not greater than the number of voters who signed in at the polling place.

Task Force members then assigned a value representing the minimum number of persons they believed would be necessary to accomplish each goal. For PCOS Attack 12, the following values were assigned:<sup>26</sup>

**Minimum number required to steal or create ballots: 5 persons total.**<sup>27</sup>

**Minimum number required to scan marked ballots: 1 per polling place attacked.**

**Minimum number required to modify poll books: 1 per polling place attacked.**<sup>28</sup>

After these values were assigned, the Brennan Center interviewed several election officials to see whether they agreed with the steps and values assigned to each attack.<sup>29</sup> When necessary, the values and steps were modified. The new catalogs, including attack steps and values, were then reviewed by Task Force members. The purpose of this review was to ensure, among other things, that the steps and values were sound.

These steps and values tell us how difficult it would be to accomplish a *single attack in a single polling place*. They do not tell us how many people it would take to change the outcome of an election successfully – that depends, of course, on specific facts about the jurisdiction: how many votes are generally recorded in each polling

place, how many polling places are there in the jurisdiction, and how close is the race? For this reason, we determined that it was necessary to construct a hypothetical jurisdiction, to which we now turn.

**NUMBER OF INFORMED PARTICIPANTS NEEDED TO CHANGE STATEWIDE ELECTION**

We have decided to examine the difficulty of each attack in the context of changing the outcome of a reasonably close statewide election. While we are concerned by potential attacks on voting systems in any type of election, we are most troubled by attacks that have the potential to affect large numbers of votes. These are the attacks that could actually change the outcome of a statewide election with just a handful of attack participants.

We are less troubled by attacks on voting systems that can only affect a small number of votes (and might therefore be more useful in local elections). This is because there are many non-system attacks that can also affect a small number of votes (*i.e.*, sending out misleading information about polling places, physically intimidating voters, submitting multiple absentee ballots, *etc.*). Given the fact that these non-system attacks are likely to be less difficult in terms of number of participants, financial cost, risk of detection, and time commitment, we are uncertain that an attacker would target *voting machines* to alter a small number of votes.

In order to evaluate how difficult it would be for an attacker to change the outcome of a statewide election, we created a composite jurisdiction. The composite jurisdiction was created to be representative of a relatively close statewide election. We did not want to examine a statewide election where results were so skewed toward one candidate (for instance, the re-election of Senator Edward M. Kennedy in 2000, where he won 73% of the vote<sup>30</sup>), that reversing the election results would be impossible without causing extreme public suspicion. Nor did we want to look at races where changing only a relative handful of votes (for instance, the Governor's race in Washington State in 2004, which was decided by a mere 129 votes<sup>31</sup>) could affect the outcome of an election; under this scenario, many of the potential attacks would involve few people, and therefore look equally difficult.

We have named our composite jurisdiction "the State of Pennasota." The State of Pennasota is a composite of ten states: Colorado, Florida, Iowa, Ohio, New Mexico, Pennsylvania, Michigan, Nevada, Wisconsin and Minnesota. These states were chosen because they were the ten "battleground" states that Zogby International consistently polled in the spring, summer, and fall 2004.<sup>32</sup> These are statewide elections that an attacker would have expected, ahead of time, to be fairly close.

We have also created a composite election, which we label the "Governor's Race" in Pennasota. The results of this election are a composite of the actual results in the same ten states in the 2004 Presidential Election.

We have used these composites as the framework by which to evaluate the difficulty of the various catalogued attacks.<sup>33</sup> For instance, we know a ballot-box stuffing attack would require roughly five people to create and mark fake ballots, as

well as one person per polling place to stuff the boxes, and one person per polling place to modify the poll books. But, in order to determine how many informed participants would be needed to affect a statewide race, we need to know how many polling places would need to be attacked.

The composite jurisdiction and composite election provide us with information needed to answer these questions: *i.e.*, how many extra votes our attackers would need to add to their favored candidate's total for him to win, how many ballots our attackers can stuff into a particular polling place's ballot box without arousing suspicion (and related to this, how many votes are generally cast in the average polling place), how many polling places are there in the state, *etc.* We provide details about both the composite jurisdiction and election in the section entitled "Governor's Race, State of Pennasota, 2007," *infra* at pp 20–27.

#### LIMITS OF INFORMED PARTICIPANTS AS METRIC

Of the possible metrics we considered, we believe that measuring the number of people who know they are involved in an attack (and thus could provide evidence of the attack to the authorities and/or the media), is the best single measure of attack difficulty; as already discussed, we have concluded that the more people an attacker is forced to involve in his attack, the more likely it is that one of the participants would reveal the attack's existence and foil the attack, perhaps sending attackers to jail. However, we are aware of a number of places where the methodology could provide us with questionable results.

By deciding to concentrate on size of attack team, we mostly ignore the need for other resources when planning an attack. Thus, a software attack on DREs which makes use of steganography<sup>34</sup> to hide attack instruction files (*see* "DRE w/ VVPT Attack No.1a", discussed in greater detail, *infra* at pp. 62–65) is considered easier than an attack program delivered over a wireless network at the polling place (*see* discussion of wireless networks, *infra* at pp. 85–91). However, the former attack probably requires a much more technologically sophisticated attacker.

Another imperfection with this metric is that we do not have an easy way to represent how much choice the attacker has in finding members of his attack team. Thus, with PCOS voting, we conclude that the cost of subverting a routine audit of ballots is roughly equal to the cost of intercepting ballot boxes in transit and substituting altered ballots (*see* discussion of PCOS attacks, *infra* at pp. 77–83). However, subverting the audit team requires getting a specific set of trusted people to cooperate with the attacker. By contrast, the attacker may be able to decide which precincts to tamper with based on which people he has already recruited for his attack.

In an attempt to address this concern, we considered looking at the number of "insiders" necessary to take part in each attack. Under this theory, getting five people to take part in a conspiracy to attack a voting system might not be particularly difficult. But getting five well-placed county election officials to take part in the attack would be (and should be labeled) the more difficult of the two attacks. Because, for the most part, the low-cost attacks we have identified do not necessarily involve well placed insiders (but could, for instance, involve one of many people with access to commercial off the shelf software ("COTS") during development

or at the vendor), we do not believe that using this metric would have substantially changed our analysis.<sup>35</sup>

Finally, these attack team sizes do not always capture the logistical complexity of an attack. For example, an attack on VVPT machines involving tampering with the voting machine software and also replacing the paper records in transit requires the attacker to determine what votes were falsely produced by the voting machine and print replacement records in time to substitute them. While this is clearly possible, it raises a lot of operational difficulties – a single failed substitution leaves the possibility that the attack would be detected during the audit of ballots.

We have tried to keep these imperfections in mind when analyzing and discussing our least difficult attacks.

We suspect that much of the disagreement between voting officials and computer security experts in the last several years stems from a difference of opinion in prioritizing the difficulty of attacks. Election officials, with extensive experience in the logistics of handling tons of paper ballots, have little faith in paper and understand the kind of breakdowns in procedures that lead to traditional attacks like ballot box stuffing; in contrast, sophisticated attacks on computer voting systems appear very difficult to many of them. Computer security experts understand sophisticated attacks on computer systems, and recognize the availability of tools and expertise that makes these attacks practical to launch, but have no clear idea how they would manage the logistics of attacking a paper-based system. Looking at attack team size is one way to bridge this difference in perspective.

## **EFFECTS OF IMPLEMENTING COUNTERMEASURE SETS**

The final step of our threat analysis is to measure the effect of certain countermeasures against the catalogued attacks. How much more difficult would the attacks become once the countermeasures are put into effect? How many more informed participants (if any) would be needed to counter or defeat these countermeasures?

Our process for examining the effectiveness of a countermeasure mirrors the process for determining the difficulty of an attack: we first asked whether the countermeasure would allow us to detect an attack with near certainty. If we agreed that the countermeasure would expose the attack, we identified the steps that would be necessary to circumvent or defeat the countermeasure. For each step to defeat the countermeasure, we determined the number of additional informed participants (if any) that an attacker would need to add to his team. As with the process for determining attack difficulty, the Brennan Center interviewed numerous election officials to see whether they agreed with the steps and values assigned. When necessary, the values and steps for defeating the countermeasures were altered to reflect the input of election officials.

## **COUNTERMEASURES EXAMINED**

### **BASIC SET OF COUNTERMEASURES**

The first set of countermeasures we looked at is the “Basic Set” of countermeasures. This Basic Set was derived from security survey responses<sup>36</sup> we received

from county election officials around the country, as well as additional interviews with more than a dozen current and former election officials. Within the Basic Set of countermeasures are the following procedures:

### **Inspection**

The jurisdiction is not knowingly using any uncertified software that is subject to inspection by the Independent Testing Authority (often referred to as the “ITA”).<sup>37</sup>

### **Physical Security for Machines**

- Ballot boxes (to the extent they exist) are examined (to ensure they are empty) and locked by poll workers immediately before the polls are opened.
- Before and after being brought to the polls for Election Day, voting systems for each county are locked in a single room, in a county warehouse.
- The warehouse has perimeter alarms, secure locks, video surveillance and regular visits by security guards.
- Access to the warehouse is controlled by sign-in, possibly with card keys or similar automatic logging of entry and exit for regular staff.
- Some form of “tamper evident” seals are placed on machines before and after each election.
- The machines are transported to polling locations five to fifteen days before Election Day.

### **Chain of Custody/Physical Security of Election Day Records**

- At close of the polls, vote tallies for each machine are totaled and compared with number of persons that have signed the poll books.
- A copy of totals for each machine is posted at each polling place on Election Night and taken home by poll workers to check against what is posted publicly at election headquarters, on the web, in the papers, or elsewhere.<sup>38</sup>
- All audit information (*i.e.*, Event Logs, VVPT records, paper ballots, machine printouts of totals) that is not electronically transmitted as part of the unofficial upload to the central election office, is delivered in official, sealed and hand-delivered information packets or boxes. All seals are numbered and tamper-evident.
- Transportation of information packets is completed by two election officials representing opposing parties who have been instructed to remain in joint custody of the information packets or boxes from the moment it leaves the precinct to the moment it arrives at the county election center.

030764

- Each polling place sends its information packets or boxes to the county election center separately, rather than having one truck or person pick up this data from multiple polling locations.
- Once the sealed information packets or boxes have reached the county election center, they are logged. Numbers on the seals are checked to ensure that they have not been replaced. Any broken or replaced seals are logged. Intact seals are left intact.
- After the packets and/or boxes have been logged, they are provided with physical security precautions at least as great as those listed for voting machines, above. Specifically, for Pennasota, we have assumed the room in which the packets are stored have perimeter alarms, secure locks, video surveillance and regular visits by security guards and county police officers; and access to the room is controlled by sign-in, possibly with card keys or similar automatic logging of entry and exit for regular staff.

#### Testing<sup>39</sup>

- An Independent Testing Authority has certified the model of voting machine used in the polling place.
- Acceptance Testing<sup>40</sup> is performed on machines at time, or soon after they are received by County.
- Pre-election Logic and Accuracy<sup>41</sup> testing is performed by the relevant election official.
- Prior to opening the polls, every voting machine and vote tabulation system is checked to see that it is still configured for the correct election, including the correct precinct, ballot style, and other applicable details.

#### **REGIMEN FOR AUTOMATIC ROUTINE AUDIT PLUS BASIC SET OF COUNTERMEASURES.**

The second set of countermeasures is the Regimen for an Automatic Routine Audit Plus Basic Set of Countermeasures.

Some form of routine auditing of voter-verified paper records occurs in 12 states, to test the accuracy of electronic voting machines. They generally require between 1 and 10% of all precinct voting machines to be audited after each election. <sup>42</sup>

Jurisdictions can implement this set of countermeasures only if their voting systems produce some sort of voter-verified paper record of each vote. This could be in the form of a paper ballot, in the case of PCOS, or a voter-verified paper trail (“VVPT”), in the case of DREs.

We have assumed that jurisdictions take the following steps when conducting an Automatic Routine Audit (when referring to this set of assumptions “Regimen for an Automatic Routine Audit”):

### **The Audit**

- Leaders of the major parties in each county are responsible for selecting a sufficient number of audit-team members to be used in that county.<sup>43</sup>
- Using a highly transparent random selection mechanism (*see* point ii, below), the voter-verified paper records for between a small percentage of all voting machines in the State are selected for auditing.
- Using a transparent random selection method, auditors are assigned to the selected machines (two or three people, with representatives of each major political party, would comprise each audit team).
- The selection of voting machines, and the assignment of auditors to machines, occurs immediately before the audits take place. The audits take place as soon after polls close as possible – for example, at 9 a.m. the morning after polls close.
- Using a transparent random selection method, county police officers, security personnel and the video monitor assigned to guard the voter-verified records are chosen from a large pool of on-duty officers and employees on election night.
- The auditors are provided the machine tallies and are able to see that the county tally reflects the sums of the machine tallies before the start of the inspection of the paper.
- The audit would include a tally of spoiled ballots (in the case of VVPT, the number of cancellations recorded), overvotes, and undervotes.

### **Transparent Random Selection Process**

In this report, we have assumed that random auditing procedures are in place for both the Regimen for an Automatic Routine Audit and Regimen for Parallel Testing. We have further assumed procedures to prevent a single, corrupt person from being able to fix the results. This implies a kind of transparent and public random procedure.

For the Regimen for an Automatic Routine Audit there are at least two places where transparent, random selection processes are important: in the selection of precincts to audit, and in the assignment of auditors to the precincts they will be auditing.

Good election security can employ Transparent Random Selection in other places with good effect:

- the selection of parallel testers from a pool of qualified individuals.
- the assignment of police and other security professionals from on-duty lists, to monitor key materials, for example, the VVPT records between the time that they arrive at election central and the time of the completion of the ARA.

030766

If a selection process for auditing is to be trustworthy and trusted, ideally:

- The whole process will be publicly observable or videotaped;<sup>44</sup>
- The random selection will be publicly verifiable, *i.e.*, anyone observing will be able to verify that the sample was chosen randomly (or at least that the number selected is not under the control of any small number of people); and
- The process will be simple and practical within the context of current election practice so as to avoid imposing unnecessary burdens on election officials.

There are a number of ways that election officials can ensure some kind of transparent randomness. One way would be to use a state lottery machine to select precincts or polling places for auditing. We have included two potential examples of transparent random selection processes in Appendix F. These apply to the Regimen for Parallel Testing as well.

#### **REGIMEN FOR PARALLEL TESTING PLUS BASIC SET OF COUNTERMEASURES**

The final set of countermeasures we have examined is “Parallel Testing” plus the Basic Set of countermeasures. Parallel Testing, also known as election-day testing, involves selecting voting machines at random and testing them as realistically as possible during the period that votes are being cast.

#### **Parallel Testing**

In developing our set of assumptions for Parallel Testing, we relied heavily upon interviews with Jocelyn Whitney, Project Manager for Parallel Testing in the State of California, and conclusions drawn from this Report.<sup>45</sup> In our analysis, we assume that the following procedures would be included in the Parallel Testing regimen (when referring to this regimen “Regimen for Parallel Testing”) that we evaluate:

- At least two of each DRE model (meaning both vendor and model) would be selected for Parallel Testing;
- At least two DREs from each of the three largest counties would be parallel tested;
- Counties to be parallel tested would be chosen by the Secretary of State in a transparent and random manner.
- Counties would be notified as late as possible that machines from one of their precincts would be selected for Parallel Testing;<sup>46</sup>
- Precincts would be selected through a transparent random mechanism;
- A video camera would record testing;
- For each test, there would be one tester and one observer;

030767

- Parallel Testing would occur at the polling place;
- The script for Parallel Testing would be generated in a way that mimics voter behavior and voting patterns for the polling place;
- At the end of the Parallel Testing, the tester and observer would reconcile vote totals in the script with vote totals reported on the machine.

### **Transparent Random Selection Process**

We further assume that the same type of transparent random selection process that would be used for the Regimen for Automatic Routine Audit would also be employed for the Regimen for Parallel Testing to determine which machines would be subjected to testing on Election Day.

## **APPENDIX C**

### **ALTERNATIVE SECURITY METRICS CONSIDERED**

#### **Dollars Spent**

The decision to use the number of informed participants as the metric for attack level difficulty came after considering several other potential metrics. One of the first metrics we considered was the dollar cost of attacks. This metric makes sense when looking at attacks that seek financial gain – for instance, misappropriating corporate funds. It is not rational to spend \$100,000 on the misappropriation of corporate funds if the total value of those funds is \$90,000. Ultimately, we rejected this metric as the basis for our analysis because the dollar cost of the attacks we considered were dwarfed by both (1) current federal and state budgets, and (2) the amounts currently spent legally in state and federal political campaigns.

#### **Time of Attack**

The relative security of safes and other safety measures are often rated in terms of “time to defeat.” This was rejected as metric of difficulty because it did not seem relevant to voting systems. Attackers breaking into a house are concerned with the amount of time it might take to complete their robbery because the homeowners or police might show up. With regard to election fraud, many attackers may be willing to start months or years before an election if they believe they can control the outcome. As discussed *supra* at pp. 35–48, attackers may be confident that they can circumvent the independent testing authorities and other measures meant to identify attacks, so that the amount of time an attack takes becomes less relevant.

DRAFT

**EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY**

**INTRODUCTION**

Voting fraud and voter intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and voter intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the correct application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the existence and enforcement of election crimes in the United States.

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

*e initial*  
EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,<sup>1</sup> who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and the need to assure a bipartisan representation in this study. The consultants and EAC staff were charged with (1) researching the current state of information on the topic of voting fraud and voter intimidation; (2) developing a uniform definition of voting

---

<sup>1</sup> Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

030771

fraud and voter intimidation; and (3) proposing recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to National Republican  
Campaign Committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and voter intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

### **Reports and Studies of Voting fraud and Intimidation**

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.

### Books

- John Fund, *Stealing Elections: How Voting fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or voter intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 Presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

030775

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, including legal practices that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. For example, a number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### **Interviews with Experts**

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Lori Minnite**  
Barnard College, Columbia University

**Neil Bradley**  
ACLU Voting Rights Project

**Pat Rogers**  
Attorney, New Mexico

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Chandler Davidson**  
Rice University

030776

**Tracey Campbell**

Author, *Deliver the Vote*

**Douglas Webber**

Assistant Attorney General, Indiana

**Heather Dawn Thompson**

Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**

Assistant General Counsel,  
American Center for Voting Rights

**Robin DeJarnette**

Executive Director,  
American Center for Voting Rights

**Harry Van Sickle**

Commissioner of Elections,  
Pennsylvania

**Tony Sirvello**

Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Sandler**

Counsel  
Democratic National Committee

**John Ravitz**

Executive Director  
New York City Board of Elections

**Sharon Priest**

Former Secretary of State, Arkansas

**Kevin Kennedy**

Executive Director  
State Board of Elections, Wisconsin

**Evelyn Stratton**

Justice  
Supreme Court of Ohio

**Joseph Rich**

Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Craig Donsanto**

Director, Public Integrity Section  
U.S. Department of Justice

**John Tanner**

Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it is the most likely type of fraud to be discovered, there are stiff penalties associated with this type of fraud, and it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

030777

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix "3".

### **Case Law and Statutes**

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix "4".

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

### New Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud**, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

“Voting” is the act of casting votes to decide an issue or contest. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voting fraud,” it means fraudulent or deceptive acts committed to influence the act of voting. Thus, a voter who intentionally impersonates another registered voter and attempts to

vote for that person would be committing “voting fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voting fraud” does not capture a myriad of other criminal acts that are related to elections which are not related to the act of voting and/or do not involve an act of deception. For example, “voting fraud” does not capture actions or willful inaction in the voter registration process. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the act of voting nor an act of deception.

To further complicate matters, the phrases “voting fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voting fraud” and “voter intimidation” that would serve as the basis for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

### **The Definition of an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or on election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

***Acts of Deception***

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making or knowingly possessing a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a materially false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

***Acts of Coercion***

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

030781

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

***Acts of Damage or Destruction***

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;

030782

- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

### **What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes,” and actions that do not rise to the level of criminal activity, such as a misdemeanor, relative felony or felony, are not “election crimes.”

## **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such

activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

030784

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

030785

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

030796

### **Accepted Recommendations**

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

#### ***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition 0787

of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

***Analyze Survey Data in Light of State Laws and Procedures***

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from

030782

areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

## CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY

voter ~~voting~~ INTRODUCTION

Voting fraud and intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the correct application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun ~~this phase~~ <sup>one</sup> of a comprehensive study on election crimes. In ~~this~~ phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the existence and enforcement of election crimes in ~~this country~~ the United States

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct ~~that type of extensive research~~ <sup>that type</sup> of research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,<sup>1</sup> who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic ~~and~~ <sup>the need</sup> to assure a bipartisan representation in this study. The consultants and EAC staff were charged ~~to~~ <sup>to</sup> (1) research the current state of information on the topic of voting   
 with

<sup>1</sup> Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

030790

fraud and voter intimidation; (2) develop a uniform definition of voting fraud and voter intimidation; and (3) propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to National Republican  
Campaign Committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and intimidation, as well as summaries of the interviews ~~that they~~ conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

*the consultants*

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and voter intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

### **Reports and Studies of Voting fraud and Intimidation**

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.

- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, "Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?" A Report to the Center for Voting Rights & Protection, September, 2004.
- Alec Ewald, "A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law," The Sentencing Project, November 2005.
- American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.
- The Advancement Project, "America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy" November 7, 2001
- The Brennan Center and Professor Michael McDonald "Analysis of the September 15, 2005 Voting fraud Report Submitted to the New Jersey Attorney General," The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."
- Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at [http://www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html)
- People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>
- Craig Donsanto, "Prosecution of Electoral Fraud under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.

- General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," Report to Congressional Requesters, September 2005.
- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.
- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

### Books

- John Fund, *Stealing Elections: How Voting fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or voter intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement <sup>concerning</sup> what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, ~~over~~ <sup>including</sup> legal practices, that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. <sup>For example,</sup> a number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### Interviews with Experts

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Lori Minnite**  
Barnard College, Columbia University

**Neil Bradley**  
ACLU Voting Rights Project

**Pat Rogers**  
Attorney, New Mexico

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Chandler Davidson**  
Rice University

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it was the most likely type of fraud to be discovered, the stiff penalties associated with this type of fraud, and ~~it~~ it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state’s attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “3”.

### **Case Law and Statutes**

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “4”.

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

### New Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud, n. 1.** A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usually a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms, <sup>EAC defines</sup> ~~to form a definition of~~ “voting fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter

registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voting fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voting fraud” does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, “voting fraud” does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases “voting fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voting fraud” and “voter intimidation” that would serve as the basis for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

### **The Definition of an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to, qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

### *Acts of Deception*

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;
- Intentionally making a false affidavit, swearing falsely; or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote; requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

### *Acts of Coercion*

- Using, threatening to use, or causing to be used force, coercion, violence, restraint; or inflicting, threatening to inflict; or causing to be inflicted damage harm; or loss; upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other things of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

***Acts of Damage or Destruction***

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;

030801

- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

### **What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes,” and actions that do not rise to the level of criminal activity, such as a misdemeanor, relative felony or felony, are not “election crimes.”

## **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such

activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

030804

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

### **Accepted Recommendations**

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

#### ***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition

of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

***Analyze Survey Data in Light of State Laws and Procedures***

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from

areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

## CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

**EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY**

Comment [M1]: HAVA §241(b)(6) refers to voting (rather than voter) fraud and 241(b)(7) refers to voter intimidation. Do we want to do a global change from voter fraud to voting fraud, or leave it as is?

**INTRODUCTION**

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and at times even the correct application of state or federal laws to the voting process. Past study of this topic has been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, EAC has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the true existence and enforcement of election crimes in this country.

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the U.S. Election Assistance Commission (EAC) to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation, listed in §§241(b)(6) and (7), were topics ~~was a topic~~ that EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. That type of research is well beyond the basic understanding that had to be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Tova Wang and Job Serebrov, who along with EAC staff and interns conducted the research that forms the basis of this report. ~~The c~~ Consultants were chosen based upon their experience with the topic and ~~In addition, consultants were chosen to assure a bipartisan representation in this study. The consultants and EAC staff were charged to: (1) to research the current state of information on the topics of voter fraud and voter intimidation; (2) to develop a uniform definition of voter fraud and voter intimidation; and (3) to propose recommended strategies for researching this subject.~~

*Page 99's  
Comments*

EAC consultants reviewed existing studies, articles, reports and case law on voter fraud and intimidation. In addition, EAC consultants conducted interviews with selected experts in the field. Last, EAC consultants and staff presented their study to a working group that provided feed back. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to national Republican  
campaign committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, relevant cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited to produce this final report.

**Comment [M2]:** The consultants did not really summarize existing law.

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. What the world knows about these issues comes largely from a very limited body of reports, articles and books.

There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

### **Reports and Studies of Voter Fraud and Intimidation**

Over the years, there have been a number of studies and reports published conducted about ~~the concepts of~~ voter fraud and voter intimidation. EAC consultants reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “\_\_”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.
- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.

- Alec Ewald, "A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law," The Sentencing Project, November 2005.
- American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.
- The Advancement Project, "America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy" November 7, 2001
- The Brennan Center and Professor Michael McDonald "Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General," The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."
- Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at [http://www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html)
- People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>
- Craig Donsanto, "Prosecution of Electoral Fraud under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.
- General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," Report to Congressional Requesters, September 2005.

- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," *Demos: A Network of Ideas and Action*, 2003.
- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

#### **Books**

- John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Foiled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation in the U.S. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District

Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate. Generally, speaking there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation and even legal practices that they allege suppress the vote.

One point of agreement is that absentee voting and voter registration by ~~third-party~~ nongovernmental groups has created opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with voters of a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

**Comment [M3]:** The term "third-party" is often used for minor political parties. As most of the voter registration drive problems have involved major party operatives and advocacy groups, "nongovernmental" seems a better choice.

### Interviews with Experts

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Pat Rogers**  
Attorney, New Mexico

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Lori Minnite**  
Barnard College, Columbia University

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Neil Bradley**  
ACLU Voting Rights Project

**Chandler Davidson**  
Rice University

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Tracey Campbell**  
Author, *Deliver the Vote*

**Douglas Webber**  
Assistant Attorney General, Indiana

**Heather Dawn Thompson**

Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**  
Assistant General Counsel,  
American Center for Voting Rights

**Robin DeJarnette**  
Executive Director,  
American Center for Voting Rights

**Harry Van Sickle**  
Commissioner of Elections,  
Pennsylvania

**Joseph Sandler**  
Counsel  
Democratic National Committee

**John Ravitz**  
Executive Director  
New York City Board of Elections

**Sharon Priest**  
Former Secretary of State, Arkansas

**Kevin Kennedy**  
Executive Director  
State Board of Elections, Wisconsin

**Evelyn Stratton**  
Justice  
Supreme Court of Ohio

**Tony Sirvello**  
Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Rich**  
Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Craig Donsanto**  
Director, Public Integrity Section  
U.S. Department of Justice

**John Tanner**  
Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud, citing as reasons that it was the most likely type of fraud to be discovered, and that there are stiff penalties associated with this type of fraud, and that it was an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, the location of polling places, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction. They can only prosecute election crimes related to elections with a federal candidate on the ballot and those committed by a public official under color of law involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement. ~~Some including those that allege that prosecutions are not sufficiently aggressive. Others and those that feel that the current laws are sufficient for prosecuting fraud and intimidation.~~

A summary of the each of the interviews conducted is attached as Appendix “ \_\_\_ ”.

### **Case Law and Statutes**

Consultants reviewed over 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from appeal courts. This is not a surprising situation, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “ \_\_\_ ”.

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and

- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charge and prosecutions of voter fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding of what is and what is not “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. In order to come up with a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

### New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud**, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Comment [M4]: Sic? Or is this a typo?

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person

who knowingly provides false information to a voter about the location of the voter's polling place commits fraud on the voter.

The phrase "voter fraud" does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, "voter fraud" does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly refuses to register to vote an otherwise legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases "voter fraud" and "voter intimidation" are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the civil division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as "voter fraud" and "voter intimidation" that would serve as the basis for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use legal election processes are well beyond the resources available to EAC. As such, EAC has defined "election crimes," a phrase that captures all crimes related to the voter registration and voting processes.

#### What is an Election Crime for Purposes of this Study

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process, eligible persons to be excluded from the election process, ineligible votes to be cast in an election, eligible votes not to be cast or counted, or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception; acts of coercion; acts of damage or destruction; and failures or refusals to act.

Generally speaking, election crimes can be committed by voters, candidates, election officials, or any other members of the public that desire to criminally impact the result of an election. However, crimes that are based upon knowing or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

**Comment [M5]:** So this means that we will not look at civil actions involving Voting Rights Act violations, right?

The victim of an election crime can be a voter, a group of voters, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states ~~and~~ or the federal government consider criminal activity related to elections.

***Acts of Deception***

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, regarding the date and time of the election or regarding a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance possess a ballot outside of the polling location;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate at one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once at the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

***Acts of Coercion***

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other valuable thing to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his vote in any election, or who requires or demands an examination or inspection by himself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for registering to vote.

***Acts of Damage or Destruction***

- Destroying completed voter registration applications that are necessary for the applicants to exercise their right to vote;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments for the purpose of enabling the voter to vote his or her ballot;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as he intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

Formatted: Bullets and Numbering

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;

- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

**What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal es-or civil violations related to campaign finance contribution limitations and prohibitions, as well as reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. The federal agency responsible for administering federal campaign finance law and monitoring the status of state campaign finance law is the Federal Election Commission (FEC).

**Comment [M6]:** Do we want to restrict our study to election crimes that affect federal elections only? HAVA §241(b)(6) specifically refers to “Nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office” [Emphasis added.] That would mean we would also stay away from election crimes affecting ballot issues and elections with no federal candidate on the ballot.

Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes.” Last, actions that do not rise to the level of criminal activity, that is a misdemeanor, relative felony or felony, are not “election crimes.”

**RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can study the existence of election crimes. EAC consultants developed recommendations. In addition, the working group and some of the persons interviewed as a part of this study provided recommendations.

***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a 1-800 voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints may provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety ~~in~~of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and monitor field reports from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud

and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants

***Recommendation 8: Conduct Statistical Research***

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have historically been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets. The sample must include a random set of counties where there have and have not been a large number of allegations

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls in on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and

concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers can use that risk analysis to rank the types of fraud based on the ease of commission and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether deceased voters or felons are noted as having actually voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

### Accepted Recommendations

There has never been a comprehensive national study that gathered data regarding all claims, charges and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine what volume and type of election crimes are being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

#### *Survey Chief Election Officers Regarding Administrative Complaints*

Likely sources of complaints concerning voting crimes are the administrative complaint processes that states were required to establish to as a part of complying with HAVA §402. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official and these complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have

identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

### CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and political pundits. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC through its clearinghouse role will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention and prosecution of election crimes.

been filed, investigated and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses can be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

**Comment [M7]:** Need to include survey of laws and procedures used to ID and prosecute election crime.

Several chief state election officials have developed investigation units focused on receiving, investigating and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. This data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

**Comment [M8]:** Need to include survey of laws and procedures used to ID and prosecute election crime.

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

***Analyze Survey Data in Light of State Laws and Procedures***

**Comment [M9]:** Would this include the verification of information about current federal and state laws and procedures that may be used to pursue violations? We would need this information in order to better understand the data we collect.

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter

People for the American Way and the NAACP, "The Long Shadow of Jim Crow," December 6, 2004.

This report describes the pervasive and repeated practices of voter intimidation and vote suppression that have taken place in very recent years and during contemporary American history. It goes on to describe the numerous instances of voter intimidation and suppression during the 2000 election, the 1990s, the 1980s and back through the civil rights movement of the 1960s, putting current efforts in historical perspective.

Describing the chronology of events in this way demonstrates the developing patterns and strategic underpinnings of the tactics used over the last forty years. **Examples include:**

- Florida law enforcement questioned elderly African American voters in Orlando regarding the 2003 mayoral race, which had already been resolved, shortly before the 2004 election;
- the 2004 Florida felon purge list;
- the case of South Dakota in 2004 in which Native Americans were improperly and illegally required to show photo identification at the polls or denied the right to vote, and similar improper demands for ID from minorities in other parts of the country;
- the use of challengers in minority districts in many locations;
- the challenge to the right of African American students to vote in Texas in 2004;
- the presence of men looking like law enforcement challenging African American voters at the polls in Philadelphia in 2003;
- the distribution of flyers in Louisiana and elsewhere in a number of elections over the last few years in minority areas telling them to vote on the wrong day; and
- the FBI investigation into thousands of Native American voters in South Dakota in 2002.

Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.

Argues that "the discriminatory use of so-called 'ballot security' programs" has been a reoccurring scandal since the passage of the Voting Rights Act of 1965. These programs are deceptively presented as preventing voter fraud and thereby furthering good government. However, McDonald states "but far too often they [the ballot security programs] are actually designed to suppress minority voting -- and for nakedly partisan purposes." Blames the federal government as well as the states for use of suspect ballot security programs. McDonald cites several ballot security efforts that were really disguised attempts at minority voter suppression:

- SD-DOJ "voting integrity initiative".
- AR - poll watchers driving away voters in predominantly black precincts by taking photos of them and demanding identification during pre-election day balloting.
- MI - "spotters" at heavily Democratic precincts was an effort to intimidate black voters and suppress Democratic turnout
- SC – one county's officials instituted a new and unauthorized policy allowing them to challenge voters who gave rural route or box numbers for their registration address (disproportionately affecting African Americans).
- the 1981 gubernatorial election anti-fraud initiative leading to the well known consent decree prohibiting the Republicans from repeating this, a similar Republican effort in Louisiana in 1986 in Senator John Breaux's race which again resulted in prohibition by a state court judge, and a similar effort by Republicans in Senator Jesse Helms 1990 reelection.

States that HAVA "contains provisions that may enhance the opportunities for harassment and intimidation of minorities through ballot-security

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**programs** (especially voter ID). Indicates that the crux of the problem is **law enforcement of federal voters rights laws** ("there is no record of the purveyors of any ballot-security program being criminally prosecuted by federal authorities for interfering with the right to vote." The only positive case law McDonald cited was a decision by the United States Court of Appeals for the Eighth Circuit that affirmed "an award of damages ranging from \$500 to \$2,000, payable by individual poll officials to each of seven black voters who had been unlawfully challenged, harassed, denied assistance in voting or purged from the rolls in the town of Crawfordville [Arkansas].")  
Recommends that Congress and the states should adopt "nondiscriminatory, evenly applied measures to ensure the integrity of the ballot."

Wisconsin Legislative Audit Bureau, "An Evaluation: Voter Registration Elections Board" Report 05-12, September, 2005.

Current voter registration practices were determined to be insufficient to ensure the accuracy of voter registration lists used by poll workers or to prevent ineligible persons from registering to vote. **In six municipalities where sufficient information was available, there was 105 instances of potentially improper or fraudulent voting in the 2004 elections. These included: 98 ineligible felons who may have voted; 2 individuals who may have voted twice; 1 voter who may have been underage; and 4 absentee ballots that should not have been counted because the voters who cast them died before Election Day** (all but dead voters were forwarded to appropriate district attorneys for investigation). Statutes require that clerks send cards to everyone who registers by mail or on Election Day. However, only 42.7 % of the 150 municipalities surveyed sent cards to both groups, and 46 % did not send any address verification cards to those registering to vote on Election Day in November 2004. Statutes also require clerks to provide the local district attorney with the names of any Election Day registrants whose cards are undeliverable at the address provided. However, only 24.3 % of the clerks who sent cards also forwarded names from undeliverable cards to district attorneys. District attorneys surveyed indicated that they require more information than is typically provided to conduct effective investigations. To ensure that voter registration lists contain only the names of qualified electors, municipal clerks are required by statute to remove or inactivate the names of individuals who have not voted in four years, to update registration information for individuals who move or change their names, and to remove or inactivate the names of deceased individuals. They are also required to notify registered voters before removing their names from registration lists. These statutory requirements are not consistently followed:

- 85.3 % of municipalities removed the names of inactive voters from their voter registration lists;
- 71.4 % sometimes or always notified registered voters before removing their names; and
- 54.0 % reported removing the names of ineligible felons.
- registration lists contain duplicate records and the names of ineligible individuals (e.g.; more than 348,000 electronic voter registration records from eight municipalities were reviewed, identifying 3,116 records that appear to show individuals who are registered more than once in the same municipality).

### Recommendations:

- adjust the early registration deadline to provide clerks more time to prepare registration lists;
- establish more stringent requirements for special registration deputies, including prohibiting compensation based on the number of individuals registered;
- establish uniform requirements for demonstrating proof of residence for all registrants;
- provide municipal clerks with more flexibility in the use of address verification cards;
- Authorize civil penalties for local election officials and municipalities that fail to comply with election laws; and
- implement mandatory elections training requirements for municipal clerks.

Report also recognized that the new **HAVA registration procedures would help with existing registration problems.**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Milwaukee Police Department, Milwaukee County District Attorney's Office, Federal Bureau of Investigation, United States Attorney's Office "Preliminary Findings of Joint Task Force Investigating Possible Election Fraud," May 10, 2005.

On January 26, 2005, the Milwaukee Police Department, Milwaukee County District Attorney's Office, Federal Bureau of Investigation, and the United States Attorney's Office formed a task force to investigate alleged voting irregularities during the November 2004 elections. The task force has made the following specific determinations based on evidence examined to date:

- **evidence of more than 100 individual instances of suspected double-voting, voting in names of persons who likely did not vote, and/or voting in names believed to be fake.**
- **more than 200 felons voted when they were not eligible to do so. (In order to establish criminal cases, the government must establish willful violations in individual instances);**
- **persons who had been paid to register voters as "deputy registrars" falsely listed approximately 65 names in order to receive compensation for the registrations. (The evidence does not indicate that these particular false registrations were later used to cast votes); and,**
- **the number of votes counted from the City of Milwaukee exceeds the number of persons recorded as voting by more than 4,500. (Evidence indicates widespread record keeping errors with respect to recording the number of voters)**

The investigation concentrated on the 70,000+ same-day registrations. It found that a large majority of the reported errors were the result of data entry errors, such as street address numbers being transposed. However, the investigation also found more than 100 instances where votes were cast in a manner suggesting fraud. These include:

- persons with the same name and date of birth recorded as voting more than once;
- persons who live outside Milwaukee, but who used non-existent City addresses to register and vote in the City (141 of them were same day registrants; in several instances, the voter explicitly listed municipality names other than Milwaukee on the registration cards);
- persons who registered and voted with identities and addresses that cannot in any way be linked to a real person;
- persons listed as voting under a name and identity of a person known to be deceased;
- persons whose identities were used to vote, but who in subsequent interviews told task force investigators that they did not, in fact, vote in the City of Milwaukee.

Investigation also found:

- **persons who were paid money to obtain registrations allegedly falsified approximately 65 names on registration forms, allegedly to obtain more money for each name submitted.**
- **more than 200 felons who were not eligible to vote in the 2004 election, but who are recorded as having done so.**
- **same-day registrations were accepted in which the card had incomplete information that would help establish identity. For example: 48 original cards for persons listed as voting had no name; 548 had no address; 28 did not have signatures; and another 23 cards had illegible information (part of approximately 1,300 same-day registrations for which votes were cast, but which election officials could not authenticate as proper voters within the City).**
- **the post-election misfiling or loss of original green registration cards that were considered duplicates, but that in fact corresponded to additional votes. These cards were used to record votes, but approximately 100 cards of interest to investigators can no longer be located. In addition, other original green registration cards continue to be found.**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

National Commission on Federal Election Reform, "Building Confidence in U.S. Elections," Center for Democracy and Election Management, American University, September 2005.

Among the observations made that are relevant to the EAC study of fraud and intimidation are the following:

- The November 2004 elections showed that irregularities and fraud still occur.
- Failure to provide voters with such basic information as their registration status and their polling site location raises a barrier to voting as significant as inconsistent procedures on provisional ballots or voter ID requirements.
- **There is no evidence of extensive fraud in U.S. elections or of multiple voting, but both occur, and it could affect the outcome of a close election.**
- The Commission is concerned that the different approaches to identification cards might prove to be a serious impediment to voting.
- **Voter registration lists are often inflated by the inclusion of citizens who have moved out of state but remain on the lists.** Moreover, under the National Voter Registration Act, names are often added to the list, but counties and municipalities often do not delete the names of those who moved. Inflated voter lists are also caused by phony registrations and efforts to register individuals who are ineligible. At the same time, inaccurate purges of voter lists have removed citizens who are eligible and are properly registered.
- Political party and nonpartisan voter registration drives generally contribute to the electoral process by generating interest in upcoming elections and expanding participation. However, they are occasionally abused. There were **reports in 2004 that some party activists failed to deliver voter registration forms of citizens who expressed a preference for the opposing party.**
- **Vote by mail raises concerns about privacy**, as citizens voting at home may come under pressure to vote for certain candidates, and it **increases the risk of fraud.**
- **While election fraud is difficult to measure, it occurs.** The U.S. Department of Justice has launched more than 180 investigations into election fraud since October 2002. These investigations have resulted in **charges for multiple voting, providing false information on their felon status, and other offenses** against 89 individuals and in convictions of 52 individuals. The convictions related to a **variety of election fraud offenses, from vote buying to submitting false voter registration information and voting-related offenses by non-citizens.** In addition to the federal investigations, **state attorneys general and local prosecutors handle cases of election fraud. Other cases are never pursued because of the difficulty in obtaining sufficient evidence for prosecution or because of the low priority given to election fraud cases.**
- **Absentee ballots remain the largest source of potential voter fraud**
- **Non-citizens have registered to vote in several recent elections**
- **The growth of "third-party" (unofficial) voter registration drives in recent elections has led to a rise in reports of voter registration fraud.**
- **Many states allow the representatives of candidates or political parties to challenge a person's eligibility to register or vote or to challenge an inaccurate name on a voter roll. This practice of challenges may contribute to ballot integrity, but it can have the effect of intimidating eligible voters, preventing them from casting their ballot, or otherwise disrupting the voting process.**

Its pertinent recommendations for reform are as follows:

- **Interoperable state voter databases** are needed to facilitate updates in the registration of voters who move to another state and to eliminate duplicate registrations, which are a source of potential fraud.
- **Voters should be informed of their right to cast a provisional ballot** if their name does not appear on the voter roll, or if an election official asserts that the individual is not eligible to vote, but **States should take additional and effective steps to inform voters as to the location of their precinct**
- The Commission recommends that states use **"REAL ID" cards for voting purposes.**
- **To verify the identity of voters who cast absentee ballots, the voter's signature on the absentee ballot can be matched with a digitized**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**version of the signature that the election administrator maintains.** While such signature matches are usually done, they should be done consistently in all cases, so that election officials can verify the identity of every new registrant who casts an absentee ballot.

- Each **state needs to audit its voter registration files** to determine the extent to which they are accurate (with correct and current information on individuals), complete (including all eligible voters), valid (excluding ineligible voters), and secure (with protections against unauthorized use). This can be done by matching voter files with records in other state agency databases in a regular and timely manner, contacting individuals when the matches are inconclusive, and conducting survey research to estimate the number of voters who believe they are registered but who are not in fact listed in the voter files.
- Each **state should oversee political party and nonpartisan voter registration drives** to ensure that they operate effectively, that registration forms are delivered promptly to election officials, that all completed registration forms are delivered to the election officials, and that none are "culled" and omitted according to the registrant's partisan affiliation. Measures should also be adopted to track and hold accountable those who are engaged in submitting fraudulent voter registrations. Such oversight might consist of training activists who conduct voter registration drives and tracking voter registration forms to make sure they are all accounted for. In addition, states should apply a criminal penalty to any activist who deliberately fails to deliver a completed voter registration form.
- **Investigation and prosecution of election fraud should include those acts committed by individuals, including election officials, poll workers, volunteers, challengers or other nonvoters associated with the administration of elections, and not just fraud by voters.**
- **In July of even-numbered years, the U.S. Department of Justice should issue a public report on its investigations of election fraud.** This report should specify the numbers of allegations made, matters investigated, cases prosecuted, and individuals convicted for various crimes. **Each state's attorney general and each local prosecutor should issue a similar report.**
- **The U.S. Department of Justice's Office of Public Integrity should increase its staff to investigate and prosecute election-related fraud.**
- In addition to the penalties set by the Voting Rights Act, it **should be a federal felony for any individual, group of individuals, or organization to engage in any act of violence, property destruction (of more than \$500 value), or threatened act of violence that is intended to deny any individual his or her lawful right to vote or to participate in a federal election.**
- **To deter systemic efforts to deceive or intimidate voters, the Commission recommends federal legislation to prohibit any individual or group from deliberately providing the public with incorrect information about election procedures for the purpose of preventing voters from going to the polls.**
- **States should define clear procedures for challenges, which should mainly be raised and resolved before the deadline for voter registration.** After that, challengers will need to defend their late actions. **On Election Day, they should direct their concerns to poll workers, not to voters directly, and should in no way interfere with the smooth operation of the polling station.**
- **State and local jurisdictions should prohibit a person from handling absentee ballots other than the voter, an acknowledged family member, the U.S. Postal Service or other legitimate shipper, or election officials.** The practice in some states of allowing candidates or party workers to pick up and deliver absentee ballots should be eliminated.
- All states should **consider passing legislation that attempts to minimize the fraud that has resulted from "payment by the piece" to anyone in exchange for their efforts in voter registration, absentee ballot, or signature collection.**
- Nonpartisan structures of election administration are very important, and **election administrators should be neutral, professional, and impartial.**
- No matter what institutions are responsible for conducting elections, **conflict-of-interest standards should be introduced for all federal, state, and local election officials.** Election officials should be prohibited by federal and/or state laws from serving on any political campaign committee, making any public comments in support of a candidate, taking a public position on any ballot measure, soliciting campaign funds, or otherwise campaigning for or against a candidate for public office. A decision by a secretary of state to serve as co-chair of his or her party's presidential

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

election committee would clearly violate these standards.

The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law "Response to the Report of the 2005 Commission on Federal Election Reform," September 19, 2005.

### Recommendation on Voter Identification -

- Report premises its burdensome identification proposals on the need to ensure ballot integrity and on the existence of or potential for widespread fraud. However, the **Report admits that there is simply "no evidence" that the type of fraud that could be solved by stricter voter identification** – individual voters who misrepresent their identity at the polls – is a widespread problem.
- The photo ID proposal guards against only one type of fraud: individuals arriving at the polls to vote using false information, such as the name of another registered voter, or a recent but not current address. Since the costs of this form of fraud are extremely high (federal law provides for up to five years' imprisonment), and the benefits to any individual voter are extremely low, it is highly unlikely that this will ever occur with any frequency. **The limited types of fraud that could be prevented by a Real ID requirement are extremely rare and difficult.**
- In the most comprehensive survey of alleged election fraud to date, Professor Loraine Minnite and David Callahan have shown that the **incidence of individual voter fraud at the polls is negligible**. A few prominent examples support their findings. In Ohio, a statewide survey found four instances of ineligible persons voting or attempting to vote in 2002 and 2004, out of 9,078,728 votes cast – a rate of 0.00004%. Earlier this year, Georgia Secretary of State Cathy Cox stated that she could not recall one documented case of voter fraud relating to the impersonation of a registered voter at the polls during her ten-year tenure as Secretary of State or Assistant Secretary of State.
- The Report attempts to support its burdensome identification requirements on four specific examples of purported fraud or potential fraud. **None of the Report's cited examples of fraud stand up under closer scrutiny**. This response report goes through each instance of fraud raised by the Commission report and demonstrates that in each case the allegation in fact turned out later not to be true or the fraud cited was not of the type that would be addressed by a photo identification requirement.
- The Report fails to provide a good reason to create greater hurdles for voters who vote at the polls than for those who vote absentee. Despite the fact that **absentee ballots are more susceptible to fraud than regular ballots**, the Report exempts absentee voters from its proposed Real ID and proof of citizenship requirements.

### Other points in ID requirement:

- **Report does not explain why the goals of improved election integrity will not be met through the existing provisions in the Help America Vote Act of 2002 (HAVA).**
- Report fails to consider alternative measures to advance its goals that are less restrictive to voters. To the extent that any limited fraud **by individuals at the polls does trickle into the system, it can be addressed by far less restrictive alternatives**. The first step is to recognize that only voters who appear on the registration list may vote a regular ballot. Proper cleaning of registration lists – and proper use of the lists at the poll–will therefore go a long way toward ensuring that every single ballot is cast by an eligible voter.
- In addition to the **better registration lists that full implementation will provide, better record keeping and administration at the polls will reduce the limited potential for voting by ineligible persons**. In the unlikely event that implementation of current law is not able to wipe out whatever potential for individual fraud remains, there are several effective and less burdensome alternatives to the Report's Real ID recommendation that received wholly insufficient consideration.
- Costs - If required as a precondition for voting, photo identification would operate as a de facto poll tax that could disenfranchise low-income voters. To alleviate this burden, the Report appropriately recommends that the "Real ID" card itself be issued free of charge. Nevertheless, the

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

000000

percentage of Americans without the documentary proof of citizenship necessary to obtain Real IDs is likely to remain high because the requisite documents are both expensive and burdensome to obtain. (Each of the documents an individual is required to show in order to obtain a "Real ID" card or other government-issued photo ID card costs money or presumes a minimal level of economic resources. Unless the federal and all state governments waive the cost of each of these other forms of identification, the indirect costs of photo IDs will be even greater than their direct costs. In addition, since government-issued IDs may only be obtained at specified government offices, which may be far from voters' residences and workplaces, individuals seeking such IDs will have to incur transportation costs and the costs of taking time off from work to visit those offices during often-abbreviated business hours.)

- Since voting generally depends on the voter's address, and since many states will not accept IDs that do not bear an individual's current voting address, an additional 41.5 million Americans each year will have ID that they may not be able to use to vote.
- The burden would fall disproportionately on the elderly, the disabled, students, the poor, and people of color.
- The ID recommendations reduce the benefits of voter registration at disability and other social service agencies provided by the National Voter Registration Act of 1993. Individuals who seek to register at those offices—which generally do not issue IDs Census data demonstrate that African Americans and Latinos are more than three times more likely than whites to register to vote at a public assistance agency, and that whites are more likely than African Americans and Latinos to register when seeking a driver's license. Accordingly, the voter registration procedure far more likely to be used by minorities than by whites will no longer provide Americans with full eligibility to vote.
- The Report's proposal to use Real ID as a condition of voting is so excessive that it would prevent eligible voters from proving their identity with even a valid U.S. passport or a U.S. military photo ID card. The Report's proposal to use Real ID as a condition of voting is so excessive that it would prevent eligible voters from proving their identity with even a valid U.S. passport or a U.S. military photo ID card

**Recommendation on Database Information Sharing Across States -serious efficacy, privacy, and security concerns raised by a nationally distributed database of the magnitude it contemplates.** These problems are exacerbated by the Report's recommendation that an individual's Social Security number be used as the broadly disseminated unique voting identifier.

**Recommendation on Voting Rights of Ex-Felons - This recommendation would set a standard more generous than the policies of the most regressive thirteen states in the nation but more restrictive than the remaining thirty-seven. The trend in the states is toward extension of the franchise.**

Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, "Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?" A Report to the Center for Voting Rights & Protection, September, 2004.

Focuses on **vote suppression through "ballot security programs"** (programs that, in the name of protecting against vote fraud, almost exclusively target heavily black, Latino, or Indian voting precincts and have the intent or effect of discouraging or preventing voters in those precincts from casting a ballot). Noteworthy characteristics of these programs:

- **focus on minority precincts almost exclusively**
- **is often on only the flimsiest evidence that vote fraud is likely to be perpetrated in such precincts;**
- **in addition to encouraging the presence of sometimes intimidating white Republican poll watchers or challengers who may slow down voting lines and embarrass potential voters by asking them humiliating questions,** these programs have sometimes posted people in official-looking uniforms with badges and side arms who question voters about their citizenship or their registration
- **warning signs may be posted near the polls, or radio ads may be targeted to minority listeners** containing dire threats of prison terms for people who are not properly registered—messages that seem designed to put minority voters on the defensive.
- sometimes **false information about voting qualifications** is sent to minority voters through the mail."
- **doing mailings, collecting returned materials, and using that as a basis for creating challenger lists** and challenging voters at the polls,

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

started in the 1950s and continues to today (problem with this practice is that reasons for a mailing to be returned include a wrong address, out of date or inaccurate addresses, poor mail delivery in minority areas, and matching mistakes)

Provide numerous examples from the last 50 years to demonstrate his thesis, going through the historical development of Republican ballot security programs from the 1950s through to the present (including more recent incidents, such as 1981 in New Jersey, 1982 Dallas, Louisiana 1986, Houston 1986, Hidalgo 1988 Orange County 1988, North Carolina 1990, South Carolina 1980-1990, and South Dakota 2002). Author cites and quotes internal Republican letters and memoranda, primary sources and original documents, media reports, scholarly works, as well as the words of judges' rulings in some of the cases that ended up in litigation to prove his argument. author cites and quotes internal Republican letters and memoranda, primary sources and original documents, media reports, scholarly works, as well as the words of judges' rulings in some of the cases that ended up in litigation to prove his argument.

**Some of the features of vote suppression efforts** put forth by Republicans under the guise of ballot security programs:

1. **An organized, often widely publicized effort to field poll watchers in what Republicans call "heavily Democratic," but what are usually minority, precincts;**
2. **Stated concerns about vote fraud in these precincts, which are occasionally justified but often are not;**
3. **Misinformation and fear campaigns directed at these same precincts, spread by radio, posted signs in the neighborhoods, newspapers, fliers, and phone calls, which are often anonymously perpetrated;**
4. **Posting "official-looking" personnel at polling places, including but not limited to off-duty police—sometimes in uniform, sometimes armed;**
5. **Aggressive face-to-face challenging techniques at the polls that can confuse, humiliate, and intimidate—as well as slow the voting process—in these same minority precincts;**
6. **Challenging voters using inaccurate, unofficial lists of registrants derived from "do-not-forward" letters sent to low-income and minority neighborhoods;**
7. **Photographing, tape recording, or videotaping voters; and**
8. **Employing language and metaphors that trade on stereotypes of minority voters as venal and credulous.**

The report ends with some observations on the state of research on the incidence of fraud, which the author finds lacking. He **suggests that vote suppression of qualified minority voters by officials and partisan poll-watchers, challengers, and uniformed guards should also be considered as included in any definition of election fraud.** Recommends Democrats should not protest all programs aimed at ballot integrity, but rather work with Republicans to find solutions to problems that confront both parties and the system as a whole.

Alec Ewald, "A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law," The Sentencing Project, November 2005.

Presents results from the first nationwide study to document the implementation of American felony disenfranchisement law. Data came from two main sources: a 33-state survey of state elections officials (spring 2004) and telephone interviews with almost one hundred city, county, town, and parish officials drawn from 10 selected states.

### Major Conclusions:

1. **Broad variation and misunderstanding in interpretation and enforcement of voting laws** (more than one-third [37%] of local officials interviewed in ten states either described their state's fundamental eligibility law incorrectly, or stated that they did not know a central aspect of that law. / Local registrars differ in their knowledge of basic eligibility law, often within the same state. Differences also emerge in how they are notified of criminal convictions, what process they use to suspend, cancel, or "purge" voters from the rolls, whether particular documents are required to restore a voter to eligibility, and whether they have information about the criminal background of new arrivals to the state.)
2. **Misdemeanants disenfranchised in at least five states** (the commonly-used term "felon disenfranchisement" is not entirely accurate, since at

03080

least five states – Colorado, Illinois, Michigan, South Carolina, and Maryland -- also formally bar some or all people convicted of misdemeanors from voting [ it is likely that misdemeanants in other states who do retain the formal right to vote could have difficulty exercising that right, given ignorance of their eligibility and the lack of clear rules and procedures for absentee voting by people in jail who have not been convicted of a felony / Maryland excludes persons convicted of many misdemeanors, such as “Unlawful operation of vending machines,” “Misrepresentation of tobacco leaf weight,” and “Racing horse under false name.”)

3. **Significant ambiguities in voting laws (disenfranchisement in Tennessee is dependent on which of five different time periods a felony conviction occurred between 1973 and the present /** in Oregon, disenfranchisement is determined not by conviction or imprisonment for a felony, but for being placed under Department of Corrections supervision / since 1997, some persons convicted of a felony and sentenced to less than 12 months' custody have been sent to county jails and hence, are eligible to vote.
4. **Disenfranchisement results in contradictory policies within states (the “crazy-quilt” pattern of disenfranchisement laws exists even within states /** Alabama and Mississippi have both the most and least restrictive laws in the country, a result which is brought about by the fact that certain felonies result in the loss of voting rights for life, while others at least theoretically permit people in prison to vote / most felonies in Alabama result in permanent disenfranchisement, but drug and DUI offenses have been determined to not involve the “moral turpitude” that triggers the loss of voting rights / in Mississippi, ten felonies result in disenfranchisement, but do not include such common offenses as burglary and drug crimes.
5. **Confusing policies lead to the exclusion of legal voters and the inclusion of illegal voters:** The complexity of state disenfranchisement policies results in frequent misidentification of voter eligibility, largely because officials differ in their knowledge and application of disqualification and restoration law and procedures.
6. **Significant variation and uncertainty in how states respond to persons with a felony conviction from other states:** No state has a systematic mechanism in place to address the immigration of persons with a felony conviction, and there is no consensus among indefinite-disenfranchisement states on whether the disqualification is properly confined to the state of conviction, or should be considered in the new state of residence. Interpretation and enforcement of this part of disenfranchisement law varies not only across state lines, but also from one county to another within states. Local officials have no way of knowing about convictions in other states, and many are unsure what they would do if a would-be voter acknowledged an old conviction. Because there is no prospect of a national voter roll, this situation will continue even after full HAVA implementation.
7. **Disenfranchisement is a time-consuming, expensive practice:** Enforcement requires elections officials to gather records from different agencies and bureaucracies, including state and federal courts, Departments of Corrections, Probation and Parole, the state Board of Elections, the state police, and other counties' elections offices.

### Policy Implications

1. **Policies disenfranchising people living in the community on probation or parole, or who have completed a sentence are particularly difficult to enforce:** States which disenfranchise only persons who are currently incarcerated appear able to enforce their laws more consistently than those barring non-incarcerated citizens from voting.
2. **Given large-scale misunderstanding of disenfranchisement law, many eligible persons incorrectly believe they cannot vote, or have been misinformed by election officials:** More than one-third of election officials interviewed incorrectly described their state's law on voting eligibility. More than 85% of the officials who misidentified their state's law either did not know the eligibility standard or specified that the law was more restrictive than was actually the case.
3. **Occasional violation of disenfranchisement law by non-incarcerated voters not surprising:** Given the complexity of state laws and the number of state officials who lack an understanding of restoration and disqualification procedures, it should come as no surprise that many voters are ignorant of their voting status, a fact that is likely to have resulted in hundreds of persons with a felony conviction registering and voting illegally in recent years.

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

030836

4. Taken together, these findings undermine the most prominent rationale for disenfranchisement: that the policy reflects a strong, clear consensus that persons with a felony conviction are unfit to vote and constitute a threat to the polity: First, when significant numbers of the people who administer elections do not know important aspects of disenfranchisement law, it is hard to conclude that the restriction is necessary to protect social order and the "purity" of the ballot box. Second, because they are all but invisible in the sentencing process, "collateral" sanctions like disenfranchisement simply cannot accomplish the denunciatory, expressive purposes their supporters claim. We now know that disenfranchisement is not entirely "visible" even to the people running American elections. Third, deep uncertainty regarding the voting rights of people with felony convictions who move from one state to another indicates that we do not even know what purpose disenfranchisement is supposed to serve – whether it is meant to be a punishment, or simply a non-penal regulation of the franchise.

Recommendations

1. **Clarify Policies Regarding Out-of-State Convictions:** State officials should clarify their policies and incorporate into training programs the means by which a felony conviction in another state affects an applicant's voting eligibility. For example, sentence-only disenfranchisement states should clarify that newcomers with old felony convictions from indefinite disenfranchisement states are eligible to vote. And those states which bar some people from voting even after their sentences are completed must clarify whether new arrivals with old felony convictions from sentence-only disenfranchisement states are automatically eligible, and must explain what procedures, if any, should be followed for restoration.
2. **Train Election Officials:** Clarify disenfranchisement policies and procedures for all state and local election officials through development of materials and training programs in each state. At a minimum, this should include distribution of posters, brochures and FAQ sheets to local and state elections offices.
3. **Train Criminal Justice Officials:** Provide training on disqualification and restoration policies for all correctional and criminal justice officials, particularly probation and parole staff. Correctional and criminal justice officials should also be actively engaged in describing these policies to persons under criminal justice supervision.
4. **Review Voting Restrictions on Non-Incarcerated People:** Given the serious practical difficulty of enforcing laws disqualifying people who are not incarcerated from voting – problems which clearly include both excluding eligible people from voting and allowing those who should be ineligible to vote – state policymakers should review such policies to determine if they serve a useful public purpose.

American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.

Using court records, police reports and news articles, ACVR Legislative Fund presented this Report documenting hundreds of reported incidents and allegations from around the country. The report **most often alleges voter intimidation and voter registration fraud, and to a lesser degree absentee ballot fraud and vote buying.** This report alleges a coordinated effort by members of some organizations to rig the election system through voter registration fraud, the first step in any vote fraud scheme that corrupts the election process by burying local officials in fraudulent and suspicious registration forms. paid Democrat operatives were far more involved in voter intimidation and suppression activities than were their Republican counterparts during the 2004 presidential election. Identified five cities as "hot spots" which require additional immediate attention, based on the findings of this report and the cities' documented history of fraud and intimidation: Philadelphia, PA, Milwaukee, WI, Seattle, WA, St. Louis/East St. Louis, MO/IL, and Cleveland, OH. Refutes charges of voter intimidation and suppression made against Republican supporters, discusses similar charges against Democrats, details incidents vote fraud and illegal voting and finally discusses problems with vote fraud, voter registration fraud and election irregularities around the country. Recommends:

- **Both national political parties should formally adopt a zero-tolerance fraud and intimidation policy that commits the party to pursuing and fully prosecuting individuals and allied organizations who commit vote fraud or who seek to deter any eligible voter from participating in the election through fraud or intimidation.** No amount of legislative reform can effectively deter those who commit acts of fraud if there is no punishment for the crime and these acts continue to be tolerated.

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- **States should adopt legislation requiring government-issued photo ID at the polls and for any voter seeking to vote by mail or by absentee ballot.** Government-issued photo identification should be readily available to all citizens without cost and provisions made to assure availability of government-issued identification to disabled and low-income citizens.
- **States should adopt legislation requiring that all polling places be fully accessible and accommodating to all voters regardless of race, disability or political persuasion and that polling locations are free of intimidation or harassment.**
- **States should create and maintain current and accurate statewide voter registration databases as mandated by the federal Help America Vote Act ("HAVA") and establish procedures to assure that the statewide voter roll is current and accurate and that the names of eligible voters on the roll are consistent with the voter roll used by local election authorities in conducting the election.**
- **States should adopt legislation establishing a 30-day voter registration cutoff to assure that all voter rolls are accurate and that all registrants can cast a regular ballot on Election Day and the election officials have opportunity to establish a current and accurate voter roll without duplicate or fictional names and assure that all eligible voters (including all recently registered voters) are included on the voter roll at their proper precinct.**
- **States should adopt legislation requiring voter registration applications to be delivered to the elections office within one week of being completed so that they are processed in a timely manner and to assure the individuals registered by third party organizations are properly included on the voter roll.**
- **States should adopt legislation and penalties for groups violating voter registration laws, and provide the list of violations and penalties to all registration solicitors.** Legislation should require those organizations obtaining a voter's registration to deliver that registration to election officials in a timely manner and should impose appropriate penalties upon any individual or organization that obtains an eligible voter's registration and fails to deliver it to election authorities.
- **States should adopt legislation prohibiting "bounty" payment to voter registration solicitors based on the number of registration cards they collect.**

### The Advancement Project, "America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy" November 7, 2001

Written after the 2000 election, thesis of report is that **structural disenfranchisement**—the effect of breakdowns in the electoral system, is the new poll tax. Structural disenfranchisement includes "bureaucratic blunders, governmental indifference, and flagrant disregard for voting rights." Blame for structural disenfranchisement is laid squarely at the feet of **states and localities that "shirk their responsibilities or otherwise manipulate election systems," resulting in voters "either turned away from the polls or their votes are thrown out."** Data and conclusions in the Report are taken from **eight sample case studies** of states and cities across the country and a survey of state election directors that reinforces the findings of the case studies (New York City-in six polling places Chinese translations inverted the Democrats with the Republicans; Georgia-the state computer crashed two weeks before the election, dropping thousands of voters from the rolls; Virginia-registration problems kept an untold number from voting; Chicago-in inner-city precincts with predominately minority populations, almost four out of every ten votes cast for President (in 2000) were discarded; St. Louis-thousands of qualified voters were placed on inactive lists due to an overbroad purge; Florida-a voting list purge of voters whose name and birth date closely resembled those of people convicted of felonies; and, Texas-significant Jim Crow like barriers to minority voting.) Most ballot blockers involve the structural elements of electoral administration: "ill-trained poll workers, failures to process registration cards on time or at all, inaccurate registration rolls, overbroad purges of voter rolls, unreasonably long lines, inaccurate ballot translations and a shortage of translators to assist voters who have limited English language skills."

#### Findings:

- election directors lack the resources to effectively do their jobs and some lack the "ability or will to force local election officials to fix serious

030837

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

030838

problems”;

- election officials are highly under funded and legislatures refuse to grant their requests for more money;
- due to a lack of funds, election officials must use old and inferior equipment and can't improve training or meet structural needs;
- election officials are generally unaware of racial disparities in voting; only three of the 50 state election administrators are non-white.

### Recommendations:

- federal policies that set nationwide and uniform election policies;
- federal guarantee of access to provisional ballots;
- enforcement of voter disability laws;
- automatic restoration of voting rights to those convicted of a crime after they have completed their sentence;
- a centralized data base of voters administered by non-partisan individuals;
- federal standards limiting precinct discarded vote rates to .25 %;
- federal requirements that jurisdiction provide voter education, including how to protect their right to vote; and laws that strengthen the ability of individuals to bring actions to enforce voting rights and anti-discrimination laws.

The Brennan Center and Professor Michael McDonald “Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General,” The Brennan Center for Justice at NYU School of Law, December 2005.

A September 15, 2005 Report submitted to the New Jersey Attorney General included lists of purportedly illegitimate votes in New Jersey in the 2004 general election, including lists of 10,969 individuals who purportedly voted twice and lists of 4,756 voters who were purportedly dead or incarcerated in November 2004. **Analysis of the suspect lists reveals that the evidence submitted does not show what it purports to show: cause for concern that there is serious risk of widespread fraud given the state of the New Jersey voter registration rolls.** These suspect lists were compiled by attempting to match the first name, last name, and birth date of persons on county voter registration files. **Analysis reveals several serious problems with the methodology used to compile the suspect lists that compromise the lists' practical value.** For example, middle initials were ignored throughout all counties, so that “J \_\_\_\_\_ A. Smith” was presumed to be the same person as “J \_\_\_\_\_ G. Smith.” Suffixes were also ignored, so that fathers and sons – like “B \_\_\_\_\_ Johnson” and “B \_\_\_\_\_ Johnson, Jr.” – were said to be the same person. **A presumption that two records with the same name and date of birth must represent the same person is not consistent with basic statistical principles.**

Re Claim of Double Voting by 4,497 Individuals:

- 1,803 of these 4,397 records of ostensibly illegal votes seem to be the product of a glitch in the compilation of the registration files (far more likely that data error is to blame for the doubly logged vote - to irregularities in the data processing and compilation process for one single county);
- another 1,257 entries of the 4,397 records probably represent similar data errors;
- approximately 800 of the entries on the list likely represent different people, with different addresses and different middle initials or suffixes;
- for approximately 200 of the entries in this category, however, less information is available (lack of or differences in middle initial or middle name);
- 7 voters were apparently born in January 1, 1880 – which is most likely a system default for registrations lacking date-of-birth information;
- for 227 voters, only the month and year of birth are listed: this means only that two voters with the same name were born in the same month and year, an unsurprising coincidence in a state of several million people;
- leaves approximately 289 votes cast under the same name and birth date – like votes cast by “P \_\_\_\_\_ S. Rosen,” born in the middle of the baby boom – but from two different addresses. It may appear strange, but there may be two P \_\_\_\_\_ S. Rosens, born on the same date in 1948 – and

such coincidences are surprisingly common. . In a group of just 23 people, it is more likely than not that two will share the same birthday. For 40 people, the probability is 90%. Many, if not most, of the 289 alleged double votes of persons registered at different addresses most likely reflect two separate individuals sharing a first name, last name, middle initial, and birth date.

But there is **no doubt that there are duplicate entries on New Jersey's registration rolls**. It is well known that voter registration rolls contain "deadwood" – registration entries for individuals no longer living at a given address or deceased. There is no evidence, however, that these extra registrations are used for widespread illegal voting. Moreover, **the problem of deadwood will soon be largely resolved: both the National Voter Registration Act of 1993 and the Help America Vote Act of 2002 require states to implement several systems and procedures as of January 1, 2006, that will clean the voter rolls of duplicate or invalid entries while protecting eligible voters from unintended disfranchisement.**

Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005

Study re 2004 election in Ohio. Findings considered related to EAC study:

- **Statewide, 6 %of all voters reported feelings of intimidation: 16 percent of African Americans reported experiencing intimidation versus only 5 %of white voters.**
- **African American voters were 1.2 times more likely than white voters to be required to vote provisionally.** Of provisional voters in Cuyahoga County, 35% were African American, compared to 25% of non-provisional voters, matched by geography.
- Under Ohio law, the only voters who should have been asked for identification were those voting in their first Federal election who had registered by mail but did not provide identification in their registration application. **Although only 7% of all Ohio voters were newly registered (and only a small percentage of those voters registered by mail and failed to provide identification in their registration application), more than one third (37% reported being asked to provide identification.—meaning large numbers of voters were illegally required to produce identification. African American voters statewide were 47% more likely to be required to show identification than white voters. Indeed, 61% of African American men reported being asked to provide identification at the polls.**
- **Scarcity of voting machines caused long lines that deterred many people from voting: 3% of voters who went to the polls left their polling places and did not return due to the long lines; statewide, African American voters reported waiting an average of 52 minutes before voting while white voters reported waiting an average of 18 minutes; overall, 20% of white Ohio voters reported waiting more than twenty minutes, while 44% of African American voters reported doing so.**

The report also includes a useful summary and description of the reports that came through Ohio Election Protection on Election Day, which included a wide variety of problems, including voter intimidation and discrimination.

Pertinent recommendations:

- **codify into law all required election practices**, including requirements for the adequate training of official poll workers
- adopt legislation to **make clear and uniform the rules on voter registration.**
- adopt uniform and clear published standards for the distribution of voting equipment and the assignment of official pollworkers among precincts, to ensure adequate and nondiscriminatory access
- improve **training of official poll workers**
- adopt **clear and uniform rules on the use of, and the counting of, provisional ballots**, and distribute them for public comment well in advance of each election day
- not adopt requirements that voters show identification at the polls, beyond those already required by federal law; **vigorously enforce, to the full extent permitted by state law, a voter's right to vote without showing identification.**

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

038040

- **make voter suppression a criminal offense at the state level**, in all states
- **implement statewide voter lists** in accordance with the Help America Vote Act ("HAVA")
- **expend significantly more resources in educating voters on where, when and how to vote.**
- **partisan officials who volunteer to work for a candidate should not oversee or administer any elections.**

Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."

Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."

Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."

**Supervision of the Justice Department's nationwide response to election crimes:**

Election Crimes Branch oversees the Department's handling of all election crime allegations other than those involving civil rights violations, which are supervised by the Voting Section of the Civil Rights Division. Specifically, the Branch supervises four types of corruption cases: crimes that involve the voting process, crimes involving the financing of federal election campaigns, crimes relating to political shakedowns and other patronage abuses, and illegal lobbying with appropriated funds. Vote frauds and campaign-financing offenses are the most significant and also the most common types of election crimes. The purpose of Headquarters' oversight of election crime matters is to ensure that the Department's nationwide response to election crime is uniform, impartial, and effective. An Election Crimes Branch, headed by a Director and staffed by Section attorneys on a case-by-case basis, was created within the Section in 1980 to handle this supervisory responsibility.

**Voting Fraud:**

During **2002** the Branch assisted United States Attorneys' Offices in Alabama, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Nevada, North Carolina, Rhode Island, South Carolina, South Dakota, Texas, Utah, West Virginia, and Wisconsin in handling vote fraud matters that occurred in their respective districts. During **2003** the Branch assisted United States Attorneys' Offices in Alabama, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, New Jersey, Nevada, North Carolina, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Virgin Islands, West Virginia, and Wisconsin in handling vote fraud matters that occurred in their respective districts. During **2004** the Branch assisted United States Attorneys' Offices in the following states in the handling of vote fraud matters that occurred in their respective districts: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Massachusetts, Maryland, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New Mexico, Nevada, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, South Carolina, South Dakota, Texas, Utah, Virginia, West Virginia, Washington, and Wisconsin. This assistance included evaluating vote fraud allegations to determine whether investigation would produce a prosecutable federal criminal case, helping to structure investigations, providing legal advice concerning the formulation of charges, and assisting in establishing several task force teams of federal and state law enforcement officials to investigate vote fraud matters.

**Litigation:**

The Branch Director or Section attorneys also prosecute selected election crimes, either by assuming total operational responsibility for the case or by handling the case jointly with a United States Attorney's Office. The Section also may be asked to supervise the handling of a case in the event of a partial recusal of the local office. For example, in 2002 the Branch continued to supervise the prosecution of a sheriff and his election attorney for using data from the National Crime Information Center regarding voters' criminal histories to wage an election contest.

**District Election Officer Program:**

The Branch also assists in implementing the Department's long-standing District Election Officer (DEO) Program. This Program is designed to ensure that each of the 93 United States Attorneys' Offices has a trained prosecutor available to oversee the handling of election crime matters within the district and to coordinate district responses with Headquarters regarding these matters. The DEO Program involves the appointment of an Assistant United States Attorney in each federal district to serve a two-year term as a District Election Officer; the training of these prosecutors in the investigation and prosecution of election crimes; and the coordination of election-related initiatives and other law enforcement activities between Headquarters and the field. In addition, the DEO Program is a crucial feature of the Department's nationwide Election Day Program, which occurs in connection with the federal general elections held in November of even-numbered years. The Election Day Program ensures that federal prosecutors and investigators are available both at the Department's Headquarters in Washington and in each district to receive and handle complaints of election irregularities from the public while the polls are open and that the public is aware of how these individuals can be contacted on election day. In 2002 the Department enhanced the DEO Program by establishing a Ballot Integrity Initiative.

**Ballot Integrity Initiative:**

**Beginning in September of 2002**, the Public Integrity Section, acting at the request of the Attorney General, assisted in the implementation of a Ballot Integrity Initiative for the 2002 general election and subsequent elections. This initiative included increasing the law enforcement priority the Department gives to election crimes; holding a special day-long training event in Washington, DC for representatives of the 93 United States Attorneys' Offices; publicizing the identities and telephone numbers of the DEOs through press releases issued shortly before the November elections; and requiring the 93 U.S. Attorneys to communicate the enhanced federal prioritization of election crime matters to state and local election and law enforcement authorities. As part of Ballot Integrity Initiative, on October 8, 2002, the Public Integrity Section and the Voting Rights Section of the Department's Civil Rights Division co-sponsored a Voting Integrity Symposium for District Election Officers representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes used to prosecute such cases. Attorney General John Ashcroft delivered the keynote address on the importance of election crime and ballot integrity enforcement. Assistant Attorney General of the Civil Rights Division Ralph Boyd and Assistant Attorney General of the Criminal Division Michael Chertoff also spoke to attendees on the protection of voting rights and the prosecution of election cases. As part of Ballot Access and Voting Integrity Initiative, on September 23 and 24, 2003, the Public Integrity Section and the Voting Rights Section of the Department's Civil Rights Division co-sponsored a two-day Symposium for DEOs representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes used to prosecute such cases. Assistant Attorney General of the Civil Rights Division Alexander Acosta and Assistant Attorney General of the Criminal Division Christopher A. Wray delivered the keynote addresses on the importance of protecting voting rights and the prosecution of election cases. On July 20 and 21, 2004, the Public Integrity Section and the Voting Section of the Department's Civil Rights Division co-sponsored a two-day symposium for DEOs representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes available to prosecute such cases, and the handling of civil rights matters involving voting. Attorney General John Ashcroft delivered the keynote address on the importance of protecting voting rights and the prosecution of election fraud. In addition, Assistant Attorney General Christopher A. Wray of the Criminal Division and Assistant Attorney General R. Alexander Acosta of the Civil Rights Division addressed conference attendees on voting rights and election fraud enforcement issues respectively.

As a result of the Initiative, during 2002 the number of election crime matters opened by federal prosecutors throughout the country increased significantly, as did the Section's active involvement in election crime matters stemming from the Initiative. At the end of 2002, the Section was supervising and providing advice on approximately 43 election crime matters nationwide. In addition, as of December 31, 2002, 11 matters involving possible election crimes were pending in the Section. During 2002 the Section closed two election crime matters and continued its operational supervision of 8 voting fraud cases (conspiracy to illegally obtain criminal history records to use to challenge voters (AL) and 7 cases of vote buying involving 10 defendants (KY).

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

278030

Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at [http://www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html)

Addresses the role of the United States Department of Justice in matters of election fraud, specifically: what sort of election-related conduct is potentially actionable as a federal crime; what specific statutory theories apply to frauds occurring in elections lacking federal candidates on the ballot, what federalism; procedural, and policy considerations impact on the federalization of this type of case; and how Assistant United States Attorneys should respond to this type of complaint. As a general rule, the federal crime of voter fraud embraces only organized efforts to corrupt of the election process itself: i.e., the registration of voters, the casting of ballots, and the tabulation and certification of election results. Moreover, this definition excludes all activities that occur in connection with the political campaigning process, unless those activities are themselves illegal under some other specific law or prosecutorial theory. This definition also excludes isolated acts of individual wrongdoing that are not part of an organized effort to corrupt the voting process. Mistakes and other gaffs that inevitably occur are not included as voter fraud. Prosecuting election fraud offenses in federal court is further complicated by the constitutional limits that are placed on federal power over the election process. The conduct of elections is primarily a state rather than a federal activity.

### **Four situations where federal prosecution is appropriate:**

1. Where the objective of the conduct is to corrupt the outcome of a federal elective contest, or where the consequential effect of the corrupt conduct impacts upon the vote count for federal office;
2. Where the object of the scheme is to discriminate against racial, ethnic or language minority groups, the voting rights of which have been specifically protected by federal statutes such as the Voting Rights Act, 42 U.S.C. section 1973 et seq.;
3. Where federalization is required in order to redress longstanding patterns of electoral fraud, either at the request of state or local authorities, or in the face of longstanding inaction by state authorities who appear to be unwilling or unable to respond under local law; and,
4. Where there is a factual basis to believe that fraudulent registration or voting activity is sufficiently connected to other forms of criminal activity that perusing the voter fraud angle will yield evidence useful in the prosecution of other categories of federal offense

### **Four advantages to federal prosecution:**

1. Voter fraud investigations are labor intensive - local law enforcement agencies often lack the manpower and the financial resources to take these cases on;
2. Voter fraud matters are always politically sensitive and very high profile endeavors at the local level - local prosecutors (who are usually themselves elected) often shy away from prosecuting them for that reason; the successful prosecution of voter fraud cases demands that critical witnesses be examined under oath before criminal charges based on their testimony are filed.
3. Many states lack the broad grand jury process that exists in the federal system; and
4. The defendants in voter fraud cases are apt to be politicians - or agents of politicians - and it is often impossible for either the government or the defendant to obtain a fair trial in a case that is about politics and is tried to a locally-drawn jury. The federal court system provides for juries to be drawn from broader geographic base, thus often avoiding this problem.

Several prosecutorial theories used by United States Attorneys to federalize election frauds are discussed.

### **Four questions used by prosecutors in evaluating the credibility of election complaints:**

1. does the substance of the complaint assuming it can be proven through investigation - suggest a potential crime;
2. is the complaint sufficiently fact-specific that it provides leads for investigators to pursue;
3. is there a federal statute that can be used to federalize the criminal activity at issue; and,
4. is there a special federal interest in the matter that warrants federalization rather than deferral to state law enforcement.

All federal election investigations must avoid the following: non-interference in elections unless absolutely necessary to preserve evidence; interviewing voters during active voting periods; seizing official election documentation; investigative activity inside open polls; and prosecutors must adhere to 18 U.S.C. section 592, prohibiting the stationing of armed men at places where voting activity is taking place.

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

030843

Election crimes based on race or language minority status are treated as civil rights matters under the Voting Rights Act.

People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>

Election Protection 2004 was the nation's most far-reaching effort to protect voter rights before and on Election Day. The historic nonpartisan program included: (1) a toll-free number, 1-866-OUR-VOTE, with free, immediate and multi-lingual assistance to help voters with questions about registration and voting, and assist voters who encounter barriers to the ballot box; (2) distribution of more than five million "Voters' Bills of Rights" with state-specific information; (3) 25,000 volunteers, including 6,000 lawyers and law students, who watched for problems and assisted voters on the spot at more than 3,500 predominantly African-American and Latino precincts with a history of disenfranchisement in at least 17 states; and (4) civil rights lawyers and advocates represented voters in lawsuits, preserved access to the polls, exposed and prevented voter intimidation, worked with election officials to identify and solve problems with new voting machines, technology and ballot forms, and protected voter rights in advance and on Election Day.

**Voter Intimidation and Suppression Stories (Abridged):**

- An Associated Press story noted Election Protection's exposure of reported voter suppression tactics in **Colorado**: Officials with the Election Protection Coalition, a voter-rights group, also said **some voters in a predominantly black neighborhood north of Denver found papers on their doorsteps giving them the wrong address for their precinct.**
- Election Protection received a report from Boulder County, **Colorado** that a **poll worker made racist comments to Asian American voter and then told her she was not on the list and turned her away.** The voter saw others filling out provisional ballots and asked for one but was denied. Another Asian American woman behind her in line was also given trouble by the same poll worker (he questioned her nationality and also turned her away).
- Election Protection received a report from Florissant County, **Missouri** from a voter who lives in predominantly white neighborhood. While waiting in line to vote, a **Republican challenger challenged the black voters by requesting more proof of identification, residence, and signature match, while asking nothing from white voters.** Also, the same voter reportedly asked a few questions about voting but an election officials refused to provide any meaningful answer, insisting that "it's very simple", but provided white voters with information when requested. **There was one other black voter in line who was also singled out for same treatment while white voters were not.**
- The Election Protection hotline received reports from **Pinellas County, Florida** that **individuals purporting to be from the Kerry campaign are going door-to-door handing out absentee ballots, and asking voters to fill them out, and then taking the ballots from them, saying "Vote here for Kerry. Don't bother going to the polls."**
- The Election Protection Coalition received a report from a woman whose sister lives in **Milwaukee** and is on government assistance. Her **sister was reportedly told by her "case manager" that if she voted for Kerry, she would stop receiving her checks.**
- **An illiterate, older and disabled voter in Miami-Dade** asked for assistance reading the ballot and reported that a poll worker yelled at him and refused to assist him and also refused to allow him to bring a friend into the booth in order to read the ballot to him.
- The Election Protection Coalition have gathered reports that **flyers are circulating in a black community in Lexington, South Carolina claiming they those who are behind on child support payments will be arrested as the polls.**
- **Minority voters from Palm Beach County, Florida** reported to the hotline that they received middle-of-the-night, live harassing phone calls warning them away from the polls.
- A volunteer for Rock the Vote reported that **two illiterate voters in Michigan** requested assistance with their ballots but were refused and **reportedly mocked by poll workers.**
- The hotline received a call from a radio DJ in **Hillsborough County, Florida**, who stated that he has received many calls (most of which were from African-Americans) claiming that poll workers were turning voters away and not "letting" them vote.

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- The hotline received a call from **Pima County, Arizona**, indicating that **Democratic voters received calls throughout Monday evening, providing incorrect information about the precinct location**. Voters have had to be transported en masse in order to correct the problem.
- A caller from **Alabama** claims that he was told at his polling place that he could vote there for everything but the President and that he would have to go elsewhere in order to vote for a presidential candidate.
- Poll monitors in **Philadelphia** reports groups of lawyers, traveling in threes, who pull voters out of line and challenge them to provide ID, but when challenged themselves, they hop into waiting cars or vans and leave. Similar activity by Republican lawyers in Philadelphia was reported in the 2002 election.
- In **Cuyahoga, Ohio**, a caller reported that all black voters are being asked to show ID, while white voters are not. Caller report that he is black and had to show ID while his girlfriend is white and did not have to show ID.
- Two months ago, **suspicious phone calls to newly registered Democrats —telling them they weren't, in fact, registered to vote —** were traced to the Republican headquarters in the **Eastern Panhandle**. On **Monday, Democrats there said the calls have started again, even after the Berkeley County Clerk — a Republican — sent the party a cease-and-desist letter**. The Berkeley prosecutor, who also is county Democratic chairman, has called on the U.S. attorney to investigate.
- In **Tuscon, Arizona** a **misleading call informing voters that they should vote on November 3** has been traced back to the state GOP headquarters. The FBI is investigating.
- **A man driving around in a big van covered in American flags and a big picture of a policeman was reportedly parked in front of a polling place; he then got out and moved within the 75 ft limit**, until he was asked to leave; he then was found inside the polling place and was again asked to leave. Election Protection volunteers contacted officials and the man was eventually removed.
- The Election Protection hotline has received a report from **individuals who claim to have received recorded telephone message coming from Bill Clinton and ACT and reminding them to vote on Nov. 3rd**.
- In **Massachusetts**, the EP Hotline has received a report that a **radio station (WILD) is broadcasting that voters will be arrested on the spot if they have outstanding parking tickets**.
- In **Richland, South Carolina** Election Protection has received a report of a **poll manager turning away individuals who do not have photo ID issued to the county or a driver's license**; an EP lawyer spoke with the Poll Manager at 8:20 am and told her that people with other forms of ID should be allowed to vote by provisional ballot.
- In **Greenville**, a caller reported that a **white poll worker was asking Blacks for multiple form of I.D.** Fortunately, the voter who reported the problem did have a second I.D. but reported that some others were turned away. Election Protection attorneys have alerted election officials.
- In **Allegheny County, Pennsylvania**, an official looking flyer advises **Democratic voters to "create a peaceful voting environment" by voting on Wednesday, November 3**
- The week before the election, **flyers were circulated in Milwaukee under the heading "Milwaukee Black Voters League" with some "warnings for election time."** The flyer listed false reasons for which you would be barred from voting (such as a traffic ticket) and then warned that **"If you violate any of these laws you can get ten years in prison and your children will get taken away from you."**
- There is a **Jefferson County flyer which tells voters "See you at the Poles[sic]"... on November 4.**

[NO SUMMARY FOUND] This is summary of federal role in prosecuting election crimes.

General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote,"

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

578000

Report to Congressional Requesters, September 2005.

**[SUMMARY FAILS TO NOTE ELECTION OFFICIALS' RESPONSES THAT LITTLE VOTING FRAUD OR VOTER INTIMIDATION WAS DETECTED. DETECTED VOTING FRAUD WAS RELATED TO SUBMISSION OF FALSE/MATERIALLY INCORRECT VOTER REGISTRATION APPLICATIONS AND TO ABSENTEE BALLOT FRAUD. VOTER SUPPRESSION EFFORTS OCCUR.]** This Report focuses on the efforts of local election officials in 14 jurisdictions within 7 states to manage the registration process, maintain accurate voter registration lists, and ensure that eligible citizens in those jurisdictions had the opportunity to cast ballots during the 2004 election. The Report concentrates on election officials' characterization of their experiences with regard to (1) managing the voter registration process and any challenges related to receiving voter registration applications; checking them for completeness, accuracy, and duplication; and entering information into voter registration lists; (2) removing voters' names from voter registration lists and ensuring that the names of eligible voters were not inadvertently removed; and (3) implementing HAVA provisional voting and identification requirements and addressing any challenges encountered related to these requirements. The Report also provides information on motor vehicle agency (MVA) officials' characterization of their experiences assisting citizens who apply to register to vote at MVA offices and forwarding voter registration applications to election offices. The Report analyzed information collected from elections and motor vehicle agency offices in seven states—Arizona, California, Michigan, New York, Texas, Virginia, and Wisconsin. The 14 jurisdictions we selected were Gila and Maricopa Counties, Arizona; Los Angeles and Yolo Counties, California; City of Detroit and Delta Township, Michigan; New York City and Rensselaer County, New York; Bexar and Webb Counties, Texas; Albemarle and Arlington Counties, Virginia; and the cities of Franklin and Madison, Wisconsin.

Election officials representing all but one of the jurisdictions surveyed following the November 2004 election said they faced some challenges managing the voter registration process, including (1) receiving voter registration applications; (2) checking them for completeness, accuracy, and duplication; and (3) entering information into voter registration lists; when challenges occurred, election officials reported they took various steps to address them. All but 1 of the jurisdictions reported removing names from registration lists during 2004 for various reasons, including that voters requested that their names be removed from the voter registration list; information from the U.S. Postal Service (USPS) showing that voters had moved outside the jurisdiction; felony records received from federal, state, or local governments identifying voters as ineligible due to felony convictions; and death records received from state or local vital statistics offices. All of the jurisdictions reported that they permitted citizens to cast provisional ballots during the November 2004 election. In addition, 12 of the 14 jurisdictions to which this was applicable reported that they offered certain first-time voters who registered by mail the opportunity to cast provisional ballots. Local election officials in 12 of the 13 jurisdictions 13 we surveyed reported that they set up mechanisms to inform voters—without cost—about the outcome of their provisional votes during the November 2004 election. These mechanisms included toll-free telephone numbers, Web sites, and letters sent to the voters who cast provisional ballots. Election officials representing 8 of the 14 jurisdictions reported facing challenges implementing provisional voting for various reasons, including some poll workers not being familiar with provisional voting or, in one jurisdiction representing a large number of precincts, staff not having sufficient time to process provisional ballots.

Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.

A comprehensive survey and analysis of vote fraud in the United States. The methodology included doing nexis searches for all 50 states and surveying existing research and reports. In addition, Minnite did a more in-depth study of 12 diverse states by doing nexis searches, studying statutory and case law, and conducting interviews with election officials and attorneys general. Finally, the study includes an analysis of a few of the most high profile cases of alleged fraud in the last 10 years, including the Miami mayoral election (1997), Orange County congressional race (1996), and the general election in Missouri (2000). In these cases, **Minnite shows that many allegations of fraud do not end up being meritorious.** Minnite finds that **available evidence suggests that the incidence of election fraud is minimal and rarely affects election outcomes.** Election officials generally do a very good job of protecting against fraud. **Conditions that give rise to election fraud have steadily declined over the last century as a result of weakened political parties, strengthened election administration, and improved voting technology.** There is little available evidence that election reforms such as the National Voter Registration Act, election day registration, and mail-in voting have resulted in increases in election fraud. Election

978000

fraud appears also to be very rare in the 12 states examined more in-depth. Legal and news records turned up little evidence of significant fraud in these states or any indication that fraud is more than a minor problem. Interviews with state officials further confirmed this impression. Minnite found that, **overall, the absentee mail-in ballot process is the feature most vulnerable to voter fraud.** There is not a lot of evidence of absentee ballot fraud but the potential for fraud is greatest in this area because of a lack of uniformly strong security measures in place in all states to prevent fraud.

**Suggested reforms to prevent what voter fraud does take place:**

1. effective use of new statewide voter registration databases;
2. identification requirements for first time voters who register by mail should be modified to expand the list of acceptable identifying documents;
3. fill important election administration positions with nonpartisan professionals;
4. strengthen enforcement through adequate funding and authority for offices responsible for detecting and prosecuting fraud; and
5. establish Election Day Registration because it usually requires voter identification and authorization in person before a trained election worker, which reduces the opportunity for registration error or fraud.
- 6.

People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

A description and analysis of the complaints and allegations of voting irregularities gathered by the Election Protection program during the 2004 presidential election. Election Protection received more than a thousand complaints of voter suppression or intimidation. Complaints ranged from intimidating experiences at polling places to coordinated suppression tactics. For example:

- Police stationed outside a Cook County, Illinois, polling place were requesting photo ID and telling voters if they had been convicted of a felony that they could not vote.
- In Pima, Arizona, voters at multiple polls were confronted by an individual, wearing a black tee shirt with "US Constitution Enforcer" and a military-style belt that gave the appearance he was armed. He asked voters if they were citizens, accompanied by a cameraman who filmed the encounters.
- There were numerous incidents of intimidation by partisan challengers at predominately low income and minority precincts
- Voters repeatedly complained about misinformation campaigns via flyers or phone calls encouraging them to vote on a day other than November 2, 2004 or of false information regarding their right to vote. In Polk County, Florida, for example, a voter received a call telling her to vote on November 3. Similar complaints were also reported in other counties throughout Florida. In Wisconsin and elsewhere voters received flyers that said:
  - "If you already voted in any election this year, you can't vote in the Presidential Election."
  - "If anybody in your family has ever been found guilty of anything you can't vote in the Presidential Election."
  - "If you violate any of these laws, you can get 10 years in prison and your children will be taken away from you."

There were also numerous reports of poll workers refusing to give voters provisional ballots.

The following is a summary of the types of acts of suppression and intimidation included in the report and a list of the states in which they took place. All instances of irregularities that were more administrative in nature have been omitted:

1. **Improper implementation of voter identification rules, especially asking only African Americans for proof of identity:** Florida, Ohio, Pennsylvania, Illinois, Missouri, Arkansas, Georgia, Louisiana
2. **Individuals at the polls posing as some sort of law enforcement authority and intimidating and harassing voters:** Arizona, Missouri
3. **Intimidating and harassing challengers at the polls:** Ohio, Michigan, Wisconsin, Missouri, Minnesota
4. **Deceptive practices and disinformation campaigns, such as the use of flyers with intentional misinformation about voting rights or voting procedures, often directed at minority communities; the use of phone calls giving people misinformation about polling sites and**

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

78030

other procedures; and providing verbal misinformation at the polls in a way that appears to have been intentionally misleading: Florida, Pennsylvania, Illinois, Wisconsin, Missouri, North Carolina, Arkansas, Texas

5. **Refusal to provide provisional ballots to certain voters:** Ohio, Pennsylvania, Illinois, Michigan, Colorado, Missouri, Texas, Georgia, Louisiana
6. **Registration applications submitted through third parties that were not processed:** Arizona, Michigan, Nevada (registration forms destroyed by Sproul Associates)
7. **Improper removal from the voter registration list:** Arizona
8. **Individuals questioning voters' citizenship:** Arizona
9. **Police officers at the polls intimidating voters:** Illinois, Michigan, Wisconsin, Missouri, North Carolina

The report does not provide corroborating evidence for the allegations it describes. However, especially in the absence of a log of complaints received by the Department of Justice, this report provides a very useful overview of the types of experiences some voters more than likely endured on Election Day in 2004.

**Books**

John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.

Focuses almost entirely on alleged transgressions by Democrats. Fund's accusations, if credible, would indicate that fraud such as voter registration fraud, absentee ballot fraud, dead people voting, and felon voting is prevalent throughout the country. However, due to its possible biases, lack of specific footnoting, and insufficient identification of primary source material, caution is strongly urged with respect to utilizing this book for assessing the amount and types of voter fraud and voter intimidation occurring.

Fund says that "Election fraud, whether its phony voter registrations, illegal absentee ballots, shady recounts or old-fashioned ballot-box stuffing, can be found in every part of the United States, although it is probably spreading because of the ever-so-tight divisions that have polarized the country and created so many close elections lately. Fund argues that fraud **has been made easier by the passage of the National Voting Rights Act** because it allows ineligible voters to remain on the voter rolls, allowing a voter to vote in the name of someone else. He claims dead people, people who have moved, and people in jail remain on the voting list. He believes because of NVRA illegal aliens have been allowed to vote.

**Absentee balloting makes it even worse:** someone can register under false names and then use absentee ballots to cast multiple votes. Groups can get absentee ballots for the poor and elderly and then manipulate their choices.

Provides a number of examples of alleged voter fraud, mostly perpetrated by Democrats. For example, he claims much fraud in St. Louis in 2000, including illegal court orders allowing people to vote, **felons voting, people voting twice, dead people voting, voters were registered to vacant lots, election judges were not registered and evidence of false registrations.** Another case he pays a great deal of attention to are the alleged transgressions by Democrats in Indian Country in South Dakota 2002, including **voter registration fraud, suspicious absentee ballot requests, vote hauling, possible polling place fraud, abusive lawyers at polling sites, and possible vote buying.**

Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.

Bulk of the book comprises stories from United States electoral history outside the scope of this project; however, tales are instructive in showing how far back irregular and illegal voting practices go. Focuses almost entirely on alleged transgressions by Republican, although at times it does include complaints about Democratic tactics. Gumbel's accusations, if credible, especially in the Bush-Gore election, would indicate there were a number of problems in key states in such areas as **intimidation, vote counting, and absentee ballots.** However, due to its possible biases, lack of specific footnoting, and insufficient identification of primary source material, caution is strongly urged with respect to utilizing this book for assessing the amount

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

and types of voter fraud and voter intimidation occurring.
Tracy Campbell, <i>Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004</i> , Carroll & Graf Publishers, 2005.
Traces the historical persistence of voter fraud from colonial times through the 2004 Bush-Kerry election. From the textual information, it quickly becomes obvious that voter fraud was not limited to certain types of people or to certain political parties. [SKIMPY SUMMARY-DOES NOT SAY MUCH.]
David E. Johnson and Jonny R. Johnson, <i>A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush</i> , Taylor Trade Publishing, 2004.
<b>Adds almost nothing to the present study.</b> It contains no footnotes and no references to primary source material, save what may be able to be gleaned from the bibliography. Takes a historical look at United States Presidential elections from Andrew Jackson to George Bush by providing interesting stories and other historical information. There are only three pages out of the entire book that touches on vote fraud in the first Bush election. The authors assert that the exit polls in Florida were probably correct. The problem was the pollsters had no way of knowing that thousands of votes would be invalidated. But the authors do not believe that fraud was the cause of the tabulation inaccuracy.
Mark Crispin Miller, <i>Foiled Again</i> , Basic Books, 2005.
Sets out to show that the 2004 election was won by Bush through nefarious means, and indicts the news media for not taking anomalies, irregularities, and <b>alleged malfeasance</b> in the process seriously enough. However, book is well sourced, and individual instances of alleged malfeasance discussed may be worth looking at. He accuses Republicans of committing crimes and improprieties throughout the country, including: <ol style="list-style-type: none"> <li>1. <b>deliberate disparities in voting machine distribution and long lines in Democratic jurisdictions;</b></li> <li>2. <b>misinterpretation of voting laws by elections officials to the detriment of Democratic voters;</b></li> <li>3. <b>dirty tricks and deceptive practices to mislead Democratic and minority voters about voting times, places and conditions;</b></li> <li>4. <b>machine irregularities in Democratic jurisdictions;</b></li> <li>5. <b>relocating polling sites in Democratic and minority areas;</b></li> <li>6. <b>suspicious mishandling of absentee ballots;</b></li> <li>7. <b>refusing to dispense voter registration forms to certain voter registration groups;</b></li> <li>8. <b>intimidation of students;</b></li> <li>9. <b>suspicious ballot spoilage rates in certain jurisdictions;</b></li> <li>10. <b>“strategic distribution of provisional ballots,” and trashing of provisional ballots;</b></li> <li>11. <b>harassment of Native American voters;</b></li> <li>12. <b>a Republican backed organization engaging in voter registration efforts throughout the country that allegedly destroyed the voter registration forms of Democrats;</b></li> <li>13. <b>illegitimate challenges at the polls by Republican poll watchers;</b></li> <li>14. <b>improper demands for identification in certain areas;</b></li> <li>15. <b>Republican challenges to the voter registration status of thousands of voters before the election, and the creation of lists of voters to challenge at the polls;</b></li> <li>16. <b>wrongful purging of eligible voters from voting rolls;</b></li> <li>17. <b>partisan harassment;</b></li> <li>18. <b>the selective placement of early voting sites; and</b></li> <li>19. <b>failure to send out absentee ballots in time for people to vote.</b></li> </ol> Details what he says was the inappropriate use of the Federal Voter Assistance Program that made voting for the military easy while throwing up obstacles

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

678030

for civilians overseas in their efforts to vote by absentee ballot, leading many of them to be disenfranchised.

**Legal**

*Indiana Democratic Party vs. Rokita*, U.S. District Court Southern District of Indiana (Indianapolis) 1:05-cv-00634, U.S. Court of Appeals, 7<sup>th</sup> Circuit 06-2218

Although the proponents of SEA 483 asserted that the law was intended to combat voter fraud, no evidence of the existence of such fraud has ever been provided. No voter has been convicted of or even charged with the offense of misrepresenting his identity for purposes of casting a fraudulent ballot in person, King Dep. 95-96; Mahern Aff. ¶¶ 2-3, though there have been documented instances of absentee ballot fraud. King Dep. 120. Indeed, no evidence of in person, on-site voting fraud was presented to the General Assembly during the legislative process leading up to the enactment of the Photo ID Law. Mahern Aff. ¶¶ 2-

**The State cannot show any compelling justification for subjecting only voters who vote in person to the new requirements of the Photo ID Law, while exempting absentee voters who vote by mail or persons who live in state-certified residential facilities.**

On the other hand, absentee ballots are peculiarly vulnerable to coercion and vote tampering since there is no election official or independent election observer available to ensure that there is no illegal coercion by family members, employers, churches, union officials, nursing home administrators, and others.

**Law gives virtually unbridled discretion to partisan precinct workers and challengers to make subjective determinations such as (a) whether a form of photo identification produced by a voter conforms to what is required by the Law, and (b) whether the voter presenting himself or herself at the polls is in fact the voter depicted in the photo** Robertson Dep. 29-34, 45; King Dep. 86, 89. This is significant because any voter who is challenged under this Law will be required to vote by provisional ballot and to make a special trip to the election board's office in order to have his vote counted. Robertson Dep. 37; King Dep. 58.

**The Photo ID Law confers substantial discretion, not on law enforcement officials, but on partisan precinct poll workers and challengers appointed by partisan political officials, to determine both whether a voter has presented a form of identification which conforms to that required by the Law and whether the person presenting the identification is the person depicted on it. Conferring this degree of discretion upon partisan precinct officials and members of election boards to enforce the facially neutral requirements of the Law has the potential for becoming a means of suppressing a particular point of view.**

The State arguably might be justified in imposing uniform, narrowly-tailored and not overly-burdensome voter identification requirements if the State were able to show that there is an intolerably high incidence of fraud among voters misidentifying themselves at the polls for the purpose of casting a fraudulent ballot. But here, the State has utterly failed to show that this genre of fraud is rampant or even that it has ever occurred in the context of on-site, in-person voting (as opposed to absentee voting by mail) so as to justify these extra burdens, which will fall disproportionately on the poor and elderly.

**And where the State has already provided a mechanism for matching signatures, has made it a crime to misrepresent one's identity for purposes of voting, and requires the swearing out of an affidavit if the voter's identity is challenged, it already has provisions more than adequate to prevent or minimize fraud in the context of in-person voting, particularly in the absence of any evidence that the problem the Law seeks to address is anything more than the product of hypothesis, speculation and fantasy.**

**In-person voter-identity fraud is notoriously difficult to detect and investigate.** In his book *Stealing Elections*, John Fund observes that actual in-person voter fraud is nearly undetectable without a voter photo-identification requirement because anybody who provides a name that is on the rolls may vote and then walk away with no record of the person's actual identity. The problem is only exacerbated by the increasingly transient nature of society. **Documentation of in-person voter fraud often occurs only when a legitimate voter at the polls hears a fraudulent voter trying to use her name, as happened to a woman in California in 1994.** See Larry J. Sabato & Glenn R. Simpson, *Dirty Little Secrets* 292 (1996).

Regardless of the lack of extensive evidence of in-person voter fraud, the Commission on

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

030856

Federal Election Reform (known as the Baker-Carter Commission) recently concluded that "there is no doubt that it occurs." State Ex. 1, p. 18.1 **Legal cases as well as newspaper and other reports confirm that in-person voter-identity fraud, including voter impersonation, double votes, dead votes, and fake addresses, plague federal and state elections. [The memorandum details several specific cases of various types of alleged voting fraud from the past several years]**

Though they are largely unable to study verifiable data concerning in-person voter fraud, scholars are well aware of the conditions that foster fraudulent voting. See Fund, *supra*; Sabato & Simpson, *supra*, 321. In particular, fraud has become ever more likely as "it has become more difficult to keep the voting rolls clean of 'deadwood' voters who have moved or died" because such an environment makes "fraudulent voting easier and therefore more tempting for those so inclined." Sabato & Simpson, *supra*, 321. "In general, experts believe that one in five names on the rolls in Indiana do not belong there." State Ex. 25.

For this case, Clark Benson, a nationally recognized expert in the collection and analysis of voter-registration and population data, conducted his own examination of Indiana's voter registration lists and concluded that they are among the most highly inflated in the nation.

The Crawford Plaintiffs cite the concessions by Indiana Election Division Co-Director King and the Intervenor-State that they are unaware of any historical in-person incidence of voter fraud occurring at the polling place (Crawford Brief, p. 23) as conclusive evidence that in-person voter fraud does not exist in Indiana. They also seek to support this conclusion with the testimony of two "veteran poll watchers," Plaintiff Crawford and former president of the Plaintiff NAACP, Indianapolis Chapter, Roderick E. Bohannon, who testified that they had never seen any instances of in-person voter fraud.

(*Id.*)

While common sense, the experiences of many other states, and the findings of the Baker-Carter Commission all lead to the reasonable inferences that (a) in-person polling place fraud likely exists, but (b) is nearly impossible to detect without requiring photo identification, the State can cite to no confirmed instances of such fraud. On the other hand, the Plaintiffs have no proof that it does not occur.

At the level of logic, moreover, it is just reasonable to conclude that the lack of confirmed incidents of in-person voting fraud in Indiana is the result of an ineffective identification security system as it is to conclude there is no in-person voting fraud in Indiana. So while it is undisputed that the state has no proof that in-person polling place fraud has occurred in Indiana, there does in fact remain a dispute over the existence *vel non* of in-person polling place fraud.

It is also important to understand that the nature of in-person election fraud is such that it is nearly impossible to detect or investigate. Unless a voter stumbles across someone else trying to use her identity, see Sabato & Simpson, *supra*, 292, or unless the over-taxed poll worker happens to notice that the voter's signature is different from her registration signature State Ex. 37, ¶ 9, the chances of detecting such in-person voter fraud are extremely small. Yet, inflated voter-registration rolls provide ample opportunity for those who wish to commit in-person voter fraud. See Fund, *supra*, 24, 65, 69, 138; Sabato & Simpson, *supra*, 321. And there is concrete evidence that the names of dead people have been used to cast fraudulent ballots. See Fund, *supra*, 64. Particularly in light of Indiana's highly inflated voter rolls State Ex. 27, p. 9, Plaintiffs' repeated claims that there has never been any in-person voter fraud in Indiana can hardly be plausible, even if the state is unable to prove that such fraud has in fact occurred.

*Common Cause of Georgia vs. Billups*, U.S. District Court, Northern District of Georgia (Rome) 4:05-cv-00201-HLM U.S. Court of Appeals, 11<sup>th</sup> Circuit 05-15784

The Secretary of State, as the Chief Election Officer in Georgia, informed the General Assembly before the passage of Act 53 in a letter (attached hereto as Exhibit A), and also informed the Governor in a letter (attached hereto as Exhibit B) before he signed the bill into law, that **there had been no documented cases of fraudulent voting by persons who obtained ballots unlawfully by misrepresenting their identities as registered voters to poll workers reported to her office during her nine years as Secretary of State .**

Although the Secretary of State had informed the members of the General Assembly and the Governor prior to the enactment of Act 53, that her office had

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

030851

received many complaints of voter fraud involving absentee ballots and no documented complaints of fraud that involve ballots that were cast in person at the polls, the General Assembly ignored this information and arbitrarily chose instead to require only those registered voters who vote in person to present a Photo ID as a condition of voting, but deliberately refused to impose the same requirement on absentee voters.

The Stated Purpose Of The Photo ID Requirement Fraud Is A Pretext.

According to a press release prepared by the Communications Office of the Georgia House of Representatives, the purpose of Act 53 is: to address the issue of voter fraud by placing tighter restrictions on voter identification procedures. Those casting ballots will now be required to bring a photo ID with them before they will be allowed to vote.

Al Marks, Vice Chairman for Public Affairs and Communication of the Hall County GOP told the Gainesville Times: I don't think we need it for voting, because I don't think there's a voter fraud problem. Gainesville Times, "States Voters Must Present Picture IDs" (September 15, 2005) ([www.gainesvilletimes.com](http://www.gainesvilletimes.com)).

**There is no evidence that the existing provisions of Georgia law have not been effective in deterring and preventing imposters from fraudulently obtaining and casting ballots at the polls by misrepresenting their true identities to election officials and passing themselves off as registered voters whose names appear on the official voter registration list.**

The pretextual nature of the purported justification for the burden which the Photo ID requirement imposes on the right to vote is shown by the following facts:

(a) Fraudulent voting was already prohibited by existing Georgia law without unduly burdening the right of a citizen to vote.

(i) Fraudulent voting was already prohibited as a crime under O.C.G.A. §§ 21-2-561, 21-2-562, 21-2-566, 21-2-571, 21-2-572 and 21-2-600, punishable by a fine of up to \$10,000 or imprisonment for up to ten years, or both.

(ii) Voter registration records are updated periodically by the Secretary of State and local election officials to eliminate people who have died, have moved, or are no longer eligible to vote in Georgia for some other reason.

(iii) Existing Georgia law also required election officials in each precinct to maintain a list of names and addresses of registered voters residing in that precinct, and to check off the names of each person from that official list as they cast their ballots.

(iv) Registered voters were also required by existing Georgia law to present at least one of the seventeen forms of documentary identification to election officials who were required, before issuing the voter a ballot, to match the name and address shown on the document to the name and address on the official roll of registered voters residing in the particular precinct. O.C.G.A. § 21-2-417 .

(b) There is no evidence that the existing Georgia law has not been effective in deterring or preventing fraudulent in-person voting by impersonators - the only kind of fraudulent voting that might be prevented by the Photo ID requirement. To the contrary, the Secretary of State, who, as the Superintendent of Elections, is the highest election official in Georgia, informed both the General Assembly (Exhibit A) and the Governor (Exhibit B) in writing that there had been no documented cases of fraudulent in person voting by imposters reported to her during her nine years in office .

(c) If the true intention of the General Assembly had been to prevent fraudulent voting by imposters, the General Assembly would have imposed the same restrictions on the casting of absentee ballots - particularly after the Secretary of State had called to their attention the fact that there had been many documented instances of fraudulent casting of absentee ballots reported to her office.

(d) Fraudulent in-person voting is unlikely, would be easily detected if it had occurred in significant numbers, and would not be likely to have a substantial impact on the outcome of an election:

(i) Many people vote at a local neighborhood polling place where they are likely to be known to and recognized by neighbors or poll workers.

(ii) Voters were required by existing Georgia law (O.C.G.A. § 21-2-417), to provide one of the seventeen means of identification to election officials.

(iii) Election officials are required, before issuing the ballot to the voter, to check off the name of either voter from an up-to-date list of the names and addresses of every registered voter residing in the precinct. If an imposter arrived at a poll and was successful in fraudulently obtaining a ballot before

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

030852

the registered voter arrived at the poll, a registered voter, who having taken the time to go to the polls to vote, would undoubtedly complain to elections officials if he or she were refused a ballot and not allowed to vote because his or her name had already been checked off the list of registered voters as having voted. Likewise, if an imposter arrived at the polls after the registered voter had voted and attempted to pass himself off as someone he was not, the election official would instantly know of the attempted fraud, would not issue the imposter a ballot or allow him to vote, and presumably would have the imposter arrested or at least investigate the attempted fraud and report the attempt to the Secretary of State as Superintendent of Elections.

U.S. Department of Justice Section 5 Recommendation Memorandum (regarding HB 244), August 25, 2005 at <http://www.votingrights.org/news/downloads/Section%205%20Recommendation%20Memorandum.pdf>

**Overview:** Five career attorneys with the civil rights department investigated and analyzed Georgia's election reform law. Four of those attorneys recommended objecting to Section 59, the voter identification requirement. The provision required all voters to present government issued photo identification in order to vote. The objection was based on the attorneys' findings that there was little to no evidence of polling place fraud, the only kind of fraud an ID requirement would address, and that the measure would disenfranchise many voters, predominantly minority voters, in violation of Section 5 of the Voting Rights Act.

**Factual Analysis:** The sponsor of the measure in the state legislature said she was motivated by the fact that she is aware of vote buying in certain districts; she read John Fund's book; and that "if there are fewer black voters because of this bill, it will only be because there is less opportunity for fraud. She said that when black voters in her black precincts are not paid to vote, they do not go to the polls."

A member of the Fulton County Board of Registrations and Elections said that prior to November 2004, Fulton County received 8,112 applications containing "missing or irregular" information. Only 55 of those registrants responded to BOE letters. The member concluded that the rest must be "bogus" as a result. He also stated that 15,237 of 105,553 precinct cards came back as undeliverable, as did 3,071 cards sent to 45,907 new voters. Of these 3,071, 921 voted.

**Secretary of State Cathy Cox submitted a letter testifying to the absence of any complaints of voter fraud via impersonation during her tenure.** In the legal analysis, the attorneys state that if they determine that Georgia could have fulfilled its stated purpose of election fraud, while preventing or ameliorating the retrogression, an objection is appropriate. They conclude that the state could have avoided retrogression by retaining various forms of currently accepted voter ID for which no substantiated security concerns were raised. Another non-retrogressive alternative would have been to maintain the affidavit alternative for those without ID, since "There is no evidence that penalty of law is an insufficient deterrent to falsely signing an affidavit of identity." The attorneys point out that the state's recitation of a case upholding voter fraud in Dodge County does not support the purpose of the Act because that case involved vote buying and selling, not impersonation or voting under a false identity.

**Election Official Misconduct:**

- A person commits Election Official misconduct if while an election official the person:
  - Intentionally fails to perform an election duty, or knowingly does an unauthorized act with the intent to effect the election.
  - Knowingly permits, makes, or attempts to make a false count of election returns.
  - Intentionally conceals, withholds, or destroys election returns or attempts to do so.
  - Opens a ballot received from a voter at an election, unless otherwise permitted.
  - Marks a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time.
  - Otherwise attempts to learn how a voter marked a ballot.
  - Distributes or attempts to distribute election material knowing it to be fraudulent.
  - Knowingly refuses to register a person who is entitled to register under the rules of that jurisdiction.

**Petition Subscription:**

- A person commits a crime of improper subscription to a petition or referendum if:
  - He signs a name other than his own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office.
  - Knowingly signs more than once for the proposition, question, or candidate at one election.
  - Signs a petition proposing an initiative or referendum while knowingly not being a qualified voter.
  - Solicits, accepts, or agrees to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative.

**Campaign misconduct:**

- A person commits a crime of campaign misconduct if he knowingly makes a communication:
  - Containing false factual information relating to a candidate for an election that the person knows to be false and that a person could reasonably construe as damaging to the candidate's reputation for honesty or integrity, or to the candidate's qualifications to serve if elected to office.
  - Knowingly removes, alters, defaces or covers any political sign of any candidate for public office for a prescribed period prior to and following the election.

**Unlawful Interference with Voting:**

- A person commits the crime of unlawful interference with voting when the person:

- Uses, threatens to use, or causes to be used force, coercion, violence, restraint, or inflicts, threatens to inflict, or causes to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting.
- Knowingly pays, offers to pay, or causes to be paid money or other valuable thing to a person to vote or refrain from voting for a candidate at an election or for an election proposition or question.
- Has an official ballot in possession outside the voting room, unless the person is an election official or other person authorized by law or local ordinance.
- Makes, or knowingly has in possession, a counterfeit of an official election ballot.
- Knowingly solicits or encourages a registered voter who is no longer qualified to vote in an election.
- Fraudulently alters or changes the vote of any elector, by which such elector is prevented from voting as he intended.
- Knowingly causes to be mailed or distributed, or knowingly mails or distributes, literature that includes a designation of the voter's precinct polling place other than a precinct polling place listed for that voter in an official precinct polling list that constituted the latest official precinct polling list.
- Knowingly challenges a person's right to vote without probable cause or on fraudulent grounds, or who engages in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or delay the process of voting.
- As an employer, attempts by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his vote in any election, or who requires or demands an examination or inspection by himself or another of an employee's ballot.
- Removes or destroys any of the supplies or other conveniences placed in the voting booths or compartments for the purpose of enabling the voter to prepare his or her ballot.
- Removes, tears down, or defaces the cards printed for the instruction of voters.
- Removes, tears down, marks or otherwise defaces any voter index with the intent to falsify or prevent others from readily ascertaining the name, address, or political affiliation of an voter, or the fact that a voter has or has not voted.

*Voter Reg  
Prives*

**Voter Misconduct**

- A voter commits voter misconduct if the person:
  - Votes or attempts to vote in the name of another person or in a name other than person's own.
  - Votes or attempts to vote more than once at the same election with the intent that the person's vote be counted more than once.
  - Intentionally makes a false affidavit, swears falsely, or falsely affirms under an oath required by a statute regarding their voting status.
  - Knowingly solicits a person to vote after the polls are closed with the intent that the vote be counted.

- Registers to vote without being entitled to register.
- Knowingly makes a material false statement while applying for voter registration or reregistration.
- Voters or attempts to vote in an election after being disqualified.

**Unlawful Interference With an Election**

- A person commits the crime of unlawful interference with an election if the person:
  - Induces or attempts to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward.
  - Intentionally changes, attempts to change, or causes to be changed an official election document including ballots, tallies, and returns.
  - Intentionally delays, attempts to delay, or causes to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.
  - Directly or through any other person advances, pays, solicits, or receives or causes to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office.

Subject VF-VI Another DOJ Objection

Julie:

I just remembered that there was one other DOJ objection. It was about the way the consultants described the Election Crimes Branch focus on cases. In the interview with Donsanto (the only interview I attended), he made reference to the fact that the Election Crimes Branch used to only go after conspiracies, not individuals. Now, however, they had begun prosecuting individuals for noncitizen and felon voting. The consultants heard an unexpressed "instead", which would mean that DOJ had dropped pursuing conspiracies in favor of going after individuals. Based on my previous experience, I heard and unexpressed "in addition", meaning that DOJ was not just prosecuting conspiracies, the department also had begun to prosecute individuals.

I had lengthy discussions with the consultants over this issue as well. Donsanto confirmed that he meant "in addition", and the lists of cases he provided indicates that the department continues to pursue conspiracies. (It doesn't make sense any other way, unless you believe that the government is out to get the little guy.) --- Peggy

Subject Re: VF and VI study

OK, I will get started on the interview summaries today.

DOJ (Donsanto and Tanner) raised objections to the consultants' description of their interviews, which state that DOJ officials agreed they were bringing fewer intimidation and suppression cases. An advocacy group is going after DOJ, accusing the agency of doing just that for political reasons, so this is something DOJ wants corrected.

Apart from the consultants pre-existing bias that "the feds aren't doing enough", a big part of the problem appears to have been a misunderstanding over terminology. When our consultants used the term "intimidation", they included all sorts of suppression activities. When Craig Donsanto used the term "intimidation", he was using the definition under federal criminal vote fraud statutes, which requires the action be accompanied by threat of physical or economic harm. (He told me he has had only one such case in 30 years.) His office is actively pursuing voter suppression activities under statutes other than federal voter intimidation laws (e.g.; the recent case in NH where a campaign operative conspired to block election day GOTV telephone lines of the opposing party). A copy of Tanner's comments on the interview summary in the status report for the Standards and Advisory Boards meetings is attached.

I had many long discussions with Tova and Job about this. I was able to get them to soften their description (see 4th bullet on page 7 of the draft report), but not entirely to my satisfaction. Also, at the Working Group meeting, it was agreed that the consultants would add a note to their definition to clarify that the working definition for purposes of the research includes activities that do not meet the federal definition of voter intimidation. The resulting note on page 5 of the draft report is too vague.

DOJ has not seen everything the consultants put in the draft final report, so they may have additional concerns. For example, the consultants' recommendations include the following:

**Attend the Department of Justice's Ballot Access and Voting Integrity Symposium** . The consultants also believe it would be useful for any further activity in this area to include attendance at the next Ballot Access and Voting Integrity Symposium. According to the Department, DEOs are required to attend annual training conferences centered on combating election fraud and voting rights abuses. These conferences sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, feature presentations by civil rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. According to the Department, DEOs are required to attend annual training conferences centered on combating election fraud and voting rights abuses. These conferences sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, feature presentations by civil rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices.

Footnote:

By attending the symposium researchers could learn more about the following:  
How DEOs are trained, e.g. what they are taught to focus their resources on; How they are instructed to respond to various types of complaints; How information about previous elections and voting issues is presented; and, How the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

DOJ has stated that this is an internal meeting, involving only DOJ officials, US Attorneys and FBI. EAC researchers cannot be admitted without opening the meeting to other outsiders. DOJ does not want to do this, probably for two reasons: (1) confidential information on current enforcement cases may be

030857

**Deliberative Process  
Privilege**

discussed; and (2) making enforcement strategies public could give unscrupulous individuals a virtual "how to" manual for circumventing such strategies when committing election crimes.

We may also have a hard time gaining access to the DOE reports and the Voting Section records of complaints, as they probably aren't considered public documents.

To: Members of the United States Election Assistance Commission  
Cc: Thomas Wilkey, Executive Director, and Julie Thompson Hodgkins, General Counsel, Election Assistance Commission  
From: Tova Andrea Wang  
Re: Project on Voter Fraud and Intimidation  
Date: December 7, 2006

As one of the consultants and authors of the report on voter fraud and intimidation released by the Election Assistance Commission today, I am writing to request that the EAC restore the information that has been altered and removed from the research report we submitted to the EAC in July, 2006.

Job Serebrov and I spent over a year and hundreds of hours working on the report on voter fraud and voter intimidation in a bipartisan and highly effective manner. The report we wrote was a reflection of the detailed and laborious research we did over these many months. Unfortunately, the report the EAC released today does not fully reflect our research and the report of our findings submitted to the EAC in July, 2006.

After being unable to get any action taken on the report for months, I learned very recently that the General Counsel of the EAC would be taking responsibility for "revising" the report. On November 15 of this year I requested that Job Serebrov and I be permitted to review any revisions or changes made by EAC staff to the draft we submitted. We both offered to work collaboratively and cooperatively with EAC staff to ensure that the document produced was the most informative and useful product possible. This request was denied. Again, on November 29, 2006, upon learning that the report was to become public at an upcoming EAC meeting, I requested in writing that Job Serebrov and I be at least allowed to see embargoed copies of the report to be released before that December 7, 2006 meeting. That request was denied. On December 4, 2006 I offered to sign a confidentiality agreement whereby I would agree not to discuss the report before its public release. That request was also denied.

It is my understanding that with other research reports for which the EAC has contracted consultants there has been a process of give and take between the consultants and the EAC staff and commissioners prior to public release of the report. The consultants in this instance were repeatedly denied that opportunity, leading to today's result.

The issues around voter fraud and intimidation are controversial, making it all the more necessary that the research around it be as free from politics as possible. That is why the EAC made this project a bipartisan effort, with a bipartisan team of consultants and a bipartisan working group to inform and advise us on our work.

The EAC has a statutory obligation to provide the Congress and the American public the best research, data and guidance it can. Knowledge about the extent and nature of voter fraud and intimidation is fundamental to ensuring the right of every eligible American to vote and that every legitimate vote is counted.

030860

**Deliberative Process  
Privilege**

I hope the EAC will reconsider its actions of today and release the report that was written by the consultants so that the Congress and the voters can engage in an informed and honest discussion about one of the most serious issues confronting our democracy today.

Please respond to this request by Monday, December 11. Thank you for your timely consideration.

CONNECTICUT

DELAWARE

## Political Material

- \* NO EMPLOYER SHALL PUT ~~ANY~~ INFO INTO AN EMPLOYEE'S PAY ENVELOPE
- \* EVERY PERSON WHO KNOWINGLY CHALLENGES A PERSON'S RIGHT TO VOTE W/O PROBABLE CAUSE OR ON FRAUDULENT GROUNDS - OR MASS GROUNDLESS CHALLENGING, OR ADVISES SOMEONE FRAUDULENTLY THAT THEY ARE INELIGIBLE TO VOTE IS GUILTY OF A CRIME
- \* ANY PERSON IN POSSESSION OF A FIREARM OR ANY UNIFORMED POLICE OFFICER, GUARD, OR SECURITY PERSONNEL STATIONED IN THE IMMEDIATE VICINITY OF POLLING PLACE W/O WRITTEN AUTHORIZATION OF APPROPRIATE OFFICIALS
- \* ANY PERSON HAVING CHARGE OF A COMPLETED ABSENT VOTER BALLOT WHO WILLFULLY INTERFERES OR CAUSES INTERFERENCE W/ ITS RETURN TO THE LOCAL ELECTION OFFICIALS.

## Colorado

- \* NO NAME SHALL BE ADDED TO THE REGISTRATION BOOK OF ANY PRECINCT AFTER CLOSE OF REGISTRATION.  
- KNOWING ELECTION OFFICIAL WHO CAUSES NAME TO BE ADDED = GUILTY OF CRIME
- \* CAN'T MUTILATE OR ERASE ANY NAME, FIGURE OR WORD IN REGISTRATION BOOK, REGISTRATION LIST, OR POLLBOOK
- \* ELECTION JUDGE CAN'T WILLFULLY OR MALICIOUSLY REFUSE OR NEGLECT TO RECEIVE THE BALLOT OF A REGISTERED VOTER
- \* CAN'T CAUSE THROUGH DECEIT A PERSON TO SUBMIT A DEFECTIVE BALLOT.
- \* DON'T KNOWINGLY VOTE IN WRONG PRECINCT

030863

- \* Registers to vote w/o being ENTITLED TO
- \* Makes False Statement while Registering

### Arizona

- \* Counterfeiting a Ballot or Circulating a Counterfeited Ballot
- \* Interference w/ Election officials Duties (Knowingly)
- ~~\* Attempts to Fix an Election~~
- \* Coercion or Intimidation (Same as Alaska)
- \* Knowingly Remove, Alter, Deface or Cover up Political Sign of any Candidate for Public Office for Prescribed Period

### Arkansas

- \* Can't Tamper w/ Voting Machines

### California

- \* Persons in charge of Registering Voters may NOT Knowingly Register a False Person or a Person they know to be FRAUDULENTLY Registering
- \* Misuse of Voter Registration Information or obtaining info other than as permitted by law
- \* Can't pay to get someone to become a candidate or withdraw as a candidate
- \* Can't send voters false info about their Polling Place
- \* No Person shall Destroy, Tear Down or Remove Polling Booth, Things w/ Polling Booth.

## Alabama

- \* Vote More Than Once OR Vote When NOT ENTITLED
- \* False IMPERSONATION
- \* Bribe or attempting to BRIBE, INFLUENCE
- \* Buy or offer to Buy Vote
- \* Sell Vote
- \* ALTERING OR CHANGING SOMEONE'S VOTE
- \* DISTURB, PREVENT or ATTEMPT TO PREVENT a Vote
- \* Coercion By an EMPLOYER over Employee
- \* Provide False INFO to Vote or REGISTER to Vote

## Alaska - Anything new?

- \* Election official 1) FAILS TO Perform (non-fessure)  
2) False Count 3) Conceals, WITHHOLDS, DESTROYS, ATTEMPTS: Election Returns  
4) OPENS a Ballot Received w/o Permission 5) MARKS a Ballot (to IDENTIFY IT) 6) ATTEMPS to Learn How a Voter MARKED
- \* PETITION SUBSCRIPTION - Signs wrong name, Paid, Signs Twice
- \* knowingly disseminate INFO that is false that HURTS CANDIDATE'S REPUTATION
- \* Uses, THREATENS TO USE or CAUSES TO BE USED Force, Coercion, Violence or RESTRAINT TO COMPEL or INFLUENCE a Vote or Refraining a Vote
- \* Has official Ballot outside of Voting Room unless AUTHORIZED
- \* COUNTERFEIT Ballots

## STATE VOTING LAWS = CRIMINAL OFFENSES

1. BUYING VOTES
2. SELLING VOTES
3. ALTERING OR CHANGING VOTE ON ELECTION DAY
4. PROVIDING FALSE INFO TO REGISTER OR VOTE
5. COUNTERFEITING OR DISTRIBUTING UNLAWFUL BALLOTS
6. FALSE ENDORSEMENT, DISTRIBUTION OR DELAY IN DELIVERY OF BALLOT
7. INTERFERENCE W/ OR CORRUPTION OF ELECTION OFFICER
8. COERCION OR INTIMIDATION OF ELECTOR
9. TAMPERING W/ POLITICAL SIGNS
10. WILLFUL REGISTRATION OF FICTITIOUS PERSON
11. DEPUTY REGISTRARS, FAILURE TO RETURN AFFIDAVITS OF REG.

- TRYING TO GET A COMMON LIST OF VOTE CRIMES THROUGHOUT THE STATES.

6. Wrongful refusal or allowance of votes; malicious or frivolous challenges
7. Distinguishing marks on ballots
8. Other unlawful acts at polling places

030886

9. Disorder at polls; failure to assist in preventing disorder
10. Failure to make returns
11. Improper influence and bribery by candidates
12. Buying or selling vote unlawful
13. Unlawful acts by corporations
14. Receiving or soliciting bribes by voters
15. Illegal voting; deceiving voters
16. Unlawful voting in primary elections
17. Violations concerning absent voters' ballots
18. Obstructing employees' freedom to vote
19. Wagering or betting on elections
20. Punishment where penalty not described or where failure to perform duty not specifically made an offense

(WV ST Ch. 3, Art 9)

### **WISCONSIN**

Prohibited election practices include:

1. Campaigning restrictions
2. Posting and distributing of election-related material
3. Communication of political messages
4. False representation affecting elections
5. Election restrictions on employers
6. Denial of government benefits
7. Election threats
8. Election bribery
9. Election fraud

(W.S.A. 12)

### **WYOMING**

Felony offenses include:

1. Registration offenses
2. Unlawful opening of a ballot box
3. Unlawful opening of a voting machine
4. Unlawful possession of a key
5. False voting
6. Falsifying election documents
7. False swearing
8. Offering a bribe
9. Accepting a bribe
10. Intimidation

(Laws 1973, ch. 251, § 1; W.S. 1957, § 22.1-406.)

RE: October 18, 2006 Letter

Dear Mr. Neas:

Your letter of October 18, 2006 requests the release of EAC's Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group's concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study – finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud -- as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,

Paul S. DeGregorio  
Chairman

Commissioner Donetta L. Davidson  
Commissioner Gracia M. Hillman  
United States Election Assistance Commission  
1225 New York Avenue N.W., Suite - 1100  
Washington, DC 20005  
Fax: (202) 566-3127

Dear Commissioners,

On October 11<sup>th</sup>, *USA Today* published an article describing the report commissioned by the EAC on voter fraud. We write today to urge the EAC to release this report.

As a 25 year old civil rights and civil liberties organization, People For the American Way Foundation (PFAWF) and our sister organization, People For the American Way (PFAW) have long been dedicated to ensuring the integrity of our elections. In particular in the years since the 2000 election, PFAWF and other principle partners such as the NAACP and the Lawyers' Committee for Civil Rights Under Law, have carried out a program called Election Protection to ensure that all eligible voters are able to vote and have that vote counted as cast.

We know that voter fraud and intimidation occur- we've seen the long lines, the erroneous purges, the misleading flyers and phone calls. And yet there seems to be little attention to these matters on the state and federal level.

Instead, a disproportionate amount of time and energy are spent on measures that purport to curb voter fraud by requiring voters to produce proof of citizenship and identity to vote. In actuality, these measures do little to secure the elections and much to disenfranchise otherwise eligible voters. Indeed we are weeks away from an election where thousands of eligible voters may be disenfranchised by overly restrictive voter identification laws. That presents a real threat to the integrity of our elections and the health of our democracy.

The report that the EAC commissioned from voting experts would make a vitally important contribution to the national discourse on the reality of voter fraud. In light of the numerous claims regarding the prevalence of voter fraud, this report provides a much

needed analysis about the state of our electoral process. While media reports indicate that this tax-payer funded report is final, even if there are outstanding concerns within the EAC, we implore you to move forward with releasing the report as is, and to hold a public hearing to address any potential issues. Again, the importance of the information in this report is paramount and the public deserves such full disclosure. The report should be released immediately so that those who are concerned about ensuring the integrity of elections can benefit from its findings.

Sincerely,

Ralph G. Neas

RE: Elections Assistance Commission Report

VIA ELECTRONIC MAIL

Dear Mr. Chairman

I am writing to urge you and my fellow Commissioners to exercise our Congressionally-authorized subpoena power to compel the production of the report on voting fraud that the United States Election Assistance Commission ("EAC") refuses to release. It was clearly evident during our briefing last week on Voter Fraud and Intimidation that the results of the EAC report could have a significant impact on the quality and quantitative analysis of any briefing report that might be issued by the Commission.

According to an article in the October 11<sup>th</sup> edition of USA Today, "the bipartisan report by two consultants to the election commission casts doubt on the problem those laws are intended to address." Indeed, "there is widespread but not unanimous agreement that there is little polling-place fraud, or at least much less than is claimed, including voter impersonation, 'dead' voters, non-citizen voting and felon voters" according to the article. Further, the USA Today article states that the report, "prepared by Tova Wang, an elections expert at the Century Foundation think tank, and Job Serebrov, an Arkansas attorney, says most fraud occurs in the absentee ballot process, such as through coercion or forgery."

Just based on this news article, the report has information clearly germane to our briefing and subsequent analysis of the testimony provided. I believe that in carrying out our Congressional mandate, the need to have access to and analyze the Election Assistance Commission report is a necessary prerequisite to an unbiased and informed report on Voter Fraud.

It is my understanding that the Chair has the authority under law to sign a subpoena on his own accord or, alternatively to seek a vote of the Commission to issue said subpoena. I believe the subpoena would be very short and direct: the production of the suppressed report.

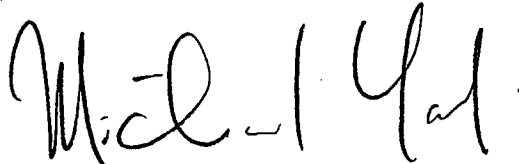

Page 2

Letter from Commissioner Yaki to Chair Reynolds

I respectfully request that the Chair immediately issue a subpoena or, in the alternative, conduct an immediate notational vote on the matter of issuing a subpoena to compel production of the report.

Thank you for your time and attention to this important matter.

Sincerely,

A handwritten signature in black ink that reads "Michael Yaki". The signature is written in a cursive, flowing style.

## **Defining Election Fraud**

Election fraud is any intentional action, or intentional failure to act when there is a duty to do so, that corrupts the election process in a manner that can impact on election outcomes. This includes interfering in the process by which persons register to vote; the way in which ballots are obtained, marked, or tabulated; and the process by which election results are canvassed and certified.

Examples include the following:

- falsifying voter registration information pertinent to eligibility to cast a vote, (e.g. residence, criminal status, etc);
- altering completed voter registration applications by entering false information;
- knowingly destroying completed voter registration applications (other than spoiled applications) before they can be submitted to the proper election authority;
- knowingly removing eligible voters from voter registration lists, in violation of HAVA, NVRA, or state election laws;
- intentional destruction by election officials of voter registration records or balloting records, in violation of records retention laws, to remove evidence of election fraud;
- vote buying;
- voting in the name of another;
- voting more than once;
- coercing a voter's choice on an absentee ballot;
- using a false name and/or signature on an absentee ballot;
- destroying or misappropriating an absentee ballot;
- felons, or in some states ex-felons, who vote when they know they are ineligible to do so;
- misleading an ex-felon about his or her right to vote;
- voting by non-citizens who know they are ineligible to do so;
- intimidating practices aimed at vote suppression or deterrence, including the abuse of challenge laws;
- deceiving voters with false information (e.g.; deliberately directing voters to the wrong polling place or providing false information on polling hours and dates);
- knowingly failing to accept voter registration applications, to provide ballots, or to accept and count voted ballots in accordance with the Uniformed and Overseas Citizens Absentee Voting Act;
- intentional miscounting of ballots by election officials;
- intentional misrepresentation of vote tallies by election officials;

030897

- acting in any other manner with the intention of suppressing voter registration or voting, or interfering with vote counting and the certification of the vote.

Voting fraud does not include mistakes made in the course of voter registration, balloting, or tabulating ballots and certifying results. For purposes of the EAC study, it also does not include violations of campaign finance laws.

## Interviews

### Common Themes

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, “dead” voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud, although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.
- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate -- including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now and is focusing on matters such as noncitizen voting, double voting and felon voting. While the civil rights section continues to focus on systemic patterns of malfeasance, the public integrity section is focusing now on individuals, on isolated instances of fraud.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

Common Recommendations:

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.
  - With respect to the civil rights section, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one’s definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and the section has not pursued any such cases.
  - Craig Donsanto of the public integrity section says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases the department is investigating and the number of indictments the section is pursuing are both up dramatically. Since 2002, the department has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so it can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment
- Several people advocate passage of Senator Barak Obama’s “deceptive practices” bill
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected nonpartisanly they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas is a problem that must be addressed in some fashion. Suggestions included moving

election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the scheme contemplated in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

**List of Experts Interviewed**

Wade Henderson, Executive Director, Leadership Conference for Civil Rights

Wendy Weiser, Deputy Director, Democracy Program, The Brennan Center

William Groth, attorney for the plaintiffs in the Indiana voter identification litigation

Sharon Priest, former Secretary of State, Arkansas

## **Nexis Articles Analysis**

Note: The search terms used were ones agreed upon by both Job Serebrov and Tova Wang and are available upon request. A more systematic, numerical analysis of the data contained in the Nexis charts is currently being undertaken. What follows is an overview.

Recommendation: In phase 2, consultants should conduct a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **Overview of the Articles**

### *Absentee Ballots*

According to press reports, absentee ballots are abused in a variety of ways:

1. Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters
2. Workers for groups and individuals have attempted to vote absentee in the names of the deceased
3. Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

### *Voter Registration Fraud*

According to press reports, the following types of allegations of voter registration fraud are most common:

1. Registering in the name of dead people
2. Fake names and other information on voter registration forms
3. Illegitimate addresses used on voter registration forms
4. Voters being tricked into registering for a particular party under false pretenses

5. Destruction of voter registration forms depending on the party the voter registered with

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported on included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota and Wisconsin.

*Voter Intimidation and Suppression*

This is the area which had the most articles in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places.
- Improper demands for identification
- Poll watchers harassing voters
- Poll workers being hostile to or aggressively challenging voters
- Disproportionate police presence
- Poll watchers wearing clothes with messages that seemed intended to intimidate
- Insufficient voting machines and unmanageably long lines

Although the incidents reported on occurred everywhere, not surprisingly, many came from "battleground" states. There were several such reports out of Florida, Ohio and Pennsylvania.

*"Dead Voters and Multiple Voting"*

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations

turning out to be accurate according to investigations by the newspapers themselves, elections officials and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking of voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person taking criminal advantage of that. In total, the San Francisco Chronicle found 5 such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### *Vote Buying*

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations in three particular jurisdictions as detailed in the vote buying summary. There were more official investigations, indictments and convictions/pleas in this area. All of these cases are concentrated in the Midwest and South.

### *Deceptive Practices*

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction

030908

of voter registration forms. There were no reports of prosecutions or any other legal proceeding.

*Non-citizen Voting*

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case charges were filed against ten individuals. In one case a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this nexis search, remained just allegations of noncitizen voting.

*Felon Voting*

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem has the large number of ineligible felons that remained on the voting list.

*Election Official Fraud*

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

**Rough Summary of Department of Justice, Public Integrity Section Activities,  
October 2002-January 2006\***

Prosecutions and Convictions-- Individuals

Noncitizen voting: 20  
Vote buying: 49  
Double voting: 12  
Registration fraud: 13  
Civil Rights: 4  
Voter Intimidation: 2  
Unclear: 1

Open Investigations (note: a few cases overlap with prosecutions and convictions)

Noncitizen voting: 3  
Vote buying: 25  
Double voting: 15  
Registration fraud: 29  
Absentee ballot fraud: 9  
Official: 8  
Ineligibles: 4  
Deceptive Practices: 1  
Civil Rights: 14  
Intimidation: 6  
Other: 2

Cases and Investigations Closed for Lack of Evidence

Civil Rights: 8  
Official: 12  
Registration Fraud: 12  
Absentee Ballot Fraud: 14  
Ineligible Voting: 3  
Intimidation: 8  
Double Voting: 5  
Ballot Box Stuffing: 1  
Vote Buying: 14  
Ballot/machine tampering: 2  
Other: 8  
Unclear: 3

\*Based upon information available as of January 2006

## Case Summaries

After reviewing over 40,000 cases, the majority of which came from appeals courts, I have found comparatively very few which are applicable to this study. Of those that are applicable, no apparent thematic pattern emerges. However, it seems that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility. But because so few cases provided a picture of these current problems, I suggest that case research for the second phase of this project concentrate on state trial-level decisions.

**Determining a Methodology for Measuring Voter Fraud and Intimidation:  
Recommendations of Political Scientists**

The following is a summary of interviews conducted with a number of political scientists and experts in the field as to how one might undertake a comprehensive examination of voter fraud and intimidation. A list of the individuals interviewed and their ideas are available, and all of the individuals welcome any further questions or explanations of their recommended procedures.

- 1) In analyzing instances of alleged fraud and intimidation, we should look to criminology as a model. In criminology, experts use two sources: the Uniform Crime Reports, which are all reports made to the police, and the Victimization Survey, which asks the general public whether a particular incident has happened to them. After surveying what the most common allegations are, we should conduct a survey of the general public that ask whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data collection. (Stephen Ansolobhere, MIT)
- 2) Several political scientists with expertise in these types of studies recommended a methodology that includes interviews, focus groups, and a limited survey. In determining who to interview and where the focus groups should be drawn from, they recommend the following procedure:
  - Pick a number of places that have historically had many reports of fraud and/or intimidation; from that pool pick 10 that are geographically and demographically diverse, and have had a diversity of problems
  - Pick a number of places that have not had many reports of fraud and/or intimidation; from that pool pick 10 places that match the geographic and demographic make-up of the previous ten above (and, if possible, have comparable elections practices)
  - Assess the resulting overall reports and impressions resulting from these interviews and focus groups, and examine comparisons and differences among the states and what may give rise to them.

In conducting a survey of elections officials, district attorneys, district election officers, they recommend that:

- The survey sample be large in order to be able to get the necessary subsets
- The survey must include a random set of counties where there have and have not been a large number of allegations

(Allan Lichtman, American University; Thad Hall, University of Utah; Bernard Grofman, UC – Irvine)

- 3) Another political scientist recommended employing a methodology that relies on qualitative data drawn from in-depth interviews with key critics and experts on all sides of the debate on fraud; quantitative data collected through a survey of state and local elections and law enforcement officials; and case studies. Case studies should focus on the five or ten states, regions or cities where there has been a history of election fraud to examine past and present problems. The survey should be mailed to each state's attorney general and secretary of state, each county district attorney's office and each county board of elections in the 50 states. (Lorraine Minnite, Barnard College)
- 4) The research should be a two-step process. Using LexisNexis and other research tools, a search should be conducted of news media accounts over the past decade. Second, interviews with a systematic sample of election officials nationwide and in selected states should be conducted. (Chandler Davidson, Rice University)
- 5) One expert in the field posits that we can never come up with a number that accurately represents either the incidence of fraud or the incidence of voter intimidation. Therefore, the better approach is to do an assessment of what is most likely to happen, what election violations are most likely to be committed – in other words, a risk analysis. This would include an analysis of what it would actually take to commit various acts, e.g. the cost/benefit of each kind of violation. From there we could rank the likely prevalence of each type of activity and examine what measures are or could be effective in combating them. (Wendy Weiser, Brennan Center of New York University)
- 6) Replicate a study in the United States done abroad by Susan Hyde of the University of California- San Diego examining the impact of impartial poll site observers on the incidence of election fraud. Doing this retrospectively would require the following steps:
  - Find out where there were federal observers
  - Get precinct level voting information for those places
  - Analyze whether there was any difference in election outcomes in those places with and without observers, and whether any of these results seem anomalous.

Despite the tremendous differences in the political landscapes of the countries examined by Hyde in previous studies and the U.S., Hyde believes this study could be effectively replicated in this country by sending observers to a random sample of precincts. Rather than compare the incumbent's vote share, such factors such as voter complaints, voter turnout, number of provisional ballots used, composition of the electorate, as well as any anomalous voting results could be compared between sites with and without monitors.

For example, if intimidation is occurring, and if reputable monitors make intimidation less likely or voters more confident, then turnout should be higher on average in monitored precincts than in unmonitored precincts. If polling station officials are intentionally refusing to issue provisional ballots, and the polling station officials are

more likely to adhere to regulations while being monitored, the average number of provisional ballots should be higher in monitored precincts than in unmonitored precincts. If monitors cause polling station officials to adhere more closely to regulations, then there should be fewer complaints (in general) about monitored than unmonitored precincts (this could also be reversed if monitors made voters more likely to complain).

Again, random assignment controls for all of the other factors that otherwise influence these variables.

One of the downsides of this approach is it does not get at some forms of fraud, e.g. absentee ballot fraud; those would have to be analyzed separately

7) Another political scientist recommends conducting an analysis of vote fraud claims and purging of registration rolls by list matching. Allegations of illegal voting often are based on matching of names and birth dates. Alleged instances of double voting are based on matching the names and birth dates of persons found on voting records. Allegations of ineligible felon (depending on state law), deceased, and of non-citizen voting are based on matching lists of names, birth dates, and sometimes addresses of such people against a voting records. Anyone with basic relational database skills can perform such matching in a matter of minutes.

However, there are a number of pitfalls for the unwary that can lead to grossly over-estimating the number of fraudulent votes, such as missing or ignored middle names and suffixes or matching on missing birth dates. Furthermore, there is a surprising statistical fact that a group of about three hundred people with the same first and last name are almost assured to share the exact same birth date, including year. In a large state, it is not uncommon for hundreds of Robert Smiths (and other common names) to have voted. Thus, allegations of vote fraud or purging of voter registration rolls by list matching almost assuredly will find a large proportion of false positives: people who voted legally or are registered to vote legally.

Statistics can be rigorously applied to determine how many names would be expected to be matched by chance. A simulation approach is best applied here: randomly assign a birth date to an arbitrary number of people and observe how many match within the list or across lists. The simulation is repeated many times to average out the variation due to chance. The results can then be matched back to actual voting records and purge lists, for example, in the hotly contested states of Ohio or Florida, or in states with Election Day registration where there are concerns that easy access to voting permits double voting. This analysis will rigorously identify the magnitude alleged voter fraud, and may very well find instances of alleged fraud that exceed what might have otherwise happened by chance.

This same political scientist also recommends another way to examine the problem: look at statistics on provisional voting: the number cast might provide indications of intimidation (people being challenged at the polls) and the number of those not counted

would be indications of "vote fraud." One could look at those jurisdictions in the Election Day Survey with a disproportionate number of provisional ballots cast and cross reference it with demographics and number of provisional ballots discarded. (Michael McDonald, George Mason University)

- 8) Spencer Overton, in a forthcoming law review article entitled *Voter Identification*, suggests a methodology that employs three approaches— investigations of voter fraud, random surveys of voters who purported to vote, and an examination of death rolls provide a better understanding of the frequency of fraud. He says all three approaches have strengths and weaknesses, and thus the best studies would employ all three to assess the extent of voter fraud. An excerpt follows:

1. *Investigations and Prosecutions of Voter Fraud*

Policymakers should develop databases that record all investigations, allegations, charges, trials, convictions, acquittals, and plea bargains regarding voter fraud. Existing studies are incomplete but provide some insight. For example, a statewide survey of each of Ohio's 88 county boards of elections found only four instances of ineligible persons attempting to vote out of a total of 9,078,728 votes cast in the state's 2002 and 2004 general elections. This is a fraud rate of 0.00000045 percent. The Carter-Baker Commission's Report noted that since October 2002, federal officials had charged 89 individuals with casting multiple votes, providing false information about their felon status, buying votes, submitting false voter registration information, and voting improperly as a non-citizen. Examined in the context of the 196,139,871 ballots cast between October 2002 and August 2005, this represents a fraud rate of 0.0000005 percent (note also that not all of the activities charged would have been prevented by a photo identification requirement).

A more comprehensive study should distinguish voter fraud that could be prevented by a photo identification requirement from other types of fraud — such as absentee voting and stuffing ballot boxes — and obtain statistics on the factors that led law enforcement to prosecute fraud. The study would demand significant resources because it would require that researchers interview and pour over the records of local district attorneys and election boards.

Hard data on investigations, allegations, charges, pleas, and prosecutions is important because it quantifies the amount of fraud officials detect. Even if prosecutors vigorously pursue voter fraud, however, the number of fraud cases charged probably does not capture the total amount of voter fraud. Information on official investigations, charges, and prosecutions should be supplemented by surveys of voters and a comparison of voting rolls to death rolls.

2. *Random Surveys of Voters*

Random surveys could give insight about the percentage of votes cast fraudulently. For example, political scientists could contact a statistically representative sampling of 1,000 people who purportedly voted at the polls in the last election, ask them if they actually voted, and confirm the percentage who are valid voters. Researchers should conduct the survey soon after an election to locate as many legitimate voters as possible with fresh memories.

Because many respondents would perceive voting as a social good, some who did not vote might claim that they did, which may underestimate the extent of fraud. A surveyor might mitigate this skew through the framing of the question (“I’ve got a record that you voted. Is that true?”).

Further, some voters will not be located by researchers and others will refuse to talk to researchers. Photo identification proponents might construe these non-respondents as improper registrations that were used to commit voter fraud.

Instead of surveying all voters to determine the amount of fraud, researchers might reduce the margin of error by focusing on a random sampling of voters who signed affidavits in the three states that request photo identification but also allow voters to establish their identity through affidavit—Florida, Louisiana, and South Dakota. In South Dakota, for example, only two percent of voters signed affidavits to establish their identity. If the survey indicates that 95 percent of those who signed affidavits are legitimate voters (and the other 5 percent were shown to be either fraudulent or were non-responsive), this suggests that voter fraud accounts for, at the maximum, 0.1 percent of ballots cast.

The affidavit study, however, is limited to three states, and it is unclear whether this sample is representative of other states (the difficulty may be magnified in Louisiana in the aftermath of Hurricane Katrina’s displacement of hundreds of thousands of voters). Further, the affidavit study reveals information about the amount of fraud in a photo identification state with an affidavit exception—more voter fraud may exist in a state that does not request photo identification.

### 3. *Examining Death Rolls*

A comparison of death rolls to voting rolls might also provide an estimate of fraud.

Imagine that one million people live in state A, which has no documentary identification requirement. Death records show that 20,000 people passed away in state A in 2003. A cross-referencing of this list to the voter rolls shows that 10,000 of those who died were registered voters, and these names remained on the voter rolls during the November 2004 election. Researchers would look at what percentage of the 10,000 dead-but-registered people who “voted” in the November 2004 election. A researcher should distinguish the votes cast in the name of the dead at the polls from those cast

absentee (which a photo identification requirement would not prevent). This number would be extrapolated to the electorate as a whole.

This methodology also has its strengths and weaknesses. If fraudulent voters target the dead, the study might overestimate the fraud that exists among living voters (although a low incidence of fraud among deceased voters might suggest that fraud among all voters is low). The appearance of fraud also might be inflated by false positives produced by a computer match of different people with the same name. Photo identification advocates would likely assert that the rate of voter fraud could be higher among fictitious names registered, and that the death record survey would not capture that type of fraud because fictitious names registered would not show up in the death records. Nevertheless, this study, combined with the other two, would provide important insight into the magnitude of fraud likely to exist in the absence of a photo identification requirement.

**U.S. ELECTION ASSISTANCE COMMISSION**  
**1225 New York Ave. NW - Suite 1100**  
**Washington, DC 20005**

May 12, 2006

**MEMORANDUM**

**TO:** EAC Commissioners

**FROM:** Peggy Sims, Election Research Specialist *PS*

**SUBJECT:** Voting Fraud-Voter Intimidation Working Group Meeting

The first meeting of the Voting Fraud-Voter Intimidation Working Group will take place from 1:00 PM to 5:30 PM on Thursday, May 18th, 2006 at the offices of the U.S. Election Assistance Commission (EAC), 1225 New York Avenue, NW, 11<sup>th</sup> Floor, Washington, DC.

As you know, Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority. Consequently, in September 2005, EAC contracted with two consultants (Job Serebrov and Tova Wang) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;

030918

- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

For your information, the folder accompanying this letter includes a number of items related to our consultants' preliminary research and the upcoming meeting:

- a meeting agenda;
- a list of Working Group members;
- a draft definition of election fraud;
- a list of reports and literature reviewed;
- a summary of interviews conducted and a list of experts interviewed;
- a list of experts interviewed;
- an analysis of news articles researched through Nexis;
- a summary of Department of Justice, Public Integrity Section cases, October 2002-January 2006;
- an analysis of case law review;
- a summary of research methodology recommendations from political scientists and experts in the field; and
- a CD with summaries of individual reports and literature reviewed, summaries of individual interviews, charts and summaries of news articles, and case law summary charts.

Please let me know if you have any questions.

Enclosures

Julie Thompson-Hodgkins, General Counsel  
Gavin Gilmour, Associate General Counsel

# CHARTER OF THE U.S. ELECTION ASSISTANCE COMMISSION STANDARDS BOARD

## *Official Designation: Election Assistance Commission Standards Board*

The U.S. Election Assistance Commission (EAC) hereby Charters the Standards Board established in title II section 211 of the Help America Vote Act of 2002 (HAVA) [Public Law 107-252] pursuant to the Federal Advisory Committee Act.

### OBJECTIVES AND DUTIES

1. The objective of the Standards Board (the Board) is to advise the EAC through review of the voluntary voting systems guidelines (VVSG) described in title II Part 3 of the HAVA when the EAC proposes updates to the VVSG; through review of the voluntary guidance described under title III of HAVA; and through the review of the best practices recommendations contained in the report submitted under Section 242(b) of title II of HAVA.

2. The Board will function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act.

### MEMBERSHIP

1. The Board shall consist of 110 members. Fifty-five members shall be State election officials selected by the chief State election official of each State. Fifty-five shall be local election officials selected under a process supervised by the chief election official of the State. The two members of the Standards Board who represent the same State may not be members of the same political party. (HAVA

176080

title II section 213 (a)). Vacancy appointments shall be made in the same manner as the original appointments.

2. The Board shall select nine of its members as an Executive Board of whom, not more than five may be State election officials; not more than five may be local election officials; and not more than five may be members of the same political party. Members of the Executive Board shall serve two year terms and may not serve more than three consecutive terms. Of the initial Executive Board, three members shall serve for one term; three shall serve for two consecutive terms; and three shall serve for three consecutive terms, as determined by lot at the time the members are first appointed (HAVA title II, section 213 (c)).

#### **ADMINISTRATIVE PROVISIONS**

1. The Board will report to the EAC through the Advisory Committee Management Officer pursuant to 5 U.S.C. App.1 section 8 (b). This officer shall be a member of the EAC staff designated by the Chairman of the EAC.

2. The Board will meet as necessary to carry out the functions, duties and responsibilities of the Standards Board and not less frequently than once every two years for purposes of selecting the Executive Board. Additional meetings may be called at such other times as it considers appropriate for the purposes of conducting other business as it considers appropriate consistent with title II of HAVA. (HAVA title II, section 215 (a)(2)).

3. The EAC will provide clerical and other necessary support services to the Board. (HAVA title II, section 215 (d)).

4. Members of the Board will not be compensated for their services but will be reimbursed for travel expenses and subsistence. (HAVA title II section 215 (e)).

5. The Board may use the United States mails in the same manner and under the same conditions as a department or agency of the Federal Government. (HAVA title II, section 215 (c)).

6. The annual cost for operating the Board is estimated at \$352,256.00 which includes one quarter staff year for support services.

7. The Board may establish such committees of its members as may be necessary subject to the provisions of the law.

8. The Board may, by simple majority vote, adopt resolutions and make recommendations. Such resolutions and recommendations will, however, be only advisory to the EAC and will be restricted to the EAC's activities described in title II section 212 of the Help America Vote Act of 2002.

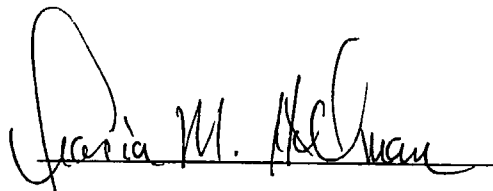

9. The EAC will provide liaison services between the Board and the Advisory Panel Secretariat as required by the Federal Advisory Committee Act.

#### DURATION

While the duration of the Board is continuing, the Charter shall be renewed every two years from the date of the filing.

8 July 2006

Date

  
Gracia M. Hillman, Commissioner

U.S. Election Assistance Commission

[Billing Code 6820- KF]

030923

## **CHARTER OF THE U.S. ELECTION ASSISTANCE COMMISSION BOARD OF ADVISORS**

The U.S. Election Assistance Commission (EAC) hereby Charters the Board of Advisors established in title II section 211 of the Help America Vote Act of 2002 (HAVA) [Public Law 107-252] pursuant to the Federal Advisory Committee Act.

### **OBJECTIVES AND DUTIES**

1. The objective of the Board of Advisors (the Board) is to advise the EAC through review of the voluntary voting systems guidelines described in title II Part 3 of the HAVA; through review of the voluntary guidance described under title III of HAVA; and through the review of the best practices recommendations contained in the report submitted under Section 242(b) of title II (HAVA title II section 212).

2. The Board will function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act.

### **MEMBERSHIP**

1. The Board shall consist of the following:

- Two members appointed by the National Governors Association.
- Two members appointed by the National Conference of State Legislatures.
- Two members appointed by the National Association

- of Secretaries of State.
- Two members appointed by the National Association of State Election Directors.
- Two members appointed by the National Association of Counties.
- Two members appointed by the National Association of County Recorders, Election Administrators, and Clerks.
- Two members appointed by the United States Conference of Mayors.
- Two members appointed by the Election Center.
- Two members appointed by the International Association of County Recorders, Election Officials, and Treasurers.
- Two members appointed by the United States Commission on Civil Rights.
- Two members appointed by the Architectural and Transportation Barrier Compliance Board under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792).
- The chief of the Office of Public Integrity of the Department of Justice, or the chief's designee.
- The Chief of the Voting Section of the Civil Rights Division of the Department of Justice or the chief's designee.
- The director of the Federal Voting Assistance Program of the Department of Defense.
- Four members representing professionals in the field of science and technology, of whom—
  - (A) one each shall be appointed by the Speaker and the Minority Leader of the House of Representatives; and
  - (B) one each shall be appointed by the Majority Leader and the Minority Leader of the Senate.
- Eight members representing voter interests, of whom—

(A) four members shall be appointed by the Committee on House Administration of the House of Representatives, of whom two shall be appointed by the chair and two shall be appointed by the ranking minority member; and (B) four members shall be appointed by the Committee on Rules and Administration of the Senate, of whom two shall be appointed by the chair and two shall be appointed by the ranking minority member. (HAVA title II section 214 (a)).

2. Vacancy appointments shall be made in the same manner as the original appointments.

3. Members of the Board shall serve for a term of 2 years and may be reappointed.

4. The Board shall elect a Chair from among its members.

#### **ADMINISTRATIVE PROVISIONS**

1. The Board will report to the EAC through the Advisory Committee Management Officer pursuant to 5 U.S.C. App.1 section 8 (b). This officer shall be an EAC Commissioner designated by the Chairman of the EAC.

2. The Board will meet a minimum of once a year for purposes of voting on the voluntary voting system guidelines. Additional meetings may be called at such other times as it considers appropriate for the purposes of conducting other business as it considers appropriate consistent with title II of HAVA. (HAVA title II, section 215 (a)(2)).

3. The EAC and GAO will provide clerical and other necessary support services to the Board. (HAVA title II, section 215 (d)).

4. Members of the Board will not be compensated for their services but will be reimbursed for travel expenses and subsistence. (HAVA title II section 215 (e)).

5. The Board may use the United States mails in the same manner and under the same conditions as a department or agency of the Federal Government. (HAVA title II, section 215 (c)).

6. The annual cost for operating the Board is estimated at \$100,000 which includes one quarter staff year for support services.

7. The Board may establish such committees of its members as may be necessary subject to the provisions of the law.

8. The Board may, by simple majority vote, adopt resolutions and make recommendations. Such resolutions and recommendations will, however, be only advisory to the EAC and will be restricted to the EAC's activities described in title II section 212 of the Help America Vote Act of 2002.

9. The EAC will provide liaison services between the Board and the Advisory Panel Secretariat as required by the Federal Advisory Committee Act.

#### **DURATION**

This is a permanent committee as established in title II section 215 (f) of the Help America Vote Act of 2002.

**CHARTER OF THE  
U.S. ELECTION ASSISTANCE COMMISSION  
TECHNICAL GUIDELINES  
DEVELOPMENT COMMITTEE**

**ESTABLISHMENT:**

In accordance with the requirements of Section 221 of the Help America Vote Act of 2002 (P. L. 107-252), hereinafter referred to as the Act, the Election Assistance Commission (the "Commission") hereby establishes the Technical Guidelines Development Committee (the "Committee"), pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. 2.

**OBJECTIVES AND DUTIES:**

Pursuant to 42 U.S.C. § 15361(b)(1), the Committee will act in the public interest to assist the Executive Director of the Commission in the development of the voluntary voting system guidelines.

**MEMBERS AND CHAIRPERSON:**

Membership: shall be composed of:

1. The Director of the National Institute of Standards and Technology (NIST) who shall serve as its chair.
2. A group of 14 other individuals appointed jointly by the Commission and the Director of NIST, consisting of the following:
  - A. An equal number of each of the following:  
Members of the Standards Board,  
Members of the Board of Advisors,  
Members of the Architectural and Transportation Barrier, and  
Compliance Board (Access Board).
  - B. A representative of the American National Standards Institute.
  - C. A representative of the IEEE.
  - D. Two representatives of the NASED selected by such Association who are not members of the Standards Board or Board of Advisors, and who are not of the same political party.
  - E. Other individuals with technical and scientific expertise relating to voting systems and voting equipment.

**ADMINISTRATIVE PROVISIONS:**

1. The Committee shall report to the Executive Director of the Commission.
2. Selected staff within NIST's Information Technology Laboratory will provide staff support for the Committee.
3. The Committee shall meet at least three times per year, quarterly. The Chair of the EAC shall call the first meeting of the Committee. Thereafter, the Chair of the EAC or the Chair of the TGDC may call a meeting of the Committee.
4. Members of the Committee shall not be compensated for their services, but will, upon request, be allowed travel and per diem expenses in accordance with 5 U.S.C. 5701 et seq., while attending meetings of the Committee or subcommittees thereof, or while otherwise performing duties at the request of the Chair, while away from their homes or regular places of business.
5. The Committee shall function solely as an advisory body, in accordance with the provisions of the Federal Advisory Committee Act.
6. The annual cost of operating the Committee is estimated at \$2.8 million, including all direct and indirect expenses. It is estimated that six FTE will be required to support the TGDC.
7. The Committee shall not act in the absence of a quorum, which shall consist of a simple majority of the members of the Committee not having a conflict of interest in the matter being considered by the Committee, except that, if the number of members on the Committee is even, half will suffice.
8. The EAC will create any subcommittees of the TGDC that may be necessary to accomplish the TGDC's function. In addition, the EAC will establish such operating procedures as required to support the TGDC, consistent with the Federal Advisory Committee Act, as amended.

**DURATION:**

While the duration of the Committee is continuing, the Charter shall be renewed every two years from the date of filing.

**CHARTER FILING DATE:**

This Charter was filed on the 23 day of June, 2004.

030920

Westlaw.

Arizona Revised Statutes Annotated Currentness

Title 16. Elections and Electors (Refs & Annos)

▣ Chapter 7. Penal Provisions (Refs & Annos)

▣ Article 1. General Provisions (Refs & Annos)

**→§ 16-1014. Corruption of electors; classification**

**A.** It is unlawful for a person, directly or indirectly, by himself or through any other person knowingly:

1. To treat, give, pay, loan, contribute, offer or promise money or other valuable consideration, or to give, offer or promise an office, place or employment, or to promise or to procure or endeavor to procure an office, place or employment, to or for a voter, or to or for any other person, to induce the voter to vote or refrain from voting at an election for any particular person or measure, or to induce the voter to go to the polls, or remain away from the polls at an election, or on account of the voter having voted or refrained from voting for any particular person or measure, or having gone to the polls or remained away from the polls at an election.

2. To advance or pay or cause to be paid, money or other valuable consideration to or for the use of any other person with the intent that it, or any part thereof, be used for bribery at any election provided by law, or to knowingly pay or cause to be paid money or other valuable thing to any person in discharge or repayment of money, wholly or in part expended for bribery at any election.

3. To receive, agree or contract for, before, during or after an election provided by law, money, gifts, loans or other valuable consideration, office, place or employment for himself or other person, for voting or agreeing to vote, or for going or agreeing to go to the polls, or for refraining or agreeing to refrain from voting for a particular person or measure, or for inducing any person to vote or refrain from voting, or to vote or refrain from voting for a particular person or measure at an election.

**B.** A person violating any provision of this section is guilty of a class 2 misdemeanor.

A person who commits any of the following acts is guilty of a class 2 misdemeanor:

1. Knowingly electioneers on election day within a polling place or in a public manner within seventy-five feet of the main outside entrance of a polling place or on-site early voting location established by a county recorder pursuant to § 16-542, subsection A.
2. Intentionally disables or removes from the polling place, on-site early voting location or custody of an election official a voting machine or a voting record.
3. Knowingly removes an official ballot from a polling place before closing the polls.
4. Shows the voter's ballot or the machine on which the voter has voted to any person after it is prepared for voting in such a manner as to reveal the contents, except to an authorized person lawfully assisting the voter.
5. Knowingly solicits a voter to show the voter's ballot, or receives from a voter a ballot prepared for voting, unless the person is an election official or unless otherwise authorized by law.
6. Knowingly receives an official ballot from a person other than an election official having charge of the ballots.
7. Knowingly delivers an official ballot to a voter, unless the voter is an election official.
8. Except for a completed ballot transmitted by an elector by fax pursuant to § 16-543, knowingly places a mark on the voter's ballot by which it can be identified as the one voted by the voter.
9. After having received a ballot as a voter, knowingly fails to return the ballot to the election official before leaving the polling place or on-site early voting location.

NOTES OF DECISIONS

**Injunctions 1**

1. Injunctions

The state, through its Attorney General, may maintain a bill in equity in its sovereign capacity to enjoin a conspiracy to commit illegal and fraudulent acts which will result in the pollution of the ballot box and the perversion of an election, though the acts charged if committed, constitute criminal offenses. *People v. Tool*, 1905, 86 P. 224, 35 Colo. 225, 117 Am.St.Rep. 198. States ↪ 192

The interest of the state in a pure election is not limited to the protection which may be afforded by the punishment of those, through criminal prosecutions, who violate the laws relating to elections by padding registration lists, permitting repeating, and falsifying election returns, but equity will afford protection by enjoining the crime. *People v. Tool*, 1905, 86 P. 224, 35 Colo. 225, 117 Am.St.Rep. 198. Injunction ↪ 78

**→§ 1-13-102. Sufficiency of complaint--judicial notice**

Irregularities or defects in the mode of calling, giving notice of, convening, holding, or conducting any general, primary, or congressional vacancy election authorized by law constitute no defense to a prosecution for a violation of this code. When an offense is committed in relation to any general, primary, or congressional vacancy election, an indictment, information, or complaint for such offense is sufficient if it alleges that such election was authorized by law without stating the call or notice of the election, the names of the judges holding such election, or the names of the persons voted for at such election. Judicial notice shall be taken of the holding of any general, primary, or congressional vacancy election.

Title 1. Elections (Refs & Annos)

General, Primary, and Congressional Vacancy Elections

▣ Article 13. Election Offenses (Refs & Annos)

▣ Part 1. Offenses--General Provisions

**→§ 1-13-109. False statements relating to candidates or questions submitted to electors—penalties—definitions**

(1)(a) No person shall knowingly make, publish, broadcast, or circulate or cause to be made, published, broadcasted, or circulated in any letter, circular, advertisement, or poster or in any other communication any false statement designed to affect the vote on any issue submitted to the electors at any election or relating to any candidate for election to public office.

(b) Any person who violates any provision of paragraph (a) of this subsection (1) commits a class 1 misdemeanor and, upon conviction thereof, shall be punished as provided in section 18-1.3-501, C.R.S.

(2)(a) No person shall recklessly make, publish, broadcast, or circulate or cause to be made, published, broadcasted, or circulated in any letter, circular, advertisement, or poster or in any other communication any false statement designed to affect the vote on any issue submitted to the electors at any election or relating to any candidate for election to public office. Notwithstanding any other provision of law, for purposes of this subsection (2), a person acts "recklessly" when he or she acts in conscious disregard of the truth or falsity of the statement made, published, broadcasted, or circulated.

(b) Any person who violates any provision of paragraph (a) of this subsection (2) commits a class 2 misdemeanor and, upon conviction thereof, shall be punished as provided in section 18-1.3-501, C.R.S.

(3) For purposes of this section, "person" means any natural person, partnership, committee, association, corporation, labor organization, political party, or other organization or group of persons, including a group organized under section 527 of the Internal Revenue Code.

C.R.S.A. § 1-13-201

West's Colorado Revised Statutes Annotated Currentness

Title 1. Elections (Refs & Annos)

General, Primary, and Congressional Vacancy Elections

▣ Article 13. Election Offenses (Refs & Annos)

▣ Part 2. Offenses--Qualifications and Registration of Electors (Refs & Annos)

**→ § 1-13-201. Interfering with or impeding registration**

Any person who intentionally interferes with or impedes the registration of electors, whether by act of commission or by failure to perform any act or duty imposed or required for the proper administration of parts 2 and 3 of article 2 of this title, or who knowingly permits or encourages another to do so is guilty of a misdemeanor and, upon conviction thereof, shall be punished as provided in section 1-13-111. A person who collects a voter registration application from an eligible elector for mailing or delivery to the county clerk and recorder and who fails to mail or deliver the application to the proper county clerk and recorder within five business days after the application is signed is guilty of a violation of this section.

▣ Part 7. Offenses--Conduct of Elections (Refs &amp; Annos)

**→§ 1-13-714. Electioneering--removing and return of ballot**

No person shall do any electioneering on the day of any election within any polling place or in any public street or room or in any public manner within one hundred feet of any building in which a polling place is located, as publicly posted by the designated election official. As used in this section, the term "electioneering" includes campaigning for or against any candidate who is on the ballot or any ballot issue or ballot question that is on the ballot. "Electioneering" also includes soliciting signatures for a candidate petition, a recall petition, or a petition to place a ballot issue or ballot question on a subsequent ballot. "Electioneering" shall not include a respectful display of the American flag. No person shall remove any official ballot from the polling place before the closing of the polls. Any person who violates any provision of this section is guilty of a misdemeanor and, upon conviction thereof, shall be punished as provided in section 1-13-111.

▣ Article 13. Election Offenses (Refs & Annos)

▣ Part 7. Offenses--Conduct of Elections (Refs & Annos)

**→§ 1-13-715. Liquor in or near polling place**

(1) It is unlawful for any election official or other person to introduce into any polling place, or to use therein, or to offer to another for use therein, at any time while any election is in progress or the result thereof is being ascertained by the counting of the ballots, any intoxicating malt, spirituous, or vinous liquors.

(2) It is unlawful for any officer or board of officers of any county or any municipality, whether incorporated under general law or by special charter, who may at any time be by law charged with the duty of designating polling places for the holding of any general or congressional election therein, to select therefor a room wherein any intoxicating malt, spirituous, or vinous liquors are usually sold for consumption on the premises.

(3) Any person who violates any provision of this section is guilty of a misdemeanor and, upon conviction thereof, shall be punished as provided in section 1-13-111.

**CREDIT(S)**

Repealed and reenacted by Laws 1980, S.B.1, § 1. Amended by Laws 1983, S.B.187, § 31; Laws 1996, H.B.96-1061, § 52, eff. July 1, 1996.

**HISTORICAL AND STATUTORY NOTES**

2000 Main Volume

The 1996 amendment, in subsec. (2), deleted "or a room within the distance of fifty feet, measured in a direct line, of any place where any such liquors are usually sold for consumption on the premises" from the end.

**→§ 1-13-716. Destroying, removing, or delaying delivery of election records**

(1) No person shall willfully destroy, deface, or alter any ballot or any election records or willfully delay the delivery of any such ballots or election records, or take, carry away, conceal, or remove any ballot, ballot box, or election records from the polling place or from the possession of a person authorized by law to have the custody thereof, or aid, counsel, procure, advise, or assist any person to do any of the aforesaid acts.

(2) No election official who has undertaken to deliver the official ballots and election records to the county clerk and recorder shall neglect or refuse to do so within the time prescribed by law or shall fail to account fully for all official ballots and other records in his charge. Informality in the delivery of the ballots and election records shall not invalidate the vote of any precinct if such records are delivered prior to the canvassing of the votes by the county board of canvassers.

(3) Any person who violates any provision of this section is guilty of a misdemeanor and, upon conviction thereof, shall be punished as provided in section 1-13-111.

▣ Article 13. Election Offenses (Refs & Annos)

▣ Part 7. Offenses--Conduct of Elections (Refs & Annos)

**→§ 1-13-719. Employer's unlawful acts**

(1) It is unlawful for any employer, whether corporation, association, company, firm, or person, or any officer or agent of such employer:

(a) In any manner to control the action of his employees in casting their votes for or against any person or measure at any precinct caucus, assembly, or convention; or

(b) To refuse to an employee the privilege of taking time off to vote as provided by section 1-7-102, or to subject an employee to a penalty or reduction of wages because of the exercise of such privilege, or to violate any of the provisions of section 1-7-102 in any other way; or

(c) In paying his employees the salary or wages due them, to enclose their pay in pay envelopes upon which there is written or printed any political mottoes, devices, or arguments containing threats, express or implied, intended or calculated to influence the political opinions, views, or actions of such employees; or

(d) Within ninety days of any election provided by law, to put up or otherwise exhibit in his factory, workshop, mine, mill, boardinghouse, office, or other establishment or place where his employees may be working or be present in the course of such employment any handbill, notice, or placard containing any threat, notice, or information that, if any particular ticket or candidate is elected, work in his place or establishment will cease in whole or in part, or his establishment will be closed, or the wages of his workmen will be reduced or containing other threats, express or implied, intended or calculated to influence the political opinions or actions of his employees.

(2) Each offense mentioned in subsection (1) of this section is a misdemeanor, and, upon conviction thereof, the offender shall be punished as provided in section 1-13-111. In addition thereto, any corporation violating this section shall forfeit its charter and right to do business in this state.

**C**

West's Arkansas Code Annotated Currentness

Title 7. Elections

Chapter 1. General Provisions (Refs & Annos)

**→§ 7-1-103. Misdemeanors**

(a) The violation of any of the following shall be deemed misdemeanors punishable as provided in this section:

(1) It shall be unlawful for any person to appoint or offer to appoint anyone to any office or position of trust or for any person to influence, attempt to influence, or offer to influence the appointment, nomination, or election of any person to office in consideration of the support or assistance of the person for any candidate in any election in this state;

(2)(A) It shall be unlawful for any public servant, as defined in § 21-8-402, to devote any time or labor during usual office hours toward the campaign of any other candidate for office or for the nomination to any office; and

(B) It shall be unlawful for any public servant, as defined in § 21-8-402, to circulate an initiative or referendum petition or to solicit signatures on an initiative or referendum petition in any public office of the state, county, or municipal governments of Arkansas or during the usual office hours or while on duty for any state agency or any county or municipal government in Arkansas;

(3) It shall be unlawful for any public servant, as defined in § 21-8-402, to use any office or room furnished at public expense to distribute any letters, circulars, or other campaign materials unless such office or room is regularly used by members of the public for such purposes without regard to political affiliation. It shall further be unlawful for any public servant to use for campaign purposes any item of personal property provided with public funds;

(4) It shall be unlawful for any person to assess any public employee, as defined in § 21-8-402, for any political purpose whatever or to coerce by threats or otherwise any public employee into making a subscription or contribution for any political purpose;

(5) It shall be unlawful for any person employed in any capacity in any department of the State of Arkansas to have membership in any political party or organization which advocates the overthrow of our constitutional form of government;

(6) It shall be unlawful for any campaign banners, campaign signs, or other campaign literature to be placed on any cars, trucks, tractors, or other vehicles belonging to the State of Arkansas or any municipality or county in the state;

(7)(A) All articles, statements, or communications appearing in any newspaper printed or circulated in this state or on radio, television, or any other electronic medium intended or calculated to influence the vote of any elector in any election and for the publication of which a consideration is paid or to be paid shall clearly contain the words "Paid Political Advertisement" or "Paid Political Ad".

(B) Both the persons placing and the persons publishing the articles, statements, or communications shall be

031020

A.C.A. § 7-1-103

responsible for including the required disclaimer;

(8) Repealed by Acts of 1999, Act 1525, § 1, eff. July 30, 1999.

(9)(A) No election official acting in his official capacity shall do any electioneering on any election day or any day on which early voting is allowed. Except as provided in subdivisions (B) and (C) of this subdivision (a)(9), no person shall hand out or distribute or offer to hand out or distribute any campaign literature or any literature regarding any candidate or issue on the ballot, solicit signatures on any petition, solicit contributions for any charitable or other purpose, or do any electioneering of any kind whatsoever in the building or within one hundred feet (100') of the primary exterior entrance used by voters to the building containing the polling place on election day.

(B) During early voting days, no person shall hand out or distribute or offer to hand out or distribute any campaign literature or any literature regarding any candidate or issue on the ballot, solicit signatures on any petition, solicit contributions for any charitable or other purpose, or do any electioneering of any kind whatsoever during early voting hours in the building or within one hundred feet (100') of the primary exterior entrance used by voters to the building containing the early voting site nor engage in those activities with persons standing in line to vote whether within or without the courthouse.

(C) When the early voting occurs at a facility other than the county clerk's office, no person shall hand out or distribute or offer to hand out or distribute any campaign literature or any literature regarding any candidate or issue on the ballot, solicit signatures on any petition, solicit contributions for any charitable or other purpose, or do any electioneering of any kind whatsoever in the building or within one hundred feet (100') of the primary exterior entrance used by voters to the building containing the polling place;

(10) No election official shall perform any of the duties of the position before taking and subscribing to the oath provided for in § 7-4-110;

(11) No person applying for a ballot shall swear falsely to any oath administered by the election officials with reference to his or her qualifications to vote;

(12) No person shall willfully cause or attempt to cause his own name to be registered in any other election precinct than that in which he is or will be before the next ensuing election qualified as an elector;

(13) During any election, no person shall remove, tear down, or destroy any booths or supplies or other conveniences placed in any booth or polling site for the purpose of enabling the voter to prepare his ballot;

(14) No person shall take or carry any ballot obtained from any election official outside of the polling room or have in his possession outside of the polling room before the closing of the polls any ballot provided by any county election commissioners;

(15) No person shall furnish a ballot to any elector who cannot read informing him that it contains a name or names different from those which are written or printed thereon or shall change or mark the ballot of any elector who cannot read so as to prevent the elector from voting for any candidate, act, section, or constitutional amendment as the elector intended;

(16) No election official or other person shall unfold a ballot or without the express consent of the voter ascertain or attempt to ascertain any vote on a ballot before it is placed in the ballot box;

(17) No person shall print or cause to be printed any ballot for any election held under this act with the names of

© 2006 Thomson/West. No Claim to Orig. U.S. Govt. Works.

031030

A.C.A. § 7-1-103

the candidates appearing thereon in any other or different order or manner than provided by this act;

(18) No election official shall permit the vote of any person to be cast in any election precinct in this state in any election legally held in this state when the person does not appear in person at the election precinct and actually cast the vote. This subdivision shall not apply to persons entitled to cast absentee ballots;

(19)(A) No person shall vote or offer to vote more than one (1) time in any election held in this state, either in person or by absentee ballot, or shall vote in more than one (1) election precinct in any election held in this state.

(B) No person shall cast a ballot or vote in the preferential primary of one (1) political party and then cast a ballot or vote in the general primary of another political party in this state;

(20) No person shall:

(A) Vote, knowing himself not to be entitled to vote;

(B) Vote more than once at any election, or knowingly cast more than one (1) ballot, or attempt to do so;

(C) Alter or attempt to alter any ballot after it has been cast;

(D) Add or attempt to add any ballot to those legally polled at any election either by fraudulently introducing it into the ballot box before or after the ballots have been counted or at any other time or in any other manner with the intent or effect of affecting the count or recount of the ballots;

(E) Withdraw or attempt to withdraw any ballot lawfully polled with the intent or effect of affecting the count or recount of the ballots; or

(F) In any manner interfere with the officials lawfully conducting the election or the canvass or with the voters lawfully exercising their right to vote at the election;

(21) No person shall make any bet or wager upon the result of any election in this state;

(22) No election official, poll watcher, or any other person in or out of this state in any primary, general, or special election in this state shall divulge to any person the results of any votes cast for any candidate or on any issue in the election until after the closing of the polls on the day of the election. The provisions of this subdivision (22) shall not apply to any township or precinct in this state in which all of the registered voters therein have voted prior to the closing of the polls in those instances where there are fifteen (15) or fewer registered voters in the precinct or township; and

(23) Any person, election official, county clerk, or deputy clerk who violates any provisions of the absentee voting laws, § 7-5-401 et seq., shall be punished as provided in this section.

(b)(1) Except as otherwise provided, the violation of any provision of this section shall be a Class A misdemeanor.

(2)(A) Any person convicted under the provisions of this section shall thereafter be ineligible to hold any office or employment in any of the departments in this state.

(B)(i) If any person is convicted under the provisions of this section while employed by any of the departments of this state, he shall be removed from employment immediately.

(ii) If any person is convicted under the provisions of this section while holding public office, the conviction

001031

A.C.A. § 7-1-103

shall be deemed a misfeasance and malfeasance in office and shall subject the person to impeachment.

(c) Any violation of this act not covered by this section and § 7-1-104 shall be considered a Class A misdemeanor and shall be punishable as such.

## A.C.A. § 7-1-103

## 1. Electioneering

Evidence in proceeding alleging abridgment of right to vote established that county election officials did not prohibit voters from carrying voting aids into polling place but only that officials complied with Arkansas statute prohibiting handing out or distributing of campaign literature within 100 feet of polling place on election day. A.C.A. § 7-1-103(9). *McGruder v. Phillips County Election Com'n*, 1988, 850 F.2d 406. Counties ⇨ 38

## 2. Waiver of secrecy

Where it was impossible in primary election contest to identify ballot of voter, whose vote was challenged on ground that he had voted in wrong precinct, because his ballot stub could not be found, court properly permitted voter to waive secrecy of his ballot and state what candidate he voted for. *Wood v. Brown*, 1962, 235 Ark. 258, 235 Ark. 500, 361 S.W.2d 67. Elections ⇨ 154(10)

## 3. Domicile

Intention of a person as to where he resides is a question of fact. *Phillips v. Melton*, 1953, 222 Ark. 162, 257 S.W.2d 931. Domicile ⇨ 11

Where contestee in primary election contest questioned votes of two voters, who were husband and wife, and proved that they had been living in another state for nine years before election, trial court properly refused to allow contestant to show that voters had subjective intent to maintain residence in county of election, since proffered proof would not have established voters' right to vote in that county. *Wood v. Brown*, 1962, 235 Ark. 258, 235 Ark. 500, 361 S.W.2d 67. Elections ⇨ 154(10)

In election contest involving office of school director, evidence was sufficient to support finding that certain voters had not abandoned domicile in school district, even though they were living in another city. Ark.Stats. §§ 80-311, 80-318, 80-321. *Phillips v. Melton*, 1953, 222 Ark. 162, 257 S.W.2d 931. Elections ⇨ 295(1)

## 4. Betting on elections

Exceptionally strong case is made in primary election contest when losing candidate proves that election judge bet on outcome in violation of statutes. Ark.Stats. §§ 3-704, 3-801 et seq., 3-1516. *Wood v. Brown*, 1962, 235 Ark. 258, 235 Ark. 500, 361 S.W.2d 67. Elections ⇨ 154(10)

Betting on results of elections, including primary elections, is illegal and void, Crawford & Moses' Dig. § 3890. *Williams v. Kagy*, 1928, 176 Ark. 484, 3 S.W.2d 332. Gaming ⇨ 5

Wagers upon elections, then pending, are calculated to endanger the peace and harmony of society, and have a corrupting influence on the public morals, and have uniformly been considered as contrary to sound policy. *Jeffrey v. Ficklin*, 1841, 3 Ark. 227, 36 Am.Dec. 456, Unreported. Elections ⇨ 315

## 5. Availability of ballots

When ballots are not available in primary election contest, electors may be called to testify for whom they voted. *Wood v. Brown*, 1962, 235 Ark. 258, 235 Ark. 500, 361 S.W.2d 67. Elections ⇨ 154(10)

## 6. Intimidation of voter

A.C.A. § 7-1-103

Where voter on entering polling place told election judge that she was going to vote for one candidate and election judge told her that her husband had voted for another candidate and that her candidate would "tear up our school" and, as a result, voter cast her ballot for candidate recommended by election judge, discarding her vote was proper. Ark.Stats. § 3-1415. *Phillips v. Melton*, 1953, 222 Ark. 162, 257 S.W.2d 931. Elections ⇄ 227(9)

#### 7. Unlawful voting

Contention that voter improperly cast absentee ballot because he allegedly was not unavoidably absent from his precinct on election day was presented too late, where raised for first time on appeal and long after time for filing complaint in primary election contest. *Wood v. Brown*, 1962, 235 Ark. 258, 235 Ark. 500, 361 S.W.2d 67. Elections ⇄ 154(6)

#### 8. Unofficial ballots

Complete lists of all primary election candidates for each state, district and county office, distributed at political meeting by defendant telling audience for whom to vote in each case, were unofficial "ballots" within statute prohibiting distribution of "ballots" outside of ballots ordered for use in election for purpose of instructing voters how to vote, notwithstanding that official ballots were printed and that lists were mimeographed, and that lists did not have official designation as ballot to be used in Democratic Primary appearing on official ballots, and that one office on list appeared at different place than on official ballot. *Pope's Dig. § 4873. Branton v. State*, 1949, 214 Ark. 861, 218 S.W.2d 690, certiorari denied 70 S.Ct. 155, 338 U.S. 878, 94 L.Ed. 538. Elections ⇄ 320

#### 9. Offenses by officers

Granting of recount in primary election contest does not violate rule that voters are not to be disfranchised by misconduct of election official. *Wood v. Brown*, 1962, 235 Ark. 258, 235 Ark. 500, 361 S.W.2d 67. Elections ⇄ 154(2)

Kirby's Dig. § 2825 creates two separate offenses, one for making a false count of the ballots and one for falsely certifying the election returns. *State v. Doughty*, 1918, 134 Ark. 435, 204 S.W. 968. Elections ⇄ 314

Falsifying election returns and making a false count of votes held separate offenses under Acts 1909, p. 507, § 4, making it a felony to falsify returns or make a false count of ballots. *Kelly v. State*, 1912, 102 Ark. 651, 145 S.W. 556. Elections ⇄ 314

Under Acts 1909, c. 165, section 4, providing that any judge or clerk who shall falsify the "returns" of a primary election shall be deemed guilty of a felony, etc., the returns consist of the poll books in which is entered the certificate of the officer conducting the election, together with a list of voters and one or more of the tally sheets, which are required to be carefully enveloped, sealed and delivered to the officer or board designated by the statute. *Kelly v. State*, 1912, 102 Ark. 651, 145 S.W. 556. Elections ⇄ 314

Under the primary election law, Acts 1909, c. 165, section 4, the offenses of falsifying the returns of a primary election and of knowingly making a false count of the ballots cast are separate and distinct. *Kelly v. State*, 1912, 102 Ark. 651, 145 S.W. 556. Elections ⇄ 314

Kirby's Digest, § 1667, imposing a penalty upon any judge or clerk of any election who "shall neglect, improperly delay or refuse to perform any of the duties required by law," etc., is inapplicable to school elections not conducted under the general election law, as provided by Kirby's Digest, § 7591. *Brown v. Haselman*, 1906, 79 Ark. 213, 95 S.W. 136. Elections ⇄ 323

In a declaration against a judge of elections for the statutory penalty for permitting an elector to vote twice, it is

© 2006 Thomson/West. No Claim to Orig. U.S. Govt. Works.

031036

## A.C.A. § 7-1-103

sufficient to charge that he did so "intentionally, wrongfully, and from motives of partiality, contrary to the form," etc., without averring the name of the person for whom the elector voted. Kirkpatrick v. Stewart, 1858, 19 Ark. 695, Unreported. Elections ⤵ 323

In a declaration for a penalty, under Eng.Dig. c. 61, § 28, it is sufficient to charge that the defendant took out the ballots and counted them before the polls were closed and the poll books signed, "intentionally, knowingly, and contrary to the form," etc., without averring that he acted corruptly and maliciously. Kirkpatrick v. Stewart, 1858, 19 Ark. 695, Unreported. Elections ⤵ 323

A declaration in an action of debt against a judge of elections, under Eng.Dig. c. 61, § 28, to recover the penalty prescribed for neglect of duty and misbehavior in office in appointing a minor clerk, is sufficient if it charges that he did so "knowingly, willfully, wrongfully, and contrary to the form," etc., without charging that he did so corruptly and maliciously. Kirkpatrick v. Stewart, 1858, 19 Ark. 695, Unreported. Elections ⤵ 323

## 10. Transportation of ballots

Statute in effect at time of election did not criminalize allegedly improper transportation of ballots by sheriff who was candidate for reelection in contested race, but rather merely noted that sheriff running for reelection in contested election would be "disqualified" from carrying out duties to deliver election supplies; statute did not specifically prohibit any act on part of sheriff. A.C.A. § 7-5-211(a) (1996). State ex rel. Sargent v. Lewis, 1998, 979 S.W.2d 894, 335 Ark. 188. Elections ⤵ 314

Allegations that sheriff violated election laws by delivering ballots to precinct himself when he was candidate for re-election did not create forfeiture of office, by law, so as to support usurpation action, absent any actual conviction of election law violations. A.C.A. §§ 7-1-103(28, 29), 7-1-104, 7-5-211, 16-118-105. Sargent v. Foster, 1998, 966 S.W.2d 263, 332 Ark. 608. Sheriffs And Constables ⤵ 6

## 11. Sufficiency of evidence

In prosecution for introducing fraudulent ballots in primary election with intent to affect count or recount of ballots, evidence on questions whether defendant had clipped name of unopposed candidate for township committeeman from certain ballots, and had encouraged certain voter to mark ballot for certain candidates was insufficient for jury. Artk.Stats. § 3-1525. Williams v. State, 1953, 222 Ark. 458, 261 S.W.2d 263. Elections ⤵ 330

## A.C.A. § 7-1-103, AR ST § 7-1-103

Title 7. Elections

Chapter 1. General Provisions (Refs &amp; Annos)

**→ § 7-1-104. Felonies**

(a) The following offenses shall be deemed felonies punishable as provided in this section:

(1) No person shall falsely make or fraudulently destroy any certificate of nominations or any part thereof, file any certificate of nominations knowing the certificate or any part thereof to be false, suppress any nomination or any part thereof which has been filed, or forge or falsely write the name or initials of any election official on any ballot;

(2) No public official or other person shall in any manner willfully or corruptly permit any person not entitled to register for the purpose of voting to register, nor shall a public official or other person forge or attempt to forge a registration;

(3) No person shall vote in any election in the state unless the person is a qualified elector of this state and has registered to vote in the manner provided by law;

(4) It shall be unlawful for any person to offer, accept, receive, or pay any person any money, goods, wares, or merchandise or solicit any money, goods, wares, or merchandise for the purpose of influencing his or her vote during the progress of any election in this state;

(5) It shall be unlawful for any person to make any threat or attempt to intimidate any elector or the family, business, or profession of the elector;

(6) It shall be unlawful for any person to prevent or to interfere with any qualified elector from voting at any election or to attempt to prevent or interfere with any qualified elector from voting at any election, provided that this subdivision (a)(6) shall not prohibit good faith challenges of ballots or voters according to law by candidates, authorized representatives of candidates, political parties, or ballot issues;

(7) It shall be unlawful for any person to attend any polling site on election day and hand out or give away any campaign cards, placards, or other articles for the purpose of influencing the electors to vote for any candidate, except in the manner now provided by law;

(8) No person shall tamper with a voting machine or fraudulently affect or attempt to affect its results;

(9) No person may cast a ballot in more than one (1) party primary election on the same day in this state or for candidates for more than one (1) political party;

(10) No person shall vote in any election more than one (1) vote;

(11) No person shall vote or attempt to vote other than his or her legal ballot;

031036

## A.C.A. § 7-1-104

(12) No election official shall knowingly permit any person to vote other than his or her legal ballot in any election;

(13) No election official or other person shall fraudulently permit any person to vote illegally, refuse the vote of any qualified elector, or cast up or make a false return of any election;

(14) No election official or other person shall willfully make a false count of any election ballots or falsely or fraudulently certify the returns of any election;

(15) No person shall fraudulently change, alter, or obliterate the poll books or books of any election or break any seals upon any ballot box, voting machine, or stub box, except as authorized by law;

(16) No person shall contrive, alter, forge, counterfeit, detain, mutilate, steal, secrete, or destroy any election returns or election materials for the purpose of hindering or preventing or falsely reporting a tabulation or check of the returns; and

(17) Any person who violates the provisions of § 7-5-702 or who shall disclose how any voter may have voted unless compelled to do so in a judicial proceeding shall be deemed guilty of a Class D felony and punished as provided in this section.

(b)(1) Any person convicted of a felony as defined in this section shall be guilty of a Class D felony.

(2)(A) Any person convicted of a felony as defined in this section shall be barred from holding public office or employment in any of the departments of the state from the date of his conviction.

(B)(i) If the person is employed by any of the departments of this state at the time of his conviction, he shall be removed from employment immediately.

(ii) If any person is convicted under the provisions of this section while holding public office, the conviction shall be deemed a misfeasance and malfeasance in office and shall subject the person to impeachment.

Acts of 1969, Act 465, Art. 11, § 5; Acts of 1995, Act 497, § 1; Acts of 1995, Act 1085, § 1; Acts of 1997, Act 445, § 3; Acts of 1999, Act 655, § 1, eff. **Indictment 6**  
**Instructions 8**  
**Intimidation and violence 2**  
**Penalties and actions 4**  
**Persons liable 3**  
**Vote buying 1**

##### 1. Vote buying

Evidence that defendant paid voter \$50 to obtain voter's blank absentee ballot and absentee voter statement was sufficient to support defendant's conviction of paying or offering to pay voter for voting, though voter did not personally complete absentee ballot by marking her candidate selections. Voting Rights Act of 1965, § 11(c), 42 U.S.C.A. § 1973i(c). U.S. v. Campbell, 1988, 845 F.2d 782, rehearing denied, certiorari denied 109 S.Ct. 490, 488 U.S. 965, 102 L.Ed.2d 527. Elections ↪ 316

Where it had never been suggested that all or substantial number of contributors to political party made their contributions with end in view of having their money spent to violate election laws, court could not presume that they did so and disclosure of all contributors and amount of all contributions was not relevant or justified, even if prosecuting attorney's investigation of vote buying might be advanced if he knew that certain individuals had made contributions to account which prosecuting attorney sought to inspect and copy. Ark.Stats. § 43-801 et seq.; U.S.C.A.Const. Amends. 1, 14. Pollard v. Roberts, 1968, 283 F.Supp. 248, affirmed 89 S.Ct. 47, 393 U.S. 14, 21 L.Ed.2d 14. Elections ↪ 121(1)

Section 18, Act Feb. 5, 1913, Acts 1913, p. 74, making it unlawful to give or promise an office or anything of value for political support, aid, or vote of any person, held not to require the promise to be made to person to whom the office, etc., is to be given. Wright v. State, 1918, 133 Ark. 76, 202 S.W. 236. Elections ↪ 316

##### 2. Intimidation and violence

The constitutional requirements that popular elections shall be "by ballot" and be "free and equal," Art. 3, secs. 2, 3, are violated by a systematic plan to coerce voters to deposit their ballots in such manner as to disclose their contents to bystanders. Jones v. Glidewell, 1890, 53 Ark. 161, 13 S.W. 723. Elections ↪ 320

The purpose of statute prohibiting distribution of ballots outside of ballots ordered for use in election for purpose of instructing voters how to vote, was to prevent intimidation of voters and use of undue influence in elections. Pope's Dig. § 4873. Branton v. State, 1949, 214 Ark. 861, 218 S.W.2d 690, certiorari denied 70 S.Ct. 155, 338 U.S. 878, 94 L.Ed. 538. Elections ↪ 320

##### 3. Persons liable

© 2006 Thomson/West. No Claim to Orig. U.S. Govt. Works.

031036

## A.C.A. § 7-1-104

The governor of a state is not "an officer of election," within the meaning of Act May 31, 1870, § 22, 16 Stat. 145, which makes it criminal for any "election officer" fraudulently to make any false certificate of the result of any congressional election. *U.S. v. Clayton*, 1871, 25 F.Cas. 458, 4 Chi.Leg.N. 50, 0 No. 14814. Elections ⇌ 322

## 4. Penalties and actions

Allegations that sheriff violated election laws by delivering ballots to precinct himself when he was candidate for re-election did not create forfeiture of office, by law, so as to support usurpation action, absent any actual conviction of election law violations. A.C.A. §§ 7-1-103(28, 29), 7-1-104, 7-5-211, 16-118-105. *Sargent v. Foster*, 1998, 966 S.W.2d 263, 332 Ark. 608. *Sheriffs And Constables* ⇌ 6

Kirby's Digest, § 1667, imposing a penalty upon any judge or clerk of any election who "shall neglect, improperly delay or refuse to perform any of the duties required by law," etc., is inapplicable to school elections not conducted under the general election law, as provided by Kirby's Digest, § 7591. *Brown v. Haselman*, 1906, 79 Ark. 213, 95 S.W. 136. Elections ⇌ 323

In a declaration against a judge of elections for the statutory penalty for permitting an elector to vote twice, it is sufficient to charge that he did so "intentionally, wrongfully, and from motives of partiality, contrary to the form," etc., without averring the name of the person for whom the elector voted. *Kirkpatrick v. Stewart*, 1858, 19 Ark. 695, Unreported. Elections ⇌ 323

A declaration in an action of debt against a judge of elections, under Eng.Dig. c. 61, § 28, to recover the penalty prescribed for neglect of duty and misbehavior in office in appointing a minor clerk, is sufficient if it charges that he did so "knowingly, willfully, wrongfully, and contrary to the form," etc., without charging that he did so corruptly and maliciously. *Kirkpatrick v. Stewart*, 1858, 19 Ark. 695, Unreported. Elections ⇌ 323

In a declaration for a penalty, under Eng.Dig. c. 61, § 28, it is sufficient to charge that the defendant took out the ballots and counted them before the polls were closed and the poll books signed, "intentionally, knowingly, and contrary to the form," etc., without averring that he acted corruptly and maliciously. *Kirkpatrick v. Stewart*, 1858, 19 Ark. 695, Unreported. Elections ⇌ 323

## 5. Federal law

The laws of the United States concerning elections at which congressmen are elected are paramount, and Mansf.Dig.Ark. § 2694, providing that "the judges of election shall securely envelop all the ballots which may have been received under seal, and return the same to the clerk of the proper county, which shall in no event be opened except in case of a contested election," cannot be held to justify the refusal of the clerk to produce the ballots before the grand jury of the United States, pending an investigation into alleged violations of federal election laws. *In re Massey*, 1890, 45 F. 629. Elections ⇌ 326

The crime of destroying the ballot box used and the ballot cast at an election for congressman and presidential electors can be punished by the state as well as the United States. *Mason v. State*, 1892, 55 Ark. 529, 18 S.W. 827. Elections ⇌ 325

The courts of the State have jurisdiction to punish the fraudulent destruction of ballots cast for electors of President and Vice President of the United States, notwithstanding a representative in congress is also voted for. *Mason v. State*, 1892, 55 Ark. 529, 18 S.W. 827. Elections ⇌ 325

## 6. Indictment

© 2006 Thomson/West. No Claim to Orig. U.S. Govt. Works.

031036

## A.C.A. § 7-1-104

An indictment under Kirby's Dig. § 2825, charging election judges with making a false count of ballots, is not insufficient because it fails to set out the particular manner in which the false count was made or the names of the particular voters whose ballots were miscounted. *State v. Doughty*, 1918, 134 Ark. 435, 204 S.W. 968. Elections ⤵ 328(3)

Such indictment held not insufficient because it fails to specify whether the ballots themselves were miscounted or whether there was a miscount of the number of votes. *State v. Doughty*, 1918, 134 Ark. 435, 204 S.W. 968. Elections ⤵ 328(3)

An indictment for making false election returns under Kirby's Dig. § 2825, need not allege that the false certificate was delivered to the election commissioners; such delivery not being essential to the offense. *State v. Doughty*, 1918, 134 Ark. 435, 204 S.W. 968. Elections ⤵ 328(3)

In prosecution under Kirby's Dig. § 2783, for suppressing certificate of nomination of a candidate for sheriff, indictment held to sufficiently charge that petition of necessary number of qualified electors was filed with defendants, election commissioners, and that they suppressed the same. *State v. Hunter*, 1918, 134 Ark. 443, 204 S.W. 308. Elections ⤵ 328(3)

An indictment under Kirby's Dig. § 2783, as to suppression of certificate of nomination, was sufficient although it did not show that certificate of nomination was authenticated otherwise than by signatures of electors in view of section 2777. *State v. Hunter*, 1918, 134 Ark. 443, 204 S.W. 308. Elections ⤵ 328(3)

## 7. Evidence

Convictions for giving false information about names to establish eligibility to vote and aiding and abetting others in that offense were supported by evidence that defendants completed absentee ballot applications in the names of other registered voters, that one of them forged voters' signatures on some applications and others marked some applications with X's even though voters were able to sign their own names, and that ballots were voted in favor of candidate for whom defendants were working, without knowledge or permission of the voters; evidence as to one defendant's intent was sufficient despite contention that she was trying to help registered voters obtain the absentee ballots. 18 U.S.C.A. § 2; Voting Rights Act of 1965, § 11(c, e), as amended, 42 U.S.C.A. § 1973i(c, e). *U.S. v. Boards*, 1993, 10 F.3d 587, rehearing denied, certiorari denied 114 S.Ct. 2674, 512 U.S. 1205, 129 L.Ed.2d 810. Elections ⤵ 329

In prosecution for introducing fraudulent ballots in primary election with intent to affect count or recount of ballots, evidence on questions whether defendant had clipped name of unopposed candidate for township committeeman from certain ballots, and had encouraged certain voter to mark ballot for certain candidates was insufficient for jury. Ark.Stats. § 3-1525. *Williams v. State*, 1953, 222 Ark. 458, 261 S.W.2d 263. Elections ⤵ 330

In a prosecution for making a promise as consideration for political support in violation of section 18, Act Feb. 5, 1913, Acts 1913, p. 74, evidence held to sustain a conviction. *Wright v. State*, 1918, 133 Ark. 76, 202 S.W. 236. Elections ⤵ 329

Evidence held insufficient to show that accused falsified primary election returns. *Kelly v. State*, 1912, 102 Ark. 651, 145 S.W. 556. Elections ⤵ 329

## 8. Instructions

In a prosecution for making a promise as consideration for political support in violation of section 18, Act Feb. 5, 1913, Acts 1913, p. 74, held that the court correctly interpreted the statute and correctly declared the law in its

A.C.A. § 7-1-104

rulings on the instructions. *Wright v. State*, 1918, 133 Ark. 76, 202 S.W. 236. Elections ↩ 330

A.C.A. § 7-1-104, AR ST § 7-1-104

Code of Alabama Currentness

Title 17. Elections.

▣ Chapter 23. Miscellaneous Offenses. (Refs &amp; Annos)

**→ § 17-23-1. Illegal voting or attempting to vote.**

Any person who votes more than once at any election held in this state, or deposits more than one ballot for the same office as his vote at such election, or knowingly attempts to vote when he is not entitled to do so, or is guilty of any kind of illegal or fraudulent voting, must, on conviction, be imprisoned in the penitentiary for not less than two nor more than five years, at the discretion of the jury.

(Code 1876, § 4289; Code 1886, § 4185; Code 1896, § 4692; Code 1907, § 6788; Code 1923, § 3906; Code 1940, T. 17, § 302.)

## LIBRARY REFERENCES

29 C.J.S. Elections, §§ 325, n.1.

## CASENOTES

## 1. Scope of section

**Scope of section.** The language of this section is broad enough to embrace, and in fact does in *ipsis verbis* embrace, "any election held in this state." *Gandy v. State*, 82 Ala. 61, 2 So. 465 (Ala.1887). See also *Anderson v. State*, 72 Ala.187 (1882); *Washington v. State*, 75 Ala. 582 (1884).

## 2. "Election" defined

**"Election" defined.** The word "election" means the act of casting and receiving ballots, and the day and time of voting. *State v. Tucker*, 54 Ala.205 (Ala.1875).

## 3. The words "illegal or fraudulent" as used in this section are merely descriptive

**The words "illegal or fraudulent" as used in this section are merely descriptive** of the intent necessary for the commission of the offense. *Wilder v. State*, 401 So.2d 151 (Ala.Crim.App.1981), writ denied 401 So.2d 167, certiorari denied 102 S.Ct. 606, 454 U.S. 1057, 70 L.Ed.2d 595.

Clearly, the language of this section reflects a common understanding that "illegal or fraudulent voting" is voting more than one ballot for the same office, or attempting to vote when one is not entitled to do so. This section thus gives due notice of the criminal consequences of such action. *Wilder v. State*, 401 So.2d 151 (Ala.Crim.App.1981), writ denied 401 So.2d 167, certiorari denied 102 S.Ct. 606, 454 U.S. 1057, 70 L.Ed.2d 595.

**C**

Baldwin's Kentucky Revised Statutes Annotated Currentness

Title X. Elections

Chapter 119. Election Offenses and Prosecutions (Refs & Annos)

**→ 119.005 Definitions**

- (1) A "ballot" or "official ballot" means the voting machine ballot label, ballot cards, paper ballots, an absentee ballot, a special ballot, or a supplemental paper ballot which has been authorized for the use of the voters in any primary, general or special election by the Secretary of State or the county clerk;
- (2) "Ballot label" means the cards, papers, booklet, pages or other material on which appear the names of candidates and the questions to be voted on by means of ballot cards or voting machines;
- (3) "Ballot card" means a tabulating card on which votes may be recorded by a voter by use of a voting punch device or by marking with a pen or special marking device;
- (4) "Voting machine" or "machine" shall include lever machines and, as far as applicable, any electronic or electromechanical unit and supplies utilized or relied upon by a voter in casting and recording his vote in an election.

IC 3-14-2-16

- (7) Delivers a ballot (other than an absentee ballot) to an inspector that is not the ballot the voter receives from the poll clerk or assistant poll clerk.
- (8) Delivers an absentee ballot to a team of absentee ballot counters appointed under IC 3-11.5-4-22, a county election board, a circuit court clerk, or an absentee voting board under IC 3-11-10 that is not the ballot cast by the absentee voter.
- (9) Delivers an absentee ballot prepared by the voter for voting to a county election board, except for:
- (A) the inspector;
  - (B) a member of the precinct election board temporarily acting for the inspector;
  - (C) a member or an employee of a county election board (acting under the authority of the board and in accordance with state law) or an absentee voter board member acting under IC 3-11-10; or
  - (D) a member of the voter's household or an individual designated as attorney in fact for the voter, [or] an employee of:
    - (i) the United States Postal Service; or
    - (ii) a bonded courier company;
 (acting in the individual's capacity as an employee of the United States Postal Service or a bonded courier company) when delivering an envelope containing an absentee ballot under IC 3-11-10-1.
- (10) Possesses an unmarked absentee ballot on or before the date of the election for which the absentee ballot has been printed, unless the person is authorized to possess the absentee ballot under this title as any of the following:
- (A) A printer, when arranging for the delivery of unmarked absentee ballots to a county election board under IC 3-11-2.
  - (B) A county election board member or employee (acting under the authority of the board and in accordance with state law).
  - (C) An absentee voter board member.
  - (D) An employee of:
    - (i) the United States Postal Service; or
    - (ii) a bonded courier company;
 (acting in the individual's capacity as an employee of the United States Postal Service or a bonded courier company) when delivering an envelope containing an absentee ballot.
  - (E) An individual authorized under IC 3-11-10-24 to deliver an absentee ballot.
  - (F) An absentee ballot counter under IC 3-11.5.

As added by P.L.5-1986, SEC.10. Amended by P.L.3-1987, SEC.467; P.L.5-1989, SEC.73; P.L.3-1993, SEC.232; P.L.19-1993, SEC.3; P.L.4-1996, SEC.88; P.L.38-1999, SEC.70; P.L.103-2005, SEC.27.

## HISTORICAL AND STATUTORY NOTES

## 2006 Main Volume

P.L.3-1987, Sec.467, eff. Dec. 1, 1987, inserted all provisions relating to assistant poll clerks.

P.L.5-1989, Sec.73, in Subsec. (4), inserted "or a member of a county election board or an absentee voter board acting under IC 3-11-10"; in Subsec. (7), inserted "(other than an absentee ballot)" substituted "that is not" for "except"; and substituted "ballot" for "one"; added Subsec. (8); and made nonsubstantive changes throughout the entire section.

P.L.3-1993, Sec.232 and P.L.19-1993, Sec.3, identically amended this section by inserting in subsec. (8) "team of absentee ballot counters appointed under IC 3-11.5-4-22".

P.L.4-1996, Sec.88, emerg. eff. March 21, 1996, designated Subsecs.(4)(A) through (4)(c); added Subsec. 4(D); and made other nonsubstantive changes.

## 1999 Legislation

P.L.38-1999, Sec.70, emerg. eff. April 23, 1999, inserted "precinct" in Subsec. (1); inserted "Except when receiving assistance under IC 3-11-9," in Subsec. (2); inserted "Except when offering assistance requested by a voter in accordance with IC 3-11-9," in Subsec. (3); designated Subsec. (6)(A); and added Subsec. (6)(B).

## 2005 Legislation

P.L.103-2005, Sec.27, amended this section by inserting "or an employee", "(acting under the authority of the board and state law)", and "member" in Subsec. (4)(C); rewriting Subsec. (4)(D), which read: "a member of the voter's household or an individual designated as attorney in fact for the voter, when delivering an envelope containing an absentee ballot under IC 34-11-10-1"; and adding Subsecs. (9) to (11).

Title 3. Elections

▣ Article 14. Offenses

▣ Chapter 2. Vote Fraud

**→3-14-2-27 Causing vote to be incorrectly taken down; false statement, certificate, or return**

Sec. 27. A precinct election officer at the close of the polls, an absentee ballot counter acting under IC 3-11.5-5 or IC 3-11.5-6, or a provisional ballot counter acting under IC 3-11.7-5 who knowingly:

- (1) causes the vote to be incorrectly taken down for a candidate or public question; or
- (2) makes a false statement, certificate, or return of any kind of that vote;

commits a Class D felony.

**CREDIT(S)**

As added by P.L.5-1986, SEC.10. Amended by P.L.3-1987, SEC.472; P.L.3-1993, SEC.233; P.L.19-1993, SEC.4; P.L.126-2002, SEC.89.

**HISTORICAL AND STATUTORY NOTES****2006 Main Volume**

P.L.3-1987, Sec.472, eff. Dec. 1, 1987, substituted "A precinct election officer" for "An inspector or poll clerk in a precinct" in the first paragraph; and deleted "registered on a voting machine" following "vote" in Subsec. (1).

P.L.3-1993, Sec.233 and P.L.19-1993, Sec.4, amended the section by identical language by inserting "or an absentee ballot counteracting under IC 3-11.5-5 or IC 3-11.5-6, who" in the introductory paragraph.

**2002 Legislation**

P.L.126-2002, Sec.89, eff. Jan. 1, 2003, amended this section by deleting "or" following "polls", and inserting "or a provisional ballot counter acting under IC 3-11.7-5", in the introductory language.

▣ Article 14. Offenses

▣ Chapter 3. Interference with Free and Equal Elections

**→3-14-3-4 Obstruction of, interference with, or injury of election officer or voter**

Sec. 4. (a) A person who:

- (1) knowingly obstructs or interferes with an election officer in the discharge of the officer's duty; or
- (2) knowingly obstructs or interferes with a voter within the chute;

commits a Class D felony.

(b) A person who knowingly injures an election officer or a voter:

- (1) in the exercise of the officer's or voter's rights or duties; or
- (2) because the officer or voter has exercised the officer's or voter's rights or duties;

commits a Class D felony.

(c) A person called as a witness to testify against another for a violation of this section is a competent witness to prove the offense even though the person may have been a party to the violation. The person shall be compelled to testify as other witnesses. However, the person's evidence may not be used against the person in a prosecution growing out of matters about which the person testifies, and the person is not liable to indictment or information for the offense.

Title 3. Elections

▣ Article 14. Offenses

▣ Chapter 3. Interference with Free and Equal Elections

**→3-14-3-14 Printers; unauthorized printing or delivery of ballots**

Sec. 14. A printer of the ballots for an election, or person employed in printing the ballots, who knowingly:

- (1) delivers a ballot to a person other than the co-directors or authorized representative of the election division or a county election board for which the ballots are being printed;
- (2) prints a ballot in any form other than the one prescribed by law; or
- (3) prints a ballot containing any names, spellings, or arrangements other than as authorized by the commission or a county election board;

commits a Class D felony.

Title 3. Elections

▣ Article 14. Offenses

▣ Chapter 3. Interference with Free and Equal Elections

**→3-14-3-16 Electioneering**

Sec. 16. (a) As used in this section, "electioneering" includes expressing support or opposition to any candidate or political party or expressing approval or disapproval of any public question in any manner that could reasonably be expected to convey that support or opposition to another individual. The term does not include expressing support or opposition to a candidate or a political party or expressing approval or disapproval of a public question in:

- (1) material mailed to a voter; or
- (2) a telephone or an electronic communication with a voter.

(b) A person who knowingly does any electioneering:

(1) on election day within:

- (A) the polls; or
- (B) the chute;

(2) within an area in the office of the circuit court clerk or a satellite office of the circuit court clerk established under IC 3-11-10-26.3 used by an absentee voter board to permit an individual to cast an absentee ballot; or

(3) except for a voter who is:

- (A) the person's spouse;
- (B) an incapacitated person (as defined in IC 29-3-1-7.5) for whom the person has been appointed the guardian (as defined in IC 29-3-1-6); or
- (C) a member of the person's household;

in the presence of a voter whom the person knows possesses an absentee ballot provided to the voter in accordance with Indiana law;

commits a Class A misdemeanor.

**→3-14-3-18 Actions to unlawfully influence voter or candidate**

Sec. 18. (a) As used in this section, "candidate" includes an individual whom the person knows is considering becoming a candidate.

(b) A person who, for the purpose of influencing a voter or candidate, does any of the following commits a Class D felony:

- (1) Seeks to enforce the payment of a debt by force or threat of force.
- (2) Ejects or threatens to eject the voter or candidate from a house the voter or candidate occupies.
- (3) Begins a criminal prosecution.
- (4) Damages the business or trade of the voter or candidate.
- (5) Communicates a threat to commit a forcible felony (as defined in IC 35- 41-1-11) against a voter or candidate with the intent that the voter or candidate:
  - (A) engage in conduct against the voter's or candidate's will; or
  - (B) be placed in fear of retaliation for a prior lawful act as a voter or candidate.

2006 Electronic Update

2006 Legislation

P.L.164-2006, Sec.133, amended this section by deleting Subsec. (a) and the first sentence in Subsec. (b).

2006 Main Volume

P.L.3-1995, Sec.135, emerg. eff. retroactive to Jan. 1, 1995, rewrote the section. Prior to amendment, the section read:

"A circuit court clerk, member of a board of registration, or county official responsible for maintaining computerized voter registration information who recklessly fails to comply with IC 3-7-7.5 (until its repeal January 1, 1995) or IC 3-7-26 (after December 31, 1994) more than thirty (30) days after being required to perform a duty under IC 3-7-7.5 (until its repeal January 1, 1995) or IC 3-7-26 (after December 31, 1994) commits a Class B misdemeanor."

P.L.12-1995, Sec.89, emerg. eff. retroactive to Jan. 1, 1995 added "(until its repeal January 1, 1995) or IC 3-7-26 (after December 31, 1994)" twice and deleted "not" after "IC 3-7-75".

2003 Legislation

P.L.209-2003, Sec.193, amended this section by inserting "(a) This subsection applies before January 1, 2006."; and by adding Subsec. (b).

## HISTORICAL AND STATUTORY NOTES

## 2006 Main Volume

P.L.3-1987, Sec.491, eff. Dec. 1, 1987, rewrote Subsec. (2); and substituted "Class D felony" for "Class A misdemeanor". Prior to amendment, Subsec. (2) read:

"(2) tries to find out the names on a ballot before the ballot is deposited in the ballot box;"

P.L.3-1993, Sec.235 and P.L.19-1993, Sec.5, amended the section by identical language to make the provisions applicable to absentee ballot counters.

## 2002 Legislation

P.L.126-2002, Sec.90, eff. Jan. 1, 2003, amended this section by deleting "or" following "board", and inserting "or a provisional ballot counter acting under IC 3-11.7-3", in the introductory language.

## 2005 Legislation

P.L.221-2005, Sec.139, amended this section by deleting all references to voting machines; and making related nonsubstantive changes.

Title 3. Elections

▣ Article 14. Offenses

▣ Chapter 5. Enforcement Provisions

**→3-14-5-1 Affidavit against illegal voter**

Sec. 1. (a) This section applies during an election whenever a voter makes an affidavit before the inspector in a precinct that a person who has voted is an illegal voter in the precinct. This section does not apply to an affidavit executed by an individual who:

- (1) is subject to the requirements set forth in IC 3-7-33-4.5;
- (2) is challenged solely as a result of the individual's inability or refusal to comply with IC 3-7-33-4.5; and
- (3) subsequently complies with IC 3-7-33-4.5 before the close of the polls on election day.

(b) Immediately after the close of the polls the inspector shall deliver the affidavit to the county election board for delivery by the prosecuting attorney for the county to the grand jury under section 2 of this chapter. The prosecuting attorney for the county shall:

- (1) proceed as if the affidavit had been made before the prosecuting attorney; and
- (2) ensure that the grand jury notifies the NVRA official under section 2 of this chapter if a violation of NVRA appears to have occurred.

Title 3. Elections

▣ Article 14. Offenses

▣ Chapter 5. Enforcement Provisions

**→3-14-5-2 Affidavits; packaging, sealing, endorsing and delivery to grand jury; inquiry by grand jury**

Sec. 2. (a) Each precinct election board shall, at the close of the polls, place all affidavits prescribed by this title for use on election day to determine the eligibility of a precinct election officer (or a person who wishes to cast a ballot) in a strong paper bag or envelope and securely seal it. Each member shall endorse that member's name on the back of the bag or envelope.

(b) The inspector and judge of the opposite political party shall deliver the sealed bag or envelope to the county election board. The county election board shall do the following:

- (1) Remove the affidavits from the bag or envelope.
- (2) Mail a copy of each affidavit to the secretary of state.
- (3) Replace the affidavits within the bag or envelope.
- (4) Reseal the bag or envelope with the endorsement of the name of each county election board member on the back of the bag or envelope.
- (5) Carefully preserve the resealed bag or envelope and deliver it, with the county election board's seal unbroken, to the foreman of the grand jury when next in session.

(c) The grand jury shall inquire into the truth or falsity of the affidavits, and the court having jurisdiction over the grand jury shall specially charge the jury as to its duties under this section.

(d) The grand jury shall file a report of the result of its inquiry with:

- (1) the court; and
- (2) the NVRA official if a violation of NVRA appears to have occurred.

Title 3. Elections

▣ Article 14. Offenses

▣ Chapter 5. Enforcement Provisions

**→3-14-5-3 Duty to report violations to prosecuting attorney and violator; presentation to grand jury**

Sec. 3. (a) This section does not apply to a violation of NVRA or IC 3- 7.

(b) The commission and each county election board shall report a violation of this title as a felony or misdemeanor to the appropriate prosecuting attorney and the alleged violator.

(c) The commission and boards may have the report transmitted and presented to the grand jury of the county in which the violation was committed at its first session after making the report and at subsequent sessions that may be required. The commission and boards shall furnish the grand jury any evidence at their command necessary in the investigation and prosecution of the violation.

**CREDIT(S)**

IC 3-14-5-8

- (3) contract with; or
- (4) maintain a contractual relationship when a subcontractor is;

a person who is convicted under IC 3-14-2 of a felony or Class A misdemeanor that relates to an election for an office for any governmental entity.

(e) If:

- (1) a person was employed by a governmental entity;
- (2) the person was convicted under IC 3-14-2 of a felony or Class A misdemeanor relating to an election for an office for a governmental entity;
- (3) the person's employment with the governmental entity was discontinued under subsection (c) or (d); and
- (4) the person's conviction is reversed, vacated, or set aside;

the governmental entity shall reemploy the person in the same position the person held before the person's conviction or in another position equivalent in benefits, pay, and working conditions to the position the person held before the person's conviction, and the person is entitled to receive any salary or other remuneration that the person would have received if the person's employment had not been discontinued under subsection (c) or (d).

(f) The attorney general may petition a court with jurisdiction for an injunction against a person who violates subsection (c) or a governmental entity that violates subsection (d).

(g) The attorney general may petition a court with jurisdiction to impose a civil penalty of not more than one thousand dollars (\$1,000) on a person who violates subsection (c).

Chapter 119. Election Offenses and Prosecutions (Refs &amp; Annos)

**→ 119.165 False personation of a voter; nonresident or unqualified person voting**

- (1) Any person who falsely personates a registered voter, and receives and casts a ballot by means of such personation, shall be guilty of a Class D felony. An attempt at such personation shall constitute a Class A misdemeanor.
- (2) Any person who, by means other than falsely personating a registered voter, votes at an election in this state when he is a resident of another state or country, or votes more than once at an election, or votes by use of the naturalization papers of another person, shall be guilty of a Class D felony. Any person who knowingly votes or attempts to vote in a precinct other than the one in which he resides shall be guilty of a Class A misdemeanor, unless by voting in a precinct in which he does not live he is enabled to vote in a race or on a matter in which he could not vote in his proper precinct in which case he shall be guilty of a Class D felony. Any person who lends or hires his or another's naturalization papers to be used for the purpose of voting shall be subject to the same penalty.
- (3) Any resident of this state who, by means other than falsely personating a registered voter, votes at a regular or special election before he has resided in this state thirty (30) days, or in the county and precinct where the election is held the time required by law, or before he has attained full age, or before he has become a citizen, shall be guilty of a Class B misdemeanor.
- (4) Any person who, by means other than falsely personating a registered voter, votes in a primary election knowing that he is not qualified as provided in KRS 116.055, shall be guilty of a violation.
- (5) Any person who applies for or receives a ballot at any voting place other than the one at which he is entitled to vote, under circumstances not constituting a violation of any of the provisions of subsections (1) to (4) of this section, shall be guilty of a Class A misdemeanor.

**→119.195 Removing or tampering with ballots**

- (1) Any person who, during an election, knowingly and willfully removes or attempts to remove an official ballot from the election room, or has in his possession outside the election room any official ballot, either genuine or counterfeit, shall be guilty of a Class D felony.
- (2) Any voter who attempts to leave the election room with an official ballot in his possession shall at once be arrested on demand of either of the judges of election and shall be guilty of a violation, unless the act was done knowingly in which event he shall be guilty of a Class A misdemeanor.
- (3) Any person who takes or removes in any manner, feloniously or with the consent or permission of the custodian, any official ballot from any place where it may lawfully be, or knowingly and willfully has in his possession or custody any such official ballot, except as an officer or custodian under the law or while within the polling place for the purpose of voting, and any custodian or officer who permits any official ballot to be removed or carried away from the place where it may lawfully be by any person other than the officer or custodian whose duty it is to receive it, shall be guilty of a Class C felony.
- (4) Any election officer, or other person entrusted with the custody or control of any official ballot, either before or after it has been voted, who in any way marks, mutilates, or defaces any official ballot or places any distinguishing mark thereon, for the purpose of vitiating the official ballot, shall be guilty of a Class C felony.
- (5) Any person who unlawfully destroys or attempts to destroy any official ballot box used, or any official ballot deposited, at any election, or who unlawfully, by force, fraud, or other improper means, obtains or attempts to obtain possession of any ballot box or any official ballot therein deposited, while the voting at any election is going on or before the official ballots are duly taken out and counted according to law, shall be guilty of a Class D felony.
- (6) Any election officer who mutilates or tampers with any of the seals, or destroys or removes any official ballots required to be preserved, shall be guilty of a Class D felony.
- (7) Any county clerk who knowingly and willfully opens any ballot box and removes any official ballot therefrom, or removes, destroys, or tampers with a ballot box and official ballots left in his care and custody, or permits any other person to do so, during the period the boxes are required to remain locked in his office, shall be guilty of a Class D felony.
- (8) Any person who removes, mutilates, or destroys, or adds any new official ballots to, the regular official ballots that have been counted and prepared for preservation, or that have already been preserved, so that the result of the election in the precinct or county is changed, shall be guilty of a Class D felony.
- (9) Any person who tampers with or changes the official ballots, or opens the receptacles in which the official ballots are contained without the order of the court, after the ballots have been sent to the Franklin County

Title X. Elections

Chapter 119. Election Offenses and Prosecutions (Refs &amp; Annos)

**→ 119.205 Making or receiving expenditures for vote, for withholding of vote, or for signing a petition to have public question on ballot; definition of "expenditure"; procedures for paying for transportation of voters; applicability of KRS 502.020**

- (1) Any person who makes or offers to make an expenditure to any person, either to vote or withhold his vote, or to vote for or against any candidate or public question at an election shall be guilty of a Class D felony.
- (2) Any person who solicits, accepts, or receives any such expenditure as payment or consideration for his vote, or the withholding of his vote, or to vote for or against any candidate or public question at an election shall be guilty of a Class D felony.
- (3) Any person who makes or offers to make an expenditure to any person to sign a petition to have a public question placed on the ballot, or any person who solicits, accepts, or receives any such expenditure as payment or consideration to sign a petition to have a public question placed on the ballot, shall be guilty of a Class B misdemeanor.
- (4) For purposes of this section, "expenditure" means any of the following when intended as payment or consideration for voting or withholding a vote, voting for or against any candidate or public question, or signing a petition to have a public question placed on the ballot:
  - (a) A payment, distribution, loan, advance, deposit, or gift of money or anything of value; or
  - (b) A contract, promise, or agreement, express or implied, whether or not legally enforceable, to make a payment, distribution, loan, advance, deposit, or gift of money or anything of value.

"Expenditure," as used in this section, shall not include the distribution of materials bearing the name, likeness, or other identification of a candidate, political party, committee, or organization, or position on a public question and not intended as payment or consideration for voting or withholding a vote, voting for or against any candidate or public question, or signing a petition to have a public question placed on the ballot.
- (5) Any candidate or committee, or any person on his behalf, who pays any person, including campaign workers, for transporting voters to the polls on the day of the election, shall make all payments by check. All payments, regardless of amount, shall be reported to the Registry of Election Finance in the manner that the Registry shall provide by administrative regulation. Any person who knowingly violates any requirement of this subsection shall be guilty of a Class B misdemeanor.
- (6) In addition to the above provisions, a person may be convicted of a violation of this section pursuant to KRS 502.020.

I.C.A. § 39A.1

Iowa Code Annotated Currentness

Title II. Elections and Official Duties

▣ Subtitle 1. Elections

▣ Chapter 39A. Election Misconduct (Refs &amp; Annos)

**→39A.1. Title and purpose—election officials defined**

1. This chapter may be cited and referred to as the "Election Misconduct and Penalties Act".
2. The purpose of this chapter is to identify actions which threaten the integrity of the election process and to impose significant sanctions upon persons who intentionally commit those acts. It is the intent of the general assembly that offenses with the greatest potential to affect the election process be vigorously prosecuted and strong punishment meted out through the imposition of felony sanctions which, as a consequence, remove the voting rights of the offenders. Other offenses are still considered serious, but based on the factual context in which they arise, they may not rise to the level of offenses to which felony penalties attach. The general assembly also recognizes that instances may arise in which technical infractions of chapters 39 through 53 may occur which do not merit any level of criminal sanction. In such instances, administrative notice from the state or county commissioner of elections is sufficient. Mandates or proscriptions in chapters 39 through 53 which are not specifically included in this chapter shall be considered to be directive only, without criminal sanction.
3. For the purposes of this chapter, "election officials" include the state commissioner, the county commissioner, employees of the state commissioner and county commissioner who are responsible for carrying out functions or duties under chapters 39 through 53, and precinct election officials appointed pursuant to sections 49.12, 49.14, 49.18, and 53.23.

I.C.A. § 39A.2

Iowa Code Annotated Currentness

Title II. Elections and Official Duties

▣ Subtitle 1. Elections

▣ Chapter 39A. Election Misconduct (Refs &amp; Annos)

**→39A.2. Election misconduct in the first degree**

1. A person commits the crime of election misconduct in the first degree if the person willfully commits any of the following acts:

a. Registration fraud. Produces, procures, submits, or accepts a voter registration application that is known by the person to be materially false, fictitious, forged, or fraudulent.

b. Vote fraud.

(1) Destroys, delivers, or handles an application for a ballot or an absentee ballot with the intent of interfering with the voter's right to vote.

(2) Produces, procures, submits, or accepts a ballot or an absentee ballot, or produces, procures, casts, accepts, or tabulates a ballot that is known by the person to be materially false, fictitious, forged, or fraudulent.

(3) Votes or attempts to vote more than once at the same election, or votes or attempts to vote at an election knowing oneself not to be qualified.

(4) Makes a false or untrue statement in an application for an absentee ballot or makes or signs a false certification or affidavit in connection with an absentee ballot.

(5) Otherwise deprives, defrauds, or attempts to deprive or defraud the citizens of this state of a fair and impartially conducted election process.

c. Duress. Intimidates, threatens, or coerces, or attempts to intimidate, threaten, or coerce, a person to do any of the following:

(1) To register to vote, to vote, or to attempt to register to vote.

(2) To urge or aid a person to register to vote, to vote, or to attempt to register to vote.

(3) To exercise a right under chapters 39 through 53.

d. Bribery.

(1) Pays, offers to pay, or causes to be paid money or any other thing of value to a person to influence the person's vote.

(2) Pays, offers to pay, or causes to be paid money or any other thing of value to an election official conditioned on

Title II. Elections and Official Duties

▣ Subtitle 1. Elections

▣ Chapter 39A. Election Misconduct (Refs &amp; Annos)

**→39A.3. Election misconduct in the second degree**

1. A person commits the crime of election misconduct in the second degree if the person willfully commits any of the following acts:

a. Interference with validity of election.

(1) Possesses an official ballot outside of the voting room unless the person is an election official or other person authorized by law to possess such a ballot.

(2) Makes or possesses a counterfeit of an official election ballot.

(3) Solicits or encourages a person to vote in an election knowing that person is not qualified to vote in the election.

b. Actions by election official. As an election official:

(1) Refuses to register a person who is entitled to register to vote under chapter 48A.

(2) Accepts a fee from an applicant applying for registration.

(3) While the polls are open, opens a ballot received from a voter, except as permitted by law.

(4) Marks a ballot by folding or otherwise so as to be able to recognize it.

(5) Attempts to learn how a voter marked a ballot.

(6) Causes a voter to cast a vote contrary to the voter's intention.

(7) Changes a ballot, or in any way causes a vote to be recorded contrary to the intention of the person casting that vote.

(8) Allows a person to do any of the acts proscribed by subparagraphs (1) through (7).

2. Election misconduct in the second degree is an aggravated misdemeanor.

Iowa Code Annotated Currentness

Title II. Elections and Official Duties

§ Subtitle 1. Elections

§ Chapter 39A. Election Misconduct (Refs &amp; Annos)

**→ 39A.4. Election misconduct in the third degree**

1. A person commits the crime of election misconduct in the third degree if the person willfully commits any of the following acts:

a. Election day acts. Any of the following on election day:

(1) Loitering, congregating, electioneering, posting signs, treating voters, or soliciting votes, during the receiving of the ballots, either on the premises of a polling place or within three hundred feet of an outside door of a building affording access to a room where the polls are held, or of an outside door of a building affording access to a hallway, corridor, stairway, or other means of reaching the room where the polls are held. This subparagraph does not apply to the posting of signs on private property not a polling place, except that the placement of a sign that is more than ninety square inches in size on a motor vehicle, trailer, or semitrailer, or its attachment to a motor vehicle, trailer, or semitrailer parked on public property within three hundred feet of a polling place is prohibited.

(2) Interrupting, hindering, or opposing a voter while in or approaching the polling place for the purpose of voting.

(3) As a voter, submitting a false statement as to the voter's ability to mark a ballot.

(4) Interfering or attempting to interfere with a voter when the voter is inside the enclosed voting space, or when the voter is marking a ballot.

(5) Endeavoring to induce a voter to show how the voter marks or has marked a ballot.

(6) Marking, or causing in any manner to be marked, on a ballot, any character for the purpose of identifying such ballot.

b. Actions by election official. As an election official:

(1) Serving as a member of a challenging committee or observer under section 49.104, subsection 2, 5, or 6, while serving as a precinct election official at the polls.

(2) Failing to perform duties prescribed by chapters 39 through 53, or performing those duties in such a way as to hinder the object of the law.

(3) Disclosing the manner in which a person's ballot has been voted to anyone except as ordered by a court.

(4) Failing to carry out a duty with regard to access under chapter 22 to a public record that relates to an election or voter registration.

031166

## I.C.A. § 39A.4

- (5) Furnishing a voter with a ballot other than the proper ballot to be used at an election.
- (6) Making or consenting to a false entry on the list of voters or poll books.
- (7) Placing or permitting another election official to place anything other than a ballot into a ballot box as provided in section 49.85, or permitting a person other than an election official to place anything into a ballot box.
- (8) Taking or permitting to be taken out of a ballot box a ballot deposited in the ballot box, except in the manner prescribed by law.
- (9) Destroying or altering a ballot that has been given to a voter.
- (10) Permitting a person to vote in a manner prohibited by law.
- (11) Refusing or rejecting the vote of a voter qualified to vote.
- (12) Wrongfully acting or refusing to act for the purpose of avoiding an election, or of rendering invalid a ballot cast from a precinct or other voting district.
- (13) Having been deputized to carry the poll books of an election to the place where they are to be canvassed, failing to deliver them to such place, safe, with seals unbroken, and within the time specified by law.

## c. Miscellaneous offenses.

- (1) As a party committee member or a primary election officer or public officer upon whom a duty is imposed by chapter 43 or by a statute applicable to chapter 43, neglecting to perform any such duty, or performing any such duty in such a way as to hinder the object of the statute, or by disclosing to anyone, except as may be ordered by a court, the manner in which a ballot may have been voted.
- (2) As a person who is designated pursuant to section 43.4 to report the results of a precinct caucus as it relates to the selection and reporting of delegates selected as part of the presidential nominating process or who is designated pursuant to section 43.4 to tabulate and report the number of persons attending the caucus favoring each presidential candidate, failing to perform those duties, falsifying the information, or omitting information required to be reported under section 43.4.
- (3) Making a false answer under chapter 43 relative to a person's qualifications and party affiliations.
- (4) Paying, offering to pay, or receiving compensation for voter registration assistance in violation of section 48A.25.
- (5) Using voter registration information in violation of section 48A.39.
- (6) As a candidate, making a promise to name or appoint another person to a position or to secure a position for another person in violation of section 49.120.
- (7) Soliciting the use of influence from a candidate in violation of section 49.121.
- (8) As a public official or employee, or a person acting under color of a public official or employee, knowingly requiring a public employee to act in connection with an absentee ballot in violation of section 53.7.
- (9) As a person designated by the county commissioner of elections or by the voter casting an absentee ballot,

031167

I.C.A. § 39A.4

failing to return an absentee ballot in violation of section 53.35A.

(10) As an incumbent officeholder of, or a candidate for, an office being voted for at the election in progress, serving as a member of a challenging committee or observer under section 49.104, subsection 2, 5, or 6.

(11) Returning a voted absentee ballot, by mail or in person, to the commissioner's office and the person returning the ballot is not the voter, an absentee ballot courier, a special precinct election official designated pursuant to section 53.22, subsection 1, or the designee of a voter described in section 53.22, subsection 5.

(12) Making a false or untrue statement reporting that a voted absentee ballot was returned to the commissioner's office, by mail or in person, by a person other than the voter, an absentee ballot courier, a special precinct election official designated pursuant to section 53.22, subsection 1, or the designee of a voter described in section 53.22, subsection 5.

2. Election misconduct in the third degree is a serious misdemeanor.

Title II. Elections and Official Duties

▣ Subtitle 1. Elections

▣ Chapter 39A. Election Misconduct (Refs &amp; Annos)

**→ 39A.5. Election misconduct in the fourth degree**

1. A person commits the crime of election misconduct in the fourth degree if the person willfully commits any of the following acts:

## a. Election day acts.

(1) As an employer, denying an employee the privilege conferred by section 49.109, or subjecting an employee to a penalty or reduction of wages because of the exercise of that privilege.

(2) Failing or refusing to comply with an order or command of an election official made pursuant to chapter 49 for which another penalty is not provided.

(3) Circulating, communicating, or attempting to circulate or communicate information with reference to the result of the counted ballots or making a compilation of vote subtotals before the polls are closed in violation of section 51.11, 52.40, or 53.23.

(4) Destroying, defacing, tearing down, or removing a list of candidates, card of instruction, or sample ballot posted as provided by law prior to the closing of the polls.

(5) Removing or destroying the supplies or articles furnished for the purpose of enabling voters to prepare their ballots.

(6) Violating or attempting to violate any of the provisions or requirements of chapter 49 to which another penalty does not apply.

## b. Miscellaneous offenses.

(1) As a public employee, acting in connection with an absentee ballot in violation of section 53.7.

(2) Neglecting or refusing to return an absentee ballot in violation of section 53.35, or violating any other provision of chapter 53 for which another penalty is not provided.

(3) Filing a challenge containing false information under section 48A.14.

2. Election misconduct in the fourth degree is a simple misdemeanor.

KANSAS STATUTES ANNOTATED

CHAPTER 25.—ELECTIONS

ARTICLE 24.—ELECTION CRIMES

**25-2407. Corrupt political advertising; penalty.**

Corrupt political advertising is:

(a) Publishing or causing to be published in a newspaper or other periodical any paid matter which is designed or tends to aid, injure or defeat any candidate for nomination or election to public office, unless such matter is followed by the word "advertisement" or the abbreviation "adv." in a separate line together with the name of the chairman of the political or other organization inserting the same or the name of the person who is responsible therefor; or

(b) broadcasting or causing to be broadcast by any radio or television station any paid matter which is designed or tends to aid, injure or defeat any candidate for nomination or election to public office, unless such matter is followed by a statement that the preceding was an advertisement together with the name of the chairman of the political or other organization sponsoring the same or the name of the person who is responsible therefor; or

(c) publishing or causing to be published in a newspaper or other periodical any paid matter which is intended to influence the vote of any person or persons for or against any question submitted for a proposition to amend the constitution or to authorize the issuance of bonds or any other question submitted at an election, unless such matter is followed by the word "advertisement" or the abbreviation "adv." in a separate line together with the name of the chairman of the political or other organization inserting the same or the name of the person who is responsible therefor; or

(d) broadcasting or causing to be broadcast by any radio or television station any paid matter which is intended to influence the vote of any person or persons for or against any question submitted for a proposition to amend the constitution or to authorize the issuance of bonds or any other question submitted at an election, unless such matter is followed by the statement that the preceding was an advertisement together with the name of the chairman of the political or other organization sponsoring the same or the name of the person who is responsible therefor.

Corrupt political advertising is a class C misdemeanor.

**25-2420. Election fraud by an election officer.**

Election fraud by an election officer is, while being charged with any election duty, and with intent to hinder, prevent or defeat a fair election: (a) Receiving any vote by any person who is not a registered voter or otherwise qualified to vote.

(b) Receiving any vote offered by any person who shall have voted previously at the same election.

(c) Possessing any falsely made, altered, forged or counterfeit poll books, registration books, party affiliation lists, election abstracts or returns or any other election papers.

(d) Receiving, canvassing, counting or tallying any ballots, votes or election returns which are fraudulent, forged, counterfeited or illegal.

(e) Issuing, granting, mailing or delivering any false, fraudulent or illegal certificate of nomination or certificate of election.

(f) Declaring or otherwise proclaiming any false election result.

(g) Declaring or otherwise proclaiming any election result based upon fraudulent, fictitious or illegal votes.

(h) Entering or writing upon any poll book, registration book or party affiliation list the name of any person not qualified to vote.

(i) Entering or writing upon any poll book, registration book or party affiliation list the name of any person who has not voted when in fact such person has not voted.

Election fraud by an election officer is a severity level 10, nonperson felony.

▣ Article 14. Offenses

▣ Chapter 1. Campaign Violations

**→3-14-1-2 Printing, publishing or distribution of slate during primary campaign without authority**

Sec. 2. (a) A person who:

(1) prints, publishes, or distributes a slate during a primary election campaign without authority from and:

(A) over the name of an organization of voters, including the name of the organization and its officers; or

(B) if it is not an organized group of voters, over the names of at least ten (10) voters in the political subdivision in which the primary election is being held;

together with the name of the printer who printed the slate;

(2) prints on a slate during a primary election campaign the name or number of a candidate without the candidate's written consent; or

(3) prints, publishes, or distributes a slate during a primary election campaign unless at least five (5) days before it is printed and published the written consent of the voters over whose names it is published and the written consent of the candidates in whose behalf it is distributed are filed in the office of the county election board in each county where the election is held;

commits a Class A misdemeanor.

(b) As used in this section, "slate" means a sample ballot, reproduction of an official ballot, or a listing of candidates:

(1) having the names or numbers of more than one (1) candidate for nomination at a primary election; and

(2) that expresses support for more than one (1) of the candidates set forth on the ballot or list.

Title 3. Elections

Article 14. Offenses

Chapter 1. Campaign Violations

**→3-14-1-6 Solicitation, challenge, or performance of election function by state police department civilian employee, police officer or firefighter**

Sec. 6. (a) A state police department employee or a police officer or firefighter (including a special duty, auxiliary, or volunteer police officer or firefighter) of a political subdivision who recklessly:

- (1) solicits votes or campaign funds;
- (2) challenges voters; or
- (3) performs any other election related function;

while wearing any identifying insignia or article of clothing that is part of an official uniform or while on duty commits a Class A misdemeanor.

(b) This section does not prohibit any of the following:

- (1) A state police department civilian employee from voting while on duty.
- (2) A police officer or firefighter from voting while wearing any part of an official uniform or while on duty.
- (3) An individual described in subsection (a) from consenting to a photograph (or other visual depiction) of the individual wearing any part of the individual's official uniform appearing in an advertisement in support of a candidate or political party.
- (4) An individual from serving as a pollbook holder under IC 3-6-6-36.
- (5) A police officer wearing any identifying insignia or article of clothing that is part of an official uniform or while on duty from serving as an absentee ballot courier appointed under IC 3-11.5-4-22.

## HISTORICAL AND STATUTORY NOTES

2006 Electronic Update

2006 Legislation

P.L.164-2006, Sec.131, amended this section by deleting "after December 31, 2005".

2006 Main Volume

P.L.12-1995, Sec.87, emerg. eff. retroactive to Jan. 1, 1995, substituted "IC 3-7-38" for "IC 3-7-3-14".

P.L.4-1996, Sec.87, emerg. eff. March 21, 1996, deleted "including envelopes or post cards returned by the United States Postal Service under IC 3-7-38," after "registration materials" in the first paragraph.

2003 Legislation

P.L.209-2003, Sec.192, amended this section by inserting "knowingly, intentionally, or recklessly" before and "or, after December 31, 2005, information contained in the computerized list maintained under IC 3-7-26.3" after "releases or removes any registration materials"; by inserting "county voter registration" before "office"; and by deleting "of the circuit court clerk or board of registration,".

▣ Chapter 2. Vote Fraud

**→3-14-2-16 Ballots; fraudulent application, showing, examination, receipt, delivery, possession, or completion or signing**

Sec. 16. A person who knowingly does any of the following commits a Class D felony:

- (1) Applies for or receives a ballot in a precinct other than that precinct in which the person is entitled to vote.
- (2) Except when receiving assistance under IC 3-11-9, shows a ballot after it is marked to another person in such a way as to reveal the contents of it or the name of a candidate for whom the person has voted.
- (3) Except when offering assistance requested by a voter in accordance with IC 3-11-9, examines a ballot that a voter has prepared for voting or solicits the voter to show the ballot.
- (4) Receives from a voter a ballot prepared by the voter for voting, except:
  - (A) the inspector;
  - (B) a member of the precinct election board temporarily acting for the inspector;
  - (C) a member or an employee of a county election board (acting under the authority of the board and state law) or an absentee voter board member acting under IC 3-11-10; or
  - (D) a member of the voter's household, an individual designated as attorney in fact for the voter, or an employee of:
    - (i) the United States Postal Service; or
    - (ii) a bonded courier company;
 (acting in the individual's capacity as an employee of the United States Postal Service or a bonded courier company) when delivering an envelope containing an absentee ballot under IC 3-11-10-1.
- (5) Receives a ballot from a person other than one of the poll clerks or authorized assistant poll clerks.
- (6) Delivers a ballot to a voter to be voted, unless the person is:
  - (A) a poll clerk or authorized assistant poll clerk; or
  - (B) a member of a county election board or an absentee voter board acting under IC 3-11-10.

HAWAII REVISED STATUTES ANNOTATED  
DIVISION 1. GOVERNMENT.  
TITLE 2. ELECTIONS.  
CHAPTER 19. ELECTION OFFENSE.  
**§ 19-3 Election frauds.**

The following persons shall be deemed guilty of an election fraud:

(1) Every person who, directly or indirectly, personally or through another, gives, procures, or lends, or agrees or offers to give, procure, or lend, or who endeavors to procure, any money or office or place of employment or valuable consideration to or for any elector, or to or for any person for an elector, or to or for any person in order to induce any elector to vote or refrain from voting, or to vote or refrain from voting for any particular person or party, or who does any such act on account of any person having voted or refrained from voting for any particular person at any election;

(2) Every person who advances or pays, or causes to be paid, any money to, or to the use of, any other person, with the intent that the money, or any part thereof, shall be expended in bribery at any election, or for any purpose connected with or incidental to any election; or who knowingly pays or causes to be paid any money to any person in the discharge or repayment of any money wholly or partly expended in bribery at any election, or for any purpose connected with or incidental to any election;

(3) Every elector who, before, during or after any election, directly or indirectly, personally or through another, receives, agrees, or contracts for any money, gift, loan, or valuable consideration, office, place, or employment for oneself or any other person for voting or agreeing to vote, or for refraining to vote or agreeing to refrain from voting, or for voting or refraining to vote for any particular person or party;

(4) Every person who, directly or indirectly, personally or through another, makes use of, or threatens to make use of, any force, violence, or restraint; or inflicts or threatens to inflict any injury, damage, or loss in any manner, or in any way practices intimidation upon or against any person in order to induce or compel the person to vote or refrain from voting, or to vote or refrain from voting for any particular person or party, at any election, or on account of the person having voted or refrained from voting, or voted or refrained from voting for any particular person or party; or who by abduction, distress, or any device or contrivance impedes, prevents, or otherwise interferes with the free exercise of the elective franchise;

(5) Every person who, at any election, votes or attempts to vote in the name of any other person, living or dead, or in some fictitious name, or who, having once

Page 2

HRS § 19-3

voted, votes or attempts to vote again, or knowingly gives or attempts to give more than one ballot for the same office at one time of voting;

(6) Every person who, before or during an election, knowingly publishes a false statement of the withdrawal of any candidate at the election;

(7) Every person who induces or procures any person to withdraw from being a candidate at an election in consideration of any payment or gift or valuable consideration; or of any threat; and every candidate who withdraws from being a candidate in pursuance of such inducement or procurement;

(8) Every public officer by law required to do or perform any act or thing with reference to any of the provisions in any law concerning elections who wilfully fails, neglects, or refuses to do or perform the same, or who is guilty of any wilful violation of any of the provisions thereof;

(9) Any person wilfully tampering or attempting to tamper with, disarrange, deface, or impair in any manner whatsoever, or destroy any voting machine while the same is in use at any election, or who, after the machine is locked in order to preserve the registration or record of any election made by the same, tampers or attempts to tamper with any voting machine; and

(10) Every person who, directly or indirectly, personally or through another, wilfully designs, alters, accesses, or programs any electronic voting system to cause the system to inaccurately record, tally, or report votes cast on the electronic voting system.

(L 1970, c 26, pt of § 2; am imp L 1984, c 90, § 1; am L 1989, c 88, § 2; am L 2005, c 200, § 2)

#### NOTES, REFERENCES, AND ANNOTATIONS

Cross references. --

As to voting by absentee voter at polls, see § 15-11.

#### NOTES TO DECISIONS

Constitutionality of clause in paragraph (8). --

Former clause in paragraph (8), which read "or who wilfully performs it in such a way as to hinder the objects thereof", was unconstitutionally vague, in violation of the due process clause of Haw. Const., Art. I, § 5; the remainder of the subsection was not invalidated since the other clauses were separable from the unconstitutional clause. *State v. Albano*, 67 Haw. 398, 688 P.2d 1152, 1984 Haw. LEXIS 130 (1984).

State was not required to seek federal approval of amendments to election fraud and registration statutes under the Federal Voting Rights Act of 1965, where the pertinent provisions had not been altered in substance. *State v. Albano*, 68 Haw. 516, 722 P.2d 453, 1986 Haw. LEXIS 94 (1986).

**C**

HAWAII REVISED STATUTES ANNOTATED  
 DIVISION 1. GOVERNMENT.  
 TITLE 2. ELECTIONS.  
 CHAPTER 19. ELECTION OFFENSE.

**§ 19-6 Misdemeanors.**

The following persons shall be guilty of a misdemeanor:

(1) Any person who offers any bribe or makes any promise of gain, or with knowledge of the same permits any person to offer any bribe or make any promise of gain for the person's benefit to any voter to induce the voter to sign a nomination paper, and any person who accepts any bribe or promise of gain of any kind as consideration for signing the same, whether the bribe or promise of gain be offered or accepted before or after the signing;

(2) Any person who wilfully tears down or destroys or defaces any election proclamation or any poster or notice or list of voters or visual aids or facsimile ballot, issued or posted by authority of law;

(3) Any person printing or duplicating or causing to be printed or duplicated any ballot, conforming as to the size, weight, shape, thickness, or color to the official ballot so that it could be cast or counted as an official ballot in an election;

(4) Every person who is disorderly or creates a disturbance whereby any meeting of the precinct officials or the board of registration of voters during an election is disturbed or interfered with; or whereby any person who intends to be lawfully present at any meeting or election is prevented from attending; or who causes any disturbance at any election; and every person assisting or aiding or abetting any disturbance;

(5) Every person who, either in person or through another, in any manner breaks up or prevents, or endeavors to break up or prevent, the holding of any meeting of the board of registration of voters, or in any manner breaks up or prevents, or endeavors to break up or prevent, the holding of any election;

(6) Any person, other than those designated by section 11-132, who remains or loiters within the area set aside for voting as set forth in section 11-132 during the time appointed for voting;

(7) Any person, including candidates, carrying on any campaign activities within the area described in section 11-132 during the period of time starting one hour before the polling place opens and ending when the polling place closes for the purpose of influencing votes. Campaign activities shall include the following:

- (A) Any distribution, circulation, carrying, holding, posting, or staking of campaign cards, pamphlets, posters and other literature;
- (B) The use of public address systems and other public communication media;
- (C) The use of motor caravans or parades; and
- (D) The use of entertainment troupes or the free distribution of goods and services;
- (8) Any person who opens a return envelope containing an absentee ballot voted under chapter 15 other than those authorized to do so under chapter 15;
- (9) Any unauthorized person found in possession of any voting machine or keys thereof;
- (10) Every person who wilfully violates or fails to obey any of the provisions of law, punishment for which is not otherwise in this chapter specially provided for.

(L 1970, c 26, pt of § 2; am L 1973, c 217, § 8; am L 1974, c 34, § 5(b); am L 1975, c 36, § 6 and c 146, § 2(b); am L 1976, c 106, § 5; am L 1980, c 264, § 7; am L 1989, c 121, § 2; am L 1990, c 115, § 3)

## NOTES, REFERENCES, AND ANNOTATIONS

Cross references. --

As to tampering with absentee ballot box or opening it before time prescribed, see § 15-8. As to violation of procedure for counting absentee ballots, see § 15-10. As to holding or display of moveable sign within right-of-way boundaries of public highway or sidewalk or adjacent to highway for political campaign purposes, see § 291C-77.

## NOTES TO DECISIONS

Where criminal statute, as this section, fails to proscribe specifically the alleged offense, it cannot be said that the defendants are in violation of the statute. *Coray v. Ariyoshi*, 54 Haw. 254, 506 P.2d 13, 1973 Haw. LEXIS 185 (1973).

Where poll watcher is person authorized to be in the precinct in question and where his action therein is not specifically proscribed, it cannot be said that he is in violation of § 11-132 and this section. *Coray v. Ariyoshi*, 54 Haw. 254, 506 P.2d 13, 1973 Haw. LEXIS 185 (1973).

Use of poll watchers information beyond 1000 foot perimeter. --

In the absence of constitutional objections, what is done beyond the 1000 feet perimeter with the information recorded by the poll watchers is a matter strictly for the legislature. *Coray v. Ariyoshi*, 54 Haw. 254, 506 P.2d 13, 1973 Haw. LEXIS 185 (1973). Cited in *State v. Park*, 55 Haw. 610, 525 P.2d 586, 1974 Haw. LEXIS 137 (1974); *State v. Good Guys for Fasi*, 56 Haw. 88, 528 P.2d 811, 1974 Haw. LEXIS 91

Chapter 23. Penal and Enforcement Provisions

**→§ 2303. Registration records; fraudulent entries; alterations, obliterations or omissions; loss; destruction; mutilation; secretion; false copies; penalty**

(a) Whoever, being a registrar, alternate registrar or assistant registrar:

(1) Fraudulently enters or permits to be entered in any registration record the name of any person as a registered voter who is not entitled to be entered therein as a registered voter; or

(2) Fraudulently refuses or omits to register or fraudulently misspells in any registration record in his or her charge the name of any person entitled under this title to have his or her name entered in such registration records; or

(3) Fraudulently removes from any Election District Record in his or her charge the original permanent registration record of any person entered therein; or

(4) Makes any entry in any registration record, except at the time and in the manner in this title provided; or

(5) Does anything which is by this title forbidden to do; or

(6) Whoever, being a registrar, alternate registrar or assistant registrar, inspector or judge of election:

a. Loses any registration records which may be in his or her charge or custody; or

b. Willfully destroys, mutilates, defaces, falsifies or fraudulently removes or secretes any registration record; or

c. Knowingly makes any false entry in or false copy of any registration record or any part thereof; or

d. Fraudulently makes any entry, erasure or alteration in any registration record;

shall be deemed to have knowingly and willfully violated his or her official duty and shall be fined in such amount or imprisoned for such term or both as the court in its discretion may determine.

**→§ 5105. Application to school elections**

The provisions of this chapter shall additionally be applicable to any local school elections held under Title 14.

67 Laws 1990, ch. 243, § 10.

## NOTES OF DECISIONS

**In general 1**

## 1. In general

The Cape Henlopen School District did not violate any criminal statutes when it offered a free pizza party for the school with the documented highest percentage of students whose parents voted in a district referendum. Nor did an alleged \$5000 donation to Cape that paid for Cape's support of the referendum violate Delaware's Campaign Finance Act. Title 15, including, 15 Del. C. § 5105 criminalizes specified conduct by or toward election officers. No allegations regarding the conduct of or toward election officers arose in Cape Henlopen. A civil cause would be possible pursuant to 15 Del. C. § 5162 if the voter can allege that a person attempted to control the exercise of his or her right to vote. Because this statute creates a civil claim rather than a criminal offense, the Attorney General has no jurisdiction to enforce its provisions. Op.Atty.Gen 06-IB04, (March 23, 2006) 2006 WL 1242015

**→§ 5118. Interference with election; penalties**

(a) Whoever:

(1) Enters or attempts to enter the voting room before the hour of opening the polls on the day of election or at the time of opening the election, or at any time during the day of the election and before the hour of closing the election for the purpose of interfering with the election officers in the discharge of their duties as such or for any purpose; or

(2) Attempts to molest, disturb or prevent the election officers from proceeding regularly with any general or special election; or

(3) Takes charge or attempts to take charge of any voting room or place where the election is held within the time mentioned in this subsection for the purpose of preventing or delaying an election or for any other purpose on election day;

shall be fined not less than \$500 nor more than \$1,000, and imprisoned not more than 3 years.

(b) Whoever, not in this title authorized so to do, enters or attempts to enter the election room or within the railing leading to the entrance of the election room, or remains within 30 feet of the polling place, contrary to this title, shall be fined not more than \$200.

(c) Whoever resists a challenger appointed pursuant to §§ 3164 and 4934 of this title or a special officer appointed pursuant to § 4935 of this title shall be fined not more than \$100 or imprisoned not more than one year.

## NOTES OF DECISIONS

**In general 1**

## 1. In general

The primary election law (20 Del. Laws [1897] p. 375, c. 393) provides that every election officer or person having the custody of any document or evidence of any description directed by the act to be made, filed, or preserved, who is guilty of stealing, willfully destroying, mutilating, or defacing, falsifying, or fraudulently removing or secreting the same, shall be guilty of a misdemeanor. Held, that ballots cast at a primary election were "papers or evidence" required to be preserved and delivered to the sheriff by section 29, p. 391, so that the destruction, mutilation, etc., thereof would constitute an offense. State v. Tyre, 1907, 6 Penne. 343, 22 Del. 343, 67 A. 199. Elections ↪ 314

Under 19 Del. Laws, c. 39, § 40, making it a crime for an election inspector to permit any alteration of election documents in his custody, an inspector is guilty who is so careless in caring for them that he thereby enables some one else to make such alteration. State v. Brand, 1897, 16 Del. 459, 43 A. 263. Elections ↪ 314

Part IV. General Elections

▣ Chapter 51. Criminal Offenses

▣ Subchapter II. Particular Offenses

**→§ 5128. Fraudulent voting; penalty**

Whoever, at any general or special election:

- (1) Falsely personates any elector or other person and votes or attempts or offers to vote in or upon the name of such elector or other person; or
- (2) Votes or attempts to vote in or upon the name of any other person whether living or dead or in or upon any false, assumed or fictitious name; or
- (3) Knowingly, willfully or fraudulently votes more than once for any candidate at any election for the same office; or
- (4) Votes or attempts or offers to vote in any election district without having a lawful right to vote therein, or to vote more than once or to vote in more than 1 election district; or
- (5) Having once voted, votes or attempts or offers to vote again; or
- (6) Fraudulently delivers or offers to an election officer more than a single ballot; or
- (7) Knowingly, willfully or fraudulently does any unlawful act to secure an opportunity for himself or herself or for any other person to vote,

shall be fined not less than \$50 or more than \$200, or imprisoned not less than 30 days or more than 2 years, or both.

19 Laws 1891, ch. 39, § 34; 50 Laws 1955, ch. 174, § 1; 70 Laws 1995, ch. 186, § 1, eff. July 10, 1995.

 Part IV. General Elections  
 Chapter 51. Criminal Offenses  
 Subchapter II. Particular Offenses

**→§ 5132. Fraudulent deposit or alteration of ballots or entering voting machine booth or casting vote; penalty**

(a) Whoever, being an election officer, at any election:

(1) Knowingly and willfully puts or causes to be put any ballot or ballots or other paper having the semblance thereof into any box used at such election for the reception of votes; or

(2) Knowingly and willfully causes or permits any ballot to be in the ballot box at the opening of the polls and before voting shall have commenced; or

(3) Knowingly or willfully or fraudulently puts any ballot or other paper having the semblance thereof into any ballot box unless the same is offered by an elector and the elector's name has been found and checked upon the Election District Record; or

(4) Fraudulently before, during or after the reading and count of the ballot, in any manner changes, substitutes or alters any ballot; or

(5) Removes any ballot or semblance thereof from, or adds any ballot or semblance thereof to, the ballots found in any such ballot box upon the closing of the polls; or

(6) Knowingly and willfully causes or permits any vote to be registered on a voting machine, unless the vote is cast by an elector whose name has been found and checked upon the books of registered voters and who has not previously voted, or knowingly or willfully enters or permits anyone to enter a voting machine booth, unless the person is an elector whose name has been found or checked upon the books of registered voters and who has not previously voted or is an election officer or member or employee of the department of elections whose entrance into the voting machine booth is required by the provisions of this title,

shall be deemed to have knowingly and wilfully violated his or her official duty.

(b) Whoever, not being an election officer, does or causes to be done any of the acts, matters or things mentioned in subsection (a) of this section, shall be fined not more than \$200 or imprisoned not more than 2 years, or both.

Part IV. General Elections

▣ Chapter 51. Criminal Offenses

▣ Subchapter III. Offenses Carrying Civil Liability

**→§ 5164. Liability of stakeholder for paying election bet**

If any stakeholder, or person with whom any money or thing, laid as a wager or bet on the result of any election, or on the election or defeat of any candidate or person voted for thereat, shall be deposited, shall at any time either before or after such bet shall have been decided, pay over or deliver to either or both of the persons betting the same, or to any other person by the order or for the use of them, or either of them, the money or thing so illegally betted, every such stakeholder or depository shall forfeit and pay to any person who will sue for the same, double the amount of such wager or bet or double the value of the thing betted.

Either of the persons betting shall be competent witnesses against the stakeholder.

☐ Chapter 10. Elections. (Refs &amp; Annos)

☐ Subchapter I. Regulation of Elections.

**→ § 1-1001.14. Corrupt election practices.**

(a) Any person who shall register, or attempt to register, or vote or attempt to vote under the provisions of this subchapter and make any false representations as to his or her qualifications for registering or voting or for holding elective office, or be guilty of violating § 1-1001.07(d)(2)(D), § 1-1001.09, § 1-1001.12, or § 1-1001.13 or be guilty of bribery or intimidation of any voter at an election, or being registered, shall vote or attempt to vote more than once in any election so held, or shall purloin or secrete any of the votes cast in an election, or attempt to vote in an election held by a political party other than that to which he or she has declared himself or herself to be affiliated, or, if employed in the counting of votes in any election held pursuant to this subchapter, knowingly make a false report in regard thereto, and every candidate, person, or official of any political committee who shall knowingly make any expenditure or contribution in violation of Chapter 11 of this title, shall, upon conviction, be fined not more than \$10,000 or be imprisoned not more than 5 years, or both.

(b)(1) Any person who signs an initiative, referendum or recall petition with any other than his or her own name, or who signs a petition for an initiative, referendum or recall measure, knowing that he or she is not a registered qualified elector in the District of Columbia, or who makes a false statement as to his or her residency on any such petition, shall upon conviction be fined not more than \$10,000 or be imprisoned not more than 1 year, or both.

(2) Any public officer, involved in any part of the election process, who willfully violates any of the provisions of § 1-1001.16 or § 1-1001.17, shall be fined not more than \$10,000 or be imprisoned not more than 1 year, or both.

(3) Any person who: (A) For any consideration, compensation, gratuity, reward or thing of value or promise thereof, signs or promises to sign or declines to sign, or promises not to sign any initiative, referendum, or recall petition; or (B) pays or offers or promises to pay, or gives or offers or promises to give any consideration, compensation, gratuity, reward, or thing of value to any person to induce him or her to sign or not to sign, his or her signatures upon any initiative, referendum, or recall petition, or to vote for or against, or to abstain from voting on, any initiative, referendum, or recall measure; or (C) by any other corrupt means or practice, or by threats or intimidation, interferes with, or attempts to interfere with, the right of any qualified registered elector to sign or not to sign any initiative, referendum, or recall petition, or to vote for or against, or to abstain from voting on any initiative, referendum, or recall measure; or (D) makes any false statement to the Board concerning any initiative, referendum, or recall petition, or the signatures appended thereto shall be fined not more than \$10,000 or be imprisoned not more than 1 year, or both.

(4) Any proposer or circulator of an initiative, referendum, or recall petition who willfully violates any provision of §§ 1-1001.16 and 1-1001.17 shall, upon conviction thereof, be subject to a fine of not more than \$10,000 or to imprisonment of not more than 6 months, or both. Each occurrence of a violation of §§ 1-1001.16 and 1-1001.17

Division I. Government of District.

Title 1. Government Organization. (Refs &amp; Annos)

<sup>Ⓜ</sup> Chapter 10. Elections. (Refs & Annos)        <sup>Ⓜ</sup> Subchapter I. Regulation of Elections.

**→ § 1-1001.15. Candidacy for more than 1 office prohibited; multiple nominations; candidacy of officeholder for another office restricted.**

(a) No person shall be a candidate for more than 1 office on the Board of Education or the Council or Mayor in any election for the members of the Board of Education or the Council or Mayor, and no person shall be a candidate for more than 1 office on the Council or for the Mayor in any primary election. If a person is nominated for more than 1 such office, he or she shall, within 3 days after the Board has sent him notice that he or she has been so nominated, designate in writing the office for which he or she wishes to run, in which case he or she will be deemed to have withdrawn all other nominations. In the event that such person fails within such 3-day period to file such a designation with the Board, all such nominations of such person shall be deemed withdrawn.

(b) Notwithstanding the provisions of subsection (a) of this section, a person holding the office of Mayor, Delegate, Chairman or member of the Council, or member of the Board of Education shall, while holding such office, be eligible as a candidate for any other of such offices in any primary or general election. In the event that said person is elected in a general election to the office for which he or she is a candidate, that person shall, within 24 hours of the date that the Board certifies said person's election, pursuant to subsection (a)(11) of § 1-1001.05, either resign from the office that person currently holds or shall decline to accept the office for which he or she was a candidate. In the event that said person elects to resign, said resignation shall be effective not later than 24 hours before the date upon which that person would assume the office to which he or she has been elected.

Chapter 104. Election Code: Violations; Penalties (Refs & Annos)

**→104.012. Consideration for registration; interference with registration; soliciting registrations for compensation; alteration of registration application**

(1) Any person who gives anything of value that is redeemable in cash to any person in consideration for his or her becoming a registered voter commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. This section shall not be interpreted, however, to exclude such services as transportation to the place of registration or baby-sitting in connection with the absence of an elector from home for registering.

(2) A person who by bribery, menace, threat, or other corruption, directly or indirectly, influences, deceives, or deters or attempts to influence, deceive, or deter any person in the free exercise of that person's right to register to vote at any time, upon the first conviction, commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084, and, upon any subsequent conviction, commits a felony of the second degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(3) A person may not solicit or pay another person to solicit voter registrations for compensation that is based upon the number of registrations obtained. A person who violates the provisions of this subsection commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(4) A person who alters the voter registration application of any other person, without the other person's knowledge and consent, commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

Effective: [See Text Amendments]

West's Florida Statutes Annotated Currentness  
 Title IX. Electors and Elections (Chapters 97-109)  
 Chapter 104. Election Code: Violations; Penalties (Refs & Annos)

→ **104.0515. Voting rights; deprivation of, or interference with, prohibited; penalty**

- (1) All citizens of this state who are otherwise qualified by law to vote at any election by the people in this state or in any district, county, city, town, municipality, school district, or other subdivision of this state shall be entitled and allowed to vote at all such elections without distinction according to race, color, or previous condition of servitude, notwithstanding any law, ordinance, regulation, custom, or usage to the contrary.
- (2) No person acting under color of law shall:
- (a) In determining whether any individual is qualified under law to vote in any election, apply any standard, practice, or procedure different from the standards, practices, or procedures applied under law to other individuals within the same political subdivision who have been found to be qualified to vote; or
- (b) Deny the right of any individual to vote in any election because of an error or omission on any record or paper relating to any application, registration, or other act requisite to voting, if such error or omission is not material in determining whether such individual is qualified under law to vote in such election. This paragraph shall apply to absentee ballots only if there is a pattern or history of discrimination on the basis of race, color, or previous condition of servitude in regard to absentee ballots.
- (3) No person, whether acting under color of law or otherwise, shall intimidate, threaten, or coerce, or attempt to intimidate, threaten, or coerce, any other person for the purpose of interfering with the right of such other person to vote or not to vote as that person may choose, or for the purpose of causing such other person to vote for, or not vote for, any candidate for any office at any general, special, or primary election held solely or in part for the purpose of selecting or electing any such candidate.
- (4) No voting qualification or prerequisite to voting, and no standard, practice, or procedure, shall be imposed or applied by any political subdivision of this state to deny or abridge the right of any citizen to vote on account of race or color.
- (5) Any person who violates the provisions of this section is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

Title IX. Electors and Elections (Chapters 97-109)

Chapter 104. Election Code: Violations; Penalties (Refs &amp; Annos)

**→104.061. Corruptly influencing voting**

(1) Whoever by bribery, menace, threat, or other corruption whatsoever, either directly or indirectly, attempts to influence, deceive, or deter any elector in voting or interferes with him or her in the free exercise of the elector's right to vote at any election commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084 for the first conviction, and a felony of the second degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084, for any subsequent conviction.

(2) No person shall directly or indirectly give or promise anything of value to another intending thereby to buy that person's or another's vote or to corruptly influence that person or another in casting his or her vote. Any person who violates this subsection is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. However, this subsection shall not apply to the serving of food to be consumed at a political rally or meeting or to any item of nominal value which is used as a political advertisement, including a campaign message designed to be worn by a person.

West's Florida Statutes Annotated Currentness

Title IX. Electors and Elections (Chapters 97-109)

Chapter 104. Election Code: Violations; Penalties (Refs & Annos)

**→104.071. Remuneration by candidate for services, support, etc.; penalty**

(1) It is unlawful for any person supporting a candidate, or for any candidate, in order to aid or promote the nomination or election of such candidate in any election, directly or indirectly to:

(a) Promise to appoint another person, promise to secure or aid in securing appointment, nomination or election of another person to any public or private position, or to any position of honor, trust, or emolument, except one who has publicly announced or defined what his or her choice or purpose in relation to any election in which he or she may be called to take part, if elected.

(b) Give, or promise to give, pay, or loan, any money or other thing of value to the owner, editor, publisher, or agent, of any communication media, as well as newspapers, to advocate or oppose, through such media, any candidate for nomination in any election or any candidate for election, and no such owner, editor, or agent shall give, solicit, or accept such payment or reward. It shall likewise be unlawful for any owner, editor, publisher, or agent of any poll-taking or poll-publishing concern to advocate or oppose through such poll any candidate for nomination in any election or any candidate for election in return for the giving or promising to give, pay, or loan any money or other thing of value to said owner, editor, publisher, or agent of any poll-taking or poll-publishing concern.

(c) Give, pay, expend, or contribute any money or thing of value for the furtherance of the candidacy of any other candidate.

(d) Furnish, give, or deliver to another person any money or other thing of value for any purpose prohibited by the election laws.

This subsection shall not prohibit a candidate from furnishing complimentary tickets to the candidate's campaign fund raiser to other candidates.

(2) A candidate may give his or her own personal or business funds to another candidate, so long as the contribution is not given in exchange for a promise or expectation that the recipient will directly or indirectly do anything to aid or promote the candidacy of the contributor which the recipient would not have otherwise done.

(3) Any person who violates any provision of this section is guilty of a felony of the third degree, punishable as provided in s. 775.082 or s. 775.083, and from and after conviction shall be disqualified to hold office.

West's Florida Statutes Annotated Currentness

Title IX. Electors and Elections (Chapters 97-109)

Chapter 104. Election Code: Violations; Penalties (Refs &amp; Annos)

**→104.271. False or malicious charges against, or false statements about, opposing candidates; penalty**

(1) Any candidate who, in a primary election or other election, willfully charges an opposing candidate participating in such election with a violation of any provision of this code, which charge is known by the candidate making such charge to be false or malicious, is guilty of a felony of the third degree, punishable as provided in s. 775.082 or s. 775.083 and, in addition, after conviction shall be disqualified to hold office.

(2) Any candidate who, in a primary election or other election, with actual malice makes or causes to be made any statement about an opposing candidate which is false is guilty of a violation of this code. An aggrieved candidate may file a complaint with the Florida Elections Commission pursuant to s. 106.25. The commission shall adopt rules to provide an expedited hearing of complaints filed under this subsection. Notwithstanding any other provision of law, the commission shall assess a civil penalty of up to \$5,000 against any candidate found in violation of this subsection, which shall be deposited to the account of the General Revenue Fund of the state.

**Effective: October 01, 2006**

West's Florida Statutes Annotated Currentness

Title IX. Electors and Elections (Chapters 97-109)

Chapter 104. Election Code: Violations; Penalties (Refs & Annos)

**→ 104.31. Political activities of state, county, and municipal officers and employees**

(1) No officer or employee of the state, or of any county or municipality thereof, except as hereinafter exempted from provisions hereof, shall:

(a) Use his or her official authority or influence for the purpose of interfering with an election or a nomination of office or coercing or influencing another person's vote or affecting the result thereof.

(b) Directly or indirectly coerce or attempt to coerce, command, or advise any other officer or employee to pay, lend, or contribute any part of his or her salary, or any money, or anything else of value to any party, committee, organization, agency, or person for political purposes. Nothing in this paragraph or in any county or municipal charter or ordinance shall prohibit an employee from suggesting to another employee in a noncoercive manner that he or she may voluntarily contribute to a fund which is administered by a party, committee, organization, agency, person, labor union or other employee organization for political purposes.

(c) Directly or indirectly coerce or attempt to coerce, command, and advise any such officer or employee as to where he or she might purchase commodities or to interfere in any other way with the personal right of said officer or employee.

The provisions of this section shall not be construed so as to prevent any person from becoming a candidate for and actively campaigning for any elective office in this state. All such persons shall retain the right to vote as they may choose and to express their opinions on all political subjects and candidates. The provisions of paragraph (a) shall not be construed so as to limit the political activity in a general, special, primary, bond, referendum, or other election of any kind or nature, of elected officials or candidates for public office in the state or of any county or municipality thereof; and the provisions of paragraph (a) shall not be construed so as to limit the political activity in general or special elections of the officials appointed as the heads or directors of state administrative agencies, boards, commissions, or committees or of the members of state boards, commissions, or committees, whether they be salaried, nonsalaried, or reimbursed for expense. In the event of a dual capacity of any member of a state board, commission, or committee, any restrictive provisions applicable to either capacity shall apply. The provisions of paragraph (a) shall not be construed so as to limit the political activity in a general, special, primary, bond, referendum, or other election of any kind or nature of the Governor, the elected members of the Governor's Cabinet, or the members of the Legislature. The provisions of paragraphs (b) and (c) shall apply to all officers and employees of the state or of any county or municipality thereof, whether elected, appointed, or otherwise employed, or whether the activity shall be in connection with a primary, general, special, bond, referendum, or other election of any kind or nature.

(2) An employee of the state or any political subdivision may not participate in any political campaign for an elective office while on duty.

NOTES OF DECISIONS

**In general 1**

**1. In general**

Public officials, authorized by law, as well as the several candidates and the electorate, may report alleged violations of the Florida Election Code to an appropriate prosecuting attorney, who, upon subsequent investigation may take appropriate action as the Election Code and the authority of his office may authorize. Op.Atty.Gen., 072-331, Sept. 28, 1972.

The Florida Election Code imposes specific duties upon the supervisor of elections and other public officials, but enforcement of the election laws for which criminal sanctions are imposed lies with the appropriate prosecuting attorneys of the several counties and the determination of guilt in such cases rests with the judiciary. Op.Atty.Gen., 072-331, Sept. 28, 1972.

## →§ 18100. Violations; imprisonment

(a) Every person who willfully causes, procures, or allows himself or herself or any other person to be registered as a voter, knowing that he or she or that other person is not entitled to registration, is punishable by imprisonment in the state prison for 16 months or two or three years, or in a county jail for not more than one year.

(b) Every person who knowingly and willfully signs, or causes or procures the signing of, an affidavit of registration of a nonexistent person, and who mails or delivers, or causes or procures the mailing or delivery of, that affidavit to a county elections official is guilty of a crime punishable by imprisonment in the state prison for 16 months or two or three years, or in a county jail for not more than one year. For purposes of this subdivision, "nonexistent person" includes, but is not limited to, deceased persons, animals, and inanimate objects.

HISTORICAL AND STATUTORY NOTES

2003 Main Volume

Sections 1 and 7 of Stats.2002, c. 753 (A.B.2277), provide:

"SECTION 1. The Legislature hereby finds and declares the following:

"(a) It is the policy of this state that all election laws and procedures are established and construed to assist the elector in the exercise of his or her right to vote. It is the further policy of the state that this goal be accomplished in an economical manner that prevents fraud and encourages electors to vote.

"(b) California's system of elections can be improved by the use of current and emerging technologies to increase voter participation.

"(c) Greater electoral participation may be achieved by allowing all voters to submit absentee ballot requests electronically.

"(d) It is the intent of the Legislature that the electronic application process for an absent voter's ballot utilize current Internet technology security.

"(e) It is the intent of the Legislature to provide voters with a web page secure Internet format that is completed manually by the voter and submitted over the Internet as a single, secure document."

"SEC. 7. The Secretary of State shall report to the Legislature, within one year of the first statewide election following implementation of this act, on the impact, if any, of permitting electronic application for absentee ballots, including the impact of the electronic applications on voter participation."

**Effective: [See Text Amendments]**

West's Annotated California Codes Currentness

Elections Code (Refs & Annos)

Division 18. Penal Provisions (Refs & Annos)

Chapter 2. Voter Registration (Refs & Annos)

**→§ 18108.5. Affidavit records; notice of noncomplying affidavits; failure to comply with statutory requirements; offense; penalties; exemptions**

(a) Any person, company, or other organization that agrees to pay money or other valuable consideration, whether on a per-affidavit basis or otherwise, to any person who assists another person to register to vote by receiving the completed affidavit of registration who fails to comply with Section 2159.5, is guilty of a misdemeanor, and shall be punished by a fine not exceeding one thousand dollars (\$1,000), or by imprisonment in the county jail not exceeding six months or when the failure to comply is found to be willful, not exceeding one year, or both.

(b) Any person, company, or other organization that agrees to pay money or other valuable consideration, whether on a per-affidavit basis or otherwise, to any person who assists another person to register to vote by receiving the completed affidavit of registration, upon a third or subsequent conviction, on charges brought and separately tried, for failure to comply with Section 2159.5 shall be punished by a fine not exceeding ten thousand dollars (\$10,000), or by imprisonment in the county jail not to exceed one year, or both.

(c) An elections official shall notify any person, company, or other organization that agrees to pay money or other valuable consideration, whether on a per-affidavit basis or otherwise, to any person who assists another person to register to vote by receiving the completed affidavit of registration, that three or more affidavits of registration submitted by a person who assisted another to register to vote do not comply with Sections 18100, 18101, 18103, or 18106. The elections official may forward a copy of each of the noncomplying affidavits of registration to the district attorney, who may make a determination whether probable cause exists to believe that a violation of law has occurred.

(d) This section shall not apply to any public agency or its employees that is designated as a voter registration agency pursuant to the National Voter Registration Act of 1993 (42 U.S.C. Sec. 1973gg), when an elector asks for assistance to register to vote during the course and scope of the agency's normal business.

West's Ann.Cal.Elec.Code § 18110

C

Effective: [See Text Amendments]

West's Annotated California Codes Currentness  
 Elections Code (Refs & Annos)  
 Division 18. Penal Provisions (Refs & Annos)  
 Chapter 2. Voter Registration (Refs & Annos)

→ § 18110. Disclosure of home address or telephone number on voter registration card; violations

(a) For purposes of this section, "home address" means only street address and does not include an individual's city or post office address.

(b) Any person or public entity who, in violation of Section 2194, discloses the home address or telephone number listed on a voter registration card of any of the following individuals is guilty of a misdemeanor:

(1) An active or retired peace officer, as defined in Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code.

(2) An employee of a city police department or a county sheriff's office.

(3) The spouse or children of the individuals specified in paragraphs (1) and (2) who live with those individuals.

(c) Any person or public entity, who in violation of Section 2194, discloses the home address or telephone number listed on a voter registration card of any individual specified in paragraph (1), (2), or (3) of subdivision (b), and that violation results in bodily injury to any of those individuals, is guilty of a felony.

 Article 3. Deceptive Online Activities (Refs & Annos)

**→ § 18320. Short title; political cyberfraud; definitions**

- (a) This act shall be known and may be cited as the "California Political Cyberfraud Abatement Act."
- (b) It is unlawful for a person, with intent to mislead, deceive, or defraud, to commit an act of political cyberfraud.
- (c) As used in this section:
- (1) "Political cyberfraud" means a knowing and willful act concerning a political Web site that is committed with the intent to deny a person access to a political Web site, deny a person the opportunity to register a domain name for a political Web site, or cause a person reasonably to believe that a political Web site has been posted by a person other than the person who posted the Web site, and would cause a reasonable person, after reading the Web site, to believe the site actually represents the views of the proponent or opponent of a ballot measure. Political cyberfraud includes, but is not limited to, any of the following acts:
- (A) Intentionally diverting or redirecting access to a political Web site to another person's Web site by the use of a similar domain name, meta-tags, or other electronic measures.
- (B) Intentionally preventing or denying exit from a political Web site by the use of frames, hyperlinks, mousetrapping, popup screens, or other electronic measures.
- (C) Registering a domain name that is similar to another domain name for a political Web site.
- (D) Intentionally preventing the use of a domain name for a political Web site by registering and holding the domain name or by reselling it to another with the intent of preventing its use, or both.
- (2) "Domain name" means any alphanumeric designation that is registered with or assigned by any domain name registrar, domain name registry, or other domain registration authority as part of an electronic address on the Internet.
- (3) "Political Web site" means a Web site that urges or appears to urge the support or opposition of a ballot measure.

Elections Code (Refs & Annos)

Division 18. Penal Provisions (Refs & Annos)

Chapter 4. Election Campaigns (Refs & Annos)

Article 7. Electioneering (Refs & Annos)

**→§ 18370. Electioneering where voters may be casting votes; misdemeanor**

No person, on election day, or at any time that a voter may be casting a ballot, shall, within 100 feet of a polling place or an elections official's office:

- (a) Circulate an initiative, referendum, recall, or nomination petition or any other petition.
- (b) Solicit a vote or speak to a voter on the subject of marking his or her ballot.
- (c) Place a sign relating to voters' qualifications or speak to a voter on the subject of his or her qualifications except as provided in Section 14240.
- (d) Do any electioneering.

As used in this section, "100 feet of a polling place or an elections official's office" means a distance 100 feet from the room or rooms in which voters are signing the roster and casting ballots.

Any person who violates any of the provisions of this section is guilty of a misdemeanor.

**→§ 18541. Prohibited activities in proximity of polling place relating to the intent of dissuading others from voting; penalties**

(a) No person shall, with the intent of dissuading another person from voting, within 100 feet of a polling place, do any of the following:

(1) Solicit a vote or speak to a voter on the subject of marking his or her ballot.

(2) Place a sign relating to voters' qualifications or speak to a voter on the subject of his or her qualifications except as provided in Section 14240.

(3) Photograph, videotape, or otherwise record a voter entering or exiting a polling place.

(b) Any violation of this section is punishable by imprisonment in a county jail for not more than 12 months, or in the state prison. Any person who conspires to violate this section is guilty of a felony.

(c) For purposes of this section, 100 feet means a distance of 100 feet from the room or rooms in which voters are signing the roster and casting ballots.

▣ Chapter 6. Corruption of the Voting Process (Refs & Annos)

▣ Article 4. Corruption of Voting (Refs & Annos)

**→ § 18564.5. Civil action for offenses**

(a) The Secretary of State, Attorney General, and any local elections official in the county in which the act occurs, may bring a civil action against an individual, business, or other legal entity that commits any of the following acts before, during, or after an election:

(1) Tamper, interfere, or attempts to interfere with the correct operation of, or willfully damages in order to prevent the use of, any voting machine, voting device, voting system, vote tabulating device, or ballot tally software.

(2) Interferes or attempts to interfere with the secrecy of voting or interferes or attempts to interfere with ballot tally software program source codes.

(3) Knowingly, and without authorization, gains access to or provides another person or persons with access to a voting machine for the purpose of committing one of the acts specified by this section.

(4) Willfully substitutes or attempts to substitute forged, counterfeit, or malicious ballot tally software program source codes.

(5) Knowingly, and without authorization, inserts or causes the insertion of uncertified hardware, software, or firmware, for whatever purpose, into any voting machine, voting device, voting system, vote tabulating device, or ballot tally software.

(6) Fails to notify the Secretary of State prior to any change in hardware, software, or firmware to a voting machine, voting device, voting system, or vote tabulating device, certified or conditionally certified for use in this state.

(b) A civil action may be brought pursuant to this section for a civil penalty not to exceed fifty thousand dollars (\$50,000) for each act and for injunctive relief, if appropriate.

#### HISTORICAL AND STATUTORY NOTES

2003 Main Volume

Legislative intent relating to Stats.1994, c. 920 (S.B.1547), § 2, see Historical and Statutory Notes under Elections Code § 1.

Stats.2001, c. 922 (A.B.1520), added "punishable by imprisonment in the county jail not exceeding six months, by a fine not exceeding ten thousand dollars (\$10,000), or by both".

Legislative findings and declarations relating to Stats.2001, c. 922 (A.B.1520), see Historical and Statutory Notes under Elections Code § 100.5.

Governor Davis issued the following signing message regarding Stats.2001, c. 922 (A.B.1520):

"I am signing Assembly Bill 1520, which allows any voter to apply for permanent absentee voter status.

"This bill is a recognition that California's busy lifestyles should not be an impediment to their participation in the electoral process."

Sincerely,

GRAY DAVIS

**→§ 18600. Misrepresentation or false statement concerning petitions**

Every person is guilty of a misdemeanor who:

(a) Circulating, as principal or agent, or having charge or control of the circulation of, or obtaining signatures to, any state or local initiative, referendum or recall petition, intentionally misrepresents or intentionally makes any false statement concerning the contents, purport or effect of the petition to any person who signs, or who desires to sign, or who is requested to sign, or who makes inquiries with reference to it, or to whom it is presented for his or her signature.

(b) Willfully and knowingly circulates, publishes, or exhibits any false statement or misrepresentation concerning the contents, purport or effect of any state or local initiative, referendum, or recall petition for the purpose of obtaining any signature to, or persuading or influencing any person to sign, that petition.

(c) Circulating, as principal or agent, or having charge or control of the circulation of, or obtaining signatures to, any state or local initiative, intentionally makes any false statement in response to any inquiry by any voter as to whether he or she is a paid signature gatherer or a volunteer.

Article 3. Improper Payments to Prevent Petition Circulation and Filing (Refs & Annos)

**→§ 18621. Receipt by proponent of consideration for abandoning petitions;  
penalties**

Any proponent of an initiative or referendum measure or recall petition who seeks, solicits, bargains for, or obtains any money or thing of value of or from any person, firm, or corporation for the purpose of abandoning the same or stopping the circulation of petitions concerning the same, or failing or neglecting or refusing to file the measure or petition in the office of the elections official or other officer designated by law within the time required by law after obtaining the number of signatures required under the law to qualify the measure or petition, or performing any act that will prevent or aid in preventing the initiative, referendum or recall proposed from qualifying as an initiative or referendum measure, or resulting in a recall election is punishable by a fine not exceeding five thousand dollars (\$5,000) or by imprisonment in the state prison for 16 months or two or three years or in a county jail not exceeding one year, or by both the fine and imprisonment.

Chapter 7. Initiative, Referendum, and Recall (Refs & Annos)

Article 8. Filing Petitions to Defeat an Initiative or Referendum (Refs & Annos)

→ § 18670. Misdemeanor

Every person is guilty of a misdemeanor who, either as principal or agent, files in the office of the Secretary of State, county elections official, or in the office of any other officer designated by law to receive the filing, a petition or any section of a petition relating to the Constitution or the laws of this state, authorized by the Constitution or laws of this state regulating the statewide initiative or referendum, with the intention of thereby defeating that initiative or referendum measure that is embraced in the petition. Nothing in this section applies to any person who, in good faith, files a petition embracing an initiative or referendum measure that conflicts with a similar measure already on file.

Elections Code (Refs &amp; Annos)

Division 18. Penal Provisions (Refs &amp; Annos)

▣ Chapter 7. Initiative, Referendum, and Recall (Refs &amp; Annos)

▣ Article 9. Misuse of Campaign Funds (Refs &amp; Annos)

**→ § 18680. Misappropriation; expenses within due and lawful execution of the trust; penalties**

Every person who is entrusted with money or things of value for the purpose of promoting or defeating any initiative, referendum, or recall petition or any measure that has qualified for the ballot is a trustee of the money or things of value. If a person wrongfully appropriates the money or things of value to any use or purpose not in the due and lawful execution of the trust, the person shall be punishable by a fine not exceeding five thousand dollars (\$5,000), or by imprisonment in the state prison for 16 months or two or three years or in a county jail not exceeding one year, or by both the fine and imprisonment. The following expenses are within the due and lawful execution of the trust:

- (a) Securing signatures to initiative, referendum, or recall petitions.
- (b) Circulating initiative, referendum, or recall petitions.
- (c) Holding and conducting public meetings.
- (d) Printing and circulating prior to an election:
  - (1) Specimen ballots.
  - (2) Handbills.
  - (3) Cards.
  - (4) Other papers.
- (e) Advertising.
- (f) Postage.
- (g) Expressage.
- (h) Telegraphing.
- (i) Telephoning.
- (j) All salaries and expenses of:

© 2006 Thomson/West. No Claim to Orig. U.S. Govt. Works.

031428

West's Ann.Cal.Elec.Code § 18680

- (1) Campaign managers.
- (2) Lecturers.
- (3) Solicitors.
- (4) Agents.
- (5) All persons employed in transacting business at headquarters or branch offices, if the business transacted is related to promoting or defeating an initiative, referendum, or recall petition or any measure which has qualified for the ballot.
- (k) Maintaining headquarters and branch offices.
- (l) Renting of rooms for the transaction of the business of an association.
- (m) Attorney's fees and other costs in connection with litigation where the litigation arises directly out of any of the following:
  - (1) Activities related to promoting or defeating an initiative, referendum, or recall petition or any measure that has qualified for the ballot.
  - (2) The enactment, by the initiative process, of any ordinance, charter amendment, statute, or constitutional amendment.
  - (3) An election contest or recount.
  - (4) A violation of state or local campaign, disclosure, or election laws.

The amendment of this section by adding subdivision (m) thereto, made at the 1991-92 Regular Session of the Legislature, does not constitute a change in, but is declaratory of, the existing law.

Expenses for food, clothing, shelter and other personal needs of the trustee are not within the due and lawful execution of the trust. However, expenses for travel and necessary accommodations for the trustee are within the due and lawful execution of the trust, if the travel and accommodations are related to promoting or defeating an initiative, referendum, or recall petition or any measure that has qualified for the ballot.

▣ Article 15. Miscellaneous Offenses (Refs & Annos)

**→§ 21-2-562. Insertion and alteration of entries in documents; removal; refusal to deliver**

(a) Any person who willfully:

(1) Inserts or permits to be inserted any fictitious name, false figure, false statement, or other fraudulent entry on or in any registration card, electors list, voter's certificate, affidavit, tally paper, general or duplicate return sheet, statement, certificate, oath, voucher, account, ballot or ballot card, or other record or document authorized or required to be made, used, signed, returned, or preserved for any public purpose in connection with any primary or election;

(2) Alters materially or intentionally destroys any entry which has been lawfully made therein; or

(3) Takes or removes any book, affidavit, return, account, ballot or ballot card, or other document or record from the custody of any person having lawful charge thereof, in order to prevent the same from being used or inspected or copied as required or permitted by this chapter

shall be guilty of a felony.

(b) Any person who willfully neglects or refuses, within the time and in the manner required by this chapter, to deliver any such document described in subsection (a) of this Code section into the custody of the officers who are required by this chapter to use or keep the same shall be guilty of a misdemeanor.

**→ § 21-2-566. Interference with primaries and elections**

Any person who:

- (1) Willfully prevents or attempts to prevent any poll officer from holding any primary or election under this chapter;
- (2) Uses or threatens violence to any poll officer or interrupts or improperly interferes with the execution of his or her duty;
- (3) Willfully blocks or attempts to block the avenue to the door of any polling place;
- (4) Uses or threatens violence to any elector to prevent him or her from voting;
- (5) Willfully prepares or presents to any poll officer a fraudulent voter's certificate not signed by the elector whose certificate it purports to be;
- (6) Knowingly deposits fraudulent ballots in the ballot box;
- (7) Knowingly registers fraudulent votes upon any voting machine; or
- (8) Willfully tampers with any electors list, voter's certificate, numbered list of voters, ballot box, voting machine, direct recording electronic (DRE) equipment, or tabulating machine

shall be guilty of a felony.

Laws 1964, Ex. Sess., p. 26, § 1; Laws 1985, p. 206, § 1; Laws 1998, p. 295, § 1; Laws 2003, Act 209, § 61, eff. July 1, 2003.

Formerly Code 1933, § 34-1924.

**HISTORICAL AND STATUTORY NOTES**

The 2003 amendment by Act 209, in par. (8), substituted "direct recording electronic (DRE) equipment" for "vote recorder".

C.J.S. Elections § 332.

**NOTES OF DECISIONS**

**Admissibility of evidence 3**

**Jury instructions 4**

**Sufficiency of indictment 2**

**Validity 1**

**1. Validity**

Statute proscribing buying or selling of votes was not void on its face for vagueness and overbreadth. Code, § 34-1933; U.S.C.A.Const. Amends. 1, 14. King v. State, 1979, 244 Ga. 536, 261 S.E.2d 333. Elections ↪ 311

**2. Sufficiency of indictment**

Acts 1905, p. 111, making it a misdemeanor to buy or sell, or offer to buy or sell, or in any way be concerned with buying or selling, a vote in a primary election, does not confine the offense to the buying of a registered vote; and hence an indictment thereunder was not defective because failing to allege that the person whose vote was bought
