1 and attest that they are registered voters even begin  
2 to qualify. In Nevada a high tourism state down there  
3 in Las Vegas in the 2004 elections we had people from  
4 all over the country insisting they had a right to vote  
5 in Nevada. And we let them vote provisionally and we  
6 didn't count them.

7 MR. FOLEY: And we are by no means suggesting  
8 that provisional votes should be counted if in fact the  
9 provisional voter was not properly registered voter.  
10 And in fact one of the problems that occurred in the  
11 state of Washington was the erroneous inclusion of  
12 provisional voters, of some provisional ballots in the  
13 final certified total that should not have been  
14 included. They were included prior to the evaluation

15 process. So there are two possible errors. There is the  
16 exclusion of one that should have been validated. And  
17 the other kind of error is the inclusion of those that  
18 should not have been validated. In a well designed  
19 system we try to minimize both types of error.

20 MR. O'NEILL: Let me supplement that a little  
21 bit.

22 I think what is driving our recommendation is

□

129

1 anybody that comes in and affirms that he or she is  
2 registered and eligible to get a provisional ballot is  
3 driven by the pressures on the poll workers on election  
4 day. And we gladly not see those poll workers time  
5 taken up by sort of a quasi traditional process in  
6 deciding whether any particular voter really deserves a  
7 provisional ballot. Everybody should get it and sort  
8 out later when you have a matter of weeks rather than  
9 matter of hours. That is the burden of our argument.

10 MS. HODGKINS: The gentleman in the blue  
11 shirt?

12 MR. TERWILLIGER: Bob Terwilliger from the  
13 state of Washington.

14 I hear categorizations of states by the way  
15 the they verify (inaudible) the ballot. You talk about  
16 a voters affidavit and current ID as if they exclusive.  
17 In the state of Washington we actually use three. To

18 determine whether or not they get a mechanical ballot.  
19 The only thing we don't have is to return with your  
20 ID. If we have an affidavit on the envelope we check  
21 the signature. We also verify that he or she is an  
22 actual registered voter which to is three of the four

0

130

1 that you list there.

2 MR. O'NEILL: We will clarify that.

3 MR. MILLER: Paul Miller also from the state  
4 of Washington.

5 And I was interested in your comments about  
6 going back and checking against the actual original  
7 registration card for a couple of reasons.

8 One the practical administration implications  
9 of that. And two because you cited Washington state  
10 specifically in regards to that. And I think that there  
11 may be possibly some misunderstanding as to what came  
12 out of the 2004 gubernatorial election in that regards.

13 First of all as a practical matter what I  
14 understand you to say is we ought to be going back and  
15 checking all of our voter registration cards to make  
16 sure we didn't inadvertently miss one or more.  
17 Obviously in King County where they have 1.2 million  
18 registered voters, as an administrative matter that is  
19 an impossibility.

20 Two, what I am understanding you to refer to  
 21 actually is a little more complex; but, raises some  
 22 additional questions I think you might want to

□

131

1 investigate in your survey which is what can be  
 2 remedied in voters registration when either the  
 3 provisional affidavit is incomplete or when the  
 4 original voter registration form is incomplete. If the  
 5 person, for example, didn't sign the voter registration  
 6 form they can't be made inactive registered voter. Can  
 7 that be remedied with a provisional ballot and a  
 8 signature verification if the address was an invalid  
 9 address and couldn't be precincted can we give them a  
 10 provisional ballot? Those are some of the kinds of  
 11 issues that did come out and we were forced, in  
 12 Washington, to clarify those kinds of questions.

13 MR. FOLEY: Those are really important  
 14 questions. And absolutely that's where clarify is the  
 15 primary value. It's much more important to have an  
 16 answer to that question ahead of time that it matters  
 17 what the answer is. So if the issue is a missing  
 18 address we should ahead of time what the consequences  
 19 of that missing address is. It either counts or it  
 20 won't count. But at least you know the rule ahead of  
 21 time So I absolutely agree with that.

22 MR. O'NEILL: And I believe the court case  
 Page 120

029332

□

132

1 you are referring to is the Judge ordered King County  
2 to seek signatures for provisional when they hadn't  
3 signed the provisional ballot. That's my understanding  
4 of the decision in that case. My guess is that was the  
5 court case you were referring to.

6 MR. FOLEY: Well there were multiple cases as  
7 you know. And one piece of good news on this I do  
8 think the HAVA requirement of statewide centralized  
9 voter registration data bases will help because I think  
10 a well designed data base will always archive any  
11 retained historical records with respect to registered  
12 voter. In the event of a purge or in the event of some  
13 action on that registered voter you can go back and  
14 archive the history. And that will minimize to a  
15 considerable degree issues about the validity of the  
16 status should they arise in the context of a  
17 provisional ballot.

18 But there is still a question of the point of  
19 intake question. In other words until you get that  
20 registrant within the system, in the centralized data  
21 base there is a gap and we have seen it. It is not just  
22 in Washington. There are gaps in terms of forms

□

133

1 delivered to DMV that are not transferred timely to the  
2 Board of Elections, who bears the burden of that risk?  
3 Of course there is a different burden of risk if the  
4 form is delivered to one of the third party groups. And  
5 they make a mistake. I am not saying that all risks  
6 should be borne by the state. Some risk should be borne  
7 by the voters. Some risks maybe should be borne by the  
8 system. But the most important issue is to clarify  
9 ahead of time is who bears the risk of a missed form,  
10 and under what circumstances?

11 MS. HODGKINS: The gentleman in the back and  
12 then we will go to Mr. McCormack .

13 REGIS YOUNG: Regis Young from Pennsylvania.  
14 You made several points about educating the  
15 polls workers throughout your presentation. But nowhere  
16 did you mention educating the news media. I am  
17 following up on what Howard mentioned before especially  
18 in Pennsylvania in 2004 the news media kind of took  
19 over our election by advertising and saying it doesn't  
20 matter if you're registered or not just go vote. It  
21 doesn't matter where you live just go vote to your  
22 nearest polling place. And I was wondering did you

0

134

1 gather any statistics on your survey in Pennsylvania?  
2 we had a low percentage of counting the provisional  
3 ballots because of that. It was too late for us to get  
4 to the the news media to change.

5 I think it should be noted that on the  
6 national level the news media should be trained right  
7 down to the local newspapers.

8 MR. O'NEILL: They usually resist training .

9 MS. HODGKINS: Okay. Mr. Lindback and then  
10 Secretary Markowitz.

11 MR. LINDBACK: John Lindback, I am Director  
12 of Elections in Oregon.

13 You know we are one of those odd ball states  
14 where we do things very differently and it effects your  
15 study I am sure. One of those states that make you rip  
16 your hair out.

17 One of the things we found with  
18 implementation of state wide voter registration program  
19 is in a primary election last week is it appears that  
20 the number of provisional ballots went dramatically  
21 down because of our statewide voter registration  
22 system. It sort of strikes me that your research team

0

135

1 lists us as a moving target in regards to the dynamics  
2 of elections changing in this country. And I sympathize  
3 with. And I am wondering if you could go back for a  
4 second to your slide on your quality improvement  
5 program because I have a question about that.

6 MR. O'NEILL: Tell me when.

7 MR. LINDBACK: That one. As election officials  
8 we get told we ought to do a lot of things. And in fact  
9 I have gotten kind of used to it. Ever since 2000 we  
10 have to do this and we have to do that we have to do a  
11 lot of things that are very good ideas. Rarely do we  
12 get a suggestion are we told how to do it. And a cost  
13 effective in a efficient way. And I am looking  
14 specifically for example at time required to evaluate  
15 ballots by jurisdiction.

16 When we get into that level of detail and  
17 data collection I need to hire a full time person to  
18 collect that data at election time. I don't have the  
19 budget to do that or the resources to do it and that  
20 kind of thing.

21 I think we are appreciated as election  
22 officials when folks from the academic world do studies

□

1 and make recommendations. We don't only need  
2 recommendations on what we ought to do as to how we  
3 ought to do it and how we can do it in a cost effective

4 and efficient way. I think if you folks would look at  
5 that specifically with request to these four  
6 suggestions because to me they look expensive and  
7 overwhelming in some respects when we are trying to  
8 collect the data.

9           MR. FOLEY: I hope we were sensitive to that.  
10 we tried to be, maybe not sufficiently, but we wrestled  
11 with the notion of trying get specific. And there are  
12 downsides to getting too specific on some of these  
13 issues, particularly as to what date should this be  
14 done by. It also relates to a larger theme which I  
15 theme which I as an academic.

16           I think requires a dialogue between people  
17 who are implementing election law in practice as  
18 administrators and then people who are studying it. And  
19 a real genuine back and forth ongoing dynamic dialogue  
20 because what would it take to build an optimal  
21 provisional voting system is not an easy task just in  
22 terms of identifying the values. And there are trade

□

137

1 off values, there is a trade off between accuracy and  
2 finality not to mention not to mention budgets and  
3 expenses. And I think it is unfair to election  
4 officials that the media in particular and public  
5 rhetoric demands more than is achievable. It is sort of

6 an expectation that the system is going to be perfect  
7 that provisional voting is going to be that automatic  
8 fail safe.

9 I think one of the education functions that  
10 hopefully the EAC can play given its public profile is  
11 that there needs to be more sophisticated  
12 understanding that a well designed system can't promise  
13 too much. And it can work without the-- cars, you know  
14 well designed cars sometimes break down but we don't  
15 think the car was poorly designed because you have to  
16 take it to the shop every few years. And it may be that  
17 a well designed election system, you know, is still  
18 well designed it still functions appropriately given  
19 the budget and so forth even though it has glitches  
20 here and there.

21 I don't think the public is not quite at that  
22 point in the conversation, and hopefully our process

□

138

1 and the EAC can help with that understanding.

2 MR. O'NEILL: We agree with the thrust of  
3 your comments I believe somewhere in here we have a  
4 bullet point that calls for an assessment of cost  
5 effectiveness of the kinds of regulations you set up to  
6 improve and evaluate provisional ballots.

7 You will find also here a specific reference  
8 to the check list that has been using, Colorado to

9 record the reasons provisional ballots were not  
10 excepted with a simple three letter code and will allow  
11 you to go back at the end of the election and process  
12 and evaluate why persons are getting into the  
13 provisional ballot line and why they are failing to  
14 have their ballots evaluated and counted. It will give  
15 you a check on the functioning of many parts of the  
16 system.

17           And many of these pieces of information are  
18 collected for other purposes. You know how many  
19 provisional ballots are cast. You know how many are  
20 counted. But they are not necessarily compiled in a way  
21 that allows you to analyze the data at leisure once  
22 the election is over. So in general what we are calling

□

139

1 for is using the data for two purposes; to call the  
2 election and after it is all over to analyze why the  
3 system worked the way it did in that particular  
4 election. Your right it is a moving target and each  
5 year will be a little different.

6           MS. HODGKINS; Secretary Markowitz? And Adam  
7 if you wouldn't mind the gentleman on the front row  
8 will be next and secretary Ruggiero will have the last  
9 word.

10           MS. MARKOWITZ: Secretary of State, Deborah

11 Markowitz from Vermont.

12 I like to go back to the comments from  
13 Delaware. As you continue to study this issue you look  
14 at what the goal of provisional balloting is and then  
15 evaluate how it is working state by state. Vermont is  
16 your lowest participant in provisional voting and  
17 that's because our-- we actually do something better  
18 than that like Delaware where we have affidavit voting.  
19 So somebody comes in-- and we have a terrible problem  
20 with motor voter, and I don't know about the rest of  
21 the other states, but routinely there are thousands of  
22 people who never make it on the voter rolls because

□

140

1 those registration forms aren't filled out correctly  
2 and don't get to us or don't get to the right place and  
3 really, in most cases, through no fault of the voter.  
4 So for many years and we are called an old state with  
5 provisional balloting and we have resolved by allowing  
6 somebody to swear or affirm that they were registered  
7 and we simply add them to the check list on election  
8 day and allow them to vote.

9 In Vermont provisional voting is reflected in  
10 two things: One was town clerks or election officials  
11 who misunderstood provisional voting and used it  
12 instead of the activating list and we should have a  
13 lower number than that. Or there were people from

14 Connecticut who come to Vermont and think they have a  
15 right to vote in any polling place because they are  
16 Americans. So we should say that we have something  
17 better that allows them to have an actual ballot.

18 MR. FOLEY: Oh, absolutely. Like Tom said and  
19 I will definitely repeat. A large number of provisional  
20 ballots cast in a jurisdiction is by no means  
21 necessarily a good thing. And a large number of  
22 provisional ballots counted is not necessarily a good

0

141

1 thing because maybe those folks should have gotten an  
2 actual ballot in the first place, if it was determined  
3 that they were registered voters why weren't they  
4 voting a regular ballot.

5 Now, again, a fire extinguisher is good. It  
6 is good to have safety measures. It is good to have  
7 fire extinguisher if there is a fire that you have to  
8 put out. It would be nice to avoid the first in the  
9 first place. And some of the academic research that we  
10 drew upon was efforts to have improvements in  
11 registration systems that would avoid the need for  
12 provisional voting and put less stress on the on  
13 provisional voting precisely because provisional voting  
14 is after election day when the litigants want to gain  
15 the system. In other words in a post election

16 environment there is inevitably going to be extra  
17 stress if the election is close. So it would be much,  
18 much better if you could reduce the number of  
19 provisional ballots cast and have those be actual  
20 ballots if that is a feasible thing. So that's why we  
21 talk about the relationship between the provisional  
22 voting system as a subsystem, with the data bases

□

142

1 another subsystem. It is an important component and it  
2 is provided by HAVA and it is good to have fire  
3 extinguishes. But one needs and overall assessment of  
4 the totality of the states election system really to be  
5 able to evaluate its component that is provisional  
6 voting.

7 MR. BLEVINS: Don Blevins, Lexington,  
8 Kentucky. I have got a couple of things.

9 Number one you say that everybody should get  
10 a provisional ballot. And the application, if we decide  
11 to put it in place, is not a good thing. We only allow  
12 a provisional ballot for federal elections only. And  
13 given that there is no such thing really as a federal  
14 election. There is an election day in America where we  
15 elect officers of a all levels of government including  
16 six cities where half a dozen people get together and  
17 decide they want to have a little city. So for those of  
18 us who administer elections on the local level we have

19 to absorb the entire scheme of officers and issues that  
20 are on the ballot. So in our state the way we put it in  
21 place in a perfect situation we would never count a  
22 provisional ballot. We have it orchestrated so that

D

143

1 that truly is a last resort. On the other hand we want  
2 the voters to be able to vote in all election issues  
3 and races that they are eligible to vote in. And when  
4 they choose the provisional ballot route they have  
5 opted out of that. So that is not necessarily the best  
6 route to go.

7           We have a statewide data base. We have had it  
8 for a long time. We have a leg up on the states that  
9 don't have that. And we have a telecommunications  
10 system that allows us check the registration. The size  
11 of the population of the state plays a roll we have  
12 four million people, two million registered voters.  
13 They top that in Los Angeles county in California. So I  
14 can tell you from my administration we would have to  
15 look at this in a different context by virtue of sheer  
16 volume.

17           The second thing I want to point out to you  
18 is that I think the biggest over simplification that  
19 was in HAVA was this idea that we are not training poll  
20 workers well enough. Or we are not training the public

21 well enough. I don't think the federal government has  
22 got enough money to train the electorate out there on

□

144

1 how to do this voting. So the burden of the election on  
2 the county. When people talk about.

3           Educating poll workers I hear what I think  
4 must be a two, three or four day training session. And  
5 you're lucky if you get them in for 30, 40 minutes.  
6 They have the attention span of a kindergartner. So  
7 this is over glorified and under appreciated that these  
8 poll workers are volunteers and get paid poorly. And  
9 until there is some heat built up on the state to put  
10 up more money poll workers were are we going to get  
11 that?

12           Another thing that HAVA wants is we are  
13 supposed to teach them a sensitivity about disabled. We  
14 are supposed to teach them about provisional ballots.  
15 We have to teach them about state law and all this. You  
16 know, I don't know about anybody else but we get a them  
17 for two hours we have performed a miracle. So this idea  
18 of training being the answer to everything I think you  
19 are going to find between academics and practice there  
20 is a big over simplification difference.

21           MR. FOLEY: I think we are very much in the  
22 arena because it is because of that complexity and

0

145

1 difficulty that out point about the practical rule of  
2 thumb is to give them a provisional ballot. And I  
3 stress that is when the poll workers are in a position  
4 to say I am in a position were I can not give this  
5 voter standing in front of me, or a would be voter, a  
6 regular ballot. Something has caused me to make the  
7 determination that they can't vote a regular ballot.  
8 They are not on my list; they don't have the right ID  
9 whatever. If at that point the voter says I don't want  
10 to go home empty handed I would like to vote a  
11 provisional ballot because I believe I am eligible it  
12 is at that point that our recommendation is don't take  
13 time to worry about that. You have too much on your  
14 mind poll worker. At that point you know you're not  
15 going to let them in the regular booth or regular  
16 ballot give them a provisional ballot. So it is not  
17 giving them a provisional ballot instead of letting  
18 them vote regularly. That is not an issue.

19 MR. O'NEILL: I did not follow one part of  
20 your comment, maybe you can straighten it out for me.  
21 You said you don't like the issue of the provisional  
22 ballot in Kentucky. And if you do the person who get it

1 doesn't get to vote in a local election. That's the  
2 part I didn't understand.

3 MR. BLEVINS: We chose to make the  
4 provisional ballot only for federal elections. We went  
5 with HAVA in that regard that it only applied to  
6 federal elections.

7 MR. O'NEILL: I understand. Thank you.

8 MR. BLEVINS: And we did that for several  
9 reasons that may not make a lot sense here. Voter  
10 fraud, and vote ban and those sort of things.

11 MR. O'NEILL: You're talking to someone from  
12 New Jersey.

13 MS. HODGKINS: Thank you Mr. Blevins.  
14 Secretary Rokita.

15 MR. ROKITA; I have a couple comments and a  
16 couple of questions if you can bear with me.

17 First of all for the record I also agree that  
18 there is much more relationship between this subject  
19 and ERA than to your research currently. And I would  
20 suggest doing a little more research in that regard.  
21 For example when EAC requires that full service  
22 agencies to continue to accept voter registrations it's

1 a great thing. But you're also at the same time right  
2 after the election and if you would the election coming  
3 up after registering it might be driving more people to  
4 the polling place like NVRA requires only to have them  
5 cast a provisional ballot because the registrant won't  
6 let us pass. So issues like that I think might be  
7 right for some of your discussions.

8           what data point did you specifically come up  
9 to conclude that if someone is in the right polling  
10 site, all be it not the right precinct, that their  
11 ballot should count?

12           MR. FOLEY: It was a core decision, correct.

13           MR. ROKITA: I understand. Just for example a  
14 photo ID, I will use that as an example, are you saying  
15 that there is a causal effect between the time allowed  
16 to count a provisional ballot and the rate-- are you  
17 saying there is a causal effect and the rate of  
18 counting that provisional ballot and voter ID are you  
19 saying it causal?

20           MR. FOLEY: No. We found correlation if you  
21 will, I don't have the time but I could go into this  
22 more. But I don't think we are making a finding on

□

1 causation.

2 MR. ROKITA: Well, if it is not causal I  
3 guess my point would be, so you can respond, what value  
4 is it to be in this report?

5 MR. O'NEILL: The existence of the correlation  
6 between having less time to evaluate ballots and with  
7 fewer ballots being excepted it is an indication to us  
8 that something is going on. We don't know exactly  
9 whether it is causative or merely highly correlated.  
10 But whatever it is it makes it worth while looking at  
11 the time period allowed to evaluate ballots and try to  
12 figure out if it is causing it. And you can do that  
13 for instance by finding out are there a bunch of  
14 ballots that you never got to at the end of the  
15 process, the process was only three days long. It is  
16 worthy of further investigation.

17 My own suspicion is that the arrow of  
18 causality does flow that way but it is only a  
19 suspicion.

20 MR. FOLEY: And there would be reasons to  
21 look at the timing issue even if that data didn't  
22 exist. I mean it maybe anecdotal but I mean I keep

1 referring to Washington but half of the Washington  
2 governor's race the process for evaluating the ballots  
3 shut down on the same date in 2004 as a matter of state  
4 law that the federal Supreme Court in Bush vs. Gore

5 shut down the counting process in 2000, the current  
6 governor would be a different incumbent. So the fact  
7 that the the process took longer than the five weeks  
8 that federal law allows for Presidential elections  
9 shows that timing can be outcome determinative.

10           And I simply wanted to share that knowledge  
11 with all of you as you determine for your own races  
12 what is the appropriate time table to utilize before  
13 bringing the process to conclusion.

14           MR. O'NEILL: And my recommendation for the  
15 EAC is that they be very careful with this research  
16 where things are not causal or currently suspicions that  
17 we say that.

18           I think at the outset with some of these  
19 subjects, and I am usually the first on up to bat, but  
20 some of the other subjects that we are going to deal  
21 with maybe the same way, maybe not. But these issues  
22 these themes are not conducive to very easy data

□

150

1 gathering. I must have said that ten times here. And  
2 maybe it has to stop right there or slow down right  
3 there. Maybe there is value in just saying that, rather  
4 than try to fit a square peg in a round hole where  
5 these potential conclusions or these correlations that  
6 you're saying could be taken by the public as

7 conclusion or causality when there really is none.

8 MS. HODGKINS: Thank you. Mr. Martinez, we  
9 do apologize for running this session over time but--

10 MR. MARTINEZ: That was great. We were looking  
11 for the kind of discussion we had today. It's very  
12 valuable to us. We are on the record and we can come  
13 back and really consider the comments. We really do  
14 appreciate them all and are looking for this kind of  
15 discussion.

16 I am speaking for myself and not the EAC in  
17 saying this I think there is strong sentiment at the  
18 EAC, at least from my perspective, to evaluate in very  
19 sound and deliberative manner, Mr. Secretary, the kinds  
20 of reports of reports that were presented to you.

21 Keep in mind these reports are from our  
22 consultants to the EAC and we are sharing them with

□

151

1 you. These were not EAC reports that we have adopted  
2 and are presenting to you for final analysis.

3 There is a complete difference in those areas  
4 and that's why we took these extremely important steps  
5 to show you what the consultants have brought to us and  
6 sharing it with you at this stage in the development so  
7 we can then honor that importance to deliberate and  
8 contemplate very thoroughly before we embrace whether  
9 it is voluntary guidance or best practices. So we are

10 very much in that period. I encourage it for the rest  
11 of the discussions we are going to discuss.

12 All right. We are going to take a quick  
13 break our next topic will be Research on Poll worker  
14 Recruitment.

15 Madam Chair, it is 4:20 and I am calling for  
16 a 15 minutes break or so. Reassemble in 15 minutes,  
17 please.

18 (Recess taken at 4:20 p.m., and reconvened at  
19 4:40).

20 MR. MARTINEZ: We are starting again. We have  
21 one more session left. I know it has been a long  
22 afternoon full of a lot of information. We have one

□

152

1 session left for today and tomorrow we will hit you  
2 again with a long session.

3 what we are going to do today is give you a  
4 presentation regarding another one of our contracted  
5 research projects and that is pertaining to poll worker  
6 recruitment, training and retention for poll workers  
7 who are generally used at the polls but targeted  
8 specifically as well to college poll workers, to the  
9 population of college poll workers.

10 we have a couple of consultants that we have  
11 hired that have done some tremendous work and want to

12 share the results of that work.

13           what I am going to do is ask Karen Lynn Dyson  
14 who we all heard before. She is our project research  
15 manager at the EAC and has been with us for quite some  
16 time now to stand up and give us a quick introduction  
17 of our project consultants and anything else she might  
18 want to say.

19           However I forgot I am supposed to recognize  
20 your chair, Peggy Nighswonger who wants to give you a  
21 quick piece of information, Madam Chair .

22           MS. NIGHSWONGER: Okay. I am just going to

□

153

1 tell you that 66 ballots were counted successfully. So  
2 please welcome Tonni as our new Executive Director.

3           We are leaving right after this session.

4           MR. MARTINEZ: Congratulations. Karen  
5 Lynn-Dyson will make the introductions and we will get  
6 to the last presentation of the afternoon.

7           MS. LYNN-DYSON: Commissioner Martinez just  
8 mentioned that I have been with the EAC for some time  
9 and I could swear either he said or Chairman Boyer  
10 said I have been here for years. He said a lifetime.

11           I am pleased to introduce two of our  
12 contractors Abby Horn who is to my immediate right. And  
13 Abbey is the Assistant Director for the Center for  
14 Election Integrity at Cleveland State University. Abby

15 leads the Center as Acting Assistant Director and she  
16 came to the Center as a democracy for the United States  
17 for International Development and did a lot of work  
18 all over the world, primarily in Central America related  
19 to democracy and citizenship.

20           The Center for Election Integrity at  
21 Cleveland State University is a partnership of the  
22 Cleveland Marshall of Law and the Massey, Goodman,

154

1 Levine College of Urban Affairs. She draws upon the  
2 long standing expertise from those colleges in  
3 electoral and regulatory law, public education and  
4 civic education the Center for Election Integrity  
5 provides research, training consultation to assist  
6 Ohio in becoming a national leader in transparent,  
7 legal, efficient and accurate elections. It is three  
8 organizations dedicated to three interconnected  
9 missions: To assist Ohio in becoming the national  
10 leader in elections; to help assure the citizens trust  
11 that their elections are fair, lawful and accurate and  
12 to undertake scholarly studies and offer  
13 recommendations on election administration and legal  
14 reform at the state, local and international level.

15           Again Abby is overseeing the Cleveland  
16 State's efforts related to college poll worker

17 recruitment and training and retention.  
18 Jennifer Collins-Foley to Abby's right is an  
19 attorney who has provided democracy development around  
20 the world since 1989 working with election  
21 administrators, civic organizations and politic  
22 parties in the former Soviet Union, Central Asia and

0

155

1 the Middle East.  
2 Jennifer has served in the Elections  
3 Administration Community since 1996, spending seven  
4 years as Assistant Registrar of Voters of LA County.  
5 She now serves as an Election Administration  
6 Consultant. And has worked in recent years with us and  
7 on this project with IFES. And IFES for those of you  
8 who don't know was established in 1987 as a non  
9 governmental, non partisan, non profit organization.  
10 IFES has provided assistance to current elections, the  
11 rule of law, civil society and good government in more  
12 than a hundred countries including the US.  
13 IFES is headquartered in Washington with  
14 offices in nearly 30 countries and it specializes in  
15 technical assessments, poll worker training programs  
16 technical observations, election commission management  
17 reviews and election equipment and commodities  
18 procurement systems.  
19 IFES is the contractor for the Elections

20 Assistance Commission is doing work on the general  
21 poll worker recruitment and training and retention  
22 project. So with that I am going to turn it over to

□

156

1 Jennifer who is going to make her presentation that  
2 will last for about 15 minutes. And then Abby will go  
3 for about 15 minutes. And then I will open it up for  
4 questions. Thank you

5

6 RESEARCH ON POLL WORKER RECRUITMENT AND  
7 RETENTION (INCLUDING COLLEGE POLL WORKERS)

8

9 Presenters: Jennifer Collins-Foley, IFES.

10 Abby Horn, Cleveland State University

11 Karen Lynn-Dyson, EAC.

12 MS. COLLINS-FOLEY: First off I want to say  
13 it is an honor it is to work on this project because I  
14 am a self proclaimed poll geek. And to be part of a  
15 team that gets to look at these issues for 15 months  
16 and actually get paid for it. And talk to hundreds of  
17 election places across the country it's really neat.  
18 And I have been having a lot of fun with it.

19 went over a little bit of where the project  
20 came from, of course it stems from a Help America Vote  
21 Act that is such an important program and is the heart

22 of successful elections.

□

157

1           We were awarded this project in September  
2 2005 and it goes until the end of this year 2006, a  
3 fifteen month applied research project.

4           We are working under IFES, International  
5 Foundation Election Systems, and it has been terrific  
6 working with them. It is a fantastic international  
7 program offering technical systems to jurisdictions in  
8 the US, and visa versa offering models from the US to  
9 international partners.

10           I am President of an organization called the  
11 Poll Worker Institute which is a relatively new non  
12 profit focusing on poll worker issues in the US, and we  
13 have a Board that is quite active. Conny McCormack is  
14 on the Board; Beverly Kauffman from Harris County  
15 Texas and Lynn Shadman from Washington D.C. And we  
16 are also very fortunate to have the League of Women  
17 voters working on this project as well. I don't have to  
18 introduce the League I guess.

19           What we have been working on these past 13  
20 months is we have been partners with Cleveland State  
21 University to compile 50 state laws as they apply to  
22 poll workers to compile field tested practices in poll

1 worker recruiting, training and retention. We pulled  
2 together a working group to give us guidance over the  
3 course of this program.

4           We conducted some focus groups with the  
5 League of Women Voters project earlier this year. We  
6 are developing a how to practical guide book which we  
7 will talk about in a few minutes. And I hope you have  
8 the job table of contents that was supposed to have  
9 been distributed to you earlier today. We will be  
10 conducting some pilot projects to test the guidebook.

11           I won't go too much into the compilation of  
12 state laws because Abby is going to talk about that  
13 more in a bit.

14           The three things we found really impacted the  
15 ability to have innovative poll worker programs were  
16 age requirement, obviously if you want to bring high  
17 school or college students in that can sometimes can be  
18 an impediment. Residency requirement become an issue if  
19 the poll worker can only serve in that precinct. They  
20 can start more innovative programs like corporate or  
21 college. And being required to be nominated by your  
22 political party can also achieve programs that are a

□

159

1 little more out of the box.

2           We were very fortunate to partner with the  
3 National Association of Counties. They were going to do  
4 an intensive survey of counties on poll worker  
5 practices. So we worked with them to have their survey  
6 be as helpful to us as it could be in terms of  
7 collecting practices. We also went to some fabulous  
8 programs or collection of practices that had been put  
9 together by NEMS, by NASED, by IACREAT, the Election  
10 Center and the EAC. So we began pulling together  
11 practices that we thought were bordering on  
12 successful. Some of them were not so successful,  
13 bordering on best practices but certainly in the  
14 successful realm. Early on we started pulling together  
15 our guidebook and then of course together with NECO  
16 Survey we were thrilled that we got three hundred  
17 responses out of three thousand counties,.

18           Before I was in this project I used to think  
19 a ten percent response rate that is terrible. But that  
20 is really good when you are doing research. And our  
21 research people was thrilled with that. And of course  
22 it has given us fabulous stuff to work from. So we are

□

160

1 going to be putting out some results soon. And it is  
2 going to be great on who is doing what kinds of  
3 practices; who doing what kind recruiting. We also  
4 pulled together a great working group to guide us  
5 through the projects. I should have mentioned earlier  
6 IFES and the poll workers we pulled together were a  
7 terrific group for consultants to work on this project.  
8 All retired or current election officials who really  
9 had some field tested practices to share.

10           And on our working group we had State  
11 Election Directors, two local election directors from  
12 large and small jurisdictions from from large and small  
13 jurisdictions, Academic advisor a research advisor, an  
14 adult learning advisor and a training expert form the  
15 private sector. So we really were able to pull together  
16 some good folks to help us look at whether these  
17 programs we were compiling really are successful. We  
18 also were fortunate to have advocates from the multi  
19 lingual and Voters with Disabilities community.

20           We have tried to call in as many (inaudible)  
21 as we can in addition to the NECO survey we are really  
22 trying to find out what is going on out there and

□

161

1 pulling in some practices, and our working group  
2 pulling some information from them. We also pulled

3 together a round table with volunteers. Not all of us  
4 consider poll workers volunteers, in some places they  
5 do.

6           They gave us some pretty good thoughts on  
7 when you are working with volunteers apparently there  
8 is a growing trend in what we call episodic volunteers  
9 which means you get all your volunteering done in one  
10 big chunk. So really you would think that poll workers  
11 would follow that trend.

12           All you need to do is ask. And they said if  
13 you don't mind us telling you, your election officials  
14 don't ask the right questions if you're really going  
15 coworkers as volunteers. Uncle Sam needs you they tell  
16 us is a bomb. They advised us to think more about your  
17 community needs you on election day to serve in this  
18 place and this is what you are going to be doing. They  
19 said the more specific the request the better. So  
20 you're going to hear feedback from people who, like the  
21 the Points of Light Foundation, people who are really  
22 in the field of volunteerism.

□

162

1           we talked to and interviewed training  
2 experts. A lot of you know Ray Hawkins and Robert  
3 Lovejoy (sic) absolute opinion leaders in the field.  
4 They gave us some terrific feed back. We had voters  
5 with Disability round table talk about some practices

6 on recruiting poll workers with disabilities. And also  
7 some pieces that are going to go in our guidebook that  
8 are really good for sensitivity training. Getting your  
9 poll workers to go out there and, you know, really make  
10 polls set up the best way to accommodate these folks.

11           The League of Women Voters in an amazing two  
12 or three month period did 19 focus groups in 17  
13 jurisdictions. Obviously they were trying to compile  
14 strategies and also to underscore some potential pit  
15 falls. They came back with some shocking survey  
16 analysis which is that election officials do work on  
17 shoe string budgets. I was amazed to know that. They  
18 also said that election officials had limited staff,  
19 and also that the election environment system  
20 historically had little need for change. Those of you  
21 or started transitioning from punch card voting back in  
22 the 60's will welcome the change. I am not supposed to

□

163

1 side with the focus group results.

2           Now some current reasons for change include a  
3 course of Help America Vote Act, bringing in new  
4 technology that will have big impacts on poll workers.  
5 The increase of public scrutiny of election  
6 administrators obviously we all under the microscope  
7 now. And that means our poll workers are under the

8 microscope. Razor thin margins of electoral victories  
9 in recent elections. Obviously the candidates know who  
10 their voters are, and if they loose it must be our  
11 fault, or the poll workers fault. And finally the  
12 anticipated demographic changes that have served as  
13 agents for change. And this is everything from  
14 increasing needs to have more bilingual poll workers  
15 that kind of thing. So lots of change going on there.

16           The most common recruiting practices include  
17 word of mouth, personal networks, referrals, more  
18 people are paying more money. Lead poll workers in some  
19 places are selecting their own team. And some other  
20 very common recruiting practices, flyers, posters,  
21 adds. Check boxes on voter registration forms. This is  
22 traditionally you put something out there as an

D

164

1 election official and the voter, the potential poll  
2 worker contacts you.

3           Some of the more innovative recruiting  
4 methods are were you find the partner and the partner  
5 gets you your poll workers and gets you-- instead of  
6 one poll worker they get you multiple poll workers.  
7 These program include what we call county poll worker  
8 programs, also called governmental private sector, also  
9 called corporate poll worker programs, high school  
10 college student programs, civic organization programs

11 and bilingual poll worker programs.

12           One thing that came out of the focus groups  
13 is that it is generally more difficult to recruit poll  
14 workers from lower income areas and very wealthy areas.  
15 And for those of you who have read or will read our  
16 guidebook you will see that the chapter that says:"Tips  
17 for Recruiting Poll Workers in Low Income Areas" is  
18 blank. And that's because we actually haven't found  
19 very many good tips. We have spoken to literally dozens  
20 of election officials in low income areas, that have to  
21 recruit for low income areas including me in Los  
22 Angeles, and we are drawing a blank. There really are

□

165

1 not too many successful tips. We are getting there. We  
2 are talking to churches. If anybody has any ideas I am  
3 listening so please do let me know. Another thing that  
4 the focus group found is it is especially difficult to  
5 get technological savvy poll workers in economically  
6 disadvantaged areas.

7           When we put this in our guidebook we are  
8 going to say: "well, you have two choices you can kill  
9 yourself trying to find tech savvy people in those  
10 precincts or you shut them down" . So our guidebook we  
11 are really trying to be very practical.

12           Strategies that met with mixed results

13 included recruiting a partnership of political parties.  
14 Obviously there are practices out there of how many  
15 have this in their state law that you have to work with  
16 political parties. And the reality is that election  
17 officials have told us that this is mostly a bomb. Very  
18 few election officials have said: " Oh this is a  
19 fabulous recruiting technique." Most people have said  
20 this is the biggest pain in the neck ever. The people  
21 we get we can't place them, they are dead by the time--  
22 I mean no disrespect. I mean very mixed results on this

□

166

1 particular type of recruiting. Offering split shifts  
2 is another thing we found. First thing a voter on the  
3 street, a potential poll worker will say: "well if I  
4 was offered split shifts I would be glad to do it."  
5 Then they find out that you-- that they have to find  
6 their partner because Hello we are not going to find  
7 their partner for them on the split shift and they  
8 quit. Or they say: "Do I have to share my stipend?  
9 There is no way I am doing that." So you know the  
10 perception is okay if we just this practice everything  
11 will be great. The reality is a little different. And  
12 our guidebook goes into some of these nuances.

13                   And one things that has become a kind of  
14 undertone of our whole project is that there is, you  
15 know, strategies that give you the balmies (sic). Like

16 you know we always talk laughingly about the breathing  
17 test. If they are breathing we will hire them. And  
18 those strategies really go by the wayside in the time  
19 when we are using new technologies and we are under the  
20 microscope and there are all these tight elections. We  
21 really need to be working on strategies that provide  
22 the best poll poll workers not just enough poll

□

167

1 workers.

2           Some successful messages that the League came  
3 back with from their focus groups are based on the  
4 person you ask you need to ask is it a family; is it a  
5 neighbor is it somebody calling person to person asking  
6 some kind of connection. The more specific you can be  
7 the better. And stress the benefit to the community.

8           Key findings on poll worker training. We  
9 found that in the focus groups and also in the NECO  
10 (sic) survey and also in talking to literally hundreds  
11 of election workers across the country there is a trend  
12 from moving away from talking head training more to  
13 hands on roll playing, setting up a full poll worker  
14 station, a full mock polling place and the training and  
15 allowing as much hands on as possible. And one  
16 interesting thing that we found in both the survey and  
17 the focus groups is that paying poll workers to attend

18 training dramatically increases the people who turn out  
19 for your training programs.

20 I am going to read this because I think it is  
21 important: " The most important theme is--" You're  
22 supposed to read from your power point." That is one

□

168

1 of the things that we learned when we were just  
2 developing our conflict chapter in the manual. You're  
3 not supposed to read from your manual but it is a good  
4 quote you are allowed to. "The most important thing to  
5 arise from the discussions of all the state holders is  
6 there is no magic bullet. There is not a one size fits  
7 all solutions for every jurisdiction or for reaching  
8 out to every population. Election officials must  
9 experiment to find the right balance for their  
10 jurisdictions needs." I am sure that does not surprise  
11 any of you. We all know everybody has had different  
12 site jurisdictions, different demographics, different  
13 support from your bosses, different size staffs. And so  
14 because this is a kind of a theme of our project.

15 Our guidebook has become what we call a  
16 recipe book. Let me share with you this is what I call  
17 my Betty Crocker Cookbook. And in our guidebook we  
18 actually do have practices that are the very basic,  
19 boiling an egg. And you know the hamburger version of  
20 recipe books. And in our guidebook we have some very

21 basic practices such as word of mouth, or putting up a  
22 poster at the polling place. And this is the diet

D

169

1 cookbook it's an Oprah cookbook. This is an analogy  
2 for the smaller jurisdictions that needed a different  
3 kind of recipe because they are trying to stretch their  
4 calories further sort of speak. Then you have the  
5 connoisseurs cookbook. So there are pieces of the  
6 guidebook that are a little bit more for a jurisdiction  
7 that is really trying to be cutting edge and wants to  
8 do all sorts of fancy new things, new ways of  
9 recruiting, new ways of training, fancy power points.  
10 All of, you know, more hands on training. They have  
11 more money to pay for more in-depth training for some  
12 of their poll workers, some of their trouble shooters  
13 type of thing. And then we also have-- I have my  
14 little New York cookbook. This is to show that we were  
15 really ambitious in trying to get models from as many  
16 jurisdictions of different sizes and different  
17 resources as possible around the country. I promise you  
18 this is the end of my little cookbook schmeel.

19           So if you look at our table of contents you  
20 will see that we hope to have covered the whole realm  
21 of practices that are out there. We have called our  
22 book successful practices. We didn't say they were best

□

170

1 practices and what we tried to do as we talked to  
2 practitioners across the country, as we were gathering  
3 their thoughts on their programs and their practices  
4 and their tools we asked them Okay that's great but is  
5 this sustainable? Is this something you can keep doing  
6 for years to come? Or is this a one time things where  
7 you had a bunch of money and you have a fabulous  
8 employee who can champion it? Is it measurable? Is it  
9 something you can say okay this actually did have an  
10 impact of getting better poll workers or having people  
11 retain the training pieces better. And we also asked  
12 them is it replicable ? Is it something that could only  
13 happen in your county? Or is it something that really  
14 can be shared with other counties, and they won't have  
15 to reinvent the wheel? Then what we did is when we  
16 found out, we got the responses, their nuance responses  
17 about their practices, and so in our book we also  
18 talk-- for each practice we have, we discuss the  
19 benefits of the practice, the pitfalls and challenges  
20 because we don't want other people to reinvent the  
21 wheel. Some tips for in making it happen in your  
22 jurisdiction. And we are also providing a methodology

□

171

1 of whether it can work long term for you.

2           That's what the guidebook is. what the  
3 guidebook is not is it is not magic bullet. Obviously  
4 you're not going to read this guidebook and say: "okay,  
5 if I do all this good stuff I am going to have no  
6 problems getting fabulous poll workers. We are going to  
7 do the training and be brilliant on election day. what  
8 we hope is that you will pick and choose and really  
9 come out with some good stuff to chew on.

10           It is not a poll worker management program.  
11 we really had to step back from doing some of the  
12 management pieces because that's going to be in the EAC  
13 Management Guidelines for one thing. It wasn't part of  
14 our contract. Although we did cheat a little bit, we  
15 couldn't help ourselves we put in a chapter on Poll  
16 trouble shooters because although we are not  
17 technically poll workers we all know that they can be a  
18 fantastic saving grace on election day.

19           what we really hope is that this is not a  
20 static document. we are really hoping that all of you  
21 will think about ways that once this guidebook hits the  
22 streets, maybe at the end of this year, early next

□

172

1 year, that it will be, you know, disseminated as much  
2 as possible. Think about maybe having it discussed at  
3 lunches and conferences, on IACREAT conferences. Think  
4 about maybe at your state associations summer meetings.  
5 We are hoping that some of our workers can be on a  
6 speaker circuit to get out there and introduce them to  
7 folks that can't come to meetings like this. And if you  
8 can think about that we would ask you to do that in  
9 your feedback form.

10           we also have not yet, if any of you got the  
11 electronic copy of this, we haven't yet put in some of  
12 the models we have gotten because people are still  
13 getting us electronic models. We really would like to  
14 have as many models as possible. So if you can send us  
15 things electronically we really appreciate it. We  
16 haven't it in the book yet because then it becomes  
17 difficult to share it. And it would have blown out your  
18 systems, you know, if we sent it to you that way. But  
19 we are looking for more models. And we are going to be  
20 testing-- I am going to wrap this up because Karen just  
21 stood up. That is my sign to wrap this up.

22           We are going to be testing this guidebook in

□

173

1 three pilot jurisdictions this summer. We are going to  
Page 158

029370

2 be going to be going to Hamilton County, Ohio, to Santa  
3 Fe New Mexico and to Milwaukee. Wisconsin. So we will  
4 be seeing if this guidebook really works. As as we go  
5 through changing or updating the guidebook to fit the  
6 realities of the jurisdictions that we are working with  
7 we definitely will be very happy to have more ideas  
8 more models from you all. So please look at that  
9 feedback form and provide us with, you know, some good  
10 stuff to put in here.

11 MS. HORN: I am Abergail Horn with the Center  
12 for Election Integrity from Cleveland State University.  
13 Thank you very much for having me today. It has been a  
14 real pleasure working with the EAC and an honor getting  
15 to speak to you all of you today.

16 I came to this not as a poll worker junkie or  
17 geek, I believe Jennifer said. But I have to admit that  
18 since working on this since October I guess I have to  
19 describe myself as a poll worker geek as well. But it  
20 is a proud term and we had a lot of fun with it.

21 Again, the Center for Election Integrity  
22 pulls expertise from the law school as well as the

□

174

1 Urban Affairs College that has a focus on public  
2 administration so we really have a nice (inaudible)  
3 going. College students are in the learning mold. They

4 are tech savvy. They tend to be young and more  
5 energetic. They are generally physically fit and can  
6 set up heavy equipment, carry things around. They tend  
7 to have more flexible schedules and this is my  
8 favorite, but no proven over time, but this is a  
9 hypothesis that if you hook them now you have them for  
10 the future. Not necessarily as a poll worker. But if  
11 you get them engaged now in a real way within the  
12 democratic process , within the electoral process they  
13 will see the value of it and they will become  
14 physically engaged individuals throughout their  
15 lifetime. So that is part of it and that's why I became  
16 part of the program. But it is not a panacea, it is not  
17 a solution for every jurisdiction for the entire  
18 nations shortage of poll workers. There are a bunch of  
19 hurdles and I am going to go into them in more detail  
20 both legal hurdles as well as structural and  
21 circumstantial.

22           The three main ones are students are often

□

175

1 not registered to vote in the same state or in the  
2 county or sometimes were necessary in the precinct  
3 where they are living and where the college is. And  
4 that can be a problem. They generally do not want to  
5 work, nor do they want to commit to work for more than  
6 one election. " I know what my schedule is this

7 semester and I am not signing up for anything that says  
8 I have to work more than this one". And indeed  
9 although they are flexible classes and assignments can  
10 get in the way and they can get in the way at the last  
11 minute about working on a full day schedule. That is  
12 why we put an emphasis in our guidebook in trying to  
13 get a University wide policy of excused absences for  
14 anyone who is going to be working as a poll worker. And  
15 that is something to work on as they get going.

16 Our project is set up in the same way that  
17 Jennifer's is in terms of having a project working  
18 group and having focus groups. We have a seven person  
19 team; three elections officials, three professors and  
20 indeed college students who are all providing us really  
21 wonderful feedback on the work as we move along.

22 We set out to collect what began from initial

0

176

1 work to be best practices but we quickly included that  
2 to become effective strategies. We were really lucky.  
3 We had a wonderful pool of things to start looking at  
4 which was in 2004 the EAC provided grants to 15  
5 different colleges and non profits to run college poll  
6 worker programs. So we looked at those really  
7 carefully, talked to most of them and got a really good  
8 sense of what worked for them and what didn't. We went

9 on and looked at lots of different surveys and other  
10 materials. In fact Jennifer was a wonderful resource  
11 for us and fed us whenever she heard about college poll  
12 worker programs in different shapes and forms. And we  
13 have been following up in collecting lots of different  
14 examples. And please if you have any send them my way.  
15 My email will be at the end of this presentation. You  
16 may have it in your packet already, I'm not sure it  
17 already.

18                   But, surprisingly, there are very few  
19 structured programs. And a lot of people look to  
20 colleges and Universities in getting students to be  
21 poll workers but they don't have ongoing relationship  
22 with a particular college or university with a

□

177

1 structured program in place. Not a lot of overtime  
2 programs. And that's what we really focused on in our  
3 guidebook which is to develop a long term relationship  
4 between the election jurisdiction and the college or  
5 university.

6                   we had four things for the focus groups and  
7 most of them we did. One with students who had worked  
8 as poll workers and one who did not. Overall their  
9 findings reiterated what we had already found through  
10 our research so that was great. We mainly talked to the  
11 students about incentives for being a poll worker and

12 hurdles. And we pulled that all together.

13           The next part of the project was pulling  
14 together the state statutes requirements. We looked at  
15 the statutory law in all 50 states territories etcetera  
16 related case law, anything pertaining to college poll  
17 workers popped us as well as where applicable in some  
18 states that we had to also look at the administrative  
19 code and the state constitution and of course at times  
20 they were in conflict with each other. But that is just  
21 to be expected.

22           we then really-- it took a long time to

0

178

1 confirm all the data that we had. And send out to all  
2 of the states their particular information trying to  
3 get confirmation. We're just about there. And if you  
4 happen to notice any errors in there let us know. We  
5 are in an ongoing cleaning up process of the data.

6           And then there is always this issue of the  
7 fact that sometimes practice at the local level is not  
8 quite equal with what the policies say. And that is  
9 true in many, many cases. And sometimes, quite frankly,  
10 that is a good thing because the policies were pretty  
11 new and if practiced exactly as they are written often  
12 times it would be really hard to get college students  
13 to work. And I will go into those later.

14                   The state statues. We collected all the  
15 information and several more but I thought these were  
16 the more interesting ones so I stuck them up there.  
17 Each state, we have a three or four page information  
18 sheet and that all will be available on the EAC website  
19 when this project is all done. You can click on the  
20 page and see carious requirements for poll workers. We  
21 have synthesized that into a chart that is in our  
22 guidebook, and I believe you have a copy of the

□

179

1 guidebook.

2                   This leads me to the actual guidebook which  
3 some of you may have. I have a few color versions with  
4 me so if you're really excited about college poll  
5 workers and want to see the color version let me know  
6 and I will give you one of those.

7                   One issue that we struggled with in writing  
8 is that we are writing for two different audiences. And  
9 i would love feedback from any of you on that in that  
10 we are writing for both elections officials who want to  
11 figure out to develop a program with college students.  
12 As well as for college and university representatives  
13 who want to get their students more integrated. So  
14 they are really two very different audiences. And at  
15 times that can be challenging.

16                   we have three different sort of call out  
Page 164

029376

17 boxes that you will notice in the handbook. We suggest  
18 handing these out prior to election day. And to  
19 consider using the students they make really great  
20 temporary election workers as things get hectic.

21           A how to box for example we have one on how  
22 to develop a course reading, a big emphasis in the book

□

180

1 is incorporating poll work into a class curriculum  
2 either has a service learning assignment or as extra  
3 credit. Or developing a whole course around the idea of  
4 citizenship. We have suggested reading that you might  
5 use to build a course around.

6           Ignore at your own risk for example one of  
7 the color boxes is designing equipment materials for  
8 college students be careful not to inadvertently insult  
9 your older veteran poll workers. You don't want to say  
10 we really need young smart people.

11           And there is a table of contents for the  
12 guidebook is a campus champion that is something we  
13 have put emphasis on. You really need to find somebody  
14 at the college or university who is going to be that  
15 champion a person who is really going to get out there  
16 put the word out and make it happen. At the same point  
17 you also need to have a strong liaison with the  
18 Election office.

19 Now I want to talk about retention and  
20 sustainability in college poll worker programs. We see  
21 that we are not able to retain these students. At most  
22 you're going to get a student for four years. And most

181

1 likely you're not going to get the same student for  
2 their four years of college. But the emphasis is really  
3 on having sustainable programs. What you want to know  
4 is that you have this ongoing relationship that you  
5 work on and instruct with the local college or  
6 university. So that you can count on having 200  
7 students every year. They may be different faces and  
8 have to go through the training and so on. But you  
9 know that you have those bodies and that your partner  
10 at the college is going to come through for you. And  
11 indeed they are going to be quality poll workers.

12 There are examples of various programs that  
13 we talk about in the guidebook. They really come in  
14 different shapes and sizes Professor Ken built it into  
15 the curriculum as a service assignment. As I explained  
16 that is great. It might pull in 25 to 30 students in  
17 the class that way.

18 Campus wide recruiting campaign posts a lot  
19 of information. A lot of the EAC grantees followed  
20 this model they might have gotten 150 students by just  
21 getting the word out. Clinical science department

22 provides five extra credits. At large universities them

182

1 have ten political science classes each one with 200  
2 students. It's a pool of 2000 potential students all  
3 offered five extra credit points. They bring in 250  
4 students easily to be poll workers. I just added this  
5 one the university sent out a mass email. That is not  
6 really a program that is an ongoing relationship but in  
7 fact it can work because in Cleveland in a recent  
8 primary I ended up contacting the President of  
9 Cleveland State and a community college and a four year  
10 college and they all sent out massive emails to their  
11 students. Faculty and staff saying they needed people  
12 who could come and work at the elections. And they got  
13 a huge turnout despite the fact it was the week of  
14 finals.

15           we are going to be running three pilot  
16 projects that are basically designed to field test our  
17 guide book. The criteria there is having strong  
18 interest from the election official and from the  
19 school. we are really excited in conducting this  
20 project.

21           Some major findings just a few of them. The  
22 emphasis in these programs is developing that

□

183

1 relationship. we are talking about having sustainable  
2 program you want to have the time for relationships  
3 building. And on the colleges side if you want to  
4 incorporate it into curriculum and into classes you  
5 have to get your faculty at least a semester before.  
6 They are going to be tweaking their curriculum and they  
7 need that time ahead to make that a reality. It is  
8 really important to start early to get everyone on  
9 board because if you're going to have a university wide  
10 policy of excused absences on election days of poll  
11 workers you better get working nine or ten months ahead  
12 of time in order for it to go through the university  
13 system.

14           Let's see, Jennifer mentioned you don't want  
15 to see Uncle Sam needs you but with college students  
16 really stressing the important in your message that  
17 they play that this is not just some boring game but  
18 that in fact explaining the importance of poll workers  
19 which is in the democratic process students find  
20 interesting and indeed motivates them. That said skip  
21 down to my last point which are the two best incentives  
22 which by far blew out every other incentive you could

1 possibly think of.

2           First one is money and the second one is  
3 extra credit. So if you can work it through a college  
4 or university and professors to build it into their  
5 curriculum, fabulous. The students eat that up. And  
6 again students are cash starved.

7           Training on campus indeed should be very  
8 hands on, roll playing, lots of questions. In our focus  
9 groups students complained about not being-- feeling  
10 intimidated to ask questions. So lots of question and  
11 answers. And emphasis on the etiquette and  
12 intergenerational communication.

13           Again off year elections are not sexy, it's  
14 going to be easiest to get college students engaged for  
15 the Presidential elections. But that said, indeed there  
16 are many examples of students working primary. And  
17 other students working in between presidential  
18 elections. It is not impossible but you need to  
19 recognize that.

20           In getting students you will be surprised how  
21 often or an assignment will pop up just a week before  
22 when you thought you had everybody signed up and they

1 can't work on election days. So getting that commitment  
2 from the university or college is really important.

3           Quickly on the legal impediments. Indeed most  
4 states require poll workers to be registered voters of  
5 the state, usually of the county and in fact usually a  
6 resident of the precinct that they are going to be  
7 working in. Now again that policy practice issue comes  
8 into play there a lot. That can be a big problem for a  
9 poor college student. Sometimes they don't want to  
10 change their registration from their home town to where  
11 they are at college. And then on the flip side some  
12 states restrict college students from registering to  
13 vote in their college town. That can also be a big  
14 legal impediment.

15           Political affiliation: Only six states don't  
16 provide require some sort of political affiliation. Now  
17 at the county level they are not necessarily relying on  
18 political party lists to get their poll workers. And  
19 the time requirements as I mentioned students really  
20 don't want to commit to more than one election so if  
21 they are required to sign on the line to work for two  
22 straight years every election they are going to balk.

□

1           And please sent me your ides if you know of  
2 any projects out there I would love to hear about them.

3 And as you read through it any comments about format or  
4 language I would be more than happy to receive them  
5 any questions?

6 MR. BERNARD: Louie Bernard, Louisiana.

7 I wanted to ask Jennifer did you find  
8 somewhere that a split shift program that was really  
9 working. And B., was it the responsibility for the poll  
10 worker to find the partner or the election official?

11 MS. COLLINS-FOLEY: Interestingly enough we  
12 really tried to find a split shift program that really  
13 worked and we haven't found one. We found that most  
14 jurisdictions have tried it and given it up entirely. I  
15 talked to five different jurisdictions in Virginia last  
16 week. They said try this city or try Arlington I  
17 finally gave up. And then there are some that keep it  
18 just for the sake of showing that they are flexible.  
19 For example in Los Angeles County we found that poll  
20 workers don't want to do it. They don't want to find  
21 their own partner and they don't want to split the  
22 stipend. But we had to keep offering it just so we

□

187

1 could say that we do. So we have a contract, you know  
2 and especially we found is that election officials are  
3 very reluctant to do this because you compromise the  
4 integrity of the process. What happens if the other

5 person doesn't show up? That is the key thing for  
6 elections officials is that integrity issue. And we  
7 found that even the jurisdictions that had tried it and  
8 given it up would never allow the lead poll worker to  
9 split a shift. That was one thing that was constant.  
10 So we had in our guidebook that was a big chapter and  
11 we moved it into a one pager. It is out there and  
12 people do it with limited success. We kept it in there  
13 and there is a whole big section of the pitfalls and  
14 challenges so that nobody had any doubt that it was not  
15 the most successful practice.

16 MS. MARKOWITZ: Deborah Markowitz, Vermont .

17 In Vermont we only use split shifts. The  
18 chief election official is there all day. And one of  
19 the things we recommend is that the people who count  
20 the votes, we hand count, except in eighty precincts  
21 and we recommend that the people who count are never  
22 the same people who sat there all day because it is

□

188

1 hard to be precise at the end of the day. And we  
2 recommend for that late shift starting at three or four  
3 in the afternoon to school teachers. And that maybe  
4 useful for you for LA of some of these hard to places.  
5 Or they are people who work as bank tellers. They are  
6 very good at counting and are very precise. It is  
7 interesting although our chief election official in

8 every polling place stays the same because you need  
9 continuity. But that is the only person that we  
10 recommend be there all day.

11 MS. FOLEY: I will definitely look into that  
12 be cause we are about to do a case study on your  
13 program.

14 MS. MARKOWITZ: You should also look at the  
15 fact that our polls open up at five in the morning. So  
16 it is a long day.

17 MS. JOHNSON: Carol Johnson, New Hampshire.  
18 We also do split shifts in our community in  
19 Manchester. And we do it quite successfully as well. We  
20 also have an interesting problem with people showing up  
21 for training sessions. We do a two hour training  
22 session before every single election. We have had as

□

189

1 many eight elections in an 18 month period. what we  
2 found was as an incentive showing up we changed the  
3 ordinance that provides payment. So if they show up at  
4 the training session they get more money than if they  
5 don't show up at the training.

6 MS. FOLEY: I definitely will come up there  
7 as well. One of the things that is going to be in our  
8 guidebook is a discussion of the money and how there is  
9 this trend for add on's people had their base

10 stipends . And then you can have all these little add  
11 on's seem to be a trend . And we are hoping this could  
12 be used by election officials in their budgeting  
13 process. They have to go to their bosses and say hey we  
14 are at the low end of the spectrum we need to give our  
15 poll workers a raise for picking up supplies extra.

16 MS. BOWERS: Marilyn Bowers, South Caroling.

17 we were almost successful this year in  
18 getting legislation past to allow registered voters  
19 within the state to expand to the use of college  
20 students but got it knocked down. We will try again.

21 I don't know if anyone has thought about  
22 doing online training for poll workers I got the idea

□

190

1 because I had do a course because I was with the EAC  
2 during activation. And we did online training. We went  
3 through the training chapter by chapter, took the test  
4 and received notice that you were certified.

5 when I checked into some programs that were  
6 out there they are very expensive initial cost plus  
7 yearly cost and the logistics of training large numbers  
8 prior to every election which our law requires it takes  
9 a lot of classes to do all those elections. You could  
10 reach a larger number of people by certifying them  
11 through a computer course.

12 MS. FOLEY: In the guidebook we have a whole  
Page 174

029386

13 chapter on online training. And we are adding models of  
14 training that is bringing in a vendor. And also we are  
15 doing home grown versions. We are also doing-- in the  
16 jurisdictions that are doing their normal training  
17 classes and using the online training as a refresher.  
18 And we are also focusing on jurisdictions that are  
19 doing their entire training on line with some heavy  
20 emphasis on evaluating, whether this is effective or  
21 not. Are they getting their teenage sons go through and  
22 answer the questions. There is some good stuff in

□

191

1 there. And again if anybody has models we are looking  
2 for them. But we have some good stuff already.

3 MS. KIFFMEYER: Mary Kiffmyer from Minnesota.

4 First of all I just wanted to mention that  
5 National Associations of Secretary's of State  
6 regularly send out surveys. Our national association  
7 can reach immediately into many states and within the  
8 states. This is something that may make it a little  
9 easier to find out where some of these things are. It  
10 could be a good resource for you. Only because even in  
11 Minnesota we have election training program and video  
12 brochures. I have not seen the references here but I  
13 just wanted to suggest that maybe before you add on's  
14 or something to use our national association. We could

15 be a resource to help you gather some information and  
16 data. Maybe make some of those contacts you will be  
17 hearing about.

18 MS. FOLEY: Thank you.

19 MS. BARTHOLOMEW: Tonni Bartholomew, State of  
20 Michigan.

21 we as well pay the part time workers. We  
22 choose to pay them a high rate. And we find that by

0

192

1 doing that we can not only get housewives but we can  
2 get high school students. We use a lot of high school  
3 students that come in at 3 o'clock. We also do the add  
4 on pay for cell phone usage.

5 MS. LYNN-DYSON: One of the things I have not  
6 circled, Jennifer is you gave folks your contact  
7 information.

8 MS. FOLEY: One contact that you can use is I  
9 am at CollinsFoley@Yahoo.com but more importantly IFES  
10 has set up an email address that is: Guidebook-feedback  
11 @ IFES. Org .

12 And it is also on your feedback form at the  
13 table of contents that was a hand out.

14 MS. LYNN-DYSON: I think as the Election  
15 Assistance Commission moves forward through the summer  
16 on these pilot projects it will be-- and we actually  
17 get to the Fall get to the point with these manuals and

18 the college and the general poll worker manuals and  
19 also with our materials that you have heard about this  
20 afternoon with our ballot design and polling place  
21 signage it will be extremely helpful to our agency and  
22 to me to have feedback on marketing and distribution

□

193

1 of these materials.

2           We are very proud of them. We are pleased  
3 that we have them. They also represent a good deal of  
4 investment on the part of our agency and your federal  
5 government. So these documents will do no one no good  
6 if they are just sitting on our website and we are not  
7 getting-- and people are not downloading them. Even in  
8 terms of actual production the old fashioned way and  
9 sitting on peoples book shelves collecting dust. So it  
10 would be very helpful to me to hear from you all about  
11 marketing and distribution of these products.

12           My email address is: Klynndyson@EAC.com so  
13 let me hear from you about our venues, setting, Mary  
14 mentioned mass. We certainly anticipate this summer  
15 through IACREAT and NASED and NEC meetings getting the  
16 word out. But I'd like to hear if you have any other  
17 ideas for us.

18           MR. MARTINEZ: Thank you very much for a very  
19 successful session. We are done for the afternoon. I

029000

20 am going to turn the mic over to MS. Nighswonger and  
21 let her any final remarks. Tomorrow we have a  
22 continental breakfast that starts at 8 a.m., I am told

□

1 they should be set up at 7:35. We will start our first  
2 session promptly at 8:30. Tomorrow's topics are very  
3 important. We start with a presentation on management  
4 guidelines and we go throughout the morning until 4:30  
5 on important subjects that we are doing research on.  
6 And I can't think of any other announcements to end our  
7 day. Madam Chair?

8 MR. NIGHSWONGER: All right. I just want to  
9 thank all off the staff for their help, the  
10 interpreters we appreciate their long day. And also our  
11 court reporter. And I think if there are no objections  
12 we will adjourn for the evening.

13 (Thereupon, the above meeting was adjourned  
14 for the evening at approximately 5:35 o'clock,  
15 p.m.)

## **QUESTIONS RAISED BY THE EAC**

- 1. How did states prepare for HAVA's provisional voting requirements?**
- 2. How did preparation and performance vary between states that had previously had some form of Provisional Ballot and those that did not?**
- 3. How did litigation affect the implementation of Provisional Voting?**
- 4. How effective was provisional voting in enfranchising qualified voters?**
- 5. Did State and local processes provide for consistent counting of provisional ballots?**
- 6. Did local election officials have a clear understanding of how to implement provisional voting?**

## TO ANSWER THOSE QUESTIONS

- Surveyed 400 local election officials
- Reviewed the EAC's Election Day Survey
- Analyzed states' experience with provisional voting:
  - use of statewide registration database
  - treatment of out-of-precinct ballots
  - use of different approaches to voter ID
  - consistency
  - time period allowed for ballot evaluation
- Collected provisional voting statutes and regulations
- Analyzed litigation

## Variation among the states

- In 2004 nationwide about 1.9 million provisional ballots cast, 1.2 million, or just over 63%, were counted.
- The percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%.
- The portion of provisional ballots cast that were counted ranged from 96% in Alaska to 6% in Delaware.

## Some sources of variation among states

### Experience

Share of provisional ballots in the total vote was 6 times greater in states that had used provisional ballots before than in states where the provisional ballot was new.

### Administrative Arrangements

#### Time to evaluate ballots

- States that provided less than one week counted an average of 35.4% of their ballots.
- States that permitted more than 2 weeks counted 60.8%.

#### Voter registration data bases

- States with voter registration databases counted an average of 20% of the provisional ballots cast.
- States without databases counted 44%.]

## Variation within states

Rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state.

Resources available to administer provisional voting varied.

--The Election Day Study found that staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories.

--Small, rural jurisdictions and large, urban jurisdictions reported higher rates of an inadequate number of poll workers.

--Jurisdictions in poor areas reported more inactive voter registrations and more provisional ballots cast.

--Richer areas had more poll workers per polling place and reported lower rates of staffing problems per precinct.

**1. How did states prepare for HAVA's provisional voting requirements?**

---

**Most election officials received provisional voting instructions from state government. The type and amount of instruction received varied widely across the states.**

**Almost all provided training or written instruction to precinct-level poll workers on how to administer provisional ballots.**

- Only about 1 in 10 made available to poll workers a voter registration database.**

- Almost equally rare were training and written procedures for poll workers on the counting of provisional ballots.**

**2. How did preparation and performance vary between states that had previously had some form of provisional ballot and those that did not?**

---

**Local election officials in the “old” states felt more confident.**

**18 states were new to provisional voting; 25 others had experience.**

**“New” state officials felt:**

**-- Voters did not receive enough information about where to cast a provisional ballot in order to be counted.**

**-- More funding was needed to educate voters about their rights to cast a provisional ballot.**

**Provisional ballots in “old states” : more than 2% of the total vote, 4 times the proportion in “new” states.**

**Counting provisional ballots in the final vote, the “old” states averaged 58% nearly double the average (33%) in “new” states.**

### **Question 3: How did litigation affect the implementation of Provisional Voting?**

---

#### **Pre-election litigation clarified voters' rights to:**

- **Sue in federal court to remedy violations of HAVA**
- **Receive provisional ballots, even though they would not be counted**
- **Be directed to the correct precinct**
- **Most pre-election litigation occurred too late to influence how states implemented provisional voting.**

#### **4. How effective was provisional voting in enfranchising qualified voters?**

---

**Provisional ballots enfranchised 1.2 million voters, or 1.01% of turnout, who otherwise would have been turned away.**

**The number of voters who could be helped by provisional voting may be about 2.5 – 3 million. Provisional voting might be about 50% effective.**

**There is room for improvement.**

**Legislative activity gives evidence that states were not satisfied with the effectiveness of their provisional voting systems.**

**Those voting with provisional ballots in states with experience were enfranchised more frequently than those in the "new" states.**

**Question 5: Did State and local processes provide for consistent counting of provisional ballots?**

---

**Little consistency existed among and within states.**

**The use of provisional ballots was not distributed evenly across the country. A few states accounted for most of the ballots cast.**

**Share of provisional ballots in the total vote was six times greater in experienced states than in new states.**

**More rigorous the state's Voter ID requirements the smaller the percentage of provisional ballots that were counted.**

**"New" states with registration databases counted 20% of the ballots cast. Those without databases counted more than double that rate (44%).**

**Question 5: Did State and local processes provide for consistent counting of provisional ballots?**

**In-precinct versus out-of-precinct states had different outcomes.**

**States that allowed out-of-precinct ballots counted 56% of the provisional ballots.**

**States that recognized only ballots cast in the proper precinct counted an average of 42% of provisional ballots cast.**

**In "old" states, this difference was greater.**

**52% of ballots cast were counted in states requiring in-district ballots, 70% were counted in those allowing out-of-precinct ballots.**

## Question 5: Did State and local processes provide for consistent counting of provisional ballots?

States that provide a longer the time to evaluate provisional ballots counted a higher proportion of those ballots.

---

14 states permitted less than 1 week :	35.4%
15 states permitted 1 – 2 weeks:	47.1%
14 states permitted more than 2 week:	60.8%.

Effect felt most strongly in states where more than 1% of the overall turnout was of provisional ballots.

---

Less than 1 week:	58.6%
1 – 2 weeks:	65.0%
More than 2 weeks:	73.8%.

**Question 5: Did State and local processes provide for consistent counting of provisional ballots?**

**Conclusions**

**States have latitude in how they meet HAVA requirements.**

**A considerable degree of variation among the states is to be expected.**

**If that variation stems from differences in political culture among the states, it is likely to persist. If it reflects a learning curve for “new” states, consistency may increase more quickly.**

**Question 6: Did local election officials have a clear understanding of how to implement provisional voting?**

---

**8 out of 10 county-level elections officials reported receiving instructions from their state government**

**4 out of 10 local election officials felt poll workers needed more training to understand their responsibilities**

**Objectively, how well did the process appear to be managed?**

**Lack of consistency among and within states indicates wide differences in understanding by election officials.**

**The number of states that have amended statutes on provisional voting to include poll worker training is a sign of dissatisfaction with the level of understanding in 2004.**

29408a

029409

# **RECOMMENDATIONS TO THE EAC**

## **BEST PRACTICES**

## The importance of clarity

EAC should emphasize the importance of clarity in the rules by which each state governs provisional voting. Does the provisional ballot system:

1. Distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate?
2. Place administrative demands on local jurisdictions that are realistically related to the staff and other resources available?
3. Display variation within the state great enough to cause concern that the system may not be administered uniformly from county to county?

## Lessons of litigation for achieving clarity

Look to litigation from the 2004 election to shape new statutes or regulations that will increase the clarity of provisional voting procedures, increase predictability, and bolster confidence in the system.

1. Litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted.
2. Lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot.

## EAC should recommend to the states that they:

- Promulgate clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.
- Provide materials for local jurisdictions to train poll workers on such procedures as how to locate polling places for potential voters who show up at the wrong place.
- Make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.
  - Provide poll workers the training they need to understand their duty to give those voters a provisional ballot.

## EAC should recommend quality improvement

Begin a systematic quality improvement program by collecting data on the provisional voting process. Data collected should include:

- Specific reasons why provisional ballots were not counted
- Measures of variance among jurisdiction
- Time required to evaluate ballots by jurisdiction
- Provisional votes cast and counted by jurisdiction

## Assess each stage of the provisional voting process

### Before the election

- Clear information for voters on websites and in sample ballots.
- Training materials in every jurisdiction make poll workers familiar with the options available to voters.

### At the polling place

- Design of provisional ballot
- Estimate supply of provisional ballots needed at polling places

### Evaluating provisional ballots

- Define and adopt a reasonable period for voters who lack ID or other eligibility information bearing to provide it.
- A voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location.
- Follow written procedure or checklist to record why a provisional ballot is rejected.

# Assess each stage of the provisional voting process

029415

## Post-election

Best practice is for states to consider how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available in presidential elections.

Provide timely information to voters about the disposition of their provisional ballot.

- Are they now registered for future elections?
- If not, what they need to do to become registered?

Subject RE: Follow-up

Ray,

Before I read Rick's message, Steve Ansolabehere was the first name that came to my mind. This assumes you are looking for part-time, not full-time consultants. I would categorize Steve as very moderate left. I am not certain he is Democrat but would be very surprised to learn he is not. But the main thing about him is that he calls things as he sees them. So if you found a Republican with the same characteristics, that would be ideal. Charles Bullock of the University of Georgia would be a possibility. (Actually, I'm not sure of his party either, but I think he may be a Republican.)

I would also suggest you talk to Bruce Cain in the Institute of Governmental Studies at Berkeley. He is very savvy and knows more political scientists than Rick and I do.

029417

Deliberative Process  
Privilege

When I have questions about the political science profession, he's usually the person I go to. His phone number is 510-642-1739. He is also going to be running a UC office in Washington, so he will be more or less living there for the indefinite future. He is someone you ought to get to know.

Best,

Daniel Lowenstein

**Subject:** Re: Follow-up

We are now editing articles for our next issue, which is due out in October. We need to get everything to the printer for this issue in mid-July. So we'd need something from you by early July if it were to make it into that issue. Our deadlines after that are about three months later for each issue.

As far as researchers, I give my highest recommendation to Steve Ansolabehere of MIT, who has already done a bit of research on this issue. He is truly one of the top political scientists in the country working in this field, and he is careful and very fair (I don't know whether I'd count him as "left" or "right").

Dan may have other ideas.

Rick

rmartinez@eac.gov wrote:

Rick / Dan:

Thanks for the follow-up. As I mentioned to Dan in La Jolla, I do want to commit to doing a paper for ELJ. Aside from my own interest in election law and election administration, I think it is important for your readers to gain a better understanding of the role of the EAC and all that we are doing, particularly in the area of voting system standards and certification. Please tell me what the new deadline is and I will make sure to get you an outline of my intended submission, and of course, a timely draft for your consideration. Thanks again to both of you for the continued

029418

opportunity.

On a related note, in Section 241 of HAVA, Congress gives the EAC a laundry list of possible research topics related to improving the process of election administration. Among the suggested topics are the following:

- "(6) Nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office;
- (7) Identifying, deterring, and investigating methods of voter intimidation."

In order to get this research project started, the EAC would like to engage two research consultants who could bring some level of knowledge and expertise to the table and help the commissioners to come to an agreement on the framework and/or scope of such a research project. Rather than sending something out on the listserve, I thought I would directly solicit your opinions about any names in the academic field that you think we ought to consider. The reason we are looking to employ two consultants is because we would like to achieve a political balance -- one from the left, and one from the right, so to speak. Any thoughts you have on this would be greatly appreciated.

Subject Eagleton

History:

This message has been forwarded.

In his note regarding the Eagleton contract, Hans has raised some of the same concerns I raised from the beginning of any discussions I had regarding this contract with our staff, and at our first formal meeting with Eagleton. In reviewing their work product from time to time, I continue to have concerns about a lack of balanced input and have repeatedly voiced them with staff and with Eagleton. I did this when the initial peer review group was proposed and again during their presentation at our meeting in Pasadena (the outreach slide in their public presentation showed outreach to seven groups, of which only one could be considered conservative-leaning). Now, as I have just had the opportunity to read their July progress report, it appears that Eagleton seems to be going into a larger analysis of the voter fraud issue than was authorized in the contract. My suspicion is that Dan Tokaji is injecting his views into this to dismiss or diminish the concerns some people may have about voter fraud. I could be wrong, but his previous writings lead me to believe otherwise.

I only found one mention of voter fraud in the contract with Eagleton. It is in Section 3.5 regarding provisional voting, where it discusses "minimizing opportunity for voter fraud." Yet, on page 4 of the July progress report from Eagleton, in describing their work plan for the next month it states: "we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms." This clearly seems to be going beyond the mandate we gave them as I thought they were going to be looking at voter fraud relating to provisional voting (as the contract calls for), not voter fraud as it relates to election reforms. While voter fraud was never mentioned in the contract regarding the voter ID issue, page 5 of their July report indicates that their narratives "will include an appraisal of the prevalence and nature of vote fraud." In addition to this, page 6 describes a look into the "relationship between voter ID regime and vote fraud."

Voter fraud is clearly an issue that is perceived differently from the Right and from the Left. I have struggled with determining what a clear definition of voter fraud is myself, and therefore want to obtain various perspectives and good analysis on this issue before I formulate a solid conclusion in my mind. It has been my understanding all along that the whole voter fraud/voter intimidation issue is going to be studied by the EAC using a balanced group of consultants--not Eagleton and Moritz, who are likely to focus on just on the number of prosecutions of voter fraud, rather than the complaints made or the fact that many election officials are frustrated that some prosecutors don't take their complaints about voter fraud seriously. I am not convinced at this point that we will get a balanced and objective study from Eagleton/Moritz on voter fraud. I am puzzled on why they seem to be expending a significant portion of their time on this and would want to know if we somehow authorized them to do more research into the voter fraud issue.

On page 7 of their July report Eagleton indicates that communications with the EAC on the Peer Review Group "were not clear or timely." I would like to know what this refers to. Also, I may have missed it, but I do not recall seeing the final list of who is serving as the Peer Review group.

The August 15th copy of the July report that I received from Karen did not include the attachment of the financial report of expenses incurred. I would like to see that attachment.

Outside of our NIST work, this contract represents our largest single outside expenditure of our operational funds. Any single expenditure of \$500,000+ needs to be closely monitored. I, for one, am not going to sign off on any report that appears to have been written from a biased viewpoint, especially one that doesn't appear to be interested in hearing from conservative organizations or right-leaning researchers, or seems to minimize any input from them. I've already had questions from congressional

029420

staff and others on why we picked Eagleton and Moritz, as they are perceived by some as biased against Republicans. I assured the critics that we have insisted all along on an objective study from Eagleton. An unbalanced or biased study from them will not only hurt my credibility, but also that of the EAC. I'm not suggesting that we stop their work, but I do want Tom and Julie to inform them in no uncertain terms that we will not accept a report that does not seriously consider all viewpoints on provisional voting and the voter ID issue, and that any study or interpretations they present to us reflect a diversity of opinions on these subjects. We also need for staff to determine whether their considerable work into the voter fraud area is authorized in the contract. We should not be paying for and receiving work we did not authorize.

The contract clearly calls for "alternative approaches" on voter ID requirements and "alternatives" on provisional voting. I agreed to support this contract to Eagleton because I was assured that we would receive a variety of approaches from their work, and not just those from a liberal perspective.

Subject Eagleton

Paul:

I am directing this email only to the commissioners, because I don't think we should air our disagreements among staff until we have at least had a chance to discuss controversial issues with each other in person. It appears from Gracia's email that we will have a chance do so next week in Denver.

In the meantime, I feel compelled to respond to your email regarding Eagleton.

(1) As I stated last night in my email to Hans, we have an on-going responsibility to monitor the expenditure of all our federal funds, including to government contractors who are contractually obligated to deliver unbiased research. However, I will remind you that we did not contract with Eagleton merely to provide a compilation of state laws and procedures. Rather, we contracted with Eagleton (and indirectly with Moritz through Eagleton) to provide both research AND analysis of provisional voting and voter ID. Invariably, the analysis portion of their final product will be from a professional (and institutional) perspective, and will NOT represent any one researcher's personal point of view. If it does, then Eagleton and Moritz risk damaging their credibility not just with the EAC, but with other federal government agencies which undoubtedly contract with their respective institutions on other projects. I doubt seriously that either institution would risk such damage and allow one team member to inject bias into the work. Moreover, the peer review group that is (or has) been assembled by Eagleton is designed to cure any lingering concerns about potential institutional or personal bias...Eagleton has been responsive to your feedback on this issue, to the point where they have removed all perspective representatives of the advocacy community on the peer review group (because they felt they could not achieve political "balance" from the advocacy groups). If there is some person (or persons) which you would like to see Eagleton include in the review group, it is my understanding that such inclusion is but a mere phone call away.

(2) You will recall that at our meeting last week, I raised the exact same concern about the Eagleton progress report, and asked for clarification from staff regarding the details of this particular work (i.e., fraud) on the part of Eagleton. I expect staff (or us directly) to ask questions of Eagleton (as we would any contractor) and determine if their work in this area is within the scope of work (and contract) we all agreed to. If it isn't then we re-direct them, just as we have done, for example with Kim Brace and EDS.

(3) Finally, I must express my disappointment, Paul, regarding your comments on Professor Tokagi that you chose to include in your email. While I may disagree with Hans on his particular analysis of the perceived personal bias of this contract, at least his allegations regarding Professor Tokagi's potential bias are grounded in fact (and he recited them as such in his email). You, on the other hand, have chosen to accuse Professor Tokagi of manipulating the work on this project based on your "suspicion." With all due respect, that unfortunate accusation borders, in my view, on a breach of professional decorum and I cannot let it go without response.

We clearly have some political issues that are increasingly being injected into nearly every discussion at the EAC table. I have stated both to you and Gracia individually that I believe this trend in part represents a "maturation" of the EAC and I am not uncomfortable with it. However, if we are going to bring accusations of subjectivity and bias to the table, then I will expect that such a filter will be applied across the board to ALL projects undertaken by the EAC, and that such a filter will be based solidly on fact, and not on innuendo, personal hunches or suspicions.

029422

I send this email, as always, with the highest degree of respect and friendship toward you. And yet, my disappointment is evident in your comments regarding an esteemed and respected member of the legal academic community (and someone whom I regard as a personal friend.)

I look forward to our continued discussion on this matter. And as for the substance of Hans' concern regarding Moritz, I stand by my email which I sent to everyone last night.

Subject Consultants

Since we are about to hire Tova Wang (and two others) to be our consultants/researchers on the voter fraud study, I thought I would give you a heads-up about a well-written commentary that Tova just published. It is attached below. Paul's newfound political "fervor" still has me riled-up, needless to say. Hope your travels are going well.

## ID and Voting Rights

Laws requiring voters to present very specific forms of ID are becoming the voting rights barrier of the 21st Century.

**Tova Andrea Wang**

August 29 , 2005

Laws requiring all voters to present very specific forms of identification before exercising their right to vote are rapidly becoming the voting rights barrier of the 21st Century. Last Friday, the Department of Justice approved a new Georgia law requiring every voter to show a government-issued photo ID. The Department of Justice was required to review the measure and "preclear" it because that state is covered by Section 5 of the Voting Rights Act. Although many legal scholars and voting rights advocates had argued the Department should deny its implementation because it would lead to disenfranchisement of minority voters, the Department evidently did not agree. Indiana passed similar legislation this year, and several groups have sued the state on the grounds that it violates the Voting Rights Act.

Next up is Arizona. Last week, after months of resisting, the governor of Arizona signed off on a plan for implementing Proposition 200, which required identification from all voters. Arizona's new rule is that all voters must show government issued photo identification or a tribal identification to vote. Alternatively, the voter may present two current pieces of identification from a narrow list of potential documents that show the voter's name and current address, such as a utility and phone bills.

The most problematic provision is this: if the voter is not able to present a government issued photo ID or these two documents to the satisfaction of the poll worker, that voter is simply disenfranchised, asked to leave the polling place without casting a ballot. The voter may not even cast a provisional ballot. For example, if the voter brings a gas bill and a water bill, but the poll worker decides the water bill is not "dated within ninety days of the election," that person will be absolutely denied the right to vote. In addition to being a violation of the Help America Vote Act's mandate that any voter who shows up at the polls and believes he or she is registered and eligible to vote must be given a provisional ballot, this raises serious voting rights issues.

As a group of preeminent voting rights scholars have argued in Georgia, under Section 5 of the Voting Rights Act, a covered jurisdiction may not implement a change in its election laws or practices *unless the jurisdiction demonstrates* the change will be free of any racially discriminatory purpose or effect. The objective of Section 5 “has always been to insure that no voting-procedure changes would be made that would lead to a retrogression in the position of racial minorities with respect to their effective exercise of the electoral franchise.”

As in Georgia, Arizona—especially given the possibility of a complete denial of the vote—has not met that burden of proof. It is up to the state to demonstrate that the ID requirement, which contemplates complete disenfranchisement of certain voters, will not have a discriminatory impact. So, for example, has the state examined whether most voters have or have easy access to the necessary documents? Have state officials investigated what groups are likely to lack the kinds of identification required? Since the law puts the burden on the state, the state must undertake these types of inquiries before it is permitted to go forward with this scheme—for there is a great deal of evidence indicating that it is indeed minorities who lack even one form let alone two forms of the types of identification contemplated.

The difficulty is that the poor and minorities are least likely to own motor vehicles and possess a driver’s license—the most commonly accepted form of identification. Indeed, in 1994, the U.S. Department of Justice found that African-Americans in Louisiana were 4 to 5 times less likely to have government-sanctioned photo ID than white residents. As a result, the Department denied pre-clearance for that state’s proposed photo ID requirement because it “would lead to retrogression in the position of racial minorities with respect to their effective exercise of the electoral franchise.”

The evidence continues to mount. A June 2005 study by the University of Wisconsin found that less than half (47 percent) of Milwaukee County African American adults and 43 percent of Hispanic adults have a valid drivers license compared to 85 percent of white adults outside Milwaukee. One Arizona county reported in February that it was forced to reject nearly 75 percent of new voter registration forms for failure to provide adequate proof of citizenship.

Furthermore, for those who do not have the kinds of up-to-date non-photo ID necessary—and many minority and urban voters, for example those who live in multiple family dwellings simply will not—getting identification from the government will present costs and burdens for voters who simply want to exercise their constitutional right to vote. A certified copy of a birth certificate costs from \$10.00 to \$45.00, depending on the state; a passport costs \$85.00; and certified naturalization papers cost \$19.95. It may not be so very easy for people who work more than one job or have small children to take the time during business hours, drive to a Department of Drivers Services, and wait on line to get necessary identification. Indeed, most of the state’s offices are open 8:00 a.m. to 5:00 p.m. Monday through Friday. Has the state researched the potential disparate impacts on getting non-photo ID? If not, it has not met its burden under the Act.

There has been a great deal of controversial discussion over the Voting Rights Act recently because some sections—including Section 5—are due to expire. The Act was passed in order to eliminate procedures aimed at the disenfranchisement of particular groups. That it is still necessary is being demonstrated today in Arizona and Georgia

Subject Call from Paul Vinovich

I took a telephone call this morning from Paul Vinovich. He had attempted to reach Gracia, but since she was not here, he asked Sheila if I was in the office so he spoke to me.

Paul was very upset with comments that Tova Wang had made at yesterday's AEI's meeting in which she basically indicated that voter fraud did not exist in the USA. He asked how a person who believes that voter fraud does not exist--or not seem at least willing to listen to both sides--can be hired by the EAC to do a study on voter fraud/voter intimidation. I explained to Paul (as I have now had to explain to many others) that Tova was "balanced" on the study with Job Severbrov. He did not know Job but was well-aware of Tova's positions and was concerned that her public comments indicate that she will not be fair in looking at this issue. I explained to Paul that we were monitoring the work of our consultants on this study and no report would be issued publicly without the support of at least three commissioners. I sent him some background information on Job. I think this study will need close monitoring.

Subject Re: Call from Paul Vinovich

What Paul V said is NOT at all an accurate statement of what Tova said. I was there. This is very disappointing to read. I may call Mr. V myself.

I watched and heard what was said and by whom. I will be glad to brief you tomorrow morning.

Subject 9:30 Discussion on Tuesday

I am suggesting that we have our 9:30 discussion tomorrow to cover a couple of things:

1. The four of us need to spend some "quality" time together. Tomorrow will be a good time to pin down the earliest date when we will all be in DC and can devote a 1/2 day or so to discuss election of officers, etc. Perhaps on tomorrow we can develop an agenda for those discussions.
2. Defining balance for the make-up of the Working Group for our Voter Fraud/Intimidation project.

Subject Thursday Comm Discussion

For our private time discussions, I propose that we add the composition of the Voter Fraud/Voter Intimidation Working Group to our list of topics to discuss.

As you will recall, we did not complete the discussion because Paul was not able to participate.

Subject Working Group for Voter Fraud/Intimidation Project

Peg:

Following is the guidance that the commissioners are providing with respect to the composition of the working group for the Voter Fraud/Voter Intimidation project and the selection process.

### 8 Member Working Group

Participants to be chosen by the two consultants in consultation with you. There are two slots that will require consensus. If consensus can't be reached, then you should make the decision. If there is real disagreement among the three of you, then the commissioners will make the selection.

The participation process prescribed below provides for political balance. As always, we ask that the group be diverse with respect to participation of men, women and minorities.

**4 people from the Academic , Legal and Advocacy sectors** - 2 to be chosen by Tova and 2 to be chosen by Job. We support your recommendation that there be at least one academic in the working group to help advise and comment on the construct of the database and you should provide that guidance to Tova and Job.

**2 State Level Election Officials** - 1 selected by Tova and 1 selected by Job

**1 Nonpartisan local election official** (selected by you or by consensus among the 3 of you)

**1 Representative from DOJ** - you had recommended a man who was retired from the Voting Section or perhaps someone else with similar credentials to be selected by you or by consensus among the three of you. We assume that Craig Dosantos (?sp) will participate in this project as an "advisor" and therefore would not take up a slot on the working group.

I will be on travel on Friday (tomorrow), however please feel free to call me on my cell should you have questions or need additional clarification.

Many thanks for your terrific work.

Subject Draft Agenda for Standards Board

Paul:

I've taken a shot at a draft agenda, but we have much work to do on this item. As you will see, my current vision, at least with regard to the Standards Board, is to have a series of presentations regarding all of our research projects, particularly those in which written draft reports will be ready for consideration, such as the provisional voting study and the voter ID study. However, there are too many research projects on the plate right now, and not enough time in a day and a half to be able to present all of them to both the Standards Board and BOA (not to mention "fatigue factor" if we overload these folks during this meeting). So, I've had to prioritize.

Anyway, attached is what I have come up with, and at the very bottom of the draft agenda, you will see the research projects that I left off the list. Next steps are for you to develop a similar draft agenda for the BOA, and I would suggest that you do something similar for the BOA, such that we will have concurrent session going on (Standards Board in one room, BOA in another)...for example, when the briefing for provisional voting is taking place for the SB members, you can be having a concurrent session for the BOA in another room on voter ID. Then we switch. (Same type of format for Day 2). This will allow us to have concurrent sessions going on simultaneously but we'll have to coordinate the schedule of these sessions. In the current draft agenda, I have the two boards coming together in the afternoon of the second day, but we may want them to start with a joint plenary session and end with a joint plenary session (though that is tough because they each have group-specific business to conduct when they first arrive -- at least the Standards Board does, such as adoption of permanent bylaws).

Anyway, this is still VERY MUCH a work in progress, so I welcome your feedback. Also, I think we need to get Tom and Karen involved in this discussion very soon, and then kick it over to the other commissioners for their input once you and I have agreement on a rough draft. After that, I will then want to send it to Peggy Nighswonger so that she can share it with the Executive Board to get their input before it goes final.

I'll wait to hear back from you.

## MEMORANDUM

---

**TO:** MEMBERS OF EAC STANDARDS BOARD  
**FROM:** PEGGY NIGHSWONGER, CHAIR, EXECUTIVE BOARD  
RAY MARTINEZ, EAC COMMISSIONER  
**DATE:** APRIL 10, 2006  
**SUBJECT:** UPCOMING MEETING OF STANDARDS BOARD, MAY 23-24, 2006

**The next meeting of the EAC Standards Board (to be held jointly with the EAC Board of Advisors) will be held in Washington, D.C. on Tuesday, May 23 and Wednesday, May 24, 2006 at the Hamilton Crown Plaza hotel.** We hope you will be able to attend this important meeting, which will focus on consideration and discussion of a number of ongoing election administration research projects currently underway by the EAC. Additionally, there will also be a discussion regarding recent work conducted by the National Institute of Standards and Technology (NIST) regarding voter verifiable audit trail. (Please see the draft agenda attached for additional information.)

As was the case with our previous meetings of the EAC Standards Board, the EAC will pay the cost of travel, hotel and a Federal per diem for any member of the Standards Board wishing to attend the May 2006 meeting. Upon receipt of this memorandum, please contact the EAC's travel agent, Adventure Travel, at (877) 472-6718 to make your travel arrangements. Additionally, if you have any questions or need assistance in making your travel plans, please call \_\_\_\_\_ (email address is \_\_\_\_\_).

Thank you in advance for your willingness to join us in Washington, D.C. We look forward to seeing you soon.

**Wednesday, May 24, 2006**

**8:00 a.m. CONTINENTAL BREAKFAST**

**8:30 – 9:30 a.m. PRESENTATION AND CONSIDERATION OF DRAFT  
REPORT ON POLL WORKER RECRUITMENT, TRAINING  
AND RETENTION (INCLUDING COLLEGE POLL  
WORKERS)**

Presentors:  
Tracy Warren, Poll Worker Institute  
Jeannette Senecal, League of Women Voters  
Dora Rose, Center for Election Integrity, Cleveland State University  
Resource Person: Karen Lynn-Dyson, EAC Research Manager

**9:30 – 10:30 a.m. PRESENTATION AND CONSIDERATION OF DRAFT  
REPORT ON VOTE COUNT/RECOUNT**

Presentors:  
Dr. Thad Hall, Assistant Professor of Political Science, University of Utah  
Dr. Michael Alvarez, Professor of Political Science, California Institute of  
Technology  
Resource Person: Juliet Thompson, EAC General Counsel

**10:30 – 10:45 a.m. BREAK**

**10:45 – 11:30 a.m. PRESENTATION AND CONSIDERATION OF DRAFT  
REPORT ON IMPROVING DATA COLLECTION**

Presentors:  
Karen Lynn-Dyson, Research Director, Election Assistance Commission  
Laiza Otero, Research Associate, Election Assistance Commission  
Resource Person: Brian Hancock, Research Associate

**11:30 – 12:15 p.m. PRESENTATION AND CONSIDERATION OF DRAFT  
REPORT ON VOTER FRAUD/VOTER INTIMIDATION**

Presentors:

029437

Job Serebrov, Associate, The Nixon Law Firm  
Tova Wang, Democracy Fellow, The Century Foundation  
Resource Person: Juliet Thompson, EAC General Counsel

**12: 15- 1:30 p.m. LUNCH**

**PRESENTATION REGARDING PROPOSED MODULE FOR VOTER  
VERIFIABLE PAPER AUDIT TRAIL (VVPAT) OF THE VOLUNTARY VOTING  
SYSTEM GUIDELINES (VVSG)**

Presentors:

Mark Skall, NIST

John Wack, NIST

**1:30 – 3:15 p.m. JOINT PLENARY SESSION**  
Session Jointly Chaired by Peggy Nighswonger, Chair, Executive  
Board and Beverly Kaufman, Chair, Board of Advisors

Discussion and deliberation.

**3:15– 3:30 p.m. BREAK**

**3:30 – 5:00 p.m. JOINT PLENARY SESSION (CONTINUED)**  
Session Jointly Chaired by Peggy Nighswonger, Chair, Executive  
Board and Beverly Kaufman, Chair, Board of Advisors

Discussion and deliberation.

**5:00 p.m. ADJOURN**

\* Not included in the current list of projects briefed:

- ◆ Design for Democracy updates and improvements to ballot design and polling-place signage.
- ◆ Public Access Portal research.
- ◆ Katrina Voting Assistance Relief research.
- ◆ Legal Online clearinghouse of election law materials.

Subject: Re: Fw: Updated Word Search List 

Tamar:

**Don't worry about responding to this email , as I know you have to pay attention in class .**

I questioned the length of the search term list and also thought that there would be ways to combine some of the search terms. It has been awhile since I have done a Westlaw search, however, which is why I need your input during the teleconference. Yes, I recognize that going through the list of search terms and printing off or saving the resulting references will take time. I'll need you to provide that feedback to our consultants so that we all are on the same page.

Devon has not done a Nexis search before; but, if EAC has access to that database, she is willing to conduct that search. The work would go along with other help she is providing. She will be sorting through my huge files of press clippings on voting fraud, will PDF the sorted clippings, and drop the PDF files onto CDs for our consultants' review.

Subject Material I may not have included

Peg,

Correct me if I'm wrong, but I think I omitted sending you these specific summaries that are based on complex cases that could not be adequately described within the confines of the nexis article excel spreadsheets. If we can, these should be included, probably on the disc. Sorry.

## Summary of Wisconsin Voting Irregularities November 2004

### *Instances of Illegal Voting, Milwaukee:*

A probe led by U.S. Attorney Steve Biskupic and Milwaukee County District Attorney Michael McCann found about 200 cases of illegal felon voting and at least 100 cases of other forms of illegal voting in the city of Milwaukee. Of these, 14 were prosecuted:

10 were instances of felons voting while on probation or parole:

5 are awaiting trial. (one of them is DeShawn Brooks)<sup>1</sup>

1 has been acquitted<sup>2</sup>

1 has been found guilty in trial (Kimberly Prude)<sup>2</sup>

3 have reached plea agreements (Milo Ocasio<sup>3</sup>)

[names: Ethel M. Anderson, Correan F. Edwards, Jiyto L. Cox, Joseph J. Gooden<sup>4</sup>]

4 were instances of double voting:

1 produced a hung jury (Enrique Sanders)<sup>2</sup>

1 was found incompetent to stand trial and his case was dismissed

1 initially pleaded guilty but now wants a trial.<sup>5</sup>

1 is awaiting trial.

Two of those accused of double voting were driven to multiple polling places in a van, but the identity of the driver of the vehicle is not known, and the DA does not suspect conspiracy.<sup>6</sup>

In addition to these, four people were charged with felonies in the Milwaukee County Circuit Court; two cases were filed against people accused of sending in false registration cards under the auspices of the Association of Community Organizations for Reform Now; the other two were felons who voted illegally.<sup>7</sup>

### *Instances of Illegal Voting, Statewide:*

The Legislative Audit Bureau, a nonpartisan research agency, released its analysis of state-wide 2004 election results in September 2005. The agency reviewed the names, addresses, and birthdates of over 348,000 individuals credited with having voted in November 2004, from the electronic voter registration records of 6 cooperating municipalities, and compared them to lists from the Department of Corrections of felons serving sentences on election day, and to lists from the municipalities (to check up on

double-voting) and to lists from the US Social Security Administration. LAB's search revealed 105 "questionable" votes:

- 98 ballots cast by ineligible felons, 57 of which were in Madison, 2 in Waukesha, 15 in Eau Claire, 16 in Appleton, 1 in the Village of Ashwaubenon
- 2 instances of double-voting (one in Madison, one in Waukesha).
- 4 votes counted despite the voter's having died two weeks or less before the election.
- 1 case in which a 17-year-old voted in Madison.<sup>8</sup>

The LAB referred the names of these people to the appropriate District Attorney for prosecution, and several cases are awaiting trial.

It should be noted that this study is not a complete survey of election returns state-wide in Wisconsin; the LAB's analysis is based on the voting records of the six municipalities that provided the LAB with sufficient information to conduct this study.

It should also be noted that the LAB discovered significant error in the data provided them by these municipalities, including:

- 91 records in which the individual's birthdate was incorrectly recorded as later than November 2, 1986
- 97 cases in which a person was mistakenly recorded as having voted twice
- More than 15,000 records were missing birthdates, making it more difficult to determine voter eligibility by comparing these records to lists of felons and deceased persons.<sup>9</sup>

### *General Findings*

Both reports (the Legislative Audit Bureau's and the report of the Joint Task Force on Election Reform convened in Milwaukee) that did in-depth studies of the Wisconsin election returns in 2004 found that there was no evidence of systematic, wide-spread fraud.<sup>10</sup> As the above statistics indicate, there are very few cases in which an individual intentionally voted illegally, and the majority of the discovered instances of fraudulent voting involved felons who were unaware that they were committing a crime. Certainly the number of fraudulent votes, intentional and unintentional, is dwarfed by the amount of administrative error – and the amount of potential there was for fraud.

### *Registration Irregularities*

---

<sup>8</sup> Borowski, Greg J. "State audit digs up wider vote problems; Thousands of voters on rolls more than once." *Milwaukee Journal-Sentinel*. September 17, 2005

<sup>9</sup> "An Evaluation: Voter Registration." *Legislative Audit Bureau*. Madison, Wisconsin. September 2005. Pg. 50-52.

<sup>10</sup> Brinkman, Phil. "Voting fraud in November not a problem in Madison; Nearly all suspect voters turn out to be people who moved or made innocent mistakes." *Wisconsin State Journal*. May 11, 2005.

Duplicate Registrations: In the data from the six participating municipalities, LAB found 3116 records for individuals who appear to be registered more than once in the same municipality (0.9% of the records they reviewed). These duplications were primarily the result of name changes, in which the registrar neglected to remove the old name from the registration list, previous addresses that were not deleted, and misspellings and other typographical errors.

Deceased Voters: the LAB study found 783 persons who were deceased, but whose records had not been eliminated from the registration lists. Most of the municipalities participating in the survey rely on obituaries and notifications from family members to purge their voter registration lists of deceased voters.

Felons: Comparing a list of felons from the Department of Corrections to their voter registration data lists, LAB found 453 felons who were registered to vote. This is largely because, although municipal clerks are informed of federal felony convictions, they have no way of obtaining records on state felony convictions.<sup>11</sup>

## Summary of South Dakota Election Irregularities in 2002 and 2004

### **2002**

In fall 2002, one of South Dakota's Senators, Democrat Tim Johnson, was up for re-election, and was engaged in a very close race with his Republican challenger, John Thune. Both parties were engaged in a massive voter registration effort, and registered over 24,000 new voters in the five months between the June primary and the November election, increasing the number of registered voters in the state from around 452,000 to 476,000.<sup>1</sup>

A month before the election, several counties reported irregularities in some of the voter registration documents they'd received. In response to these reports, South Dakota Attorney General, Mark Barnett, with the state US Attorney and the FBI, launched an investigation.<sup>2</sup> Because of the importance of the race in determining the partisan balance of power in the Senate, the voter registration discrepancies got a good deal of national press, including a number of editorials accusing American Indians of stuffing ballot boxes.<sup>3</sup> The following allegations were also picked up by out-of-state newssources, including Fox News and the Wall Street Journal:

- Supporters of Thune, who lost the election by 524 votes, collected 47 affidavits from poll watchers claiming voting irregularities.
- Allegations were made that three individuals were offered money by Johnson supporters to vote.

Barnett, who was alerted to the affidavits when he read an early media report that referred to them, stated that these allegations were either false or didn't warrant concern. "Most of the stuff that's in those other 47 affidavits are the kind of problems that we see in every election. People parking too close to the polling place with a sign in their window, people shooting their mouths off at the polling place. The kind of things that local election officials generally do a pretty good job of policing."<sup>4</sup> The allegations of voter bribery were false.

Though most of the allegations of fraud that were filed turned out to be false, Attorney General Barnett's investigation did uncover two cases of voter registration fraud:

- The most high-profile case was that of Becky Red Earth-Villeda. Ms. Red Earth-Villeda was hired by the state Democratic party to register voters on the American Indian reservations. She was charged with 19 counts of forgery. No fraudulent voting was associated with Ms. Red Earth-Villeda, nor was there any evidence

that fraudulent voting occurred in the state.<sup>5</sup> All charges were dropped in January 2004, when, in court, it was determined by the state handwriting specialist that Ms. Red Earth-Villeda had not forged the signatures.<sup>6</sup>

- Lyle Nichols. Mr. Nichols was arrested for submitting five forged voter registration cards to his county office. He was working for an organization called the Native American Voter Registration Project, and was paid \$3 for each registration. The five charges were dropped after Mr. Nichols pleaded guilty to possession of a forgery, and was sentenced with 54 days in jail, which is how much time he'd already spent there because of the charges.<sup>7</sup>

## 2004

In October 2004, just before the general election, eight people working for a campus GOP Get-out-the-Vote organization resigned their positions after they were accused of submitting absentee ballot requests that had not been notarized properly. Because many of these ballot requests had already been processed and the ballots themselves had been cast, county auditors decided not to pursue the issue.<sup>8</sup>

Besides this incident, there were no reports of voter registration or voting irregularities in the run-up to the November 2004 election, as there were in 2002.<sup>9</sup> However, as with the primary and special elections in June 2004, there were complaints about voter intimidation from American Indians attempting to vote, as well as difficulties with the adoption of the state's new photo identification regulations (after the 2002 election, the state legislature passed more stringent requirements about the kind of identification voters would need to provide at the polls.)

### Incidents:

**Voter Intimidation:** The Four Directions Committee, an organization dedicated to helping American Indians register to vote and get to the polls, got a temporary restraining order on several Republican supporters who, they alleged, had been setting up video equipment outside of polling places on American Indian reservations and following around American Indians who voted early and recording their license plates.<sup>10</sup>

**Vote Buying:** A Republican election monitor from Virginia, Paul Brenner, claimed that Senator Tom Daschle's campaign was paying people to vote. Local county auditors

<sup>11</sup> Walker, Carson. "Some problems and oddities reported on Election Day." *Associated Press State and Local Wire*. November 2, 2004.

## Summary of Election Irregularities in Washington State 2004

The 2004 Washington state gubernatorial election was decided by one of the narrowest margins in American electoral history; 261 votes – less than a millionth of the 2.8 million votes cast statewide - separated the leading candidate, Republican Dino Rossi, from his competitor, Democrat Christine Gregoire. The state law-mandated recount that followed brought the margin down to 42 votes, and the subsequent hand recount ordered by the state Democratic Party gave Gregoire the lead, with 129 more votes than Rossi.

The race was so close that the parties decided to go to court to dispute the tally – the Republicans wanted the election results set aside and to have a revote; the Democrats sought a court-legitimated win. Each side set out into the field to find a way to swing the election in their favor. The trial and accompanying investigation, which lasted through the spring of 2005, revealed a litany of problems with the state's election system:

- The process by which absentee ballots are matched to the voters who requested them led to discrepancies between the number of absentee ballots received and the number of votes counted.<sup>1</sup>
- After the final certification of the election results, King County discovered 96 uncounted absentee ballots, Pierce county found 64, and Spokane County found eight; all had been misplaced following the election, but there was no mechanism for reconciling the number of absentee ballots received with the number counted.<sup>2</sup>
- Hundreds of felons who were ineligible to vote were able to cast ballots because they were not aware that they needed to apply to have their voting rights reinstated.<sup>3</sup>
- The system for verifying the eligibility of voters who had cast provisional ballots was found to be questionable.<sup>4</sup>
- Due to poll worker error, about 100 provisional ballots were improperly cast, and a hundred more were counted, though they were not verified as having been cast by eligible voters.<sup>5</sup>

The trial also revealed that most of these problems were the result of understaffing and human error.<sup>6</sup> In total, 1,678 ballots were proven to have been cast illegally, but none of these votes was subtracted from the candidates' totals because no evidence was produced in court as to how each individual voted.<sup>7</sup> Further, despite the scrutiny that the election

## Major Vote Buying Cases Summary

Between 2001 and 2006, allegations and convictions for vote buying and conspiracies to buy votes were concentrated in three states: Illinois, West Virginia and Kentucky.

Deleted: of

Deleted: which have resulted in convictions on these charges a

In East St. Louis, Illinois, nine individuals, including a former city council member and the head of the local Democratic Party, Charles Powell, Jr., were convicted or pled guilty to vote buying and conspiracy to commit election fraud during the 2004 general election. The government's conspiracy case was almost entirely based on taped conversations in which the defendants discussed buying votes for \$5 and whether this would be adequate. Federal prosecutors alleged that the vote buying was financed with \$79,000 transferred from the County Democratic Party shortly before the election, although county officials have not been charged. Four defendants were convicted of purchasing or offering to purchase at least one vote directly, while Democratic Party chairman was only convicted of conspiracy.<sup>1</sup> Earlier, three precinct officials and one precinct worker pled guilty to buying votes for \$5 or \$10 in that same election.<sup>2</sup>

Eastern Kentucky has witnessed a series of vote buying cases over the last several years. The most recent revolved around Ross Harris, a Pike County political fundraiser and coal executive, and his associate Loren Glenn Turner. Harris and Turner were convicted in September 2004 of vote buying, mail fraud, and several other counts.<sup>3</sup> Prosecutors alleged Harris and Turner conspired to buy votes and provided the necessary funds in an unsuccessful 2002 bid for Pike County district judge by former State Senator Doug Hays. Harris supplied nearly \$40,000, Turner laundered the money through straw contributors, and the cash was then disbursed in the form of \$50 checks ostensibly for 'vote hauling', the legal practice of paying campaign workers to get voters to the polls which is notorious as a cover for buying votes.<sup>4</sup> Harris attempted to influence the race on behalf of Hays in order to get revenge on Hays' opponent for a personal matter.<sup>5</sup>

A grand jury initially indicted 10 individuals in connection with the Harris and Turner case, including Hays and his wife, and six campaign workers. Of the remaining defendants, only one, Tom Varney, also a witness in the Hays case, pled guilty. The others were either acquitted of vote buying charges or had vote buying charges dropped.<sup>6</sup> Prosecutors have announced that their investigation continues into others tied to Harris and may produce further indictments.

The Harris case follows a series of trials related to the 1998 Knott County Democratic primary. Between 2003 and 2004, 10 individuals were indicted on vote buying charges, including a winning candidate in those primaries, Knott County judge-executive Donnie Newsome, who was reelected in 2002. In 2004 Newsome and a supporter were sent to jail and fined. Five other

Deliberative Process  
Privilege

defendants pled guilty to vote buying charges, and three were acquitted. The primary means of vote buying entailed purchasing absentee votes from elderly, infirm, illiterate or poor voters, usually for between \$50 and \$100. This resulted in an abnormally high number of absentee ballots in the primary.<sup>7</sup> Indictments relating to that same 1998 primary were also brought in 1999, when 6 individuals were indicted for buying the votes of students at a small local college. Five of those indicted were convicted or pled guilty.<sup>8</sup>

Absentee vote buying was also an issue in 2002, when federal prosecutors opened an investigation in Kentucky's Clay County after an abnormal number of absentee ballots were filed in the primary and the sheriff halted absentee voting twice over concerns.<sup>9</sup> Officials received hundreds of complaints of vote-buying during the 2002 primary, and state investigators performed follow up investigations in a number of counties, including Knott, Bell, Floyd, Pike, and Maginoff.<sup>10</sup> No indictments have been produced so far.

So far, relatively few incidents of vote-buying have been substantially identified or investigated in the 2004 election. Two instances of vote buying in local 2004 elections have been brought before a grand jury. In one, a Casey County man was indicted for purchasing votes in a local school board race with cash and whiskey.<sup>11</sup> In the second, the grand jury chose not to indict an individual accused of offering to purchase a teenager's vote on a local proposal with beer.<sup>12</sup>

An extensive vote buying conspiracy has also been uncovered in southern **West Virginia**. The federal probe, which handed down its first indictment in 2003, has yielded more than a dozen guilty pleas to charges of vote buying and conspiracy in elections since the late 1980s. As this area is almost exclusively dominated by the Democratic Party, vote-buying occurred largely during primary contests.

The first phase of the probe focused on Logan County residents, where vote buying charges were brought in relation to elections in 1996, 2000, 2002 and 2004. In an extraordinary tactic, the FBI planted the former mayor of Logan City, Tom Esposito, as a candidate in a state legislative race. Esposito's cooperation led to guilty pleas from the Logan County Clerk, who pled guilty to selling his vote to Esposito in 1996,<sup>13</sup> and another man who took money from Esposito for the purpose of vote buying in 2004.<sup>14</sup>

Guilty pleas were also obtained in connection with former county sheriff Johnny Mendez, who pled guilty to buying votes in two primary elections in order to elect candidates including

himself. In 2000, with a large amount of funding from a prominent local lawyer seeking to influence a state delegate election for his wife, Mendez distributed around \$10,000 in payments to voters of \$10 to \$100. Then, in the 2004 primary, Mendez distributed around \$2,000 before his arrest.<sup>15</sup> A deputy of Mendez', the former Logan police chief, also pled guilty to a count of vote buying in 2002.<sup>16</sup>

Prosecutors focusing on neighboring Lincoln County have alleged a long-standing vote-buying conspiracy extending back to the late 1980s. The probe identified Lincoln County Circuit Clerk Greg Stowers as head of a Democratic Party faction which routinely bought votes in order to maintain office. Stowers pled guilty in December 2005 to distributing around \$7,000 to buy votes in the 2004 primary. The Lincoln County Assessor, and Stowers' longtime political ally, Jerry Allen Weaver, also pled guilty to conspiracy to buy votes.<sup>17</sup> These were accompanied by four other guilty pleas from party workers for vote buying in primaries. While most specific charges focused on vote buying in the 2004 primary, defendants also admitted buying votes as far back as the 1988, 1990, and 1992 primaries.

The leading conspirators would give party workers candidate slates and cash, which workers would then take to the polling place and use to purchase votes for amounts between \$10 and \$40 and in one instance, for liquor. Voters would be handed the slate of chosen candidates, and would then be paid upon exiting the polling place. In other cases, the elected officials in question purchased votes in exchange for non-cash rewards, including patronage positions, fixed tickets, favorable tax assessments, and home improvements.<sup>18</sup>

The West Virginia probe is ongoing, as prosecutors are scrutinizing others implicated during the proceedings so far, including a sitting state delegate, who may be under scrutiny for vote buying in a 1990 election, and one of the Lincoln county defendants who previously had vote buying charges against him dropped.<sup>19</sup>

## Nexis Search Articles Analysis

Note: The search terms used were ones agreed upon by both Job Serebrov and Tova Wang and are available upon request. A more systematic, numerical analysis of the data contained in the Nexis charts is currently being undertaken. What follows is an overview.

Recommendation: In phase 2, consultants should conduct a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## Overview of the Articles

### *Absentee Ballots*

According to press reports, absentee ballots are abused in a variety of ways:

1. Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters
2. Workers for groups and individuals have attempted to vote absentee in the names of the deceased
3. Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

### *Voter Registration Fraud*

According to press reports, the following types of allegations of voter registration fraud are most common:

1. Registering in the name of dead people
2. Fake names and other information on voter registration forms
3. Illegitimate addresses used on voter registration forms
4. Voters being tricked into registering for a particular party under false pretenses

029463

5. Destruction of voter registration forms depending on the party the voter registered with

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported on included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota and Wisconsin.

*Voter Intimidation and Suppression*

This is the area which had the most articles in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places.
- Improper demands for identification
- Poll watchers harassing voters
- Poll workers being hostile to or aggressively challenging voters
- Disproportionate police presence
- Poll watchers wearing clothes with messages that seemed intended to intimidate
- Insufficient voting machines and unmanageably long lines

Although the incidents reported on occurred everywhere, not surprisingly, many came from "battleground" states. There were several such reports out of Florida, Ohio and Pennsylvania.

*"Dead Voters and Multiple Voting"*

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations

turning out to be accurate according to investigations by the newspapers themselves, elections officials and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking of voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person taking criminal advantage of that. In total, the San Francisco Chronicle found 5 such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### *Vote Buying*

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations in three particular jurisdictions as detailed in the vote buying summary. There were more official investigations, indictments and convictions/pleas in this area. All of these cases are concentrated in the Midwest and South.

### *Deceptive Practices*

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction

of voter registration forms. There were no reports of prosecutions or any other legal proceeding.

#### *Non-citizen Voting*

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case charges were filed against ten individuals. In one case a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this nexis search, remained just allegations of noncitizen voting.

#### *Felon Voting*

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem has the large number of ineligible felons that remained on the voting list.

#### *Election Official Fraud*

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

Brennan Analysis Voter Fraud Report FINAL.doc Fed Crime Election Fraud (JS).doc

029470

Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General

By The Brennan Center for Justice at NYU School of Law and Dr. Michael McDonald of George Mason University

General

A September 15, 2005 Report submitted to the New Jersey Attorney General included lists of purportedly illegitimate votes in New Jersey in the 2004 general election, including lists of 10,969 individuals who purportedly voted twice and lists of 4,756 voters who were purportedly dead or incarcerated in November 2004. For the present Analysis of the Report, the lists of voters submitted to the New Jersey Attorney General, as well as a copy of the New Jersey county voter registration files were obtained, and an initial investigation of the report's claims was conducted. The analysis shows that the lists submitted are substantially flawed.

The Analysis is based on methodology only: its authors did not gain access to original documents related to registration or original pollbook records; only recently were copies of the counties' original registration data files acquired and compiled, which contain some notable gaps; and the lists submitted to the Attorney General contain significant errors and little documentation, which complicated the analysis. Nonetheless, the analysts say that information collected is sufficient for generally assessing the quality of evidence presented to support the September 15 report. Analysis of the suspect lists reveals that the evidence submitted does not show what it purports to show: cause for concern that there is serious risk of widespread fraud given the state of the New Jersey voter registration rolls.

These suspect lists were compiled by attempting to match the first name, last name, and birth date of persons on county voter registration files. Entries that supposedly "matched" other entries were apparently deemed to represent the same individual, voting twice. This methodology was similar to the method used in compiling the notoriously inaccurate Florida "purge lists" of suspected ineligible felons in 2000 and 2004. As Florida's experience shows, matching names and birth dates in the voter registration context can easily lead to false conclusions – as was almost certainly the case here.

This Analysis reveals several serious problems with the methodology used to compile the suspect lists that compromise the lists' practical value. For example, the data used in the Report from one county appears to be particularly suspect and anomalous, and may have substantially skewed the overall results. In addition, middle initials were ignored throughout all counties, so that "J \_\_\_\_\_ A. Smith" was presumed to be the same person as "J \_\_\_\_\_ G. Smith." Suffixes were also ignored, so that fathers and sons – like "B \_\_\_\_\_ Johnson" and "B \_\_\_\_\_ Johnson, Jr." – were said to be the same person.

Underlying many of the entries on these lists, and similar lists compiled in Florida and elsewhere, is a presumption that two records with the same name and date of birth must

029471

**Deliberative Process  
Privilege**

represent the same person. As explained in this analysis, this presumption is not consistent with basic statistical principles. Even when votes appear to have been cast in two different cities under the same name and birth date, statistics show that voter fraud is not necessarily to blame. With 3.6 million persons who voted in the 2004 election in New Jersey, the chance that some have the same name and birth date is not far-fetched.

#### Analysis of the Claim of Double Voting by 4,497 Individuals

Attempts to match data on one list to data on another list will often yield “false positives:” two records that at first appear to be a match but do not actually represent the same person. The natural incidence of “false positives” for a matching exercise of this scale – especially when, as here, conducted with relatively little attention to detail – readily explains the ostensible number of double votes.

1,803 of these 4,397 records of ostensibly illegal votes seem to be the product of a glitch in the compilation of the registration files. These records reflect two registration entries by the same person from the same address, with a notation next to each that the individual has voted. For example, 55-year-old W \_\_\_\_\_ A. Connors, living at 253 B \_\_\_\_\_ Ave. in a New York commuter suburb, is listed on the data files with an (erroneous) first registration date in 1901 and a second registration date in 1993; Mr. Connors is thus represented twice on the data files submitted. Each of these entries also indicates that W \_\_\_\_\_ A. Connors at 253 B \_\_\_\_\_ Ave voted in 2004. There is no credible indication, however, that Mr. Connors actually voted twice; indeed, given the clearly erroneous registration date on the files, it is far more likely that data error is to blame for the doubly logged vote as well.

More plausibly, the bulk of these 1,803 records may be traced to irregularities in the data processing and compilation process for one single county: the Middlesex County registration file accounts for only 10% of registered voters in the state but 78% of these alleged double votes. The suspect lists themselves contain an acknowledgment that the problem in Middlesex is probably not fraud: 99% of these Middlesex voters are labeled on the lists submitted to the Attorney General with a notation that the record is “less likely” to indicate an illegal double vote.

Another 1,257 entries of the 4,397 records probably represent similar data errors – also largely driven by a likely glitch in the Middlesex County file, which is also vastly over represented in this category. These records show ever-so-slight variations in records listed with the same date of birth at the same address: for example, the same first and last names, but different middle initials or suffixes (e.g., J \_\_\_\_\_ T. Kearns, Sr., and J \_\_\_\_\_ T. Kearns, Jr., both born the same day and living at the same address; or J \_\_\_\_\_ E. Allen and J \_\_\_\_\_ P. Allen, born the same day and living at the same address).

Approximately 800 of the entries on the list likely represent different people, with different addresses and different middle initials or suffixes. For example, W \_\_\_\_\_ S. Smith, living in a northern New Jersey town, and W \_\_\_\_\_ C. Smith, living in another town two hours away, share the same date of birth but are not the same person. Nor are

T \_\_\_\_\_ Brown, living in a New York commuter suburb, and T \_\_\_\_\_ H. Brown, Jr., living in a small town over an hour west, despite the fact that they also share the same birth date. About three-quarters of the entries in this category reveal data that affirmatively conflict – for example, a middle initial (“W \_\_\_\_\_ S.”) in one case, and a different middle initial (“W \_\_\_\_\_ C.”) in another, listed at different addresses. There is absolutely no good reason to conclude that these individuals are in fact the same, when the available evidence indicates the contrary.

For approximately 200 of the entries in this category, however, less information is available. These entries show a middle initial (“J \_\_\_\_\_ W. Davis”) in one case, and no middle initial (“J \_\_\_\_\_ Davis”) in another – again, at different addresses. The lack of the middle initial is ambiguous: it could mean that one of the J \_\_\_\_\_ Davis in question has no middle name, or it could mean that the middle initial was simply omitted in a particular registration entry. Although these entries involve less conclusive affirmative evidence of a false match than the entries noted above, there is still no good reason to believe that “J \_\_\_\_\_ W. Davis” and “J \_\_\_\_\_ Davis,” at different addresses, represent the same person.

Of the individuals remaining, there are serious concerns with the accuracy of the dates of birth. Seven voters were apparently born in January 1, 1880 – which is most likely a system default for registrations lacking date-of-birth information. For 227 voters, only the month and year of birth are listed: this means only that two voters with the same name were born in the same month and year, an unsurprising coincidence in a state of several million people.

That leaves approximately 289 votes cast under the same name and birth date – like votes cast by “P \_\_\_\_\_ S. Rosen,” born in the middle of the baby boom – but from two different addresses. It may appear strange, but there may be two P \_\_\_\_\_ S. Rosens, born on the same date in 1948 – and such coincidences are surprisingly common. For any one person, the odds of someone else having the same name and birth date is small. But because there are so many voters in New Jersey, a sizable number will have the same name and birth date simply by chance. In a group of just 23 people, it is more likely than not that two will share the same birthday. For 40 people, the probability is 90%. Many, if not most, of the 289 alleged double votes of persons registered at different addresses most likely reflect two separate individuals sharing a first name, last name, middle initial, and birth date.

The September 15 Report makes much of the raw potential for foul play based on the unsurprising fact that there are voters who appear on the New Jersey registration rolls more than once. As noted above, many of the names identified reflect two different individuals and not simply duplicate entries. But there is no doubt that there are duplicate entries on New Jersey’s registration rolls. It is well known that voter registration rolls contain “deadwood” – registration entries for individuals no longer living at a given address or deceased. There is no evidence, however, that these extra registrations are used for widespread illegal voting. Moreover, the problem of deadwood will soon be largely resolved: both the National Voter Registration Act of 1993 and the Help America

Vote Act of 2002 require states to implement several systems and procedures as of January 1, 2006, that will clean the voter rolls of duplicate or invalid entries while protecting eligible voters from unintended disfranchisement.

## The Federal Crime of Election Fraud

By Craig Donsanto

In The Federal Crime of Election Fraud, Donsanto addresses the role of the United States Department of Justice in matters of election fraud. Specifically, it answers the most frequently asked questions concerning the federal law enforcement role in election matters. Particularly, what sort of election-related conduct is potentially actionable as a federal crime, what specific statutory theories apply to frauds occurring in elections lacking federal candidates on the ballot, what federalism, procedural, and policy considerations impact on the federalization of this type of case, and how Assistant United States Attorneys should respond to this type of complaint.

Donsanto indicates that as a general rule, the federal crime of voter fraud embraces only organized efforts to corrupt of the election process itself: i.e., the registration of voters, the casting of ballots, and the tabulation and certification of election results. Moreover, this definition excludes all activities that occur in connection with the political campaigning process, unless those activities are themselves illegal under some other specific law or prosecutorial theory. This definition also excludes isolated acts of individual wrongdoing that are not part of an organized effort to corrupt the voting process. Finally, Donsanto points out that mistakes and other gaffs that inevitably occur are not included as voter fraud. Where mistakes occur on a significant enough level to potentially affect the outcome of an election, the appropriate remedy is an election contest brought by the loser seeking civil judicial redress through the appropriate state election contest process.

Along with the limits discussed above, prosecuting election fraud offenses in federal court is further complicated by the constitutional limits that are placed on federal power over the election process. The conduct of elections is primarily a state rather than a federal activity.

Donsanto lists four types of election fraud: schemes to purposely and corruptly register voters who either do not exist, or who are known by the putative defendant to be ineligible to vote under applicable state law; schemes to cast, record or fraudulently tabulate votes for voters who do not participate in the voting act at all; schemes to corrupt the voting act of voters who do participate in the voting act to a limited extent; and, schemes to knowingly prevent voters qualified voters from voting.

Donsanto lists four situations where federal prosecution is appropriate: Where the objective of the conduct is to corrupt the outcome of a federal elective contest, or where the consequential effect of the corrupt conduct impacts upon the vote count for federal office; Where the object of the scheme is to discriminate against racial, ethnic or language minority groups, the voting rights of which have been specifically protected by federal statues such as the Voting Rights Act, 42 U.S.C. section 1973 et seq.; Where federalization is required in order to redress longstanding patters of electoral fraud, either at the request of state or local authorities, or in the face of longstanding inaction by state authorities who appear to be unwilling or unable to respond under local law; and, Where

there is a factual basis to believe that fraudulent registration or voting activity is sufficiently connected to other forms of criminal activity that perusing the voter fraud angle will yield evidence useful in the prosecution of other categories of federal offense.

Donsanto lists four advantages to federal prosecution: voter fraud investigations are labor intensive. Local law enforcement agencies often lack the manpower and the financial resources to take these cases on; voter fraud matters are always politically sensitive and very high profile endeavors at the local level. Local prosecutors (who are usually themselves elected) often shy away from prosecuting them for that reason; the successful prosecution of voter fraud cases demands that critical witnesses be examined under oath before criminal charges based on their testimony are filed. Many states lack the broad grand jury process that exists in the federal system; and, the defendants in voter fraud cases are apt to be politicians - or agents of politicians - and it is often impossible for either the government or the defendant to obtain a fair trial in a case that is about politics and is tried to a locally-drawn jury. The federal court system provides for juries to be drawn from broader geographic base, thus often avoiding this problem.

Several prosecutorial theories used by United States Attorneys to federalize election frauds are discussed. These include: schemes by polling officers to violate their duty under state law to safeguard the integrity of the election process by purposefully allowing void ballots to be cast (stuffing the ballot box), or by intentionally rendering fraudulent vote tallies which can be prosecuted as civil rights violations under 18 U.S.C. sections 241 or 242; schemes to stimulate or reward voter registration by offering or giving voters things having monetary value violate the "payment for registering" clause of 42 U.S.C. section 19731(c); schemes to register voters fraudulently through providing election officials materially false information about the voter's eligibility for the franchise; and, schemes to obtain and cast ballots that are materially defective in nonfederal elections can still be prosecuted under 18 U.S.C. section 1341. There are also some other federal statutes involved in election fraud cases such as 18 U.S.C. section 597 that prohibits making expenditures for the specific purpose of stimulating voters to cast ballots for candidates seeking the federal offices of Senator, Congressman or President and 42 U.S.C. section 1973i (e) that prohibits voting more than once in elections where federal candidates are on the ballot.

Donsanto lists four questions used by prosecutors in evaluating the credibility of election complaints: does the substance of the complaint assuming it can be proven through investigation - suggest a potential crime; is the complaint sufficiently fact-specific that it provides leads for investigators to pursue; is there a federal statute that can be used to federalize the criminal activity at issue; and, is there a special federal interest in the matter that warrants federalization rather than deferral to state law enforcement.

All federal election investigations must avoid the following: non-interference in elections unless absolutely necessary to preserve evidence; interviewing voters during active voting periods; seizing official election documentation; investigative activity inside open polls; and prosecutors must adhere to 18 U.S.C. section 592, prohibiting the stationing of armed men at places where voting activity is taking place.

Finally, Donsanto indicates that election crimes based on race or language minority status are treated as civil rights matters under the Voting Rights Act.

## Major Vote Buying Cases Summary

Between 2001 and 2006, allegations and convictions for vote buying and conspiracies to buy votes were concentrated in three states: Illinois, West Virginia and Kentucky.

Deleted: of

Deleted: which have resulted in convictions on these charges a

In East St. Louis, Illinois, nine individuals, including a former city council member and the head of the local Democratic Party, Charles Powell, Jr., were convicted or pled guilty to vote buying and conspiracy to commit election fraud during the 2004 general election. The government's conspiracy case was almost entirely based on taped conversations in which the defendants discussed buying votes for \$5 and whether this would be adequate. Federal prosecutors alleged that the vote buying was financed with \$79,000 transferred from the County Democratic Party shortly before the election, although county officials have not been charged. Four defendants were convicted of purchasing or offering to purchase at least one vote directly, while Democratic Party chairman was only convicted of conspiracy.<sup>1</sup> Earlier, three precinct officials and one precinct worker pled guilty to buying votes for \$5 or \$10 in that same election.<sup>2</sup>

Eastern Kentucky has witnessed a series of vote buying cases over the last several years. The most recent revolved around Ross Harris, a Pike County political fundraiser and coal executive, and his associate Loren Glenn Turner. Harris and Turner were convicted in September 2004 of vote buying, mail fraud, and several other counts.<sup>3</sup> Prosecutors alleged Harris and Turner conspired to buy votes and provided the necessary funds in an unsuccessful 2002 bid for Pike County district judge by former State Senator Doug Hays. Harris supplied nearly \$40,000, Turner laundered the money through straw contributors, and the cash was then disbursed in the form of \$50 checks ostensibly for 'vote hauling', the legal practice of paying campaign workers to get voters to the polls which is notorious as a cover for buying votes.<sup>4</sup> Harris attempted to influence the race on behalf of Hays in order to get revenge on Hays' opponent for a personal matter.<sup>5</sup>

A grand jury initially indicted 10 individuals in connection with the Harris and Turner case, including Hays and his wife, and six campaign workers. Of the remaining defendants, only one, Tom Varney, also a witness in the Hays case, pled guilty. The others were either acquitted of vote buying charges or had vote buying charges dropped.<sup>6</sup> Prosecutors have announced that their investigation continues into others tied to Harris and may produce further indictments.

The Harris case follows a series of trials related to the 1998 Knott County Democratic primary. Between 2003 and 2004, 10 individuals were indicted on vote buying charges, including a winning candidate in those primaries, Knott County judge-executive Donnie Newsome, who was reelected in 2002. In 2004 Newsome and a supporter were sent to jail and fined. Five other

Privilege

defendants pled guilty to vote buying charges, and three were acquitted. The primary means of vote buying entailed purchasing absentee votes from elderly, infirm, illiterate or poor voters, usually for between \$50 and \$100. This resulted in an abnormally high number of absentee ballots in the primary.<sup>7</sup> Indictments relating to that same 1998 primary were also brought in 1999, when 6 individuals were indicted for buying the votes of students at a small local college. Five of those indicted were convicted or pled guilty.<sup>8</sup>

Absentee vote buying was also an issue in 2002, when federal prosecutors opened an investigation in Kentucky's Clay County after an abnormal number of absentee ballots were filed in the primary and the sheriff halted absentee voting twice over concerns.<sup>9</sup> Officials received hundreds of complaints of vote-buying during the 2002 primary, and state investigators performed follow up investigations in a number of counties, including Knott, Bell, Floyd, Pike, and Maginoff.<sup>10</sup> No indictments have been produced so far.

So far, relatively few incidents of vote-buying have been substantially identified or investigated in the 2004 election. Two instances of vote buying in local 2004 elections have been brought before a grand jury. In one, a Casey County man was indicted for purchasing votes in a local school board race with cash and whiskey.<sup>11</sup> In the second, the grand jury chose not to indict an individual accused of offering to purchase a teenager's vote on a local proposal with beer.<sup>12</sup>

An extensive vote buying conspiracy has also been uncovered in southern **West Virginia**. The federal probe, which handed down its first indictment in 2003, has yielded more than a dozen guilty pleas to charges of vote buying and conspiracy in elections since the late 1980s. As this area is almost exclusively dominated by the Democratic Party, vote-buying occurred largely during primary contests.

The first phase of the probe focused on Logan County residents, where vote buying charges were brought in relation to elections in 1996, 2000, 2002 and 2004. In an extraordinary tactic, the FBI planted the former mayor of Logan City, Tom Esposito, as a candidate in a state legislative race. Esposito's cooperation led to guilty pleas from the Logan County Clerk, who pled guilty to selling his vote to Esposito in 1996,<sup>13</sup> and another man who took money from Esposito for the purpose of vote buying in 2004.<sup>14</sup>

Guilty pleas were also obtained in connection with former county sheriff Johnny Mendez, who pled guilty to buying votes in two primary elections in order to elect candidates including

<sup>14</sup> "Logan man gets probation in vote-fraud scandal" Charleston Gazette, March 1, 2006.

himself. In 2000, with a large amount of funding from a prominent local lawyer seeking to influence a state delegate election for his wife, Mendez distributed around \$10,000 in payments to voters of \$10 to \$100. Then, in the 2004 primary, Mendez distributed around \$2,000 before his arrest.<sup>15</sup> A deputy of Mendez', the former Logan police chief, also pled guilty to a count of vote buying in 2002.<sup>16</sup>

Prosecutors focusing on neighboring Lincoln County have alleged a long-standing vote-buying conspiracy extending back to the late 1980s. The probe identified Lincoln County Circuit Clerk Greg Stowers as head of a Democratic Party faction which routinely bought votes in order to maintain office. Stowers pled guilty in December 2005 to distributing around \$7,000 to buy votes in the 2004 primary. The Lincoln County Assessor, and Stowers' longtime political ally, Jerry Allen Weaver, also pled guilty to conspiracy to buy votes.<sup>17</sup> These were accompanied by four other guilty pleas from party workers for vote buying in primaries. While most specific charges focused on vote buying in the 2004 primary, defendants also admitted buying votes as far back as the 1988, 1990, and 1992 primaries.

The leading conspirators would give party workers candidate slates and cash, which workers would then take to the polling place and use to purchase votes for amounts between \$10 and \$40 and in one instance, for liquor. Voters would be handed the slate of chosen candidates, and would then be paid upon exiting the polling place. In other cases, the elected officials in question purchased votes in exchange for non-cash rewards, including patronage positions, fixed tickets, favorable tax assessments, and home improvements.<sup>18</sup>

The West Virginia probe is ongoing, as prosecutors are scrutinizing others implicated during the proceedings so far, including a sitting state delegate, who may be under scrutiny for vote buying in a 1990 election, and one of the Lincoln county defendants who previously had vote buying charges against him dropped.<sup>19</sup>

Subject Voting Fraud - Voter Intimidation Project Working Group

Dear Nathan,

Here is the information that you requested.

Secretary Rokita was recommended by one of our consultants, Job Serebrov, to participate in the Voting Fraud - Voter Intimidation Project Working Group. This working group will last for one day and it will be held in Washington, DC. The purpose of this working group is to bring together experts and representatives of organizations that are knowledgeable about the topics of voting fraud and voter intimidation in order to foster a discussion on related issues and preliminary research.

The following are a list of the other potential participants; Barbara Arnwine, Robert Bauer, Craig Donsanto, Mark Hearne III, David Norcross, Kathy Rogers, and Barry Weinberg

We are hoping to hold this meeting in May, between the 1st and the 19th (excluding the following dates; 4, 5, 6, 7, 13, 14). Please let me know any and all of the dates that would be the most convenient for Secretary Rokita.

Best,

Devon Romig

Subject Voting Fraud - Voter Intimidation Project Working Group

Dear Nathan,

Here is the information that you requested.

Secretary Rokita was recommended by one of our consultants, Job Serebrov, to participate in the Voting Fraud - Voter Intimidation Project Working Group. This working group will last for one day and it will be held in Washington, DC. The purpose of this working group is to bring together experts and representatives of organizations that are knowledgeable about the topics of voting fraud and voter intimidation in order to foster a discussion on related issues and preliminary research.

The following are a list of the other potential participants; Barbara Arnwine, Robert Bauer, Craig Donsanto, Mark Hearne III, David Norcross, Kathy Rogers, and Barry Weinberg

We are hoping to hold this meeting in May, between the 1st and the 19th (excluding the following dates; 4, 5, 6, 7, 13, 14). Please let me know any and all of the dates that would be the most convenient for Secretary Rokita.

Best,

Devon Romig

Subject Voter Fraud/Voter Intimidation Working Group, May 18th,  
2006

Dear Meeting Participants,

Thank you for confirming your participation in the upcoming Voter Fraud/Voter Intimidation Working Group Meeting in Washington, D.C.. This meeting will take place at our office from 1:00 PM to 5:30 PM on Thursday May 18th, 2006.

The Election Assistance Commission (EAC) will cover the cost of your flight, the cost of your hotel room and provide you with a daily per diem. The cost of the airfare and the hotel stay will be paid directly by the EAC, as long as you book your travel through Adventure Travel.

To coordinate your flight and hotel stay, please contact Marvin Brokaw of Adventure Travel at (205) 444-4800, ext. 3501. Please note that the eligible dates of the hotel accommodation include the evenings on May 17th and May 18th. Once you have contacted him and you have received the itinerary via e-mail you must forward me a copy immediately so that I can complete a travel authorization form.

I have included two attachments with this email; the first attachment is a letter that contains important information that you will need to know before calling the travel agent and the second attachment provides some general information that should help you get around the city during your trip.

In addition to your travel itinerary, I will also need the following information by the close of business this Friday May 12, 2006 in order to complete your travel authorization:

Full Name:

Title:

Entity for whom you work:

Address to Which the Reimbursement Check Will Be Mailed:

Work Telephone:

Fax Number:

Social Security #: (if uncomfortable e-mailing this, feel free to call me):

Feel free to contact me with any questions.

Sincerely,

Devon Romig  
United States Election Assistance Commission  
1225 New York Ave. NW, Suite 1100

Logistics Sheet VFVI.doc

029504

U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW - Suite 1100  
Washington, DC 20005

Dear Meeting Participant:

On behalf of the entire U.S. Election Assistance Commission (EAC), I would like to thank you for agreeing to attend the Voter Fraud/Voter Intimidation Working Group Meeting on May 18th, 2006.

The EAC will pay for your roundtrip airfare and hotel, and based on your dates of travel to attend our meeting and will pay a daily per diem to cover meals not provided by EAC and incidental expenses (M&IE). Car rental costs or mileage incurred through the use of a rental car are not reimbursable, as well as costs associated with redcaps, baggage delivery, long distance telephone calls, pay per view cable, room service, laundry service, and wet bars. These charges, if used, must be borne by you at the time services were rendered. **Ground transportation (ex. metro, bus, taxi), hotel parking, airport parking, and any mileage incurred using your privately owned vehicle will be reimbursed.**

The EAC will provide hotel accommodations. If you are traveling from one of the following States than you are authorized for a two-night hotel room stay in Washington D.C.; Georgia, Indiana, Missouri, New Mexico and Texas.

The per diem rates listed below provide a guide for you to use in order to calculate your per diem for your stay. A discounted per diem rate is applicable if any travel occurs on that day. For example, if you arrive on May 17th and leave on May 18th, both of these days will be considered travel days and you will receive the discounted rate. I will provide you with a travel reimbursement form at the meeting.

The current federal per diem rates are as follows;

- Meals & Incidentals Expenses (M&IE) = \$64 per day (the discounted rate for the first and last day of travel is \$48)
- Mileage for Personally Owned Vehicle = \$ .445 per mile

If you have any questions, please do not hesitate to contact me at (202) 566-2377 or via email at [dromig@eac.gov](mailto:dromig@eac.gov).

## May 18, 2006 – EAC Meeting

### Logistics Fact Sheet

**Date:** Thursday, May 18th, 2006

**Time:** 1:00PM – 5:00PM

**Location:** U.S. Election Assistance Commission – Conference Room  
1225 New York Ave, NW, Suite 1100  
Washington, DC 20005  
Tel. (202) 566-3100

**Transportation:** **Via Metro** – take blue, orange, or red line to Metro Center; walk up to New York Ave (2 blocks from Metro – corner of New York Ave and 12<sup>th</sup> St.)  
**To EAC offices**

#### **Bus service at Metro Center:**

11Y (on 14th St.)

42 (on 11th St.)

52, 53, 54 (on 14th St.; also 54 on F St. between 11th & 14th)

66, 68 (on 11th St.)

80 (on H St.)

D1, D3, D6 (on 13th St.)

G8 (on 11th St. north of H, on H St. west of 11th)

P17, P19 (inbound on 11th St.; outbound on 13th St.)

P6 (on 11th St.)

S2, S4 (on 11th St.)

W13 (inbound on 11th St.; outbound on 13th St.)

X2 (on H St.)

#### **From Reagan National Airport:**

- take blue line Metro towards Largo Town Center; exit at Metro Center station
- taxi services available (fare will be approximately \$15-\$20)

#### **Parking:**

Parking garage available behind building on I Street, NW.

**Contact:** For more information, contact the U.S. Election Assistance Commission at (202) 566-3100.

Subject Re: working group 

I have attached the list of the working groups participants. Peggy, you may want to double check this list incase I have left anyone out.

In place of name tags we just used the tent cards for the APIA working group. This seemed to be effective because it was easier to identify the person who was speaking but we could use both.

Elle:

I think our number will be about 21 (with the Working Group members, consultants, possible EAC Commissioners and staff, and the court reporter). I'll have a better idea of the final list after I brief Commissioners tomorrow morning. Devon noted that they used only tent cards for the Asian Language Working Group. That might be sufficient for this group and would cut back on some of the work we have to do in preparation. --- Peggy

You are welcome!

Adventure Travel should send you all of your travel information once they verify the travel authorization. If you do not receive your itinerary by Monday morning please let me know.

It is a good idea to carry your travel authorization with you at the airport because occasionally (although very rarely) some of our guests have been asked to show their authorization numbers.

Let me know if you have any other questions.

Washington, DC 20005

## **Voting Fraud – Voter Intimidation Working Group Meeting Summary**

### *Overview of Current Research Project*

- Current research performed Tova Wang and Job Serebrov
  - the current research has been a challenge because of the need for the information to be collected and analyzed in a scientific manner
    - especially when working the “perception” of intimidation
- Both consultants cross-checked each others work in order to maintain a bipartisan balance
- Literature was anecdotal, not much follow-up on the articles
- No interviews with DA's and only one interview with a judge
- Absentee ballots seemed to be the biggest problem
- The articles found that most of reported vote buying is concentrated in the Midwest and the South
- Very little non-citizen voting, dead voting and impersonation was reported

### *Purpose of Current Working Group*

- To provide background information for current research
- To brainstorm for potential research ideas

### *Talking Points of Working Group*

- Discussion of value of research because of the language of section 241 of HAVA; where is the methodology?
- History of the definition of “fraud”
- Most voter fraud happens outside of the polling centers
- Research must address existing problems, not perceived problems
- Intimidation is a subset of suppression, and considered to be physical or economic threat and/or coercion
- Suppression that is not a form of intimidation is intended to interfere with voting rights and the election process without physical or economic threat and/or coercion
- Department of Justice primarily investigated individual cases of voter fraud
- Risk analysis can be used as an indicator of legitimacy for the need to allocate funding to research in the area of voter fraud
- Current statewide database list will be useful in the deterrence of voter fraud

029524

### *Ideas for Future EAC Activities*

- Bipartisan observers/poll watchers
  - Used in the collection of data
  - Used to deter fraud
- Surveys
  - Survey of state laws
    - Specific states
  - Survey of local election officials
  - Voter surveys (this suggestion was rejected by the panel)
  - Survey state election offices
  - Survey use of administrative complaint procedures
- Follow up on initial reports of fraud/intimidation from the survey of news articles
- Better poll worker training
- Longer hours for polling centers
  - Including hours on weekends
- Fewer polling center locations
  - More qualified poll workers
- Absentee balloting process
  - Methodology of “for cause” absentee voting
- Risk-analysis for voting fraud
  - Who?
  - What part of process?
    - ease of use
  - Which elections?
- Broaden scope of interviews to local officials and district attorneys
- Analysis
  - Phone logs from toll-free lines for election concerns
  - Federal observer reports
  - Local newspapers
  - State District Court Cases
  - Determination of challenging a voter at the polls (in some states there is little or no cause required to challenge a voters eligibility)
- Academic statistical research
- Search and match procedures for voter registration list maintenance and voter fraud identification (subject to confirmation)
- Election courts
- Model statutes

U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW - Suite 1100  
Washington, DC 20005

❖ Overview of EAC Research

- Poll worker recruiting, training and retention
- Management guidelines for voting systems
- Vote counting and recounting
- Provisional voting
- Voter Identification

❖ Recommendations for Future Research by Working Group Members

- Bipartisan observers/poll watchers
  - Used in the collection of data
  - Used to deter fraud
- Surveys
  - Survey of state laws
    - Specific states
  - Survey of local election officials
  - Voter surveys (this suggestion was rejected by the panel)
  - Survey state election offices
  - Survey use of administrative complaint procedures
- Follow up on initial reports of fraud/intimidation from the survey of news articles
- Absentee balloting process
  - Methodology of "for cause" absentee voting
- Risk-analysis for voting fraud
  - Who?
  - What part of process?
    - ease of use
  - Which elections?

029527

**Deliberative Process  
Privilege**

- Broaden scope of interviews to local officials and district attorneys
- Analysis
  - Phone logs from toll-free lines for election concerns
  - Federal observer reports
  - Local newspapers
- Academic statistical research
- Search and match procedures for voter registration list maintenance and voter fraud identification (subject to confirmation)
- Election courts
- Model statutes

Subject Court reporter

Peggy,

I spoke to the people who usually handle the EAC court reporting. They charge \$9.00 per page with an average of 40 pages per hour. This service would cost about \$1800.00.

The turn around time for the transcript is 10 to 15 days. The transcripts comes in a bound paper copy and an electronic copy.

029530

I can also check around for different prices.

Subject Hotel for Job

Peggy,

A possible hotel suggestion for Job might be the Sheraton College Park in Beltsville, MD. They have room availability for the nights of the 17th and the 18th for \$159.00 a night.

They have what is called the Sheraton Sweet Sleeper Bed. More information at:

[http://www.starwoodhotels.com/promotions/promo\\_landing.html?category=sweet\\_sleeper](http://www.starwoodhotels.com/promotions/promo_landing.html?category=sweet_sleeper)

This hotel is a little out of the way but the members of the Asian Language Working Group and others have stayed there. The hotel does offer a shuttle to and from Reagan airport and the metro.

Subject RE: May 18th Meeting at EAC

Hi Devon:

We have heard from Mark Hearne and Todd Rokita. They are both flying in and out on the 18th and will not need hotel rooms. We're kind of waiting to see if Perez and Rogers need rooms before booking any hotel. As soon as we get approval of Hearne and Rokita air schedules and get them booked, we'll forward their itineraries to you.

Kind Regards,  
Marvin

Hello Marvin,

I just wanted to follow up with the voicemail message that I left for you yesterday. We will be holding a meeting at our offices in Washington DC on May 18, 2006. I have informed the out of state attendees to contact you for their travel arrangements.

We have been authorized to pay for the attendees airfare and hotel arrangements. Please note that all of the participants are authorized for a two night hotel room stay, as long as the dates are May 17th and 18th.

I attached the list of the meeting participants that will be contacting you about their travel arrangements for the May 18th meeting in Washington DC.

029535

Let me know if you have any questions for me or if you need any more information from me.

Thanks for your help!

Subject DOJ Training Materials

Devon:

One of our consultants noted that there are several sections appear to be missing from the 2004 DOJ training binder. She wasn't sure if it is because of what DOJ sent over to EAC or a problem in the photocopying. From what she can see, some of the table of contents is missing and tabs 14, 15, 16, 17, 21, 23 and 26 are all empty. I think we must have provided the T of C because I don't see one in the binder. Can you please retrieve the binder and check this out for me? Thanks! --- Peggy

Tova:

I think you did send this --- or is this a revised version of one you sent earlier? It should be on the CD in the packet you should receive today.. (Can't check that right now as I am at the clinic.) If I put anything on the CD that you want to highlight at the meeting, let me know and we'll make copies for those attending.

Subject Voting Fraud/Voter Intimidation Project Working Group

Dear Tova,

I am working with Peggy Sims in order to set a date for the Voting Fraud/Voter Intimidation Project Working Group. I have been trying to reach Barbara Arnwine in order to find out which days in May she is potentially available to attend this meeting but all of my attempts have been unsuccessful.

I would appreciate any help that you could provide in this matter.

Sincerely,

Devon Romig

## Woman charged with violating election law

04/30/03

**TOM GORDON**  
News staff writer

AL

A Bullock County woman has been charged with violating Alabama election law by removing a voter's absentee ballot from her mailbox during last year's primary runoff.

A county grand jury last week issued an indictment charging Mary Sue Martin of Union Springs with hindering Lisa Calloway's right to vote. If convicted, Martin could be fined no less than \$50 nor more than \$500.

District Attorney Boyd Whigham said Martin has denied any wrongdoing and will be arraigned next week before Circuit Judge Burt Smithart.

"Taking somebody's ballot out of a mailbox is a no-no," Whigham said.

Martin was a supporter of Bullock County Commissioner Alfonsa Ellis, who faced challenger Terry Jackson in the June Democratic primary and runoff, and defeated him with the help of absentee votes.

Whigham said that during the runoff campaign, Martin removed Calloway's ballot from Calloway's mailbox, then returned it to her when Calloway confronted her. Before the grand jury, one of Calloway's neighbors testified that she saw the ballot being removed from the mailbox. A friend of Calloway's testified that she went with her to get the ballot back from Martin.

Calloway later cast the ballot in the runoff election.

Bullock County is in the eastern Black Belt, and nearly 28 percent of the votes cast in its June 4, 2002, primary elections were absentee. That percentage was the highest in the state.

## *ELECTION*Notes

*San Bernardino County, California recruiting Assistant Registrar of Voters.* San Bernardino County, Cal. is seeking an Assistant Registrar of Voters to assist with the planning, organizing, implementing, evaluating, and directing the department's election activities. Required: bachelor's degree in business or public administration or a closely related field; three years of management experience, including one year in election work. County application required. An oral examination covering management and problem and issue resolution may be required. Recruitment is open until a sufficient number of qualified applicants have applied. Salary range: \$64,730 to \$82,805. For further information (909) 387-8304, or by e-mail at [employment@hr.sbcounty.gov](mailto:employment@hr.sbcounty.gov).

NV

*Nevada legislative candidate indicted for absentee vote fraud.* An unsuccessful primary election candidate for the Nevada state legislature was indicted this month on charges related to absentee vote fraud in the November, 2002 general election. According to press reports, the indictment charges Gary Lee Horrocks, a tavern owner, with 28 counts of felony voter fraud, 31 counts of forgery, two counts of misdemeanor conspiracy, and one count of burglary. The burglary charge is based on entering a county office with the intent to commit a felony -- deliver fraudulent absentee ballots. Horrocks wife Pam, who allegedly completed absentee ballots and delivered them, was named as an unindicted co-conspirator. Horrocks was one of several candidates in the Republican primary in the 37th Assembly district. The winner of that primary, Francis Allen, lost in November to Democrat Marcus Conklin by a margin of 134 votes.

*New Jersey Election Officials get tips on activities for student poll workers.* New Jersey election officials attending the 66th annual meeting of the Election Officials Association in Atlantic City recently got ten ideas on how to use student poll workers. The suggestions: set up and break down machinery; give demo on a dummy machine; show demo chart to those in line; help senior citizens move around; bilingual students as interpreters; smile and wear an "ask me" sign; instruct voters on how to get to their correct polling place; thank people after they have voted; before election day visit senior centers and give a demonstration; and, *get the donuts*. The suggestions were offered in material distributed by Freedom's Answer, a non-profit group designed to engage young people in the political process. Doug Bailey, co-founder of Freedom's Answer, spoke at the conference.

*FEC continues disclosure exemption for Socialist Workers Party.* The Federal Election Commission (FEC) last month voted to continue to exempt the Socialist Workers Party from disclosing campaign finance information through December 31, 2008. The Socialist Workers Party was granted an exemption from disclosure provisions of the campaign finance law by a federal court in 1979. The court later extended the exemptions to 1988. The FEC has granted the exemption since that time. The FEC based its decision on evidence suggesting a reasonable probability that contributors and vendors doing business with the party could face threats, harassment, or reprisals if their names and information about them was disclosed. The FEC renewed a provision that requires SWP committees to assign a code number to each individual contributor from whom it receives contributions in excess of \$200 during a calendar year. This allows the FEC to determine whether that contributor has exceeded the contribution limits of federal law.

County clerk believes investigation could last well beyond Nov. 5 general election

Eight FBI special agents armed with a subpoena rolled into Tonopah early Monday morning and confiscated roughly 60 banker boxes containing thousands of records regarding the 2000 general election and the Sept. 3 primary election. That was viewed as good news by District Attorney Bob Beckett and County Clerk Sam Merlino.

Special Agent Daron Borst had virtually nothing to say regarding what occurred at Tonopah, or why.

"I can't say anything on this due to Dept. of Justice guidelines and other federal laws," Borst said Monday afternoon. "I cannot provide any details on this investigation. Dept. of Justice guidelines are the ones I have to go by."

Borst said he could not comment on the number of agents reported to have gone to Tonopah or why that many might be required. He did offer that the FBI prefers to send as many agents as possible on an investigation in order to conduct it quickly.

Borst said the type of investigation being conducted would not allow for information to be released to the public prior to the conclusion of it, and, "I have no idea when that's going to be."

Nor would Borst say what the FBI was looking for. "It's forbidden for me to talk about that," he said.

Nye County Clerk Sam Merlino said the agents were equally tightlipped with her, though one of them told her the investigation "specifically" addressed allegations of voter fraud. The agents, she said, were precluded from informing Merlino who it was that contacted them.

Sources said Deputy Attorney General and Nye County District Attorney candidate Brian Kunzi contacted the FBI after he was presented with allegations of voter fraud. Kunzi was not available for comment by press time. At any rate, Kunzi reportedly told several people he was compelled to contact the FBI after he received the complaints due to his status as a state prosecutor.

"They took all records from the 2000 general and the 2002 primary elections," Merlino said. "I believe they want to sift

029562

primary election, Merlino said. "Somebody they want to see through them to be sure the people who have requested absentee ballots actually exist."

Merlino said the agents arrived unannounced in four white sedans and left the county seat late Monday morning and headed back to the bureau's Las Vegas field office. The records seized included voter ballots, absentee ballots, poll books and registers, said Merlino, who was followed by all eight agents when she had to drive to the old Tonopah courthouse to retrieve records from the 2000 election that are kept in a vault.

"They were polite to us," she said. "They were all wearing black suits and driving white cars and they would not let me out of their sight. It was kind of intimidating, but there was no problem whatsoever."

While FBI officials are prohibited from talking about the investigation, Merlino indicated the inquest might not conclude anytime soon. "They said they would be back right after the (Nov. 5) general election to take those records," she said.

Merlino welcomes the FBI's involvement. "If this cleans it up and we're squeaky clean, that would be good. If they find something we'll deal with it as we're supposed to. If they don't find anything, that would be wonderful."

District Attorney Bob Beckett was also thankful the FBI has become involved. "We'll run our investigation parallel to theirs," said Beckett. "The federal government has many more resources than we do, and hopefully we'll be able to take advantage of those resources."

In the meantime, Beckett said his office has begun its investigation into allegations that Chuck Bondi and others committed perjury or entered into a conspiracy to commit perjury when they filed over 1,200 voter challenges earlier this month. Nearly 200 of those challenges were duplicates or triplicates of the same challenge.

At issue is the manner in which the challenge was mounted. The group, most who are members of Concerned Citizens for Fair Elections, signed their names to each of the written notices, swearing under penalty of perjury they physically inspected each residence they said was abandoned or otherwise not occupied by a registered voter.

More than 220 of the challenges were improper, and several of the signers testified in court last week they did not actually inspect the suspect voter residence.

Of decidedly more importance is the issue of the more than 850 voter registrations that were cancelled due to listing a PO box as the voter's physical address. Such listings are illegal in Nevada and last week Fifth District Judge Robert Lane ordered them expunged from the rolls until and if the voter corrects the defect in his or her registration.

While the figures continue to be studied, a preliminary count conducted by the district attorney's office concluded 232 of the 1,045 voters challenged (minus the 198 duplicates) participated in the Sept. 3 primary. Of those, 141 who voted were subsequently cancelled last week. Those 141 will be

029563

10/24/2002 12:23 PM

precluded from voting Nov. 5 if they fail to correct any defects listed on their voter registration. The method under which they voted, whether via absentee, early or on election day, has not been determined though those numbers would likely be crunched later this week.

Illegal registrations can be remedied in writing or by providing proof the voter has a physical address in Nye County when they go to the polls.

By 8 a.m. Tuesday, the second day of early voting, election board Chairwoman Kay Floyd said five voters who had been impacted had taken advantage of the opportunity to properly register.

In a Las Vegas Review-Journal article on the subject in Tuesday's edition, the writer quoted unnamed sources as saying they were upset with the results of the Sept. 3 primary. Specifically mentioned was the fact incumbent Sheriff Wade Lieseke was losing badly to challenger Tony DeMeo until absentee ballots were counted and those totals "swayed the race (Lieseke's) way."

Lieseke prevailed over challenger Doug Richards in a similar fashion in 1998. Not mentioned is the fact that Lieseke also pulled majority numbers in early voting in both races as well. DeMeo garnered 2,313 votes to Lieseke's 2,184 in the primary. During early voting held in late August, Lieseke received 779 votes to DeMeo's 565 and Lieseke earned nearly one hundred more votes in absentee voting, 223 to 128 cast for DeMeo.

On FOX 5 News on Tuesday morning, a newscaster said "dead" people were voting in Nye County. She did not mention the source of that information.

There is no evidence to support the allegation, said Merlino, adding, "This is getting out of hand."

### DA says jury out on probe of voting

Albany-- Clyne awaiting final tally before deciding whether to launch investigation of allegations

By CATHY WOODRUFF, Staff writer  
First published: Wednesday, March 10, 2004

Albany County District Attorney Paul Clyne is weighing whether to investigate alleged voting irregularities in last week's special primaries for the County Legislature but won't decide until all the ballots are counted.

"At this point, I don't have a specific complaint," Clyne said. "So, I'm going to wait until the dust settles at the Board of Elections," Clyne said.

County elections officials are scheduled to begin counting hundreds of controversial absentee ballots today.

Concerns about the handling of absentee ballots in some legislative districts emerged a few days before the March 2 voting when it was revealed that Third Ward Democratic Leader Jamie Gilkey had filled in more than 140 signed absentee ballot applications with instructions that the ballots be released to him.

In one case, Gilkey acknowledged crossing out the mailing address written in by one voter and replacing it with his own. He said he was worried about proper delivery and handling of the ballots by the elections board staff.

More concerns were raised on primary day, when elections officials found that at least 40 voters had been assigned to the wrong legislative district and polling place. As a result, as many as 10 people apparently cast votes in the wrong legislative contest.

The state Board of Elections has begun investigating one complaint related to Albany's Democratic primaries, said a spokesman for the board, who declined to reveal the specific allegations or the person who submitted the complaint.

Albany County Legislator Wanda Willingham is the Democratic incumbent for District 3 in Albany's Arbor Hill, where many of the alleged irregularities occurred. She is locked in a close race with challenger Jestin Williams, who has Gilkey's support.

Willingham said she expects to submit complaints to both Clyne and the state Board of Elections regarding the primary, but she will wait for more counting to be done.

"We're just working on making sure we file the right papers and make the complaint as complete as possible," she said.

Albany County's election commissioners and their staff began canvassing machines used in last week's voting, which also included a Democratic presidential primary, on Monday.

Willingham and two other candidates -- Ward DeWitt in District 4 and Lucille McKnight in District 2 -- secured a court order Friday impounding all the voting machines and paper ballots used by voters in

### Ballot count may end, but not fight

Albany-- Possible losers in county primaries vow to stay in general election

By MICHELE MORGAN BOLTON, Staff reports  
First published: Friday, March 12, 2004

Incumbent Wanda Willingham was 15 votes ahead of challenger Jestin Williams Thursday as elections officials pored over absentee ballots from the County Legislature's controversial primary.

But the final tally is still unclear in the District 3 race, where ballots have been plagued by missing signatures, bad addresses and what some consider a questionable effort by Third Ward leader Jamie Gilkey to have 140 of them set aside for personal distribution.

Albany County Board of Elections commissioners Michael Monescalchi and John Graziano Sr. will examine an additional 117 contested District 3 ballots at 3 p.m. today

After they rule on whether the ballots should be opened, a state Supreme Court judge will decide on those that remain in dispute.

Willingham said the number of irregularities could be an indicator that "something went on."

"That remains to be seen in the end," she said. "Will it cost me the primary? It's quite possible, but not the general election."

She was temporarily ahead at 228 votes to Williams' 213 votes.

Paul DerOhannesian, who represents Willingham, said some District 3 residents received ballots with the wrong candidates listed.

Other ballots were sent to people who had never registered to vote. And on and on, he said.

"Every voter in this district should be concerned," he said, indicating that Gilkey seemed to be involved in many of the irregularities.

"What we have here is an effort to keep people from being able to vote because they think they'll lose the election," Gilkey replied, denying any wrongdoing.

"I'm not judge and jury," Williams added. "But now is the time to protect the senior citizens' right to vote."

Williams' attorney, Joshua Ehrlich, called the objections an effort to exclude elderly and disabled people.

On Wednesday, it appeared that Marilyn Hammond had defeated incumbent Lucille McKnight in the Democratic primary for a South End seat, but McKnight vowed to keep running on another ballot line.

With 20 absentee ballots for District 2 still sealed due to objections by McKnight, Hammond is ahead

### Ballot dispute heads into court

Albany-- Justice to hear testimony on disputed Democratic primaries

By CATHY WOODRUFF, Staff writer  
First published: Wednesday, March 17, 2004

A hearing on scores of disputed absentee ballots that could expose operations at the Albany County Board of Elections to intense public scrutiny is scheduled to begin this morning before state Supreme Court Justice Joseph Teresi.

Teresi is being asked to decide whether some 162 absentee ballots cast in three Albany Democratic primaries for County Legislature should be opened and counted -- or whether their distribution and completion was so flawed that they should be thrown out.

Democratic Elections Commissioner Michael Monescalchi and voters who have complained about the handling of their ballots are among the witnesses expected to testify.

FEATURED ADVERTISER

Allegations of irregularities abound concerning absentee ballots issued for the March 2 primary. Most of the objections center on ballot applications and ballots distributed by 3rd Ward Democratic Leader Jamie Gilkey and two associates.

Everybody Likes ...  
ALL NEW '04 FORD FREESTAR  
Designed to meet the needs of your world  
- Learn more -

One complaint already made public is from a voter whose ballot application was altered by Gilkey, who replaced her mailing address with instructions that her ballot be given to him. After receiving a complaint from the woman, the board issued a new ballot for her.

In another case, a voter whose ballot was released to Gilkey said a man brought both an application and a ballot to his home at the same time. The board is supposed to issue a ballot only after receiving a valid application.

In his complaint, the voter also said the man tried to leave with his signed ballot envelope without allowing him to vote.

Allegations concerning the ballots Teresi now is being asked to decide include:

Reasons listed for needing the ballots were insufficient and weren't properly scrutinized by the board. Among the reasons given were: "senior citizen, not mobile," and "single mother with child."

There are no applications on file for some ballots returned.

Signatures on ballot envelopes or applications don't match others on file with the board.

Ballot envelopes with signatures of people who say they did not vote.

A proposed settlement that could have averted a hearing and called a new election in District 3 between incumbent Wanda Willingham and Jestin Williams fell apart Tuesday, according to sources close to the candidates and their attorneys.

with the best listings in the Capital Region

029569

Williams wants the 115 unopened ballots counted. The current vote totals show Willingham leading by 15 votes over Williams, 228-213.

Joshua Ehrlich, the attorney for Williams and leading candidates Marilyn Hammond in District 2 and Virginia Maffia-Tobler in District 4, said he will ask the judge today to accept the results as they stand in Districts 2 and 4 without the disputed absentees.

There are not enough uncounted ballots in those districts to change the results.

### Jurist hears of ballot handoff

Albany— Democratic ward leader, candidate testify about absentee voting arrangements

By CATHY WOODRUFF, Staff writer

First published: Thursday, March 18, 2004

Third Ward Democratic Leader Jamie Gilkey testified Wednesday that he was the point man for a network of campaign workers who channeled absentee voting applications and ballots for the March 2 Albany County Legislature primary through him to the Board of Elections.

Gilkey said his responsibilities included filling in reasons why voters could not get to the polls and writing instructions that the ballots be released to him by the elections board staff.

He was unable to say, however, whether the voters knew in all cases that he was completing their applications or that their ballots had been designated for pickup by him.

"They were told that, if they were all right with it, we could get the ballots for them," Gilkey said. The option for voters to have the ballots mailed to them "did come up sometimes, but it was not a part of the usual conversation," he added.

Gilkey and Jestin Williams, who is challenging incumbent District 3 Legislator Wanda Willingham, outlined the system during testimony before state Supreme Court Justice Joseph Teresi. The judge is being asked to determine whether some 162 disputed absentee ballots in three Democratic primaries for the Albany County Legislature should be counted.

Testimony is expected to continue today, with lawyers saying it may be necessary for proceedings to move to the homes of some disabled absentee voters to obtain their testimony.

In his testimony Wednesday, Gilkey said that when he did not collect applications personally he relied on oral reports from those who visited the voters and on notes placed on the forms to determine the reasons why absentee ballots were needed.

Williams said he and supporters, including Common Council Member Michael Brown and Gilkey, agreed on the absentee ballot process during a campaign meeting. He and Gilkey have described the strategy as an effort to counteract what they allege were forgeries of ballots in a race against Willingham just over four years ago.

"Mr. Gilkey wanted the ballots to come back to him, because we were talking about trying to protect people's rights to the absentee ballot box," Williams testified. "The absentees I received, I trusted Mr. Gilkey and his honesty. We agreed that the ward leader would be responsible."

Wednesday's testimony was the latest twist in a hotly contested special election ordered by federal courts earlier this year to correct district lines that shortchanged minority voters.

The District 3 race, where Willingham now leads Williams by 15 votes -- with 115 disputed absentee ballots still unopened -- is the closest and most fiercely fought race. But testimony Wednesday pointing to widespread voting irregularities also could also call into question the integrity of balloting in

Districts 2 and 4.

Albany County Democratic Elections Commissioner Michael Monescalchi testified the board has no formal policies for evaluating applications and determining whether ballots should be issued.

"Any employee working in the front office is authorized to review an application for an absentee ballot and issue a ballot if they believe it complies with New York State Election Law," he said.

When asked by attorney Paul DerOhannesian whether he considered some reasons given on applications to be legally sufficient, he said: "The staff made a decision to issue the ballot and I stand by it."

Also on Wednesday, voters Bernard Bryan and Lasone Garland-Bryan testified that they learned after voting that they had been directed to the wrong polling place and voted in the wrong primary.

A poll watcher for the Willingham campaign testified that one machine at School 20 was improperly set up, listing candidates from two different districts.

Second Street resident Ashley Perez testified he was persuaded to vote by absentee for the sake of convenience by a group of visitors that included Williams and said he later regretted the decision.

He also said the reason listed on his application for needing a ballot -- "working during the hours the polls are open" -- was not written by him and is inaccurate. "I am unemployed," he said.

Perez said the application, ballot envelope and ballot all were produced during the same visit. That account raises another issue for Teresi to consider because the Board of Elections is not supposed to issue absentee ballots without an approved application.

Williams later testified that he has never met Perez and did not visit his apartment.

### Court hits road in voting dispute

Albany-- Justice Teresi to visit homebound residents for testimony on contested absentee ballots

By CATHY WOODRUFF, Staff writer  
First published: Friday, March 19, 2004

State Supreme Court Justice Joseph Teresi is scheduled to bring his court to the kitchens and living rooms of homebound voters today hear their testimony about how and why they cast absentee ballots in the March 2 Democratic primary for Albany County Legislature.

Stops are planned for this afternoon at one home in Albany's South End and three in Arbor Hill to help Teresi determine whether some 162 absentee ballots cast in three Albany Democratic primaries for County Legislature should be opened and counted.

Three candidates -- incumbents Wanda Willingham and Lucille McKnight and Ward DeWitt -- are contesting the ballots, many of which were distributed by Third Ward Democratic leader Jamie Gilkey and associates including city Common Council President Pro Tempore Michael Brown.

Gilkey has acknowledged filling in much of the information written on scores of ballot applications after they were signed by the voters, including instructions that the ballots be released to him.

Candidate Jestin Williams, a political ally of Gilkey who trails Willingham in District 3 by 15 votes, is adamant that the 115 unopened ballots in that district should be opened and counted.

Several voters called to testify on Thursday were unclear about how their ballot applications were filled out after they signed them and other details about their ballots. And in his own testimony, Gilkey acknowledged that, in several instances, he did not have authorization from the voters to pick up their ballots.

He described the absentee voter application drive that he and others with the Williams campaign conceived as the most ambitious effort he's been involved in in several years as a ward leader.

He said the idea was to counteract potential delays at the county Board of Elections and to prevent ballots traditionally entrusted to 12th Ward Leader Joe Jennings, the brother of Mayor Jerry Jennings, from being "flipped" by an opposing campaign.

Phillip Moore, proprietor of the Silver Slipper tavern on Henry Johnson Boulevard, testified that he signed an absentee ballot application after he was approached by Brown, the council leader, because he's busy and he had a dental appointment on March 2.

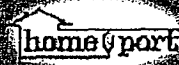

Despite instructions on his application that the ballot be released to Gilkey, Moore said he never asked for that.

Another voter testified that she recalled signing an application brought to her by Williams and recognized her signature on an absentee ballot envelope, but does not remember marking a ballot.

Another voter said he and his relatives all filled out absentee applications when Gilkey and Brown came to their house, but it was unclear whether the reasons written on the forms for needing absentees were sufficient to meet legal standards.

While the absentee plan was formulated by the Williams campaign team in District 3, Gilkey said the strategy also was used to a lesser degree in District 2, where Marilyn Hammond is running against incumbent legislator Lucille McKnight. Gilkey is the campaign manager for both Williams and Hammond.

He said he expressed doubts about the board's ability to deal with absentee ballots when he visited Deborah Williams-Muhammad, a longtime absentee voter who already had a permanent application on file with the Board of Elections.

"We knew she was on the (permanent absentee) list, and we wanted to see if we could expedite getting that ballot to her," he testified. "We said we did not know how things were going to work with the special election, so she might want to fill out another application to make sure she would get her ballot."

Gilkey acknowledged that he crossed out Williams-Muhammad's mailing instructions without her permission and, instead, wrote his own name and address because "we were not certain how the Board of Elections was going to handle people whose absentee ballots were normally mailed."

### Vote to end ballot crisis

Albany -- Judge orders new District 3 primary after election dispute

By CATHY WOODRUFF, Staff writer  
First published: Saturday, March 20, 2004

It will take a special election to settle a dispute over a special election for the Albany County Legislature.

Two candidates who vied in a March 2 special Democratic primary in District 3, which covers parts of Arbor Hill, downtown and North Albany, will face off again on April 8.

Under the settlement reached Friday by the candidates in three Democratic primaries, in which scores of contested absentee ballots remain unopened, the current leaders in two other legislative districts will be certified as winners without counting the absentee ballots.

[Learn more](#)

The agreement came as state Supreme Court Justice Joseph Teresi was about to hear a third day of testimony that would have taken him to the residences of four homebound voters. They were to testify about their absentee ballot experiences in the weeks leading up to the March 2 special primary.

The deal also came after hours of testimony embarrassing to the city Democratic organization. The testimony linked city party leaders, including Common Council President Pro Tempore Michael Brown, to a campaign that diverted almost 150 signed absentee ballot applications to 3rd Ward Leader Jamie Gilkey. He would then complete and submit them to the Board of Elections.

Under the agreement outlined by attorneys for the candidates and approved by Teresi, there will be a new District 3 primary between incumbent Wanda Willingham and challenger Jestin Williams. Willingham led Williams 228-213 and had challenged about 115 absentee ballots collected by Gilkey and others involved in Williams' campaign.

The primary will be run with enhanced security, including sheriff's deputies at each of nine polling places, and strict limits on the use of absentee ballots.

The settlement lets stand the results in District 2, where challenger Marilyn Hammond defeated incumbent Lucille McKnight, 244-215, and in District 4, where incumbent Virginia Maffia-Tobler won over Ward DeWitt, 218-168.

McKnight and DeWitt had challenged several absentee ballots, but there were not enough unopened ballots in either election to change the results.

But the candidates in Districts 2 and 4 will meet again in a special election on April 27 for all 39 seats in the County Legislature. McKnight is running on the Working Families Party line, and DeWitt has the Republican line.

Williams and Willingham both said they were satisfied with Friday's settlement, even though it will put them through yet another compressed primary campaign and election.

029575

Willingham said it was worth letting go of her potentially winning lead in the March 2 primary count to reveal such a systematic abuse of absentee ballots.

"The exposure of the absentee ballot process was critical for my community," she said. "That was an age-old process. Never again."

Williams, who had been adamant that he wanted the challenged absentee ballots counted, said he's reassured by the agreement to have a police presence at all the polling places and limits on the number of poll watchers to help keep order. Tensions between the two campaigns boiled over at one polling place during voting March 2.

"I think it's for the common good of the community," he said of the settlement.

Attorneys Joshua Ehrlich -- who represented Williams, Maffia-Tobler and Hammond -- and Paul DerOhannesian -- who represented Willingham, DeWitt and McKnight -- spent much of Friday morning in settlement talks.

The settlement is the latest chapter in the hotly contested special election in new districts created after the 2000 census. Last November's election was postponed amid a court battle over the original district lines drawn by the Albany County Legislature, which shortchanged minority voters. Federal judges ordered the special March primary and special election next month based on a new map.

DerOhannesian, who also represents two civil rights groups that sued the county in the redistricting case, called the revelations in the absentee balloting dispute "further proof of what was proven in federal court. This county has a history of violating minority rights and the rights of all voters."

He described the March 2 primary as "contaminated, corrupted and compromised," undermining the gains in minority voting strength that the redistricting was intended to achieve.

It is unclear whether Gilkey and others involved in the absentee ballot irregularities will face criminal charges as a result of their actions. District Attorney Paul Clyne, who previously said he would wait for the issues to be cleared at the Board of Elections, was unavailable for comment.

**SECTION:** LIFESTYLE, Pg.A-9**LENGTH:** 755 words**HEADLINE:** FAX-THE-VOTE PLAN BRINGS MANY UNHAPPY RETURNS**BODY:**

Somewhere en route to becoming the villain of the week, Pat Williams put out a bid to collect and transmit the votes of Americans overseas — primarily members of the military, but also citizens living abroad in places the mails don't always reach. Think of Antarctica, Afghanistan and the sands of Iraq.

The idea was simple enough: military and other overseas voters from Missouri and North Dakota could send their requests for absentee ballots either by e-mail, or more likely fax, to Williams' Omega Technologies, in Alexandria, Va. Omega would, in turn, fax those requests to elections offices in those two states, with which it has contracts.

The elections offices would ship the ballots to the voters, who would fill them out and scan them into an e-mail or a paperless fax that would go to Omega's computers. Omega would check the cover sheet and route the ballots in the form of faxes to the elections offices and, it is to be hoped, democracy would be served.

In the spring, Missouri received 22 ballots in this fashion. The rest came by regular mail.

Since that time, Williams has been painted as a Republican operative and a general threat to the republic. She has been accused of subverting the secret ballot and opening the door to election theft on the scale of a Ferdinand Marcos.

"I'm a citizen as well," Williams protested. "I'm a veteran as well." These claims are, of course, a thin defense in an age when veterans put up TV ads attacking one another's service in combat. But Williams, whose own e-mail account recently filled up with hate mail, would like the world to know that she has no plans to steal the election.

Her problems began when the suspicious noticed that Williams had donated more than \$6,000 to the Republican Congressional Campaign Committee — not a terribly impolitic move for a business that bids on government contracts in a town run by Tom DeLay. Initial accounts overlooked the fact that she had also worked as a volunteer and donor in the presidential campaign of Democrat Wesley Clark.

A graduate of Tuskegee Institute, Williams joined the Army straight out of school, worked her way up the ranks into an Army think tank, then retired in 1996 after arthritis overtook her.

"I resent it to my soul when people say I would commit a felony to manipulate the vote," she said.

Such alarms went off because the service members who send their ballots this way must sign a form waiving their rights to a secret ballot, because a faxed ballot is signed to prevent fraud, and someone has to check that signature. The most likely viewer will be the person at the end of the fax machine in Missouri, said Terri Duidaller, a spokeswoman for the elections department there.

She also notes that Article 8, Section 3 of the Missouri Constitution requires that elections workers be sworn not to disclose how any voter voted.

The outcry against Williams also ignores the fact that under the current system, all 50 states will take faxed ballots that also must be signed and witnessed. It just happens that two — Missouri and North Dakota — work directly with Omega to process the ballot requests.

"It is always suggested first and foremost — mail your ballot. The government has never said, 'We want you to send your ballot through this program,'" Williams said.

029578

## FAX-THE-VOTE PLAN BRINGS MANY UNHAPPY RETURNS Pittsburgh Post-Gazette (P

Of the 22 service members who sent their ballots through the Williams program this spring, Williams saw none of them.

"The process is completely electronic. I don't get any hard copy. It is computer-to-computer, talking, receiving the information," Williams said.

Elections can, of course, be stolen. Legend has it that many years ago, in Westmoreland County, some ballot boxes had false bottoms and unfriendly votes simply fell into a basement room for immediate replacement. In other places, boards have been known to simply issue a fraudulent count. Doubtless some unease over the spectacle in Florida four years ago, where the head of the Bush campaign was also the person who conveniently certified the disputed Palm Beach count, has a few folks nervous.

Then again, technology is often scary to people who easily forget that the same outlet that can electrocute someone can also provide current to a heart-lung machine. It's a matter of how we use it. That's what Pat Williams was thinking.

"It was simple. It was secure. It was practical," she said.

It was also new, and that's why her e-mail is filling up with stuff she'd rather not count just now.

## Ruling ends vote practice

By Glenn May  
TRIBUNE-REVIEW  
Wednesday, March 10, 2004

-  [Subscribe to this paper](#)
-  [Larger / Smaller Text](#)

Able-bodied voters casting absentee ballots either must hand-deliver or mail the ballots themselves, the state Supreme Court has ruled.

The decision Monday ends a longtime Allegheny County practice of allowing third parties to gather and deliver the ballots to elections officers.

Disabled or handicapped voters still can have third parties deliver their ballots.

The ruling doesn't change the outcome of the Nov. 4 whisker-thin loss by Westmoreland County Common Pleas Judge John Driscoll for state Superior Court. In fact, the decision took votes away from Driscoll, a Democrat.

The state's highest court invalidated 56 absentee ballot votes cast in Allegheny County in the Nov. 4 election. The 6-0 decision issued Monday unlikely will reverse the outcome of any other races here, officials said.

Several Democrats said the Supreme Court's decision could erect hurdles to voting. Republican officials said the 6-0 ruling closes a potential avenue for election fraud.

"It's a break with tradition that will have effects far beyond this decision," said Lawrence Tabas, the lawyer for state Superior Court Judge Susan P. Gantman, who defeated Driscoll in November. Gantman, a Republican, is a party in the case.

Supreme Court Justice Ronald D. Castille wrote in the court's decision that state election law clearly requires absentee voters to either hand-deliver their own ballots or to mail them to elections officials.

"Our precedent is clear," Castille wrote. "We cannot simply ignore substantive provisions of the elections code."

Allegheny County Elections Director Mark Wolosik did not return telephone calls for comment yesterday.

The dispute stems from an Oct. 27 decision by the Allegheny County Board of Elections to continue to allow third parties to deliver absentee ballots for the Nov. 4 general election.

Before the election, John Pierce and Thomas Stepnick -- last fall's GOP candidates for county treasurer and register of wills -- asked the U.S. District Court in Pittsburgh to halt the practice. U.S. District Judge Joy Flowers Conti determined that the issue should be decided in a state court.

029581

Allegheny County elections officials eventually determined that 56 absentee ballots in the November election had been delivered by third parties.

Pierce and Stepnick filed a lawsuit after the election, asking the Allegheny County Court of Common Pleas to review the validity of the absentee ballot-delivery system. Gantman later joined in the lawsuit.

Allegheny County Judge Joseph James upheld the practice, and Pennsylvania Commonwealth Court affirmed his decision. Pierce, Stepnick and Gantman appealed to the state's top court.

Although the Allegheny County Elections Board might have wanted to encourage more people to vote by allowing third-party deliveries, Castille wrote, the practice is "more likely to invite, rather to remedy, fraud."

Clifford Levine, lawyer for the Democratic State Committee, said no allegations of fraud ever were made over the 56 ballots.

He said the third-party delivery system in Allegheny County had made it easier for people to vote.

"We think it's best for democracy when eligible voters are allowed to vote," Levine said.

Richard Stampahar, chairman of the Republican Committee of Allegheny County, said it used to be common to see Democrat activists carrying bundles of ballots for delivery at election time. He said the practice encouraged fraud.

Stampahar said the Supreme Court decision means Allegheny County will end a tradition long since abandoned in other counties in the state.

Tom Flaherty, chairman of the Allegheny County Democratic Committee, said third-party delivery has been used since before he became politically active more than 25 years ago. He said the deliveries were handled by self-motivated activists and were not party strategy.

Flaherty said it is hard to understand why a voter can mail a ballot but isn't allowed to have someone else deliver it. Still, he said, the local party will abide by the ruling.

Ken Snyder, spokesman for Democratic State Committee Chairman T.J. Rooney, and Dan Hayward, executive director of the Republican State Committee, both said their parties mail absentee ballots to voters, but voters are told to mail or deliver them personally to county elections offices.

Flaherty said the number of ballots delivered by third parties is usually too small to change the outcomes of races.

Gantman defeated Driscoll by 28 votes for the state Superior Court seat.

Tabas said most of the 56 challenged ballots favored Driscoll. Since the Supreme Court invalidated the 56 ballots, Gantman's 1,125,543 to 1,125,515 margin of victory will grow slightly.

Pierce lost by about 65,000 votes; Stepnick lost his race by more than 75,000 votes.

An author on a book about Pennsylvania election law, Tabas said the ruling is another step toward ensuring election practices do not differ from county to county.

029583

"A court sitting in Westmoreland County may not interpret a statute differently than a court in Dauphin County," he said.

The decision voids the absentee ballots of some prominent Allegheny County residents, including U.S. Attorney Mary Beth Buchanan; U.S. Rep. Melissa Hart, R-Bradford Woods; and Elsie Hillman, a prominent GOP power broker.

## Judge to hear arguments in election case

PA

**Top Stories**

A HEARING IS SCHEDULED MONDAY REGARDING THE CLARION COUNTY DISTRICT JUSTICE CONTEST BETWEEN NANCY KADUNCE AND DUANE QUINN.

**Sports**

**News-Herald**

CLARION - A visiting judge will hear arguments Monday concerning legal challenges in the election involving a Clarion County district justice position.

**Clarion-News**

**Good Times**

Judge Carson Brown has been appointed to preside over a 9 a.m. hearing scheduled in response to motions filed by Nancy Kadunce and Duane Quinn.

**Local Classifieds**

**Submit A Classified Ad**

Quinn, the Republican candidate who currently holds the office, was declared the winner by eight votes over Democratic opponent Nancy Kadunce in the Nov. 4 general election.

**Contact Information**

Kadunce has requested a recount of all ballot boxes in the district as well as the disqualification of more than 100 absentee ballots.

She claims in court papers there is a substantial risk of absentee ballot fraud due to the election board's practice of allowing third-party delivery of the ballots.

Quinn has filed documents asking the judge to dismiss Kadunce's

requests.

The election board's certified results showed Quinn with 1,508 votes to Kadunce's 1,500.

Clarion County Judge James Arner and Senior Judge Charles R. Alexander had recused themselves from the matter.

Quinn, of Fisher, has served as district justice since his appointment in 2001. The post serves Sligo Borough and Farmington, Highland, Knox, Millcreek, Monroe, Paint, Piney and Washington townships.

Kadunce, a resident of Highland Township, served as judicial administrative assistant for the district justice office from 1976 until her resignation earlier this year in order to run for the post.

## Vote drive worker charged in forgery

By DAVID KRANZ  
Argus Leader

published: 10/19/2002

A Rapid City man working for a Native American voter registration drive has been charged with five counts of forgery related to documents submitted under the program.

Lyle Nichols, 45, was arrested Friday and probably will be arraigned Monday, said De Glasgow, chief deputy sheriff for Pennington County.

This is the first arrest arising from recent allegations of voter fraud in and around Native American reservations in South Dakota. Auditors in several West River counties have reported suspicious cases in which documents were submitted in the names of people who were deceased or too young to vote.

Most of the suspected misdeeds focus on a Flandreau woman who formerly worked as an independent contractor for a registration program backed by the Democratic Party.

The Native American Voter Education and Registration Project paid Nichols \$3 for each completed registration. He allegedly forged some names, Glasgow said.

Officials said Nichols turned in 226 registration cards, most of which were fraudulent.

Workers at the Pennington County Auditor's office called the sheriff's department after noticing discrepancies in several forms. In one case, they received a voter registration form for a man who had already registered. But the signature and other information on the new form did not match the old one.

"It looks like what he was doing was pulling names out of the phone book or newspaper," said Pennington County Sheriff Don Holloway. "There were at least two people that were deceased."

Nichols also had worked briefly for the state Democratic Party as an independent contractor, according to its spokeswoman, Sarah Feinberg.

"I am told he worked four hours with the South Dakota Democratic Party in September," she said. "He passed out literature and registered four new voters. We paid him \$46. Those registrations are not the ones that are in question."

Two of the registrations Nichols submitted to the Democrats were duplicates that were not sent to the auditor or turned over to authorities.

"We found it in our system that they were already registered. It is not uncommon to have someone think they are not registered and then register again," Feinberg said.

Nichols' brother also was questioned in connection with the situation, but there was no indication of wrongdoing, officials said.

029580

The South Dakota Republican Party issued a statement late Friday applauding the charges in Pennington County.

The statement, which was not attributed to an individual Republican official, said voter fraud needs to be investigated thoroughly in the state.

"Those found responsible should be prosecuted to the fullest extent of the law," the statement said.

The attorney general's office is working in conjunction with federal law enforcement officials to determine the extent of the problem.

The Flandreau woman, Becky Red Earth-Villeda, also known by her Dakota name, Maka Duta, is suspected of falsifying voter-registration and absentee-ballot documents. She has denied any wrongdoing.

Attorney General Mark Barnett has said Democratic Party officials have cooperated with the investigation into Red Earth-Villeda's case. The party terminated its relationship with Red Earth-Villeda and is not implicated in the case.

The Native American Voter Education and Registration Project is an effort by the United Sioux Tribes. It began in late August with the help of a \$200,000 grant from the Bauman Foundation in Washington, D.C.

Clarence Skye, executive director of United Sioux Tribes, estimates there are 28,000 Native Americans of voting age in South Dakota.

Twenty-one people are part of the effort, canvassing both reservations and off-reservation communities, Skye said. He said workers have registered 5,166 new voters in Rapid City alone, where the last census showed 15,000 Indians.

The Native American Voter Education and Registration Project also is encouraging county officials to provide more polling places on reservations, Skye said. Many Indians do not vote because they cannot get to polls that often are 30 to 40 miles away, he said.

"A lot of our Indian people on the reservations don't have vehicles. We don't have good voter turnout because of distances and lack of transportation," Skye said.

Plans are in the works to hire people to drive Indian voters to the polls, Skye said. A California foundation is being asked to help fund that effort, he said. Some Indians don't vote because they prefer to remain anonymous, Skye said.

"Many people on the reservations feel that if they register to vote, then the government's going to be after them for something. It's kind of a paranoia.

They're afraid the Internal Revenue Service or somebody else will show up at their door and harass them," he said.

Skye insists it is not apathy that keeps many Indians from voting.

"I haven't seen where they don't care," he said.

**Some S.D. counties list more voters than adults  
Dewey, Ziebach among 26 counties showing surplus**

By Carson Walker  
Associated Press Writer

SIOUX FALLS - Most South Dakota counties have more adults than registered voters.

But in 26 counties - more than a third of the state's 66 - the voters outnumber people 18 and over, according to a comparison of 2001 census estimates and the latest voter registration numbers.

"People who move away but still use that as a residence to vote - that explains some of the difference," said Kea Warne, election supervisor in the Secretary of State's office.

Of all counties, big or small, Dewey County shows 470 more registered voters than adults. The census estimates its population in 2001 as 3,696. Its voter registration list as of Thursday was 4,166.

Ziebach County also has 226 more registered voters than people 18 and older, according to the numbers.

Dewey and Ziebach are two of several counties where state and federal investigators are looking into allegations of voter registration and absentee ballot fraud.

But several other counties without large American Indian populations also appear to have more voters than people, according to the numbers.

Some counties might appear to lose registered voters because auditors can now more easily eliminate duplicate names, Warne said.

## Fraud cases cloud S.D. elections

By DAVID KRANZ, CORRINE OLSON and PETER HARRIMAN  
Argus Leader

published: 10/20/2002

### 10 counties review questionable voter records; observers speculate about effect on Nov. 5

When Harding County Auditor Kathy Glines sifts through voter registration cards each election year, she usually can tell when something isn't right.

She knows, for instance, that among the 17 new registrations her office has received this year are several high school seniors who will vote for the first time next month in this ranching area in northwest South Dakota.

"I would say I know 100 percent of the people here," Glines said.

Familiarity is the first defense against voter registration fraud in South Dakota's rural counties. Auditors, many of whom have lived in the communities for decades, recognize misspelled names, unfamiliar addresses or forms filed by a person who has left town or died.

But this year, in a South Dakota election that has drawn the attention of the nation because it could determine the congressional power structure, the task of verifying voter registrations in places such as Gann Valley and Timber Lake has become more difficult. Thousands of new applications have poured into county auditors' offices as political parties and other advocacy groups conduct extensive registration drives, primarily on the state's Indian reservations. Requests for absentee ballots are running far ahead of typical election years in many counties. And with the stakes so high, every inconsistency and questionable voting document is being scrutinized.

One man has been charged with submitting fraudulent voter registration cards, and a woman who worked as a private contractor with the state Democratic Party is being investigated for falsifying registration cards.

More than 16,700 names have been added to South Dakota voter registration lists since the June primary. More than 4,100 of the registrations - about 25 percent - were filed in

Weather  
Temp: 33  
of  
UNCLAIMED  
FURNITURE

SD

029598

counties near or on Indian reservations.

Argus Leader reporters surveyed South Dakota county auditors, finding:

- Auditors in 10 counties, all but one adjoining a reservation, have forwarded questionable registration forms or absentee ballot requests to the sheriff or state's attorney for investigation.
- Of the nearly 400 questionable documents discovered by the auditors, 338 came from Shannon and Pennington counties, where the two investigations into possible voter fraud are under way.
- Sixteen questionable registration forms have been turned over by Ziebach County officials. Twelve documents in Todd County and at least 10 in Bennett County were forwarded to investigators, according to the survey.

Media coverage of the fraud investigations has put the state's voter registration and absentee ballot system under the microscope. But Attorney General Mark Barnett bristles at the categorization of the two investigations as evidence of widespread voter fraud.

"I'm still only aware of two cases where criminal law may have been violated, and you've heard about those," said Barnett. "I just don't want the suggestion out there that there is widespread fraud when we don't have any evidence of that."

### **Two investigations**

Concerns about possible voter fraud surfaced in South Dakota earlier this month. On Oct. 3, Dewey County Auditor Adele Enright alerted Democratic Party officials to possible irregularities with four absentee ballot applications in her county. According to the party, those documents were submitted by Becky Red Earth-Villeda of Flandreau - also known by her Dakota name Maka Duta - an independent contractor working through the Coordinated Campaign, a get-out-the-vote program organized by the Democratic Party.

Democratic Party lawyers said they contacted the four people named on the absentee ballot applications in question and determined that two of the applications contained signatures not made by the person purporting to make them.

Red Earth-Villeda was terminated as a contractor, according to Sarah Feinberg, a spokeswoman for the Democratic Party and the Coordinated Campaign. Feinberg said Red Earth-Villeda was responsible for a large number of registrations from around the state, and so far the rest of them have checked out.

029591

Federal Election Commission reports show the South Dakota Democratic Party paid Red Earth-Villeda \$12,867 since the beginning of her contract work in mid-June. The money included reimbursement for travel costs and making copies.

Barnett and FBI officials then acknowledged that an investigation, led by federal authorities, was under way.

No charges have been filed. A woman identifying herself as Red Earth-Villeda called a public radio program last week saying she was innocent. Repeated attempts to contact her have been unsuccessful.

On Friday, in a separate case, a Rapid City man, 45-year-old Lyle Nichols, was charged with forgery for allegedly submitting five fraudulent voter registration cards. Workers at the Pennington County auditor's office called the sheriff's department after noticing irregularities in several registration forms.

In one case, the office received a voter registration form for a man who had already registered. But the signature and other information on the new form did not match the old one.

The Native American Voter Education and Registration Project paid Nichols \$3 for every form he returned. That registration effort is a United Sioux Tribes project funded by a grant from the Washington, D.C.-based Bauman Foundation.

Officials said Nichols turned in 226 registration cards, most of which were fraudulent.

If convicted, he faces up to 25 years in prison.

### **Registration process**

Each state determines voter registration and absentee ballot procedures, and those processes vary greatly.

South Dakota law requires eligible voters to register and sets a deadline - 15 days before the election - for registration forms to be filed with county auditors.

In contrast, Minnesota voters can register at the polls on Election Day. North Dakotans are not even required to register to vote. They simply show identification at the polls. In Iowa, voter registration forms are printed in telephone books.

In South Dakota, once a registration is received, the county auditor's office sends a confirmation card to the person who registered. When the voter returns that card, the signature is compared to the original registration.

If the confirmation card is not returned, the voter's name is put on an inactive list, and in order to vote on Election Day,

029592

the person is required to show a picture identification card.

Several auditors surveyed say they aren't familiar with many residents of the state's Indian reservations, and that makes it more difficult for them to verify the validity of those registrations. In addition, many of those new voters list a general delivery mail address, meaning they pick up their mail at a post office.

It's hard for officials to place those residents in a precinct because the auditor doesn't know exactly where they live. Other new reservation voters don't have telephones, so officials cannot call to verify registration information.

Still, the auditors say, many of the irregularities found among registration forms are simple mistakes.

"Two or three people sent in two or three absentee applications, and we caught it," said Lisa Schieffer, Meade County auditor. "I contacted one of the persons, and he explained to me he just wanted to be sure he got a ballot, so he sent one for his post office box, for his work address and for his home address."

In Brookings County, some South Dakota State University students requested absentee ballots, not realizing that they have to make that request in the counties in which they are registered.

Enright, the Dewey County auditor who discovered some questionable absentee ballot requests, said it's not surprising to find irregularities considering the number of new people being registered.

"With a voter registration drive, you have those mistakes every time, and you have a voter drive every time there's an election," she said.

The county voter registration lists are not exact directories, either. Sometimes, residents move to a new address, or out of a county, and don't retract their old registration. Other times, the resident maintains his old voting address in order to vote in that county or city.

The lists are periodically examined and updated to remove names of those who have died or moved, but the registration records still can contain duplications and inaccuracies.

For example, 26 South Dakota counties, including many reservation counties, have more registered voters than their adult population, according to an Associated Press analysis.

But several counties that do not have large Native American populations also appear to have more voters than people, according to those numbers.

Minnehaha County Auditor Sue Roust said those registration numbers may include inactive voters - those who have not

029598

voted in at least four years. If those voters go to the polls on Election Day, they will have to fill out a new voter registration card before being allowed to vote and should not be included in the count of registered voters.

As of Oct. 19, Minnehaha County had 87,221 registered voters, according to Roust. There are also 11,386 inactive voters.

### **Effect uncertain**

Registration efforts are important in the state this election year because the battle for the U.S. Senate between Democratic incumbent Tim Johnson and Republican Rep. John Thune is considered a dead heat. A few thousand votes could determine the outcome, and ultimately the decision could sway the makeup of the Senate over which South Dakota Sen. Tom Daschle now serves as majority leader.

Many of the potential new voters live on Indian reservations where registration numbers and Election Day turnouts are notoriously low but where Democrats are traditionally the favored candidates.

In 1968, just before Bobby Kennedy spoke to Los Angeles supporters in the hotel where he later would be assassinated, he placed a call to South Dakota. He had just won the presidential primary here and wanted to know how he had fared on the Indian reservations. His supporters told Kennedy that he had scored a landslide victory on the Pine Ridge reservation, receiving 878 votes. Eugene McCarthy had earned only nine votes and Lyndon Johnson, 2.

Thirty-four years later, some Native Americans say reservation voters still look to Democrats in national elections.

"The vast majority are voting the Democratic ticket. They probably have no idea who the Democratic candidates are. They don't know who Stephanie Herseth is. But they know who gives them problems," said Herbert Hoover, University of South Dakota history professor and author of several publications on Indian-white relations.

The questions of voter fraud this year, however, probably will hurt the Democratic candidates, said former Republican legislator Lola Schrieber of Gettysburg.

"If there is fraud, it will affect the Democrats. They were the ones who hired the persons to get the registrations," she said.

Bob McCaughey, who ran Republican Sen. Karl Mundt's campaigns, agrees.

"I say that at the coffee group mixed with Republicans and Democrats, and I get a pretty unanimous agreement on that," he said.

029594

Some analysts believe the voter fraud investigations may turn Native Americans away from the polls on Election Day. Some may be fearful of being involved in a controversy, and others could be disillusioned with the entire process.

But Hoover says the issue could play out the opposite way as well.

"When tribal people feel put upon, they will react with greater resolve," he said. "They are no different from any other group. If they are falsely accused, they rally. It could backfire."

Bob Burns, political science professor at South Dakota State University, said it is difficult to predict whether news of the registration investigations will interfere with the fortunes of Sen. Tim Johnson, who heads the Democratic Party ticket in the state.

If the election is decided by a small margin, the loser also may decide to challenge the outcome in court because of fraud concerns.

#### **Past controversy**

This is not the first time there has been election-time controversy surrounding attempts to get reservation voters to the polls.

In 1980, Democratic Sen. George McGovern's re-election campaign planned to give away a free television on a reservation.

"It (the television) was in the building next door to the polling place. You came in, looked at the TV, and they had brochures. Winning it didn't require you to vote," said George Cunningham, McGovern's top aide at the time .

Attorney General Mark Meierhenry heard about the giveaway and told the McGovern campaign what they were doing was illegal. The raffle ended immediately, and the television was removed.

"We probably lost some Native American votes because a lot of them never came back. They were scared away. But we weren't the only ones involved in something like that. There were a lot of places giving free food, and nothing was said," Cunningham said.

In the past, buses traveled through the reservations taking people to the polls, and giveaways, including free cigarettes, were used to attract voters.

Cunningham says the current controversy surrounding reservation voter registration forms is likely to hurt the Democrats on Nov. 5.

029595

"It is hardly a positive thing," he said.

### **Are changes needed?**

Voter registration investigations in South Dakota generate national interest because of the nature of the races this election year. But the issue also is newsworthy because South Dakota has such a good election record, said Burns. The state traditionally has among the highest voting turnouts in the country.

"South Dakota has no history of voter fraud. We really have a history of clean politics," Burns said. "That really explains the splash this has made. Even the hint of fraud generates a major stir in South Dakota."

Concerns about the process have caused some to speculate that changes should be made, tightening requirements for registration and absentee balloting.

Barnett said he is generally satisfied with the state's election laws but said the Legislature may want to look at the rules concerning absentee balloting.

In Barnett's view, there is a potential for problem in the fact that voters can register and cast an absentee ballot without ever being seen in the auditor's office.

But Kea Warne, elections supervisor for the secretary of state, said the state's election laws already provide adequate protection against voter fraud.

"Just by seeing what's happening now shows the system is working because county auditors are catching the problems," she said.

Burns said some have suggested the state outlaw the practice of hiring people to collect new registrations.

But Roust questions the wisdom of that move.

"When we have groups who are vastly underrepresented - and we know a lot of people on the reservations aren't registered - it's a big job to get those people involved, and I don't know if you can do that with volunteers," she said.

Burns agrees. "I don't really think the law needs to change. Volunteers can be overzealous as much as workers."

Burns said the potential fraud cases being investigated suggest the people involved were trying to defraud their employers in order to make more money rather than deliberately attempting to defraud the election process.

He wishes people would look at the registration drives from another side.

"All of South Dakota should celebrate the fact that 17,000

029596

(people) previously not registered are going to participate in the election," he said. "That's democracy."

### Registration Investigation

- Nearly 17,000 people have registered to vote in South Dakota since the June primary. There are 523,063 potential voters.

- County auditors have turned over to law enforcement nearly 400 voting registration cards or absentee ballot applications because of discrepancies ranging from misspelled names to ballot requests from deceased residents.

- A Rapid City man has been charged with forgery for allegedly submitting fraudulent registration cards.

- The Minnehaha County Auditor's Office has processed more than 4,800 absentee ballot requests. One was questionable and was sent to the state's attorney's office.

The Associated Press contributed to this report.

**Suspicious voter registrations found  
Attorney general denies widespread fraud**  
THE ASSOCIATED PRESS

SIOUX FALLS - Auditors in 10 South Dakota counties have turned over nearly 400 questionable voter registration forms to investigators.

All but one of the 10 counties adjoin an American Indian reservation, the Sioux Falls Argus Leader reported Sunday.

Officials in Ziebach County have turned over 16 suspicious voter registration forms to investigators. Twelve documents have been turned over in Todd County and at least 10 in Bennett County.

One man in Pennington County has been charged with submitting fraudulent voter registration cards. And a woman who worked as a private contractor for the state Democratic Party is being investigated for falsifying voter registration documents.

But South Dakota Attorney General Mark Barnett bristles at the idea that the two investigations are evidence of widespread voter fraud in the state.

"I'm still only aware of two cases where criminal law may have been violated and you've heard about those," Barnett said. "I just don't want the suggestion out there that there is widespread fraud when we don't have any evidence of that."

Verifying voter registrations has become more difficult in

this year's election, which has drawn the attention of the nation because it could determine control of the Senate.

Thousands of new applications have poured into county auditors' offices as political parties and other advocacy groups conduct extensive voter registration drives. The state's Indian reservations have been the main focus of those registration drives.

Of the 16,700 new voter registrations in the state, 4,100 of them - about 25 percent - were filed in counties on or near Indian reservations.

Many counties are also seeing a spike in requests for absentee ballots.

Several auditors surveyed by the Argus Leader said they are not familiar with many residents of the state's Indian reservations and that makes it harder for them to verify the validity of those registrations. In addition, many of those new voters list a general delivery mail address, meaning they pick up their mail at a post office.

Still, many of the irregularities found among registration forms are simple mistakes, auditors say.

"Two or three people sent in two or three absentee applications, and we caught it," said Meade County Auditor Lisa Schieffer. "I contacted one of the persons, and he explained to me he just wanted to be sure he got a ballot, so he sent one for his post office box, for his work address and for his home address."

In Brookings County, some South Dakota State University students requested absentee ballots, not realizing that they have to make that request in the counties in which they are registered.

Adele Enright, the Dewey County auditor who discovered some questionable absentee ballot requests, said it is not surprising to find irregularities considering the number of new people being registered.

"With a voter registration drive, you have those mistakes every time, and you have a voter drive every time there's an election," Enright said.

Each state determines voter registration and absentee ballot procedures, and those processes vary from state to state.

South Dakota law requires eligible voters to register and sets a deadline of 15 days before the election for registration forms to be filed with county auditors.

But Minnesota voters can register at the polls on Election Day. North Dakotans are not even required to register to vote. They simply show identification at the polls.

In South Dakota, once a voter registration form is received, the county auditor's office sends a confirmation card to the person who registered. When the voter returns that card, the signature is compared to the original registration.

If the confirmation card is not returned, the voter's name is put on an inactive list, and to vote on Election Day, the person is required to show a picture identification card.

## 15 false absentee ballot applications found

David Kranz  
Argus Leader

published: 10/25/2002

A voter-fraud investigation has turned up 15 bogus absentee ballot applications in South Dakota so far, and more may be coming, Attorney General Mark Barnett said late Thursday.

State and federal agents targeted 25 South Dakota counties after allegations of misconduct surfaced earlier this month, Barnett said.

In each case, signatures were forged on the applications that a person uses to obtain a ballot, he said.

All the alleged instances of ballot fraud discovered so far are tied to Becky Red Earth-Villeda, Barnett said. Red Earth-Villeda - also known by her Dakota name, Maka Duta - was an independent contractor in the Democratic Party's efforts to increase Native American participation in the election.

Investigators believe Red Earth-Villeda, whose contract was terminated by the Democratic Party, may be linked to as many as 1,750 absentee ballot applications in the state, Barnett said.

"I have no idea how many of those might be false," he said.

Also Thursday, the Fall River state's attorney said the names of two women there were used to forge voter registrations in Codington and Minnehaha counties.

The discoveries are the latest development in a controversy over voter registration and absentee ballot discrepancies. The FBI also is investigating allegations that documents were filed on behalf of dead people and children, particularly in and around Native American reservations.

The allegations have raised political tension in South Dakota with 12 days left until the Nov. 5 election, which features particularly tight contests for U.S. Senate and House.

Barnett, a Republican, said charges will be forthcoming. At this point, the activities of Red Earth-Villeda remain the sole

Weather  
Temp: 33  
of

50

Personal Loans

029600

focus of the investigation, he said.

"We have 15 cases that we believe were forged absentee ballot applications, and at the end of the day we expect she will be charged," he said.

The Democratic Party initiated an aggressive get-out-the-vote campaign, particularly around reservations, in preparation for the November elections. While both parties traditionally pay staffers to sign up new voters and pursue possible absentee ballot possibilities, the Democrats this year also initiated a program of paying independent contractors on a per-piece basis.

Sarah Felnberg, spokeswoman for the South Dakota Democratic Party, reiterated that the party initiated an investigation on its own when problems first surfaced in early October and notified Dewey County officials of two questionable ballot applications.

The Democratic Party has zero tolerance to anything less than full compliance with state and federal election regulations, she said.

"It is still about one person's activities, and we think it is important that it be resolved before Election Day," she said. "There is no evidence to suggest that one ballot has been affected."

Last week, a Rapid City man who was working under a separate program, sponsored by the United Sioux Tribes, was charged with forging signatures on five registration cards.

On Election Day, it will be up to individual county auditors to determine whether they are comfortable with a signature before they put the ballot in the box, Barnett said.

He would not say how authorities determined which counties Red Earth-Villeda was involved in. The list of counties where the 15 applications were found was not available.

In each case, the investigator tracks down the person whose name is on the application to verify the signature.

"We have interviewed 15 people so far who said, 'That is not my signature.' You have to go out and grind it," Barnett said.

During the probe, one signature was found to be legitimate, and a few people were not sure about theirs, he said.

"We have to go to the bottom and do as many (of 1,750) as we can," Barnett said. "Federal and state agents feel reasonably confident in saying an arrest is likely, but first we want to nail down as much of the facts as we can."

A routine check by the secretary of state's office discovered

029601

at least two more cases of possible forgery on voter registration cards under the names of women in Fall River County, in the southwest corner of the state.

The cards were filled out in July in Minnehaha and Codington counties. But the two Fall River women say they didn't file the registrations, said State's Attorney Lance Russell.

"This is the first time we've had anything regarding Fall River County," Russell, a Republican, said Thursday.

The duplications were discovered after a routine records purge by the secretary of state's office. Using a computer check first initiated in January, the office compares voter registrations from across the state in order to eliminate multiple registrations by the same person.

A duplicate registration isn't necessarily a cause for suspicion, however. More than 9,000 such cases have been discovered since January, said Chris Nelson of the secretary of state's office. But most of the names come up because people move and re-register without telling the first county they have left.

That's not the case with the two Fall River women.

Lynn Putnam received a card in the mail about a month ago, asking her to confirm her registration information. The 27 year-old Edgemont woman - who is Russell's administrative assistant - brought the card with her to work and dropped it off at the auditor's office.

Auditor Sherrill Dryden told Putnam she received a lot of the cards because of the statewide purge.

"She said it's a coincidence that there is a Lynn Putnam in Watertown with your exact same birth date," she said. "She thought it was kind of suspicious because the person in Watertown had registered at the end of July."

Dryden and Russell did some research and discovered there wasn't anybody by that name living in Codington County.

"I don't know who would do it," said Putnam. "I've never lived there."

She didn't think much of it when she received the verification card in the mail.

"I guess, honestly, I thought maybe they sent those cards to anybody," she said. "I thought maybe it was kind of an update thing, that it was standard before the election."

Russell declined to identify the second woman, who was registered in Minnehaha County, citing confidentiality.

Minnehaha County Auditor Sue Roust said Dryden contacted her about a problem after the secretary of state sent out a

029602

list Monday showing duplicate registrations.

"The Fall River County auditor recognized her and talked to her. She said she doesn't live in Minnehaha County and doesn't plan to vote here," Roust said.

When Roust's office was contacted about the possible duplication, she checked the two registrations and found that the signatures on the cards were radically different. Surprisingly, the birth date of the woman was correct on the bogus registration, she said.

In both of the Fall River cases, Republican women were registered as Democrat.

Roust said the registration in Minnehaha County was done in July and was part a voter registration drive. A code is required on the cards which indicates it is part of a drive. It does not tell the auditor which program it was a part of or who registered the person.

The suspected registration in Codington County also was a part of a registration drive, according to Auditor Cindy Brugman.

Both Brugman and Roust said an absentee ballot was not requested for the people who were registered in their counties.

State Editor Patrick Lalley contributed to this article. Reach reporter Corrine Olson at colson@argusleader.com or 331-2311.

## Will possible fraud cases shake voters?

Terry Woster  
Argus Leader

published: 10/27/2002

### Observers debate long-term effect

PIERRE - Elections are fairly fragile institutions.

They are, after all, organized and policed by the same political organizations that compete for the gift of power.

In South Dakota, this social contract has emerged largely unscathed through more than 100 years of electing public servants. But the investigation of possible fraudulent filings of voter registrations and absentee ballot applications - currently under way and focused on two people working under separate voter drives - has prompted discussions of the impact on the Nov. 5 general election.

Officials are quick to point out that the irregularities discovered thus far have not manifested in even one fraudulent vote. But is it possible that in a small state such as South Dakota, where campaign shenanigans are as rare as ballot chads, one bad event could have a disproportional impact on the psyche of the electorate?

The investigation might make headlines and coffee-shop talk, but it should have little impact on public confidence in the state's election system, says a Harvard University government professor with ties to the state.

Thomas Patterson, author of several books about elections and politics in the United States, said drawn-out campaigns and attack advertising are more likely to shake voters' confidence in the election system than will reports of voter registration problems, especially if the possible fraud isn't found to be an extensive and ongoing condition.

"I'm not surprised that this would be a big story there, which it probably wouldn't be in New Jersey, for example," Patterson said. "According to our surveys, voters seem much more likely to be discouraged by the way campaigns are conducted, the endless campaigns. I don't know that they lose trust in the system itself as much as become disenchanted with the way it is run."

Weather  
Temp: 35 °F  
UNCLAIMED PAINTS FURNITURE

*Maschino's*  
**WOOD FLOORS**

029604

Patterson - who has recently published "The Vanishing Voter," a study of voter involvement in elections and campaigns - is with the Kennedy School of Government at Harvard. He did undergraduate study at South Dakota State University.

State and federal authorities in South Dakota are looking into allegations that a woman working as an independent contractor with the Democratic Party forged signatures on registration cards and absentee ballot applications.

Attorney General Mark Barnett said last week that agents have focused on 25 counties and found 15 apparent cases of forgery on ballot applications. More than 1,700 applications have been linked to the worker - Becky Red Earth-Villeda of Flandreau, also known by her Dakota name Maka Duta - and agents are tracking down each of the applicants to verify their signatures. Charges are probable against Red Earth-Villeda, but the Democratic Party has not been implicated, Barnett said.

A Rapid City man who was working for a voter drive program organized by the United Sioux Tribes has been charged with five counts of forgery in Pennington County for submitting false registrations.

It's unusual to have reports of fraud focusing on individuals in the voter-registration process, as is the case in South Dakota, Patterson said.

"Where the shenanigans usually take place is with those who control the process, not an individual," he said. "What you're facing seems pretty rare."

It's rare enough that Alice Kundert of Mound City can remember nothing quite like it in her four decades as a county official, state auditor, secretary of state and Republican legislator. Unlike Patterson, though, Kundert thinks that just the possibility of wrongdoing in the voting process erodes public confidence and could cause people to shy away from the polls.

"What shakes you about this kind of thing is that the whole system is built on trust, and I'm just sick about this," she said. "It has blemished our image of ourselves. I don't care what other states think. I'm sad that we may think less of ourselves. We should have a lot of pride and confidence in our system of government and in elections. The vote is sacred. If we lose confidence in that, maybe it means some people don't bother to vote who might otherwise take the time."

Mary Ann Bear Heels Cowan of Pierre tends to side with Patterson and sees the investigation as a way to make people understand how important it is to register and vote.

"It bothers us, in a way, when we first hear the news, but as

029500

we listen and read, we see that this really is a problem with perhaps two individuals, not the whole system," said Bear Heels Cowan, a Lakota rights advocate with the group First Voices. "The focus is kind of high right now on it, but I believe the trust is still there, and most people will be responsible."

Merle Lofgren, longtime newspaper publisher in McLaughlin, blames the practice of paying for registrations.

"It's prostituting the vote, and how can you expect people to trust the system after that?" he asked. "Yes, people are going to lose confidence in the system. Maybe it's a big case, and maybe it's small, but no matter how extensive this thing is, how are you going to know if your votes are all real and equal? Democracy shouldn't be paid for with money, not any part of it."

The news that the name of a woman who had died three weeks earlier in a car wreck appeared on a registration card is especially offensive to Lofgren.

"They used to say the biggest voting precinct in Chicago was the cemetery, and now it looks like the littlest precinct in South Dakota is the cemetery in Dewey County," he said.

Kundert said her only personal experience with money in voting was when she campaigned once for a term as auditor and asked for a vote in a small convenience store in a western town.

"The man said, 'How much will you pay me?' I said, 'You just lost it. I don't need your vote,' " she said. "That kind of stuff just

doesn't happen in South Dakota."

That's probably a typical reaction to the news of the investigation, Patterson said. When the Florida voting system came into the national spotlight during the protracted counting of the presidential ballots two years ago, many states believed their own systems were safe from that kind of problem, he said.

"The idea was, this is Florida's problem; this isn't the way we operate," he said.

While he doesn't think one election cycle with questions about voter registration will cause people to lose confidence in the system, Patterson does see the possibility of doubts accumulating over time.

"All of these things are kind of shots at the system, and they could be additive in a way," he said. "If people are already disenchanted with campaigns, and you add this, it possibly could have some effect."

Bear Heels Cowan said the effect may be to encourage

029800

Native Americans and whites to work together on voter registration and voting drives.

"These kinds of things happen for a reason," she said. "It's kind of a push-pull thing: Go vote, make sure you're registered, and now we have a few problems. I believe the people have done a good job overall of getting registrations, and perhaps these questions being raised now will make us all more aware of how much the system relies on trust, maybe even to the point that we'll all work together."

Kundert said South Dakota seldom experiences the pressures of big-time campaigning the way it has this year with the U.S. Senate race between Democrat Tim Johnson and Republican John Thune carrying the potential of deciding political control of that body.

"I don't remember anything like this," she said. "So, you get these reports something might be wrong, and 99 percent of you says real voter fraud couldn't happen here. But 1 percent of you says, gosh, I never thought there'd be any cases of false registrations like this, either. So you start to doubt your trust in the whole thing. And that's pretty sad."

## Suspect in voter fraud threatens suit

By DAVID KRANZ  
Argus Leader

published: 10/29/2002

### Flandreau woman says she's the victim of conspiracy

The Flandreau woman suspected by federal, state and Republican Party officials of being linked to possible voter fraud in several South Dakota counties is fighting back, saying she is a victim of a conspiracy to keep Native Americans from voting.

Becky Red Earth-Villeda, also known by her Dakota name, Maka Duta, said in a statement distributed to news media that she is innocent of any links to the forging of absentee ballot applications, voter registration cards and other wrongdoing in the election process.

She also is contemplating charges of her own against those who accuse her.

Attorney General Mark Barnett expects to file charges against her in the near future, saying at least 15 absentee ballot applications handled by her were found to be irregular.

Red Earth-Villeda, 49, accuses officials of a collective conspiracy against her. They continue to "conspire as Republicans to single out my voter registration and absentee ballot application work product for their explanation to the end of charging only me with violations of state and federal law," she said.

The sole purpose of their probe and threats of charges against her is to increase vote totals for Republican candidates in the Nov. 5 election in South Dakota under "color of law," she said.

Barnett has said he has investigators in 25 counties looking for discrepancies in absentee ballot applications.

So far, there is evidence that she handled more than 1,700 such documents. Of those inspected so far, 15 have been found to be invalid. That process is determined by finding the person who has his name on the application. The person then tells investigators whether it has his actual signature.

Responding to Red Earth-Villeda's conspiracy charges, Barnett said: "It will all sort out in the court of law. We have been conducting hundreds of interviews and continue on the course that I discussed in the past."

Red Earth-Villeda describes herself as "the mother of nine beautiful children, a grandmother of five wonderful grandchildren."

Red Earth-Villeda said that during the course of the year, she has devoted her time and energy to getting Native Americans in South Dakota to register to vote in federal, state and local elections. She said she thoroughly read the South Dakota statutes and laws before beginning her work.

"Through libelous assertions, inferences and innuendos by South Dakota Republican Chair Joel Rosenthal, Republican U.S. Senate candidate John Thune and Republican Attorney General candidate Larry Long ... defamation of my character as a campaign worker to register voters ... is now to my emotional and financial detriment," she said in a written statement.

As a result, South Dakota voters have the false impression that she is responsible for "massive voter registration fraud," Red Earth-Villeda said.

Rosenthal said he has always had the position that there appear to be thousands of irregularities, voters that can't be found, dead people requesting absentee ballots and irregularities in at least 20 counties.

"To my recollection, I have not accused her. She gets her day on trial. Democrats have already said she falsely did two of them," Rosenthal said, referring to voter documents.

"There are a lot of things uncovered, and something isn't right. The people on the reservation deserve to be registered to vote. Both parties ought to be able to register their favorable voters, but I want to have a good election and want people to have confidence," Rosenthal said.

The Thune campaign's position is that Red Earth-Villeda says one thing and the Democratic Party says another.

"We hope the truth will emerge before election day," said Christine Iverson, communications director for the Thune campaign.

Red Earth-Villeda also said Matthew Miller, an FBI agent who interviewed her, did not advise her of her rights. He distorted information she gave him when he filed a written report, she said. Because of the inaccuracies she refused to sign the statement for Miller. She plans today to release a photocopy of the Miller document.

"We're referring all calls to the U.S. attorney's office," said

029609

Dave Heller, supervisor for the FBI office in Sioux Falls.

U.S. Attorney James McMahon would not discuss the case. "I'm not commenting on ongoing investigations," he said.

In the recent controversy, only Red Earth-Villeda has a direct connection to the state Democratic Party registration program, Barnett said.

A Rapid City man, who was working under a separate program run by the United Sioux Tribes, has been charged with five counts of forgery.

Meanwhile, Rosenthal accused Democrats on Monday of "judge shopping" when a law firm for the state Democratic Party asked Federal Judge Lawrence Piersol to be available on election day if they decide to seek an injunction.

Rosenthal said the Democratic Party is putting Piersol in "this untenable ethical position."

Rosenthal should know better, said Sarah Feinberg with the South Dakota Democratic Party.

"He knows it is a standard letter you write at election time. Our lawyer even covered Rosenthal with a copy of the letter as a courtesy," she said.

"In the course of a week, Joel Rosenthal has tried to suppress Native American voting, alienated every state auditor and the secretary of state by suggesting a need for federal election monitors and now discrediting a well-respected federal judge," Feinberg said.

## Barnett: No illegal ballots found

David Kranz  
Argus Leader

published: 10/31/2002

### Contract worker likely to face charges for submitting forms

The investigation into allegations of voter fraud in South Dakota has not turned up any illegally cast ballots but the woman at the center of the controversy still likely will face charges, Attorney General Mark Barnett said late Wednesday.

Barnett said last week that state and federal authorities had found 15 absentee ballot applications with apparently forged signatures. The bad documents surfaced during an investigation of voter abnormalities in 25 counties including registrations for people who were dead or too young to vote.

News of the probe has fueled nationwide speculation about the integrity of Tuesday's election in South Dakota, which features close races for U.S. Senate and House that are part of fierce struggle for control of Congress.

Throughout the controversy, Barnett has smothered discussion of widespread voting irregularities, saying the investigation was focused on one woman, Becky Red Earth-Villeda of Flandreau who was working as independent contractor under a Democratic Party voter drive.

On Wednesday, the attorney general said the woman's actions, while likely criminal, have not led to fraudulent voting.

"So far I have not found that she had any ballots that have been illegally voted," he said in an interview.

Meanwhile, Red Earth-Villeda was interviewed by state and federal agents for six hours Wednesday. Before the meeting she released a statement admitting she signed absentee ballot applications in the name of the 15 voters in Dewey and Ziebach counties but that she did so only after a mix up about how the system works.

She said the 15 voters in question filled out the applications, which she intended to personally deliver to the auditors in

those two West River counties. But a Democratic Party worker informed her that, in nearly all cases, those forms must be sent through the mail.

At that point, Red Earth-Villeda admits, she duplicated the signatures on new applications and sent them through the system.

"If I erred in doing so, I pray that Attorney General Barnett will agree with me that I erred on the side of angels," she said in a written statement. "I did not abrogate the spirit and letter of the absentee voting law of South Dakota and I did not work fraud on the county auditors"

Barnett said agents have interviewed the 15 people and ballots have not been submitted by them or in their names.

"It is my suspicion that the voter was not involved in the fraudulent procurement" of the ballot, he said.

Interviews in the case will conclude today, he said.

Red Earth-Villeda likely will be charged "sometime next week or possibly sooner," Barnett said.

Those charges probably will include forgery and theft by deception, he said.

Red Earth-Villeda said she hopes to continue her work to bring more Native Americans into the electoral process.

"I pray that the truth will set me free to get as many Native Americans out to vote as I can so that they exercise their most precious and self determinative right as citizens of the United states, that being the right to vote," she wrote.

An Argus Leader/KSFY-TV poll of likely South Dakota voters shows the much-publicized investigation has some positive effect for Republicans in the election.

Fifteen percent of those surveyed said they are more likely to vote for Republicans because of the controversy. Four percent said they were more likely to vote Democrat.

But the majority, 79 percent, said the allegations would have no effect on Tuesday.

The poll of 805 randomly selected South Dakotans has a margin of error of plus or minus 3.5 percentage points.

The controversy wasn't a deciding factor when James Miller, 64, of Meadow made up his mind to vote Republican in the Senate race.

"But it does seem like the Democrats have their fingers in it with voter problems. I don't think their candidates are responsible, though, probably just the workers," he said.

029612

Both major political parties have engaged in substantial get-out-the-vote campaigns in the run-up to Tuesday's election.

The race between incumbent Sen. Tim Johnson and U.S. Rep. John Thune is among the closest in the nation. A few hundred vote here and there could mean the difference in the race and ultimately control of the Senate.

But the Democrats' practice of paying independent contractors for each registration and absentee ballot application has come under criticism since the allegations of fraud emerged.

Sarah Feinberg, spokeswoman for the South Dakota Democratic Party, said Barnett's statements Wednesday provide a measure of vindication for the voter drive.

"The attorney general's comments show the allegations that have been coming from the state Republican Party and the Thune camp for what they truly are, which is pure political spin," she said.

State Republican Party Chairman Joel Rosenthal could not be reached for comment late Wednesday.

State editor Patrick Lalley contributed to this article. Reach reporter David Kranz at [dkranz@argusleader.com](mailto:dkranz@argusleader.com) or 331-2302.

## Absentee forms found burned

Staff & Wire Reports

published: 11/1/2002

### Barnett: Flandreau woman tried to destroy originals

Investigators have recovered charred pieces of absentee ballot applications from a Flandreau woman suspected of forging voters' names on such forms.

Attorney General Mark Barnett said Becky Red Earth-Villeda apparently tried to burn the original applications but then decided to retrieve them.

Investigators suspect Red Earth-Villeda tried to copy information including signatures onto new applications.

"It gets stranger every day," Barnett said. "She claims they are the legitimate signatures (on the charred paper).

The Flandreau woman told Barnett that she copied the names of the applicants from the real documents in order to comply with instructions from Democratic Party officials. Barnett said the woman was told that she could not turn in ballot applications that had been signed but not filled out correctly.

"Many hundreds of those absentee ballot applications that were turned in by her, in fact were her signature, attempting to trace or duplicate the signature on the original form, which was rejected by the party," he said.

Red-Earth-Villeda was hired as an independent contractor by the state Democratic Party. She was fired after a county auditor alerted party officials that forged signatures were showing up on applications for absentee ballots.

Barnett said last week that authorities had found 15 absentee ballot applications with apparently forged signatures. Those documents were discovered during an investigation of voter irregularities in 25 counties.

Despite the suspicions of authorities, only those 15 have been verified by contacting the person whose name is on the application, Barnett said.

Democratic officials have cooperated with the investigation,

Barnett said.

The probe has been laborious because of the sheer volume of election documents in question, he said. Each person whose name is on the application must be contacted by investigators to verify whether it is their signature on the form.

"I have almost 30 agents on this full time, spread out all over South Dakota, going as fast as we can go. We're doing everything we can to sort it out and advise the county auditors," Barnett said. "We're going to be sorting this out for a long time."

No absentee ballots tied to the questionable ballot application forms have been discovered, he stressed.

Investigators interrogated Red Earth-Villeda for several hours on Wednesday. She also released a written statement admitting that she had duplicated signatures but denying wrongdoing.

Kea Warne, state election supervisor, said county auditors are being advised to set aside any absentee ballots that look suspicious.

"If the signatures on the envelopes containing absentee ballots don't match up with the signatures on the applications for those ballots, we're telling auditors to set the ballots aside," she said.

Joyce Hazeltine, secretary of state, said she thinks the election will go smoothly and there will be no problems if questionable absentee ballots are rejected.

"If there's any question, I'm not taking any chances on having a contested election. Let's just not use them," she said.

If absentee ballots are set aside, they would only be considered if any races are within vote margins that allow for recount requests, Warne said.

"The recount board would have the authority to review those uncounted ballots," she said.

Red Earth-Villeda worked in several counties that encompass or border Indian reservations, he said.

"In Buffalo County alone, we probably have 80 or 100 absentee ballot applications that she signed instead of the voter," Barnett said, adding that forgery charges likely would be filed soon in Minnehaha County because that's where the election forms were turned over to the Democratic Party.

**Forged absentee ballot applications could total between 500  
and 1,000  
Flandreau woman may have charges filed against her today or Monday**

By Joe Kafka  
Associated Press Writer

PIERRE - Forgery charges may be filed today or Monday against a Flandreau woman who has worked to get more American Indians and others to vote on Election Day, Attorney General Mark Barnett said Thursday.

State criminal agents, in conjunction with the FBI and tribal authorities, have investigated the activities of Becky Red Earth-Villeda in 25 counties, Barnett said.

The woman was hired as an independent contractor by the state Democratic Party. She was fired after a county auditor alerted party officials that forged signatures were showing up on applications for absentee ballots.

Barnett said investigators have talked to hundreds of people and hoped to finish up their last interviews Thursday night. He said Red Earth-Villeda is suspected of forging voters' names on 500 to 1,000 absentee ballot applications.

"We've found several hundred voters who say, 'That's not my signature,'" the attorney general said.

When Red Earth-Villeda was told by a Democratic Party official that she could not turn in ballot applications that had been signed by voters but were not filled out correctly, she filled out new forms and traced the voters' signatures on them, Barnett said.

"Many hundreds of those absentee ballot applications that were turned in by her, in fact were her signature, attempting to trace or duplicate the signature on the original form, which was rejected by the party," he said.

Investigators interrogated Red Earth-Villeda for several hours on Wednesday. She also released a written statement Wednesday admitting that she had duplicated signatures but denying wrongdoing.

"I did not abrogate the spirit and letter of the absentee voting law of South Dakota," the statement said. "If I erred . . . I pray that Attorney General Barnett will agree with me that I erred on the side of angels."

Democratic officials have cooperated with the investigation, Barnett said.

The probe has been laborious because of the sheer volume of election documents in question, he said.

"I have almost 30 agents on this full time, spread out all over South Dakota, going as fast as we can go. We're doing everything we can to sort it out and advise the county auditors," Barnett said. "We're going to be sorting this out for a long time."

No absentee ballots tied to the questionable ballot application forms have been discovered, he stressed.

"So far, I've found no evidence that she got her hands on any actual ballots," Barnett said. "I'm not saying no illegal ballots were cast."

Kea Warne, state election supervisor, said county auditors are being advised to set aside any absentee ballots that look suspicious.

"If the signatures on the envelopes containing absentee ballots don't match up with the signatures on the applications for those ballots, we're telling auditors to set the ballots aside," she said.

Joyce Hazeltine, secretary of state, said she believes the election will go smoothly and there will be no problems if questionable absentee ballots are rejected.

"If there's any question, I'm not taking any chances on having a contested election. Let's just not use them," she said.

If absentee ballots are set aside, they would only be considered if any races are within vote margins that allow for recount requests, Warne said.

"The recount board would have the authority to review those uncounted ballots," she said.

Barnett said questionable absentee ballot application forms have been found in several counties, although he was not able to immediately identify all of them Thursday because not all criminal agents had yet filed their final reports. Red Earth-Villeda worked in several counties that encompass or border Indian reservations, he said.

"In Buffalo County alone we probably have 80 or 100 absentee ballot applications that she signed instead of the voter," Barnett said, adding that forgery charges would be filed in Minnehaha County because that's where the election forms were turned over to the Democratic Party.

The attorney general said he doesn't think voters who signed the original forms that were incorrectly filled out have done anything wrong.

"I'm convinced that virtually all these voters are completely innocent."

When Becky Red Earth-Villeda was told by a Democratic Party official that she could not turn in ballot applications that had been signed by voters but were not filled out correctly, she filled out new forms and traced the voters' signatures on them, Attorney General Mark Barnett said. ## Ballot-tampering probe requested -- Secretary of state appeals to attorney general

February 26, 2004  
Alma Walzer and Ryan Gabrielson  
*The Monitor*

EDINBURG — Texas Secretary of State Geoffrey Connor wants an investigation into the ballot-tampering claims made by four Hidalgo County voters earlier this week.

Connor requested the assistance of Texas Attorney General Greg Abbott to look into complaints filed by four county residents that at least four mail ballots were tampered with.

"We're drafting a letter to the attorney general's office that will be sent today," said Jennifer Waisath, director of communication for the secretary of state. "The matter in Hidalgo County over the mail ballot issue is now in the hands of the A.G.'s office for a full investigation."

The letter sent by Connor to the attorney general, and obtained by The Monitor, indicates that Connor believes several criminal election offenses may have occurred.

"If these allegations are true, several criminal election offenses may have occurred including unlawful assistance, unlawfully influencing a voter and illegal voting," Connor wrote. "I have enclosed a courtesy copy of a newspaper article from the McAllen Monitor, dated Feb. 25, 2004, detailing the alleged criminal conduct.

"In accordance with the recently adopted policy between our offices with respect to alleged criminal election law violations, we are hereby referring these allegations to your office for investigation," Connor wrote.

Hidalgo County Elections Administrator Teresa Navarro hopes the state investigation will be fully under way shortly.

"It could be — the attorney general moves quite quickly," Navarro said. "They are swift and they don't just send one person down, they send two or three."

Two voters from Weslaco and two from the North McAllen/South Edinburg area contacted Navarro on Tuesday, claiming their mail ballots had been tampered with.

Navarro said the voters should have received a blank ballot to fill out that they would then place in an envelope, sign the back of the sealed envelope and mail to the elections department.

Instead, the four voters said they received a sealed envelope with a ballot already inside, along with a note asking them to simply sign the envelope and mail it.

Navarro contacted the secretary of state's office Tuesday afternoon and asked for assistance. An official from the A.G.'s office contacted her on Wednesday and told her that an investigation had been opened, she said.

The A.G.'s office would not comment on the matter.

Tom Kelly, spokesman for Texas Attorney General Greg Abbott, said once they officially receive a letter requesting assistance from the secretary of state, they will "exercise their independence and

029618

latitude" to determine whether they pursue the investigation.

The four voters have been cleared by the elections department and can vote in person on their own, Navarro said. The mail ballots in question remain sealed and are being held under lock and key until the investigators arrive, she said.

Also on Wednesday, a fifth voter came forward about a problem with his mail ballot.

"A mail ballot was returned to the elections department, which is unusual for the post office, for them to mark it as 'moved,'" Navarro said. "The voter said he was told by a politiquera that the ballot was going to be mailed to his home. And he assumed that is what she would do."

A politiquera is a paid representative of a political candidate. The fifth voter claimed the politiquera to whom he referred sent his mail ballot to an address other than his home.

The address on the voter's registration card and the address to which the ballot was mailed do not match, Navarro said.

"We don't know the name of the politiquera, but we're in the process of trying to obtain that information," Navarro said.

All five voters who complained of problems with their mail ballots are older than 65. State law protects their identities, Navarro said.

"I'm disappointed because I don't know how I can prevent someone from going to a voter and tampering with their (mail) ballot," Navarro said.

Anyone caught tampering or stealing mail could face some pretty stiff penalties.

"The crime would be considered mail theft," said Vanessa Kimbrough, a U.S. postal inspector. "It's a felony that carries penalties of up to five years in prison and \$5,000 in fines per piece of stolen mail."

Kimbrough said mail carriers aware of stolen mail are supposed to report it to the postal inspection service.

"If anyone has information about these cases, they should call the inspection service in Houston at (713) 238-4400," Kimbrough said.

## Rangers launch mail ballot probe

March 06, 2004

Ryan Gabrielson  
The Monitor

EDINBURG — With general voting in the primary election just days away, the Texas Rangers have begun an investigation of the mail ballot fraud allegations that arose last week.

Texas Ranger Sgt. Israel Pacheco said he started his inquiry Thursday after meeting with Hidalgo County Elections Administrator Teresa Navarro to get details of the complaints.

There is no deadline for this investigation, Pacheco said. "We'll just be looking into things as they come."

Two voters in McAllen and two in Weslaco, all older than 65, complained that when their mail ballots arrived, they were already sealed and included a note: "Just sign here."

The complaints were lodged with the elections administration Feb. 24. Two days later, Navarro said she received a mail ballot request from an individual who died in 2001.

Navarro and Hidalgo County District Attorney Rene Guerra said they suspected the complaints stemmed from the work of paid political operatives known in the Rio Grande Valley as politiqueras.

Pacheco has been given the victim names and the names of the politiqueras they suspect are responsible for the fraud, Navarro said.

The Texas Rangers were assigned the cases after Navarro forwarded the complaints to Texas Secretary of State Geoffrey S. Connor, who in turn moved them to the state Attorney General.

Pacheco said the investigation does not have a timeline and that the scope will be determined by the amount of information he receives. While Guerra's office first had indicated it would not have the staff to investigate the ballot fraud claims, he has agreed to prosecute should the Rangers build a case.

"We've already talked to the DA's office and they confirmed they will take the case," Pacheco said.

"(The DA's office) will consider any case generated by our office or any law enforcement having to do with voter fraud," Guerra said. "We don't want to protect any vote fraud."

Friday was the last day of early voting. General voting in the primary begins Tuesday.

"This (investigation) is a good, positive thing they're not waiting until after the election," Navarro said. "I'm glad they are not waiting until after the voting, that they're interviewing people now."

By Friday afternoon, more than 30,000 Hidalgo County residents had voted, Navarro said.

## Arrest follows irregularities in water board voting

Associated Press

**EL PASO, Texas** - West Texas law officers have arrested a precinct chairwoman in connection with an investigation into bogus mail-in ballot requests during recent water board elections.

Patricia "Patty" Lee Pinon was arrested Tuesday on charges of four counts of tampering with government records, each of which is a second-degree felony, El Paso County sheriff's spokesman Rick Glancey said.

Authorities said three of the counts are related to Saturday's El Paso County Water Improvement District No. 1 board elections, while the fourth relates to last year's mayoral election.

Pinon, a Democratic chairwoman of Precinct 81, was free on \$5,000 bond.

"She's been a very involved precinct chair for the longest time, and once she gets behind her candidate, she's a hard worker," county Democratic Party Chairman Rick Melendrez told the El Paso Times in Thursday's editions.

In the early-voting period for the water improvement district's election, the district received about 50 suspicious applications for mail-in ballots that appeared to have been filled out by the same person.

The county Elections Department found that four of those applications were in the names of people who had been removed from the voter rolls because they were dead, said Jesus "Chuy" Reyes, the district's interim general manager.

Glancey could not say whether the charges against Pinon are related to those ballot applications or to others.

## Arrested Demo implicates others

*David Crowder*  
*El Paso Times*

Patricia "Pattie" Lee Piñon, who was charged in connection with a voting fraud scheme this week, implicated other unnamed Democratic Party precinct chairpersons in an interview with an investigator, according to the investigator's arrest warrant affidavit.

Piñon

Sheriff's deputies on Tuesday arrested Piñon, the Democratic Party chairwoman for Precinct 81, on four charges of tampering with government records in connection with requests for mail-in ballots from deceased voters.

Three charges were in connection with Saturday's El Paso County Water Improvement District No. 1 election, and the fourth involved last year's El Paso mayoral election.

Sheriff's spokesman Rick Glancey said, "We are pleased with the direction of our investigation, and by no means is it over by virtue of this arrest."

Sheriff's Detective Neil Baker, in his affidavits to obtain three arrest warrants, said Piñon admitted in an interview with him that a year ago she had voters sign numerous blank applications for mail-in ballots that would be used in future elections.

"The defendant Pattie Lee Piñon then admitted that she did not get anyone's permission to send in the application for mail-in ballots (and) that other Democratic Party precinct chairs also did the same," according to one of Baker's affidavits.

Piñon, in the affidavit, said she didn't know the dead voters had died when she sent in applications for early mail-in ballots using their names.

Piñon could not be reached for comment, nor could County Democratic Party Chairman Rick Melendrez. But the previous party chairwoman, Enriqueta "Queta" Fierro, said Thursday that she was aware that some party leaders went after mail-in ballots in elections but she "wasn't close to anybody doing it."

"I didn't know they made copies like that," she said.

Such activities are highly questionable, she conceded, and when asked whether the party needs to deal with the issue, she said, "It probably does, and it probably

029620

will in light of what's happened."

In the affidavit to support the fourth arrest warrant involving last year's mayoral election, sheriff's Detective Regan Conner refers to an earlier investigation that looked into 29 applications for mail-in ballots that the County Elections Department received in one envelope last April.

Among them was one in the name of Verda Ponce, who died in 2002. Baker's affidavit states that Piñon took responsibility for the mail-in ballot applications from dead voters in the water board election, one of whom was Ponce.

Before her arrest Tuesday, Piñon telephoned the interim general manager of the water improvement district, Jesus "Chuy" Reyes, and told him of her involvement, according to Baker's affidavit. Reyes, in turn, called the Sheriff's Department, which led to Piñon's arrest after she voluntarily submitted to an interview.

The four counts of tampering with a government record that Piñon faces are second-degree felonies, each punishable by two to 20 years in prison and a \$10,000 fine.

## D.A. ready to close illegal voting probe

TX

Associated Press

**HOUSTON** - A seven-month voting fraud investigation that produced nearly 30 indictments is nearing its end, a prosecutor said.

Robertson County District Attorney John Paschall said recently the city of Hearne is ready to put the issue of fraudulent absentee ballots in its May 3 election behind it.

"We have it pretty much under control," Paschall told the Bryan-College Station Eagle in Sunday's editions.

A grand jury investigating the election fraud will be dismissed Wednesday, and no more indictments are expected. A handful of criminal cases in the case are pending.

Allegations of voter fraud surfaced shortly after the election. Defeated mayoral candidates Sally Pryor and Kathy Stracener questioned the results, particularly regarding the high percentage of absentee ballots mailed in by people who claimed to be disabled.

Pryor had copies of hundreds of absentee ballot applications, some with similar signatures, that she had requested before the election.

The newspaper asked the city for copies of those applications, but the election judge had locked them in the ballot box with actual ballots. State law requires that the ballot box remain sealed for 60 days after an election unless a court order is obtained to open it.

The only two people eligible to obtain such a court order - City Attorney Bryan Russ and Mayor Ruben Gomez - initially declined to do so, choosing instead to let the 60-day period pass. Both were elected by wide margins in May.

Gomez changed his mind when the issue didn't die down. The ballot box was opened 19 days after the election, and Paschall obtained the documents for his investigation. The newspaper obtained absentee ballot applications.

The 2000 Census said Hearne had 539 people aged 21 to 64 identified as disabled. The newspaper counted 657 absentee ballot applications from voters claiming to be disabled.

In contrast, the May municipal election in Bryan, a city much larger than Hearne, included 35 absentee ballots from voters saying they were disabled.

In August, Paschall announced 17 people had been indicted on charges of voting fraud, a third-degree felony punishable by two to 10 years in prison and a fine of up to \$10,000. At the top of that list was Charles Workman, who pleaded guilty in October to illegal voting for casting 34 ballots in the Hearne

029625

election.

Workman didn't cast a ballot in his own name, but he voted for nearly three dozen other residents using absentee ballots. He also forged forms saying some people had moved from one home to another.

Workman was sentenced to five years probation and will not be allowed to campaign or collect absentee ballots during that time.

"We're not going to tolerate it," Paschall said. "I certainly hope everyone understands you have to vote your own ballot."

Dallas Morning News -Voters: Mail ballot signatures forged

**Candidate denies signing applications; DA investigating**  
04/22/2003

By DAVE MICHAELS / The Dallas Morning News

A Dallas City Council candidate submitted at least 12 mail ballot applications that contained the forged signatures of voters, according to interviews with voters and the elections administrator.

Clair Conly Woertendyke, a candidate for council District 3, submitted about 265 applications for mail ballots this month. The Dallas County elections department spotted the questionable applications because they appeared to be signed by the same person and came from the same West Dallas precinct. The Dallas County district attorney's office is investigating the possibility of forgery.

In interviews, eight voters said they did not sign the applications that Mr. Woertendyke sent to the elections department. And two of the voters whose applications were submitted moved from West Dallas more than a year ago, neighbors said.

Mr. Woertendyke said he did not forge the signatures and argued that it could not be proved whether the signatures are bogus. He said a voter's relative might have signed the application for the voter, and the voter simply forgot. He said neither he nor his campaign volunteers could ask a voter for identification.

"Most of these seniors ... can't remember what they did yesterday," said Mr. Woertendyke, who lost an election for Dallas County clerk in November. "There is always the possibility that someone in the family signed for it and the person [the voter] did not know."

Bruce Sherbet, Dallas County elections administrator, said Monday that he had sent the applications to the Dallas County district attorney's office for investigation.

"There is no question in my mind that the voters didn't sign those applications," Mr. Sherbet said.

District Attorney Bill Hill said Monday that his prosecutors were investigating the information given them by the elections department.

"We are trying to determine whether or not there were forgeries on these mail-in ballot applications," Mr. Hill said. "And if in fact they were forgeries, who actually committed the offense."

In Texas, residents can vote by mail if they are at least 65 years old, disabled or plan to be gone during the period of early voting and on election day. Voters must sign an application for a mail ballot, which authorizes the elections department to send them a ballot.

#### Mail ballot controversies

But in Dallas and some other Texas counties, the mail ballot system has been controversial. Campaign workers have visited the homes of elderly voters to influence their votes and even taken ballots before voters could mark them.

A state district judge voided the results of the Dallas City Council District 4 race in 2001 partially because of mail ballot forgeries.

The Texas Legislature is considering a bill that would tighten regulation of mail ballots. One of Mr. Hill's prosecutors, Ben Stool, helped write the bill with state Rep. Steve Wolens, D-Dallas. It increases the criminal penalties related to mail ballot fraud.

All 12 voters are 65 or older. Several cannot leave their homes without the assistance of relatives, the voters and their relatives said. But some said they vote at the polling place and were visibly upset that someone had submitted an application for them.

"That is not my signature on there," said Norman Jones, a 65-year-old retiree who lives on Vilbig Road. "I try to get down to the polling place to vote. I like to make my vote count."

Said Henry Moore Jr., 70: "If I find out who [signed my name], I'll sue them."

Another couple whose applications were sent, Milas and Lorine Franklin, left West Dallas more than a year ago, said Terry Webster, a former neighbor. Another family, the Alvarados, answered the door on the day a reporter visited the house.

When Mr. Woertendyke sent the applications to the elections department, his campaign put Mark Baker's name and address on the envelope. Mr. Woertendyke said Mr. Baker collected most of the applications in the precinct "except for a few that I picked up."

Mr. Baker is a longtime West Dallas resident who serves on the city's Martin Luther King Jr. Community Center Board. Ed Oakley, one of Mr. Woertendyke's opponents in the May 3 election, appointed Mr. Baker to that board.

#### Connection denied

Mr. Baker said he often tries to help seniors vote by mail. But he denied dealing with the applications that Mr. Sherbet said were forged.

"I have a regular set of people who vote each election," Mr. Baker, 37, said. "These are not the folks I have written up."

But Mr. Baker allowed his name to be written on the envelope that was sent to elections headquarters, he said. Mr. Baker said he collected perhaps 50 of the 265 applications that Mr. Woertendyke sent.

"Clair asked me if he could use my address," Mr. Baker said. "With him being the candidate, he didn't think it was good having it couriered in under his name – for his protection."

Mr. Woertendyke said he used Mr. Baker's name and address because he doesn't believe that the media should know how he conducts his campaigns.

"The media make something out of nothing," he said. "Everything was done perfectly legal, and you didn't have a right to know."

Mr. Woertendyke is campaigning to represent council District 3, an area that covers parts of West Dallas, Oak Cliff and the Mountain Creek area. His opponents are incumbent Mark Housewright and Mr. Oakley, another sitting council member.

#### Three-way race

Mr. Oakley was drawn into District 3 during redistricting. Mr. Housewright and Mr. Oakley said they were upset to learn about the questionable applications.

Those voters who said their signatures were forged have received mail ballots. Several, such as Mr. Jones, said they intended to vote at a polling place.

To cancel the mail application, the voters must submit a request in writing, Mr. Sherbet said.

Otherwise, they have to take the mail ballot to a polling place, where they must surrender it to an election judge to be allowed to vote in person. That measure is intended to protect against people who would vote twice by casting a ballot on election day and then sending a mail ballot later, Mr. Sherbet said.

But the voters who lose their mail ballot or forget to send a cancellation letter might find themselves locked out on election day.

"It's horrible," Mr. Sherbet said. "These folks could lose their right to vote."

## No prison in election fraud case

### Activist will spend 6 months at House of Correction for absentee ballot forgeries

By DAVE UMHOEFER  
[dumhoefer@journalsentinel.com](mailto:dumhoefer@journalsentinel.com)

Posted: Feb. 20, 2004

Bolstered by prominent character witnesses, voting-rights activist Vincent Knox avoided prison Friday on three felony convictions that stemmed from an investigation into absentee-voting fraud in a Milwaukee County recall election last March.

Circuit Judge David Hansher rejected a prosecution request for prison time and sentenced Knox to six months in the House of Correction with work-release privileges.

A prosecutor urged Hansher to hold Knox partly responsible for forgeries on 40 of 160 absentee ballots turned in by workers under Knox's supervision during the recall election involving County Board Chairman Lee Holloway. Knox ran a novel absentee drive that put ballots in the hands of his employer, an organization known as the African-American Coalition for Empowerment (ACE).

"Are we going to tolerate ghost votes being cast?" asked prosecutor Kurt Benkley, who sought a three-year sentence for Knox, half of it in prison time. Benkley recounted how a voter in the 5th District race had gone to vote for Holloway's opponent, Yolanda Staples-Lassiter, but effectively was canceled out because an ACE worker had forged an absentee ballot in the voter's name for Holloway.

Benkley argued that the perjury conviction against Knox, for lying to investigators at a John Doe hearing, alone deserved prison time.

"If citizens feel they can lie (at a John Doe hearing) it renders it dull," Benkley said of the seldom-used investigative tactic, in which witnesses are questioned in secret in front of a judge.

Benkley pressed the prosecution's argument that Knox's effort was designed to help Holloway - an allegation that Holloway and Knox have denied under oath. Holloway won the election handily.

Hansher said evidence at trial left it unclear whether there was a grand scheme to defraud, or merely widespread short-cutting by Knox's crew, or both.

"There's more to this than we know," Hansher said, citing the perjury charges leveled against various ACE workers in separate cases.

A jury found Knox guilty last month of three counts relating to a single forged registration card and perjury at a John Doe investigation. The maximum possible sentence was 13 years in prison.

The absentee drive, which city election officials discouraged Knox from undertaking, put absentee ballots in ACE's hands. Knox's crew went door to door in Holloway's district getting people to apply to vote absentee and agree to have the ballot sent to ACE, which then returned to the would-be voters' homes, witnessed their votes and turned in the ballots at City Hall. The drive did not follow that script, trial testimony showed. The unusual process - which Knox calls "vote by mail" - is legal under state law if performed correctly.

Hansher said the case was not a victimless crime. It had tarnished the city's reputation for clean elections, he said.

029630

Knox pleaded for leniency Friday, citing his long activism for minority voting rights. His attorney, Tom Erickson, sought probation and community service for his client.

Three witnesses vouched for Knox's character, among them Vel Phillips, a pioneer in electoral politics who was Milwaukee's first black alderman. In addition, state Sen. Gwendolynne Moore, former county executive candidate Tyrone Dumas and many co-workers, friends and neighbors wrote letters of support.

In addition to the House of Correction time, Knox must serve three years of probation. As a convicted felon, he cannot vote while under supervision. Hansher forbade him from doing voter registration work while on probation.

So far, prosecutors have had mixed success in the absentee investigation, in which nine people were charged. One of the ACE workers, Barbara Triblett, was acquitted at trial last month. Prosecutors shortly after that reduced the charges in another case, against Velma Jackson, to two misdemeanors. Jackson pleaded guilty and was fined \$200.

Barbara A. Burton, another field worker in the absentee drive, pleaded guilty to a misdemeanor in December and was fined \$200.

Five others who worked for ACE under Knox's supervision are awaiting trial on felony charges.

## Voting-rights activist convicted of fraud

### Knox mishandled drive during county recall election, jury decides

By DAVE UMHOEFER  
[dumhoefer@journalsentinel.com](mailto:dumhoefer@journalsentinel.com)

Posted: Jan. 14, 2004

Milwaukee voting-rights activist Vincent Knox was convicted Wednesday on three felony counts stemming from irregularities in an absentee-balloting drive he ran during a county recall election last March.

A year after he thought he had hit on a novel idea for boosting sluggish African-American voter turnout, Knox is fighting to stay out of prison.

A Milwaukee County Circuit Court jury deliberated five hours before agreeing with the state's contention that Knox, a 25-year veteran of voting-rights causes, had criminally mismanaged aspects of the absentee drive.

Judge David Hansher set sentencing for Feb. 5. Prosecutors, who pledged to seek prison time, sought to hold Knox in jail until sentencing, but Hansher rejected that idea.

Knox's attorney, Tom Erickson, cautioned his client against commenting after the verdict but questioned why Knox was prosecuted for a voter-registration error.

He mentioned the numerous problems with elector signatures in Milwaukee County Sheriff David Clarke's mayoral nomination papers and asked why that was not being investigated.

"It seems curious that Vince Knox, who's spent his whole life getting people to vote, is on trial," Erickson said.

The absentee drive was run by Knox for an organization known as the African-American Coalition for Empowerment (ACE). The move surfaced just days before the recall campaign won by Milwaukee County Board Chairman Lee Holloway.

Holloway hired ACE to help with his campaign, but he testified that the group's absentee drive was separate from his own campaign work and that he was unaware of it. He has not been charged.

The drive, which election officials discouraged Knox from undertaking, put absentee ballots in ACE's hands.

Knox's crew went door to door in Holloway's district getting people to apply to vote absentee and agree to have the ballot sent to ACE, which then returned to the would-be voters' homes, witnessed their votes and turned in the ballots at City Hall. The unusual process - which Knox calls "vote by mail" - is legal under state law if performed correctly.

District Attorney E. Michael McCann responded aggressively when the alleged ballot problems became public. His investigators were at polling places for the March 4 election on Milwaukee's north side and challenged and sealed 10% of the votes cast.

A police handwriting expert had labeled as suspicious the signatures on dozens of absentee ballot envelopes.

In all, Knox and eight other ACE workers were charged. One pleaded guilty to a reduced charge last month. The others are standing trial separately in the weeks ahead.

029632

For Knox's trial, prosecutors argued that ACE's motive was to get absentee votes for Holloway, an allegation they tried to back up through testimony about absentee ballots cast for Holloway by fictitious voters at non-existent addresses.

Although evidence suggested forgery and other mischief plagued the absentee effort, Knox's case turned on one voter registration card bearing his signature as a deputized voter registrar. The purported voter, Willie Dawson, had his name forged on the card by a girlfriend, testimony showed. And Knox's explanation of how he could have witnessed Dawson sign the card apparently held little weight with jurors.

Jury foreman Mark Scott told a reporter that while the jury respected Knox's political credentials, the number of mistakes made by Knox's voter-recruitment crew suggested tampering.

"Your voting rights are a privilege," Scott said. "It's not to be taken lightly."

Knox was convicted of perjury, misconduct as a voter registrar and election fraud, which carry a combined penalty of up to 13 years in prison.

The perjury count stemmed from his testimony at an investigative hearing conducted before charges were filed.

Knox and ACE are well-known in political circles. Knox successfully sued Milwaukee County on a race-related redistricting case.

## State charges former mayor with vote fraud

By Laurence Hammack

981-3239

The indictments allege voters were persuaded to cast illegal votes by absentee ballot. Background on the disputed Gate City voting

GATE CITY - Charles Dougherty was charged Monday with running a campaign of fraud and deceit to win another term as mayor of Gate City.

Dougherty was indicted on 37 felony counts of voter fraud by a Scott County grand jury in the first charges to come from a lengthy investigation of a small-town election marred by allegations of corruption. The indictments allege voters, many of them elderly or prone to manipulation, were approached by the candidate and persuaded to cast illegal votes by absentee ballot.

Although Dougherty was re-elected mayor in May 2004 with a large number of absentee votes, he lost the job a few months later after his opponent, Mark Jenkins, challenged the results in court.

In a complaint filed in circuit court last year, Jenkins blamed not just Dougherty, but also the Scott County registrar's office for some of the voting irregularities.

The office is headed by Willie Mae Kilgore, mother of Republican gubernatorial candidate Jerry Kilgore.

Willie Mae Kilgore has been accused in a separate lawsuit of running the registrar's office in a partisan way, and her role in the 2004 Gate City elections was cited recently when she was asked to resign by the candidate running against her other twin son, Del. Terry Kilgore, R-Scott County.

Yet Joel Branscom, the Botetourt County commonwealth's attorney who was appointed special prosecutor in the case, said the investigation to date has found evidence to support charges only against Dougherty.

Branscom noted that the probe is ongoing.

"When you stir a pot like this, you never know what might come up," he said.

029634

Monday's indictments marked the second legal action in less than a week involving election fraud in far Southwest Virginia. Last Wednesday, the commonwealth's attorney in neighboring Wise County called for a special grand jury to investigate allegations of vote-buying and ballot theft in May's elections for the town council of Appalachia.

Dougherty, a former Scott County sheriff's deputy who works at the county's regional jail, was charged with 18 counts of aiding and abetting in violating the absentee voting process, 17 counts of making a false statement on an absentee ballot application, and two counts of conspiracy.

Many of the charges involve people who gave false reasons for voting by absentee ballot. Absentee voting is allowed in Virginia under certain circumstances, such as for people out of town on Election Day or unable to vote in person because of health reasons. It is a felony to make a false representation on an absentee ballot application.

Critics of the absentee voting process in Virginia say it is easy for an unscrupulous candidate to persuade a voter in private to obtain absentee ballots under false pretenses.

Some of the absentee ballot applications in the Gate City election contain similar reasons for a voter not being able to make it to the polls, such as the ailment of "crippling arthrim." [sic]

In Dougherty's case, authorities allege, the candidate took it a step further by also assisting the voters in casting their ballots.

Many people told a state police investigator that they "were voted" by the candidate. "It's a new phrase that I am still trying to find a definition for - 'He voted me,'" Branscom said.

In an interview in February, Willie Mae Kilgore said it is the voter's responsibility to be truthful on absentee ballot applications. As registrar, Kilgore said, she must take their word for why they cannot vote in person.

Rather than charge the voters, Branscom chose to hold the candidate accountable.

"When you subject yourself to 370 years in prison for trying to become the mayor of a small town, you're putting your liberties at risk when you do it," he said.

Each one of the 37 charges Dougherty faces carries a maximum punishment of 10 years in prison. He will be allowed to turn himself over to authorities and remain free on

029638

a personal recognizance bond, Branscom said.

Dougherty could not be reached for comment Monday.

In an interview earlier this year, he said he did nothing wrong in the weeks leading up to the town elections of May 4, 2004.

"I've always worked the absentee ballot hard in every election," he said. "That's part of campaigning. When people say they're going to be out of town or in the hospital, I encourage them to go out and vote absentee."

And as it turned out, the absent electorate proved crucial to Dougherty's two-vote re-election victory.

Of 158 absentee ballots cast in the mayor's race - about one of every five votes cast - Dougherty received 138. Jenkins was quick to challenge the results, and a three-judge panel invalidated the election in September. Jenkins was then named mayor by a new town council appointed by the judges.

Jenkins said Monday he was relieved to hear that criminal charges finally have come from the concerns he raised 15 months ago.

"The voting system is something that we should not be messing with," he said. "It's the foundation of freedom."

The mayor said he hopes the investigation will yield additional charges against others whom he believes have been involved in manipulating the absentee vote in Scott County. "This has been going on for years," he said.

## Residents say former mayor filled out ballots

By Laurence Hammack

981-3239

"He done the voting, but I signed the paper," Vernoil Littrell said of Gate City's ex-mayor Charles Dougherty. Background on the story

GATE CITY - Vernoil Littrell had lots of reasons for not being able to vote in person in last year's town election: For one thing, he was confined to his home, suffering from crippling arthritis and a bad heart.

He was also working a 13-hour shift at Food Lion on Election Day, according to his absentee ballot application - a document that authorities say was falsified. "I don't even go to Food Lion," Littrell said Tuesday. "I don't know why he put all that down."

The "he" Littrell was referring to is Gate City's former mayor Charles Dougherty, who was charged Monday with election fraud and making false statements on absentee ballot applications submitted on behalf of Littrell and 19 other town residents.

In a brief interview Tuesday, Dougherty said he is innocent of the 37 felony indictments returned against him by a Scott County grand jury.

According to Littrell, Dougherty came to his apartment complex last April looking for votes. Seeking re-election at the time, the mayor had a stack of blank absentee ballot applications in his hand.

Littrell said he signed the paperwork that Dougherty filled out. In handwriting that appears similar to that on other absentee ballot applications on file at the county courthouse, the following reasons are listed for Littrell not being able to vote in person: "crippling arthritis; confined to home; heart condition."

He does have arthritis, Littrell said. And he is confined to his home.

But, he said, "I ain't got no heart problem. I went to the doctor last week. My heart's all right."

The absentee ballot application was submitted to the Scott County registrar's office, which issued Littrell a mail-in ballot

029637

- even though the application seems to raise the obvious question of why someone with so many ailments could be working 13 hours at Food Lion.

After the ballot arrived in the mail, Littrell said, Dougherty came back to his apartment to help him vote. The way he tells it, the mayor did more than help. He filled out the ballot, voting for himself.

"He done the voting, but I signed the paper," Littrell said.

Botetourt County Commonwealth's Attorney Joel Branscom, who last year was appointed special prosecutor to oversee a state police investigation of the election, said other people have also said they were "voted" by Dougherty under similar circumstances.

Absentee voting abuses - which are also the subject of a special grand jury investigation into another election in neighboring Wise County - can allow dishonest candidates to amass a stealth electorate by focusing on voters who can easily be manipulated, critics of the process say.

Dougherty made the rounds in Littrell's apartment complex, where most of the residents are elderly or disabled, the 67-year-old Littrell said.

"All the way around," Littrell said, waving his arm to indicate the path taken by the allegedly vote-hungry politician that day.

On the other side of town, Dougherty was also seen knocking on the doors of Clinch View Manor Apartments, a government-subsidized complex for the elderly, disabled and handicapped.

He found Maxie Overbey in the laundry room.

"He hunted me down," Overbey said. "Or he looked 'til he found me, anyway."

Like Littrell, Overbey said she signed a blank absentee ballot application that Dougherty filled out. And like Littrell, her reason for not being able to vote was crippling arthritis.

While she does have a touch of arthritis, Overbey said it never prevented her from driving to the polls to vote in other elections.

Voting by absentee ballot would save her a trip to the polls, Overbey said she was assured by Dougherty. It was only after a state police investigator came knocking on her door that she took a close look at the absentee ballot application.

029638

"Oh, Lord. I hate that I did that," she said. "I got took in by it."

A strong showing of absentee votes helped Dougherty squeak out a two-vote victory on May 4, 2004. But his re-election was later invalidated when his opponent, Mark Jenkins, challenged the results in court. Jenkins was later appointed mayor by a new town council named by a three-judge panel that heard the case.

Now, nearly a year later, the botched town election has gone from being the subject of a lawsuit to an ongoing criminal investigation.

After hearing from a state police investigator Monday, the grand jury charged Dougherty with 18 counts of violating absentee voting procedures, 17 counts of making false statements on ballot applications, and two counts of conspiracy.

In a brief telephone interview, Dougherty said he is innocent.

"It was elderly people, mostly, that I voted," he said. "They were the ones that signed the affidavits saying they couldn't go to the polls.

A short time after proclaiming his innocence, Dougherty turned himself over to authorities and was allowed to remain free on a personal recognizance bond. He is scheduled to be arraigned Aug. 15.

While the charges are pending, Dougherty also will keep his job as a correctional officer at the Southwest Virginia Regional Jail in Duffield. He is presumed innocent of the nonviolent charges, said Maj. Matthew Pilkenton of the regional jail.

In an earlier interview, Scott County registrar Willie Mae Kilgore said it is the voter's responsibility to give an honest answer when requesting permission to vote by absentee ballot. Absentee voting is allowed in Virginia only under certain circumstances, such as a voter being out of town on Election Day or unable to make it to the polls because of illness or disability. Making a false statement on an absentee ballot application is a felony that carries up to 10 years in prison.

But Branscom has said he is not comfortable bringing charges against people who were taken advantage of. To date, Dougherty is the only person charged in the investigation.

Ronald Kindle, who lost a bid for town council in the same election, said Tuesday that he believes the registrar's office

029630

should have known that something was amiss.

He and other town residents questioned whether powerful political connections will prevent the full story from ever being told in a courtroom.

Willie Mae Kilgore is the mother of twin sons, Del. Terry Kilgore, R-Scott County, and GOP gubernatorial candidate Jerry Kilgore. Her husband is the longtime chairman of the Scott County Republican Party, and a third son heads the county economic development authority.

While the registrar's politics have been questioned in lawsuits, Branscom said the criminal investigation has produced no evidence to implicate the office - at least not so far.

"I never say never," the prosecutor said. "But certainly at this point I have no intention of going forward in that direction."

## 08.06.03 Bjorklund says clerk raises more questions with official response

By GARY HARMON *The Daily Sentinel*

Mesa County Clerk Janice Ward's official response to his complaint about the 2002 election "raises more questions than it answers," Tom Bjorklund said Tuesday.

Bjorklund has wrangled for months with the clerk's office and filed a complaint last month asking Colorado Secretary of State Donetta Davidson to investigate discrepancies he discovered in the course of studying records of the election.

In her response to Bjorklund's complaint, Ward described the complaint as meritless and an effort to "cast a cloud of suspicion" on her office.

"They're trying to confuse the issue," Bjorklund said Tuesday, pointing to a section of Ward's response dealing with a group of voters whose names appeared on records supplied by the Colorado secretary of state's office, but not on records supplied by the clerk's office to him less than a week after the election.

The nut of Bjorklund's complaint concerns 67 voters who responded to surveys — and in some cases signed affidavits — that they cast ballots in the primary election.

Ward's response addressed some of those cases, explaining some and in other cases simply noting that there was no record of participation in the 2002 primary.

Bjorklund said that all names of people whose claims to having voted in the election weren't reflected in the records would be passed on for further investigation.

If a voter presents a claim to having cast a ballot in the primary that isn't reflected in the records, "Our office would investigate," said Amy Storm-Farley, chief deputy clerk. "Our office not been approached by any elector directly claiming what Mr. Bjorklund is claiming."

One resident who signed an affidavit that he voted in the primary said Tuesday he was "almost positive" of his participation, though he had no specific recollection of casting a ballot.

"I'm a voter," Don McGuire said.

Voter John Grimsley, who was cited on the Bjorklund list, said he had no specific recollection of voting or not in the primary. Another, Carl Burley, said he remembered specifically voting in the November election, but couldn't recall a specific memory about voting in the primary.

Phone calls to several others on the list weren't returned immediately.

It makes little sense that those voters wouldn't have cast ballots, Bjorklund said, because they tended to be politically active, donating to and organizing campaigns. One was a significant Ward contributor, he said.

Aspects of the dispute now have reached district court and the Mesa County District Attorney's Office.

A hearing is scheduled to continue later this month in a case in which Ward sought a ruling on whether some of the information sought by Bjorklund was public record.

Investigators with the district attorney's office also are studying an affidavit to determine whether a crime was committed when the clerk's office disposed of unsigned signature cards after the election.

The unsigned cards, which were left over after voters presented signed cards to receive ballots at polling places, also are an important part, in their absence, of Bjorklund's case.

The unsigned cards are legitimately a part of the audit trail for the election, Bjorklund said, and their absence is suspect.

Although Ward has promised cooperation, Bjorklund said, the clerk's office "has been less than helpful," in his case.

Officials with the secretary of state are to pick up the primary election records Monday and take them to Denver for an audit.

## Precinct workers gone after probe

By BEN EVANS, The Herald-Sun  
March 29, 2004 10:05 pm

DURHAM -- The Durham County Board of Elections has cleaned house at an eastern Durham polling precinct and will hire new precinct judges after a state investigation into ballot fraud in the November election found irregularities but no clear-cut wrongdoing.

The state Board of Elections closed its investigation Monday without recommending criminal charges. Instead, the state agency recommended that the six judges and assistants from the Durham precinct step down, even those who were not involved in the alleged incident. Durham elections Director Mike Ashe said precinct officials already have agreed to that request.

"Something happened in the precinct. The numbers don't jibe, and precinct officials were making allegations," Ashe said. "On any given Election Day, the huge, huge majority of our precincts score an A-plus. On this day in this particular precinct, they scored a D-minus, and it's disappointing."

"I don't know if anyone will ever know what happened," he said, emphasizing that the allegations involved only a handful of ballots and would not have affected the election's outcome even if proven true.

The probe centered around chief judge Inez Gooch of Precinct 52, located at Evangel Assembly of God on Lynn Road, off Miami Boulevard in eastern Durham.

One of Gooch's fellow precinct workers, Ruthy Jones, told county elections officials that she saw Gooch sitting at a precinct table filling out a stack of about four to six ballots on Election Day. Jones said she asked Gooch what she was doing with the ballots, and Gooch responded that she was holding them for her children, who are voting-age adults, Jones said.

Later, Jones, a Republican, saw Gooch, a Democrat, walking toward the ballot tabulator with a handful of ballots. Knowing that Gooch already had voted her own ballot, Jones said she confronted Gooch as she tried to insert a ballot into the tabulator, telling Gooch that she was breaking the law. Gooch relented and walked back to her workstation, sliding the ballots into a storage tub containing election supplies, Jones said.

After the polls closed, the official vote count found that the number of ballots inserted into the tabulator didn't match the number of "authorization to vote" forms that had been handed out that day. The authorization forms are the documents handed out after voters verify their names and addresses. Voters then exchange those forms for ballots at a separate table.

In addition -- after a narrow margin in the City Council race between Diane Wright and Thomas Stith prompted a recount -- officials found eight more ballots in Precinct 52 than were originally counted on

029643

Election Day.

Gooch, who refused to discuss the situation Monday, has denied submitting fraudulent ballots for family members, and the state investigator said his probe uncovered no pattern or clear evidence of willful wrongdoing.

"When it was presented to us, we pretty much thought it was a shut and closed case, but when we started looking at it, we realized it was a little more muddled than that," state elections Director Gary Bartlett said. "[Our investigator] tried to get as close to the truth as he could."

Ashe said Monday that he was pleased with the investigation. But in a memo sent to the state in November, he wrote that he suspected misconduct and that Precinct 52 had been having administrative problems for years.

In the memo, he "surmis[ed]" that Gooch was illegally filling out ballots. He suggested that the ballots Jones saw Gooch put in a storage bin on Election Day were subsequently found and included in the recount, explaining the higher number of ballots in the second count.

"I believe that other precinct workers were either 'in on it' or at a minimum looked the other way," he wrote.

Another finding from the probe was that one of Gooch's daughters, Sandra F. McCallum, was working as a precinct assistant in Gooch's precinct, even though the state bars family members from working together in precincts.

Precinct judges are recommended by local political parties and appointed by county elections boards. They are paid between \$85 and \$125 for their work on Election Day, plus additional payments of between \$15 and \$25 for training sessions.

Police NewsCourt date postponed in PBA election case

UTICA — A court date for a civil action by Utica police officers alleging ballot box tampering in the most recent police union election was adjourned to April 17 and 18, court officials said Thursday.

The legal action, requesting a new election, was filed in state Supreme Court last month by Utica police Sgt. Gary Glatt, who was defeated by incumbent Sgt. James Franco in a bid for the John E. Creedon Police Benevolent Association presidency during the Dec. 9-10 election.

The action alleges a discrepancy in vote tallies as well as improper placement of the ballot box and the immediate disposal of the ballots after the election, court documents state.

Police probe death of baby

UTICA — Utica police are investigating the death of a baby who died in its crib Thursday on West Street, Lt. Mark Williams said.

Further details could not be learned Thursday night.

— Cecilia Le

Police arrest 3 on drug charges

UTICA — Police Thursday arrested three people and seized an ounce of crack cocaine with a street value of \$2,500, marijuana and money in the 1200 block of Whitesboro Street, the state police Community Narcotics Enforcement Team said.

Terrel L. Loadholt, 24, was charged with criminal possession of crack cocaine with intent to sell, a felony. Two other Uticans, ages 22 and 27, were charged with unlawful possession of marijuana.

Loadholt was sent to Utica City Jail pending his arraignment today. The other two were released on appearance tickets to return to Utica City Court.

The Olympian (Olympia, Washington)

May 30, 2005 Monday

**SECTION:** NATIONAL; Pg. 2A

**LENGTH:** 1011 words

**HEADLINE:** Gubernatorial election trial highlights

**BODY:**

The first week of trial has concluded in Republican Dino Rossi's court battle to set aside Democrat Christine Gregoire's Nov. 2 victory in the governor's race. Gregoire won by a scant 129 votes amid many voting irregularities and errors, but the question is whether there is sufficient basis to reverse or nullify the election under state law.

**"SINISTER FRAUD:"** Republican attorney Dale Foreman alleged in opening statements Monday that "sinister fraud" by high-ranking King County elections officials tipped the election to Gregoire by allowing more illegal votes to be counted in Gregoire-friendly districts. He also alleged ballot-box stuffing and thefts of votes from Rossi.

A fraud finding would have been critical to getting around a 1912 Supreme Court ruling that, in effect, requires the petitioner to show how illegal votes were cast.

**TURNING ON KING COUNTY:** King County Elections Superintendent Bill Huennekens testified Tuesday that he did not realize a mail-ballot report given to the county's vote canvassing board Nov. 17 had false or incorrect data until later. He also acknowledged errors in ballot counting, including more than 300 provisional ballots fed by voters into Accuvote machines at poll sites before the voters' statuses were verified. Regardless, he said the county followed procedures on dealing with possible felon voters.

**MAIL-IN BALLOTS:** King County's mail-ballot supervisor, Nicole Way, testified Wednesday that she did not know the mail-in ballot-report numbers were false when she forwarded them to her boss, Garth Fell; Fell then gave them to Huennekens for the vote certification. This appeared to contradict Way's earlier statements in a deposition that she and Fell put false data on the form because they could not properly account for absentee ballots.

**MORE VOTES THAN VOTERS:** Clark Bensen, a data expert hired by Republicans, testified over Democratic objections Wednesday that Gregoire was favored in five precincts showing more votes than voters credited with voting and that Rossi was disfavored in six precincts showing fewer votes counted than there were voters credited. The implication, according to GOP lawyer Dale Foreman, was that fraud or some other interference led to this "nonrandom" variation in the data, but Democrats say the allegation lacks substance.

**STATISTICAL ANALYSIS:** Judge John Bridges agreed Thursday to let Republicans present evidence from statistical analyses by two experts that purport to show Rossi would have won. The Rossi victory margin would have been somewhere between 60 and 100 votes if illegal or invalid votes — including those cast illegally by felons or on behalf of dead people — were excluded from the totals, according to the analyses.

**JUDGE'S RULING:** Bridges said he was reserving judgment on whether he would ultimately accept into evidence the experts' testimony, which Democrats fought to exclude on grounds it is not a reliable way to learn how voters cast ballots.

Bridges explained his decision by saying that he knows the case is destined for appeal to the state Supreme Court and he wants the justices to have "as large a record as possible, for which they may not thank me actually."

"I have some concerns based on the testimony I've heard," Bridges noted. "But I'm going to reserve ruling on this and ask counsel to go ahead and put on their case."

**EXPERT TESTIMONY:** Republican-hired political science professor Jonathan Katz of the California Institute of

029653

## Gubernatorial election trial highlights The Olympian (Olympia, Washington)

Technology presented his data analysis later Thursday showing that illegal felon votes in Gregoire-friendly precincts likely followed the pattern of other votes in those districts, resulting in her victory. Another Republican consultant, associate professor Anthony Gill of the University of Washington, offered a similar analysis showing that Rossi would win by 94 votes if all invalid votes identified by the GOP were excluded.

Both cited a federal study showing felon voters tend to vote Democratic.

Democrats countered that neither analysis was based on generally accepted science and that both experts failed to account for the full universe of ballots cast improperly, including those in Eastern Washington counties that favored Rossi.

**"ECOLOGICAL" FALLACY:** Democratic expert Christopher Adolph, an assistant professor at the UW's Center for Statistics and Social Science, said the GOP analyses are invalid and based on a common "ecological" fallacy known to statisticians for 50 years — namely that one could deduce how an individual behaved by knowing something about how a group behaved. He said a better way to learn how individuals voted is to ask them — an impossibility in a case where the identity of many allegedly illegal votes is not known.

To illustrate the fallacy, Adolph used a baseball analogy. If all anyone knew was that the Seattle Mariners' baseball team batted for a .270 average last year, the Republican theory would lead one to infer that Ichiro Suzuki also batted .270 — clearly the wrong answer since Suzuki led the league with a .372 mark and set a record for hits.

**THE TRIAL GOES ON:** Democrats moved to dismiss the Republicans' case Friday, saying there was no direct evidence showing how illegal votes were cast, which the judge had listed in a May 2 pretrial ruling as one of six tests to meet. Democrats also said there is no evidence of fraud, but Republicans insisted there is circumstantial evidence of wrongdoing and that voting errors and possible fraud make it impossible to know whether Gregoire won.

**MAIL-IN BALLOTS:** Democrats began presenting evidence, summoning a half-dozen Republican and Democratic county auditors from areas that favored Rossi to testify. They said their election staffs also counted illegal felon ballots; they counted unverified provisional ballots that had been fed improperly into ballot boxes or counting machines; and they had other voting irregularities, including uncounted ballots that turned up after the election, but in smaller numbers than the 96 found in King County and 64 found in Pierce County.

Third ballot recount is being considered

The ballot recount from the Nov. 5 election could last until Wednesday because of lingering questions about what to do with vote tallies handled by three election workers who were fired last week.

Bexar County Judge Nelson Wolff is expected to make a statement today about whether elections officials will have to count about seven disputed precincts for a third time.

County Elections Administrator Cliff Borofsky said the precincts handled by the three-person counting team were set aside last week after problems were discovered during a spot check of the ballot boxes.

The team included two Democrats, Mark Garrett and Mike Miklas; and one Republican, Martha Martin.

District Clerk Reagan Greer filed a complaint with Wolff last week asking that the boxes, which include about seven precincts, be recounted because of an allegation that Garrett switched 12 votes from Republican to Democratic candidates.

Garrett vehemently denies tampering with the votes.

No allegations have been made regarding Miklas and Martin. But Martin filed an affidavit with the county judge's office accusing Garrett of calling votes out too rapidly for her to tabulate them properly.

2 bank robbery suspects arrested

Two bank robbery suspects, linked to separate incidents, were arrested within hours of each other Monday.

Stephen Joy, 23, of Chicago, and Michelle Mitchell, 18, of San Antonio, were each being held at the Bexar County Jail late Monday, and were waiting for their bonds to be set.

Joy was charged with robbery. Mitchell was charged with attempted robbery.

According to the FBI, Joy entered the Compass Bank at 7575 Wurzbach Parkway at 10:15 a.m. and handed a teller a demand note. He fled in a late model Chevrolet Caprice, which was found abandoned a short time later, the FBI said. Joy was arrested after San Antonio police traced the vehicle to him, the FBI said.

Two hours after the robbery at the Compass Bank, authorities said Mitchell entered the Sterling Bank at 2700 N.E. Loop 410 and handed a teller a demand note. She was arrested by a security guard at the counter, the FBI said.

In both incidences, no weapons were used.

Man arrested in postal robberies

U.S. Postal inspectors on Friday arrested a 20-year-old man, alleging he robbed the Serna Post Office twice in a week.

Shortly after 3 p.m. on Nov. 29, a man robbed two clerks at gunpoint and fled.

029857

Postal inspectors were working with San Antonio police, who had been investigating several armed robberies on Austin Highway, when the same post office was robbed again on Dec. 6.

At about 3:30 p.m., the robber fled the post office with stolen money and carjacked an elderly woman in the parking lot.

Authorities on Monday said David Aundra Straughn was charged with robbery and carjacking.

Sickly puppies found in pickup

Three sickly chow-mix puppies that were found in the back of a pickup by students at Northwest Vista College have been turned over to the Humane Society for treatment.

The owner of the vehicle turned the bleeding and weak puppies over to Alamo Community College District police, who in turn took them to the Humane Society/SPCA of Bexar County for quarantine.

The puppies are being treated for mange and secondary illnesses, including eye and bacterial skin infections.

ACCD is considering filing criminal charges against the dogs' owner.

The Humane Society will take care of the puppies until they recover. For more information, call (210) 226-7461.

Collision kills teen in New Braunfels

NEW BRAUNFELS - A Canyon High School student was killed late Sunday in a car wreck that also hospitalized a teenager from Seguin.

Gabriel Villalobos, 17, was declared dead at the scene of the accident. Amber Lane, 17, of Seguin, was taken to Brooke Army Medical Center where she was in critical condition, but improving.

Villalobos was driving a 1994 Kia with Lane as a passenger. His car was struck by a 2000 Chevrolet pickup as Villalobos turned left off Kuehler Avenue on Business 35 North at about 8:10 p.m. Sunday, officials said.

The driver of the pickup was treated and released from McKenna Memorial Hospital.

LaSalle residents sue over prison

Claiming that LaSalle County leaders have acted secretly and without giving proper legal notice to the public, a group of Encinal residents sued Monday to block construction of a new federal detention center there.

The suit, filed against LaSalle County Judge Jimmy Patterson, the county commissioners and the LaSalle County Public Facilities Corp., comes more than a month after the corporation sold \$22 million in high-interest bonds and paid out the proceeds for the project.

"This suit is about the process. It's about violations of the Texas Open Meetings Act," said Donna Lednický of Encinal, one of three named plaintiffs.

Supporters say the detention center will bring 150 badly needed jobs to LaSalle County, and provide a boost to the local economy.

Student imposter is sentenced

HOUSTON - Writing a letter of apology to Rice University and paying back \$107.99 for food he ate in the school's cafeteria are among the punishments a man who posed as a student received Monday.

County Court at Law Judge Jim Anderson sentenced Rodrigo Fernando Montano, 24, to 18 months probation for passing himself off as a Rice student and practicing with the track team.

Montano was charged with theft for signing vouchers in the school's cafeteria to eat lunch.

Montano also must perform 40 hours of community service as part of his sentence.

Man arrested after strip club rampage

WICHITA FALLS - A man upset that his daughter was working at a strip club was arrested after allegedly going on a

029853

rampage in the building, destroying furniture and carrying what appeared to be a pipe bomb, authorities said.

Lee Wayne Lawrence, 41, was in survival gear when taken into custody unharmed at Maximus after police persuaded him to surrender Saturday night, authorities said.

He was charged with aggravated assault and was being held Monday on \$500,000 bond, a jail spokesman said.

Lawrence damaged two 7-foot bubble lamps and a leopard-skin chair and stabbed three table tops with a knife, police said.

Authorities said they were analyzing whether another device he carried was a bomb.

**HEADLINE:** GOP must back up claim of election fraud; Dino Rossi's attorney claims the governor's election was stolen - a charge that requires evidence of criminality, not just incompetence.

**BODY:**

Republicans have flung the political "F word" - fraud - at the King County ballot count that made Christine Gregoire governor. Washingtonians will soon find out if the Republicans have the evidence to make it stick.

Until Dino Rossi's challenge of Gregoire's election challenge went to trial Monday, his supporters had largely focused on mistakes made in heavily Democratic King County, either legal ballots that didn't get counted or illegal ballots cast by felons that did.

The Republicans can cite many hundreds of wrongly excluded or included votes - more than enough, in theory, to erase the paper-thin 129-vote lead that put Gregoire into the governor's mansion.

But the trial judge, John Bridges of Chelan County Superior Court, has made it clear that a case built on election mistakes will face a tough test in his courtroom. Merely establishing a large number of mistakes won't do; he wants Rossi's team to demonstrate that the mistakes actually cost him the election.

That will be hard to do without somehow figuring out how many of those secret ballots were cast for him or Gregoire.

It's easier, though, to overturn an election if fraud can be established. On Monday, Rossi's legal team set out to do just that. In King County, GOP attorney Dale Foreman charged, ballot boxes had been stuffed in Gregoire's strongest precincts, while ballots had disappeared in two of Rossi's best precincts.

"This election was stolen from the legal voters of this state by a bizarre combination of illegal voters and bungling bureaucrats," he argued.

And: "The King County data shows partisan bias and not random error."

The Republicans will indeed have a case for fraud if they can show that the election irregularities in King County clearly and consistently favored Gregoire. In fact, that would be the biggest political scandal this state has seen in decades.

But if the evidence Foreman offers consists of "illegal voters" and "bungling bureaucrats," what he's got is the same old collection of felons and King County blunders Washingtonians have been groaning about for months. While incompetent ballot-handling could easily change the outcome of an election as close as this, it can't "steal" the election. For election fraud, you need more: criminal intent, connivance and actual vote-tampering.

Maybe Foreman has substantial circumstantial evidence to back up this charge. He's certainly piqued our interest. But having alleged fraud, he'd better show the court something more than election glitches no one would have noticed had the winning margin been merely close, not microscopic.

**HEADLINE:** Rights panel suspects bias in Florida vote debacle

**BYLINE:** DeWayne Wickham

**BODY:**

The U.S. Commission on Civil Rights' preliminary report on Florida's badly flawed presidential voting was short and to the point. The sworn testimony of more than 100 witnesses at the panel's two fact-finding hearings and weeks of probing by commission investigators were summed up in a single sentence of the four-page statement the body issued last week.

At this phase of its investigation it appears "that the evidence may ultimately support findings of prohibited discrimination," the commission concluded. Not surprisingly, the reaction from Florida Gov. Jeb Bush, on whose desk the buck for the election mess stops, quickly dismissed the panel's finding.

In a statement released by his office, Bush said he has "yet to be presented with any evidence of intentional discrimination" in the voting that took place in his state's 67 counties.

The good news buried beneath this pile of blame and buck dodging is that we're in the home stretch of the search for answers to the gnawing question of what went wrong in Florida. The commission's final report, which is expected to be released this summer, likely will bring to an end the last of the federal and state investigations spawned by widespread accusations of voting irregularities and disenfranchisement in Florida during the presidential election.

Answer still far off

The bad news is that it doesn't look as if we're any closer to an answer that will dispel the widely held belief that it took an act of grand larceny to foist George W. Bush into the White House, or rebuff the counter that those who level this charge are a bunch of world-class sore losers.

The arguments over whether Bush or Al Gore won Florida — a victory that would have given either candidate enough Electoral College votes to be president — have only become more heated recently as media reports on the results of unofficial recounts of contested ballots produce conflicting conclusions of what might have resulted from a more complete tally of ballots cast in the Sunshine State.

029665

Last month, *The Miami Herald* and USA TODAY announced that an analysis of undervotes in Miami-Dade County revealed that had Gore gotten the hand recount of votes in that county, Bush still would have been declared the winner in Florida. This report left Republicans giddy and Democrats questioning the process.

On Saturday, the roles reversed when *The Palm Beach Post* reported that its review of uncounted ballots in Palm Beach County showed that Gore would have picked up enough votes to overtake Bush's slim victory margin in Florida, if every ballot with a hanging chad, pinhole or dimple in that county had been counted.

#### Panel looks to future

Wisely, the Civil Rights Commission is focusing on the future, not the past. "In the final analysis, new recounts of old ballots are an academic exercise," the panel said in its preliminary report, which was adopted by a 6-to-2 vote. "Voting is the language of our democracy and regrettably, when it mattered most, real people lost real opportunities to speak truth to power in the ballot box."

The commission believes that Florida officials may have consciously or unconsciously brought about acts of illegal voter discrimination through its use of a database of disqualified voters. The list was supposed to be used to keep convicted felons from voting and to block votes cast by people registered in more than one county or in the name of a deceased person.

A spokesman for ChoicePoint — the company that compiled the list — said Florida officials directed it to include all possible combinations of names that might help election officials ferret out ineligible voters. That list, the commission said, kept hundreds of eligible people from voting in the presidential election.

Preventing a repeat of this grievous error and ratcheting up the pressure on Florida's reluctant legislature to appropriate money that counties with aging, faulty voting machines can use to modernize their election system are the best things that can come out of the commission's ongoing inquiry.

Getting these things done won't settle the nettlesome question of whether last year's presidential election was won or stolen, but it will go a long way toward ensuring that Florida won't be the epicenter of another election debacle.

*DeWayne Wickham writes weekly for USA TODAY.*

Fraud  
Johnson

TN

Election panel debates 'fraud'

By Craig Boerner, cboerner@nashvillecitypaper.com  
January 12, 2005

The Davidson County Election Commission is debating whether to forward potential cases of perjury or election fraud during the November presidential election to District Attorney General Torry Johnson's office.

Commissioner Lynn Greer wants board members to join him in sending a strong message that there is a legal way to vote.

Greer said 31 provisional voters, for example, are still listed as felons who have not had their voting rights restored.

"If we have some people who have broken the law then we ought to enforce the law," he said.

Other board members aren't as concerned because the votes in question were caught and didn't count.

"The provisional counting board caught the mistake. It's not like the vote became part of the record," Commissioner A.J. Starling said.

"They didn't get away with it. The system works. I don't know if we need to go any further if the system works."

Commission staff members are working to confirm felon status and also to determine which persons were sent a notice of being purged from the voting rolls.

The staff is also investigating if previously registered felons declared their conviction on the application completed to cast a provisional ballot.

Greer's six-part motion to be discussed at the March board meeting doesn't stop at felons; it also includes college students and poll workers.

One request is to "cease to hire" officers of election at precincts that allowed more than five provisional ballots from residents whose address was outside that officer's precinct.

"If we have ineffective poll officials then we don't need to use them again," Greer said. "The truth is these people were trained. They went into breakout sessions learning how to do this provisional voting and they had plenty of chances to ask questions.

By allowing 158 voters to vote at the wrong precinct, poll officials essentially ensured that the person's vote would not count, board members said.

"To turn around and say that, because those officers allowed them to vote, we don't need them anymore is ridiculous," Starling said. "... We are already having enough problems getting people to work at these polls."

Staff is also contacting provisional voters using a university/college campus P.O. box as their address to request they prove residence in Davidson County because a person does not gain residence solely by being a student.

This motion would affect 142 provisional voters from Tennessee State University and 25 Vanderbilt University students.

"What that would do, in my opinion, is frighten people from coming to vote in the first place," Starling said. "If you are prosecuting folks, I'm not going to take a chance if I'm not sure. That defeats the purpose of the provisional ballots."

Other cases include 34 provisional voters who were registered in another jurisdiction. If they voted

029668

in two jurisdictions then they could be convicted of election fraud.

Three voters were denied at early voting because they didn't live in Davidson County but came back and voted on election day.

Greer also wants to know how many of the 693 provisional voters denied for being "not timely registered" actually submitted a voter registration form prior to the election.

# Inquiry finds evidence of fraud in election

## Cast ballots outnumber voters by 4,609

By GREG J. BOROWSKI  
[gborowski@journalsentinel.com](mailto:gborowski@journalsentinel.com)

Posted: May 10, 2005

Investigators said Tuesday they found clear evidence of fraud in the Nov. 2 election in Milwaukee, including more than 200 cases of felons voting illegally and more than 100 people who voted twice, used fake names or false addresses or voted in the name of a dead person.

Officials said charges will be filed in coming weeks, as individual cases are reviewed and more evidence is gathered.

Nonetheless, it is likely that many - perhaps most - of those who committed fraud won't face prosecution because city records are so sloppy that it will be difficult to establish cases that will stand up in court.

And even now, three months after the investigation, officials have not been able to close a gap of 7,000 votes, with more ballots cast than voters listed. Officials said the gap remains at 4,609.

U.S. Attorney Steve Biskupic likened it to trying to prove "a bank embezzlement if the bank cannot tell how much money was there in the first place."

Biskupic announced the preliminary findings at a news conference, along with Milwaukee County District Attorney E. Michael McCann, who is also overseeing the joint inquiry.

Tuesday's announcement comes after a Journal Sentinel investigation that found widespread problems with the election in the city, including that the election totals themselves were not double-checked by city and county panels charged with doing so.

Some of the problems identified by the newspaper, such as spotty compliance with procedures to verify same-day registrants, are broader and are the subject of a statewide audit approved by lawmakers.

Tuesday's announcement could breathe new life into the Republican-backed photo ID debate, which did not survive a veto from Democratic Gov. Jim Doyle and might instead eventually go to voters as a proposed constitutional amendment.

A photo ID requirement might have caught some of the problems highlighted in Tuesday's preliminary report. It notes cases of people voting in the name of a dead person or as someone else. Investigators located some people listed as voting who said they did not vote.

In other cases, according to Tuesday's report, people "registered and voted with identities and addresses that cannot in any way be linked to a real person."

Officials did not identify how many fit each category.

Investigators have focused only on the City of Milwaukee in reviewing duplicate-voting offenses. Officials said Tuesday, though, that they would expand the review of felons voting illegally to Milwaukee suburbs.

The newspaper found at least 278 felons who voted statewide, though only a partial review could be completed because of a state law that bars public access to birthdates of voters.

### Election Investigation

Photo/Karen Sherlock

U.S. Attorney Steven M. Biskupic (left), with Milwaukee County District Attorney E. Michael McCann, delivers the preliminary findings of a task force examining possible election fraud at the Federal Courthouse on Tuesday

### Preliminary Findings

More than 200 felons voted illegally, while still on probation or parole. Although the cases will be hard to prosecute, investigators are now looking at Milwaukee suburbs for similar problems.

More than 100 people voted twice or used false addresses, fake names or voted as a dead person. Charges will be filed against some of these people.

4,609 more ballots were cast than voters listed.

Investigators have

## Tracking illegal votes

The fraud investigation has focused on the more than 70,000 people who registered to vote on election day, not the other 200,000-plus voters. That is because registration cards provide a paper trail, which officials said would be stronger in court than computerized records.

It is unclear what identification these 100-plus people provided at the polls to register. State law allows utility bills and leases to be used or for one voter to vouch for another.

Biskupic, appointed by a Republican, and McCann, a Democrat, said they had pledged to avoid partisanship in the matter and avoided questions relating to reforms and proposals.

The announcement, though, prompted renewed calls for photo ID from Republicans, while Doyle pushed again for his set of reforms, which he said would do more to tackle specific problems.

For instance, investigators found "deputy registrars" working for registration drives had submitted at least 65 fake names, though no one apparently voted from the addresses. Doyle's plan would prohibit offering financial incentives, such as paying by the signature, in such drives.

In Madison, Doyle said a photo ID requirement is unnecessary. He urged prosecution of any offenders.

"I don't think many people, if they know there are real consequences for voting twice, and that there have been prosecutions for voting twice, are going to do it because the risk of being caught and the penalty far outweighs the advantage of casting one extra vote," Doyle said.

In response to the findings, Sen. Joe Leibham (R-Sheboygan) said as early as next month he would advance a bill similar to the one vetoed by Doyle. It also could be part of the recommendations from a Legislative Council task force that has been meeting on reforms.

While Doyle has argued the measure would make Wisconsin one of the strictest states in the nation, very few other states allow same-day registration.

Assembly Speaker John Gard (R-Peshtigo) said if Doyle again vetoes the requirement, he would move to make it part of the state constitution, a two-year process that requires a statewide referendum but does not require the approval of the governor.

"The next presidential election in Wisconsin, I guarantee you'll need a photo ID to vote," said Gard, who is running for the U.S. House. "I'll get this done if it is the last thing I do around here."

U.S. Rep. Mark Green, a Green Bay Republican who has introduced a national photo ID requirement, said: "People are having their faith in the election system shaken. This news will make it much, much worse."

Green is running for governor, as is Milwaukee County Executive Scott Walker, who also backs a photo ID requirement.

"Clearly, there is proof that fraud took place in the November 2 election," Walker said.

Milwaukee Mayor Tom Barrett attended the news conference, an unusual occurrence for an announcement by prosecutors.

From the start, Barrett said he welcomed the inquiry but also noted at several points in recent months that he had seen no hard evidence of fraud in the system.

He acknowledged Tuesday the findings pointed to fraud and said again "any individual who committed fraud (should) be prosecuted."

Asked if a photo ID requirement would have made a difference, he said it would not have prevented felons from voting and would have had little impact on other problems.

Biskupic said there was no indication of a widespread conspiracy to commit voter fraud, or of any knowledge or involvement by poll workers or any other city officials.

not been able to locate about 100 same-day registration cards.

### By The Numbers

**1,000**

### Archived Coverage

-  [Archive: Previous coverage of the investigation into Milwaukee's Nov. 2, 2004 election](#)

029671

The city's record-keeping problems meant investigators from the FBI and Milwaukee Police Department have logged more than 1,000 hours reviewing the 70,000 same-day registration cards, including 1,300 that could not be processed because of missing names, addresses and other information.

Indeed, about 100 cards described as "of interest to investigators" cannot be located, officials said. And within the past few weeks, police found a previously lost box of the cards at the Election Commission offices.

Biskupic and McCann said they remain troubled that three months after the investigation began that city officials have been unable to account for a gap of about 4,600 votes, with more ballots counted than people listed as voting.

That reflects a new assessment of the 7,000-vote gap first identified by the Journal Sentinel. Although city election officials initially blamed postelection data entry for the flaws, the newspaper found gaps existed at dozens of wards, with more votes counted than people tallied in log books.

The gap has been narrowed to 4,600 by a closer review of election day logs and other records, which authorities placed off-limits to the newspaper during the investigation.

McCann said: "I will not be satisfied if we cannot uncover that - what the explanation is, or a reasonable explanation."

In all, about 277,000 people in Milwaukee voted in the election. Thus, the cases identified in the investigation constitute a small portion of the total vote.

The findings, however, carry extra significance in a state that had an 11,000-vote margin in the presidential contest, one of the closest in the nation.

Democrat John Kerry topped President Bush in Wisconsin, mainly because of Kerry's margin in Milwaukee and Madison.

Had a larger state, such as Ohio, gone the other way, it could have led to a Florida-style recount here that would have turned on many of the issues that instead were left for the newspaper to uncover in its extensive investigation.

The federal-local investigation was launched Jan. 26, a day after the Journal Sentinel reported that some 1,200 votes in the November election came from invalid addresses.

Among other findings, some 1,300 same-day registration cards were processed by poll workers who allowed people to vote even though the cards were incomplete. Some 548 had no address listed and 48 gave no name - yet the person was allowed to vote. Another 141 listed addresses outside the city.

The newspaper was denied access to those cards, on the recommendation of the city attorney's office, citing the inquiry.

## Felons voted

Reviewing information it had access to, including a computerized list of people recorded as voting, the newspaper identified at least 278 felons who illegally voted statewide, though the vast majority came from within the city.

The real number is likely far higher because the newspaper was able to review only about 38% of the 2.98 million people who voted in the state because of the law that bars access to birth dates. The newspaper was able to link various databases and compare them to a state list of felons on probation or parole at the time of the election.

In response to the newspaper's reports, Doyle and many Republican lawmakers said that rule should be rescinded.

In Wisconsin, only felons who have completed probation or parole are allowed to vote.

Biskupic and McCann said these cases can be hard to prosecute, since it must be established that the felon knew he or she was not allowed to vote and voted anyway.

Thus it is unclear how many of the 200 felons investigators had identified will ultimately be charged.

The newspaper also identified numerous cases in Milwaukee where the same person appears to have voted twice, though that analysis was hampered by major computer problems at the city.

Those problems, which city officials labeled a "glitch," meant hundreds upon hundreds of cases where people are incorrectly listed as voting twice. These are in addition to cases of double voting identified by investigators.

The investigators have been focusing on 100-plus cases in this area. The cases take on many forms.

For instance, non-residents used non-existent city addresses to vote in Milwaukee. Officials are checking to see if they also voted elsewhere, such as from their actual address.

Officials indicated some of the fraud cases could be handled at the federal level because the election involved federal candidates, while other cases could involve state charges.

McCann and Biskupic asked anyone with information on possible fraud call the election task force at (414) 935-7802.

In March, Lisa Artison, a Barrett appointee, resigned as executive director of the Election Commission. She had been under fire for her handling of the election.

Sharon Robinson, head of the Department of Administration, has been overseeing the office and is chairing a city task force reviewing the election. Its report could be issued this month.

*Patrick Marley of the Journal Sentinel staff contributed to this report.*

## 82 felons voted in Nov. 2 election

### Public records law hinders analysis; more illegal ballots likely cast in presidential race

By GREG J. BOROWSKI  
[gborowski@journalsentinel.com](mailto:gborowski@journalsentinel.com)

Posted: March 17, 2005

At least 82 felons voted illegally in the presidential election Nov. 2 in Milwaukee, though the total is likely far higher, a new computer analysis by the Journal Sentinel has found.

Indeed, there are more than 600 potential matches between felons on probation and parole and names and middle initials of people who voted in the city. But a full analysis could not be completed by the newspaper because of a 2003 state law that bars access to birth dates of voters.

The newspaper, though, was able to do a partial analysis by combining several computer databases to capture birth dates for about 39% of those who voted in the November election.

That showed at least 82 votes by felons, who are not allowed to vote until their probation or parole has been completed.

Illegal votes by felons are part of an investigation into possible voter fraud in the city.

U.S. Attorney Steven Biskupic and Milwaukee County District Attorney E. Michael McCann launched the investigation after the Journal Sentinel revealed major problems. Those included 1,200 votes from invalid addresses; 7,000 more ballots cast than people later recorded as voting by the city; and 1,300 same-day registration cards that could not be processed because of missing information.

The review of felons underscores how the lack of access to birth dates limits the public's ability to identify who has voted.

It also provides clear evidence of fraudulent voters in the November election, in which Democrat John Kerry topped President Bush by about 11,000 votes in Wisconsin.

"Anybody found to have voted illegally should be penalized," said Sharon Robinson, acting head of the city Election Commission, when told Thursday of the newspaper's findings.

She said the office's procedure is to delete names of felons from the registration rolls when made aware of convictions. It is unclear, though, how effective this has been or how many remain on the list.

In addition, same-day registration allows anyone to present ID and vote. That makes it difficult, if not impossible, for poll workers to identify felons who should not vote.

"Election signs and materials spell out the penalties," said Robinson, noting voters are expected to comply with laws.

Robinson was named to head a team of city managers helping run the office after the resignation of Lisa Artison on March 1.

Four years ago, the newspaper found that 361 felons voted illegally. Three were charged by McCann, but those charges were dropped when prosecutors couldn't establish that the felons knew they were ineligible to vote.

Felons who vote commit another felony, punishable by up to four years in prison and a \$10,000 fine.

Biskupic declined to comment Thursday on the newspaper's findings, speaking on behalf of the agencies involved, which include the FBI and Milwaukee Police Department. The investigation was launched Jan. 26.

Investigators have access to the full birth date information that is off-limits to reporters and the general public. They would be able to make the same comparison the newspaper did, matching the names of voters to felons who remain ineligible to vote.

Additional legwork would then be needed to establish legal cases against any felons. For instance, investigators may have to show the felon knew he or she was ineligible to vote and did so anyway.

Several felons listed as voting who were reached by the Journal Sentinel hung up when asked whether they voted.

"I'm not interested in this right now," said one, after denying he had voted in the election.

### Didn't know they shouldn't

Ronald Gay, 42, who voted from an address in the 4300 block of N. 36th St., could not be reached, but a woman who identified herself as his wife said Gay had definitely voted.

"He voted the same night I did," said the woman, who would give her name only as "Mrs. Gay." Later she asked: "Will he get in trouble for that?"

The woman said she and Ronald Gay are separated and that Gay now lives out of state. He could not be reached for comment.

"I don't think he was aware" he shouldn't vote, the woman said. "If he was aware of it, I would have told him not to."

Although the newspaper has identified 82 felons who voted, it could not determine the actual number.

Because the 2003 change in state law restricted public access to birth date information, as well as driver's license and Social Security numbers, only election workers are allowed to see such information, as a guard against identity theft.

Arguing that the change went too far, state Rep. Mark Gundrum (R-New Berlin) said this week he would draft a bill to reinstate public access to birth dates, a critical means of identifying specific voters.

Gundrum called on investigators to take a hard line with any violation they find.

"It will immediately help clamp down on the abuse of the system," Gundrum said. "There has got to be some oversight on the system to make sure there is integrity to the system."

In Milwaukee, the situation has been compounded by the city's unwillingness to confirm any of the 600 potential matches the newspaper identified between felons and voters.

Officials have cited the ongoing investigation as a reason for withholding election material.

In an attempt to get around the roadblock, the newspaper combined information from several computer databases. This provided an accurate view of felons who voted but also a partial one - the newspaper could link birth dates with only about 39% of the 277,000 people who voted Nov. 2.

To complete its partial analysis, the newspaper began with the city's own computerized list of everyone recorded as having voted. It then used voter ID numbers - a six-digit code used by the city to track voters - to match the 2004 list against a separate computer database obtained in 2000.

That list included anyone registered in the city at the time and their birth dates. The match allowed the newspaper to capture birth date information for 107,616 of those who voted in November.

That list was then matched against a computer database from the state Department of Corrections that listed all felons on probation or parole at the time of the election, along with their birth dates.

There were 82 matches.

The actual number, though, is likely much higher.

First, the list could not be checked against 61% of those who voted. Second, the 7,000-vote gap - between votes cast and those recorded as

voting - means thousands of voters are not even on the city's computer list.

In addition, the newspaper in earlier reviews found hundreds of cases in which voter names were incorrectly listed twice in the computer system.

### Voter gap could be larger

That means the 7,000-vote gap may actually be larger.

Likewise, the 1,300 same-day registration cards the city could not process are not in the database. Many of those were missing names or addresses.

Indeed, flawed recordkeeping by the city may mean that some felons who voted are not in the computer records and the reverse - that some who didn't vote are listed as voting.

Annette Deans, who worked at the polls Nov. 2, said she is perplexed as to why her husband, Arthur Deans, 48, is listed as having voted.

"I know he can't vote," said Annette Deans. She added that her husband, convicted of a drug-related offense, did not vote, but that she did.

While the city's computerized list of voters show Arthur Deans as voting, they do not list Annette Deans as voting.

"There were a lot of flaws (at the polls) that day," said Annette Deans. "We didn't have any room to breathe."

## Norfolk pastor sentenced for casting illegal ballot

By MICHELLE WASHINGTON, The Virginian-Pilot

© January 14, 2004

Last updated: 11:17 PM

VA

NORFOLK — On a November day more than two years ago, Chester Moody made his vote count.

The only problem was that it shouldn't have.

A 1986 felony conviction for larceny by check in Chesapeake cost Moody his voting rights. He obtained a voter identification card in 1999, despite never having his rights restored. On Nov. 6, 2001, Moody tried to cast a vote in the general election at the Campostella precinct.

Election officials told him he could not legally vote because of the conviction, but they gave him a conditional ballot and said they would hold it until his voter qualifications could be investigated.

Instead, according to prosecutors, Moody "waited until the voting officer was momentarily distracted, rushed to the ballot box, and slid his ballot in."

Moody entered an Alford plea Tuesday in Norfolk Circuit Court to a misdemeanor charge of illegal voting, a crime that is rarely prosecuted. The plea means he does not admit guilt but acknowledges that prosecutors have enough evidence to convict him.

Judge Jerome James sentenced him to a year in jail but suspended the time on the condition that he remain on good behavior for two years. As part of his plea agreement, he also must "refrain from attempting to vote unless and until he is legally able to do so."

Outside the courtroom, Moody said the court process "coerced" his plea.

"The case is over 2 years old," he said. "The voter identification card I had received was arbitrarily and capriciously ruled issued erroneously."

Moody, 68, wore a black parson's suit with a white collar, a crucifix dangling from his neck. He is an associate pastor at the Garden of Prayer Temple, Church of God in Christ, on Church Street.

Moody said he sought restoration of his voting rights. He said prosecutors manufactured the charge in retaliation because he served as a spiritual adviser to someone who filed a lawsuit against the city of Chesapeake.

And he complained that prosecutors repeatedly delayed his case to force him to plead guilty.

"They sat on it and used it in a timely fashion," he said.

Court and state voter records tell a different story.

Moody's court file brims with requests from prosecutor Marcia Ziegler to have his bond revoked because he refused to cooperate with the court's pretrial services unit.

He never reported to the officers after being assigned to the service in June.

029677

Court documents show that Moody also failed to stay in touch with his court-appointed attorneys. Lawyer Charles Jenkins asked to withdraw as counsel from the case because Moody never contacted him between July and October.

Another lawyer, Mike Kmetz, asked to withdraw because Moody refused to cooperate and made demands that Kmetz file a motion to transfer the case to federal court.

Two other lawyers withdrew because of conflicts or other causes. Cheryl Footman Banks, who represented Moody on Tuesday, was at least the fifth lawyer to handle his case.

On another occasion, Moody's case was delayed because he asked for a jury trial. And in February, his case was delayed because "he was confused as to the trial date and failed to appear," according to the documents.

A judge issued an order for his arrest when he failed to appear in court in July.

John Merkel, Norfolk's deputy registrar, said Moody registered to vote in the spring of 1999, before the city had computerized databases to check whether a person was eligible to enroll. The city got that system in the fall of 1999, Merkel said.

"Now if you fill out a card, someone goes to a computer, types in your name and Social Security number and does a match," he said. For people on felony conviction lists, he said "flashing lights go off and you won't be allowed to register."

Even so, he said, the registration form asks applicants about felony convictions.

When the board caught the mistake that fall, it sent Moody a letter saying his name had been removed from the voter rolls. That made his card invalid.

When Moody cast his vote anyway, said Commonwealth's Attorney John R. Doyle III, his ballot counted when it should not have. Election officials had no way to tell which ballot was Moody's or how he voted, and his vote could not be deducted from the total.

"I'm sure they freaked," Doyle said. Bernie Henderson, deputy secretary of the commonwealth, said Moody's voting rights were never restored.

Doyle said his office has never prosecuted a similar case, and he never saw one during the five years he served on the electoral board.

If prosecutors didn't enforce it, he said, all kinds of people could sneak into polling places and vote illegally.

"You have to have zero tolerance," he said.

## Review of Election Starts in Confusion

**Court: About 1,500 ballots are reported missing in the legal dispute over Compton's June 5 mayoral contest.**

By JOHN L. MITCHELL  
TIMES STAFF WRITER

November 16 2001

The first day of a court-ordered review of Compton's contested June 5 municipal election got off to shaky start Thursday when 1,500 unused ballots were reported missing.

The Superior Court judge hearing former Mayor Omar Bradley's lawsuit alleging voting fraud dispatched Los Angeles County sheriff's deputies to retrieve the ballots. City officials claimed they were left at Compton City Hall by error and would be presented in court today.

However, Bradley said the confusion over the missing ballots strengthens his claims that he was cheated out of the election. "This is unheard of, unheard of," Bradley said in the courtroom Thursday afternoon.

After the court session finished, Bradley's attorney, Bradley Hertz, said: "In the least, the city clerk has a disorganized office and at most, perhaps, a cesspool of illegalities."

Bruce Gridley, the attorney for the city, denied any wrongdoing by the city clerk and said the mistake was made earlier this month when sheriff's deputies picked up boxes of ballots stored from a different election.

The ballot review began Thursday with an election expert inspecting the votes in court and tallying the overall totals, not conducting a candidate-by-candidate recount. He used an automatic counting machine, which can handle more than 1,000 cards a minute and was set up on a table near the jury box.

Scott D. Martin, the election specialist whose company supplied the Compton ballots, inspected the initial batch for texture, printing and color. He pronounced them legitimate.

"They all look like ours," said Martin, of the Anaheim-based firm Martin & Chapman Co.

Once all the ballots are accounted for, court officials estimated, it will take about three days to process the 10,600 cast in June and the additional 20,000 ballots printed for that election but reportedly not used.

The review was ordered by Judge Judith Chirlin, who is hearing the lawsuit brought by Bradley and two City Council candidates on his slate against current Mayor Eric Perrodin, City Clerk Charles Davis and the city of Compton. Bradley lost the mayor's office by 281 votes to Perrodin, a Los Angeles County deputy district attorney. Bradley's side accuses the Perrodin camp of such fraud as stuffing boxes with counterfeit ballots and

029679

having noncitizens vote, allegations Perrodin and Davis deny.

Martin on Thursday said the first bunch of absentee ballots were uniform except that they varied in color in four shades ranging from lavender to white.

Bradley's attorney Hertz, who had offered to give Martin a magnifying glass and flashlight, wondered why the ballots could vary so much in color. "We are intrigued by that," Hertz said.

But Martin said the differences were not significant and resulted from being printed in different batches.

Both sides planned to have experts on hand Thursday. When Bradley's specialist was unable to attend the court session, his side accepted the defense experts.

## Judge Orders Inspection of Ballots in Compton

**Court: The ruling involving 10,600 votes is a victory for ex-Mayor Omar Bradley, who lost his reelection attempt and is claiming fraud.**

By JOHN L. MITCHELL  
TIMES STAFF WRITER

November 15 2001

A day after a startling setback in his legal battle to regain his title as Compton's mayor, Omar Bradley scored a victory Wednesday when a Superior Court judge ordered the inspection of 10,600 ballots.

Judge Judith Chirlin said she was motivated to unseal the boxes because it was important to "instill confidence in the people of Compton who will have to accept the results of this [election] process."

The boxes may be opened at 9 a.m. today if the plaintiffs' ballot expert can make it. But attorneys said that it was more likely that the inspection would begin Monday. In his lawsuit, Bradley, who lost the June 5 election by 261 votes to Deputy Dist. Atty. Eric Perrodin, alleges that the voting was marred by counterfeiting and other irregularities.

On Tuesday, a key witness who was expected to testify on Bradley's behalf dealt a blow to the plaintiffs. Compton school board member Basil Kimbrew denied seeing counterfeit ballots, and accused Bradley's attorney of trying to bribe him. Bradley W. Hertz, the former mayor's lawyer, has said Kimbrew committed perjury on the stand.

Brian Pierik, the lawyer representing Compton and Perrodin, argued Wednesday that there was not enough evidence to open the ballot boxes and that Hertz waited too long to make the request.

But, he added, he was confident that no counterfeit ballots would be found.

Pierik questioned Bradley, who took the witness stand for the first time, about his relationship with Kimbrew, considered a longtime adversary of Bradley.

Pierik asked if they were such opponents in Compton, why did Bradley believe Kimbrew when the school board member told him about the fraud at a meeting in September.

"Every dark cloud has a silver lining, even Mr. Kimbrew," Bradley said with a smile. "That can only be proven by what is in the box."

Under rules agreed to by attorneys, the ballots will be inspected by experts from both sides. Though the vote

will not officially be recounted, the total votes cast will be tallied and the ballots will be inspected for authenticity. The count is expected to take two to three days.

Deborah Seiler, who publishes the California Elections Report, will be coming from Sacramento, Hertz said. The defendant's expert will be available Thursday morning.

Bradley and two City Council nominees who ran on his slate, Melanie Andrews and Frank K. Wheaton, are accusing Perrodin, City Clerk Charles Davis and the city of Compton of wholesale election fraud. They say there were irregularities in more than 500 votes, including some in which the signatures didn't match those on the voting rolls.

## Lott says voting fraud is problem

By Kevin Walters  
American Staff Writer kwalters@hattiesb.gannett.com

Even though both Rep. Mike Lott, R-Hattiesburg, and Secretary of State Eric Clark favor voter identification, a rift between the two over the matter was exacerbated by comments Lott made during a speech Monday.

"Our secretary of state told me face-to-face that apparently we don't have much voting fraud because we don't hear much about it," Lott told about 40 people at the Lake Terrace Convention Center during his Legislative Update speech. "I told him face-to-face we have a lot more rapes going on on our college campuses than we know about because they don't get reported. Just because they're not reported does not mean that it's not happening."

Voter identification would require voters to show proof of who they are before they vote.

As an example of voter fraud, Lott, 47, who is seeking the Republican nomination to challenge Democratic U.S. Rep. Gene Taylor for the 4th District House of Representatives seat, cited a voter list he said was used at a voting precinct in Clinton in the November election that he said had numerous discrepancies such as:

- Eight voters' names in a row, all in alphabetical order. "It was amazing that people came in in alphabetical order to vote," Lott said.
- A man's name was repeated twice in the voter roll - in two different styles of handwriting, Lott reported.
- That same man's wife was also on the roll, Lott said, although the woman had been dead for three years.

Lott said later that he was uncertain if the person who showed him the information - whom he did not identify - had alerted authorities about the fraud.

The Hinds County District Attorney's office did not return a call about this matter.

Clark said later Monday he had no knowledge of the Clinton voter roll problems, but said Lott had misrepresented his side of their conversation about voter identification legislation in Mississippi.

"I'm sorry that Rep. Lott decided he needed to misquote me and be critical,"

029682

FBEO

Clark said in a phone interview. "I have the strongest track record of anybody in the state of combating voter fraud."

Lott also said Monday that Mississippi could lose \$40 million in federal funding if legislators do not pass voter I.D. during this session.

But Clark's office said Monday that Mississippi's share of money from the federally funded Help America Vote Act is actually \$34 million and that the federal funding is not endangered. The money would be used to upgrade the state's outdated voting equipment.

Called for clarification about the federal funding, Lott said he and other legislators in the House were misled last year about a deadline existing this year to receive the funding.

"We were led to believe that this had to be passed, that we were pushing against a deadline and we would not receive the money," Lott said later after he personally called Clark's office for more information. "There seems to be a lot of changing of minds going on in the secretary of state's office."

Clark said he is trying to improve voting rolls by tightening absentee ballot procedures and removing the names of dead people and those in jail.

"However much there is (of voter fraud) is too much," Clark said.

# San Bernardino County Computers Scramble Elections

CA

**Glitch: Programmer's error leaves 33 races in doubt. Some counted as last night have won, red-faced officials say.**

By BUCK WARGO  
SPECIAL TO THE TIMES

November 10 2001

ONTARIO -- Computer ballot-counting errors in San Bernardino County this week have thrown 33 races into doubt and may be so serious that those listed as getting the least votes actually might be winners, the registrar of voters said Friday.

A county employee erroneously programmed the computer so that, for instance, it sometimes read the punch-card lists from the bottom up. A hole punched for the last candidate listed in a race, therefore, would have been read as a vote for the first, county spokesman David Wert said.

A recount of all 82 races and 85,000 ballots cast on Tuesday will be completed by next Tuesday, he said. "There are going to be at least a few races in which people who appeared to have won and were the high . . . [vote-getters] were actually the low . . .," Wert said. "Some races are going to be reversed."

Most of the races affected were school boards or community college districts throughout San Bernardino County. Nine were in water districts or special districts. No city races were affected.

"It is going to be a long three days," said Bill Klein, who had appeared to be an upset winner in the Chino Valley Unified School District, ousting one of two longtime incumbents. "It is a case where you are frustrated, shocked and concerned."

In the Ontario-Montclair School District, 20-year incumbent David Van Fleet of Ontario said he was shocked to see the final tally showing that he finished sixth out of seven candidates. He had expected to finish in the top three and win his sixth term.

"Everyone that came up to me afterward said they went out and voted for me," he said. "They asked me how could I lose. I couldn't explain it."

The name of the programmer responsible was not released, but officials said the person is a veteran county employee. The employee reported that tests before the election showed the system was working correctly, said Registrar Ingrid Gonzales, who oversees elections.

The county brought in a consultant, software provider DIMS Inc., on Thursday to review the programming and found the errors, Gonzales said. The testing and analysis the employee said had been done apparently was not, Gonzales said.

In some cases, the computer began counting in the middle of the ballot, so some holes weren't counted at all, Gonzales said.

Based on the review by DIMS, the candidates' totals will certainly change in 26 races. Officials are not sure what effect, if any, the error had on the other seven races in doubt.

"For some races, it may not have any effect on people who were going to lose anyway, but a significant number of races could be changed," Gonzales said.

The city election results will be counted Tuesday as well, just to make sure there were no problems and to give people confidence in the results, Gonzales said. A test showed the computer was programmed correctly for municipal races, she said.

Officials became concerned Tuesday night when the computer showed no votes cast for the Big River Community Services District board of directors.

An extensive review of the election system was conducted Wednesday through Friday, and widespread errors were found, Gonzales said. A letter was mailed to more than 300 candidates on Wednesday notifying them of potential problems.

"This is certainly rare, but it happens," said Gonzales, who has served eight years as registrar and 21 years in the field. "You hear stories across the nation about elections being tainted. I never thought it would happen here."

From now on, an outside firm will be brought in before all elections to confirm that computers are properly programmed.

"It's hard to describe how personally disappointed I am that this has happened," Gonzales said. "I would like to assure the public that we know exactly how this error occurred and that measures are underway to prevent it from ever happening again."

County officials said the good news is that using a card-counting system means that ballots are still around to be recounted. If the same error had occurred with an electronic voting system, there would be no paper record, Wert said.

The employee responsible for the error has been disciplined, but Wert declined to say how. Gonzales said the person still is on the job but has been taken off computer programming duty.

## Can anyone count votes?

Friday, November 9, 2001  
©2001 San Francisco Chronicle

URL: <http://www.sfgate.com/cgi-bin/article.cgi?file=/chronicle/archive/2001/11/09/ED192020.DTL>

COUNTING BALLOTS in San Francisco will never be easy. Super-heated interest groups, pushy political leaders and on-the-move apartment dwellers can challenge any registrar of voters.

What's needed are experienced hands, clear rules and reliable operations. This city has none of these.

It goes too far to cry foul, as some partisans in Tuesday's election charge.

But vote counting in San Francisco has become a sad circus with ballot boxes diverted and poorly secured. City Administrative Officer Bill Lee and Elections Director Tammy Haygood refused to spell out what was taking place amid rumors of anthrax-tainted envelopes and a counting room out of sight from election observers.

The city needs an accounting of the tangled events that took place Tuesday night, as Supervisor Aaron Peskin has requested from Haygood. City Attorney Louise Renne is right to ask Secretary of State Bill Jones to investigate the confusion.

San Francisco needs a broader answer to the desultory performance it regularly gets from its elections team. Dating back to 1995, the city has botched the job through improper forms, irregular hours or or computer breakdowns. A succession of registrars never took charge.

San Francisco is still counting ballots long after other Bay Area counties have posted results and hauled vote machines back to storage. What makes this city immune to efficiency?

There are partial answers. Few registrars put up with demands for multilingual forms, absentee ballot requests generated by interest groups and high-pressure watchdogs assigned to the office by candidates and causes.

Also, both Mayor Willie Brown and his foes on the Board of Supervisors have feuded unhelpfully. Haygood, the present registrar, has no background in running elections. The office routinely asks for extra money when it busts its budget because of poor planning and overspending. A new plan, passed by voters,

takes the job away from the mayor's indirect rule and gives it to a commission, meaning more roiling changes.

Voting habits add complications. Nearly a fifth of Tuesday's ballots were absentee or provisional, which require hand checking. Provisional ballots are cast by voters, often residents who recently moved, who don't show up on polling-place books and may be registered elsewhere.

No question: There are headaches in running elections. But, whether in San Francisco or Florida, voters who exercise their sacred right should have their ballots counted with care and precision.

## Count uproar eclipses S.F. election reform 63% of fed-up voters approved overhaul

Helen Lechuk, Chronicle Staff Writer

Friday, November 16, 2001

©2001 San Francisco Chronicle

OK

URL: <http://www.sfgate.com/cgi-bin/article.cgi?file=/chronicle/archive/2001/11/16/MN232343.DTL>

**San Francisco** -- Lost in the shadow of San Francisco's bizarre ballot controversy last week, voters approved a measure that demands the city clean up the beleaguered Elections Department -- and end its history of elections problems.

Proposition E passed with nearly 63 percent of the vote, a strong signal that voters are fed up with slow counts, conspiracy theories about missing ballots and the director's office revolving door.

Proposition E creates a new seven-member commission to run the Department of Elections and hire a director -- replacing a system that has produced five directors in as many years and is under investigation by the secretary of state.

That could mean the newest elections chief, Tammy Haygood, who is already in the hot seat after last week's election, could be replaced by the new commission.

The proposition was one of several written by the Board of Supervisors to shrink the power of the mayor, who is in control of the elections office. Mayor Willie Brown's chief administrative officer, Bill Lee, has chosen the past few elections' directors, including hiring Haygood a few months ago.

"Prop. E is the first step to ensuring honest and independent elections in San Francisco for the first time in 25 years," said Supervisor Tony Hall, one of the measure's authors.

Hall has a personal interest. He believes votes were tampered with during his tight race last fall against Brown-backed Supervisor Mabel Teng. Hall won by 38 votes.

"I think there's been a lot of maneuvering," Hall said. "I think some elections have been manipulated."

But the mayor has recently defended the elections staff for doing good work under unusual amounts of scrutiny. As for his influence over Haygood or other directors, Brown has said he steers clear of the department precisely so he won't be accused of pulling strings.

Lee also insists that San Francisco runs clean elections.

In fact, few allegations of fraud have ever been proved, although grand jury studies have found bureaucratic fumbles.

"Running the elections office is the most difficult job in the city because if someone loses, they always want to blame the elections office," Lee said.

Haygood saw exactly how difficult her job could be last week, when two controversial measures to create a public power agency hung in the balance.

029687

Miscommunication by Haygood and her staff about whether absentee ballots were moved from City Hall sparked several tense news conferences with the elections director. Despite early denials by elections officials, absentee ballots arriving in the mail were moved to a separate building as a precaution against an anthrax threat. That angered public power advocates who argued that those ballots weren't watched and might have been easy targets for tampering.

History fueled the controversy. Past election follies in the city include incorrectly printed sample ballot books, misplaced and duplicate ballots and wet ballots that had to be dried in a microwave.

Making matters worse, allegations hanging over the November 2000 election remain unresolved. The secretary of state is expected in the coming days to release a report after a six-month investigation into the department's actions in that election.

Proposition E attempts to restore voter confidence. Seven city agencies each will appoint one member to the new Elections Commission, including the mayor and Board of Supervisors. The measure calls for the commissioners to take office in January.

Others making appointments to the commission are the district attorney's office, the city treasurer's office, the board of education, the city attorney's office and the public defender's office -- all headed by elected officials.

City employees from other departments are banned from helping with elections, except on election day, without Board of Supervisors approval.

The measure also mandates that sheriff's deputies escort ballots every step -- from polls to City Hall -- on election day.

The measure further requires poll workers to post how many ballots were cast at their sites and how the precinct voted. The new computerized Eagle machines, where voters deposit their ballots after voting, can make that information available in seconds.

"Then there can't be an allegation made (on election night) that more ballots suddenly appeared from somewhere," said Supervisor Matt Gonzalez, who helped write the proposition.

Jim Chappell of the San Francisco Planning and Urban Research Association, which opposed Proposition E, said cutting the mayor's alleged influence on the cash-strapped and short-staffed department wouldn't solve anything.

"Adequately funding the department will make it different," Chappell said.

Local election reform might not stop here with supervisors considering a variety of other measures.

City attorney candidate Jim Lazarus, who is vying against Dennis Herrera in the Dec. 11 runoff, said that if elected, he would create a legal elections task force that would include representatives of the secretary of state and district attorney.

## Baker blamed for downed machines needed in recall vote

By George Merritt  
Denver Post Staff Writer

Thursday, February 12, 2004 -

ARAPAHOE COUNTY - County officials have said they will have to spend nearly \$100,000 to replace batteries in 800 voting machines to ready them for Tracy Baker's recall election Feb. 24.

County Attorney Kathryn Schroeder placed the blame on Baker, saying that maintaining the machines is one of the most basic parts of his job as clerk and recorder.

"It is crucial to holding our elections," Schroeder said.

A county employee has accused Baker of ordering him to discontinue maintenance of the machines, effectively disabling them. The employee is now on leave after filing a complaint against Baker with the Equal Employment Opportunity Commission.

"It is an act of sabotage," said Mari Newman, the attorney for Woodrow Barnes, the employee making the claims.

Newman said that when her client protested Baker's order, Lisa Sale - Baker's girlfriend and assistant chief deputy - told him, "Well, that is (the county's) problem, and they can deal with that."

The problem was discovered in October, but officials said the batteries can't be recharged once they are drained.

Denver attorney Rick Daily said that if the county could prove Baker told an employee to neglect equipment, Baker could face criminal charges.

Baker denies any responsibility for the gaffe. He said Barnes' and Newman's claims were "libelous."

Baker said he installed the election machines himself in 1986 and would never sabotage them. County officials are at fault for placing Barnes, who was responsible for the machines, on leave, Baker said.

## Caruso is campaigning to bring election reform to Bridgeport

 [PRINT ARTICLE](#)

(09/23/03) BRIDGEPORT - After his failed run in the Bridgeport Democratic mayoral primary, State Representative Chris Caruso (D-Bridgeport) has decided not to challenge the results in court. Instead, he plans to file fraud complaints with the state Elections Commission.

Caruso says he discovered that 144 people went into the polling places, but their names were not check off on a voting list. He also alleges some voters were able to vote twice while other were denied voting privileges.

By not going to court, Caruso has given up the possibility of a judge overturning the election, which means he won't have a chance to run for mayor in November.

As for any fraud in the Primary election, it will be up to the state Elections Commission to investigate.

**Officials: Should Sequoia's proposal be tossed?**

November 12, 2001

**By Deborah O'Neil and Thomas C. Tobin**  
St. Petersburg Times

The Louisiana court documents paint a damning portrait: Voting equipment executive Phil Foster received manila envelopes stuffed with as much as \$40,000, to be delivered as kickbacks.

That money was part of a vast voting machine scandal that resulted in charges against 25 people, three of whom told prosecutors Foster was involved.

But Foster's bosses at Sequoia Voting Systems were so confident of his innocence that they let him take a lead in trying to sell, among other packages, \$2 million worth of touch-screen voting equipment to Indian River County and \$15.5 million worth to Pinellas County.

Indian River County commissioners Tuesday voted to void the deal they had already signed with Sequoia when they learned of Foster's Louisiana indictment.

Every Florida corporation is complete and includes articles of incorporation, corp minutes, corp bylaws, corp book, corp seal, stock certificate, preliminary name search & attorney fee plus s.k. Must. Also Florida Corporations available for immediate delivery

Now, amid intense statewide scrutiny, the commissioners are joining their Pinellas colleagues in weighing whether unproven accusations against a company representative should be enough to throw out Sequoia's proposal.

The entire nation is watching as Florida reforms its election process, said Susan MacManus, a University of South Florida political scientist and chairwoman of the Florida Elections Commission.

"Anything related to voter equipment that even smells bad will be and should be carefully investigated for the good of all," MacManus said. "The scrutiny doesn't stop at the county boundary. It goes national."

In Tampa, Hillsborough County has recently launched a review of the case against Foster, said Supervisor of Elections Pam Iorio.

"I think it is important to know what litigation the companies are facing across the country," Iorio said. "These (the charges against Foster) are very serious allegations."

But others wonder how much the charges matter. In Tallahassee, Leon County Supervisor of Elections Ion Sancho, whose county boasted the lowest error rate in the state in the presidential election, said that while news about Foster "raises the specter of impropriety, I don't know to what degree you could point to the company as bad."

Sequoia's product, he said, "is a

Sequoia's product, he said, "is as good as what I use."

And the quality of the machines is why Indian River County chose Sequoia, said Kay Clem, the county's elections supervisor.

She said she made the decision knowing all about Foster's legal problems, adding, "I thought everybody knew about it."

"I'm not buying Phil Foster," Clem said. "I'm buying Sequoia's voting system."

Foster's charges are part of a decade-long corruption scandal that reached as high as the state's elections commissioner. Foster is charged with two counts of conspiracy to commit money laundering and one count of conspiracy to commit malfeasance in office.

Already, 15 people have pleaded guilty in the case, said Assistant District Attorney Sandra Ribes in Baton Rouge.

Three of them, including Foster's brother-in-law and the state commissioner of elections, pointed the finger at Foster in their guilty pleas. According to court records, Foster had Sequoia designate his brother-in-law, J. David Philpot, as its exclusive agent in Louisiana.

Then-Louisiana Elections Commissioner Jerry Fowler declared Philpot the sole source of a certain type of voting machine, allowing them to circumvent the state's bidding laws and inflate the prices of the machines.

029593

Foster and Philpot also arranged to sell counters for voting machines at inflated costs, according to court records.

Money was funneled to Fowler in kickbacks, and court records indicate Foster played a role in passing along the cash.

On at least five occasions, Philpot handed Foster manila envelopes with \$20,000 or \$40,000 of kickback cash to give to another person involved in the scandal, Philpot says in court documents.

Also, Fowler told prosecutors that Foster would put cash kickbacks in a desk drawer for him. Foster's Baton Rouge lawyer, Karl Koch, said the case against his client is built on statements by admitted criminals.

"My investigation of the charges reveals he hasn't done a thing in the world wrong," he said.

Foster didn't know what was in the sealed envelopes he brought to Louisiana for his brother-in-law, who was in Birmingham, Ala., Koch said.

"Phil wasn't handed bundles of cash or wads of cash," Koch said.

Nor was Foster in a position to get his brother-in-law named as a company agent, Koch said.

Both Foster and Sequoia have fully cooperated with the investigation, Koch said.

Clem has stressed that the

029594

company has not been implicated.

Sequoia President Peter Cosgrove said the company has nothing to hide. The company assumed, he has said, that Pinellas and Indian River officials were aware of Foster's legal problems, which he said were "well, well known."

The company has not removed Foster from his responsibilities as Sequoia's southeastern vice president, Cosgrove said, because it doesn't believe he has done anything wrong.

"We will not put down an innocent man," he said.

However, if Pinellas prefers, Sequoia will withdraw him from the project, Cosgrove said.

Clem, in fact, has said she dealt not with Foster but with John Krizka, Sequoia's agent in Jupiter.

Indian River County Administrator Jim Chandler, however, has said Foster was the one who negotiated the final price with him.

Cosgrove added that the charges should not affect the county's decision about the purchase of the new voting equipment. All the reasons that Pinellas and Indian River officials intended to buy the system remain, he said.

"None of those reasons have changed," Cosgrove said.

## "Follow The Chad"

an investigation  
into the ownership  
of america's  
"election services industry"

an american election

# BAY OF PIGS 2000: THE FLORIDA SURPRISE

It has all the ingredients of a Silent Coup in some jerkwater Banana Republic...

There are shadowy figures from Organized Crime rubbing elbows in Miami restaurants with "retired" CIA agents and Bay-of-Pigs-era Cubans...

"Business" is conducted ever-so-discreetly, covert op style, behind the heavy velvet drapes of dummy "front" companies...

And since these are rarely bloodless affairs, there's a dead body (or two or three) lying around somewhere in the background. In court, one lawyer has even called it a "sinister conspiracy," language uncharacteristically-blunt for civil proceedings.

But this coup isn't just another Central American "transfer-of-power;" it involves, instead, the possible subversion of the very democratic process itself.

Only this time it didn't take place in a country with a foreign-sounding name...but in the United States of America.

In November. In Florida.

## "Tangled Webb City"

Here's a brief run-down on a few of our "players:"

Harold and Herb Webb are twin brothers operating election service industry companies in New Jersey. These companies, Garden State Elections and Elec-tec, were used to conceal transactions involving election services industry giant Sequoia Pacific, according to court documents, which fingered that company last week for orchestrating a 10-year long bribery scheme involving the Commissioner of Elections for Louisiana.

watch a clip  
(1minute 30 sec.)  
from  
"Follow the chad!"

order a  
signed advance copy of  
'barry and the boys' now!

But Harold and Herb Webb aren't even the only Webb's in this tangled scheme...Industry giant Sequoia Pacific's General Manager's name is Hugh Webb.

Harold Webb, Herb Webb, and now Sequoia's Hugh Webb. Is it just a 'tangled Webb?'

Or something *more*?

**"We don't know why we broke into the Watergate, honest."**

Herb Webb, president of a firm proven to have acted illegally on Sequoia Pacific's behalf, denied to this reporter even *knowing* Hugh Webb.

read the  
INTRODUCTION

Part I

Sequoia Pacific head honcho Hugh Webb returned the favor, denying knowing either Herb *or* Harold Webb... a neat trick, since Harold Webb has admitted to prosecutors that he was acting on behalf of Hugh Webb's company.

PART II

Part III

Prosecutors have the ability to untangle this tangled Webb. The question is: *will they*?

Part IV

There is even *another* extended "family," that of Sequoia Pacific's Southern Regional Sales Manager Phil Foster, with deep connections to the bribery scheme... Phil Foster is about to be indicted in Louisiana, while his brother-in-law, David Philpot, is soon to stand trial.

029698

And then there is also James Foster, of James Foster Associates, the Texas firm which printed Florida's Republican absentee ballot applications...Remember *them*? The ballot applications where a voter i.d number had been "*inadvertently*" left off?

### "Follow the Chad"

Sequoia Pacific operates through a number of dummy front companies.

Pasquale "Rocco" Ricci's company, International Voting Machines, was really Sequoia Pacific. Harold Webb's Garden State Elections was really Sequoia Pacific. So was Herb Webb's Elec-tec. This is a list which could quickly grow much longer.

Many Florida Counties involved in the Vote Snafu used tabulating machines from Sequoia Pacific disguised as being from other vendors; Sequoia actually supplied both computer and punch card systems to Florida, in counties where their name has not yet surfaced.

The reason for all this elaborate deception? Clearly, some people have gone to some little trouble in an elaborate attempt to conceal Sequoia Pacific's role. Why?

A reporter for the Fresno Bee interviewed Hugh Webb recently. He told us, about Webb, "I was taken aback by his secretive nature."

There is a joke making the rounds just now in Southern State Capitals; like much humor it contains an uncomfortable truth that cannot yet be spoken in polite company...

"The *real* vote snafu in Florida," goes the joke, "concerns what happened after the Sunshine State purchased used election machines from the state of Louisiana, and on *those* machines Edwin Edwards was elected President in a landslide."

There's a hidden truth behind the sarcasm: Edwards is the convicted former Louisiana Governor, and the 'one-liner' describing this budding scandal threatening

to burst out in screaming Technicolor is this:

"Florida used the same (doctored) machines as Louisiana. And they came from the same 'shadowy' sources."

(to be continued.)

## State is ordered to seize ballots in Detroit election

**BY BEN SCHMITT**  
FREE PRESS STAFF WRITER

November 24, 2005

Acting on a request from defeated Detroit mayoral candidate Freman Hendrix, a Wayne County judge ordered the Michigan Secretary of State's Office on Wednesday to take control of all the ballots in the Nov. 8 election and keep them locked in a vault until a recount can be done.

A federal investigation of possible irregularities with absentee ballots, trouble with vote-tabulating equipment on election night, the fact that about 3,000 votes weren't counted until two days after the election and suspicious of ballot tampering led to the request.

Detroit city attorneys vehemently opposed Hendrix's move, calling it unnecessary. Detroit City Clerk Jackie Currie, who oversaw the election, did not object.

After Wednesday's ruling by Chief Circuit Judge Mary Beth Kelly, state elections officials had trucks en route to Detroit to take control of the ballots. State Elections Director Chris Thomas said the office would keep the ballots in a state building in Detroit.

The ruling came a day after Hendrix filed the request for a recount in an election that he lost to incumbent Mayor Kwame Kilpatrick by more than 14,000 votes.

Nonetheless, Hendrix's attorney, Elizabeth Hardy, said Hendrix had no choice but to request the ballot seizure after learning that Department of Elections rooms, where ballots were being held, were left open without a security guard during Tuesday's meeting of the city Board of Canvassers to certify the election.

Hardy also said Hendrix suspects there was fraud in the election. The suspicion "is based upon very pronounced anomalies in the election results," Hardy said. "If there was fraud, there obviously would be a motivation to destroy the evidence of fraud."

City Attorney Ruth Carter said there is no evidence of tampering and urged Kelly not to be persuaded by perceptions that something is amiss.

"There's no evidence of fraud," Carter said.

But Kelly said that ordering the state to take the ballots wouldn't harm either candidate.

"If there is to be a recount, the mayor has a stake in it," Kelly said. "I think the integrity of that recount is served by having the ballots removed from the possession of the city. I also think the public interest is served."

Kilpatrick has not yet decided whether he will file an objection to the recount, which county officials said will cost \$250,000 to \$500,000.

Kelly noted that Currie, through her private attorney, Steven Reifman, did not object to the state taking control of the ballots.

Freman Hendrix

MX

Kelly said Currie's acceptance of Hendrix's request -- coupled with concerns over ballot security and election irregularities -- caused her to make the decision. She noted that Detroit officials had lost track of ballots in nine precincts and did not count them until two days after polls closed.

In one case on election night, a poll worker took home two computer data packs containing ballot information and didn't turn them in until the following day.

"I don't think anyone can dispute that there have been irregularities," Kelly said.

Kelly had already granted federal prosecutors' Election Day request that the state preserve absentee ballots to make sure Currie's office handled them fairly and legally.

On Tuesday, city Department of Elections Director Gloria Williams asked Thomas to take possession of all the ballots, and he refused. Carter argued that Thomas' refusal showed the state has no concerns about tampering.

## Sheriff's office joins watch over Detroit ballots

MT

### 2 judges divide on security needs

**BY KATHLEEN GRAY and BEN SCHMITT**  
FREE PRESS STAFF WRITERS

November 26, 2005

So who's minding the ballots from Detroit's election?

Seems like just about everybody at this point.

Responding to an emergency request from Mayor Kwame Kilpatrick, a Wayne County judge, early Thursday, ordered the county sheriff's department to guard a Secretary of State office to make sure no one tampers with ballots cast in the Nov. 8 election.

Those guards are in addition to the Michigan State Police troopers already protecting the ballots at the office in Detroit's New Center, where they were taken Wednesday after another Wayne County judge ordered them held for safekeeping.

Even before the election, there were concerns about the counting of absentee ballots. Since then, it has only gotten more complicated.

On Wednesday, Freman Hendrix, who lost the election to Kilpatrick by more than 14,000 votes, won an order from Chief Circuit Judge Mary Beth Kelly to place the ballots in the state's control until Hendrix's recount request is considered by the county.

Then, in the wee hours Thursday, Circuit Judge Cynthia Stephens signed an order granting Kilpatrick's request that the sheriff's department provide additional security.

Kilpatrick's lawyers said it was essential to maintain the integrity of the ballots. Questions of tampering had already been raised: Detroit officials lost track of ballots in nine precincts and did not count them until two days after polls closed. In one case on election night, a poll worker took home two computer data packs containing ballot information and didn't turn them in until the next day.

"When I spoke to the people from the state Bureau of Elections, they were not sure what security would be available," said Kilpatrick lawyer Reginald Turner. "Needless to say, all the parties in this matter have an interest in the security of the ballots."

State Elections Director Chris Thomas said as soon as the state took custody of the ballots, a trooper was dispatched to guard them.

"This is more theater than anything else. These ballots are getting more security than any ballots in the history of the state," said Thomas, who has noted that there has been no evidence yet of vote tampering. "It's very disappointing."

In Kilpatrick's request, Turner said they couldn't reach the other parties involved in the case. They also said they couldn't reach Kelly.

Detroit Mayor Kwame Kilpatrick was granted a request Thursday to increase security for ballots from the Nov. 8 election.

But Kelly and lawyers for Hendrix and for City Clerk Jackie Currie, who is named as a defendant in Hendrix's lawsuit, said Friday that they weren't called.

"I was physically available Wednesday and Thursday," said Kelly.

"Clearly, Judge Stephens has no jurisdiction to act in this matter. Her order is void and will be vacated first thing Monday morning,"

Hendrix's lawyer, Elizabeth Hardy, said the mayor's representatives are showing their "desperation to take control of the ballots."

Currie's lawyer, Steven Reifman, added, "I am shocked by the procedure and the fact that nobody made any attempt to communicate."

## Councilman charged with vote tampering

Friday, November 11, 2005

ASSOCIATED PRESS

NS

TRENTON - The state Attorney General's Office on Thursday announced the indictment of an Atlantic City councilman on charges of tampering with absentee ballots before the city's June 7 primary election for mayor and city council.

Marty L. Small, 31, has been charged with 10 counts of tampering with public records and one count of hindering or preventing voting. An arraignment is expected in the coming weeks in state Superior Court in Atlantic County.

"The integrity of the ballot is paramount to our democracy, and we will prosecute those individuals who attempt to tamper with any citizen's vote," Attorney General Peter C. Harvey said in a news release.

Small is accused of filing absentee ballot applications for 10 people. He represented himself as their "authorized messenger," when he had no such designation from the voters.

A registered voter in New Jersey has the option of having a person pick up their absentee ballot if they are unable to file for the ballot themselves.

Small faces up to 55½ years in prison and \$160,000 in fines if convicted, though incarceration is considered unlikely.

## Sunland Park voting machine seized by state

*Steve Ramirez*  
*Las Cruces Sun-News*

SUNLAND PARK -- A voting machine at the Sunland Park Municipal Building allegedly used for absentee voting was confiscated Wednesday by New Mexico State Police.

Doña Ana County District Attorney Susana Martinez said 111 votes had been registered on the voting machine from Feb. 4 until 2 p.m. Wednesday.

State elections supervisor Larry Dominguez said the voting machine and a registry of absentee voters in Sunland Park were seized after officials with the New Mexico Bureau of Elections, a division of the New Mexico Secretary of State Office, found out that the voting machine was apparently used before the use was allowable.

The voting was for Sunland Park's March 2 municipal elections. Registered voters in the city will elect a mayor, three city council members and a municipal judge. Dominguez said that until Wednesday absentee voting should have been conducted on paper ballots, sealed in envelopes and placed in a locked box that will not be opened by city officials until after polls close.

### Ballots held in county races

Albany -- Court order sets out extensive process to verify absentee votes in three Democratic primaries

By CATHY WOODRUFF, Staff writer  
First published: Saturday, March 6, 2004

All absentee and paper ballots and 47 voting machines used in three Democratic primaries for the Albany County Legislature were impounded Friday under a court order that also sets out an extensive process for verifying the votes.

State Supreme Court Justice Louis Benza signed the order requested by Democratic primary candidates Wanda Willingham and Lucille McKnight, both incumbents, and Ward DeWitt, who challenged District 4 incumbent Virginia Maffia-Tobler.

The three candidates, all African-Americans represented by attorney Paul DerOhannesian, asked that no winners be certified in the special primaries until voting machines are inspected and recanvassed and the validation of absentee and other paper ballots is completed.

The court order and heightened ballot scrutiny are the latest developments in a hotly contested special election ordered by federal courts earlier this year to correct district lines that shortchanged minority voters.

In all three races, significant numbers of absentee ballots remain to be counted, including many that were distributed by a Democratic ward leader and other supporters of the three candidates' opponents.

"There is at least the perception of the possibility of influence on voters with someone delivering ballots and looming over you as you fill it out," DeWitt said Friday. "The process is fraught with the opportunity for influencing the voter."

The closest race, according to unofficial machine tallies, is in Legislative District 3, where Willingham holds a slim 217-213 lead over Jestin Williams.

However, Board of Elections records show that 225 absentee ballots were issued for District 3. More than half -- 131 -- were released to 3rd Ward Leader Jamie Gilkey -- who backs Williams -- for delivery to voters.

Of the 139 absentees returned to the board as of Thursday afternoon, 105 were handled by Gilkey.

Willingham called the distribution of so many ballots through a partisan campaign worker "an embarrassment to the Albany County Democratic Party." She said she believes she has been targeted by a small party faction "because I have my constituents at heart, not the interests of a particular administration at City Hall or the head of the county Democratic Committee."

Efforts to reach Mayor Jerry Jennings and Democratic Chairwoman Betty Barnette for comment Friday were unsuccessful.

Many District 2 absentee ballots also were handled by Gilkey and an associate who worked for

029707

McKnight's challenger, Marilyn Hammond.

In unofficial machine results, McKnight trails Hammond, 210-177. Of 113 absentee ballots issued, 11 were released to Gilkey and 27 to Dennis Bagley, a Democrat who ran against Common Council member Carolyn McLaughlin, Willingham's sister, in 2001.

Bagley and Gilkey, an employee of the Albany Housing Authority, distributed 18 of the 41 absentee ballots returned for District 2.

Hammond and Williams both released statements Friday asking that all the absentee votes be counted and the results allowed to stand.

"They shouldn't try to use the courts to block the will of the voters," Hammond said. "We should just let everyone's voice be heard in the political process and count all the votes."

Williams said: "Those ... people have a right to have their votes counted."

McKnight, however, said Bagley and Gilkey's control over distribution of so many ballots in her heavily minority district makes it unclear whose voice is speaking through those votes.

"Why are these two white men serving as an agent for someone trying to defeat two black women?" she asked, referring to Bagley and Gilkey.

Hammond and Williams, like McKnight and Willingham, are black.

In District 4, where new district boundaries were supposed to improve chances for minority voters to elect candidates of their choice, unofficial machine tallies show DeWitt, who is black, trailing incumbent Maffia-Tobler, who is white, 168-157.

Some 195 absentee ballots were issued in District 4, including 26 to Tyler Trice, who DeWitt says seemed to be participating in the Maffia-Tobler campaign. Trice has been an employee of the Albany Housing Authority, though it could not be determined on Friday whether he still is. He ran unsuccessfully for the city school board in 2002, with the backing of the mayor.

Trice handled 17 of the 101 absentee ballots for District 4 returned by Thursday afternoon, according to Board of Elections records.

per machine may also be needed in polling places that have large numbers of elderly voters or persons with limited ability in English because such voters may require more time.

### FEDERAL OBSERVERS MONITOR STATE AND LOCAL ELECTIONS IN 15 COUNTIES IN 8 STATES

The Justice Department sent 160 federal observers and 39 Civil Rights Division personnel to 15 counties in 8 states to monitor the November 4 state and local elections. Reasons for the observers varied with the counties.

For three counties, the federal observer authority came from court orders. Observers were sent to another eight counties based on special coverage provisions of the Voting Rights Act. Federal observers monitored eight counties in Mississippi: Humphrey; Jones; Kemper; Leake; Neshoba; Newton; Noxubee; and Winston. They also observed elections in Wayne County (Hamtramck), Michigan; Passaic County, New Jersey; and Berks County, Pennsylvania.

Civil Rights Division personnel, most of whom were attorneys, monitored elections in San Francisco County, California; Jefferson County, Kentucky; Essex County (Lawrence), Massachusetts; Queens County, New York; and Harris County, Texas.

The observers and Department personnel monitored to determine whether these counties and localities were complying with federal voting laws, including minority language provisions of the Voting Rights Act; whether voters are challenged improperly on the basis of race, color, or language minority. The observers also monitored to determine whether jurisdictions were permitting voters who are blind, disabled, or unable to read or write to have assistance by a person of their choice, as well as permitting all eligible voters to cast a ballot.

### ONONDAGA COUNTY N.Y. IMPROVES ITS PROCEDURES TO ENSURE VOTING MACHINE BALLOTS ARE CORRECT

The Onondaga County, New York Board of Election Commissions following the election November 4 introduced improved procedures for voting machine preparation to ensure that all candidate's names are on the ballot, and that they are in the right row or rows.

Onondaga County uses AVM lever voting machines in which the names of the candidates are on strips that are inserted into the ballot face of each machines. On election morning in November, election officials were advised that one voting machine had been set up incorrectly.

When election officials checked the machine after 26 persons had voted, they discovered that *no* Democratic candidates were listed because that machine contained no B row strips. Instead the machine had two C row strips with the names of the Independence Party candidates. Technicians inserted a row B strip that contained the names of Democratic candidates, but the strip contained the wrong ballot style for that election district. The name of county legislative candidate Donald MacLaughlin never appeared in the Democratic row on that machine.

The omission took on added importance when the votes were tallied and MacLaughlin lost to incumbent Republican Bernard Kraft by only 165 votes. MacLaughlin's name, which should have

appeared twice -- as the nominee of the Democratic and Working Families Party -- only appeared once on this voting machine as the nominee of the Working Families Party. Kraft's name appeared on the ballot face three times, as the nominee of the Republican, Conservative, and Independence Parties.

After examining the situation, MacLaughlin conceded the election because the error could not have reversed the outcome. Only 164 votes had been cast on the machine in question of which MacLaughlin received 40 votes on the Working Families row. Because no other candidate on the Working Families line received more than 10 votes on this machine, it appeared that some voters Democrats who wished to voted for MacLaughlin as a Democrat found his name on the Working Families party line.

***Onondaga's corrective actions.*** Onondaga election procedures will now require two persons (rather than one) to check both the front and back of each voting machine when it is set up. Polling place officials will have a checklist of items they must check off including verification of each party strip, and each name on each strip.

In addition, the ballot style numbers, which had been printed in small type, will now be printed in large numerals so that ballot style numbers will not be easily confused. In this election for example, with the small print it was easy to confuse ballot style 36 with ballot style 38. The row initials, Row A, B, C, D, or E, will also be printed in large letters on the right side of the ballot strip.

#### **TAVARES, FLORIDA SAVES \$5,000 FLIPPING COINS INSTEAD OF CONDUCTING COUNCIL ELECTION**

The City of Tavares, Florida decided that \$4,500 to \$5,000 it would have to spend on an election to determine which councilmembers would serve two-year terms, and which one would serve a one-year term could be better spent elsewhere. With the agreement of the only three candidates for at-large council seats, the city council passed a resolution to settle the matter by flipping coins rather than going to the voters.

Three at-large council seats were up for election in November, 2003, with two of them for two-year terms. The third seat, held by Councilmember Nancy Clutts, was for the one-year remainder of a term to which Councilmember Norb Thomas had originally been elected.

Only three candidates, including Clutts, qualified to run for council, therefore all were deemed elected. Because the city charter failed to specify how the three seats were to be assigned, the city council resolved the matter in September by resolution rather than holding a November election.

The resolution provided that on November 5 the three newly-elected council members simultaneously flip a coin provided to them by the City Clerk. *"The two candidates whose coins land on the same face (either both heads or tails) shall be deemed elected to the two year council terms. The candidate whose coin lands on the opposite face shall be deemed elected to a one-year term."* The resolution provided for a re-toss if all coins land on the same face.

City Clerk Nancy Barnett, who supplied half-dollar coins for the flip, told *Election Administration Reports* the candidates had to flip three times before they produced a 2-1 split that determined the terms.

**HEADLINE:** JUDGE REVOKES BAIL IN TRIAL OF EX-UNION CHIEF

**BYLINE:** By William Murphy. STAFF WRITER

**BODY:**

A former top city labor official had his \$125,000 bail revoked yesterday after a court-appointed psychiatrist found he was not mentally fit to be tried on charges of stealing more than \$1 million from his union.

Al Diop, 67, who had been in an in-patient program at Lenox Hill Hospital, was ordered transferred to a jail ward at Bellevue Hospital by State Supreme Court Justice William Leibovitz.

The judge set Dec. 8 for a court hearing at which the Manhattan district attorney's office can challenge the finding of the court-ordered evaluation.

The embezzlement trial would be Diop's second in connection with prosecutors' probe into widespread fraud at District Council 37, an umbrella organization representing 125,000 municipal workers. Diop was previously convicted of fraud for rigging a vote to ratify a controversial five-year contract that gave city workers no raise for the first two years.

Prosecutors and defense attorney Ramon Pagan said it was unlikely Diop would be sentenced as scheduled next week on his conviction over the contract vote.

An investigation by the Manhattan district attorney's office had found that top union leaders stuffed ballot boxes, opened ballot envelopes and misreported votes.

Diop had been president of Local 1549, representing 22,000 city clerical workers, and was a member of the DC 37 executive board.

The vote fraud led to a deeper investigation that resulted in convictions for a variety of charges, including a scheme that inflated the price of holiday turkeys given to union members, with the supplier kicking back a percentage of the inflated bills to union leaders.

Diop's attorney said the finding by the court-appointed psychiatrist was consistent with what private psychiatrists at Lenox Hill had found.

"The court has not yet made a determination on his fitness to proceed or his mental competency," Pagan said, adding that all reports so far were recommendations to the court, not legal findings.

"The prosecution will now have an opportunity to challenge the finding of the court-appointed forensic psychiatrist," Pagan said.

Diop faces up to four years in prison for his conviction in the vote fraud.

His three codefendants in the case involving the theft of money pleaded guilty last month. One agreed to a sentence of probation; two accepted pleas calling for prison terms of 1 1/2 to 4 1/2 years in prison and 2 to 6 years in prison.

Police NewsCourt date postponed in PBA election case

UTICA — A court date for a civil action by Utica police officers alleging ballot box tampering in the most recent police union election was adjourned to April 17 and 18, court officials said Thursday.

The legal action, requesting a new election, was filed in state Supreme Court last month by Utica police Sgt. Gary Glatt, who was defeated by incumbent Sgt. James Franco in a bid for the John E. Creedon Police Benevolent Association presidency during the Dec. 9-10 election.

The action alleges a discrepancy in vote tallies as well as improper placement of the ballot box and the immediate disposal of the ballots after the election, court documents state.

Police arrest 3 on drug charges

UTICA — Police Thursday arrested three people and seized an ounce of crack cocaine with a street value of \$2,500, marijuana and money in the 1200 block of Whitesboro Street, the state police Community Narcotics Enforcement Team said.

Terrel L. Loadholt, 24, was charged with criminal possession of crack cocaine with intent to sell, a felony. Two other Uticans, ages 22 and 27, were charged with unlawful possession of marijuana.

Loadholt was sent to Utica City Jail pending his arraignment today. The other two were released on appearance tickets to return to Utica City Court.

— Cecilia Le

Stolen property: State police in Herkimer charged a man Thursday with numerous vehicle and traffic law violations on state Route 5 in Schuyler. He was also charged with criminal possession of stolen property after police discovered the registration plate on his vehicle was stolen, police said.

## 2 McKees Rocks council candidates charge Election Day cheating at polls

Tuesday, November 29, 2005

By Jim McKinnon, Pittsburgh Post-Gazette

Two African-American candidates for borough council in McKees Rocks filed a complaint yesterday, alleging that supporters of their opponent illegally entered voting booths to help voters write in their candidate's name.

Incumbent Democratic Councilwoman Wanda Jones Dixon and newcomer Renee Surgest have asked Common Pleas Court to declare them both winners of the two available council seats.

Though not all write-in ballots have been counted, it appeared yesterday that the write-in candidate, David Rugh, got the most votes with 148.

Mrs. Dixon retained her seat by coming in second. Ms. Surgest missed being elected because of the write-in campaign.

The two women had been among the Democrats' endorsed slate of candidates and both won the party's nomination in the primary election last spring.

Mrs. Dixon said in a letter to the Allegheny County Elections Division that she only learned of the write-in campaign on Election Day, Nov. 8, in a conversation with borough Councilman Keith Schwab.

Mrs. Dixon, in her letter of complaint, said that Mr. Schwab told her, "The Democratic Party is running a Mickey Mouse campaign against you and Ms. Surgest."

Ms. Surgest, in a separate letter, said that supporters of Mr. Rugh temporarily blocked her entrance to the polling place when she went there to vote.

She said that she witnessed a polling judge enter the voting booth with at least one voter.

County Elections Director Mark Wolosik said the petition, filed yesterday at the deadline to do so, is allowed when a candidate feels an irregularity affected the results of the election.

The two women's opponents have until Friday to respond to the petition.

The plaintiffs also charge racism, arguing that the borough's Democratic Party intentionally campaigned against them to prevent black candidates from being elected.

A hearing on the complaint had not been set yesterday.

## Straight-line ballots don't jibe, Dries says

BY SHAWN A. HESSINGER

*Tamaqua Bureau Chief*

For the second election in a row, the numbers don't add up.

Whether the result of human error or a technical malfunction, a glitch in the results of the Nov. 6 general election in Schuylkill County will likely lead to a recount of all 43,069 ballots cast.

**Archives**

- [Today's News](#)
- [Past 7 days](#)
- [Full Archives](#)

At issue is a discrepancy in the number of party-line votes: Ballots are run through the optical-scanning machines at the STS building in Saint Clair twice, and the two reports didn't match, according to Elizabeth J. Dries, director of the county Election/Registration Bureau.

**Contact Us**

- [Newsroom](#)
- [Subscribe Online](#)
- [Circulation](#)
- [Our Store](#)

Dries said she became aware of the problem Election Night when she noticed 271 party-line Republican ballots and 10 Democratic ones had been cast in Eldred Township; however, only 248 people voted.

There could have been at least two reasons for this, she said:

One, halfway through the night she noticed the technician from the county machines' supplier, Elections Systems & Software, Omaha, Neb., was hand-entering data contrary to procedures.

Two, the counting machines have to be reprogrammed for each precinct; perhaps that didn't happen, particularly since one of the county machines broke down and three of the other four malfunctioned at various points in the evening.

The county commissioners, sitting as the county Board of Elections, were planning to convene a special meeting at 8:30 a.m. Friday where they plan to approve the recount. A recount of all the ballots was also conducted in the May primary.

"We want to make sure everything is right," said commissioners Chairman Forrest L. Shadle.

Commissioners Jerome P. Knowles and Edward D. Barket concurred when contacted separately.

029725

All three said they doubted the glitch had effected the outcome of the election significantly, but Barket said in isolated incidences like the passage of an Act 50 referendum in the Blue Mountain School District by just seven votes, the recount could make a difference.

"What went wrong? We don't know," said Barket.

All three commissioners have discussed the need to improve the current vote-tallying situation, but disagree on solutions.

Knowles insists the problem has to do with the technical support being provided by Elections Systems & Software, pointing to the fact that for some time the county had no problems with its machines until the primaries in May when the company sent a subcontractor to provide technical support.

Though the current technician was an employee of the company, both Knowles and Barket expressed a lack of confidence in his performance.

Dries said she didn't stop the technician from hand-entering data because the machines were malfunctioning and she didn't think she had much choice but to proceed.

Barket said he would have to wait to see how the newly reprogrammed machines would handle the recount before deciding whether he believed the machines or the personnel were at fault.

The recount will probably be done Friday or Saturday and Elections Systems & Software has promised to supply two technicians and special reprogrammed boards for the vote tally machines, Barket said.

## Keeping it Legal - - Authorities confiscate ballots from Alamo election

By Ryan Gabrielson  
Monitor Staff Writer  
[rgabrielson@themonitor.com](mailto:rgabrielson@themonitor.com)

ALAMO – The Hidalgo County Elections Division and District Attorney's Office impounded ballots and other records from Alamo City Hall Monday amid allegations that voting in the run-off election was tampered with.

Much of the concerns centered on mail-in, or early, votes. Commissioner Diana Martinez defeated Alamo attorney Veronica Moncivais by nearly a two-to-one margin for Place 2 on the Alamo City Commission Saturday. The runoff was required because neither Martinez nor Moncivais received 50 percent of the vote in the Nov. 4 general election.

Moncivais and one of her supporters, Joey Lopez, filed complaints with Hidalgo County District Attorney Rene Guerra on Monday about city officials' actions during the voting and ballot counting.

Teresa Navarro, Hidalgo County elections administrator, with an order from Judge Aida Flores of the 398th district court, removed a box of mail-in and regular ballots. The materials will be examined as part of a criminal investigation, Navarro said.

An elections clerk and Hidalgo County Sheriff's deputy also participated in the seizure.

Throughout the runoff there have repeatedly been complaints called in to the elections division, Navarro said. The seizure Monday was triggered by several concerns.

"If there is just the slightest indication that an election is compromised," an investigation is warranted, Navarro said. "The city of Alamo has found itself in an unfortunate situation."

Last Thursday the election's presiding judge, who oversees voting, resigned after it was discovered he had authored and distributed a flier supporting Martinez.

Among the complaints issued by Moncivais were that early, mailed in, ballots may have been opened before official counting began and that Alamo Mayor Rudy Villarreal had access to parts of city hall where voting was taking place. Both Villarreal, who has openly supported Martinez, and Alamo City Secretary Margot Saenz have denied any wrong doing.

"On (Dec.) 5, 2003, while in the city secretary's office, I noticed an open early mail-in ballot, and when I questioned Margot Saenz about the open envelope, she informed me that the main man had delivered the said ballot open," Moncivais said in a sworn affidavit.

"As we were talking to her, one of the city's mail men, (Commissioner) Robert de la Garza, arrived at her office and I asked him if they had delivered any open main-in ballots. Mr. De la Garza then informed me that no mail-in ballots had been delivered open," the candidate's affidavit said.

General voting for the commission runoff was Dec. 6. Saenz did not immediately return a call for comment from The Monitor on Monday.

De la Garza was reelected to the city commission in November; four years ago

he shared a campaign ticket with Villarreal and Martinez. Some of the allegations focus on Villarreal's visit to city hall late Saturday afternoon as residents continued to vote and ballot counting had begun. The mayor and city secretary said he came in to fill out a Texas Municipal League conference registration form, which was already a day past the early registration deadline, and to check his mail. Lopez said in his affidavit that he saw Villarreal in Saenz's office going over a list of Alamo residents that showed who had voted and that there were open mail-in ballots beneath the mayor's right arm. "When I questioned what he was doing, I was told by the city secretary, 'He's the mayor, he can be here if he wants to.'"

"Oh, he's lying," Villarreal said. "There was no list of voters." Lopez had also said Saturday night that Villarreal left without any mail, a point the mayor denies.

"If that's the biggest complaint they have got, they've got nothing. If there was anything going on I think I would have locked the door," Villarreal said. Additionally, Villarreal's car was parked Saturday in the city hall's lot. Too close, Moncivais said, for the elected official. When the concern was brought to Saenz, the city secretary went outside and moved the mayor's car.

"My complaint to her and the police was that she should have been inside the building overseeing the election and the mail-in ballots and not being the mayor's personal servant," Moncivais' affidavit states. The mayor said Moncivais' complaints have more to do with the election's outcome than with anything he or Saenz are accused of doing. "She's a sore loser, when you lose by that many votes," Villarreal said. The investigation will be conducted by the District Attorney office and should be done quickly in about six weeks, Navarro said. "The residents of Alamo deserve that," she said. Judge throws out election fraud case

TN

By George Brown

A judge threw out a court case over an election controversy Tuesday. But the man who filed the lawsuit still insists someone may have tampered with election results. John Willingham alleges fraud and uncounted votes. He was in court Tuesday asking a judge to force the election commission to turn over raw data from each voting machine. But after two hours in court, the problem lay in the proof. And the judge said Willingham had none.

The allegations center around the recent city mayoral election. Willingham says there were indications of fraud and voting machines that malfunctioned, perhaps playing a part in his 45,000 vote loss to mayor Willie Herenton. Willingham said, "It caused me a great deal of concern. It actually caused me to go into hibernation for a day or two." Willingham says exit polls at one precinct showed he got 43 votes, but only 12 were officially tallied. Asked if he thought there could be a conspiracy to fix elections, he said he wouldn't rule it out. "There is a lot of money and power invested by constituents of insiders in this city who want not want to see a change."

Willingham's attorney said he might be able to prove their allegations if the election commission would turn over data it has withheld. The election commission however said the requests were too broad and some information confidential. Attorney Robert Spence said, "It's one thing to sit around the coffee table and make wild allegations. It's another to file a lawsuit in a court of law."

Willingham said his suit was not meant to benefit him, but to clear the air over elections. "It's for the people of Memphis-Shelby County if there is a wrong we need to know it and if there is a hole in the dike we need to plug it." Chancery Judge Walter Evans however felt there was no proof of fraud and threw the case out.

In the hall outside the courtroom, Willingham told me he feels part of the problem is voters don't get a receipt of how they voted. That will change however in two years when federal laws will require such receipts.

# No vote fraud plot found

## Inquiry leads to isolated cases, Biskupic says

By **STEVE SCHULTZE**  
[sschultze@journalsentinel.com](mailto:sschultze@journalsentinel.com)

Posted: Dec. 5, 2005

F.B.E.A.

The nearly yearlong investigation into voter fraud in 2004 has yielded no evidence of a broad conspiracy to try to steal an election, U.S. Attorney Steve Biskupic said Monday.

He predicted that perhaps "a couple of dozen" isolated cases of suspected fraud might be charged, and he said that sloppy recordkeeping by election officials was a key impediment to proving such cases.

Nothing in the cases that his office has examined has shown a plot to try to tip an election, Biskupic said during a meeting with Journal Sentinel editors and reporters.

Critics had raised such fears of partisan voter fraud schemes in the election aftermath. But Biskupic said, "I wouldn't say that at all."

He said, "We don't see a massive conspiracy to alter the election in Milwaukee, one way or another."

Biskupic, a Republican whom President Bush appointed in 2002, and Milwaukee County District Attorney E. Michael McCann, a Democrat, announced a joint effort to investigate allegations of illegal voting in January.

That followed Journal Sentinel stories on widespread problems in Milwaukee, including flawed voter counts, votes cast from invalid addresses, outdated poll lists and discrepancies between the number of ballots cast and voters listed at dozens of polling places.

The newspaper found similar problems elsewhere in the state.

Four of the 18 people accused of felonies in the investigation have been convicted, officials said Monday.

Here is the breakdown of cases:

- Federal prosecutors have charged 14 people: 10 felons with voting illegally and four people with double voting.

Four of the felons accused of illegal voting were convicted, one was acquitted and five cases are pending, Assistant U.S. Attorney Rick Frohling said.

None of the four people charged with double voting has been convicted. Charges against one person were dismissed because of mental incompetence, one person was acquitted, one trial resulted in a hung jury, and one person who agreed initially to plead guilty now wants a trial, Frohling said.

Two of those charged with double voting were driven to several polling places in the same van, but the driver hasn't been identified, and no evidence of an organized conspiracy has been uncovered, Frohling said.

- McCann's office has charged four people with felonies in Milwaukee County Circuit Court. Two people affiliated with the Association of Community Organizations for Reform Now were charged with filing false voter registrations, and two felons were accused of illegal voting. None of those cases has been resolved.

Biskupic said he had hoped to complete his portion of the investigation this year to avoid dealing with such matters in 2006 - another election year.

<http://www.jsonline.com/news/metro/dec05/375572.asp?format=print>

 **Section:** State politics

029730  
12/6/2005

He said, however, that the investigation will likely spill over into next year, which will feature elections for governor, Congress and most of the state Legislature.

Biskupic declined to estimate when his part of the inquiry might be done.

Assistant District Attorney David Feiss said the district attorney's office also likely won't complete its inquiry this year.

Feiss, too, wouldn't say how much longer the investigation would last.

Biskupic said recordkeeping problems have been rampant.

He said that jurors interviewed after acquittals told prosecutors the record problems created doubt as to whether fraud had occurred.

"I don't know how you are going to prove a case when there is no paper trail," Biskupic said.

In addition, he said, it was "extremely difficult" to prove that felons ineligible to vote did so intentionally.

State law bars felons who haven't completed probation or parole from voting.

Defendants have argued that they didn't know they were barred from voting as felons, Biskupic said.

"Once people hear that argument can get them off in front of a jury, you tend to hear it more," he said.

## Partisan split

The 2004 vote problems took on added significance because of the close outcome of the presidential election in Wisconsin. Democrat John Kerry beat Bush by 11,000 votes, one of the closest margins in the country.

Republicans have argued that fraud appears to be rampant in Milwaukee and that stricter controls must be enacted.

Democrats have said that the main problem is clerical shortcomings, not fraud.

That only 18 voter fraud cases have been charged doesn't mean it's not a major problem in Wisconsin, state Republican Party Chairman Rick Graber said.

"For anyone to sit back and say our election system doesn't have problems, that is just blatantly false," Graber said. "The questions raised in 2004 still haven't been answered."

He criticized Democratic Gov. Jim Doyle for vetoing legislation that would have required photo identification at the polls.

Milwaukee Mayor Tom Barrett, a Democrat, said the results of the investigation confirm his view of a year ago, that there were only isolated instances of fraud.

"Initially, there were people painting this picture of some sort of conspiracy where there were bands (of scammers) getting together to try to defraud the system, and that obviously has not happened," Barrett said.

Barrett said he supports prosecution of lawbreakers and is critical of state officials, who said they're unlikely to complete a statewide voter list in time for April elections.

Biskupic said he worried that cases of voter fraud could spawn a partisan battle, in which the losing side perceives that the winner had some unfair advantage and becomes "more inclined to do something" illegal to even the score in the next election.

THE CAMPAIGN BEGINS

**BYLINE:** JAMES O'TOOLE, POLITICS EDITOR, POST-GAZETTE

**BODY:**

"I'm a uniter, not a divider," George W. Bush frequently reminded us.

After the longest, most expensive and, arguably, most unpredictable presidential campaign in history, the Texas governor, and, at long last, president-elect, will have ample opportunity to prove that.

He will take the oath of office to preside over an electorate divided evenly between its preference for him and his chief opponent. His ascension follows an election that reflected the nation's sharp divisions along lines of race, gender and geography.

It was an election waged in the context of a decade-long economic boom that seemed to have anesthetized most of the country to the toxic partisanship and bitterness that had consumed the political classes of Washington through impeachment and government shutdowns.

One of the prime arguments for the candidacy of the affable Texan was his vow to shift the tone in Washington, to discourage the scorched-earth tactics that seemed to make every Washington political dispute degenerate into litigation.

It will not be easy, as Bush takes office after a post-balloting brawl replete with mutual charges of intimidation, illegitimacy and election theft. The path to confirmation of his crucial Florida victory became a full-employment program for lawyers.

But at least the equipoise that propelled this election from the ballot boxes to the courts was not the product of passionate ideological battles or deeply polarizing personalities. Policy differences were confined to a relatively narrow slice near the center of the political spectrum.

Bush proclaimed himself a conservative, but a "compassionate" one, and he avoided the ideological militancy that had sent Newt Gingrich's negative numbers soaring. Gore relied on populist rhetoric, but, to the occasional frustration of more liberal members of his party, advanced the policies of a centrist New Democrat.

From the perspective of arithmetic, the division in Election 2000 is clear. The new president captured the White House with a bare majority of 271 electoral votes, while losing the popular vote by a small margin. He will work with a Congress similarly split down the middle: a 50-50 Senate; and a House in which his own party is clinging by its fingernails to a five-seat advantage.

The stage for that shaky victory was set by a one-vote margin at the U.S. Supreme Court, overruling a one-vote decision by Florida's high court.

But all this division may be more of a matter of numbers than of conflicting beliefs. In the face of the major parties' ideological evolution and the competition by two relatively uncharismatic candidates trying to appeal to the middle, many voters simply seemed to have a hard time making up their minds.

029733

## CHAPTER ONE; THE CAMPAIGN BEGINS Pittsburgh Post-Gazette (Pennsylvania)

## The campaign begins

President Clinton ousted the father of the Texas governor in 1992, but the 1990s brought plenty of good news to the GOP, as well. Republicans took over the Congress for the first time in 40 years in the midterm election of 1994. GOP strength grew in state legislatures across the country. Nearly two-thirds of Americans lived in states with Republican governors.

But as the decade wore on, most of the good news for the party came from outside Washington. In 1995, the Gingrich-led GOP partisans, emboldened by their victory the previous year, shut the federal government down in a budget face-off with Clinton. They blinked before the president did, and they paid for it at the ballot box.

In 1996, Clinton coasted to re-election, and the strength of the economy that would boom on through his second administration was a big plus for Gore.

The downside of Gore's Clinton ties was just coming into view in the last weeks of the 1996 campaign, with charges of fund-raising abuses by the Democrats.

Still to surface were names such as Monica Lewinsky, Linda Tripp and Kenneth Starr. The impeachment scandal would tarnish Clinton's place in history and serve as a drag on Gore's chances to succeed him. But the issue was a double-edged sword, as congressional Republicans found when they lost seats in 1998 as their efforts to campaign on the scandal turned off many voters.

To many members of the Republican establishment outside Washington, Texas Gov. George W. Bush was seen as the antidote to that politically poisoned atmosphere. The Texas governor didn't have the longest resume in GOP politics. But he had cultivated a reputation for attracting Democratic support on the way to his landslide election to a second term. As the son of the former president he had instant name recognition.

Through 1999, Bush continued to attract support from party leaders, notably his fellow governors and the deep pockets of the GOP's big contributors. He was well on his way to amassing the war chest that would allow him to decline federal matching funds for the primary season. That, in turn, enabled him to confront his competition unfettered by the state-by-state limits on primary spending that are imposed on candidates who accept the federal campaign aid.

## The Iowa edge

Over the last three decades, Iowa has become the starting blocks for the presidential race.

In 1972, the first year of the early February Iowa caucus schedule, the returns were received without fanfare in a back room behind the Democratic Party's downtown Des Moines office.

Since then, the caucuses have grown into a gargantuan production attracting millions of dollars, hundreds of reporters, and candidate pilgrimages that start more than a year in advance.

That's the process that gave former President George Bush what he described as "big mo" in 1980 — and just short of 20 years later, the younger Bush moved quickly to set up the most extensive, sophisticated organization the state had ever seen.

The Iowa caucus process has long been controversial. Why, its critics ask, should this atypical homogenous state have such an outsized influence on the selection of the president? But the caucuses are the epitome of fairness and rationality compared with an even earlier Iowa event — the straw poll — that assumed a crucial role in winnowing the GOP field for 2000.

In the summer of 1999, Bush's high poll numbers and financial advantages were clear, but he had yet to be tested by voters outside his state. Many observers still saw the GOP contest as relatively fluid — so wide open, in fact, that it had attracted a dozen formal or informal candidates. They included the millionaire Steve Forbes; Pat Buchanan, the conservative who had been a force in the previous two GOP nomination battles; Elizabeth Dole, the former transportation secretary and spouse of the party's last nominee; and, in a gift to political cartoonists and late-night comics everywhere, former Vice President Dan Quayle.

As a fund-raising and party-building tool, the Iowa GOP appropriated the state fairgrounds in August 1999 for a presidential straw poll. Any Iowa Republican could vote so long as he or she bought a \$25 ticket.

029734

Bush won big.

Buchanan would soon migrate to the Reform Party. Quayle and former Tennessee Gov. Lamar Alexander, both of whom had banked on grass-roots organizations in Iowa, dropped out as well. Dole, her campaign starved for funds, would soon follow. The straw poll went a long way toward performing the winnowing chore that the caucuses themselves had performed in previous years. Before a single official vote was cast, the potential GOP field was cut in half.

Gore goes populist

Gore's supporters had started his Iowa groundwork even earlier.

He had skipped the caucuses during his abortive presidential run in 1988. But he devoted plenty of attention to them this time round. Throughout his vice presidential tenure, Gore cultivated the state's activists, raised money for its Democratic legislators, sent Christmas cards all over the state.

Several Democrats had made noises about running for the Democratic nomination. But in the end, the only one to challenge Clinton's heir apparent was former Sen. Bill Bradley of New Jersey. In the Senate, Bradley had compiled a mainstream centrist record. But in some respects, he ran against Gore from the left, particularly in his call for a system of tax credits to allow universal health care coverage.

Bradley criticized the Clinton-Gore health care record. He mocked Gore's wonkish immersion in the details of policies across the range of government. Instead, Bradley promised to concentrate his presidency on a few Big Ideas, such as improved race relations and universal health care.

Despite Gore's long cultivation of the state, Bradley clearly thought he could sneak up on the vice president in the caucuses.

Gore, meanwhile, had suffered continual criticism of his campaign organization and persona throughout the summer of 1999.

He tried to reinvent his campaign by moving his headquarters from the lobbyist lairs of Washington back to his former political base in Nashville.

This symbolic return to his roots would not be requited in electoral votes there the following fall, but it seemed to pay off in the short term. On the stump, Gore became a more aggressive, effective candidate.

Gore made subtle adjustments in his apparel to complement his new sleeves-rolled-up campaign style. Mixed with the Washington uniform of blue suits and white shirts were fashion-forward earth-toned suits along with khakis and jeans.

Meanwhile, Bradley proved a surprisingly maladroit candidate. In a Des Moines debate just three weeks before the caucuses, Gore attacked his challenger for voting against rural flood relief. Bradley wasn't able to rebut the criticism, even though Gore had seized on Bradley's vote against a single amendment to an overall relief bill that Bradley had supported.

Days before the Iowa election on which he had waged so large a bet, Bradley's attempts to get his message out were obscured by reports that he had suffered a recurrence of an irregular heart beat. The condition was not life-threatening physically, but it was nearly fatal politically.

Gore, buoyed by newfound energy — along with the backing of the union and Democratic Party establishments — surged ahead.

Enter John McCain

As the caucuses and primaries drew closer, Bush's evident strength had allowed him, at least for the time being, to avoid stepping on one of the traditional land mines of the nominating process. Former President Richard Nixon's widely noted advice to Republican candidates was to run to the right during the primaries and tack back to the center in the general election. Bush resisted the temptation to cater to the right.

Through the wintry early weeks of 2000, Bush projected a big-tent version of Republicanism. At one of the final Iowa debates, he shrugged off the taunts of conservative candidate Gary Bauer, who demanded that Bush pledge to make

opposition to abortion a litmus test for Supreme Court nominees.

Bush's sense of political security was due for a reality check.

The same weekend as that debate, Joe Andrew, chairman of the Democratic Committee, was in Des Moines staging a bit of political theater. He led a gaggle of reporters and television cameras across a restaurant parking lot to witness a steamroller labeled, "Bush Tax Cut," steered by a Democrat in a George Bush mask, rolling over a tool box labeled, "Social Security Lock Box."

On its second try, the steamroller managed to shatter the box.

One of Gore's key Iowa organizers shook his head when the scene was described to him. He faulted the skit not for its sophomoric tone, but for its target.

"I think those DNC guys are making a mistake attacking Bush," he said. "I'd be more worried about running against the other guy."

The other guy was Sen. John McCain. Citing a lack of resources, the Vietnam War hero and former POW decided to skip the Iowa competition and instead concentrate on New Hampshire, which would vote a week later.

New Hampshire, like several of the early Republican primaries, permitted crossover voting by independents and Democrats. The Arizona senator had compiled a strongly conservative record, but his appeal crossed party lines.

Some analysts noted that as Bradley's Iowa weakness became increasingly apparent, some of his New Hampshire support from independents migrated not to Gore but to McCain.

That phenomenon proved an omen for the general election. Gore and Bush secured their respective party bases in both New Hampshire and Iowa, as they would in the general election. But for many independents and swing voters, the more attractive candidates were Bradley and McCain.

Gore and Bush came out of Iowa buoyed by landslide victories. Gore would beat Bradley again in New Hampshire, although not by as large a margin. But Bush barely had time to savor his Iowa victory.

Crack in the facade

McCain had spent virtually all his time in New Hampshire. He had carpet-bombed the state with inspirational biographical videotapes. And it paid off. Buttressed by the support of many independents and Democrats, his campaign notched a decisive 18-point victory.

A winning personality and a big-tent philosophy had been among the most powerful engines of Bush's candidacy. Money was another. But until New Hampshire, Bush also had drawn crucial momentum from a sense of inevitability.

For one tense and increasingly bitter month, McCain changed that.

Democratic rules barred any state, except for the traditional gatekeepers of Iowa and New Hampshire, from choosing delegates before March 7. There were no similar restrictions on the Republican side, where several states would choose delegates in the weeks between New Hampshire and Super Tuesday.

The result was that the political and media spotlight temporarily shifted almost exclusively to the GOP side.

Delaware held a little-noticed GOP primary the week after New Hampshire, but the prime focus for the campaigns and the media was South Carolina, where Bush and McCain would face off on Feb 19. By then, every other candidate except Alan Keyes had dropped out of the Republican field.

A chastened Bush now found it necessary to heed Nixon's advice. His campaign shifted to the right in South Carolina. Almost his first stop in the state was Bob Jones University, a citadel of Christian fundamentalism where interracial dating was banned and where a former university president had condemned Roman Catholicism as a cult.

McCain, proclaiming himself a champion of reform, charged around the state giving interview after interview on his campaign bus, the "Straight Talk Express."

Rebounding from New Hampshire, the Bush campaign tried to preempt the challenger's rhetoric as well as his

## CHAPTER ONE; THE CAMPAIGN BEGINS Pittsburgh Post-Gazette (Pennsylvania)

stagecraft. Bush rallies now took place in front of a giant banner sporting his new campaign slogan, "A Reformer with Results." He rode a bus called the "Victory Express." He suddenly embraced the town meeting format that had brought success to both McCain and Gore.

Bare knuckles show

Through the winter, the Republican race had remained fairly civil.

South Carolina changed that. Things got rough fast.

Bush professed outrage at a McCain ad comparing his veracity to Clinton's. McCain was the brunt of e-mail and whispering campaigns charging that he was wavering in his opposition to abortion.

It was the most expensive, hardest-fought primary in the state's history. In the end, Bush rose from the canvas of his New Hampshire defeat to deliver a body blow to McCain's insurgent candidacy. The senator conceded in a remarkably bitter speech, full of indignation and invective at Bush's tactics. It seemed his colorful campaign had run out of gas.

But three days later, Michigan's Republican Party had another primary. Bush's forces felt secure there, in part because of his support from the state's energetic governor, John Engler. But Michigan, like New Hampshire and South Carolina, allowed crossover voting by independents and Democrats.

Since there was no Democratic contest competing for their attention that day, many chose to vote in the GOP primary, most of them for McCain.

It was another sharp-elbowed contest. In a controversial speech, McCain denounced Christian conservative icons Pat Robertson and Jerry Falwell as voices of intolerance. Robertson, himself a former GOP presidential candidate, repaid the favor with thousands of recorded phone calls critical of McCain. McCain's supporters filled the phone lines with calls reminding Catholic voters of Bush's appearance at Bob Jones University.

McCain shocked just about everyone and won Michigan — along with a same-day victory in his home state of Arizona. Recrimination and doubt returned to the Bush campaign.

They would be exorcised by Bush's commanding showing two weeks later.

Until March 7, the nomination fights had been rewarded chiefly in the currencies of momentum and publicity. On March 7, Super Tuesday, the real prize, convention delegates, came to the fore. Sixteen states conducted primaries or caucuses for both parties that day.

The balloting fell on Mardi Gras, and was a fat Tuesday indeed for the well-financed frontrunners who could fight on many fronts simultaneously.

Bush and Gore swept the table. On that day, both parties' nominations were effectively decided.

## Ex-Legislator Accused Of Vote Fraud

### Faces 7 Felony Counts Of Absentee Ballot Fraud

ADVERTISEMENT

By LYNNE TUOHY  
Courant Staff Writer

August 12 2003

Former Hartford state Rep. Barnaby Horton was arrested Monday and charged with seven counts of absentee ballot fraud - all felonies - in connection with his unsuccessful Democratic primary battle last fall against Kenneth R. Green.

The violations allegedly occurred at the Betty Knox apartment complex on Woodland Street in Hartford, where one resident, Silas Woodward, told investigators Horton sat at his kitchen table as Woodward completed the ballot, and pointed to his own name and that of state Sen. Eric Coleman, another Hartford Democrat, as the boxes to check.

"Against his wishes, Woodward checked the box, thereby casting a vote for Horton," the arrest warrant affidavit states. "Woodward stated he felt compelled to vote for Horton because of Horton's presence while Woodward completed the ballot."

Horton, 34, also was charged with making a false statement to the State Elections Enforcement Commission. In a sworn affidavit he supplied to the commission dated Sept. 6 - four days before the primary - Horton stated, "At no time did I handle or assist residents with any absentee ballots, nor did I leave with anyone's absentee ballot."

The arrest warrant affidavit alleges that not only did Horton leave the complex with ballots, but also brought along postage stamps and affixed them to the envelopes.

Horton, accompanied by his lawyer, Austin J. McGuigan, and several family members, turned himself in to the chief state's attorney's office in Rocky Hill Monday morning. He was released on his written promise to appear in Hartford Superior Court Aug. 25. Neither Horton nor McGuigan returned phone calls seeking comment.

Horton is perhaps best known as the lead plaintiff in the landmark Horton vs. Meskill lawsuit that led to the 1977 Supreme Court ruling that forced the state to better equalize school funding.

The chief state's attorney's office's recently formed public integrity bureau is handling the prosecution.

Hartford Democratic Chairman Noel F. McGregor said Horton's arrest "sends a message that you have to play by the rules."

029740

08/15/2003 10:55 AM

"I'm not the type of person to pour salt in a wound, but people have to understand that you can't break the law," McGregor said. "There're no shortcuts."

Horton, a lawyer, was serving his second term as state representative when redistricting forced him into a primary battle with four-term Democrat Green, of Bloomfield. Their respective districts were now one. It was Green who launched the elections enforcement commission investigation last October, with allegations that Horton was present when absentee ballots were being completed and that he also took possession of some absentee ballots. The residents interviewed by investigators bore out Green's allegations.

Frances Huckaby said she was in Woodward's apartment when Horton was there, and also filled out her ballot in his presence, though she shielded it so no one would see which boxes she checked. Horton took the sealed ballot form from her. Huckaby said she asked fellow resident Rosalind Sailor why she was taking Horton door to door. "Sailor reportedly responded that people let you in if you're with someone from the building," the affidavit states.

Another resident, Alma Daigle, told investigators that shortly before the primary, Horton knocked on her door and asked if she had received her absentee ballot. Daigle said she had, but needed help completing it because of her poor vision.

Daigle said Horton left, but returned about half an hour later with another resident. Horton then explained the ballot to Daigle, she said, and read the names of the candidates. Daigle told him she always voted for the white candidate, according to the affidavit. Horton, who is white, pointed to the candidate she wanted, and she checked the box. Horton also offered to mail the ballot and left Daigle's apartment with it, she told the investigators.

Sailor gave conflicting statements to investigators on different occasions, but repeatedly said she did not see Horton handle absentee ballots. When investigators contacted Sailor again in December, she refused to cooperate. "If you want to do something to Barnaby Horton, you'll have to do it on your own. I don't want to be bothered anymore," the affidavit quotes her as saying. She also said "it seems like a witch hunt."

Chief State's Attorney Christopher L. Morano begs to differ.

"The independence of the voter when they're making a decision is paramount in the way we conduct elections," he said Monday. "The thrust and intent of the law is to make sure the voter is making the decision of their own volition, and not with the sense that anyone is twisting their arm."

Green said he was not surprised by the arrest.

"These actions were really quite extensive and quite a violation," he said. "I think that these things need to be investigated and dealt with to the fullest extent. We need to have the public trust."

In September, according to the affidavit, Horton and his lawyer at that time, R. Bartley Halloran, both broached the subject of reaching a "settlement" with elections enforcement lawyers. Halloran told them Horton "could not unequivocally state that he was not present when a voter or voters were completing their absentee ballots," the affidavit states.

The state lawyers invited Halloran and Horton to provide the commission with an explanation or defense for Horton's conduct, but said they heard nothing back.

Morano said the investigation is ongoing, but that he doesn't anticipate additional arrests.

The charges include four counts of unlawful possession of another's absentee ballot and three counts of being present, as a candidate, when absentee ballots were being filled out. All seven counts are Class D felonies, each punishable by up to five years in prison and a \$5,000 fine. The false statement charge is a Class A misdemeanor, punishable by up to a year in jail and a \$1,000 fine.

It's not clear what impact, if any, a felony conviction would have on Horton's license to practice law in the state.

Horton's is the first major absentee ballot scandal to hit Hartford since the 1996 arrest of former 4th District state Rep. Edwin Garcia, D-Hartford, and six campaign workers. Garcia ultimately resigned his state office and from his job as a Hartford police sergeant. He was sentenced to a year of home confinement, which a judge lifted after five weeks, and two years' probation after pleading guilty to three felony counts.

## Voting rolls go unchecked in San Bernardino County

CA

By KATHLEEN STINSON

Staff Writer

County elections officials have no idea how many non-U.S. citizens may be voting because no one checks voter registration for proof of citizenship.

The main way elections officials discover non-citizens who vote is through tips from citizens, said Chief Deputy Registrar Donna Manning.

When filling out the voter registration form, each voter signs a declaration, under penalty of a felony conviction, that he/she is a U.S. citizen, 18 years of age or older on or before the next election and not in prison or on parole. The citizenship information is only checked randomly.

Once a year the registrar of voters office "bumps" its registration files up against the jury service forms filled out by people called for jury duty, Manning said. The two forms are compared for citizenship discrepancies.

"Out of a thousand forms, you get a very small percentage -- one or two -- about a handful a year that don't match," Manning said, adding some say they are not citizens to get out of jury duty.

Assemblywoman Sharon Runner, R-Antelope Valley, said she "absolutely believes" voters should have to provide proof of citizenship when registering to vote. With people being paid to register voters, this leaves open the potential for voter fraud, Runner said.

The issue of voter fraud was prominent in the 1996 congressional race between Rep. Robert Dornan and Loretta Sanchez in Orange County. An investigation by Secretary of State Bill Jones revealed that Hermandad Mexicana Nacional had registered 490 documented non-citizens to vote, 303 of which voted in the election.

Assemblyman Mark Wyland, R-Escondido, introduced a bill in the past legislative session to require voters to provide proof of citizenship when registering to vote. Assembly Bill 934 failed to pass in the 2005 Legislative

K Reg

029742

session but is expected to come up again in the upcoming session, Runner said.

The Registrar of Voters office also checks for duplicate voter registrations within the county and against a 57-county statewide list maintained by the Secretary of State's office when the registration form is initially entered into the system.

## Man charged with vote fraud

CA

By ERIC STERN  
BEE CAPITOL BUREAU

SACRAMENTO — A Tracy man faces five felony counts of forging voter registration cards for the November 2004 election, the California secretary of state's office said Wednesday.

It was the second time prosecutors have filed registration-fraud charges related to last year's election in San Joaquin County, where the Democratic and Republican parties invested tens of thousands of dollars to increase voter rolls.

The effort was tied to the hotly contested state Senate race between Democratic Sen. Mike Machado of Linden, who edged out Republican challenger Gary Podesto, the former mayor of Stockton.

"This past election was really rampant" with suspicious voter registrations, said Deborah Hench, the top election official in San Joaquin County.

She alerted state election-fraud investigators about her concerns last year as 30,000 new voters were registered between the June primary and the November general election.

Authorities said they don't believe that any faked voter-registration cards led to fraudulent votes, but orchestrating phony voter registrations is a crime.

Political parties or their contractors generally pay between \$5 and \$8 for each registration card filled out.

Hench said her office flags registration cards that don't match addresses, birth dates and other information.

"As long as parties pay for registration, we get some made up," Hench said.

Mathew Cross, 20, of Tracy, could face more than five years in prison, said Scott Fichtner, chief deputy district attorney in San Joaquin County. Cross is scheduled to be arraigned June 23.

In interviews with state investigators, Cross said soliciting citizens to register was hard work and that forging cards increased his commissions, according to a news release from Secretary of State Bruce McPherson's office.

Cross did not return a phone call seeking comment. He is on probation after pleading guilty last year to felony marijuana possession, the district attorney's office said.

Bonnie Fetters, 47, of Stockton pleaded guilty in October to voter registration fraud. She was sentenced to 30 days in jail and three years of probation, the district attorney's office said.

# Voter cards suspect

## County thinks some registrations are fake

By David Siders  
Record Staff Writer

Published Wednesday, March 24, 2004

San Joaquin County has warned the state it is examining 1,500 voter-registration cards and suspects several are fraudulent, Registrar of Voters Deborah Hench said Tuesday.

Hench said the cards are being examined after elections officials discovered a new registration card with an incorrect address for someone who already had correctly registered to vote.

And several registration cards in the batch have signatures that look similar, Hench said.

The cards were received after the deadline for voting in the March 2 primary and therefore did not affect that election, she said.

The number of registration cards sent to the state Elections Fraud Investigations Unit could be much fewer than 1,500. Hench said her office will determine which ones to send.

The review comes as elections officials continue counting provisional ballots cast March 2.

"It just causes more work for us," Hench said.

::: Advertisement :::

Meanwhile, in a separate fraud investigation, a Stockton woman pleaded guilty Tuesday to a misdemeanor charge of forging six registration cards in 2001.

Rhonda Kenya Felix, 29, was paid \$4 for each Republican voter she registered, according to court documents. Felix and five others in 2001 were the subject of a fraud

investigation into the registering of Republicans in San Joaquin County.

In the case, David Vance, the owner of the company that hired Felix, said Felix was paid \$633 for one batch of registration cards but was not paid for a second batch, because it appeared she forged the cards, court documents said.

Felix declined to discuss the case.

"I don't want my name in the paper," she said.

Vance said his company, Vance Petition Circulators of Stockton, pays workers to register voters, often outside grocery and department stores. The completed forms are then given to the office of the registrar of voters.

The company hasn't had fraudulent registration cards returned to it since Felix did so in 2001, he said.

"Some of the people that have gone to jail for this have done it for, like, 10 bucks," he said.

Hench said paying collectors per registration encourages fraud. The practice, however, is legal.

"I think (Vance) hires people that are not always on the up and up," she said.

Vance said he hires collectors by word of mouth. Most collectors want to get accurate names on registrations, not collect more money, he said.

"You've got to give everybody a shot, as long as they've got some kind of intelligence," he said.

Felix was sentenced in San Joaquin County Superior Court to 30 days in jail.

NEWS  RELEASE

---

*California Secretary of State Bill Jones*

CA

BJ00:36

FOR IMMEDIATE RELEASE  
Thursday, March 9, 2000

Contact: Shad Balch  
Beth Miller

**Secretary of State Investigation Nabs Husband and Wife  
for Elections Fraud**

*Couple Charged With Submitting Forged Voter Registration Cards*

STOCKTON --- Investigators with Secretary of State Bill Jones' Elections Fraud Investigations Unit (EFIU) and prosecutors from the San Joaquin County District Attorney's office today arrested Daniel Williams, Sr. and Carolyn Williams, husband and wife, on charges of submitting fraudulent voter registration cards to the San Joaquin County Registrar of Voters.

The couple, who worked for Green Petition Management and Campaign Services, allegedly submitted eight voter registration cards containing forged signatures to the San Joaquin County Registrar of Voters. After examining the cards, the county registrar suspected fraud and requested that Secretary of State Bill Jones' EFIU open an investigation.

"100 percent participation with zero tolerance for fraud – that's been my message consistently for the last five years," said Secretary of State Bill Jones. "People think that in a state as large as California, it might be easy to get away with a small-scale criminal violation of elections law. But my message can't be more clear: every single allegation of elections misconduct will be investigated and prosecuted to the fullest extent of the law," added Jones.

The secretary of state EFIU investigators and prosecutors with the district attorney's office arrested Daniel and Carolyn Williams this morning on charges of violating Elections Code Section 1801 and Penal Code Sections 115a and 470, submitting a false affidavit and forging signatures. The pair will be held in custody until their arraignment tomorrow at the San Joaquin County Courthouse at 1:30 p.m.

Since established by Secretary Jones in 1995, nearly 200 cases of elections fraud have been referred by the secretary of state's EFIU to county district attorney's for prosecution, and in 1999, 61 percent of cases referred have resulted in convictions.

## WH woman accused of voting fraud

FL

In an investigation by the State Attorney's Office, Amber Moye, of Winter Haven, was found to have "cast a fraudulent ballot."

According to a complaint affidavit, Moye " knowingly voted a fraudulent ballot in the November 2003 election held in the town of Dundee after being advised by the Polk County Supervisor of Elections that it was a felony violation to vote if she was not a resident of Dundee."

The Polk County Supervisor of Elections Office had received a telephone request for an absentee ballot for Moye, who reportedly had a Dundee address. The ballot material was sent and then returned reflecting a Winter Haven forwarding address.

Barbara Osthoff, assistant supervisor of elections, advised that she contacted the clerks office for Winter Haven in an attempt to confirm the Winter Haven address of Moye. Based on the new address being outside of the Dundee city limits, the ballot was "rejected as illegal."

Moye stated, in the investigation, that she voted because that was where she was registered and she never changed the registration because she was only temporarily living in Winter Haven. Moye said that she would be moving back to Dundee within 30 days.

Voting fraud is a third-degree felony, punishable of up to five years in jail, according to Assistant State Attorney Chip Thullberry. In this instance Moye will not serve jail time but will instead have a pre-trial intervention that if she completes charges will not be filed against her.

According to Thullberry the pre-trial intervention is a diversion program that generally lasts 18 months and is a contract saying that the person, in violation of the law, agrees to a contract that they will stay out of trouble.

**Firefighter Arrested, Released for Illegally Voting**

*JW*

**VOTER FRAUD CHARGES**

**Ronny Douglas**

A firefighter accused of illegally voting was released on bond Thursday. Police say 58-year-old Ronny Douglas voted from an Anderson address while actually living 7 miles away in Pendleton.

Authorities say Douglas registered under the address of his rental property in Anderson. His wife told investigators that they've lived in Pendleton since their 1992 wedding.

Madison County Voters Registration Records show Douglas using the Anderson address for voting since 1984. He also allegedly filed fraudulent applications for absentee ballots in the 2000 and 2002 elections.

Douglas faces perjury charges.

## 6 face voting-related charges

LA

By BRUCE SCHULTZ

Acadiana bureau

LAFAYETTE -- A federal grand jury has accused St. Martinville City Councilwoman Pamela Champagne Thibodeaux of conspiracy and submitting false information for voter registration, while St. Martin Parish authorities have charged five people with voter irregularities.

The four-count federal indictment, returned last week but unsealed Tuesday, accuses Thibodeaux of conspiracy and three counts of submitting false information to register to vote during her 2002 re-election campaign for the District 3 seat on the St. Martinville City Council.

"It's never going to end," she said Tuesday morning before referring any questions to attorney Gerald Block of Lafayette.

Block declined to comment.

Under state law, Thibodeaux will not have to step down from office unless she is convicted of any of the four felony charges.

In state court, Assistant District Attorney Chester Cedars said he has charged Lillian Bernard, Thibodeaux's brother Burton Champagne, Albert Decuir, Reid Foti and Hardy "Joey" Theriot, former St. Martinville Section 8 housing administrator. Cedars said more people will be charged, but he would not say who they will be.

The federal indictment claims Thibodeaux persuaded three people, Stacy Richard, Carrie Fruge and Decuir, to fill out voter registration cards on March 5, 2002.

"It was part of the conspiracy that, in order to increase the likelihood of being elected to the City Council ... Thibodeaux would ask persons living in the St. Martinville, Louisiana, area but not in her district to agree to falsely register in her district," the indictment reads.

She brought voter registration cards to the co-conspirators and asked them to fill out the cards with everything but their address, the indictment indicates, and Thibodeaux wrote the address of 320 Oliver St. in St. Martinville for Richard, Fruge and Decuir. None of the three are charged in the federal case, which has been assigned to U.S. District Judge Richard Haik.

029750

Cedars said Bernard is charged with two misdemeanors for voting on April 6, 2002, and on May 4, 2002, knowing she was unqualified to vote in the District 3 race.

Decuir and Champagne are each accused of a felony for filing their voter registration cards with an address within District 3, and two misdemeanors for voting in the primary and runoff with improper registrations, Cedars said.

Foti, an electrician for the city of St. Martinville, is accused of two felony counts of filing two false voter registrations, one for himself and one for Bernard, the prosecutor said, and two misdemeanors for voting in the two District 3 elections based on those improper registrations.

Theriot, former director of the St. Martinville Housing Authority, is accused of a misdemeanor for voting absentee in March 2002, knowing he was not qualified to vote in the municipal election.

Cedars said the cases will be vigorously prosecuted.

"It's going to be addressed with the severity of the offenses," he said.

## Voter fraud in Worcester City Council election being investigated

WORCESTER, Mass. Voter fraud has been alleged in a Worcester City council race.

Candice Mero Carlson lost the November eighth District Two election by 102 votes to Councilor Philip Palmieri.

However Carlson charges that two prominent Palmieri supporters -- bar owner and Worcester magazine publisher Paul Giorgio and Boston lobbyist Paul Pezzella -- voted for Palmieri, although they don't live in the district. And she has asked Worcester District Attorney John Conte to investigate her allegations.

Carlson said her charges are not about changing the results of the election, which she says she clearly lost. She says the state's voter fraud statute carries criminal fines and penalties, and she wants them carried out if the law was violated.

A spokeswoman for Conte told the Telegram and Gazette of Worcester the matter is under investigation.

Palmieri says he is happy with the election results, and says Carlson's complaint is an Election Commission matter.

## St. Louis Sees Specter of Vote Fraud

By B. DRUMMOND AYRES Jr.

**S**T. LOUIS, March 3 — When it comes to American cities with a notorious history of election fraud, St. Louis can hold its own. Its political past is replete with instances in which people no longer alive got to vote, not to mention people who never lived.

In last November's presidential election, some voters filed a lawsuit midway through Election Day demanding that voting hours be extended. They said that election officials had permitted polling places to become chaotically crowded, possibly in a deliberate effort to depress the city's heavy black vote.

The hours were extended, then it was discovered that the chief plaintiff in the lawsuit had been dead the better part of a year.

Come Tuesday, the people of St. Louis will head to the polls again, this time to nominate candidates for the April 3 mayoral election. And once again the integrity of the city's voting system is as much at issue as what the various candidates have to say about the city's economic and social problems. Once again, there are bold headlines and live-at-6 broadcasts about scores of bogus registrations, secret grand jury investigations and accusations of blatant race-based disenfranchisement.

"It's the same old never-ending St. Louis story," said James Shrewsbury, a city alderman and veteran of the city's political wars. "It's what happens when you have an old city that insists on hanging on to the bad old political ways. I know. At one point, somebody out there reregistered my long-dead mother."

None of Tuesday's mayoral candidates have been accused of wrongdoing. But there is no shortage of whispering — unsubstantiated — that some of them have supporters who would not hesitate to write down a bogus name or address. There also is plenty of talk — unsubstantiated — that Republican election officials are intent on making it difficult for blacks to vote, while Democratic election officials are intent on making it too easy for blacks to vote.

And, some election officials and political professionals say, there is always the real possibility that some of the fraud and disenfranchisement exists only in the imagination of those who want to make an opponent or another party look bad. Likewise, it is said that some of the most egregious fraud, like registering dead aldermen, may well have been perpetrated by people hired to sign up new voters and paid on a per-person basis.

Whatever the case, this much is certain:

A grand jury is investigating a report by election officials that hundreds of fraudulent names and nonexistent addresses were found on about 3,800 voter registration cards turned in last month just hours before the deadline for signing up for Tuesday's election.

029753

"It's just incredible what we've uncovered," Kevin Coan, an election official, said. "Would you believe the names of three dead aldermen? Of course you would. This is St. Louis."

A coalition of civic and church groups, Citizens Concerned with African-American Voter Disenfranchisement, says that although voting fraud is a problem in St. Louis, the city's election officials have gone overboard on tightening voting regulations. The group is contemplating legal action if election officials do not take steps to make it easier for St. Louis residents to vote, particularly blacks, who account for half of the city's 333,960 residents.

"We're not charging specific fraud or specific partisan politics or specific racism, though we aren't naïve," Richard Gaines, a coalition official, said. "What we are charging is that it is not easy to vote in this town if you are black. There's always another form to fill out or another official to see or another office to visit. That has to change."

The city prosecutor, Jennifer Joyce, and state election officials say they are so concerned about voting irregularities that they will send poll observers on Tuesday to keep an eye on things. "We're going to make sure that the process is not tainted in any way," Ms. Joyce promised a few days ago.

And the United States attorney general, John Ashcroft, a Missourian, says he will send in several Justice Department "monitors" and take "appropriate action" should there be any violations of voting rights or instances of voter fraud.

The mayoral candidates seeking nomination on Tuesday — four Democrats and two Republicans — are saying little about voting irregularities other than to call for a clean election. Instead, they are trying to keep the focus on improving the sometimes marginal quality of health care, schooling and economic opportunity in the city.

St. Louis is one of the country's most heavily Democratic cities. So only the Democratic primary is being watched carefully, since winning it is tantamount to winning office. And that primary, if the polls have it right, seems most likely to end up as a down-to-the-wire race between a former mayor, Freeman Bosley Jr., and the president of the city's Board of Aldermen, Francis Slay.

The incumbent mayor, Clarence Harmon, has disappointed many voters over the past four years and appears to have little chance of being re-elected.

Mr. Bosley, who is black, has the support of one of the city's most influential blacks, Representative William Lacy Clay Jr., and probably will get most of the black vote.

Mr. Slay is white and probably will get most of the white vote.

Mr. Harmon, who is black, captured the mayor's job four years ago by unseating Mr. Bosley. He did it with the help of white votes. Where the now disenchanted Harmon supporters go on Tuesday — blacks and whites — could decide the race.

The other Democratic candidate is Bill Hass, a school board member. The Republican candidates are Michael Chance and Francis Wildhaber.

**FBI subpoenas records from Election Board  
Of the Post-Dispatch  
© 2001 St. Louis Post-Dispatch**

The Federal Bureau of Investigation has subpoenaed St. Louis Election Board records on all people who registered to vote, cast ballots or whose efforts were rejected from Oct. 1 through March 6.

The FBI subpoena also seeks all internal board correspondence, including memos and e-mail.

The action, taken Monday, is the first indication that the Justice Department or its agencies appear to be launching a federal investigation into accusations of vote fraud or attempted fraud in the Nov. 7 general election and the city's March 6 mayoral primary.

A federal inquiry would be in addition to an investigation by a St. Louis grand jury, ordered by city Circuit Attorney Jennifer Joyce, into 3,800 suspect voter-registration cards turned in at the deadline for the March 6 primary.

Some of those cards sought to register prominent people already on the rolls, as well as several deceased aldermen and a dog.

Regarding Monday's action, local FBI spokesman Peter Krusing would say only that "a subpoena was served."

He declined further comment. The Justice Department also declined to comment Monday, as did the office of U.S. Attorney Audrey Fleissig.

However, sources with some of the agencies confirmed that the serving of the subpoena signals involvement by an arm of the Justice Department or one of its task forces.

The Post-Dispatch witnessed the serving of the subpoena, which occurred about 3:30 p.m. Monday when an FBI agent, accompanied by a uniformed officer, walked into the Election Board headquarters at 208 South Tucker Boulevard.

The agent read aloud from the two-page subpoena, which was given to one of the employees. None of the board's officials or commissioners were present. Afterward, no workers would comment and none of the commissioners could be reached.

The FBI subpoena gives the Election Board until 9:30 a.m. on May 6 to turn over mandated documents to the Eastern District Circuit Court at the Eagleton federal courthouse. The subpoena states the documents will be given to a federal grand jury.

The subpoena seeks all records pertaining to any person who registered to vote between Oct. 1 and March 6, or whose voter-registration application was rejected.

It also demands all records of anyone who cast absentee ballots or regular ballots during that period, as well as anyone who was turned away at the polls and barred from voting.

The scope of that demand is enormous. The city residents affected would include:

Voters who cast absentee or regular ballots - almost 125,000 on Nov. 7 and close to 83,000 on March 6.

At least 143 unregistered people who, according to former Missouri Secretary of State Bekki Cook, were illegally allowed to cast ballots on Nov. 7.

St. Louis Police Officer Craig Bentrup controls the crowd outside the Board of Election Commissioners building Nov. 7, 2000.

Hundreds of registered voters who, according a postelection investigation by Cook, were improperly prevented from voting on Nov. 7.

At least 15,000 people who registered to vote, or attempted to do so, between Oct. 1 and March 6. That includes the 3,800 suspect voter cards.

Sources say U.S. Attorney General John Ashcroft might recuse himself from the investigation - as may some of his aides - because city voters played a role in Ashcroft's Nov. 7 defeat in his bid for a second term in the U.S. Senate.

Sen. Christopher "Kit" Bond, R-Mo., said Monday, "All St. Louis voters should support this law-enforcement investigation because it may be our city's best chance to clean up our elections and our image."

Earlier this month, Bond called for further investigations because his office had learned from state election officials that 24,000 registered voters in the city, and 33,000 in St. Louis County, also were registered to vote elsewhere in the city or state.

Missouri Secretary of State Matt Blunt says he is collecting voter records to determine whether any of those voters illegally cast multiple ballots in the Nov. 7 or March 6 elections.

Bond has been calling for federal involvement since he and other Republicans alleged vote fraud in St. Louis in the Nov. 7 elections. They were upset by Democratic efforts to keep St. Louis' polls open an extra three hours, until 10 p.m. A local judge approved the request, but a state appeals court ordered the polls closed about 7:45 p.m.

Democrats blamed crowds at the polls on Nov. 7 and confusion over an "inactive voter list" of more than 30,000 registered voters. That list was not distributed to poll workers, causing a crush of angry would-be voters at the downtown Election Board shortly before the polls closed.

But in February, some Democrats alleged attempted vote fraud when the 3,800 suspect voter-registration cards turned up at the registration deadline for the March 6 Democratic mayoral primary.

As a result of the allegations swirling around those cards, the hotly contested primary was conducted under the scrutiny of an unprecedented number of observers dispatched by federal, state and local election officials, or law enforcement agencies.

The Election Board also has been reeling from the arrest on March 1 in Alton of the city's then-top GOP elections official, Kevin Coan. He stands accused of attempting to solicit a minor over the Internet; the "minor" turned out to be fictitious and part of an Alton sex-sting operation.

Several of the board's key employees or commissioners have resigned or are on leave. Gov. Bob Holden, who appoints the four-person board of commissioners, has said he plans to name a new board soon.

# FBI advances Missouri voter fraud probe

By Jerry Seper  
THE WASHINGTON TIMES

The FBI has ratcheted up its investigation into Missouri's Nov. 7 presidential election and a separate March 6 mayoral primary in St. Louis, ordering local election commissioners to hand over thousands of documents in an ongoing search for voter fraud.

A subpoena in the FBI's continuing probe, issued without statement Monday, calls for the St. Louis Election Board of Commissioners to surrender voter registration records and other documents. The records are expected to show, among other things, that dead people and a dog were able to cast ballots in one or both of the elections.

The FBI, along with a state grand jury, is looking to examine 3,800 potentially fraudulent voter registration records. Federal and state investigators also want to review all election documents relating to people who registered to vote between Oct. 1 and March 6; records showing whose voter-registration applications were rejected; documents showing who cast absentee ballots; and records of those who were turned away from the polls or otherwise barred from voting.

Investigators also are examining documents relating to 143 unregistered voters known to have voted in the Nov. 7 election.

The Board of Commissioners, which also has been asked by the FBI to turn over all of its related internal correspondence and e-mail, has until May 6 to hand over the documents.

"Voter confidence in the outcome of elections is essential to our democratic system," said Sen. Christopher S. Bond, the Missouri Republican who initially called for the probe. "Events in St. Louis remind us once again how important it is to guard rigorously against any and all attempts to exploit voting laws for political purposes.

"Apparent attempts to break the law in St. Louis are an affront to citizens who follow the law and undermine our faith in the election process," he said.

The FBI and the grand jury initially focused on accusations of widespread voter registration and balloting irregularities during the Nov. 7 election, including a petition prompted by Democratic Party officials to keep the polls open in St. Louis for an additional three hours. The petition, signed by a voter who died in 1999, was later overturned

by an appellate court, although the polls remained open an additional 45 minutes.

Texas Gov. George W. Bush won the Nov. 7 presidential election in Missouri over Vice President Al Gore with 51 percent of the vote. But John Ashcroft, now attorney general, lost his Senate seat to the late Gov. Mel Carnahan, who had died in a plane crash a month earlier. Mr. Carnahan's widow, Jean, was appointed to his seat. Despite questions about the vote and suspected irregularities, Mr. Ashcroft did not challenge the results. St. Louis' high Democratic totals figured prominently in Mr. Ashcroft's defeat.

Questions also surfaced after the March 6 mayoral primary, when it was reported that at least three dead aldermen had registered to vote in the election. The primary was won by Alderman Francis G. Slay, ensuring that St. Louis would get a new chief executive for the third time in the past eight years.

Mr. Bond, along with the Landmark Legal Foundation, a Washington-based public-interest law firm, initially sought the investigation in November. They told the Justice Department that widespread voter irregularities by Democrats had tainted both elections. Rep. William

L. Clay, Missouri Democrat, later charged that thousands of registered voters — mostly minorities — were turned away from the polls by Republicans.

Landmark's president, Mark Levin, said in a letter last month to Lee J. Radek, head of the Justice Department's public-integrity section, that shortly after a St. Louis judge ordered the polls to stay open longer on Nov. 7, prerecorded telephone messages from the Rev. Jesse Jackson informing residents they could vote late "began ringing into St. Louis households." He also said Mr. Gore personally called a popular radio talk show to say the polls would stay open late.

"If the citizens of Missouri are to have any confidence at all in the integrity of their elections, then the U.S. Justice Department must hold the St. Louis Election Board and anyone else responsible under the U.S. Voting Rights Act," Mr. Levin said.

FBI officials in St. Louis confirmed that a subpoena was issued but declined to comment on the investigation. U.S. Attorney Audrey Fleissig in St. Louis and Justice Department officials in Washington also have declined to comment.

## N.Y. man fights illegal-voting conviction

The Boston Globe

### Political activist seeks vindication as ruling nears

By Darryl McGrath, Globe Correspondent, 1/8/2004

NY

ALBANY, N.Y. -- A disbarred Wall Street lawyer, convicted of the almost unheard-of felony charge of illegal voting, is seeking vindication through a last-ditch appeal to the US Supreme Court.

The appellant is John Kennedy O'Hara, a longtime Brooklyn political activist who ran several insurgent campaigns against the Brooklyn Democratic machine until 1996, when he was convicted of voting using an address that was not his permanent residence. He says party bosses targeted him for prosecution to silence him.

The Supreme Court is scheduled to decide tomorrow whether it will accept the appeal. The case has wended through state and federal courts, an odyssey that has included a conviction, a reversal on appeal, a hung jury in a second trial, and then another conviction. A state appeals court in Albany upheld the second conviction.

O'Hara has made a full-time pursuit out of seeking an overturn of his conviction and reinstating his right to vote and his ability to practice law. He faced up to 28 years in prison on seven charges of illegal voting, but instead was sentenced to 1,500 hours of community service. He has spent that time picking up garbage in Brooklyn parks. His appeals have cost him tens of thousands of dollars, but he said he has persevered on behalf of other activists who might be intimidated by fears of similar prosecutions.

"If you're going to start prosecuting people for voting, there's not much left after that," he said. "You don't have much choice when you're a convicted felon and a disbarred attorney, because you're wrecked."

He said Brooklyn District Attorney Charles Hynes, backed by the Brooklyn Democratic Party, selectively prosecuted him for voting using the address he shared for a year with his then-girlfriend, even as he maintained his longtime apartment 14 blocks away in Brooklyn.

O'Hara practiced at a Wall Street law firm while also following his political passions. He thinks mainstream Democrats wanted to silence him because of his habit of running for office and also running the campaigns of insurgent candidates.

In 1996, O'Hara was among several people who filed a federal lawsuit seeking new primaries in elections for legislative offices and judgeships. In such races in Brooklyn and much of New York City, the primaries almost always decide the winner. O'Hara, an unsuccessful candidate for a state Assembly seat that year, was charged with illegal voting a few weeks later. The elections from which the criminal charges stemmed had occurred four years earlier.

A spokesman for Hynes dismissed O'Hara's accusation of selective prosecution.

"Mr. O'Hara has had a day and a half in court, and the district attorney's position has been consistently upheld," spokesman Jerry Schmetterer said. "We've been commenting on this for a long time, and going to the Supreme Court -- he's certainly entitled to do it, but this case has already been adjudicated three times."

O'Hara is the first person convicted of illegal voting in New York since Susan B. Anthony, who voted in a federal election in Rochester in 1872, when only men had the right, said O'Hara's attorney, Barry Fallick. Others have noted the rarity of O'Hara's conviction.

"Usually cases like this aren't prosecuted," said Lee Daghljan, a spokesman for the New York State Board of Elections. "They're not high on most DAs' lists, this sort of thing."

029756

Illegal voting was seldom prosecuted in New York City even when it was a blatant part of politics, said Dan Lorello, a state archivist. "Illegal voting happened all the time in New York City in the 19th century. You voted early and often. Dead people, ballot stuffing — it was like Chicago. But nobody really got convicted."

Given that history, and the brutal style of Brooklyn politics, the prosecution of O'Hara has raised some eyebrows. The David-vs.-Goliath nature of O'Hara's battle against the Brooklyn District Attorney's office also has won O'Hara the support from the editorial pages of several New York newspapers.

"From the Brooklyn DA's perspective, it's proven to be a mistake to have prosecuted the case, even though he won, because he's gotten so much bad publicity over it," said Erik Engquist, a political columnist for Courier Life Publications, a group of Brooklyn community newspapers.

"The suggestion that it wasn't politically motivated is just absurd. Brooklyn politics is not for the fainthearted. There is retribution, there is recrimination if you cross certain lines. John O'Hara did cross those lines, but on the other hand, he was never important enough to justify the response he got. He has suffered greatly from this experience. And he is clutching to the thinnest thread of legal hope."

The New York State Court of Appeals in Albany upheld O'Hara's conviction in a 5-to-2 vote in 2001. The Second Circuit Court of Appeals subsequently refused to grant him an appeal.

O'Hara, who participated in his first political campaign at age 12 by handing out fliers for George McGovern, said waiting for the Supreme Court's decision is relatively easier because he has suffered many defeats. "You have to hang in there," he said. "You have to give it a shot."

# Fake Votes From Rikers?

## Sources say bosses used inmate IDs

By Dan Janison  
STAFF WRITER

June 23, 2003

Probers in the widening city Correction Department political scandal have been told of alleged efforts by Rikers Island supervisors to falsify voter registrations and absentee ballots, Newsday has learned.

The Bronx district attorney's office and a grand jury investigating the case have interviewed jail supervisors and officers who allegedly did campaign work on city time last year, Rikers sources said.

A key figure in the probe is Anthony Serra, the former three-star Rikers chief with Republican Party ties who is already facing grand-larceny and false-filing charges related to allegedly diverting correction personnel and equipment for work on his suburban home.

One theory under investigation, sources say, is that the registrations were made in the name of inmates to help election candidates favored by bosses - either with or without the inmates' knowledge.

Inmates are not barred from voting unless serving time for felony convictions. Most city jail inmates - a constantly churning population of as many as 14,000 at a time - are detainees awaiting trial.

City voting scandals of the past have involved the use of absentee ballots to cast phantom votes, such as nursing-home officials who filled in clients' ballots.

Correction Department spokesman Tom Antenen said that in all of last year's election cycle, there were 48 requests from city inmates for absentee ballots.

"We pick up the ballots at the Board of Elections and deliver them to inmates requesting them," he said. "When they fill them out, we deliver them to the Board of Elections."

Of the 48 delivered to the board in the last election, however, 16 were certified, meaning accepted as valid by the board, according to the department.

"The rest were not certified," Antenen said. "Either they failed to sign the form or they were not registered, that type of stuff."

029758

Antenen said he had no knowledge of a vote probe. The city Department of Investigation declined to comment. Board of Elections officials had no comment.

After months of scandals in the city's massive jail system, no criminal charges have been filed regarding the campaign operations.

When Serra was indicted in February, Bronx prosecutors said the counts of grand larceny, defrauding the government and falsifying business records filed against him involved his personal use of jail personnel and resources to run errands and work on his Putnam County house.

Most of the indictment's 89 counts strictly hold Serra responsible for false sign-in sheets and overtime reports filed on behalf of an aide. These counts cite allegedly false department reports filed bi-weekly between June 2002 until October 2002.

One key period was omitted from the charges: Aug. 31 to Sept. 16. That's the period surrounding the statewide party primaries, which were Sept. 10. At the time, Serra was a "security consultant" by the state GOP to help Gov. George Pataki win a second ballot line, the Independence Party nomination.

Officers were surreptitiously videotaped, reportedly doing campaign work, on that day, as shown weeks later on WABC-TV. Serra, dropped as a consultant, has pleaded not guilty to the charges. He has resigned from the department.

A key question is whether prosecutors will account for the missing 17-day period by adding charges involving the campaign operations allegedly conducted from Rikers Island.

"During that period, people under Serra's control were rolling their eyes and grumbling that they had to pick up campaign and election-related items," said an official who declined to be identified, recalling September's primary effort.

"They were talking about having to pick up absentee ballots and voter registration forms," the official said. "Apparently they needed to get people registered to vote in the Independence primary."

Sources said Serra conducted campaign business out of the trailer on Rikers that served as his office at the time. Two wardens under Serra's command allegedly directed submission of voter-registration cards, informants said.

The review has arisen along with other allegations of partisan abuse within the department. Deputy Warden Lionel Lorquet stated in court papers that he found an official of the department's investigations unit videotaping his house, where he was to host a mayoral campaign fund-raiser for Democrat Mark Green in 2001.

## American Center for Voting Rights Refers Voter Fraud Investigation to Department of Justice, Congressional Oversight Panel

**U.S. Newswire**  
MediaLink Worldwide

1 hour, 52 minutes ago

To: State Desk

Contact: Jim Dyke for American Center for Voting Rights, 843-722-9670

COLUMBUS, Ohio, March 21 /U.S. Newswire/ – Today the American Center for Voting Rights (ACVR) referred a compendium of preliminary findings of registration fraud, intimidation, vote fraud and litigation to the U.S. Department of Justice ([news - web sites](#)). The report was previously made available to the House Administration Committee who will hold a field hearing on election fraud in Columbus today.

A report focused on similar fraudulent activity in Florida will be made available to the public in the coming weeks. Among the Florida report's findings were a box of 180 ACORN voter registrations surfacing just one week before election day that prompted a statewide investigation into the group's practices.

The Ohio report states, "Third party organizations, especially ACT, ACORN and NAACP engaged in a coordinated "Get Out the Vote" effort. A significant component of this effort appears to be registering individuals who would cast ballots for the candidate supported by these organizations. This voter registration effort was not limited to the registration of legal voters but, criminal investigations and news reports suggest, that this voter registration effort also involved the registration of thousands of fictional voters such as the now infamous Jive F. Turkey, Sr., Dick Tracy and Mary Poppins. Those individuals registering these fictional voters were reportedly paid not just money to do so but were, in at least one instance, paid in crack cocaine."

After giving the report to the Department of Justice ([news - web sites](#)), ACVR General Counsel Thor Heame stated in testimony prepared for delivery before the House Administration Committee, "there can be no doubt that election safeguards are critical to protecting our elections. When Dick Tracy's fraudulent vote is counted, an honest Ohio voter is disenfranchised. So I find it is beyond the pale that the same organizations who unsuccessfully sought to remove election safeguards by judicial fiat during the election are once again seeking to eliminate these safeguards by state and federal legislation while continuing their battle in the courts." Hearne will testify on this issue today before the House Administration Committee.

ACVR is a non-partisan 501(c)(3) legal and education center committed to defending the rights of voters and working to increase public confidence in the fairness and outcome of elections. The group is compiling similar reports for the states of Pennsylvania and Wisconsin which will be released in the coming weeks. To download a copy of the report or for more information on ACVR, please visit <http://www.ac4vr.com>

## Four local residents are charged with election fraud

Times Staff

RT

**EAST PROVIDENCE** – A father and son duo and a Seekonk husband and wife have been charged with election fraud stemming from last fall's primary race in East Providence, the state Attorney General's Office announced Friday.

C. Richard Costa, 77, of Bristol, his son Keith Costa, 45, of East Providence; and Antonio Arruda, 51 and Aida Arruda, 50, both of Seekonk, are accused of fraudulently casting or attempting to cast ballots in a voting district other than where they lived in the Sept. 14 East Providence Primary.

The four individuals reportedly face a total of 15 counts, both felonies and misdemeanors, according to published reports.

Last fall, Thomas Reilly, a member of the East Providence Board of Canvassers, filed a complaint alleging voter fraud, and the Rhode Island State Police conducted an investigation. Both the Costas and the Arrudas were originally charged last October with voting illegally.

According to police, the Costas are alleged to have registered for the East Providence Democratic Primary using the business address of Keith Costa's auto body shop, James Auto Body, 175 Taunton Ave., East Providence.

Police also allege the Arrudas used the address of a Dunkin Donuts that they own in East Providence when they registered to vote in the primary.

All of the defendants are scheduled for a pre-arraignment conference in Providence County Superior Court on Aug. 30.

## Voter Fraud Suspect Reaches Agreement

RAPID CITY (AP) -- A Rapid City man, who has been accused of voter fraud, will make a plea agreement.

Lyle Nichols had been accused of falsifying voter registration cards during last year's campaign. He faced up to five years in prison on each of five counts of fraud.

But his attorney said Thursday that a plea agreement has been reached with the state Attorney General's Office which would lessen the charges to class six felonies.

The agreement is expected be finalized in court next week.

Nichols was arrested last October after the Pennington County auditor's office noticed irregularities in registration cards that were submitted. Authorities said at the time that more than 230 registrations were pulled because of accuracy concerns.

## Vote fraud suspected in House District 137

### Loser in primary suspected in bogus registration swaps

By **JOE STINEBAKER**  
Copyright 2005 Houston Chronicle

Harris County officials are investigating allegations of vote fraud in connection with a legislative primary in southwest Houston last year.

#### RESOURCES

• **Complete coverage:** See more stories and resources on the 79th Texas Legislature from the Houston Chronicle.

County Tax Assessor-Collector Paul Bettencourt, who serves as the county's voter registrar, asked the district attorney to investigate after discovering what he thinks was a pattern of improper voter registrations in state House District 137.

Neither District Attorney Chuck Rosenthal nor the investigator in the case could be reached for comment Friday.

Bettencourt and state Rep. Scott Hochberg, D-Houston, the incumbent, said the investigation is a continuation of one begun last year and is focused on Bernardo Chike Amadi, who unsuccessfully challenged Hochberg in the March Democratic primary. Amadi could not be reached for comment Friday.

Bettencourt said he has given the district attorney information about at least 157 voters, and perhaps hundreds more, whose addresses were changed to make it look as if they were residents of District 137.

Officials think the registrations were moved into the district without the voters' knowledge in the hope that they would support Amadi, a Nigerian immigrant, because they also were African immigrants.

The initial investigation began early last year based on complaints from voters, Bettencourt and Hochberg said, but stalled after investigators were unable to question Amadi.

More evidence surfaced recently in connection with the election challenge filed by former state Rep. Talmadge Heflin, a Republican who is contesting his 33-vote loss in District 149 to Hubert Vo.

## Hamilton Co. Election Chief Suspects Fraud

December 18, 2002

CHATTANOOGA (AP) -- Hamilton County's elections chief says a review of records from a county commission primary show some voters used other names to cast ballots.

County election administrator Fran Dzik said she has advised District Attorney Bill Cox that about possible voter fraud.

Dzik made the comment Wednesday in chancery court, where a judge held a hearing on a dispute over the county election commission's denial of records to the Chattanooga Times Free Press.

Judge Frank Brown did not immediately rule on the newspaper's request for records.

Incumbent William Cotton won the county commission District four primary by 34 votes on May seventh. Cotton could not be reached by telephone for comment.

## Hidalgo County voting rolls will not be subpoenaed

By Andrea Hauser

### The Monitor

McALLEN — A controversial study alleging that 16,000 potentially dead and ineligible people are still registered on Hidalgo County voter rolls will not be subpoenaed, Hidalgo County District Attorney Rene Guerra said.

County Elections Administrator Teresa Navarro requested on Monday that the list of potentially dead voters be subpoenaed by the attorney general's office and Guerra so that names could be examined and taken off election rolls immediately to prevent possible voter fraud.

But Guerra said he thinks the study, paid for by the Hidalgo County Republican Party, is not credible and is part of a Republican agenda to discredit the elections department and Navarro.

"I cannot issue a subpoena on a witch hunt," he said. "I don't believe that these people are being righteous about their claim. Show me one document that shows a dead person voted, then I can issue a grand jury subpoena for a private company."

Compiled by Austin-based Voter Views Information Systems, the study was released Oct. 22 by Hidalgo County Republican Party Chairman Hollis Rutledge and claims that approximately 4,223 names included in the sampled voter rolls are of dead people, some from as far back as 1982.

Study results from 912 of those names also claim that 130 deceased voters cast ballots in the March primary election. If the study is valid, it would indicate substantial voter fraud.

The Hidalgo County Republican Party on Saturday decided not to release details from the study immediately, opting instead to form a task force to discuss the matter. No one outside the party has seen the study or been able to verify its claims independently.

"He's (Rutledge) made allegations. Those are strong allegations, and I've got to turn them over," Navarro said. "I wouldn't be doing my job if I didn't turn it over the attorney general or the D.A. based on allegations that they made. It's my job to turn it over to them and they do with it what they need to do."

Jane Shepperd, spokesperson for Attorney General John Cornyn's office, said the office has not received the request yet or made any decision regarding it.

Information from the Texas Ethics Commission indicates that a large part of Voter Views clientele is made up of Republican candidates or groups, which Democratic party officials said discredits the study because it is not a non-partisan business.

But Robert Edwards, general manager and a partner in Voter Views, said public records available about the company do not indicate all of its clientele, which includes a number of groups and consultants for both the Democratic and Republican parties.

Edwards said public records used by Voter Views to determine whether the names were of eligible voters are also not accepted by the elections department because the elections code process of verifying a death is more detailed and work-intensive.

"We're talking massive amounts of information coming through the hole every month and she (Navarro) has to process it," Edwards said. "I'm waiting to see how things are going. I would love to be an active part of helping the county assimilate the information on a monthly basis because we definitely could do it. We don't want it to be a situation like it's turning into. We don't want it to be a finger-pointing situation.

"We simply were asked to analyze the voter rolls. Once we did that job, we walked away."

# Arrests sought in election fraud

## 2 accused of falsifying voter registration cards

By **DERRICK NUNNALLY** and **GREG J. BOROWSKI**  
[dnunnally@journalsentinel.com](mailto:dnunnally@journalsentinel.com)

Posted: May 11, 2005

Two arrest warrants were issued Wednesday alleging election fraud by two voter-registration workers employed last year to sign up new voters.

According to warrants filed by the Milwaukee County district attorney's office, Urelene Lilly, 48, and Marcus L. Lewis, 23, both admitted to authorities that they filled out multiple voter-registration cards using fictitious information to earn money from Project Vote, which paid workers such as them \$40 per day plus \$1.75 for each registration above the daily quota of 24 new voters.

Project Vote registered about 40,800 names in Milwaukee County alone, according to a national spokesman.

District Attorney E. Michael McCann would not say when or if more information on other allegations of voter fraud might be available.

The warrant filed for Lilly says she was addicted to crack cocaine when the alleged fraud happened, and that she handed in "approximately 75 fraudulent voter registration cards," using names taken from the phone book, made-up birthdates and Social Security numbers, then had her 15-year-old daughter sign each card. She turned in no valid registrations, the warrant says, and is charged in connection with nine registrations for people who didn't vote in the November presidential election.

Lewis' warrant says he was fired by Project Vote for submitting a registration card in the name of a dead person, but before he did that, he allegedly turned in duplicate cards for the same voter on "numerous" occasions. He admitted turning in multiple entries for some family members, the warrant says.

Lilly and Lewis were charged with five felonies each: three counts of forgery, one count of election fraud and one count of misconduct in public office, because they had been sworn in as deputy voter registrars for the registration effort. If convicted as charged, each could face a maximum possible sentence of 25 years in prison.

The charges came a day after McCann and U.S. Attorney Steve Biskupic announced that their probe into election irregularities in the city of Milwaukee had turned up clear evidence of voter fraud.

The probe, launched in January after reports by the Journal Sentinel detailed widespread election problems, found more than 200 felons who illegally voted in the city, while still on probation or parole, and at least another 100 cases in which people voted twice, or used fake names, false addresses or the names of dead people to vote.

Investigators also said officials had been unable to eliminate a 7,000-vote gap cited by the newspaper, in which more ballots were counted than people who had been recorded as voting. City officials had resolved some of the questions, but investigators said a gap of about 4,600 remains.

Biskupic and McCann also said they had found about 65 false names that had been submitted by deputy registrars, such as the two charged Wednesday.

Additional charges are expected to be filed. Prosecutors have warned, however, that the cases may be hard to prove because the city records are so sloppy.

The issue of fraudulent registrations came up even before the Nov. 2 election, as various groups made major pushes to get likely supporters

signed up to vote.

Project Vote is a national non-profit group headed by the former head of the Ohio Democratic Party. It was one of several groups that ran large-scale registration drives in Wisconsin, a key battleground state.

"We are proud of what we did, and we think we caught virtually all the cards that may have been allegedly created by these people," said Brian Mellor, a national coordinator for Project Vote.

In October, the Journal Sentinel reported that two of Project Vote's workers in Milwaukee were felons on probation, which makes it illegal for them to vote and, thus, to register voters. A week later, before the Nov. 2 election, Racine County officials issued felony charges against two Project Vote workers on allegations of falsifying registration cards.

The charges are similar to those filed Wednesday by McCann.

In the Racine case, charges were filed against Robert Marquise Blakely, 24, and Damien D. Jones, 25, both of Milwaukee. Both men pleaded not guilty.

Jones had been fired as the group's leader for Racine and Kenosha counties after the Racine clerk's office raised questions about registration cards he had submitted. As in the Milwaukee cases, the pay for the two was based, in part, on how many signatures they submitted.

Earlier this year, Gov. Jim Doyle called for a state law that would bar groups from paying registration workers on a per-signature basis, or basing pay on meeting a signature quota. That proposal, part of a broader reform package, has not been acted on by the state Legislature.

Seattle sex columnist Dan Savage will be charged with felony voter fraud for allegedly casting a vote in Iowa's first-in-the-nation presidential caucuses, a Des Moines attorney said Monday.

The Polk County attorney's office is poised to charge Savage with two counts of voter fraud, according to attorney Mark Weinhardt, who is representing Savage.

Savage faces a felony charge and a serious misdemeanor charge, which could land him behind bars for a total of six years if he's convicted, Weinhardt said. Weinhardt, who said he hadn't seen official court documents, declined to comment further.

Savage claimed that he used his temporary address at Des Moines' Kirkwood Hotel to vote in the January caucuses. In the days after the caucuses, he wrote an article for online magazine Salon.com called "Stalking Gary Bauer." Savage, who is gay, wrote that he tried to infiltrate the conservative Republican's Iowa campaign as an act of protest. He also claimed that he attempted to infect Bauer with the flu bug by licking door knobs at the campaign headquarters.

Loras Schulte, who headed Bauer's Iowa campaign, said he was pleased to hear that Savage would be charged. "The reason it was important to me was because the whole process of our caucuses and voting is very dear to my heart," Schulte said.

029771

"For someone . . . with so careless disregard for the privilege one has in voting . . . it didn't sit well with me."

Deputy Polk County Attorney Joe Weeg declined to comment on the Savage case, saying the matter remained under investigation.

Savage could not be reached for comment.

## Health district member faces vote-fraud charges

Christina Leonard  
The Arizona Republic  
Jan. 4, 2005 12:00 AM

AZ

A Maricopa County grand jury has indicted a member of the county's new special health care district on a dozen charges related to election fraud.

James J. Chavez, 50, faces felony charges ranging from fraudulent schemes to false voter registration. He is scheduled to appear in court for his arraignment Jan. 12.

In November, Chavez narrowly beat out three competitors for the District 5 seat of the Maricopa County Special Health District board. District 5 encompasses the southwest Valley.

Chavez said Monday that the accusations are false. And he said he is confident that justice will prevail.

"We'll have to let this play out," he said. "This is politically motivated. Unfortunately, I got more votes than anyone else."

County officials declined comment Monday.

The indictment, returned Dec. 29, alleges that Chavez provided nominating documents knowing they contained false information and improperly voted in several elections, among other charges.

Campaign opponent Sylvia Moreno challenged Chavez's standing by claiming that he did not live within the proper district boundaries in the southwest Valley and that he provided health care services through his organization.

A Maricopa County Superior Court judge in December dismissed the civil suit against Chavez because there wasn't enough evidence to move forward with the case.

Chavez said the latest allegations revolve around the same issues, and he hopes "the same thing happens here."

Chavez is former president and chief executive officer of Corazon de Oro Community Services.

He said people should know the other side of the story: "People voted for me because they know I've served the community of District 5 with my heart and soul."

## No bail, no release in vote fraud

By Michael Baker

The Fresno Bee

Published 09/18/03 05:20:28

A judge denied requests from a former Mendota mayor and an alleged accomplice to be released without posting bail after the two men pleaded innocent Wednesday to voter fraud charges.

Robert Rasmussen, 54, who served on the Mendota City Council from 1992 until he was voted out in 2000, faces five charges related to forging signatures on petitions to recall Mendota's mayor and mayor pro tempore in 2001.

Steve Burrola, a former employee at Rasmussen's security company, faces three charges related to the fraud.

A conviction on one of the election fraud counts is punishable by up to three years in prison.

Rasmussen's attorney, Randall Shrout, cited his client's heart problems and depression when asking for his release.

Shrout said Rasmussen has no other criminal history except for a no-contest plea to a misdemeanor charge of theft from an elderly person.

Burrola's attorney, George Herman, noted that the incident dates back to 2001.

Burrola told the judge that he has stayed out of trouble since his 1996 parole on a drug-related conviction.

Fresno County Superior Court Judge Alan M. Simpson denied both men's requests.

Rasmussen's bail remained at \$22,000 and Burrola's at \$12,000. He scheduled Sept. 30 for the defendants' preliminary hearing, when a judge determines whether there is sufficient evidence to hold suspects for trial.

Authorities say Burrola forged several signatures at the direction of Rasmussen, who knew he didn't have enough signatures to qualify the recall.

In July 2001, the Fresno County Clerk/Registrar of Voters Victor Salazar disqualified the last recall attempt, saying 61% of the signatures on one petition and 57% on another were not valid.

He said the most prevalent violation was information completed by the petition circulator instead of the petition signer.

The Telegraph (GA) – Posted on Tue, Oct. 29, 2002

report  
suspected  
fraud

GA

**U.S. Attorney staff to hear midstate voter complaints**

By Debbie Rhyne  
Telegraph Staff Writer

Middle Georgia voters who encounter Election Day problems can pass their complaints on to federal prosecutors.

Middle District of Georgia U.S. Attorney Max Wood announced Monday that he will staff the district's six federal courthouses Nov. 5 and again Nov. 6 for voters who want to report suspected election fraud or problems with election procedure.

"We want to make every effort to be available should there be any problems on Election Day," Wood said. "We are not poll watching, nor do we have a significant history of election fraud on the Macon Division.

"However, in light of the problems Florida had in their transition to electronic voting, we must be prepared in case problems arise."

Georgia is using statewide electronic voting machines for the first time - a move that was pushed through after the country watched Florida's problems with paper ballots in the 2000 presidential election. Florida switched to the electronic voting for this year's primary, but again experienced a number of problems, including complaints of poorly trained poll workers and voters being turned away because machines weren't working.

Wood said his staff's role will not be the same as those of election monitors or poll watchers, who are typically personnel from the U.S. Department of Justice and get involved "when there is a documented history of election abuse."

An example of a county that would warrant Justice Department scrutiny is Dodge County, where a vote-buying scandal in the mid-1990s ultimately netted 30 convictions. An investigation found problems with votes being cast multiple times by the same person as well as votes being cast by both dead people and convicted felons.

Dodge County is part of the Southern District, which announced earlier this month it too will have staff available at its federal courthouses.

While based in Macon, the middle district covers a 70-county area and also has offices in Albany, Athens, Columbus, Thomasville and Valdosta. The courthouses in all of these cities will be staffed for the election.

Election board confronts rep for voting equipment

February 6, 2004

Greenwood -- Members of the Johnson County Election Board on Thursday blasted a representative from Election Systems & Software for providing allegedly illegal voting equipment during last year's general election. The state's election commission had not certified the software used in the machines as reliable and accurate, which meant counties should not have used it.

The company left Johnson County officials with the impression that everything they had received was approved by the state, election board member Jean Harmon said. Voters in Wayne and Henry counties also used the machines.

ES&S representative Wesley Wiley read a statement from the company standing by the reliability of machines but saying that the equipment had all been returned to a previous version of the software that was certified by the state.

"That reinstallation is complete," he said. "Our focus now is to make sure voters, election administrators and poll workers are educated about the systems."

That may not be enough, Harmon said.

"When you sold the equipment to the county, you told us the equipment was certified," she told Wiley. "We held an illegal election. We have every reason to doubt this company and their equipment, its integrity."

Wiley said he hopes the state will still approve the most recent version of the software in time for this year's election. There is no penalty under Indiana law for using illegal equipment to conduct an election.

## State, federal officials launch anti-fraud effort

By Michele McNeil Solida

[michele.mcneil.solida@indystar.com](mailto:michele.mcneil.solida@indystar.com)

October 30, 2002

With less than a week to go before Tuesday's election, state and federal officials stepped up their efforts to catch and deter voter fraud.

Indiana Secretary of State Sue Anne Gilroy and U.S. Attorney Susan Brooks announced their voter integrity effort Tuesday, when they urged voters to be on the lookout for election corruption.

They asked voters to be vigilant and to call state or federal officials with complaints.

"I spend a lot of time encouraging people to vote, and I don't want voters to lose their voice. We're asking voters to not let that happen," said Gilroy, who is Indiana's chief election officer.

Just a phone call away are lawyers with the secretary of state's election division, officials with the U.S. attorney's office and FBI agents. Staffers from each office will be on duty Election Day to take complaints.

Gilroy touted this as an improved and better-publicized partnership between federal and state officials -- one that will allow election complaints to be handled better and resolved more quickly.

Election fraud is a federal offense that can bring up to five years in prison, said Brooks, who represents the southern district of Indiana. Election crimes include failing to count all votes, providing false information to poll workers, buying votes and threatening people not to vote.

On the same day Indiana announced its effort, President Bush signed into law election reform legislation. It requires each state to maintain a statewide voter registration list, to make polling places accessible for people with disabilities and set up a voter fraud hotline. Indiana is already undertaking these initiatives, Gilroy said.

"Again, we're ahead of the curve," she said.

Kansas City Star – Posted on Thu, Oct. 31, 2002

*Protect Voters  
Rights KS*

**State, federal officials to monitor Kansas elections**  
By JOHN L. PETERSON  
The Kansas City Star

TOPEKA - Kansas and federal officials announced Wednesday they will team up to protect the rights of Kansas voters as they go to the polls on Tuesday.

Secretary of State Ron Thornburgh and U.S. Attorney Eric Melgren said at a joint press conference they will be prepared to protect Kansans from election fraud.

"We will be proactive to ensure public confidence in the integrity of the election process by protecting voting rights and prosecuting voting crimes," Melgren said.

"This is in no way suggesting that we anticipate problems with the state of Kansas election officials."

The U.S. attorney said most election crimes are easily recognized. They include voter bribery, voter intimidation and ballot forgery.

Other forms are more subtle. For example, it is a crime to seek out the elderly, socially disadvantaged or the illiterate to unfairly influence their votes.

Leon Patton, an assistant U.S. attorney, has been assigned to be the person who will field voting complaints and initiate investigations in conjunction with the FBI.

Reports of possible violations of state voting laws will be forwarded to the Kansas attorney general.

Patton can be reached in Kansas City, Kan., at (913) 551-6730. The U.S. attorney's office also may be reached on Tuesday in Topeka at (785) 295-2850 and in Wichita at (316) 269-6481.

FBI agents can be reached on Tuesday in Kansas City at (816) 512-8200, in Topeka at (785) 235-3811 and in Wichita at (316) 262-0031.

In Topeka, the secretary of state's telephone number is (785) 296-4564.

"It should be easier to vote and harder to cheat," Thornburgh said. "If any Kansan has a problem or question between now and Election Day, pick up the phone and let us know."

To reach John L. Peterson, who covers Kansas government and politics, call (785) 354-1388 or send e-mail to [jpeterson@kcstar.com](mailto:jpeterson@kcstar.com).

**District election officer appointed  
HE WILL SUPERVISE OFFICIALS RECEIVING REPORTS OF FRAUD**  
By Louise Taylor  
HERALD-LEADER STAFF WRITER

If you suspect or see skulduggery at the polls on Tuesday, a special team of G-men will be available to look into your complaint.

U.S. Attorney Gregory Van Tatenhove appointed his assistant Thomas Self as district election officer yesterday for the eastern half of Kentucky. The move was made in the wake of U.S. Attorney General John Ashcroft's Oct. 8 announcement that the government was bucking up its efforts to prosecute election crime.

Self, a federal prosecutor for 23 years who specializes in election fraud, will serve two years in the position. He will supervise a team of FBI agents and U.S. postal inspectors who will be on duty election day to receive complaints of fraud.

Van Tatenhove said election crimes such as vote buying and ballot forgery are easy to recognize, but others -- such as seeking out the elderly, illiterate or disadvantaged to badger for votes -- are more subtle.

"Election fraud dilutes the worth of votes honestly cast," Van Tatenhove said. "It also corrupts the essence of our representative form of government."

If you suspect election fraud, there are several numbers to call: The U.S. attorney at (859) 233-2661; the FBI at (502) 583-3941; the U.S. Postal Inspection Service at (859) 231-6778; or the state attorney general at 1-800-328-8683 (VOTE).

Pundits blame apathy for the decline in voter turnout that has become a fact of life in the United States in the last several decades. But not everyone who skips the polls on Election Day does so by choice. This November, for example, an estimated five million people — roughly 2.3 percent of the number of people eligible to vote — will be barred from voting by state laws that strip convicted felons of the franchise, often temporarily but sometimes for life.

These laws cast a permanent shadow over the poor minority communities where disenfranchised people typically live. Children grow up with the unfortunate example of neighbors, parents and grandparents who never vote and never engage in the political process, even superficially.

As a consequence, the struggling communities that need political leadership most of all are trapped within a posture of disengagement that deepens from one generation to the next.

While many things will need to change before the country can reinvigorate the electorate, doing away with postprison sanctions — the most punitive in the democratic world — has to be near the top of the list.

The case for doing so has recently been laid out in a deluge of lawsuits, reports and studies that document the corrosive effects of disenfranchisement on the civic life of this country.

The most startling of these studies, published by Christopher Uggen of the University of Minnesota and Jeff Manza at Northwestern University, shows that the number of people touched by these laws far exceeds the five or so million who have officially and directly lost the right to vote.

For starters, hundreds of thousands of people who are still eligible to vote will not do so this year because they will be locked up in local jails, awaiting processing or trials for minor offenses.

An even larger group of eligible voters, numbering perhaps in the millions, may stay away from the polls because they are confused by the law and mistakenly believe that they have lost the right to vote.

Republican operatives have deliberately used scare tactics with this group of voters — most of them Democrats — in the hope of keeping them home on Election Day. Taken together, the truly disenfranchised, who are actually barred from voting under the law, and the de facto disenfranchised, who don't vote because they are confused about the law, could account for 5 percent of the voting-age population.

A vast majority of the disenfranchised in this country would meet the qualifications for voting if they were citizens of Britain, France, Germany or Australia. Indeed, many nations value the franchise so much that they arrange for people to vote even from prison.

Why does America treat ex-felons so much worse than other democracies? Legal scholars attribute the problem to this country's difficulties with race.

In particular, they cite the racist backlash in the South during Reconstruction, when former slaveowners were forced to endure the sight of former slaves' lining up to vote at polling places and actually holding seats in state legislatures.

## How Denying the Vote to Ex-Offenders Undermines Democracy The New York T

Led by Mississippi, the Southern states eventually adopted a series of measures that wrote black citizens right out of the state constitutions. New statutes barred black Americans from the ballot box with poll taxes, literacy tests, grandfather clauses and laws that took the vote away from people who committed certain crimes.

The crimes were carefully selected so they would affect the maximum number of black Americans while exempting as many whites as possible. For example, new state laws sometimes disenfranchised people for petty theft, minor swindling and wife-beating — crimes that were more likely to be prosecuted among blacks — while omitting murder and robbery. The legislative intent relied heavily on the unequal enforcement of the law.

The disenfranchisement campaign swept black Americans from elected office and knocked them off the voting rolls. There were suddenly counties in the South where black people outnumbered their white neighbors by four to one but where not a single black name could be found on the voting rolls.

Black people who fled the South found that the states in the North had also begun to adopt disenfranchisement laws as their black populations grew.

This shameful legacy is plainly visible today in statistics showing that black people represent 40 percent of the disenfranchisement cases but only about 12 percent of the national population. The broader community, which was once indifferent to this problem, has begun to take notice since the states have embraced new sentencing policies that transform drug misdemeanors into felonies, driving up the prison population sevenfold, to an eye-popping 1.4 million today from a mere 200,000 in the 1970's.

With the population of ex-felons at more than 13 million and growing, the country has no choice but to revisit laws that strip people of the right to vote while permanently consigning them to the margins of society.

Neither Republicans nor Democrats are rushing to associate themselves with a campaign to restore the vote to former felons. The general public, however, understands clearly that the right to vote is a basic human right. Restoring voting rights to former felons would move the United States closer to its peers in the democratic world — and closer to its founding ideals. It would also drive a stake through one of the last relics of an ugly racist past.

## Justice cracks down on voter fraud

Audrey Hudson  
THE WASHINGTON TIMES

Published 10/31/2002

*Voter Fraud*

The Justice Department has ordered investigations and close monitoring of polls this Election Day because of increased reports of voter fraud throughout the country.

Attorney General John Ashcroft has directed U.S. attorneys to appoint election officers to deter discrimination and voter fraud and to prosecute violators vigorously under the Voting Integrity Initiative.

"Our goal here is to work hand in hand with civil rights leaders and state and local election officials to prevent violations and bring offenders to justice," said Jorge Martinez, spokesman for the Justice Department.

Voter fraud has been reported this year in Arkansas, South Dakota, California, Louisiana, Nevada, Kentucky, Iowa, Arizona, Rhode Island, New York and Minnesota in federal and local elections.

One of the most bizarre cases occurred in the Minnesota town of Coates, population 163, where 94 voter registration forms had false addresses matching that of Jake's Strip Club. Patrons and dancers registered to vote to oust City Council members who had shut down the club, authorities said.

In Arkansas, Democrats said a former staffer hired two teenagers to recruit voters, but then used a phone book to register hundreds of unwary residents, including dead people and businesses.

Republicans say election fraud is rampant and county clerks often are not requiring identification.

Democrats say demand for identification amounts to harassment and that Republicans are intimidating voters.

"With Election Day a week away, we have already seen a disturbing number of incidents in which Republican operatives are working to chill voter turnout," said Terry McAuliffe, chairman of the Democratic National Committee.

Senate Majority Leader Tom Daschle said Republicans have targeted minority groups for intimidation. "In my state of South Dakota, we are now seeing a concerted Republican effort to make allegations and launch initiatives intended to suppress Native American voting," he said. "These efforts appear to be motivated more by partisan politics than a concern with clean elections."

Marc Racicot, chairman of the Republican National Committee, called the assertions by Mr. Daschle and Mr. McAuliffe "absurd and racially charged."

"They have set about to twist and pervert a normal and traditional effort to assure voter integrity, routinely undertaken by both parties, into something that would be outrageous and illegal if it were true," Mr. Racicot said.

In 25 South Dakota counties, state and federal officials are investigating suspected voter fraud and believe one Democratic operative is linked to 1,750 applications for absentee ballots. Becky Red Earth-Villeda was fired by the Democratic Party after the charges surfaced.

"A dead woman signed up twice to vote in two different counties — very active this woman," said Christine Iverson, spokeswoman for Republican Rep. John Thune, who is challenging Democratic Sen. Tim Johnson.

Justice Department officials Tuesday will monitor polls in Alabama, Arizona, Georgia, Louisiana, Mississippi, New York, North Carolina, South Carolina, West Virginia and Texas.

In other published reports of voter fraud:

029784

- A Louisiana parish (county) councilman is under investigation in a suspected vote-buying scheme and three other elected officials may be linked, Baton Rouge's the Advocate reported.

- FBI agents seized voter records from Nye County, Nev., offices to investigate suspected voter fraud.

- Two Republicans in California have been sentenced to four months in jail after pleading guilty to voter fraud for forging signatures, the Los Angeles Times reported.

- Iowa residents are receiving absentee ballots unsolicited in the mail.

- A Connecticut state representative who lost the Democratic primary last month was placed under investigation for supposedly helping seniors fill out absentee ballots in violation of state law, the Hartford Courant reported.

- The Oklahoma State Bureau of Investigation is examining suspected voter fraud in a Democratic race for Adair County commissioner.

- Three Arizona county officials have been indicted on charges of election fraud and helping illegal aliens to vote.

- In Rhode Island, Providence police are investigating a complaint by a senior citizen who said she was forced to turn over her ballot at a home for the elderly.

- In Texas, 16,000 dead or ineligible voters remain on the voting rolls, "creating an environment that is ripe for fraud and abuse," said Ted Royer, spokesman for the Texas Republican Party.

## Vote Fraud: Back to the Future

Well, everybody knows that election officials never cheat, and after all, nobody can prove they cheat. The only thing that we know is that they're all from the same political party. And nobody would ever think that they would dare violate their oaths of office. And if I sound cynical about it, I am.

—Attorney Albert Jordan

**P**ush-polling, like street money, gives an unsavory taint to the already maligned field of politics. But if there is any corruption that goes straight to the foundations of American democracy, it is vote fraud—a catchall term that includes ballot-box stuffing, phony voter registrations, and the manufacture of absentee ballot submissions. Nothing else in this book so convincingly proves that a free system such as ours, with its bias toward minimal control of the electoral process, keeps generating the same kinds of corruptions every few decades. This study of current vote fraud will remind us that we can never declare victory over, and we must be ever-vigilant about, corruption—particularly those practices that tempt politicians with the promise of power while operating in the shadows and on the hidden periphery of politics.

The idea of progress is fundamental to understanding the American character. As a people, we have always wanted to believe that the future is destined to be better than the past by dint of our unceasing

Vote Fraud

efforts at improvement, which we have usually managed to bring about. Unsavory practices such as election fraud belong in the dustbin of our discarded and long outgrown history. Surely, the ballot boxes in Texas are no longer stuffed! Votes are not stolen or manufactured anymore in Alabama! Elections in Philadelphia and California are certainly clean now! The press does not look for what it does not expect to find, and the public ignores the occasional muffled sounds emanating from ballot boxes hither and yon.

But the press and the public are in for a rude shock. Voting fraud is back, is becoming more serious with each passing election cycle, and soon—because of recent changes in the law—is destined to become even worse.<sup>1</sup> For our purposes here, we define voting fraud as any serious violation of election laws controlling the registration of voters or the casting of absentee, mail-in, or polling-site ballots. Many of the examples in this chapter are derived from local elections, but the corrupt practices certainly extend to elections for district, state, and national offices. After all, generally the same group of political party organizers, consultants, and precinct workers are employed at all levels. Christmas past and Christmas future are merging for those who profit from such perfidy. And it is past time for the press and public to receive a loud wake-up call, lest the ultimate corruption in a democratic system—the stealing of elections—becomes widespread, corroding trust in the essential process of democracy itself.

In this chapter, we focus on four U.S. locales—Philadelphia, Alabama, Texas, and California—to illustrate the current slide back to the bad old days of election fraud. Our interviews and other research have convinced us that we could just as easily have selected at least a dozen other states or many dozens of sizable cities to prove our thesis. The quartet we have chosen demonstrate the problem dramatically—maybe fulsomely. The scale of fraud may sometimes be small compared with the anything-goes days of a century ago, but several kinds of fraud are clearly ingrained and resurgent, and this trend ought to be of immediate and pressing concern to all people who care about the integrity of the American political system.

## America's Sordid History of Voting Fraud

Our nation has a long and depressing history as a happy haven for the vote thief. For much of the last century and a good part of this one, elections in many states and localities became contests of the voting fraud capacities of various factions and parties. The chief question on Election Day sometimes was: who could manufacture the requisite number of votes most easily and shrewdly, giving the other side insufficient time to make necessary adjustments to its tallies and insufficient evidence to cry foul convincingly.

Sometimes no specific evidence of fraud was required to know it had taken place. For the 1844 election, New York City had a reasonably large voter pool of 41,000, but the turnout on Election Day was far more spectacular: 55,000, or 135 percent of the entire pool of voters! As one observer put it, "the dead filled in for the sick," and the city's dogs and cats must have been imbued with irresistible civic spirit, too.<sup>2</sup>

The nation as a whole got a taste of this kind of election snake oil in the 1876 presidential election, arguably the most corrupt in America's history before or since. On Election Day, Democrat Samuel J. Tilden of New York garnered about a quarter million more popular votes than Republican Rutherford B. Hayes of Ohio, and Tilden was the undisputed leader in states with 184 electoral votes (with 185 required for victory).<sup>3</sup> However, twenty electoral votes in Florida, Louisiana, South Carolina, and Oregon were in dispute. Tilden had actually carried the first three of these states, but GOP-controlled election boards disqualified enough Democratic votes, for dubious reasons, to potentially tip the states to Hayes. Congress established a fifteen-member electoral commission, supposedly nonpartisan, to arbitrate the disputes, but the commission's partisan breakdown turned out to be eight Republicans to seven Democrats. As a result, every single controversial electoral vote was awarded to Hayes by a vote of eight-to-seven, and Hayes took office in 1877—and was called "His Fraudulency" by Democrats throughout his one term.

Historians and political scientists faithfully cataloged the abominable arts that were practiced at America's polls throughout the

centuries. Not long after the Hayes–Tilden election, for example, the "use of direct bribery in the United States" became "widespread."<sup>4</sup> Most states and large localities began formally registering voters in this period, and it thus became more difficult to simply stuff the ballot box or hire so-called floaters or repeaters to vote twice or thrice.<sup>5</sup> Resourceful political organizers changed tactics and began to buy votes on a large scale. One study in 1892 concluded that almost 16 percent of all voters in Connecticut were "purchasable."<sup>6</sup> In 1910, a judge in Adams County, Ohio, convicted 1,679 persons of selling their votes—more than a quarter of all the electors; further, his inquiries showed that fully 85 percent of the county's voters had engaged in buying or selling their votes at some time in their lives!<sup>7</sup>

Ballot-box stuffing was not abandoned everywhere, of course, as suggested by the exceedingly close 1960 presidential election, which Democrat John F. Kennedy won over Republican Richard M. Nixon by only 118,574 votes.<sup>8</sup> Strong suspicions exist that the Illinois electoral votes were stolen for Kennedy by Mayor Richard J. Daley, who late on election night magically produced just enough of a massive margin in Chicago to overcome Nixon's large lead in the rest of the state. (Thanks to a 319,000-vote advantage in Chicago, Kennedy won a paper-thin victory of 8,858 out of more than 4.7 million votes cast in the state—and thus captured all twenty-seven Illinois electors.)

The loss of Illinois would have reduced Kennedy's Electoral College majority edge to just six, and had he lost Texas as well, the election would have been Nixon's. In Texas, too, substantial voter fraud may well have occurred, though it is impossible to say whether fraud accounted for Kennedy's entire 46,242-vote majority out of over 2.3 million votes cast. One thing is for certain, though: Kennedy's running mate, U.S. Senator Lyndon B. Johnson of Texas, knew where all the votes were buried, and he had practiced electoral skulduggery before.<sup>9</sup> Having lost an agonizingly close U.S. Senate race in 1941 to former Governor Pappy O'Daniel, whose supporters may have stolen it, Johnson was determined to turn the tables when he ran again in 1948. LBJ's alliance with South Texas's political boss, Judge George Parr, known as the "Duke of Duval County," helped him do it. As in 1941, the Democratic primary battle between Congressman Johnson and former Governor Coke Stevenson was as

right as a tick, and the vote was so close it all came down to Voting Box 13 in Alice, Texas, in the heart of Parr's territory. Several days after the election, Parr's precinct man in charge of Box 13, Luis Salas, "found" 203 more votes, 202 of them for Johnson.<sup>10</sup> Amazingly, these good citizens had voted in alphabetical order, with the same handwriting and blue pen.<sup>11</sup> Moreover, the discovered ballots gave the victory to LBJ by a statewide margin of only 87 votes. Thus was a U.S. senator created by corruption and sent on his path to the Oval Office.

While there is little to admire in the low standards Johnson set, his sins must be interpreted in context. Voting fraud was a way of life in parts of Texas in the 1940s, just as it has been, at various times, in Chicago, Louisiana, West Virginia, New Jersey, and many other places. For much of our history vote fraud has been as American as (sour) apple pie. This is a humbling and sobering reality, and we need to remember this whenever we feel the urge to sanctimoniously condemn wide-scale fraud in other countries' elections. Election reformers still have a full plate right here in the United States.

### The Philadelphia Story

The city where the American democracy was born is now proof of America's continuing corruption of the electoral process.<sup>12</sup> In 1993, a special election was held to fill the vacated 2nd Senatorial District seat in Philadelphia, Pennsylvania. The contestants for the seat, which would determine the balance of power in the state Senate, were Republican Bruce Marks and Democrat William Stinson. Even though the district was substantially Democratic, Marks had come close to winning it in 1990 against veteran state senator Francis Lynch, and after Lynch's death in May 1993, Marks decided to try again. His new opponent, Stinson, was often described as a classic Philly Democratic pol, a deputy mayor who lost a 1991 Democratic primary for a city council seat by a mere seventeen votes.

The battle was fierce, and the campaign attracted statewide attention because the Senate was then divided evenly, twenty-four Democrats to twenty-four Republicans. With a pro-GOP, anti-

Clinton tide running across the country in fall 1993, Marks appeared to surge. Sure enough, Marks received more Election Day votes (those cast in polling places on the day of the election) than his opponent—19,691 to Stinson's 19,127. Yet Stinson garnered an extraordinary proportion of the absentee ballots to turn the tide—1,396 to Marks's 371, yielding totals of 20,523 and 20,062, respectively. The Philadelphia County Commissioners (Democrats Margaret Tartaglione and Alexander Talmadge Jr., and Republican John F. Kane), sitting in their capacity as the County Board of Elections, certified Stinson as the victor of the race on November 18, 1993. State Democrats arranged for Stinson to be sworn into office quickly, before a court could issue an injunction to stop it.

While the board's imprimatur ordinarily would have marked the conclusion of the election, in the case of the Second District it marked the beginning of a lengthy inquiry, by the end of which Stinson was indicted (though not convicted) and Judge Clarence Newcomer of the U.S. District Court for the Eastern District of Pennsylvania condemned the commissioners for permitting blatant violations of state election law and overturned the result of the special election. Stinson was eventually cleared of criminal charges of absentee ballot fraud, but in the civil proceedings, Newcomer found sufficient proof to implicate Stinson in a conspiracy to steal the election, and Stinson was ousted from office. (Several Stinson staffers were even less fortunate; their involvement in the fraud resulted in criminal prosecution and conviction.<sup>13</sup>) *Marks v. Stinson*,<sup>14</sup> the conclusion of candidate Marks's civil challenge to Stinson's victory, marked an extraordinary but necessary intervention of a federal judge into the state's political process to redress claims of civil and voting rights violations. Newcomer's order to certify Marks as the winner on the basis of the machine vote total without considering the absentee ballots cast appears to be unprecedented in modern times.<sup>15</sup>

The vote fraud was documented beyond question.<sup>16</sup> Despite Pennsylvania's strict laws regarding application for, completion, and return of absentee ballots,<sup>17</sup> the Stinson campaign and related organizations engaged in the systematic distribution and collection of absentee ballots, which circumvented the normal process. More remarkably, the Democratic members of the Board of Elections themselves were implicated in the conspiracy, despite the procedural

safeguards they were legally required to observe in order to prevent absentee voting fraud. The electoral process was corrupted not just by a campaign but by those charged with overseeing it.

The competition for the Second District seat was tight enough to convince members of the Stinson organization that fraud was required to ensure victory. In both predominantly white and minority areas, Stinson's campaign and related Democratic Party organizations engaged in a widespread effort to file fraudulent applications for absentee ballots and then ensure the proper choice was made when applicants returned their ballots. Some of the applicants did not realize what they were doing, some were not even registered, and others were browbeaten and intimidated. The Democratic commissioners played a key role in the plot; as Marks recalled, they and their staffs "illegally [gave] absentee ballots directly to my opponent's campaign and to [Democratic] committee people."<sup>18</sup>

Absentee voting in Pennsylvania is not unlike that of most states: exacting statutory guidelines determine the method of application, completion, return, and processing of an absentee ballot. Absence from the state or county of residence, or disability, are legitimate reasons to vote absentee. An absentee ballot cannot be requested more than fifty days prior to the election and must be requested at least seven days before the election. A voter is required to submit an absentee ballot request to his or her local board of elections by the Tuesday prior to the election. Although the Philadelphia board's official policy required a check of each applicant's signature against the file copy, in actual practice it did not do so. When any absentee application is approved, statutory language requires the board of elections to return an absentee ballot only to the applicant, who must mail or return the ballot to the board in person prior to the Friday preceding the election.

The Stinson campaign used two distinct ploys to put illegally obtained absentee votes in its column. First, from July through September of 1993, campaign workers solicited hundreds of absentee applications as part of a canvass and registration effort in predominantly white Democratic precincts. Contrary to election law, "many persons who were hesitant to register because they simply did not want to go to the polls were told that they could fill out an absentee ballot application and obtain a ballot out of convenience."<sup>19</sup> The

dates of the applications were left blank to conceal the fact that they were requested either before or after the filing deadline. When William Jones, a Stinson worker, approached the candidate to express his concern over the scheme, Stinson told him "that he was never going to lose another election because of absentee ballots."<sup>20</sup> Robert O'Brien, a campaign staffer, instructed subordinates to deliver the completed applications to the election board's office. As a result, the board sent over 500 ballots to the campaign, which O'Brien then distributed to workers, who proceeded to take them to homes of voters. As Stinson had instructed, the workers directed voters to "either check off the straight Democratic box, or to check off the individual Democratic names, and then to return the completed absentee ballot to O'Brien."<sup>21</sup> About 450 ballots supporting Stinson found their way back in this manner.

More dubious still was the Stinson effort to elicit absentee applications and "correctly" complete ballot packages in Hispanic and African-American precincts. Late in the campaign, polling results provided by the Democratic State Committee indicated Stinson was trailing Marks. The decision was made to target minority precincts in a last-ditch effort to turn the tide in his favor. In essence, the Stinson campaign workers convinced some minority voters that, in Marks's words, "if they wanted to vote from the convenience of their own home that they could do so, and they could just fill out the application and say that they were out of town or make up some medical reason."<sup>22</sup> Ruth Birchett, who directed the Stinson campaign in minority areas, was explicitly assured by both the candidate and one of the election board's Democratic commissioners that the scheme was legitimate, although others in the Stinson organization recalled that a hard-edged cynicism permeated the effort. For example, one staffer reported that the not-funny "joke" in the Stinson campaign was that the Hispanics would sign anything," a problem exacerbated by the fact that the absentee ballot application included no Spanish language instructions. Some Hispanics were apparently not even aware they were voting. Lydia Colon, for example, thought she was signing a form to request removal of a pile of refuse from her back yard. However, the Democratic canvasser who connived her into signing the ballot did not count on her subsequent decision to go to her polling place on election day and attempt to vote.<sup>23</sup>

The execution of the minority plan mirrored the one used for the majority white precincts: applications were solicited and submitted by the Stinson workers, who then received, distributed, and returned about 600 ballots. Likewise, campaign workers instructed voters to mark their ballots for Stinson. The special twist was that the field staffers were paid one dollar per correctly marked ballot returned. In other words, the Stinson workers distributing the applications and ballots took the supposedly neutral polling place to the voters while serving simultaneously as remunerated flushers and haulers.

The Stinson organization received the funds to implement this plan from several sources, including the Committee for a Democratic Majority PAC (\$4,000) and a PAC associated with Democratic State Senator Vincent Fumo (\$4,000).<sup>24</sup> The money also paid for a phone bank operated in English and Spanish, to inform voters of the "new way to vote." From direct testimony, the dates of the street money contributions, and the receipts retained for payments to workers, Judge Newcomer determined that the ballots—cast overwhelmingly for Stinson—could not have been returned prior to the absentee ballot deadline. Further, it was clear to the court that campaign workers aided completion of the ballots "in the homes of voters and often directed, coerced, and/or intimidated voters to vote for Stinson; . . . [and] the campaign workers had a political and financial interest in obtaining votes for Stinson."<sup>25</sup>

Compounding this disturbing pattern was the active assistance given the Stinson campaign by two election commissioners, both Democrats. These officials casually waived normal procedures, helped to process absentee applications for unregistered citizens, and permitted campaign workers to distribute ballots—all in contravention of the rules, and all consciously designed to result in a Stinson victory.<sup>26</sup> Judge Newcomer reserved some of his harshest language for Democratic commissioners Talmadge and Tartaglione, since they "could have prevented much of the illegal activity that occurred even if the Stinson campaign had acted illegally."<sup>27</sup> If the commissioners had required that existing written procedures be followed, for example, the wrongdoing that altered the outcome of the election could not have happened. As Republican election attorney Jack Connors, who worked on this case, suggested, "You had

built-in arrogance of power in a local board of elections that had been in one party's control for over twenty years. The reason why this case is so outrageous . . . was that they thought they were going to get away with this."<sup>28</sup>

This particular instance of fraud, unlike so many others, had a just ending that served as a powerful warning to vote-tamperers. After concluding that nearly 600 absentee ballots had been cast after the deadline by unregistered people, Judge Newcomer stated firmly that "Bruce Marks would have won the 1993 Special Election in the Second Senatorial District" had it not been for the Stinson organization's violation of state election law.<sup>29</sup> Newcomer then evicted Stinson from the state Senate, gave his seat to Marks, and with it, control of the Senate to the Republican Party.

But we need to remember that the Philadelphia fraud was widespread, well established, relatively easy to accomplish, and stayed hidden for a good while. Only an aggressive, generously financed, and thoroughly politicized legal assault on the system that stole an election managed to right the balloting wrong. Most candidates are not so well positioned to pursue suspected fraud—and as a consequence, one suspects, similar or more subtle shenanigans elsewhere may go undetected and unexposed.

### **Sweet Home Alabama: Southern Fried Voting Fraud**

As Philadelphia's state Senate election suggests, it is the close election that often leads to revelations about voting fraud. (The candidates in close or disputed races are almost inevitably involved in court brawls, and their investigations can turn over rocks that hide sleazy shenanigans.)

Such has recently proved to be the case in Alabama as well. The 1994 election for chief justice of the state Supreme Court yielded a dead heat, with Democratic incumbent Sonny Hornsby losing to Republican Perry Hooper Sr. by fewer than 300 votes out of 1.2 million cast. It had been a high-stakes race, with the trial lawyers backing their former association president (Hornsby) with at least

\$198,519 in campaign expenditures and Alabama business persons and groups spending many tens of thousands of dollars on their favorite son (Hooper).<sup>30</sup> To maintain his narrow lead, Hooper and his supporters launched a preemptive legal challenge after suspecting widespread fraud. Hooper's legal maneuvers were aimed at preventing the counting of 1,700 disputed absentee ballots—ballots that came disproportionately from solidly Democratic counties. The litigation was ultimately successful, permitting Hooper to finally be sworn in as the state's chief justice on October 20, 1995—eleven months after the election.<sup>31</sup> And along the way to this belated victory, the Hooper forces uncovered some disturbing facts about Alabama's electoral process.

Once again, it is the absentee ballots that present an occasion for sin. In Greene County, a heavily Democratic part of Alabama's "black belt," almost a third of the vote was cast absentee, compared to well under 10 percent just about everywhere else. Dozens of absentee ballots were mailed by elections officials to a nonexistent post office box, with many of the ballots allegedly being picked up at the post office by an unknown individual.<sup>32</sup> Local resident Paul Harrington readily observed the telltale signs of absentee fraud. During a meeting with the clerk of the Circuit Court of Greene County (who served as the manager of absentee ballots), Harrington found the clerk had discovered that

approximately 60 applications for absentee ballots were received requesting that the absentee ballots be sent to Post Office Box 115, Eutaw, Alabama, 35462. According to [the clerk], however, she later learned that no such post office box existed. However, as absentee election manager, she was unable to recover all the ballots. . . . Approximately 10 to 20 were . . . picked up by someone from the post office and the post office was unable to identify the individual or individuals retrieving the ballots.<sup>33</sup>

Several dozen other absentees were sent to two Democratic officials, with the party chairman's home listed as the "permanent address" for many of the absentee voters.<sup>34</sup> Other absentee ballots went to the local sewer and water authority, a woman who had moved out of

the county six months earlier, and a man who had died well before the absentee balloting period began. This dead man somehow voted, by the way, while other legitimate voters showed up at Greene County polls on Election Day only to be told they were ineligible because they had supposedly already voted by absentee.<sup>35</sup>

Similar problems cropped up in other Alabama localities. In Houston County, in the far southeast corner of Alabama, a man "dead for seven years," according to his wife, has regularly been recorded as voting by absentee,<sup>36</sup> despite the difficulties in delivering a ballot to the afterlife. Reportedly, political activists would also provide absentees to eligible persons and then take them away after the ballot had been signed, with candidate choices marked only in pencil (or not marked by the presumed voter at all).

Then there were the helpful visits to nursing homes in Montgomery and elsewhere. For example, a young woman observed with absentee ballot materials showed up at the capital city's Tyson Manor Nursing Home shortly before the 1994 elections and "assisted" incapacitated and even comatose patients with their ballots. As one visitor reported: "I had seen [a particular patient] in the bed many times in the past . . . [and] I thought she was comatose . . . [she] was incapable of filling out the forms or even making a mark on the papers. She died three days after this event, which would have been before the election on November 8, 1994."<sup>37</sup> A patient with severe Alzheimer's disease supposedly cast a ballot in another nursing home even though her daughter testified that this was not possible and the woman had been removed from the voting rolls at the family's request the previous summer.<sup>38</sup> As the daughter recalled, "her name still appeared on the list in November, 1994," even though "no member of the family" had applied for an absentee ballot.<sup>39</sup>

Suspicious circumstances were identified all over the Alabama map. Some voting machines were apparently programmed to facilitate voting for Democratic candidates and to discourage GOP votes,<sup>40</sup> according to an affidavit of John Russell Campbell:

You could vote the straight Republican ticket by punching one button at the top of the Republican column and it would light up all of the officials' names in the Republican column. And

"EVERYBODY'S DOIN' IT": BIPARTISAN CORRUPTION

then you could reach over and punch the button of individual Democratic candidates or independent candidates and it would light up and cancel the [individual] light on the Republican side and then . . . the votes would be cast. You could not do that if you were voting the straight Democratic ticket. If you punched the light at the top of the Democratic ticket, it would light up the entire Democratic ticket. But if you reached over and tried to vote individual Republican candidates, nothing would happen. The light wouldn't come on and it wouldn't cancel the light on the individual Democratic candidate.

Many absentee ballots from unregistered individuals and other unqualified people were counted by local election officials even though the ballots were challenged by authorized poll workers. Under state law, these suspect ballots are supposed to be separated out from unchallenged ballots so that they can be carefully reviewed; instead, the signed cover sheets were removed and they were mixed in with all other ballots—so it was impossible to identify and retrieve them.<sup>41</sup> The situation apparently approached the proportions of a parody, Campbell said:

Despite my requests (over about a thirty-minute period of time), the Committee continued to open affidavit envelopes and separate them from the ballots at a feverish pace. Whenever I was able to stop the process of opening the affidavit envelopes at one end of the table, the Committee members at the other end would frantically begin ripping envelopes open and separating the ballots.

And despite the closeness of the election, which was obvious to everyone on election evening, the ballots were not secured in many counties. Some ballot boxes were missing, votes from one precinct were combined with another, seals on various containers of votes had been broken, and ballot boxes were openly available in unwatched public rooms.<sup>42</sup>

John Campbell, the dumbstruck Alabama poll watcher, summed up his reactions after a long election day of observing arbitrary, capricious, and downright illegal actions by local officials charged

*Vote Fraud*

with safeguarding the electoral process: "When I was asked to serve as a Ballot Security Attorney, I could not believe that the election officials in Wilcox County would be capable of tolerating, much less participating in, the type of activities that were described to me as having occurred in the past. Not only was it as bad as it had been described to me, it was worse. I was shocked."<sup>43</sup>

Somewhat surprisingly, Campbell's description of Wilcox County's elections received backing from Dan Warren of the county's own Board of Registrars. When we contacted Warren, he refused to address Campbell's specific allegations but said they were "the tip of the iceberg" and that "there will never be a fair election in Wilcox County."<sup>44</sup>

Of course, there is no mystery about the systemic source of Alabama voting corruption. Election laws and procedures are followed—or ignored—in each county at the discretion of a board comprised of the local sheriff, the probate judge, and the circuit court clerk. Frequently, these individuals are all members of the same political party. An experienced Alabama attorney, currently involved in the search for voting fraud in his state's 1994 elections, offered us an overview of the state's election system:

Do y'all understand how the system is rigged to begin with? Basically what happens is that you're not going to second-guess elections in the absence of strict proof. And then what you do is make sure the people who control the proof are in the inner circle of your party. And therefore, as the process unwinds in the wee hours of the [election] night, based on the information that's available from the media outlets, the inner circle comes up with what [votes] they need. Who's going to rat on them? Who's going to tell on them? Well, everybody knows that election officials never cheat, and after all, nobody can prove they cheat. The only thing that we know is that they're all from the same political party. And nobody would ever think that they would dare violate their oaths of office. And if I sound cynical about it, I am.<sup>45</sup>

All in all, the Alabama electoral process does not seem likely to be included in the state's promotional brochures. Vote fraud seems to

be another deeply ingrained custom in a traditional state slow to change.

## California: The Golden State for Vote Fraud

If mega-state California, as advertised, is the trendsetter for the rest of America, voting fraud will truly be a Malibu-sized wave of the future. For the Golden State has exceptionally serious difficulties in its system of registration, absentee balloting, and election-day voting.

The fundamental difference between California and Philadelphia or Alabama is that the breakdown of the electoral process begins at a much earlier stage than absentee balloting. The voter registration setup is the first source of trouble; not to put too fine a point on it, it is nothing short of a disgraceful mess. California has not thoroughly purged its voting rolls of those who are no longer eligible to vote since 1979, when advocates of greater political participation secured passage of a law permitting the removal of voters' names from the rolls only by means of an inconclusive "negative purge." Voters who have not cast a ballot in two consecutive general elections are sent a postcard asking whether they still live at the listed address. Only if the card is returned as undeliverable is the name stricken. So long as the card is not returned, for whatever reason, the name stays.

Many voters who have died or moved are thus retained on the registration rolls, and as a result there are literally millions of inaccurate or wrongful registrations on file. Many voters have moved out of California but remain on the rolls. Some have simply changed addresses within the state and have duplicate registrations (one each in the new and old locations). In many localities of California, a duplicate registration is recorded if a voter who has moved within a city or county makes the slightest addition or deletion (for example, of an initial or nickname) when he re-registers. A sample of 940 voters requesting absentee ballots in Tulare County discovered, for example, that 92 people had relocated (according to other voters currently residing at each address). Partial voter files showed 20 of this group were recorded as voting in the 1994 general election at their old address. It is not clear whether they returned to vote there,

or they had voted twice (at an old and new address), or there was some other explanation.<sup>46</sup> Other voters have died or been convicted of felonies; either condition normally makes a person ineligible (though a Chicagoan might disagree). And at least a few individuals register twice in order to vote twice. In 1994, there were cases of people (1) voting both absentee *and* on Election Day, (2) voting two absentee ballots, and (3) voting at two different polling places on Election Day.<sup>47</sup>

Phony registrations encourage shenanigans in any place, and California's massively erroneous voter list is an engraved invitation to commit fraud. Incredibly, the most recent official estimates of the "deadwood" on the California voter rolls range from 14 percent to 24 percent of the more than 14 million registered voter total—meaning between 2 million and 3.4 million phony registrations crowd the books.<sup>48</sup> Every election cycle, deadwood voters cause state and local governments to waste \$5 to \$8 million of taxpayers' money printing and mailing voter pamphlets, unneeded ballots, and the like.<sup>49</sup>

Among the many factors responsible for this monumental ineptitude is the failure of bureaucrats at various levels to share death and incarceration records with registrars, as they are supposed to do;<sup>50</sup> the appalling lack of a centralized statewide voter registration list that could at least reduce or eliminate the extraordinary number of duplicate registrations; and most important for our purposes, the existence of a burgeoning, legal campaign industry whose *raison d'être* is the registration of citizens. Political parties, individual campaigns, and ideological interest groups contract with the consulting organizations to find and register eligible persons at a per-head price that ranges from \$1 to \$10. The profit incentive demands a large volume of registrants, obviously, and so the paid solicitors avariciously sign up whoever they can find, often without regard to the legal niceties, including illegal and legal aliens, some juveniles and infants, fictitious individuals, companion animals (known in less sensitive states as "pets"), and even the dead (or "life-challenged" voters). As one California elections official asserted, "You're just asking for trouble. . . . Anytime you pay to register people, you're going to have fraud."<sup>51</sup>

Because California registrars have "a ministerial duty to accept a

029793

registration without investigation, absent any challenge to its validity," the state's registration system is "a system of self-certification, [with no] certainty that a registrant is who he or she claims to be."<sup>52</sup> Since it is widely acknowledged that prosecution for registration fraud is given a very low priority by law enforcement agencies, this is yet another green light to sloppy or unethical work by paid voter solicitors.<sup>53</sup>

The lamentable results of widespread registration solicitation are to be found all over California. In the city of Los Angeles, paid solicitors added over 4,000 fraudulent registrations just in 1992.<sup>54</sup> In Glendale, bounty hunters "found" 190 unregistered voters in a single apartment building, and signed them up (along with a dog)—even though many were apparently already registered.<sup>55</sup> Jailed felons have registered while incarcerated, and other new voters have illegally listed business addresses (including department stores) as their supposed place of abode.<sup>56</sup> Illegal and legal aliens are, without question, on the rolls in many areas. A single precinct in San Diego County was found to have 30 verifiable legal aliens out of just 313 registered voters.<sup>57</sup> Illegals voted in Fresno and Tulare County in November 1994;<sup>58</sup> and a prominent legal alien—a Mexican businessman and a publisher of a Spanish language newspaper—registered to vote in 1987, while in the United States on a tourist visa, and cast a ballot in both 1992 and 1994 despite his lack of American citizenship.<sup>59</sup> Even Mario Aburto Martinez, the Mexican citizen who assassinated the ruling party's 1994 presidential nominee Luis Donaldo Colosio in Tijuana, was a registered voter in San Pedro.<sup>60</sup>

The use of paid solicitors for partisan registration efforts has plagued California for a decade or longer. The Republican Party, finding its share of the registration rolls lacking, engaged in a year-round registration drive as early as 1986. During that year, the party employed approximately 2,000 bounty hunters and paid them \$1 to \$4 per Republican registrant as part of its centralized, coordinated registration campaign. The simultaneous Democratic Party registration drive, though less organized, also utilized paid workers, employing 250 bounty hunters in Orange County alone.<sup>61</sup> In one recent case of bounty hunter abuse, two workers retained by political consultant Michael Long for Republican Brooks Firestone's campaign for the state assembly were arrested for registering the inhabitants of

a graveyard and were actually charged with election fraud. Long's firm paid the two, and approximately fifty others, about \$3 per completed Republican registration card. Unlike their companions, the two copied names from tombstones and submitted the cards to their employer, who reviewed the cards and then forwarded them to the Firestone campaign, which in turn submitted the cards to county officials.

Neither Firestone nor Long's firm was apparently aware the registration cards were fraudulent, and Firestone noted, "We had no intention of engaging in fraudulent registration whatsoever. . . . It wouldn't do us any good, because dead people don't vote."<sup>62</sup> Of course, while the dead logically cannot vote, neither should they be able to register. No evidence suggests that the Firestone campaign intended to capitalize on the life-challenged registrants, but less scrupulous candidates may not find the legal or ethical principles involved very compelling.

The tried-and-true fraud associated with absentee balloting is part of the California picture, too, mirroring the conditions already identified in Philadelphia and Alabama. Jim Boren, reporter for the *Fresno Bee*, described the bold and "sophisticated" pattern of activity by campaign staffers and candidates: "They know what the exact turnaround should be in neighborhoods. The campaigns mail the absentee requests to the elections office, and then they literally follow around the postmen and women as they deliver the absentee ballots back to the residences. They go up to the residences, offer people a stamp, and make sure they vote."

This harvesting of absentees (sometimes called "ballot farming") may simply seem like savvy politics, but violations of law are involved.<sup>63</sup> A recent *San Francisco Chronicle* investigation of one county's elections found that signatures on dozens of absentee ballot request forms did not match the registration signatures on file, yet the ballots were still mailed; and that 1,500 suspect absentee ballots were simply filed away and never referred to the district attorney for investigation.<sup>64</sup> At times, local candidates have directly obtained absentee ballots from the elections office and personally delivered the ballots to voters, entering their homes while the voters were casting them. Campaign workers have also punched holes in the ballots for voters, instructed people who to vote for, handed out free postage

stamps, or simply taken the completed ballots away with them, and occasionally engaged in intimidation of voters during the balloting process.<sup>65</sup> All of these activities can result in misdemeanor or felony charges under existing law. Two recent city council elections in Stockton and Inglewood have been overturned because of absentee ballot hanky-panky of this sort.<sup>66</sup>

Of course, the ultimate form of absentee balloting is voting by the dead. Many years ago, if you planned to remain politically active once deceased, you had to arrange burial in Chicago or Louisiana. Now, apparently, California is an acceptable alternative. For example, in Alameda County a deceased woman's 1994 absentee ballot was cast—the registrar suspects that either her daughter or roommate did it,<sup>67</sup> and in San Francisco one Lazarus who had passed away twelve years earlier (in April 1982) came back to vote in 1994.<sup>68</sup>

The dead are not the only unexpectedly energetic voters on election days in California. Some registered Golden Staters are such good citizens they vote twice—this a result of the widespread duplicate registrations mentioned earlier. In one study of five Central Valley counties following the 1994 general election, 3,300 voters were found to have registered twice. With only very partial records available on some of these voters, 90 were identified as having cast at least two ballots.<sup>69</sup> (Had all data been accessible, the number of "vote-early-and-often" citizens would almost certainly have been higher.) A number of people may also be voting under the names of registered voters who, for whatever reason, are not expected to show up at the polls. On general Election Day 1994 at a Kern County precinct, for instance, a woman was in the process of casting her ballot when another woman (with two female friends) entered the polling place and requested a ballot under the name of the woman who by chance was already in the voting booth. As the legitimate voter objected and stared in disbelief, the impersonator and her accomplices fled the area.<sup>70</sup>

As if all this were not enough to malign California's unsecured electoral system, the record-keeping and vote certification are so sloppy that almost nothing adds up correctly. When the state's Fair Elections Foundation, a nonprofit watchdog group, examined the November 1994 returns from seven counties, the county registrars inexplicably reported totals that differed by many thousands from the vote totals certified by the California secretary of state.<sup>71</sup> In Or-

ange County, the registrar claimed 627,223 votes had been cast but the secretary of state's office released a final count of 618,448. To make matters worse, the tallies by poll workers of votes cast in each precinct frequently differed from the tallies recorded by the county registrars. In Los Angeles County, fully 40 percent of the 6,104 precincts showed a disparity between the counts of the poll workers and the registrars.<sup>72</sup>

Computer software glitches may well account for some (though not all) of these errors. Still, the mistabulations add to the seeming haphazardness of the laid-back California elections process. When combined with the abundant evidence of voter fraud (both potential and actual), there is but one reasonable conclusion: let honest California elections officials beware, and let concerned citizens be about the business of reform.

These recent California experiences also point to a noteworthy irony that applies to other states and the nation as a whole: laws intended to encourage voting have sometimes become an entrée for vote fraud. The last quarter-century has seen an opening up of the electoral process almost everywhere, as regulations concerning registration and balloting were eased to maximize convenience and turnout. But undeniably there is a hidden cost to these benefits: the resurgence of fraud apparent around the country. Remedies that neatly cure one ill frequently and surprisingly cause another. Just as with well-intentioned campaign finance schemes, the "law" of unintended consequences prevails—and it is a rule rarely given much thought when many reforms are first designed.<sup>73</sup>

### Vote Fraud in Texas: The Wild, Wild Southwest

As we have already demonstrated in this chapter, the Lone Star state—whatever the extent of its electoral hijinks—will never walk alone in the field of voting fraud. Nevertheless, fraud in contemporary Texas is still breathtaking in its boldness and scope, amply fulfilling the state's "bigger and better" stereotype. Reformers bent on cleaning up political excesses had best hope that the state's informal slogan, "Don't Mess with Texas," does not extend to the registration and voting system.

One region or another of Texas features almost every breed of

fraud found in Philadelphia, Alabama, and California: voting by illegal aliens, ballots from the living dead, manipulation of the elderly, double voting, absentee ballot shenanigans, street money incentives, and so on. In addition, some traditions and laws unique to Texas create conditions that spawn even more corruption.

The most egregious of the state's election law provisions permits people to come to the polls on Election Day, and without a recorded registration, to cast a ballot as long as they sign a sworn statement swearing that they are in fact registered in that precinct.<sup>74</sup> These ballots are *not* kept separate so that they can be challenged or checked later. Just in Harris County (the Houston area), 6,707 individuals *who were actually ineligible* voted this way in the 1992 presidential election.<sup>75</sup> Of this substantial total, 1,262 had *never* been registered *anywhere*, and twenty-five of the illegal voters were *convicted felons* not permitted to vote because of their crimes.<sup>76</sup> It took Harris County seven months to conduct the check, long after the election results had been certified. And of course, once again no one knows whether the illegal ballots affected the election since these provisional votes were not segregated from the clearly legal ones. Incidentally, even though it is a felony for a person to "vote or attempt to vote in an election in which the person knows he is not eligible to vote," no punishment is designated for those who "unintentionally" violate the law. Surprise: not a single one of the 6,707 illegal voters was prosecuted because it is very difficult to prove criminal intent.<sup>77</sup> Nor was this merely a localized problem affecting Houston. In the same 1992 general election, over 3,000 unregistered, ineligible people cast a ballot in Tarrant County (the Fort Worth area).<sup>78</sup>

Moreover, Texas has an extraordinarily generous "early voting" system<sup>79</sup> that permits *anyone* age 65 or older, for instance, to use a mail-in ballot (the same kind of ballot as the absentee, except that senior citizens need not be away from home on Election Day or incapacitated to use it). Generally, as Texas examples will show, the more substitutes there are for in-person voting, and the more frequently they are used, the greater the opportunities for voter fraud. To make matters worse, Texas does not require mail-ins and absentee ballots to be accompanied by a witness or notary signature on the sealed envelope that actually contains the completed ballot.<sup>80</sup> Nor is even a full signature by the *voter* necessary on this envelope, even

though a space is provided. Many elections officials permit any mark (an "X" or a check) to suffice—making it impossible to verify the voter's signature and easing fraudulent efforts by people who come into possession of absentee or mail-in ballots. In addition, some registrars do not seem to match and carefully compare the signatures on the mail-in ballot application and the actual ballot envelope. One watchdog group counts over 200 instances of apparently differing signatures on the applications and envelopes in the 1994 Democratic primaries just in Galveston County; several races were decided by fewer than 200 votes.<sup>81</sup> A follow-up investigation by the Galveston district attorney's office found "some violations of the Texas Election Code," including a mentally and physically incapacitated voter's ballot being cast by a caretaker who lived in the voter's home.<sup>82</sup>

Some of the elderly—especially the infirm and the poor—are vulnerable to manipulation under this Texas regime. A Lone Star state form of street money pays individuals to organize absentee and mail-in voters.<sup>83</sup> (In Hispanic areas these activists, each paid around \$100 per week, are referred to as the *politiqueras*.) Typical of these activists' targets in recent elections was Edward Taylor of Houston, a seventy-nine-year-old retiree. Prior to a 1993 municipal election, a woman Taylor had never met before arrived at his home and presented him with an absentee ballot *application*, which she mailed after Taylor signed it. Very shortly after the postman delivered the ballot to Taylor's mailbox, the woman returned. Taylor related the events that followed in a sworn affidavit:

Shortly after I received the ballot, the same woman, in the company of a man, came to my house. . . . She used a hole punch to vote my ballot. She then told me to sign my ballot. This woman then put my ballot in the envelope as I was not allowed to mail in my ballot. The woman then took my ballot with her when she left.<sup>84</sup>

As is needless to point out, this entire procedure is not just unorthodox but blatantly illegal.<sup>85</sup>

Compared with some others, Taylor was well treated, and actually given a role—however inferior—in the requesting and casting

of his ballot. One married couple, Maria and Jesus Casteneda, were misled when a "helper" showed up at their house.<sup>86</sup> Instead of aiding them in marking their ballots for an independent candidate for city clerk, David Pena, as the couple requested, the helper tricked them into checking the "straight Democratic" ticket box. As Jesus Casteneda recalled, "I later found out that I had not actually voted for David Pena and that [the helper] made me believe I did."<sup>87</sup> Another "helper" aided a husband and wife, Charles and Gloria Scott, by voting their ballots and falsifying the certificate signatures on the carrier envelopes.<sup>88</sup> Even more remarkable was the story of Mr. and Mrs. Jim Cheney Jr.<sup>89</sup> Neither of the Cheneys applied for an absentee ballot in 1993, but two arrived anyway. (Someone unknown to them did the application paperwork.) Soon after, Mrs. Cheney received a woman visitor who offered to take her to the polls on Election Day. She declined, indicating she did not plan to vote; she also pointed out the two unrequested ballots, which the visitor cheerfully took off Mrs. Cheney's hands. Of course, the ballots were cast and counted in the election. This was particularly noteworthy in the case of Mr. Cheney, who had died in September 1992. Mr. Cheney came back again to his old home in March 1994, when he seemingly could not resist applying for an absentee ballot to vote in the federal and state primary elections. (Fortunately, the bogus application was rejected this time by an alert registrar.)

In South Texas, meanwhile, remarkably little has changed politically since the days of LBJ's vote stealing. The sheriff is still the premiere power in most counties, with great influence over the electoral process. Some public officials (especially sheriffs) are again on the take, with drugs rather than moonshine being the source of their ill-gotten gains.<sup>90</sup> And all kinds of fraudulent shenanigans remain a staple of political life there. In recent elections, substantial charges included voting by non-citizens, the mailing of blocks of absentee ballots directly to a political party's headquarters, voting twice, intimidation of voters at the polling places, and campaign workers following around postal delivery persons in order to take mail-in ballots from voters' mailboxes shortly after they were delivered.<sup>91</sup> Poll workers have also observed official election judges—supposedly neutral arbiters—exhorting voters in line at the polling places to support a favored candidate or party.<sup>92</sup> And the beat goes on. . . .

To paraphrase John Donne, no state (except Hawaii) is an island, so Texas shares vote abuse practices with other parts of America. As in Philadelphia, fraud in Texas is bold. As in Alabama, Texas fraud is traditional and institutionalized. As in California, vote fraud in the Lone Star state is assisted by lax state laws that practically invite trouble. But as long-time residents of the state are fond of bragging to outsiders, everything is bigger in Texas, where vote fraud combines all of the polling problems observed elsewhere on our American journey.

### **Election Fraud in Perspective**

What conclusions are reasonable, now that this electoral tour of some diverse precincts is over? As we asserted at the outset, contrary to the belief of some that voter fraud is a thing of the past existing today only in isolated pockets, if at all, the evidence accumulated in this chapter's case studies strongly suggests a persistent pattern of criminal fraud that is well organized and a continuing part of the political culture in some areas. The fact that fraud is generally not recognized as a serious problem by press, public, and law enforcement creates the perfect environment for it to flourish.

The role played by the news media deserves a special comment. Many of the stories we have just reviewed received little or no national press attention, even when the local media carried news accounts. Perhaps they were seen merely as "isolated" incidents of interest only to the citizens directly affected. Remarkably, though, some of these cases of fraud attracted amazingly light attention from the local news organizations themselves. Partly, as noted at the outset, this results from the mistaken belief among journalists that vote fraud is no longer a serious problem. But it also reflects a lack of knowledge even among opinion makers about vote fraud's resurgence. Less charitably, the coverage vacuum may also be another indication of a disease some reporters may have contracted from extended contact with political professionals: a blasé attitude about some unsavory aspects of the electoral sausage-making process.

In contrast to the absence of the press, the alert reader has probably already noticed that Democrats feature prominently in almost all of the instances of voter fraud featured in this chapter. Before

Democrats take umbrage, and the Republicans mount a high horse, an explanation is in order. First, the GOP is fully capable of voting hijinks when circumstances permit. For example, the two Ventura County workers who were arrested in October 1994 for collecting the names of newly registered voters from tombstones were working on behalf of a Republican candidate for the legislature.

Another hotbed of Republican vote fraud is rural southeastern Kentucky, where a sizable number of GOP local candidates, consultants, and precinct workers have recently been caught paying off voters to cast their absentee ballots "correctly," among other offenses.<sup>93</sup> Several decades later, the price of a vote was still reasonable—five dollars or a half-pint of whiskey—but by the 1980s and 1990s a combination of inflation and candidate competition had driven the per-vote cost to about \$50.<sup>94</sup> Despite the substantial increase, various local Republican politicians and their absentee-ballot "brokers"—frontmen who give people cash in exchange for their marked and signed absentees—were more than willing to pay the price.<sup>95</sup>

"It's a way of life," commented former assistant state attorney general Dale Wright, who was assigned to the vote fraud hotline in his office. "It is basically conceded in Kentucky that people have a constitutional right to sell their vote. We laugh about there being three Kentucky cash crops: tobacco, marijuana, and votes."<sup>96</sup> Wright describes a particularly blatant form of vote-buying in some Kentucky precincts:

Sometimes the buying or selling [of votes] is done right at the door of the polling place. The [vote-buyers] are stationed at the end of the road leading to the [precinct], and trucks stop and the drivers are given a kind of business card. Then these [bought] voters go into the polls and the [partisan] election judges see the card, know exactly where it came from, and watch to see that the voter votes correctly . . . Then one of the judges will tear off a certain corner of the card. When the voter drives off, he stops to see the vote buyer at the end of the road, presents the torn card, and is paid.<sup>97</sup>

Moreover, in some parts of the state, says Wright, "The patriarch or the matriarch of a very large family may commit the whole damn

family to the highest bidder, and once [he or she's] been paid, [all family members] file for absentee ballots, sign them, and turn them over" to the party or candidate's agent. By the way, Wright knows whereof he speaks, and not just because he worked in law enforcement. "Hell, I was part of it. My first year out of law school, in 1971, I hauled half-pint whiskey bottles all [election] day around the polling places, and I took the money to the family patriarchs" at a time when he was active in partisan politics.

Kentucky and a few other places aside, Republicans have fewer opportunities for vote fraud available to them. In many states, particularly in the South and some border states, the GOP has rarely if ever controlled the local and legislative offices necessary to set the rules and manipulate the election process. Alabama and Texas clearly demonstrate this, although in those states and elsewhere in Dixie, Republicans are beginning to make the necessary gains at the ballot box that will change the balance of power in many localities.

In and out of the South, another factor is also at work: the hard reality of economic and class politics. In most areas, the Republican base consists primarily of white-collar, managerial professionals, as well as Christian conservatives. Neither group is easily induced to commit fraud; community standards, cultural values, "clean government" orientation, high education level, and/or the lack of a financial incentive to commit fraud for just a few dollars work against any Republican Party operative who seeks to draft them into any illegal schemes.

By contrast, the pool of people who appear to be available and more vulnerable to an invitation to participate in vote fraud tend to lean Democratic in their partisan predisposition, such as low-income minorities.<sup>98</sup> The usual turnout among African Americans and Hispanics is disproportionately low, and Democratic organizers are often desperate to boost their participation rate. Some liberal activists have even partly justified fraudulent endeavors on this basis; those making this case say it is unfair that the voices of the poor and dispossessed are muted at the ballot box, and therefore extraordinary measures (for example, stretching the absentee ballot or registration rules) are required to compensate.<sup>99</sup> To most observers, though, the rationalization that the end justifies the means is not very convincing. The 1993 passage of the "motor-voter" bill that dramatically eased voter registration

reduced whatever cogency such an argument possessed. (This bill, which also potentially increases the opportunities for vote fraud, is discussed in chapter 11.)

Less partisan readers might wonder more about the breadth of election fraud. Are polling problems restricted just to the four hot spots we investigated, or do they characterize the American electoral process generally and range more widely? Our strong suspicion—based on dozens of unexplored tips from political observers and interviewees—is that some degree of vote fraud can be found almost everywhere, and serious outbreaks can and do occur in every region of the country. In New Jersey, for instance, nearly 1,000 illegal votes were cast in Hudson County (Jersey City) in a 1989 election, including some by people who were unregistered and others who were dead.<sup>100</sup> In addition, several dozen psychiatric patients—some of whom believed Franklin Roosevelt or Harry Truman was still president—managed to cast absentee ballots in a local 1993 election in Secaucus.<sup>101</sup> And, one of our interviewees, Republican political consultant Ed Rollins, claimed in a session with us that in the 1993 New Jersey gubernatorial election, there were precincts with 100 to 200 votes recorded for the Democratic candidate, Governor James Florio, before the polls opened. Rollins blamed "Democratic sheriffs in control of the machines."<sup>102</sup>

Granted, vote fraud has been a staple of New Jersey's history; as one chronicler wrote, "What Renaissance Italy was to art, the old-time Garden State was to vote fraud."<sup>103</sup> However, places with relatively spotless records, where the authorities are convinced that the electoral process is clean, may be especially vulnerable to fraud. Virginia is a perfect example. Though administratively well run, the elections process in the prideful Old Dominion may be too reliant on an outdated "honor system" and sense of civic security. One can cast a ballot in Virginia on Election Day without displaying any identification. All one must do is give a name and an address to a poll worker who then checks the official voter list—a procedure potentially wide open to fraudulent manipulation.

Whether fraud is Democratic or Republican, or located in the North or the South or the West, the effect on American democracy is similar. While electoral hanky-panky affects the outcome in only a small proportion of elections (mainly in very tight races), even one

fraudulent ballot is too many. The superstructure of any representative democracy ultimately rests on the soundness and integrity of the elections that produce its governors. Most important of all, citizens must have complete confidence that the declared winners are the actual winners; otherwise, the motivation to participate in elections is destroyed. Millions of citizens are already convinced that their one vote matters too little to exercise the franchise. Once the pattern of election fraud becomes too obvious for the media to ignore, and the public begins to suspect or believe elections can be stolen, then American democracy's currently tenuous hold on many individuals may well dissipate.

Therefore, the need for reform is urgent and clear. Voter turnout in the United States is traditionally too low, and cynicism among citizens too high, to permit the malodorous malady of election fraud to continue unchecked—or to spread. Fortunately, some simple procedural changes, combined with newly advanced technology, can make a real difference in this corrupt province, and proposals in both categories will be set forth in chapter 11.

## Notes

- In a letter to Gibson dated August 9, 1993, Secrest accused the reporter of "a pattern of very disturbing behavior . . . potentially including . . . receipt of stolen materials, . . . fraudulent means to acquire propriety [sic] trade materials, and . . . harass[ment of] employees in a dark parking lot as they left work." No action followed, and the facts of Gibson's reporting were never convincingly challenged or refuted.
43. The average population of registered voters per district was approximately 30,000, so as many as one of every twenty households containing a registered voter was being reached—a sizable proportion if one's goal was to spread rumors.
  44. Nine separate questions in the poll posed negative arguments about Orrock. The respondent was asked to state whether each argument was "a very persuasive reason not to reelect him," "an only somewhat persuasive reason," or "a not at all persuasive reason."
  45. Wisconsin Republicans have also been targeted in state legislative races. These push-polls were reportedly conducted by the National Education Association's Wisconsin affiliate. See Harwood and Pearl, "In Waning Campaign Hours." See also Judy Williams, "5th District Candidates Pull Plug on Phone Calls," *Appleton (Wisconsin) Post-Crescent*, October 9, 1994, p. B8; and Judy Williams, "Candidates at Odds Over Phone Tactics," *Post-Crescent*, October 29, 1994, p. B1.
  46. See Phil Porado, "A Case Study: How Negative Phoning Didn't Work in Two State House Races," *Campaigns and Elections* 13 (April 1992): 62; Buddy Nevins, "Many Undecided about Candidates in Upcoming Primary," *Fort Lauderdale Sun-Sentinel*, August 28, 1994, p. B4.
  47. Telephone interviews with Haley Barbour, February 26 and May 31, 1995.
  48. Barbour noted, "At one point, we considered a script saying, 'If the Democrats contact you, would you call [the following] 800 number.' But we ended up not doing that because it was kind of complicated."
  49. The information in this section is taken from Maloney's testimony before the Federal Election Commission on March 8, 1995.
  50. See Scott Lehigh, "Kennedy Camp Reacts Angrily to 'Push-poll,'" *Boston Globe*, November 5, 1994, p. B18.
  51. The calls also tied North to the Reverend Jerry Falwell and U.S. Senator Jesse Helms (Republican of North Carolina). See Laurie Kellman, "Robb callers tie North to David Duke," *Washington Times*, October 28, 1994, p. A14; Laurie Kellman, "North Says Recent Troubles Won't Keep Him out of the Senate," *Washington Times*, October 29, 1994, p. A1; and Margaret Edds, "Get-Out-the-Vote Efforts Crucial in Close Senate Race," *Virginian-Pilot*, October 30, 1994, p. A2.

  53. See Harwood and Pearl, "In Waning Campaign Hours."
  54. See R. H. Melton, "Poll Firm That Irked Voters Paid by Coleman," *Washington Post*, November 1, 1989, p. A1.
  55. Interview with Mark Sanford, January 24, 1995.
  56. Interview with Geoff Garin, April 13, 1995.
  57. Interview with Karan English, January 13, 1995.
  58. Telephone interview with Steve Horn Jr., campaign manager for his father, February 17, 1995. Horn Jr. suggests that the push-polling for his father's 1994 Democratic foe, Peter Mathews, was done by a prominent Democratic telephone bank firm, Gordon and Schwenkmeyer. Indeed, Mathews's filings with the Federal Election Commission show two late payments to the firm, \$10,000 on November 6, 1994, and an additional \$3,270 on November 13, 1994. Mike Gordon, president of the firm, declined to comment on the substance of the allegation, citing his firm's policy of "not discuss[ing] clients with anyone." Telephone interview with the authors, July 20, 1995.
  59. Telephone interview with Tim Tomkins, February 2, 1995.
  60. Interview with Steve Chabot, November 30, 1994.
  61. Interview with Herb Klein, January 17, 1995.
  62. Interview with Mike Synar, January 27, 1995. Also interview with Amy Tobe, Synar's campaign manager, March 6, 1995. According to our interviewees, computer-automated calls are often made when the message is brief and no response from the listener is required. The technology exists for computer-automated phoning that includes listener response, but it can be clumsy or off-putting to those at home.
  63. See Mike Oliver and Michael Griffin, "Plot Thickens as Politicians Resort to Pulling Dirty Tricks," *Orlando Sentinel Tribune*, October 11, 1992, p. B1.

## CHAPTER 10. VOTE FRAUD

1. In the 1994 general elections there were several well-publicized close contests in which vote fraud was alleged, including the Maryland gubernatorial race, won by Democrat Parris Glendening over Republican Ellen Sauerbrey by 5,993 votes out of more than 1.4 million cast; a North Carolina U.S. House contest in District 7 won by incumbent Democrat Charles G. Rose over Republican Robert Anderson by 3,821 votes out of 121,519 cast; and a California U.S. House race in District 36 between incumbent Democrat Jane Harman and GOP challenger Susan Brooks, which Harman won by only 812 votes of 195,808 cast. In this chapter, however, we have chosen to focus on less well-known examples that are indicative of systemic corruption.
2. Bruce L. Felkner, *Political Mischief: Smear, Sabotage, and Reform in U.S. Elections* (New York: Praeger, 1992), p. 160; see also pp. 155–82.

Notes

3. For a classic treatment, see Paul Leland Hayworth, *The Hayes-Tilden Disputed Election of 1876* (Cleveland: Burrows Brothers, 1906).
4. Louise Overacker, *Money in Elections* (New York: Macmillan, 1932), p. 31.
5. Many "floaters"—individuals who would roam from precinct to precinct, casting a ballot at each one—were imported from other cities and towns to perform this extraordinary civic "duty." The practice may be the origin of the old aphorism, "Vote early and often."
6. J. J. McCook, "Venal Voting: Methods and Remedies," *Forum* 14 (September/October 1892): pp. 1, 159; as cited in Overacker, *Money in Elections*, p. 32.
7. A. Z. Blair, "Seventeen Hundred Rural Vote-Sellers," *McClure's* 38 (November 1911): 33; as cited in Overacker, *Money in Elections*, p. 33.
8. For further details on the 1960 election, see Theodore C. Sorensen, *Kennedy* (New York: Harper and Row, 1965), chap. 8, pp. 211–23; Stephen E. Ambrose, *Nixon* (New York: Simon & Schuster, 1987), chap. 26, pp. 584–608; and Theodore White, *The Making of the President 1960* (New York: Pocket Books, 1961).
9. As Johnson underling L. E. Jones later reported, LBJ had an early introduction to the (under) world of voter fraud. Working for the left-leaning Maury Maverick in his winning 1934 congressional campaign, Johnson sat at a table covered with money and paid barely bilingual Mexican-Americans in multiples of \$5 bills. Jones realized that Johnson was paying each man \$5 for each eligible voter in his family. See Robert A. Caro, *The Years of Lyndon Johnson: The Path to Power* (New York: Alfred A. Knopf, 1982), pp. 276–77. Johnson put this experience to good personal use in 1937, campaigning in his successful bid to fill Texas's Tenth Congressional District seat, which had been vacated by the death of James P. Buchanan. Caro reports that Johnson bought votes in African-American and Czech communities.
10. Parr ordered Salas to come up with the needed votes in a meeting attended by Johnson himself, according to Salas. Decades later, Salas admitted that two deputy sheriffs added the extra names to the voter list, at his direction. Most observers at the time strongly suspected this skulduggery, but efforts in the Democratic state committee and in the courts to change the results failed. See James W. Mangan, Associated Press interview, July 30, 1977. For a more extensive account of Johnson's Box 13 shenanigans, see Caro, *The Years of Lyndon Johnson*, chaps. 14 and 15, pp. 318–412.
11. The hundreds of previous signatures were written in different color inks, and were clearly signed by each individual voter separately.
12. The first draft of the Philadelphia section was researched and written by University of Virginia graduate student Charles H. Woodcock.

Notes

13. See "Stinson Cleared of Election Fraud," *United Press International* regional news, June 22, 1994. There was insufficient evidence to tie Stinson directly to the fraudulent efforts made on his behalf. The Democrat had been specifically charged with unsealing and counting absentee ballots, as well as unlocking voting machines in his own precinct. For a description of the pretrial proceedings, see Marc Duvoisin, Daniel Rubin, and Henry Goldman, "Stinson, 2 Aides Are Indicted; Charges Center on Absentee Ballots," *Philadelphia Inquirer*, March 13, 1994, p. A1.
14. Newcomer's final opinion in the *Marks v. Stinson* case (1994 U.S. Dist. LEXIS 5273; hereafter, *Marks v. Stinson*) was actually the second time he ordered Stinson stripped of the seat and certified Marks. The proceedings occurring prior to his April 26, 1994, decision are complicated, and an accounting of the entire obstacle course Marks was forced to run in order to gain redress would require a chapter in itself.

Marks's appeal through the state court system proved futile. The Marks campaign was actually aware that absentee malfeasance had occurred prior to election night. Even so, Steve MacNett, a Pennsylvania lawyer who worked on Marks's appeal, explained that at each of several stages of the appeal process, "the apparent over-politicization of the Pennsylvania Courts, especially in Philadelphia," prevented successful action. MacNett continued, "[The] three judges he was before in Philadelphia, each of them has deep ties to the Democratic party establishment" (interview with Steve MacNett, July 18, 1995).

Marks's inability to gain redress quickly was compounded by the actions of the County Board of Elections, which prompted Judge Clarence Newcomer to note that "the actions of the board [of Elections] were designed to, and did in fact, prevent any realistic opportunity to appeal the certification in the State court system. . . . Defendants allege plaintiffs consistently failed to avail themselves of the proper appeal procedures. Plaintiffs were never given the opportunity to present their claims because the safeguards failed at every level" (1994 U.S. Dist. LEXIS 5273, 58).

With his appeal to the State Supreme Court pending, Marks filed for redress in federal court. Judge Newcomer found his claims compelling, and on February 18, 1994, delivered his initial injunction stripping Stinson of the seat, threw out all absentee ballots, and ordered the Board of Elections to certify the victor of the machine vote, that is, Marks. While federal judges have in the past overturned the results of state elections on civil and voting rights grounds, this was the first occasion a federal judge simply installed the opposing candidate in office rather than ordering a new election.

However, Newcomer was found to have exceeded his authority by the court of appeals. (See his original opinion, *Marks v. Stinson*, 1994 U.S. Dist.

LEXIS 1586, order overturned.) The Third Circuit Court of Appeals upheld the portion of Newcomer's order stripping Stinson of the seat, but vacated his order to install Marks. While the Circuit Court agreed the District Court was correct to claim jurisdiction, proof of voter fraud was not sufficient to award the seat. Writing for the court, Judge Stapleton, stated, "The district court should not direct the certification of a candidate, unless it finds, on the basis of record evidence, that the designated candidate would have won the election but for wrongdoing" (19 F.3d 873, 889 [3d Cir. 1994]). The appellate judges relied on *Griffin v. Burns* (570 F.3d 1065 [1st Cir. 1978]) to suggest that Newcomer's order to install Marks might be unconstitutional, creating an opportunity for voters to challenge the decision under the Federal Voting Rights Act. Because Newcomer's order voided *all* absentee ballots cast, it inevitably voided some that were lawfully and properly cast. The First Circuit in *Griffin* "concluded that rejection of a ballot where the voter has been effectively deprived of the ability to cast a legal vote implicated federal due process concerns" and possible Fourteenth Amendment violations (*Marks v. Stinson*, 19 F.3d at 889).

The second opinion, which we discuss in the text, was the result of the circuit court's remand to Newcomer. See particularly Newcomer's analysis of the number of illegal absentee ballots and the statistical tests used to corroborate his findings. Newcomer went to great pains to show that the Stinson campaign's "dollar a ballot" drive produced approximately 600 fraudulent votes (greater than the 461 needed to change the election results). He also found via expert testimony that Stinson received approximately 1,000 more absentee votes than expected.

The story does not end here, however. Stinson unsuccessfully appealed Newcomer's second opinion to the Third Circuit in August 1994, and then in January 1995, to the U.S. Supreme Court, which declined to overturn or comment upon the judgment. In the (presumably) final chapter of the story, Marks ironically lost his hard-won seat in the regular 1994 general election to Nina Tartaglione, the daughter of Democratic County Commissioner Margaret Tartaglione, who had been implicated in the scandal that denied Marks the seat to begin with. (See "Recount Shows Marks Still a Loser," United Press International regional news, November 14, 1994.)

15. See, for example, *Griffin v. Burns* (570 F.2d. 1065, 1st Cir. 1978), the case cited by the Third Circuit panel to justify remanding the case to the district court. In this case, Providence election officials distributed absentee ballots for a primary city council contest, although Rhode Island law only provides for absentee voting in general elections. The Rhode Island Supreme Court found the statutory omission precluded the use of absen-

tees in primary elections, decertified the primary victor, and ordered recertification based only on machine votes—which also changed the outcome of the election. However, the circuit court agreed with absentee voters' claims that the lower court ruling effectively disenfranchised them, vacated the order to certify on the basis of the machine count, and ordered a special election. Note, however, that the *Burns* case did not involve fraud per se, and the Third Circuit left Newcomer the option to certify Marks if he found the Republican would have been elected but for the wrongdoing.

16. See "Improper Ballots Turned Election," *Philadelphia Inquirer*, March 25, 1995, p. A1. The *Inquirer's* investigation, which required a massive effort, indicated that at least 540 absentee ballots cast for Stinson were tainted, a number that exceeded his margin of victory.
17. PA Stat. Tit. 25, 3146.1–3146.6 (1994).
18. Interview with Bruce Marks, July 18, 1995. In addition, several hundred rejected applications (some of which were for unregistered individuals, and some of which were simply fraudulent) were covertly returned to the Stinson campaign to prevent their discovery. These documents are public records, and should have been preserved for two years.
19. *Marks v. Stinson*, 1994 U.S. Dist. LEXIS 5273 p. 23.
20. *Ibid.*, p. 26. As noted above, Stinson had narrowly lost an election for a Philadelphia city council seat in a June 1991 Democratic primary. For a fuller account of Jones's recollections of his work for Stinson, see also Henry Goldman and Sergio Bustos, "Campaign Worker Says Stinson Ignored Warning on Ballots," *Philadelphia Inquirer*, February 8, 1994, p. A1. Stinson, on the other hand, challenged Jones's credibility and claimed that he deliberately maintained his ignorance of many details of his campaign, including the absentee ballot program. See Mark Fazlollah, "Stinson Said He Stayed Clear of Details," *Philadelphia Inquirer*, February 8, 1994, p. A1. Stinson's argument, however, contradicts the testimony of many of those who worked on his campaign; see Marc Duvoisin, "Absentee-ballot Quest Described as Obsessive; Aides Say Stinson Discussed It Frequently," *Philadelphia Inquirer*, March 13, 1994, p. A1.
- Ironically, Marks later recalled that Daniel McElhatton, Stinson's opponent in the 1991 city council primary, was one of the sources who suggested he investigate Stinson's use of absentee ballots: "I ran into [Daniel McElhatton] who had run against my opponent in a 1990 primary, . . . and he just recommended to me that I look into the absentee ballots" (interview with Bruce Marks, July 18, 1995).
21. *Marks v. Stinson*, p. 23.
22. *Ibid.* See also *Marks v. Stinson*, p. 31, where Judge Newcomer notes the scheme; Hispanic and black voters were also told "that the law had been

Notes

- changed and there was a 'new way to vote' from the convenience of one's home."
23. For a more complete account, see "Voters Say Ballots Were Forged," *Philadelphia Inquirer*, November 21, 1993, p. A1; and John F. Dickerson, "Is This Seat Stolen? Angry Republicans Contend That Dirty Tricks at the Polls Tipped the Balance of Power in Pennsylvania," *Time*, February 7, 1994, p. 34.
  24. *Mark's v. Stinson*, p. 36.
  25. *Ibid.*, p. 39.
  26. One of the Democratic commissioners even gave an order to "stay out of it" to an elections board employee who ascertained that unregistered citizens had applied for absentee ballots and so informed the commissioner.
  27. *Mark's v. Stinson*, p. 55.
  28. Interview with Jack Connors, July 18, 1995.
  29. *Mark's v. Stinson*, p. 47.
  30. Office of Alabama Secretary of State, Elections Division. As was the case with the Philadelphia story, where party control of the Pennsylvania state senate was at stake, the significance of the Alabama election was tied to a larger issue current in the state at the time. Tort reform, which gained national prominence in the Republican Party's "Contract with America," is an especially significant issue in Alabama, as in many states where judges are elected. Plaintiff trial lawyers categorically oppose regulatory efforts to limit jury awards for punitive damages and pain and suffering in civil liability suits. Alabama is distinguished by the large dollar amounts that juries award to plaintiffs, and by the fact that the state appeals courts, including the Supreme Court, often maintain the amounts set by juries. Hornsby is the past president of the Alabama Trial Lawyers Association and is critical of tort reform. Hooper and the Alabama Business Council are outspoken proponents of reforming tort award limits. The Hornsby-Hooper race is therefore symbolic of the wider issue.
  31. The United States Court of Appeals for the 11th Circuit requested that the state Supreme Court clarify the status of the 1,700 absentee ballots under Alabama electoral law prior to ruling on the merits of Hooper's supporters' claims. A five-judge panel of the state Supreme Court (not including Hornsby), all Democrats, ruled on March 15, 1995, that by Alabama Code 17-10-7, the ballots were in substantial compliance with Alabama electoral law and should be counted despite the fact that the affidavits attached to the ballots were not notarized or witnessed by two individuals, as required. This ruling would place their colleague Hornsby back on the bench. The circuit court is currently considering the panel's opinion, and as Hooper noted, "This isn't even close to being over." (See

Notes

- Ronald Smothers, "Court Orders Votes Counted in Alabama," *New York Times*, March 16, 1995, p. A23.) However, in September 1995 a U.S. district court judge in Mobile threw out the disputed absentee ballots, and the U.S. Court of Appeals then upheld the judge's decision, thereby clearing the way for Hooper's swearing-in, at long last. (See "Chief Justice Takes Office in Alabama," *New York Times*, October 22, 1995, p. A25.)
32. Affidavit of Paul J. Harrington, November 20, 1994. All affidavits cited in this section are public record, and were submitted as documentation for *Larry Roe et al. v. Mobile County Appointing Board et al.* (Civil Action 94-885-AH-S).
  33. Affidavit of Paul J. Harrington, November 20, 1994.
  34. Affidavit of Pam Montgomery, November 11, 1994.
  35. Affidavit of H. O. Kirksey, November 21, 1994.
  36. Affidavit of Anthony J. Keith, November 14, 1994. See also affidavit of Juanita Crawford, November 1994.
  37. Affidavit of Jacquelyn Gandy, November 22, 1994.
  38. Testimony of Helen Watts, from transcript of Civil Action 94-885-AH-S, *Larry Roe et al. v. Mobile County Appointing Board et al.* (preliminary injunction hearing before Judge Alex Howard [U.S. District Court, Southern District of Alabama]), pp. 122-28.
  39. *Ibid.*
  40. Affidavit of John Russell Campbell, November 15, 1995.
  41. *Ibid.* See also affidavit of John Modris Grods, November 14, 1994.
  42. Testimonies of William Moulton and Murphy Gewin, from transcript of Civil Action 94-885-AH-S, *Larry Roe et al. v. Mobile County Appointing Board, et al.* (request for temporary restraining order before Judge Alex Howard [U.S. District Court, Southern District of Alabama]), pp. 48-63 and 109-11.
  43. Affidavit of John Russell Campbell, November 15, 1994.
  44. Telephone interview with Dan Warren, July 20, 1995. Warren is a member of the Board of Registrars.
  45. Telephone interview with attorney Albert Jordan (of Wallace, Jordan, Ratliff, Byers, & Brandt), March 27, 1995.
  46. See Doug Haaland and Doug Swordstrom, "A Report on Election Law Irregularities: California 16th Senate District," personally published report, January 27, 1995, p. 8.
  47. See "Report of the Fair Elections Foundation (II)" (Costa Mesa, Calif.: self-published, winter 1995), pp. 34-48.
  48. See "Report of the 1995 Elections Summit" (Sacramento, Calif.: Office of the California Secretary of State, April 18, 1995), pp. 11-14. Karen Saranita, of the nonpartisan watchdog group Fair Elections Foundation, estimated that the deadwood clogging the registration rolls was in the

## Notes

- range of 14–17 percent, while Trudy Shaffer, of the California League of Women Voters, cited an estimate of 24 percent from a study conducted in the 1980s.
49. Secretary of State Jones estimated “deadwood” costs for the state of California at between \$3 and \$5 million. Similarly, Associated Press reporter Doug Willis estimated that registration inaccuracies cost the state government \$5 million and local governments an additional \$3 million. See “Report of the 1995 Elections Summit,” p. 14; and Doug Willis, “Deadwood on Voter Registration Rolls Wastes Millions for Taxpayers,” AP News Analysis, May 1, 1995.
  50. The lists have apparently been lost in the shuffle of bureaucracy, and the names of dead voters who passed away in the early 1980s are still on the rolls in good standing. This problem was discussed at length at the Election Summit. (See the “Report of the 1995 Elections Summit,” p. 13.)
  51. Ventura County elections head Bruce Bradley, as quoted in the *Los Angeles Times*, October 28, 1994, p. B1.
  52. See “Report of the 1995 Elections Summit,” p. 16.
  53. *Ibid.*
  54. See “Report of the Fair Elections Foundation (I),” p. 4. The Los Angeles County registrar’s office disputes this figure. In an interview with the authors on July 20, 1995, Wendell Patterson, manager of the records division, said there is “no positive proof” that 4,000 people illegally registered to vote, and he stressed that under California law, when a person signs the affidavit on the registration card, the registrar cannot challenge its authenticity or any information on the card. Of course, this provision of the law in itself may be a problem.
  55. Robert B. Gunnison, “Registrars Seek Voting Reform,” *San Francisco Chronicle*, February 23, 1995, p. A16.
  56. See Haaland and Swordstrom, “A Report on Election Law Irregularities,” p. 9.
  57. See “Report of the Fair Elections Foundation (I),” p. 61.
  58. Haaland and Swordstrom, “A Report on Election Law Irregularities,” pp. 7, 9. In a letter to us dated July 13, 1995, Norma Logan, assistant registrar in Fresno County, wrote that while she has “no direct knowledge or proof that illegal aliens are voting,” there are “many allegations about it, and the possibility is that some may be voting.”
  59. See “Report of the Fair Elections Foundation (I),” p. 62. The man in question is Eduardo Rivera, who publishes *Nuestra Gente*.
  60. See Shawn Hubler, “County Ordered to Tighten Rules for Voter Registration,” *Los Angeles Times*, March 30, 1994, p. B3. He registered in September 1990, when he was nineteen years old, and re-registered in 1993, changing his address and his party affiliation from American Independ-

## Notes

- dent to Democrat. There is no record of Martinez actually casting a ballot. His intention may have been to gain documentation in order to qualify for welfare benefits, as Congressman Steve Horn pointed out. (See *Congressional Record*, April 20, 1994.) Or like other illegals, he could have been seeking a voter registration card in order to obtain a separate border-crossing card that facilitates transit across the border and qualifies the holder for a California driver’s license. (A notarized voter card can be used to secure the border document—see the “Report of the Fair Elections Foundation [I],” p. 4.)
- Ironically, Luis Donald Colosio, the man Aburto assassinated, had pledged to depart from the fraudulent electoral practices that have severely damaged the credibility of the Institutional Revolutionary Party (PRI), including massive, systemic voter fraud. To his credit, as president of the PRI, Colosio conceded his party’s loss to the right wing National Action Party (PAN) candidate in the gubernatorial race in Baja California Norte, the first such defeat in 60 years. (See Larry Rother, “Mexico’s Ruling Party Concedes First Defeat in a Governor’s Race,” *New York Times*, July 6, 1989, p. A1.) However, Colosio was also the campaign manager of former President Carlos Salinas’s 1988 presidential campaign, the conclusion of which was marred by widespread evidence that the PRI stole the election from Salinas’s opponent, Cuauhtemoc Cardenas. See David Gardner, “Mexico’s New Man Bows to the Past; Mexican Elections,” *Financial Times*, May 22, 1988, p. 4.
61. See Lanie Jones, “Veteran GOP Director Leads Charge in Voter Registration Campaign,” *Los Angeles Times*, October 5, 1986, pt. 2, p. 1.
  62. See Matthew Mosk, “Two Accused of Voter Registration Fraud,” *Los Angeles Times*, October 28, 1994, p. B1. This case is also mentioned later in the chapter. In another example of registration excess, twenty-six transient residents of a Salvation Army shelter were registered and requested absentee ballots, but left before the election. See Robert B. Gunnison and Susan Yoachum, “Abuses Cast Doubt on State Voting System,” *San Francisco Chronicle*, February 22, 1995, p. A1; and Robert B. Gunnison, “Registrars Call for State Voting Reform,” *San Francisco Chronicle*, March 27, 1995, p. A15.
  63. Under California election law, a “helper’s punching holes in other people’s absentee ballots, his or her instructing voters in their choice of candidates, or handing out free stamps are misdemeanors, and his or her handling or mailing of another individual’s absentee ballot is a felony offense.” Now a sophisticated process, absentee “farming” skirts the law, and in some cases violates it.
  64. See Gunnison and Yoachum, “Abuses Cast Doubt on State Voting System,” p. A1.

65. Ibid.
66. Ibid. According to the article, although it is illegal for a candidate to electioneer "while in the residence or in the immediate presence of the voter, and during the time he or she knows the absentee voter is voting," candidates have admitted on the record to engaging voters completing absentee ballots. As explained by Fresno City Council candidate Dan Ronquillo, "there was nothing wrong with entering voters' homes and answering their questions while they voted." (Quoted in Ibid.) However, evidence existed that Ronquillo did more than answer questions; as Gunnison and Yoachum found, "Some voters said in interviews that they felt pressured by Ronquillo. 'He wanted to help me fill out my ballot,' said one elderly voter. 'You know, that's as private as my purse.'"
- Ronquillo's actions certainly had precedents in Fresno. City councilman Homero Espinoza, elected in 1992, was found guilty of voter fraud in 1995. Among other offenses during his campaign, Espinoza personally took and cast other people's absentee ballots, in some cases having the unmarked ballots mailed to his own post office box. Espinoza won by just thirty-four votes in an election where an extraordinarily high 35 percent of the ballots were cast by absentee voters. (Probation report of Homero Espinoza, Fresno County Superior Court Case No. 503088-7, released to us by letter on May 30, 1995, by County Counsel Phillip S. Cronin.)
67. Letter to the authors from Bradley J. Clark, Registrar, County of Alameda, dated July 31, 1995. Mr. Clark pointed out two loopholes in the California process for removing the deceased from the voting rolls: "Alameda County residents who die outside the county have their death records reported in the county of death. These records are then forwarded to the state registrar of vital statistics who in turn sends reports back to the county of residence. There can be a lag of six months to a year to receive this information. Alameda county residents who die outside the state have their death recorded in the state of death. Due to confidentiality laws in many states, these records are never provided to us."
68. See "Report of the Fair Elections Foundation (II)," p. 15. This San Francisco man somehow awoke from a severe case of methadone poisoning, which left him in rigor mortis on April 1, 1982. But he stiffly registered as a Democrat on September 29, 1991, and cast his ballot via coffin in the 1994 general election.
69. Haaland and Swordstrom, "A Report on Election Law Irregularities," p. 6.
70. Ibid., p. 10. The legitimate voter was interviewed and signed an affidavit for the report's authors.
71. See "Report of the Fair Elections Foundation (II)," p. 51.
72. Ibid., p. 24.
73. This "law" is applied to the world of campaign finance in Larry J. Sabato,

- Paying for Elections: The Campaign Finance Thicket* (New York: Priority Press, 1989), pp. 19-24.
74. Texas election law permits "election officers, watchers, or any other person lawfully in the polling place" to challenge any voter's eligibility, including absence from registration rolls. Following the challenge, the voter is given the opportunity to rebut the reasons given by executing an "affidavit that states the facts necessary to support the voter's eligibility to vote." If such an affidavit is produced, the voter may proceed to vote and his or her ballot is not separated from those of unchallenged voters. If the voter refuses to execute the affidavit, he or she is simply not permitted to vote. See Tex. Elec. Code Ann. 63.010 (West, 1994).
75. See Alan Bernstein, "Thousands Voted in 1992 Sans Registration," *Houston Chronicle*, October 24, 1994, p. A1. The total voter turnout in Harris County (including the 6,707 ineligible persons) in November of 1992 was 958,234.
76. Note that 5,277 registrations had expired, and 143 were living in another county.
77. As Alan Bernstein of the *Houston Chronicle* explained it to us in a telephone interview on April 20, 1995, "The registrar's office took [the 6,707 illegal cases in Harris County] en masse to the district attorney's office, who took them to a grand jury, and the grand jury said, 'To hell with that, we have got [serious crimes] going on to worry about.'"
78. See Selwyn Crawford, "Vote Fraud Allegations are Probed; Registration of 3,000 in Tarrant Doubted," *Dallas Morning News*, May 27, 1993, p. A33.
79. Early voting is available to all voters twenty days before Election Day, although most voters must appear at a designated polling site in person. Exceptions are made for certain individuals and groups, such as the elderly; this is explained in the text following. In 1992, over 40 percent of the registered voters cast an early ballot in some of Texas's most populous counties. See Edwina Rogers, "Election Daze: Is Early Voting Coming to a State Near You?" *Campaigns and Elections* 15 (September, 1994): 36-37.
80. The signature of a witness is required on the mail-in-ballot application and the certification on the carrier envelope only if another signs for the voter, perhaps if he or she is illiterate or otherwise incapacitated. See Tex. Elec. Code Ann. § 87.041.(b)(2) (West, 1994).
81. See Kevin Moran and Bob Sablatura, "Mail-in Fraud Allegations Probed," *Houston Chronicle*, October 5, 1994, p. A1.
82. Press release, Office of the Criminal District Attorney, Galveston County, Texas, December 20, 1994, pp. 1-3.
83. For example, the campaign of U.S. Representative Craig Washington of Houston made five separate payments in February and March 1994 total-

## Notes

- ing \$22,505 to the "Acres Home Community Relations" group for an "early voting drive" (Federal Election Commission). This group has been suspected of orchestrating some of the mail-in abuses involving early voters, according to reporter Alan Bernstein of the *Houston Chronicle*, but "nobody has ever proved anything on them." (Telephone interview with Alan Bernstein, April 20, 1995.)
84. Affidavit of Edward Taylor, subscribed December 7, 1993, by R. M. Simmons, Harris County, Texas.
  85. According to Texas elections law, it is a misdemeanor to "prepare the voter's ballot in a way other than the voter directs," or "suggest by word, sign, or gesture how the voter should vote." (See Tex. Elec. Code Ann. § 64.036, [a][2-3] [West, 1994].) These stipulations apply to both the polling place and early voting by mail.
  86. Affidavits of Maria Gloria Casteneda, subscribed by Debra Ann Garza, October 27, 1992, and Jesus Casteneda, subscribed by Debra Ann Garza, October 28, 1992. Mr. and Mrs. Casteneda, who intended to vote for David Pena, were told by "helper" Federico Pilon that marking the ballot in the straight Democratic ticket oval would cast their vote for Mr. Pena. Pena was an independent candidate.
  87. Affidavit of Jesus Casteneda, subscribed by Debra Ann Garza, October 28, 1992.
  88. Affidavit of Celia Seymour, subscribed by Henry Rodriguez, December 3, 1994. Ms. Seymour interviewed Mr. Charles Scott and his son and discovered that Mr. Scott and his wife did not prepare the ballots, nor did they sign the carrier envelopes as required. Mr. Scott had signed his mail in application, and his wife placed her "mark" on the signature line, which would have been appropriate only if she were visually disabled or if a language barrier existed. The interloper, a neighbor, requested the Scotts' absentee ballots and indicated which candidate should be selected. Once the ballots were sealed in the carrier envelopes, the "helper" signed Mr. Scott's name on the envelope certification and requested that the Scotts' son sign for Mrs. Scott. The discrepancy in signatures *should* have rendered the ballots invalid.
  89. Affidavit of Curley Cheney, subscribed by Catherine A. Platz, December 17, 1994; interview with A. Glenn Diddel, April 24, 1995; the death certificate of James Cheney Jr., dated September 17, 1992; and the falsified applications for mail-in ballots for both Curley and James Chaney Jr., dated November 23, 1993, and February 17, 1994. Although the spellings of the names differ by one letter, the applications were matched to the Cheneys by address.
  90. In the past two years, sheriffs in two South Texas counties have been implicated, and other counties' officials are undergoing investigation.

## Notes

- Brigido Marmolejo, sheriff of Hidalgo County for twenty years, was prosecuted and convicted for accepting bribes from a drug dealer. (See James Pinkerton, "Bribes Cost Sheriff His Job, Respect," *Houston Chronicle*, November 13, 1994, p. 1.) In Zapata County, Judge Jose Luis Guevera, Sheriff Romeo Ramirez, and County Clerk Arnaldo Flores were either convicted of or pleaded guilty to drug related charges. Interestingly, Judge Guevera's opponent alleged vote fraud in a primary election, the results of which were overturned by a state judge. See David McLemore, "Fallout from Drug Sting Has County in Quandary; Zapata Officials Going to Prison, Who'll Lead?" *Dallas Morning News*, July 3, 1994, p. A1; also, James Pinkerton, "Trafficking and the Long Arm of the Law," *Houston Chronicle*, July 31, 1994, p. 1.
91. See David McLemore, "Start County Denies Election Irregularities," *Dallas Morning News*, August 21, 1994, p. A47. Also, telephone interviews with David McLemore, April 18, 1995; Bruce Sherbert, Dallas County election administrator, April 20, 1995; and David Pena, April 20, 1995. Pena was an unsuccessful candidate for city clerk in Start County. These kinds of fraudulent activities, it should be noted, are not limited to South Texas in the Lone Star state. See Sylvia Martinez and Frank Trejo, "Hopefuls, Backers Accused of Fraud, Document Tampering in Two Districts," *Dallas Morning News*, May 5, 1995, p. A30; and Todd J. Gillman, "Dallas JP Loser Alleges Voting Fraud," *Dallas Morning News*, May 17, 1994, p. A21. Also see the affidavit of Victor Cantu, August 25, 1992, regarding favoritism in the mailing of absentee ballots.
  92. Affidavits of Mary Ramirez, November 12, 1992; and of Sonia Garza, November 15, 1992.
  93. Political scientist Louise Overacker, in her *Money in Elections* p. 34, explained the Kentucky operation this way: "The Republican organization in Louisville, Kentucky, has worked out a novel method of payment [for votes]. In the local election of 1925 aluminum discs the size of a half dollar bearing the imprint of a bulldog were distributed to the faithful by precinct workers. These bulldog checks were then taken to a district paymaster and redeemed for \$2.00. By this plan the use of money around polling places was avoided and only a few persons were entrusted with cash."
  94. These estimates were given by veteran Kentucky journalist Al Cross of the *Courier-Journal* in an interview with the authors, June 29, 1995. Another prosecutorial source told us the usual price was "more like \$20 . . . but the highest that I heard was \$150. . . . It depends on the market and how tight the race is."
  95. The absentee ballots were either sent directly to the voters, who marked them in the presence of the broker, or were sent to the broker, who then

simply had the voter sign pre-marked ballots. Once the voters signed off, they would receive the payoff.

The Kentucky legislature had attempted to curb vote fraud by passing reform legislation in 1988 that made purchasing or selling votes a felony offense. (Rigging election machinery and electioneering within 500 feet of the polls were also severely punished.) (See Kentucky Revised Statutes, Title X, at 117.235.) The new law apparently did indeed stem fraud at the polling places, where illicit activity is easily observable, but it may simply have channeled more fraud into the relatively hidden absentee process. As a result of the recent disclosures of absentee fraud, the legislature has passed still more reforms, including two mandates directly affecting absentee voting. Now, no individual is permitted to assist more than two voters, and citizens are allowed to vote by mailed absentee ballot only if they are certifiably disabled, or living outside their county, or serving in the military. (Kentucky Revised Statutes, Title X, at 117.075.) Other people who wish to vote prior to the election day must do so *in person* at their county courthouse. (Kentucky Revised Statutes, Title X, at 117.077.)

Unlike some of the other states we have investigated, Kentucky has taken vote fraud seriously. As George Russell, executive director of the State Board of Elections commented, "I think you'll find that the Attorney General, Secretary of State, and the General Assembly are completely committed to eliminate vote fraud. Of course, that's the *present* Attorney General, Secretary of State, and General Assembly" (interview with George Russell, July 27, 1995). The state election system is well administered; statewide registration records are computerized, and voters are identified by a unique number to prevent duplicate registration. Sources differed on whether the revisions of the election code, or a more active, aggressive approach to combating electoral abuses on the part of the State Board of Elections, secretary of state, and the state attorney general have contributed to a decrease in election fraud. In any case, there was a significant decrease in the number of calls made to the attorney general's statewide vote fraud hotline in 1994 and 1995. See, for example, John Voskuhl, "Primary '95: State's Vote-Fraud Hot Line Rings Only Three Times," *Courier-Journal*, May 24, 1995, p. B5.

96. Interview with Dale Wright, July 19, 1995.
97. *Ibid.*
98. The same class and economic distinctions can explain the presence or absence of "street money" in any community.
99. A couple of our Democratic interviewees alluded to this reasoning in off-the-record comments.

103. The author of the observation is journalist Marc Mappen. See the retelling of a classic 1889 ballot-box stuffing in Hudson County in Marc Mappen, "Jersey-ana," *New York Times*, November 13, 1994, section 13, p. 17.

## NOTES TO CHAPTER 11

The quotation at the beginning of the chapter is from Merrill D. Petersen (ed.), *The Portable Thomas Jefferson* (New York: Penguin Books, 1977), p. 198. We have now come full circle. The first part of this Jefferson citation appeared in the introductory discussion of corruption.

1. As did a number of other candidates, none of whom was ever called to account by the IRS.
2. Title 26, Internal Revenue Code, Sec. 527.
3. President Nixon and high-ranking members of his administration attempted to use the Internal Revenue Service to retaliate against critics and opponents. As John Dean explained in a memo made public during his explosive testimony before the 1973 Senate Watergate hearings between June 25 and 27, the goal was to "maximize the fact of our incumbency with persons known to be active in their opposition to the administration. Stated a bit more bluntly—how we can use the available federal machinery to screw our political enemies." Grants, contracts, litigation, prosecution, and audits were possibilities Dean raised.

In addition, attempts were made to gain access to IRS information for use against "enemies." When initial attempts to gather the "dirt" failed, Nixon brought pressure to bear on both Internal Revenue Service Commissioner Johnnie Waters (who was later replaced) and Treasury Secretary George Shultz.

Another document Dean made public was the actual "priority list" of opponents (compiled by then-special White House counsel Charles Colson), which included prominent corporate executives (such as Arnold M. Picker of the United Artists Corporation), labor union officials (such as Alexander Barkan of AFL-CIO COPE and Leonard Woodcock of the UAW), Democratic congressmen (such as Ronald Dellums and John Conyers), and media figures and entertainment personalities (such as Daniel Schorr, Mary McGrory, and Paul Newman).

For a fuller account, see Bob Woodward and Carl Bernstein, *The Final Days* (New York: Simon and Schuster, 1976), p. 89; and Mercer Cross and Elder Witt (eds.), *Watergate: Chronology of a Crisis* (Washington, D.C.: Congressional Quarterly, 1975), pp. 151–53.

*A Program of Reform*

moderate measures such as the ones we suggest are not possible or successful, the more drastic remedies may have to be tried in some form.<sup>18</sup>

Legal niceties are not likely to temper all boiler-room telephone operations, so it would be helpful if each major state and local news organization established and publicized a toll-free "campaign corruption hotline" telephone number for citizens to use during the final month of election campaigns. It is far easier to piece together the story of corrupt practices while the phones are still warm than after Election Day, when the boiler-rooms have been dismantled. As we will discuss shortly, these hotlines can do double-duty, allowing citizens to report their suspicions of voter fraud as well.

**Vote Fraud**

Philadelphia, Alabama, California, and Texas make it obvious that the solutions required for voter fraud must necessarily be adapted to each locality's culture and practice. But one imperative unites all the cases: while registration and voting should be as easy as possible, the process ought also to be as fraud-proof as possible.

With the enactment of the federal "motor-voter" law in May 1993, ease of registration was guaranteed.<sup>19</sup> The major provisions of the legislation required states to permit people to register when applying for a driver's license or using other governmental offices that provide public assistance.<sup>20</sup> Few would argue with the intent of this aggressive approach to increasing America's abysmally low levels of registration and voter turnout.

However, some aspects of the motor-voter law also augment the potential for fraud. Registration by mail is mandated for every state; thus, the safeguards that can be present during in-person registration (such as the showing of picture identification cards) are removed. Workers at governmental offices are forbidden from challenging any registrant, even if they have good reason to suspect an individual is ineligible to vote. Under the motor-voter law, it has become more difficult to keep the voting rolls clean of "deadwood" voters who have moved or died, making fraudulent voting easier and therefore more tempting for those so inclined.<sup>21</sup> A "fail-safe"

provision in the law also permits voters who have moved within the same county and congressional district to vote at either their old or new address—potentially inviting “extra-diligent” citizens (or their unknown substitutes) to cast a ballot at both locations.<sup>22</sup>

Motor-voter is not the only new wrinkle in the election process that could complicate the system’s integrity. In its December 1995 party primaries and January 1996 special election for the U.S. Senate held to fill the unexpired term of the disgraced Robert Packwood, Oregon became the first state to hold a congressional contest entirely by mail. Ballots were mailed to registered voters about three weeks before both the primaries and general election, with citizens able to return them by mail or drop them off at designated sites in each locality up until the technical “election day.” Officials went to considerable lengths to prevent fraud, including checking every single ballot signature against the registration card original. A progressive state with a history of clean elections, Oregon was not a likely site for voting irregularities in any event. But it is easy to imagine the potential for electoral mischief in states with less squeaky-clean traditions or careful procedures. Mail-in-balloting—which by definition includes everyone on the registration rolls, rather than the fraction voting by mail absentee in regular elections—exponentially increases the chances for fraud.

Add these ingredients to the already boiling pot of fraud in parts of America, and the cooling balm of reform becomes absolutely essential. So what can reasonably be done to minimize, if not eliminate, voter fraud? No system is absolutely foolproof, but one long-term solution made possible by advanced technology stands out from all others: the use of thumbprint scanners to record and identify each voter.<sup>23</sup> At the time of registration, an individual’s thumbprint—unique to every human being—could be scanned by this reliable machine (which is already used at motor vehicle offices in some states). If registration is being done by mail, a print-sensitive adhesive square (covered by a thin removable plastic sheet) can be affixed to the form for the same purpose. The print information would be digitized and stored statewide, and transferred regularly to each locality so that registered citizens can be instantaneously scanned and cleared to vote at their precinct on Election Day. The same thumbprint technology can also make safe the absentee and

early-voting/mail-in ballot process; in addition to the identification requirements, every absentee ballot should be sealed with a thumbprint for secure counting.

Obviously, before this high-tech investment in the scanner hardware and software to convert from the current system will be a costly election in a democracy is a stoppage of the polling place ought to be the goal every

Until that objective is reached, other methods ought to be produced by each voter at the polling place. IDs can certainly be manufactured, but it would cost too much money to do so by any organization attempting to prevent a number of fraudulent votes. Second, voter registration to give a number unique to each voter, a driver’s license number—the voter list provided each precinct’s voters should have to sign his name on the voter list, and the signature can be compared to the one on the voter list to see if they match up.<sup>25</sup> This comparison is only in the event the results of a close election are in doubt, though again, the computer technology for comparing signatures (by electronically scrolling, side by side, the poll signature against the voter signature).<sup>26</sup> Finally, all potential voters at the polls, whether orally by an elections official or in writing, should state, of the eligibility requirements for fraudulent voting.<sup>27</sup> (A similar voter list should be featured on all absentee and early-voting ballots. These four overlapping safeguards are not new, but they would go a long way toward reducing fraud at the precinct stations on Election Day.)

Many other commonsense remedies can be used to neutralize voter fraud, all of which should be used. No early-voting/mail-in and absentee ballots should be counted until they have been carefully checked against the registration information. The envelope containing the marked absentee ballot should be sealed with a thumbprint.

## REMEDIES

permits voters who have moved within the electoral district to vote at either their old or new address by writing "extra-diligent" citizens for their ballot at both locations.<sup>22</sup>

A new wrinkle in the election process is the need to protect the system's integrity. In its December 1995 special election for the U.S. Senate term of the disgraced Robert Packwood, Oregon was the first state to hold a congressional contest by mail to registered voters about three weeks before the primary and general election, with citizens dropping them off at designated sites in the weeks leading up to the official "election day." Officials went to great lengths to prevent fraud, including checking every signature against the registration card original. A progressive step for Oregon elections. Oregon was not a likely candidate for any event. But it is easy to imagine the same process in states with less squeaky-clean traditions.

Mail-in-balloting—which by definition is a change in the registration rolls, rather than the way in which they are used in regular elections—exponentially

increases the already boiling pot of fraud in parts of the country. The implementation of reform becomes absolutely essential to be done to minimize, if not eliminate, the risk. It is absolutely foolproof, but one that is made possible by advanced technology stands in the way. The use of thumbprint scanners to record and verify signatures at the time of registration, an individual's signature—being done by mail, a print-sensitive sheet (thin removable plastic sheet) can be used for the purpose. The print information can be scanned statewide, and transferred regularly to a central database. Registered citizens can be instantaneously verified against their precinct on Election Day. The process can also make safe the absentee and

*A Program of Reform*

early-voting/mail-in ballot process; in addition to current certification requirements, every absentee and early-voting/mail-in ballot should be sealed with a thumb imprint that can be scanned before counting.

Obviously, before this high-tech vision comes to pass, financial investment in the scanner hardware and a lengthy transition period to convert from the current system will be required. But since the most costly election in a democracy is a stolen one, the scanner-secured polling place ought to be the goal everywhere.

Until that objective is reached, other measures should be instituted. At the very least, a photo identification card (of any sort) ought to be produced by each voter at the polls. While phony photo IDs can certainly be manufactured, it takes time, trouble, and money to do so by any organization attempting to generate a sizable number of fraudulent votes. Second, voters should also be asked at registration to give a number unique to them—a social security number, a driver's license number—that can be prerecorded on the voter list provided each precinct's workers.<sup>24</sup> Third, every voter should have to sign his name on the voting roll at the polls, so that the signature can be compared to the one on the registration form to see if they match up.<sup>25</sup> This comparison would probably be made only in the event the results of a close election were challenged (although again, the computer technology already exists for instantaneously scrolling, side by side, the poll signature and the registration signature).<sup>26</sup> Finally, all potential voters ought to be advised at the polls, whether orally by an elections official or by means of a printed statement, of the eligibility requirements for voting and the penalties for fraudulent voting.<sup>27</sup> (A similar warning should be prominently featured on all absentee and early-voting/mail-in ballots.) These four overlapping safeguards are not too burdensome for voters or pollworkers, but they would go a long way toward discouraging fraud at the precinct stations on Election Day.

Many other commonsense remedies are also available to help neutralize voter fraud, all of which should be universally employed. No early-voting/mail-in and absentee ballot should ever be separated from its cover sheet and counted until the voter's signature has been carefully checked against the registration file signature. Every envelope containing the marked absentee or early-voting/mail-in

## REMEDIES

ballot should also be signed by an adult witness whose address should also be listed. (Ideally, these ballots would be notarized, but this involves too much trouble and expense.) And full signatures ought to be written; the Texas "mark" is clearly unacceptable. Also, the number of absentee ballots mailed to a single address should not exceed the number of voters registered at that address. It might also be a good idea to require that an absentee ballot be mailed to the voter's official registration address and no other, unless the voter swears that he will be absent from his locality for the entire duration of the absentee voting period. Every state should have a meticulously maintained, centralized list of registered voters that is frequently purged of duplicate registrations, the deceased, those who have moved out of the district and out of the state, felons, and legal or illegal aliens. (The vital statistics offices, corrections departments, post offices, and other appropriate government agencies should provide this information to each state's elections board at least twice a year.) If, as in Texas, voters are permitted to vote without record of registration—a dubious practice—then at least the ballots ought to be cast provisionally, segregated from the clearly legal ones until their status can be determined. Election laws should always provide stiff penalties for candidates or campaign workers who remain present while a voter casts an absentee ballot. While the outright banning of paid voter registration solicitors is constitutionally untenable, states can eliminate per-person payments to these bounty hunters (thus taking away some of the incentive to register ineligible individuals and animals). States also can and should require regular disclosure filings by all such solicitation groups; the disclosures might include the names and addresses of both the persons employed and the individuals registered. Lastly, the ballots need to be counted in the full view of all interested parties, then professionally secured, sealed, and stored. And any precinct showing a substantial discrepancy between the voter sign-up total and the actual tally of ballots needs to be visited within a day of the election by supervisory officials. Surely, all this is not too much to ask as we prepare to enter the twenty-first century.

These regulations, even if followed to the letter, will be insufficient if (1) registrars and elections offices are not staffed and funded adequately; (2) the statutes do not punish fraud severely—major felonies are required, not minor misdemeanors; (3) law enforcement

## *A Program of*

authorities do not make voter fraudulent legal penalties against the statutes; and (4) the news media do not voter fraud—a probable prerequisite step would be for every news organization a "campaign corruption hotline," meet the media's exposing push-polling.

We believe that these reforms will be corrupt practices that have been our book. But we have more fundamental operation of the country's political and the targeted remedies do not address must necessarily be greater than the reforms.

This is usually the point at which idealistic idealists call for the creation of United States, or rigid term limits for year terms for the House of Representatives of congressional elections. But in our view (for now) impractical pipe dreams, unparliamentary system's unitary executive centuries of American tradition, and the elite movement to undertake such a dramatic many good arguments against legislation swayed by their proponents, including that limits on legislative tenure bring staffers, bureaucrats, and the executive terms for the House, with elections coincident, eliminate useful midterm court. And while we favor certain forms of political mailings for congressional challengers, political contributions, there is enormous the electorate to initiating full taxpayer campaigns in an era of large budget mental services.

We prefer more realistic macro-remedies the next section.

By an adult witness whose address these ballots would be notarized, but (2) the cost of the process (time and expense.) And full signatures, "mark" is clearly unacceptable. Also, ballots mailed to a single address should not be registered at that address. It might also be an absentee ballot be mailed to the press and no other, unless the voter is in his locality for the entire duration. Every state should have a meticulous list of registered voters that is free of registrations, the deceased, those who have moved out of the state, felons, and legal disabilities. State offices, corrections departments, and other government agencies should provide the state's elections board at least twice a year—permitted to vote without record of a felony—then at least the ballots ought to be kept from the clearly legal ones until the election. Election laws should always provide for campaign workers who remain present on absentee ballot. While the outright use of money solicitors is constitutionally unacceptable, person-to-person payments to these bounty hunters of the incentive to register ineligible voters also can and should require registration of solicitation groups; the disclosures of addresses of both the persons employed and the interested parties, then professionally run precinct showing a substantial margin of margin-up total and the actual tally of a day of the election by supervisory staff. (1) law enforcement, if allowed to the letter, will be insufficient. (2) law enforcement offices are not staffed and funded to punish fraud severely—major misdemeanors; (3) law enforcement

authorities do not make voter fraud a priority and press for substantial legal penalties against those found violating the fraud statutes; and (4) the news media do not begin to look for evidence of voter fraud—a probable prerequisite to their finding it. A good first step would be for every news organization to establish and publicize a "campaign corruption hotline," mentioned earlier in the context of the media's exposing push-polling.

We believe that these reforms will help to counteract the individual corrupt practices that have been our focus in the chapters of this book. But we have more fundamental concerns about the current operation of the country's political and governmental system that the targeted remedies do not address. The big-picture reform plan must necessarily be greater than the sum of the specific targeted reforms.

This is usually the point at which our fellow academic or journalistic idealists call for the creation of a parliamentary system in the United States, or rigid term limits for all elected officials, or four-year terms for the House of Representatives, or full public financing of congressional elections. But in our view, these solutions are either (for now) impractical pipe dreams, unwise alternatives, or both. The parliamentary system's unitary executive-legislature is alien to two centuries of American tradition, and there is no serious popular or elite movement to undertake such a drastic change. In our opinion, many good arguments against legislative term limits remain unanswered by their proponents, including the inevitable power shifts that limits on legislative tenure bring to lobbyists, experienced staffers, bureaucrats, and the executive branch generally. Four-year terms for the House, with elections coinciding with the one for president, eliminate useful midterm course corrections by the voters. And while we favor certain forms of public financing, such as free mailings for congressional challengers and tax credits for small political contributions, there is enormous opposition in Congress and the electorate to initiating full taxpayer funding of House and Senate campaigns in an era of large budget deficits and cuts in governmental services.

We prefer more realistic macro-remedies that will be explained in the next section.

lenge to Just's Victory to Proceed," *Bergen Record*, January 22, 1994, p. A4.

### NOTES TO CHAPTER 11

The quotation at the beginning of the chapter is from Merrill D. Peterson (ed.), *The Portable Thomas Jefferson* (New York: Penguin Books, 1977), p. 198. We have now come full circle. The first part of this Jefferson citation appeared in the introductory discussion of corruption.

- 1. As did a number of other candidates, none of whom was ever called to account by the IRS.
- 2. Title 26, Internal Revenue Code, Sec. 527.
- 3. President Nixon and high-ranking members of his administration attempted to use the Internal Revenue Service to retaliate against critics and opponents. As John Dean explained in a memo made public during his explosive testimony before the 1973 Senate Watergate hearings between June 25 and 27, the goal was to "maximize the fact of our incumbency with persons known to be active in their opposition to the administration. Stated a bit more bluntly—how we can use the available federal machinery to screw our political enemies." Grants, contracts, litigation, prosecution, and audits were possibilities Dean raised.

In addition, attempts were made to gain access to IRS information for use against "enemies." When initial attempts to gather the "dirt" failed, Nixon brought pressure to bear on both Internal Revenue Service Commissioner Johnnie Waters (who was later replaced) and Treasury Secretary George Shultz.

Another document Dean made public was the actual "priority list" of opponents (compiled by then-special White House counsel Charles Colson), which included prominent corporate executives (such as Arnold M. Picker of the United Artists Corporation), labor union officials (such as Alexander Barkin of AFL-CIO COPE and Leonard Woodcock of the UAW), Democratic congressmen (such as Ronald Dellums and John Conyers), and media figures and entertainment personalities (such as Daniel Schorr, Mary McGrovy, and Paul Newman).

For a fuller account, see Bob Woodward and Carl Bernstein, *The Final Days* (New York: Simon and Schuster, 1976), p. 89; and Mercer Cross and Elder Witt (eds.), *Watergate: Chronology of a Crisis* (Washington, D.C.: Congressional Quarterly, 1975), pp. 151-53.

### Notes

4. All those who study the tenets of party-responsible government inevitably return to the landmark report of the Committee on Political Parties of the American Political Science Association (APSA), *Toward a More Responsible Two-Party System* (New York: Rinehart, 1950). Essentially, this APSA Committee urged the parties to be more issue-oriented by offering the voters clear policy choices at election time, then following up once in power to see that these policies were enacted.
5. See "No More Cash in New Jersey," *Political Finance and Lobby Reporter* 15 (February 9, 1994): 8. See also Bruno Tedeschi, "Pascarella Paid Out \$14,360 in Street Money, by Check," *Bergen Record*, June 1, 1994, p. C1. This latter story reports that the new check requirement worked well in its first test. See also the well-written New Jersey statute, C.19:44A-11.
6. Lists of subcontractors should be appended to all campaign finance disclosure filings sent to the appropriate federal and/or state election commissions as currently scheduled.
7. 18 USC § 597.
8. In addition to our own examination of this issue, a 1982 study convincingly demonstrated the political utility of the frank. See Albert D. Cover and Bruce S. Brumberg, "Baby Books and Ballots: The Impact of Congressional Mail on Constituent Opinion," *American Political Science Review* 76 (June 1982): p. 347.
9. While Republicans limited mailings in the ninety days before an election and trimmed the budget somewhat, we do not count these reforms as the major surgery that is required.
10. We believe the major party candidate should be entitled to one or two mass mailings for the general election, and only independent candidates who received (or whose party received) at least 10 percent of the vote in at least one of the previous three general elections should be eligible for the same privilege.
11. Former Senator Howard Cannon (Democrat of Nevada) and Representative William Clay (Democrat of Missouri) were both the subject of private civil suits alleging misuse of staff. Clay lost the suit, Cannon won.
12. Interview with Thomas Guterbock, director of the University of Virginia Survey Research Center, February 10, 1995. The National Council on Public Polls issued a statement in May 1995 calling push-polling "thoroughly unethical." See "Beware of Push-Polls," Press Release of the National Council, May 22, 1995.
13. Many respondents hang up before a survey is completed. Pollsters should not be required to recontact them to reveal sponsorship.
14. Pollsters should *not* be required to ask all respondents whether they would like a copy of the questions. This must be initiated and volunteered by the respondent.
15. The Supreme Court ruled in an anonymous political pamphlet that mandatory disclosure was a close reading of the justices' opinions indicates that it is unlikely that beyond this narrow exception for ads, radio spots, and—one we suspect would all probably pass the *Elections Commission*, 61 LW 4.
16. Respondents who request sponsoring the interview can be told it.
17. Two members of Congress, U.S. Representative (Republican of Wisconsin) and California Senator are among those urging strong disclosure, while Petri wants questionnaires, filed with the F.
18. In addition to the general remedy there may be two specific legal claims. In 1994, Congress enacted the Telephone Consumer Protection Act (P.L. 103-198) which prohibited in 1994 USCAAN §108 S. 108. It limits commercial telemarketers to enact rules that require consent that telemarketers may not make phone calls that are abusive of such consumer's right to privacy during hours of the day and night when they are not at home to consumers" (sec. 3(a)(3)(A)-(B)). These provisions apply to push-polling, and they do not significantly affect strict candidates' ability to disseminate information. They prevent the worst abuses, such as chapter 9.

Moreover, some affected candidates may have a tort legal claim of defamation against the telephoner (if the telephoner is identified). In order to succeed in a claim for defamation against the maker of the statement, the party must prove that the statement is false and is defamatory. (*Prosser & Keeton*, Minn.: West Publishing, 1984), pp. 10-11. For action for slander (verbal statements), actual damage

15. The Supreme Court ruled in a recent Ohio case on April 19, 1995, that anonymous political pamphleteering was protected free speech, and that mandatory disclosure was a violation of the First Amendment. But a close reading of the justices' varying opinions in this fractious 5-4 ruling indicates that it is unlikely that the anonymity privilege will be expanded beyond this narrow exception. Required sponsorship disclosure for TV ads, radio spots, and—one would presume—telephone persuasion messages would all probably pass constitutional muster. See *McIntyre v. Ohio Election Commission*, 61 LW 4279.
16. Respondents who request sponsorship information at the start of or during the interview can be told it will be revealed at the end.
17. Two members of Congress, U.S. Representatives Thomas E. Petri (Republican of Wisconsin) and Carolyn Maloney (Democrat of New York), are among those urging strong action. Maloney favors pollster sponsorship disclosure, while Petri wants political poll information, including the questionnaires, filed with the FEC.
18. In addition to the general remedies for push-polling that we discuss here, there may be two specific legal remedies that can be applied. First, in 1994, Congress enacted the Telemarketing and Consumer Fraud and Abuse Prevention Act (P.L. 103-297, 103d Cong., 2d Sess., 1994, published in 1994 USCAAN [108 Stat.] 1545 [1994]). Designed primarily to limit commercial telemarketers, the law instructs the Federal Trade Commission to enact rules that include, among other things, "a requirement that telemarketers may not undertake a pattern of unsolicited telephone calls that the reasonable consumer would consider coercive or abusive of such consumer's right to privacy," and "restrictions on the hours of the day and night when unsolicited telephone calls can be made to consumers" (sec. 3(a)(3)(A)-(B)). These restrictions presumably would apply to push-polling, and they ought to be upheld by the court because they do not significantly affect the content of the polling, or unduly restrict candidates' ability to disseminate their message. Such rules should prevent the worst abuses, such as the midnight phone calls discussed in chapter 9.

Moreover, some affected candidates may be able to pursue a successful tort legal claim of defamation against push-poll telemarketers (assuming the telephoned are identified). In order to establish any private tort claim for defamation against the maker of a statement, the allegedly defamed party must prove that the statement has been disseminated to a third party and is defamatory (*Prosser and Keeton on Torts*, 5th ed. [St. Paul, Minn.: West Publishing, 1984], pp. 797-802.) In order to establish a cause for action for slander (verbal statements, as opposed to libel, involving written statements), actual damages must be proven, except in the case of

### Notes

a few narrow classes of cases. Among those exceptions, however, are statements "affecting the plaintiff in his business, trade, profession, office or calling."

Under the standard of *New York Times v. Sullivan* (376 U.S. 254 [1964]), any defamatory statements made about public officials relating to their conduct in office must be made with "actual malice" for there to be any knowledge of its falsity or reckless disregard in determining its truth; as "actual malice" has been applied in the case law, it has proved an exceedingly difficult threshold to cross. For political candidates, the courts seem willing to find a valid claim for defamation in only the most egregious cases and would require outright lies, and not simply innuendo or twisting or misrepresentation of the facts.

19. The act was officially termed the "National Voter Registration Act of 1993" (Public Law 103-31, 103d Cong., 1st sess., May 20, 1993). See Richard Sammon, "Senate Kills Filibuster Threat, Clears 'Motor-Voter' Bill," *Congressional Quarterly Weekly* 51 (May 15, 1993): 1221.
20. Besides the motor vehicle agencies, these offices include those providing food stamps, Aid to Families with Dependent Children (AFDC), the Women, Infants, and Children (WIC) food program, disabilities assistance, armed forces recruitment, and the like.
21. Under the provisions of the motor-voter law, states are prohibited from purging eligible voters from the registration rolls for federal elections because of the person's failure to vote (P.L. 103-31 § 8[b]2). Thus, the primary tool traditionally used by registrars to remove "deadwood" voters has been stripped away for federal elections. This is in spite of recent research indicating that the antipurging provisions of the motor-voter law may be among the least useful in increasing voter registration. See Stephen Knack, "Does 'Motor-Voter' Work? Evidence from State-Level Data," *Journal of Politics*, 57 (August 1995): 796-811 at 804-5.

States may remove deceased registrants (§ 8 [a]3[B]), as well as those ineligible under state law because of criminal conviction or mental incapacity (§ 8 [a]3[B]). Voters may also be removed at their own request.

However, in order to remove voters who have moved from the jurisdiction, registration officials now must follow an exceedingly complicated notice procedure. After receiving changes of address information from the post office, the registrar must send the voter by forwardable mail a notice including a postage prepaid, preaddressed return card for the voter to confirm his new address. (If the voter has moved out of the jurisdiction, he must be told how to remain eligible). Any voter not returning the card still must be permitted to vote at either his past or present address (upon discretion of state officials) provided he makes an oral or written verification of his new address (8 [a]). Voters who have moved from the registration area may only be stricken from the rolls if they (1) confirm

their new address in writing, (2) their new address and fail to vote at elections. In the latter case, up from the time of a voter's relocation.

As one commentator notes, caused acrimony and confusion in Louisiana, Michigan, Mississippi were sued by the Justice Department for non-compliance with the act. All states eventually agreed to comply with the act. All states eventually agreed to comply with the act. All states eventually agreed to comply with the act. All states eventually agreed to comply with the act.

In California, Governor Pataki's agencies from complying with the act. Government agreed to put up the cost \$1 million per year in one year. Looming as State Snubs 'Motor-Voter' Member 4, 1995, p. A1; and Gary Klintworth, "Million a Year," *Sacramento Bee* (March 4, 1995): 1. Pennsylvania fought harder than Pennsylvania because the states—ultimately voter registration. Federal court found this argument on March 30, 1995-3055 [E.D. Pa., March 30, 1995]. Claim, *Motor-Voter Law* (April 10, 1995, p. 3).

Meanwhile, Pennsylvania's federal law caused conflict in early 1995 of purging state law by refusing to purge 60,000 Back as Voters p. B1, and Bob Laylo, "Federal Rolls," *Allentown Morning Call* (March 10, 1995): 1. continues, because as of May 1995 motor-voter provisions for federal nonfederal elections. Thus a voter who moves from one state to another but remain eligible for federal elections but remain eligible for state elections. Byzantine consequences are in mind with the motor-voter act.

ho have moved from the  
 follow an exceedingly com-  
 mages of address information  
 re voter by forwardable mail  
 dressed return card for the  
 has moved out of the jurisd-  
 ion). Any voter not returning  
 his past or present address  
 or makes an oral or written  
 who have moved from the  
 the rolls if they (1) confirm

their new address in writing via the reply card, or (2) they do not confirm their new address and fail to appear to vote for two federal general elections. In the latter case, approximately four to five years could elapse from the time of a voter's relocation to the removal of his or her name.

As one commentator noted, "The provisions of the federal law have caused acrimony and confusion in many states. Six states—California, Louisiana, Michigan, Mississippi, Pennsylvania, and South Carolina—were sued by the Justice Department and voter-advocacy groups to force compliance with the act. All of these states had failed to pass corrective legislation to bring their voting regulations into compliance with the federal law." (See Ann Scott Tyson, "Illinois Court Drives Motor-Voter Debate," *Christian Science Monitor*, May 8, 1995, p. 3.) Federal judges in several states sided with the federal government, and all of the renegade states eventually agreed to comply.

In California, Governor Pete Wilson issued an order forbidding state agencies from complying with the act's provisions until the federal government agreed to put up the money to pay for the changes, estimated to cost \$1 million per year in one county alone. (See Brad Hayward, "Battle Looming as State Snubs 'Motor-Voter' Law," *Sacramento Bee*, December 4, 1995, p. A1; and Gary Pitzer, "Voter Law Could Cost County \$1 Million a Year," *Sacramento Bee*, November 117, 1994, p. N1.) None fought harder than Pennsylvania, which claimed that the act was unconstitutional because the states—and not Congress—have the power to regulate voter registration. Federal Judge Ronald L. Buckwalter rejected this argument on March 30, 1995, becoming the third federal judge to find the act constitutional. (See *U.S. v. Pennsylvania*, PICS Case No. 95-3055 [E.D. Pa., March 30, 1995]; "Pennsylvania Loses Constitutional Claim, Motor-Voter Law Held Valid," *Pennsylvania Law Weekly*, April 10, 1995, p. 3.)

Meanwhile, Pennsylvania's failure to conform its voting regulations to federal law caused conflict for county registrars, who were left with the option in early 1995 of purging voters in violation of federal law, or violating state law by refusing to purge (see Frank Devlin, "Candidates Want 100,000 Back as Voters," *Allentown Morning Call*, May 10, 1995, p. B1, and Bob Laylo, "Federal Law Keeps 2,300 Non-Voters on Carbon Rolls," *Allentown Morning Call*, April 14, 1995, p. B.3). The confusion continues, because as of May 1995 Pennsylvania had complied with the motor-voter provisions for federal elections but retained the old rules for nontederal elections. Thus a voter could be purged for state and local elections but remain eligible to vote in federal races. These potentially Byzantine consequences are hardly what congressional drafters had in mind with the motor-voter act.

22 See "Report of the 1995 Elections Summit," April 1995, p. 40, also 38-41.

Notes

23. See "Report of the 1995 Elections Summit," p. 14. See also Doug Haaland and Doug Swordstrom, "A Report on Election Law Irregularities: California 16th Senate District," personally published report, January 27, 1995, p. 11.

Fingerprint scanning technology has advanced quickly since the 1980s and has become available for a wide range of relatively inexpensive identification and fraud prevention applications. The scanners rely upon sophisticated laser scanners (such as supermarket barcode scanners) and computer databases and can be more accurate than ink and paper prints (which can smudge) and the human eye. Some government agencies at the federal, state, and local level already use fingerprint scanners, and others have conversion plans in the works. Scanners have obvious applications in the field of law enforcement and are being implemented at all levels of government as a means of positively identifying suspects or inmates. The Federal Bureau of Investigation is in the process of creating a central fingerprint database, which would vastly reduce the time required to find print matches. Some state and municipal departments have already converted to the new fingerprinting technology, as in California, including San Diego and Los Angeles. (See Ronald J. Ostrow, "FBI Nabs New Technology for Fingerprint System," *Los Angeles Times*, April 3, 1995, p. A1; and J. Harry Jones, "Now Its Harder to Hide: Computer Net Checks Prints at the Touch of a Key," *San Diego Union-Tribune*, February 1, 1994, p. B1.) California also uses a fingerprint scanning system to verify identity for drivers' licenses. The Secret Service has recommended a similar system to prevent fraudulent use of the experimental welfare debit card. (See Associated Press, "Crooks Devise Ways to Defraud Welfare Debit-Card System," *Rocky Mountain News*, January 11, 1995, p. A41.) Others are experimenting with this technology for use with credit or debit cards and automatic teller machines.

Interestingly, Mexico has implemented a sophisticated fraud prevention program to enhance the legitimacy of its electoral system. One of the safeguards was a laminated identity card sealed with a hologram, computer bar code, and thumbprint. (See Mark Fineman, "Anxious Mexicans Await Day of the Vote," *Los Angeles Times*, August 21, 1994, p. A1.)

Conceivably, costs could be minimized through developing a multiple application system in conjunction with motor-voter provisions requiring registration at welfare offices and motor vehicle departments. A single system could establish a rate fingerprint file for entitlement eligibility, vehicle registration, or registration to vote (as long as separate databases were established).

24. A recent federal case may prevent the use of voters' social security numbers. To comply with *Gredlinger v. Davis*, (988 F.2d 1344 [4th Cir. 1993]),

it would not be lawful to display numbers except to prevent voting would make the proposition in Virginia, where social security numbers.

25. Those unable to sign their name, should be required to sign with that witnessed and attested in conjunction with a request should not create a significant barrier.

26. Haaland and Swordstrom, p. 11. This technology, known as a computer pad and pen to recognize handwriting for identification. A variety of reasons for not using recognition is a generally recognized barrier. Betsy Pisk, "Smart Card" Consumers," *Washington Times*

This technology "captures" a signature on a computer pad, and converts it into a digital format for storage in a computer database. One application already used is the familiar "Smart Card" record their signature on a card, which is currently available for retail sale, such as booksellers Barnes & Noble, Computers & Auto (1994, p. A4.)

27. Haaland and Swordstrom, p. 16. Although this mechanism, "ballot security" programs, are designed to distinguish this process from coercion potential voters, identification documents, and would disclose the land (and are to be in violation of § 7 [a][6][a]). While offering notice would not cause the land notification would be delayed, neutral polling zone. While elections officials could be in violation of public nature of the forum, officials do not need to open notification could be careful

 ber (2d 1344 [4th Cir. 1993]).

it would not be lawful to distribute any list containing voters' social secu-  
 rity numbers except to precinct workers and elections officials. This rul-  
 ing would make the proposal above difficult to enact in a state such as  
 Virginia, where social security numbers are in fact used as drivers' license  
 numbers.

25. Those unable to sign their names, for reasons of illiteracy or physical in-  
 ability, should be required to give their mark, so that it can be compared  
 with that witnessed and attested on their registration form. When done  
 in conjunction with a requirement to show a photo identification, this  
 should not create a significant potential for fraud.

26. Haaland and Swordstrom, "A Report on Election Law Irregularities,"  
 p. 11. This technology, known as signature recognition, utilizes a com-  
 puter pad and pen to recognize the size, pressure, and direction of a sig-  
 nature for identification. Although any one individual's signature may  
 vary for a number of reasons, such as natural change over time, signature  
 recognition is a generally reliable means of determining authenticity. (See  
 Betty Pisk, "'Smart Card' Security: High-Tech ID System for Future  
 Consumers," *Washington Times*, April 16, 1995, p. A11.)

This technology "captures" the user's signature on the pressure-sensi-  
 tive pad, and converts it into a graphic file that can easily be stored in a  
 computer database. One application for which signature recognition is al-  
 ready used is the familiar UPS clipboard, on which package recipients  
 record their signature on a small pressure-sensitive pad. A similar system  
 is currently available for retail merchants and has been used by companies  
 such as booksellers Barnes & Noble. (See Lisa A. Spiegelman, "Executive  
 Update, Computers & Automation," *Investor's Business Daily*, August 10,  
 1994, p. A4.)

27. Haaland and Swordstrom, "A Report on Election Law Irregularities,"  
 p. 16. Although this mechanism has been used in the past by Republican  
 "ballot security" programs, it is necessary to note several crucial differ-  
 ences that distinguish this proposal from knowing attempts to intimidate  
 or coerce potential voters. First, the statement would appear on official  
 documents, and would disclose requirements which are, after all, the law  
 of the land (and are to be provided with mail registration forms as per  
 § 7 [a][6][a]). While offering a disincentive to fraudulent voters, such a no-  
 tice would not cause the law-abiding citizen concern. Second, any oral  
 notification would be delivered by officials of the election board in the  
 neutral polling zone. While we are aware that, in extreme cases, even  
 elections officials could be implicated in attempts to intimidate voters, the  
 public nature of the forum would prevent most mischief (and crooked of-  
 ficials do not need to openly intimidate voters in any case). Further, oral  
 notification could be carefully monitored in areas with poor civil rights or

## Notes

- voting rights records, to prevent discrimination against minority groups. Finally, it would eliminate the ostensible justification for ballot security programs intentionally aimed at decreasing minority group turnout, and would expose the less savory goals actually behind such programs.
28. Under § 8 (c)(B) of the motor-voter act, names can be removed from the registration list on the basis of death (§ 8 [a][4][A]), or criminal conviction or mental incapacity (§ 8 [a][3][B]). Removal of duplicate registration would probably be allowed by § 8 (c)(B)(ii), which permits "correction of registration records pursuant to this act." However, it would be necessary to show a convincing, clear indication of duplication, such as the use of a number unique to the registrant, as suggested above.  
Changes of address fall under the complicated procedures of § 8 (d)-(e), and anyone moving within the jurisdiction must have his or her address corrected automatically by the registrar. Any regular effort to purge must be ninety days before the federal election (primary or general) (§ 8 [c][2][A]). Aliens are a different matter entirely. Potential registrants are to be notified of citizenship requirements and attest that they fulfill all obligations, under the penalty of perjury (§ 7 [a][6][A]), but the information gathered for voter registration purposes *must not* be used for other purposes. Therefore, if the registrar discovers the person is registered illegally because he or she fails to meet citizenship requirements, the registrar cannot forward this information to other agencies for which citizenship is a concern (such as Immigration and Naturalization, Aid to Families with Dependent Children, or Women, Infants, and Children).

40. Kenneth A. Gross, "The Enforcement of Campaign Finance Rules: A System in Search of Reform," *Yale Law & Policy Review* 9 (1991): 279.
41. Frank Sorauf, one of the most astute students of campaign finance, has raised the possibility that "voluntary funding of campaigns for public office is intrinsically committed to the support of incumbents and likely winners." Frank J. Sorauf, "Competition, Contributions, and Money in 1992," in James A. Thurber and Candice J. Nelson (eds.), *Campaigns And Elections: American Style* (Boulder, Colo.: Westview Press, 1995), p. 81.
42. For a cogent review of the literature, see Frank Sorauf, *Inside Campaign Finance: Myths and Realities* (New Haven, Conn.: Yale University Press, 1992), pp. 215-16. There is an increasing number of dissenters to this view. For instance, Christopher Kenny and Michael McBurnett argue that those who say that the level of incumbent spending has no effect neglect the interrelationship of challenger and incumbent spending in producing the outcome of the election. Incumbent spending is at least partially a function of challenger spending, that is, when challengers spend more, incumbents respond to the increased competition with greater outlays. When this interrelationship is taken into account, both challenger and incumbent spending levels affect the outcomes of the races. Kenny and McBurnett provide empirical evidence to show the effect is statistically significant. (See Kenny and McBurnett, "An Individual Level Multiequation Model of Expenditure Effects in Contested House Elections," *American Political Science Review* 88 (September 1994): 699-707)
43. See "Campaign Finance Reform: A Report to the Majority Leader and Minority Leader, United States Senate, by the Campaign Finance Reform Panel," March 6, 1990, p. 41. Coauthor Sabato was one of the panel's six members, appointed by then Senate Majority Leader George Mitchell (Democrat of Maine) and then Senate Minority Leader Robert Dole (Republican of Kansas)
44. *Buckley v. Valeo*, 424 U.S. 1 (1976).
45. See Larry J. Sabato, *Paying for Elections: The Campaign Finance Thicket* (New York: Twentieth Century Fund/Priority Press, 1989), esp. pp. 25-42, 61-64. For example, disclosure laws do not currently cover contributions to foundations that presidential candidates sometimes form. These foundations often pay for pre-campaign travel, and openly promote their candidate-creator.
46. The Campaign Finance Reform Panel mentioned above endorsed the free broadcast time proposal in *ibid.*, pp. 25-42.
47. Remarks delivered at the Nieman Foundation, Harvard University, May 5, 1995, p. 7. Hundt has proposed making these new frequencies

Notes

available under two government-imposed restrictions: (1) some broadcast time must be devoted to educational programming for children, and (2) free broadcast time must be given to political candidates and parties. See also Max Frankel, "Airfill," *New York Times Magazine*, June 4, 1995, p. 26; and Mary McGrory, "The Vaster Wasteland," *Washington Post*, June 4, 1995, p. C1.

48. Given the importance of the data, as well as their complexity, a computerized database for campaign finance reports is an essential component of a fair, accountable electoral finance system. Most state agencies that oversee campaign finance have entered the computer age (as the Council of State Government reports, in 1992 virtually all state election boards or ethics boards already had some computing capacity). In addition, states should provide public access to their computerized reports, or in the optimal case, follow the lead of the Federal Election Commission and make an on-line database available for public access (as Alabama, Alaska, Hawaii, Texas, and Washington already have). The FEC database, for instance, made possible much of the authors' research into campaign contributions. It must be noted, however, that any on-line system is limited by the data made available by the provider. A frequent criticism of the FEC is that expenditure reports are not available on the on-line system, although tracking where candidates spend their war chests is frequently as interesting as, and in some cases more interesting than, where their funding originates.

Council of State Governments listed sixteen states (Alabama, California, Colorado, Idaho, Indiana, Iowa, Illinois, Nebraska, North Dakota, Ohio, Pennsylvania, Tennessee, Texas, Utah, Virginia, and Washington) as having no contribution caps for any state or local offices. The council also listed twenty-five states that have at least some limits, which vary by primary or general election and office: Alaska, Arkansas, Connecticut, Delaware, Georgia, Florida, Hawaii, Kansas, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Montana, Nevada, New Jersey, New York, Oklahoma, Rhode Island, South Carolina, South Dakota, Vermont, West Virginia, Wisconsin, Wyoming. Puerto Rico also has contribution caps for general elections. One state actually does perform random audits on campaign finance reports—California. The Franchise Tax Board randomly audits lobbyists and campaign finance reports.

50. The Council of State Governments listed twenty-eight states as having ethics commissions as of 1992: Alabama, Arkansas, California, Connecticut, Florida, Georgia, Hawaii, Illinois, Indiana, Kansas, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Mississippi, New Jersey, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, and Wisconsin.

## THE ROCKINGHAM NEWS

### Vote facts sent to AG

By Adam Leech  
rockinghamnews@seacoastonline.com

SANDOWN - The New Hampshire attorney general's office has requested election information from several town officials this week following complaints of voting irregularities during the March 9 municipal races.

Following the election, the supervisors of the checklist who oversee the town elections forwarded a list of irregularities to the Board of Selectmen. Selectmen then sent the list on to the attorney general.

The supervisors' complaints included allegations that a non-resident voted, ballots were accepted without proof of identification, two voting machines malfunctioned, ballots were written in a confusing manner, lines were excessively long and discouraged voting, an elderly resident was denied assistance and several voters were deemed suspicious.

Those defending the election process said that a near-record turnout of 1,418 voters, 49 percent of those registered, simply overwhelmed poll workers.

Orville B. Fitch, an assistant attorney general who requested the information, said it is the policy of the attorney general's office not to acknowledge publicly that an investigation is taking place to prevent the misuse of the process.

He was, however, willing to speak in general about how the state investigates election complaints.

Fitch said each election investigation varies in how it is conducted, what is investigated and how long it takes.

As an example, Fitch said if there was an accusation that a non-resident had wrongfully voted in a town, the attorney general's office would look for evidence

of where the person was living by investigating where the party slept most nights, where their vehicle was registered, where their address on their driver's license indicates they live and where their children go to school.

In order for the attorney general's office to request the state Superior Court nullify the election and require a revote, there must be serious misconduct or evidence of fraud. Even then, according to Fitch, the town may not have to have a revote if the incident couldn't reasonably have affected the outcome of the election.

The attorney general's office gets about 100 to 125 complaints a year, according to Fitch, and there has not been a nullification in a number years, though he could not be specific as to how many.

Other than requesting a revote, Fitch said the attorney general's office has a general duty to enforce election laws and can bring charges against a party, issue a letter of reprimand or make recommendations for better election practices.

## GOP: Gov.'s bill would encourage voter fraud

Thursday, January 08, 2003

By **TERRENCE DOPP**  
Trenton Bureau

TRENTON -- The floodgates for rampant voter fraud would be thrown wide open under legislation being pushed by Gov. James E. McGreevey, Republicans charged Wednesday.

A bill up for a vote in the state Senate would prohibit so-called "third party" registration groups and poll workers from checking voters' identification. Administration officials said the checks would prove a deterrent to some urban voters with little identification.

But critics of the plan maintain it would inject uncertainty into the process by making it unclear exactly who is voting and how often.

"You can't put people through the third degree to vote or else no one would vote. People should not be hassled before they enter the voting booth," said McGreevey spokesman Micah Rasmussen. "He wants as many people to exercise their rights as possible."

Legislators in the Assembly passed the measure 72-3 on Dec. 15.

The bill is an updated version of one McGreevey vetoed Dec. 8 because he said it was too strict in requiring the identity checks. It springs from the federal Helping America Vote Act (HAVA) passed in October 2002 after the contested presidential election two years before.

State funding for election reforms, establishing a grievance procedure for those who feel they've been wronged at polls and a limited prohibition on paper ballots were part of the original bill. It also doled out about \$4 million in federal funding.

Rasmussen said state election monitors told the administration to change the bill to match federal requirements, which do not allow identity checks.

Ramon de la Cruz, the state's lead figure in enacting HAVA, said the issue shows the growing pains of states grasping to meet federal guidelines foisted upon states with no appropriation and arbitrarily drawn timeframes.

HAVA was intended to increase voter turnout and to insure all votes are cast legally.

One GOP lawmaker said under McGreevey's HAVA plan, there would be no safeguarding the security or integrity of ballots.

"The governor's recommendations provide that when a person is registered to vote through the actions of a third party, such as through a voter registration drive, no identification shall be required to ensure the identity of that person," Sen. Thomas Kean, R-Union, said in a letter to

029825

Attorney General Peter Harvey calling for a halt to implementing McGreevey's proposal should it clear the Legislature.

"The provision clearly violates both the letter and spirit of the federal law, and invites nothing less than the imprimatur (approval) of the state government for institutionalized voter fraud," Kean added in the letter.

Federal lawmakers issued states a number of mandates with HAVA, including issuing money to scale back the use of paper ballot voting machines. So far the state has received \$13 million under HAVA and is awaiting over \$20 million more, de la Cruz said.

Passage of the act followed the defeat by President Bush of then-Vice President Al Gore after senior citizens in Florida said they voted incorrectly because of punch card ballots.

# Fraud Lawsuit Targets Gerson Election

NY

*Forged Signatures  
ON Petitions*

By Daryl Kahn  
Staff Writer

August 7, 2003, 7:25 PM EDT

According to her death certificate, Elsie Roloan died 9:30 p.m. on June 22, 2001. But her signature appears next to the date June 26, 2003 in an election petition for Manhattan Councilman Alan Gerson and a slate of Democratic judges and party leaders running for office.

This is one of the allegations of election fraud being brought Friday in Supreme Court by a political opponent of the councilman.

The court's decision could determine who will win the race for the 1st District council seat in the heart of the financial district.

The two petitions being challenged, 216 and 219, are, according to court documents, "replete with forged signatures" and note "that it is a travesty for these petitions to have been certified by The Board of Elections."

Among the other allegations made in the court documents are that illegal aliens collected a majority of the signatures, a violation of election law, and that many of the signatures and the witnesses signing them were forged.

Gerson denied the allegations and said that he has no tolerance for "shenanigans" in his campaign. But he added that he and his campaign had nothing to do with the collection of the petitions.

"I have no control or oversight over the petitions in question," he said. "This suit is a total waste of the judiciary's time. It's frivolous."

A candidate is required by law to certify in a cover sheet that the petitions filed with the Board of Elections are valid.

A candidate needs 900 valid signatures to get on the primary ballot. But even if a candidate has enough legitimate signatures, a judge can, if he finds that the petitions are "permeated with fraud," kick a candidate off the ballot.

Norma Ramirez, who filed the suit, said Gerson knew that many of the signatures were fraudulent, including sheet number 126 in petition 219 — where the dead woman's signature shows up.

"Of course he knew," she said.

She said Gerson is part of the city's Democratic Party machine and that these tactics are commonplace.

029827

"This is about what's been going on for years," she said. "This is about the little people fighting against the machine."

Ramirez was candidate for Female Party Leader in the 64th Assembly District who was knocked off the ballot by a lawsuit brought by Alice Cancel alleging fraud on her petitions. Cancel is also listed on the petition.

The 1st District's borders encompasses one of the most important political regions in the city. Within its borders are the World Trade Center site and the Lower Manhattan Development Corporation steering its future, Wall Street and Chinatown.

The fallout from Friday's decision is crucial because of the party make-up of the district. Like most districts in the city, its voters are overwhelmingly Democrats, at 64 percent. Only 11 percent of the voters are Republican, and the remaining 25 percent are either with smaller parties or unaffiliated.

Political analysts say it is highly likely that the winner of the Sept. 9 Democratic primary will capture the 1st District seat in the November election.

The other names listed on the suit are: John Quinn, candidate for male assembly district leader in the 64th Assembly District, and Shlomo Hagler, Kathryn E. Freed and Marcy Friedman, all Democrats running to fill judge vacancies in Manhattan Civil Court.

## Questions Face Elections Board Before Primary

By DIANE CARDWELL

**W**ith less than a week to go before a hastily rescheduled primary, the city's Board of Elections is facing a set of serious challenges, from trying to inform poll workers of the new elections schedule, to figuring out whether possible runoffs in some citywide races would have to be held using paper ballots, to a lawsuit filed by a group of voters and candidates seeking to postpone the primary election yet again.

At a meeting of the board yesterday, commissioners were still debating where the board would operate from next Tuesday, since the attack on the World Trade Center disabled their computer system, too.

"I think they have a very daunting challenge to pull off the primary and the runoff and the general election," said Gene Russianoff, staff lawyer at the New York Public Interest Research Group, who was at the meeting.

Mr. Russianoff said that one of the biggest problems was informing poll workers that they would be needed Tuesday. The board has resorted to advertising in the print media, but the advertisements only announce the date of the rescheduled primary and are not addressed directly to poll workers.

Board officials said yesterday that workers would be told by elections officials, but Mr. Russianoff said that he still had concerns, given "the low amount of information about the election" that had been getting out. "The fear is that maybe some poll sites would not be able to open up," he said.

Another problem facing the board is how to get its 6,700 voting machines ready for a general election after a runoff, said Gary Berzansky, the chief custodian of the machines. With a possible runoff now moved to Oct. 11, he told the board, he would not have enough time to retrieve the machines, tabulate the results and then to prepare and truck the machines out again for the general election. Mr. Berzansky suggested that any runoff be conducted with paper ballots. He said his office was down by 17 technicians and described his staff, which has worked "45 straight days with no day off in sight," as irritable, tired and very upset about the attacks.

One commissioner said paper ballots would subject the board to allegations of manipulating the elections.

"I'm not trying to manipulate any election," Mr. Berzansky replied. "I'm trying to be realistic."

In the end, the board rejected the proposal, even as Mr. Berzansky said that he could not guarantee that the machines would be ready.

029829

One plaintiff in the lawsuit, Shirley Kwan, who is the campaign treasurer for Kwong Hui, one of the nine City Council candidates who are also plaintiffs in the suit, told the board that the city was not ready for the election.

"Like many other residents who live in the downtown area, we all have been victims of the tragedy and we need time to heal," she said later. Many residents are not getting the services they need, she said, and are so focused on finding places to stay or getting health care that they cannot focus on the election. The state passed legislation this week that will allow anyone in the affected area below Canal Street to vote by mail-in or absentee ballot.

Joseph Gentili, deputy director of the board, declined to discuss the lawsuit, but Mr. Russianoff said that it was not inconceivable that a judge would postpone the election, although the board had already addressed some of the issues the suit raises.

The board also received notice yesterday that the Police Department would be able to provide officers at the 1,300- odd polling sites. Mr. Gentili said that instead of having two officers splitting the shifts at each site, one officer would work for the entire day. The board also learned that the Police Department would not be able to provide an early unofficial count as it has in years past on election night because the computer lines linking the department to the elections board no longer exist. The first results, Mr. Gentili said, would therefore be the board's own official count, which would not be available until later in the week.

Near the end of the meeting, the commissioners discussed the possibility of making a public service announcement to inform those people who voted on Sept. 11, before the election was scuttled because of the attacks, to return to the polls on Tuesday. Mayor Rudolph W. Giuliani was suggested as the person to make the announcement, but Mr. Gentili nipped that idea in the bud.

"I think the mayor has a lot more things to do," he said.

## Atchley Named By Mattice As District Election Officer posted October 29, 2002

United States Attorney Harry S. "Sandy" Mattice, Jr. today announced the appointment of Assistant United States Attorney Chuck Atchley to serve as district election officer for the Eastern District of Tennessee.

This appointment was made pursuant to a nationwide Department of Justice Voting Integrity Initiative announced by Attorney General John Ashcroft in Washington, D.C. earlier this month. The purpose of this nationwide federal law enforcement program, which the Department has implemented during national general elections since the late 1960's, is to ensure public confidence in the integrity of the election process by strengthening and enhancing the Department's efforts to protect voting rights and to prosecute election crime throughout the country, officials said.

Mr. Mattice said, "Election fraud dilutes the worth of votes honestly cast. It also corrupts the essence of our representative form of government. As a crime against both the individual and the government, it will be dealt with promptly and aggressively."

As district election officer, Mr. Atchley will supervise the investigation and prosecution of election fraud matters in the Eastern District of Tennessee, and will coordinate the District's efforts with Department of Justice prosecutors in Washington, D.C. As part of his responsibilities as district election officer, Mr. Atchley will supervise a team of Special Agents of the Federal Bureau of Investigation (FBI) during the November 5 election, including the preceding early voting period.

These individuals will be on duty throughout the election period to receive complaints of election fraud. AUSA Atchley can be reached by the public at the following telephone numbers: (865)545-4167 and (865)607-8727.

The FBI also will have special agents available in each field office and resident agency in this district to receive allegations of election fraud during the election period. The FBI can be reached by the public at: (865)544-0751.

Mr. Mattice stated that most forms of election crime are easily recognized, such as voter bribery, voter intimidation, and ballot forgery. Other forms of election fraud are more subtle. It is, for example, a federal offense to seek out the elderly, the socially disadvantaged, or the illiterate for the purpose of subjugating their electoral will. Furthermore, every voter has the right to mark his or her ballot in private, free from the watchful eye of election partisans.

Mr. Mattice said, "The detection of election fraud depends in large part on the watchfulness and cooperation of the American electorate. It is imperative that those who have been asked to participate in questionable election practices, or who have observed or have specific information regarding electoral corruption, make that information available immediately to my Office or to the FBI. The cooperation of this country's citizens in helping to protect the sanctity of the ballot box is crucial."

Columbus Con Artist Poses as Elections Worker *OM*

March 25, 2004

The Franklin County Board of Elections is warning residents of a scam artist. ONN-affiliate WBNS reports that an identity thief is prowling the streets of northeast Columbus. He goes door-to-door asking people to register to vote. He shows them a picture I.D., a clip board and a palm pilot. After he receives personal information, he attempts to steal money.

At least six people have complained to the Board of Elections about the scam, but the county says elections officials don't go door-to-door.

The safest way to register is to contact the Board of Elections directly.

However, not everyone who comes to your door and asks to register you to vote is out to scam you.

Many legitimate groups are having voter registration drives to get more people to the polls for the November elections.

Elections | Article published Tuesday, December 9, 2003  
LUCAS COUNTY BOARD OF ELECTIONS

# Vote certification prompts recount in 4 local contests

By FRITZ WENZEL  
BLADE POLITICAL WRITER

The Lucas County Board of Elections certified the Nov. 4 general election yesterday, finalizing its results after an arduous process that had elections workers meticulously examining votes cast in every one of the county's 530 precincts.

The certification triggers recounts of four races or ballot issues:

- Sylvania City Council.
- Oregon City Council.
- The village of Waterville.
- The Swanton School District.

No date was set for those recounts, but they'll be done in the next two weeks, said Joe Kidd, elections director.

The board of elections' unusual attention to detail was required after it was discovered that some poll workers had trouble following unfamiliar sets of directions required because of new electronic voting machines. On two earlier occasions, meetings to certify the election were canceled because the board was not finished with its work.

Poll workers also found themselves scrambling on Election Day because they were short-handed. Many booth official jobs went unfilled, elections records show.

Two workers responsible for recruiting Republican poll workers have been suspended for failure to do their jobs. They face a hearing Dec. 16 to determine their employment status.

Mr. Kidd said problems were to be expected because it was the first countywide election using new machines. He said he believes the March primary election will run much better.

In a related matter, the board directed Mr. Kidd to seek more information from the office of Secretary of State Kenneth Blackwell about a January deadline for counties to pick which voting machine they wish to buy under the federal Help America Vote Act.

The board wants to know if it will be granted more time to decide in light of a recent study that revealed the machines up for sale in Ohio have security flaws.

Mr. Blackwell has ordered the companies to fix the flaws before their machines are allowed in Ohio, but those repairs are not expected to be completed by the January deadline.

Paula Ross, chairman of the elections board, said she didn't want to be forced to choose voting machines until the flaws are fixed.

MISSING  
petitions

Posted on Tue, Sep. 30, 2003

The Beacon Journal

## Summit elections worker fails polygraphs

OH

No. 2 official admitted drug, alcohol use before petition query, sources say

By Julie Wallace  
Beacon Journal staff writer

A Summit County Board of Elections employee quizzed as part of a probe into a candidate's missing petitions failed two polygraph tests after admitting using drugs and alcohol before the tests, law enforcement officials said.

Several sources familiar with the investigation identified the employee -- who was not named in a news release issued Tuesday by the Summit County Sheriff's Office -- as Deputy Director John Schmidt, a Democrat who holds the No. 2 position in the board's office.

Schmidt declined to comment. His lawyer, Carmen Roberto, said Schmidt did not fail the polygraphs; he said the results were inconclusive on both tests.

Sheriff Drew Alexander, a Republican, said 11 full-time employees were asked to submit to lie-detector tests in the investigation into the June disappearance of election petitions belonging to Akron City Councilman Joe Finley, D-2. Finley is a maverick often at odds with his party's local leaders.

Eight of those 11 full-time employees easily passed the polygraph.

Three others were tested twice. Two of them had results that initially were labeled inconclusive but later were determined by polygraph examiner Bill Evans to be truthful.

The third employee also underwent two voluntary tests -- showing up and acknowledging to Evans that he had used marijuana and alcohol prior to the appointments, Alexander said.

Alexander, who declined to confirm that the employee is Schmidt, said no charge would be filed against the employee over his admitted drug use because the tests were voluntary.

"Both times, he failed miserably at over \$500 a pop," Alexander said. "That's enough polygraph examinations. I have no confidence that he'd come in and take a third or fourth and not try to beat it."

### No charge likely now

Alexander said the failed tests elevate the individual to a potential suspect, but no charges are likely at this point.

"He's a person of interest -- certainly a person of interest," Alexander said. "But... we need a witness or a confession. Until one of those two come forth, we just can't arrest on the fact that he failed a polygraph."

Alexander's office released the information as part of a status update on the investigation. It began after Finley discovered his petitions were missing when he went to the board's Grant Street office to have them filed minutes before the 4 p.m. June 26 deadline. He had submitted the petitions earlier that week for signature verification.

A judge ultimately ordered that Finley be placed on the ballot, and elections board officials asked the sheriff's office to investigate the disappearance of the petitions.

Tuesday's update said the board's offices were searched twice, and detectives interviewed 28 of the

029835

employees. Those 28 were the ones identified as having been around the office from 11 a.m. to 12:30 p.m. June 25 -- the period in which, detectives determined, the petitions had disappeared.

### More interviews

Most of the part-time employees -- generally college-age students who are relatives of political operatives in the area -- have not been interviewed. But after meeting with election officials Monday to brief them on the investigation, the detectives agreed to interview those part-timers.

"They felt we needed to interview everybody," Alexander said. "We interviewed the people we thought were in the area during the timeline when the petitions were missing. But to satisfy everybody, we'll interview everybody."

Detectives will track down those people, many of whom have returned to college. Phone interviews will be arranged if possible; lie-detector tests will be initiated only if something of interest is learned, Alexander said.

Those who worked for the board over the summer include the two children of former Akron Service Director Joe Kidder; the son of Wayne Jones, a leader in the county Democratic Party; the daughter of Akron Council President Marco Sommerville, D-3; the son of Akron Councilman Mike Freeman, D-9; and the son of Kevin Davis, a campaign aide for Akron Mayor Don Plusquellic. The Republican part-timers also had political ties -- albeit to lesser-known precinct committee representatives, rather than officeholders and party leaders.

### Schmidt, lawyer respond

Schmidt, contacted Tuesday, said he couldn't discuss the allegations and would not acknowledge whether he was the employee in question.

Roberto, Schmidt's lawyer, did deny that Schmidt had admitted using drugs or alcohol before either of his tests.

"I was at the second test. It did not happen," Roberto said.

If investigators ask Schmidt to take a drug test, Roberto said he would encourage his client to do so.

Schmidt, a Cuyahoga Falls City Councilman, was hired at the elections board in September 2002 to replace Yolanda Walker, who took a job leading the Summit County Solid Waste Authority.

Russ Pry, chairman of both the Summit County Democratic Party and the elections board, said he expects the allegations in Alexander's news release will be the topic of an upcoming executive session of the elections board.

Board Director Edna Boyle, a Republican who took over at the board at the end of July, said personnel problems exist that the board needs to address.

"Those are very serious allegations that are made in the statement, and I hope they are dealt with as soon as possible so we can get back to the reason we are here -- to have fair elections," Boyle said. "We need to not lose focus of that here, and I'm afraid we will with all that is going on."

Alex Arshinkoff, chairman of the Summit County Republican Party and an elections board member, said the release is the latest blow to the troubled board.

"This matter is bad enough in and of itself, but what makes it more troubling is that the petition that was stolen is a Democrat who is a maverick and who has endorsed the Republican candidate for mayor, Bryan Williams," the GOP leader said.

"It certainly adds another element of discomfort for the Board of Elections inasmuch as it adds another layer of politics to this outcome and action."

## The 2002 Help American Voter Fraud Act

[http://www.pardonmyenglish.com/archives/2005/10/the\\_2002\\_help\\_a.html](http://www.pardonmyenglish.com/archives/2005/10/the_2002_help_a.html)

VT

October 06, 2005

Want to vote by phone? Apparently, it is a possibility...

Americans may soon be able to use the telephone to vote in local elections, and could someday dial in their decision in national races, the WALL STREET JOURNAL reports on Thursday.

The 2002 Help America Vote Act, which was created to simplify the voting process following the debacle in Florida during the 2000 presidential election, helped fund the development of new voting systems.

Vermont is the first state to commit to phone-voting technology. By the November 2006 elections, all of the state's voters who are unable to mark their own paper ballots are slated to use a new telephone voting system. The Vote-by-Phone, initially will be used only in polling places – but there are plans to expand the system to voters' homes!

The irony here is that an action taken to curtail voter fraud will lead to provisions that will make it easier to commit voter fraud. I can hear the stories now, Democratic operatives will either be A) knocking on doors on Election Day and physically making the calls themselves (which would likely be prohibited); B) employee phone technicians to make calls on behalf of real voters, fooling the system to believe that they are indeed calling from the actual address; C) pay for phone numbers for non-existent or dead persons and voting for them D) all of the above and much, much more. I can see it now, every phone booth will become the residence of a "registered Democrat" who votes party line.

The sad thing is, this not far-fetched.

# 4 charged in Knott election Judge-executive, others allegedly paid for votes

Mail this page

By Alan Maimon  
amaimon@courier-journal.com  
The Courier-Journal

Four Knott County men, including two-term Judge-Executive Donnie Newsome, were indicted yesterday on federal charges of vote-buying stemming from the troubled May 1998 primary election.

Donnie Newsome, shown in 1997, is the first Kentucky elected official in at least five years to be charged with buying votes.

Newsome, 52, and Willard Smith, 54, both of Hindman, and Keith Pigman, 45, of Garner were charged by a federal grand jury in London, Ky., with one count of conspiracy to pay voters to cast absentee ballots in the primary election in which Newsome was running for judge-executive.

Newsome, the first Kentucky elected official in at least five years to be indicted on votebuying charges, also is charged in two counts of the six-count indictment with paying and aiding the paying of between \$50 and \$100 to two voters in the primary. Smith is charged with four counts of paying voters.

Pigman is charged with two counts of paying voters and aiding the paying of voters.

In a separate indictment, Newton J. Johnson, 33, of Brinkley, is charged with four counts of paying voters in the 1998 primary. Johnson also was charged with one count of making false statements to the FBI about his involvement in paying voters and two counts of obstructing justice by urging two witnesses to lie to the grand jury investigating the vote-buying allegations.

Newsome, Smith and Pigman each face up to five years in prison and a \$250,000 fine if convicted. Johnson faces up to 10 years in prison and a \$250,000 fine if found guilty.

An arraignment date in U.S. District Court in Pikeville hasn't been scheduled.

Newsome, who defeated three-term incumbent Homer Sawyer in the May 1998 primary and won re-election last November, didn't return phone calls to his home yesterday.

*The Courier-Journal*

"...they do so much more."

University Hospital

029838

Reached by phone, Pigman said he wasn't aware of the indictment.

"I have no idea what's going on," he said. "I'm amazed."

A Newton J. Johnson of Brinkley also said he had heard nothing about the indictment.

Smith couldn't be reached for comment yesterday evening.

Assistant U.S. Attorney Thomas L. Self and Richard Pilger, a trial attorney with the U.S. Justice Department, are prosecuting the case. The FBI conducted the investigation.

The May 1998 primary election in Knott County drew widespread notoriety in 1999 after six county residents were charged in a federal indictment with conspiring to buy votes of students at Alice Lloyd College, a small private college in Pippa Passes.

It also attracted the interest of federal and state investigators because of the unusually high number of absentee ballots.

Later, state and federal authorities descended on Knott County amid allegations of election fraud. Five of the six people charged with conspiring to buy the college students' votes were convicted or pleaded guilty to federal charges.

So far this year, federal prosecutors have taken aim at alleged vote-buying, a practice that Greg Van Tatenhove, U.S. Attorney for Kentucky's Eastern District, said jeopardizes democracy. "Representative government is diminished when the worth of honest ballots is diluted by ballots bought by those who seek to corrupt the election process."

In March, a federal grand jury in Lexington charged nine people with conspiring to buy votes under the guise of paying people to transport voters to the polls in lawyer John Doug Hays' unsuccessful race last year for Pike County district judge. Hays, his wife, Brenda Hays, and lawyer and coal operator Ross Harris are among those facing charges.

All nine have pleaded innocent.

Last month in Knott County, six men were indicted on federal charges that they paid people to vote in the 1998 primary election.

Five of the six also are charged with lying to the FBI about alleged vote-buying.

The six are charged in five federal indictments returned by a federal grand jury in London. Indicted were Ronnie Neal Slone, 55, and Brady Warren Slone, 57, both of Pippa Passes; Phillip Slone, 53, and Jimmy Calhoun, 33,

029839

both of Hindman; Patrick Wayne Madden, 45, of Littcarr; and Jimmy Lee Conley, 33, of Lackey.

All six have entered innocent pleas.

About Top Jobs

PIKEVILLE, Ky. — Two brothers were acquitted yesterday of charges that they bought votes in a primary election in Knott County five years ago.

A jury deliberated less than two hours before finding Brady Slone, 57, and Ronnie Slone, 55, both of Pippa Passes, innocent of the charges in U.S. District Court in Pikeville.

"This was a case of mind over matter," Ronnie Slone said. "The FBI knew in their minds that we were innocent, but it didn't matter. They brought scum in here to testify against us."

The key prosecution witnesses were three women, two of whom acknowledged in court that they were hooked on prescription drugs around the time of the 1998 primary election. Each testified that Ronnie Slone, an insurance agent, paid her \$100 to vote for certain candidates. They said Brady Slone, a retired public school principal, stood nearby when the payments were made.

Defense attorneys called a Knott County physician and a pastor as character witnesses who testified that the Slone brothers had unblemished reputations for integrity and truthfulness.

Ned Pillersdorf, attorney for Brady Slone, said he believes the lack of credibility of the

029841

prosecution's witnesses, coupled with the Slones' record of community service, led to the acquittal.

"Prosecutors shouldn't have selected this case, with the underwhelming credibility of the witnesses," Pillersdorf said. "There are plenty of unsavory characters that bear looking into. My client is a hero who was injured in combat. You don't try to convict a Vietnam veteran with shrapnel in his head on the testimony of noncredible witnesses."

Brady Slone received the Purple Heart for the injury he received in February 1967.

"This government sent me to war as a combat medic and destroyed my life, and now this government treats me like scum," said Brady Slone, who wept after the verdict was read. "I don't like it."

One of the prosecution witnesses, Monica Miller, a former Hindman resident who now lives in Cincinnati, testified that Ronnie Slone paid her for her vote while Brady Slone stood nearby. Prosecutors claimed Brady Slone was acting as a lookout.

Miller and her friends Ann Slone and Jana Slone, who may be distant relatives of the brothers, each testified that they went to the Knott County Courthouse together, voted, then drove to the outskirts of town where they were paid.

All three of the women needed the money, said federal prosecutor Richard C. Pilger from the U.S. Department of Justice in Washington.

"These women were exploited," Pilger said. "They were poor, hard-pressed women. The kind of people susceptible to selling their votes."

FBI Special Agent Tim Johnson said he contacted the three women as part of his investigation. He said they were "very reluctant" to answer his questions.

Johnson, who testified that he had interviewed about 175 people in his investigation, said the U.S. attorney's office had agreed to grant immunity to the women for the crime of selling their votes if they cooperated.

"They didn't want to be here," Pilger told jurors in the Pikeville courthouse. "They didn't want to get these guys in trouble. They had no reason to lie."

However, defense attorney Steve Owens, representing Ronnie Slone, said the women had changed their stories numerous times. He said they even acknowledged that their testimony in court differed from their original statements to the FBI.

The Slones became the second and third Knott County residents acquitted of vote buying charges in Eastern Kentucky since June.

On June 20, a federal jury found Jimmy Lee Conley, 33, of Lackey, innocent of buying votes in the same primary election.

Conley was the first of about 20 Eastern Kentuckians indicted this year on charges of election fraud to go to trial.

Two other people indicted in the Knott County probe pleaded guilty to vote fraud earlier this month. Phillip Slone, 53, of Hindman, and Newton J. Johnson, 40, of Brinkley, admitted paying voters \$50 to vote in the primary election.

Five other Knott Countians remain under indictment on federal vote fraud charges, stemming from the same primary election. All have entered innocent pleas.

And in Pike County, 10 people, including a former state senator and his wife, are under indictment on charges of vote fraud involving a race last year for district judge. They, too, have entered innocent pleas.

About Top Jobs

PIKEVILLE, Ky. — Defense attorneys wasted no time yesterday attacking the credibility of witnesses who'll testify against Knott County Judge-Executive Donnie Newsome and a campaign worker in their election-fraud trial.

"You're not going to hear from one single credible witness that they are guilty," said Scott C. Cox, a Louisville attorney representing Newsome in the U.S. District Court trial in Pikeville.

Newsome, 52, and Willard Smith, 54, both of Hindman, are accused of buying votes in the 1998 Democratic primary.

Federal prosecutor Richard Pilger told jurors in his opening statement that at least one witness is unable to read, another has mental problems and another is a convicted felon. All were poor and easy prey for unscrupulous candidates, he said.

"We will prove to you that Donnie Newsome picked exactly that kind of people in anticipation of this day," Pilger said.

NEWSOME AND Smith were among several people charged after an FBI investigation into the 1998 primary. U.S. District Judge Danny Reeves said the trial is expected to take several days, perhaps extending into next week.

Pilger said authorities suspected something was amiss in the election when they saw large numbers of absentee votes being cast.

"This was a flag to the FBI," Pilger said. "This was an indication of vote buying."

Pilger and Assistant U.S. Attorney Tom Self, having failed to win convictions in two vote-fraud trials in Pikeville since June, asked that the trial be moved elsewhere.

029843

Self said he feared publicity and the political influence of the defendants could hurt the chances of a fair trial in Pikeville.

The judge also expressed concerns about pretrial publicity surrounding the case but opted to keep the trial in Pikeville.

In a trial last month, Brady Slone, 57, and Ronnie Slone, 55, both of Pippa Passes, were found innocent of buying votes in the same primary. They became the second and third Knott County residents acquitted of vote-buying charges. In June a federal jury found Jimmy Lee Conley, 33, of Lackey, innocent of buying votes.

Three other people indicted in the Knott County investigation have pleaded guilty to buying votes. Phillip Slone, 53, of Hindman; Newton J. Johnson, 40, of Brinkley; and Jimmy Calhoun, 33, of Hindman, admitted paying voters \$50 each.

The trial of the remaining defendant, Patrick Wayne "Buck" Madden, 45, of Littcarr, is scheduled for Oct. 7.

PILGER TOLD jurors in his opening remarks that Newsome, a former state representative, wanted to be boss of Knott County and bought votes and conspired to buy votes to achieve that position.

"Every citizen is entitled to participate in voting without the taint of vote buying," he said.

Cox said Newsome won the election by working hard. "His campaign strategy was to wear the leather off the soles of three or four pairs of shoes."

The same strategy, Cox said, won Newsome election to two terms in the legislature.

"Believe me," Cox told the jury, "there are two sides to this story."

## Knott man gets 20 months for vote fraud

HE WAS ONE OF 12 PEOPLE CONVICTED IN VOTE-BUYING SCHEME

ASSOCIATED PRESS

**PIKEVILLE** - A Knott County man has been sentenced to 20 months in prison for buying votes in the 1998 primary election.

Patrick Wayne Madden, 46, of Littcarr, will serve two years probation when he is released.

U.S. District Judge David Bunning imposed the sentence yesterday, saying he hopes the punishment will deter others from buying votes in eastern Kentucky.

Madden, who was not a candidate in the election, pleaded guilty. He was among a group of Knott County residents charged in an FBI crackdown on election fraud that netted 12 convictions.

Knott County Judge-Executive Donnie Newsome, a former state representative, was among those caught in the crackdown. He was convicted in federal court Oct. 1 of one count of conspiracy to buy votes and two counts of buying votes.

Newsome's sentencing is scheduled for March 16. He faces three to 15 years in prison.

Another Knott County man, Willard Smith, was convicted in the same trial of one count of conspiracy to buy votes and four counts of buying votes. Smith faces five to 25 years in prison at his sentencing on Feb. 17.

## Voting fraud not a problem in Madison

Phil Brinkman Wisconsin State Journal  
May 10, 2005

John Hill really does exist. So do Katie Katz, Donald Schamun, James Kuehl, Janet Griesel, Sandra Angell, John Amundson and Deb Spees.

Brian Stoll is out there, along with Daniel Jay Lee and David Cimino. Angela Franzke moved; so did Nathan Greenawalt, Scott Lueck, Eric Sherman and Paul Sonntag. But they're real people.

In fact, if you took the time, you'd likely find the vast majority - if not all - of those once thought to be Election Day phantoms in Madison are living, breathing voters.

Authorities continue to investigate voting irregularities in Milwaukee, including more than 100 cases of suspected double voting.

But in Madison, where 1,194 address verification cards sent to voters who registered on Election Day in November were returned as nondeliverable, investigators now say only 16 may be problematic.

"The vast majority of them - almost all of them - on their face appear to be someone who moved between voting day and the time when these were mailed out," Dane County District Attorney Brian Blanchard said.

Most of the others either wrote down the wrong ZIP code on their registration forms, forgot to include their apartment numbers in their address or inadvertently wrote down an old address. The post office likely could find them, but election rules require the cards be returned if the address is incorrect or incomplete.

"It doesn't make me feel good," said John Hill, 59, an Army veteran and longtime Madison resident whose voter registration card was sent back to the Madison city clerk because he wrote his ZIP code as 53704 instead of 53705. "I know I didn't cheat, and I know it was all a big mistake. People just make too big a deal of the little things."

**Innocent mistakes** Such innocent mistakes, which happened thousands of times around the state, have tended to amplify the far more serious - but much smaller number - of likely fraudulent votes such as those announced Tuesday in Milwaukee. Identification advocates regularly cite the number of returned registration cards as evidence Wisconsin needs to require voters to show photo identification at the polls.

Opponents point out such a requirement would do little to stop most of the problems that have been identified, such as people writing down the

029846

wrong address or felons voting, and say it could disenfranchise some elderly or poor voters.

Supporters note the current system, in which registered voters need show no identification and new voters need only a utility bill or another registered voter to vouch for them, invites abuse.

The GOP-led Legislature recently passed a bill requiring a photo ID to vote, but Democratic Gov. Jim Doyle vetoed it.

A hearing on a proposed state constitutional amendment requiring such identification (AJR 36) is planned for 10 a.m. Thursday in Room 300 Northeast of the state Capitol.

At first glance, many of the verification cards that were returned suggested possible voter fraud: The addresses didn't exist, or the person on the card didn't live there.

One card, filled out by a John Amundson, gave an address of "6 S. Madison," not an actual residence. But Amundson is very real. The 45-year-old information technology manager actually lives at 6 S. Yellowstone Drive.

"Sounds like I spaced out the 'Yellowstone,'" Amundson said. "It certainly sounds like the kind of thing I could do."

A letter carrier couldn't find Janet Griesel at 710 Wheeler Road. That's because Griesel moved about two years ago to 710 Malvern Hill Drive from 1630 Wheeler Road. Her card mixed the two, creating an address that doesn't exist.

"My husband probably filled it out for me because I have a vision problem," Griesel said. "He was in a hurry to write his and mine, and I bet that's what he did. Unbelievable."

Katheryn Katz put down the address of her sorority house at 103 Langdon St. when she registered to vote Nov. 2 in her first presidential election. The city clerk sought to confirm her address in January, but by then she had moved to Seville, Spain, where the 21-year-old UW-Madison junior is studying Spanish politics and history.

Sandra Angell moved to her new house five years ago, but for reasons she can't explain, she wrote down her old address on Starker Avenue when she went to vote.

**Cheating can be risky** Kevin Kennedy, executive director of the state Elections Board, wasn't surprised at the low number of potential fraud cases in Madison. Defrauding the current system is easy but chancy, and the payoff of throwing a few votes toward one candidate probably isn't worth the risk of 4 years in prison, he said.

Allegations of massive fraud, such as one person vouching for a busload of potential voters, are probably apocryphal, Kennedy said. Something like that would make an impression on poll workers, who haven't reported any such incidents, he said.

029847

Voters can cheat the system. They can, for example, claim to be someone else. But that can be risky, Kennedy said, since it depends on the cheater knowing that the other person hasn't voted yet and that the poll worker doesn't know the person whose identity is being used.

To register as a fictional voter, the person would need to forge documents, such as utility bills, used to verify the person's address. Beginning in 2006, federal law also will require voters to list their driver's license number or, if they don't have a driver's license, the last four digits of their Social Security number.

State Rep. Jeff Stone, R- Greendale, the lead sponsor of efforts in the Assembly to require photo ID at the polls, said the numbers from Madison suggest "a degree of accuracy in the way the system functioned" unlike in Milwaukee.

But he maintained photo ID would improve the system further by allowing poll workers to make a positive identification of the voter, even if the address is outdated, incorrect or fraudulent.

"I think that's something that would improve the potential for pursuing charges against someone who voted improperly," Stone said.

**Charges unlikely** In Madison, at least, the odds of such charges look exceedingly slim. If someone wanted to forge an identity and vote fraudulently, finding that person is probably next to impossible, Blanchard said.

Then, too, explanations for the 16 cards investigators have pulled out for further inquiry may prove to be as benign as the other 1,178.

On Tuesday, the Wisconsin State Journal found one of those voters, Brian Stoll. He and his wife live where they said they lived on their registration card, at 9921 Soaring Sky Run. But, while the property was recently annexed by Madison, the post office still considers it a Verona address and returned the card.

Stoll, 38, said he's used to such confusion over his address and was willing to overlook his brief tenure as a criminal suspect.

"As long as I didn't end up in jail and I can explain the circumstances, I guess it's OK," he said.

The authors of the study conclude "It would be difficult to imagine a jurisdiction adopting a new technology for voting if it were not satisfied that the proposed innovation was at least as good as the present system on every one of the first ten criteria, and better than the present system on the last seven."

The study urges caution but identified telephone, kiosk, and Internet as three options sufficiently evolved to support testing in a fully functional pilot. Of these, the study said telephone offers the potential for the most significant impact on the largest base of Canadians.

Legislation recently passed by parliament and awaiting royal assent would authorize studies of newer technology and voting.

### STUDENT ABSENTEE VOTES

An elementary school physical education teacher and two other Knott County, Ky. residents were convicted April 19 in federal court in Pikesville, Ky. for conspiring to buy absentee ballots from 12 students who attend a small private college. The twelve person federal jury, which deliberated for seven hours over a two-day period, failed to agree on a verdict for two other defendants, one of whom was the brother of the county attorney on the ballot. These two defendants face a retrial in June.

The jury convicted Caney Creek Elementary School physical education teacher Phillip D. Sparkman, of twelve counts of vote fraud and of one count of lying to the FBI. Lola Jean Stone, a sister of one of the candidates on the ballot, was convicted of seven counts and of lying to the FBI. Charlie Maggard was found guilty of three counts of vote fraud. The maximum federal penalty for each offense is five years in prison and a \$250,000 fine. Sentencing will occur later this summer.

After the Alice Lloyd College students were granted immunity, they testified that they were paid \$30 to cast their ballots in 1998 for a slate of local candidates. According to student testimony, they received their payment for votes from Stone after they went to her store where they wore "I Vote" stickers and purchased a peach-flavored "Mr. Fizz" soft drink.

The trial began April 4 but was suspended for a week during Pikesville "Hillbilly Days" celebration. Although all vote buying charges were related to local offices, the federal prosecutors had jurisdiction because federal candidates were on the same ballot.

David Randall Gayheart, the nephew of the County Clerk, was named in a separate indictment for seven counts of paying or offering to pay college students to vote for his uncle, lying to the FBI, and three counts of asking others to lie to the FBI. Gayheart pleaded guilty January 3 to buying votes and co-operated with prosecutors. He is awaiting sentencing.

Kentucky Secretary of State John Y. Brown instituted a "Fraud Busters" program in 1996 to curb vote buying abuses. The state legislature authorized \$10,000 to finance the program which offers a reward of \$1,000 for information leading to a felony indictment for vote fraud. State officials said that the Pikesville convictions, however, were based on complaints made to the FBI, not to state officials.

SL?**5 in E. St. Louis convicted of vote fraud**

June 30, 2005

BY JIM SUHR

EAST ST. LOUIS, Ill. -- A federal jury Wednesday convicted the head of this city's Democratic Party and four others of scheming to buy votes with cash, cigarettes and liquor last November to try to get key Democrats elected.

Jurors in the monthlong trial deliberated more than five hours before convicting local Democratic Party chairman Charles Powell Jr., 61, and Kelvin Ellis, 55, the city's former director of regulatory affairs, of felony conspiracy to commit vote fraud. Also convicted were Democratic precinct committee members Sheila Thomas, 31, and Jesse Lewis, 56, and City Hall worker Yvette Johnson, 46.

Ellis, Thomas, Lewis and Johnson also were convicted of one count apiece of election fraud for allegedly paying at least one person to vote -- or offering to do so. Powell was never charged with that count.

Jurors set aside defense claims that the government's case was flimsy because of unreliable witnesses whose testimony often contradicted each other and, at times, was recanted.

**Not much direct evidence**

"I respect the jury, but I am disappointed," Ellis' attorney, John O'Gara, said after the verdicts. He said the defense would consider asking for a new trial.

A date for sentencing was not immediately set.

"We'll take it one step at a time in terms of where we go from here," said Johnson's attorney, Pearson Bush, who declined to elaborate.

Messages left with attorneys for Powell and Thomas were not immediately returned. Voice mail for Lewis' attorney was full.

Prosecutors provided little evidence directly linking the defendants to the alleged vote-buying, often relying on secretly recorded audiotapes in which they say those accused could be heard talking about paying \$5 per vote in the Nov. 2 election -- and whether that amount would be enough.

A federal prosecutor in the case referred calls to his boss, U.S. Attorney Ron Tenpas, who did not immediately return messages left at his office.

**Witnesses called liars**

Prosecutors alleged that money flowed from the Belleville-based St. Clair County Democrats to their East St. Louis counterparts in a bid to elect certain Democratic candidates, including Mark Kern as St. Clair County Board chairman.

Kern, who narrowly won the race, has denied the allegations and has not been charged with any wrongdoing.

Powell lost his re-election bid to the City Council in April after his arrest.

029850

State records showed that tens of thousands of dollars were transferred from the county Democrats to the committeemen days

<http://www.suntimes.com/cgi-bin/print.cgi>

6/30/2005

before the Nov. 2 election. Party leaders said it was for legitimate expenses, including rides to the polls for people without cars.

Defense attorneys called the audiotapes -- the cornerstone of the government's case -- meaningless entrapments by opportunistic informants intent on seizing power for themselves. Defense attorneys called the prosecution's key witnesses liars.

"I would say jurors looked at these tapes and listened to them, and I'm guessing they are using the interpretations these very faulty witnesses gave them to reach their conclusion," O'Gara said after the verdicts. "I would not have trusted the government's presentation."

### Witnesses disagree in vote fraud case

By Michael Shaw  
Of the Post-Dispatch  
Thursday, Jun. 16 2005

The government's witnesses in the East St. Louis vote fraud trial don't agree on one of the most surprising aspects of the testimony so far: whether St. Clair County Board Chairman Mark Kern knew vote buying was taking place in East St. Louis during the November election.

The first witness testified two weeks ago that during a telephone conference call in October, she heard prominent Democrat Kelvin Ellis solicit funds from Kern, then a candidate for the job, to pay reluctant voters.

Sandra Stith, a Democrat worker during the Nov. 2 election who already has pleaded guilty to buying votes, is the only other government witness to that call.

She took the stand Thursday and said she remembered the Oct. 21 call. But she said she didn't remember the alleged discussion about more money being needed to swing the election in Kern's favor because some residents perceived him as racist.

"Do you recall any comments about money during that conversation?" Assistant U.S. Attorney Mike Carr asked her.

"No," she replied.

Carr ended his questioning of Stith soon after that exchange.

Five East St. Louis Democratic Party workers are on trial in federal court at East St. Louis, accused of a conspiracy to buy votes in the Nov. 2 election to get Kern and other prominent party members elected. Defendants include Ellis and city party Chairman Charles Powell Jr.

Kern, who would have lost the race without the East St. Louis turnout, has not been charged and has denied any wrongdoing.

Other controversial developments on Thursday led U.S. District Judge G. Patrick Murphy to send the jury home for the day to allow lawyers to prepare for today's proceedings.

Today, prosecutors are expected to present witnesses who will testify that Powell directly paid residents to vote, something his lawyer, Bruce Cook, said left him blindsided. Powell is only charged with leading a conspiracy to buy votes, not with purchasing the votes themselves.

Murphy, the judge, said he was surprised, too, but ruled the evidence was admissible. One witness, identified Thursday as Douglas M. Alexander, 45, is expected to testify Powell paid him \$10 to vote.

Two others, Stephen Young and his wife, Terrell Crow-Young, had been expected to testify that Powell's associate paid them to vote Nov. 2, according to a prosecutor's document filed in the case. But they won't be allowed to testify because they accidentally attended a portion of the trial Thursday morning. Any witness is supposed to be barred from hearing another's testimony, so Murphy excluded them.

Authorities have interviewed at least one other man who said that Powell's associate paid him to vote, according to documents. Cook and other lawyers, who previously had questioned the lack of testimony from actual voters, said Thursday that they wanted extra time to prepare a defense in light of these witnesses.

029852

In another twist, Murphy and the prosecutor, Carr, argued about whether the judge had said in front of the jury that Thursday's testimony by Stith was "damaging" to the government's case.

Carr claimed it happened when jurors were present. Murphy claimed he never said "damaging" in front of the jury. A transcript of the proceedings shows the judge saying "I believe that the witness gave damaging testimony to the government" in front of the jury.

## 7 hit in voter fraud case

MS

- Defeated Tippah County sheriff's candidate among persons named

The Associated Press

RIPLEY — Seven people have been charged with voter fraud in Tippah County, according to the attorney general's office.

While specific individuals were named in the indictments as the candidates for which votes were allegedly bought, Randall L. Wilbanks, a defeated candidate for Tippah County sheriff, was the only one named as a defendant.

Attorney General Jim Hood, whose office investigated the case, said the document must contain those names.

Named in three separate indictments were Wilbanks, 60; Joe Daniel Barnes, 52; and James D. Johnson, 66, all of Ripley; and Melba Sue Selmer, age and address unavailable. Each is charged with one count of conspiracy to commit voter fraud and 16 counts of voter fraud.

In a second indictment, Christopher R. Mathis, 40, of Tiplersville, Billy Gene Barnes, 49, of Walnut, were indicted on three counts of bribery.

In the third indictment, Roy Lee Richardson, 40, of Corinth, is charged with one count of attempting to bribe an elector and three counts of bribery for allegedly paying four individuals \$15 each to vote for three candidates.

## Free beer if you register to vote

Joseph Spector and Enid Arbelo  
Staff Writers

(June 18, 2004) — Here's a way to get young people registered to vote: Give them free beer.

That's the plan at today's East End Festival. Monroe County Democrats have teamed up with High Falls Brewery to offer two free 2-ounce beers to those who register to vote at the festival.

Then the new voter can go into a real voting booth and pick the brew they liked the most. The promotion is called "Register Your Taste."

The goal is to encourage people older than 21 to register to vote and to simulate the experience of voting. But alcohol treatment counselors fizzled on the idea, saying organizers shouldn't link drinking with the civic duty of voting.

"I think there are other ways to motivate people to vote other than give them alcohol," said Elaine Milton, director of the chemical dependency clinic at the Family Service of Rochester Inc.

Molly Clifford, head of the Monroe County Democrats, stressed that the event is not aimed at encouraging alcohol consumption and that the samples are small.

The initiative, backed by High Falls CEO Tom Hubbard and Moe Alaimo, president of the East End Business District, will also take place at two other East End festivals later this summer and at two Red Wings games.

The booth will be open from 6 to 8 tonight at Alaimo's store, Havana Moe's, 200 East Ave.

### Voting for Beer

Question: What do you think about the plan to register people over age 21 to vote with free beer?

- It's a good idea to encourage the democratic process.
- This is a disgrace because it encourages the consumption of alcohol.
- This is a cheap ploy to get votes.
- This is my type of political party!
- How many times can I register?

[Vote](#)

[View Results](#)

029855

"It's just a fun way to get young people interested in voting," Clifford said.

The festival is a great place to promote voting because of the captive audience, said Christopher Burns, co-founder of the Rochester Young Professionals.

"Young people like to drink and politics is not something they usually think about," said Burns, 29.

"I hope people won't be inebriated when they vote, but it seems like a fun way to get people involved in the voting process."

Participants will vote between High Falls' two new beers, Dundee's Amber Lager and Pale Ale, both to be introduced this fall. Hubbard said the event is a good marketing opportunity for the local company and a way to help a good cause. About 20,000 people, largely those in their 20s, attend each East End festival.

Clifford said she and Hubbard developed the idea, a nonpartisan affair, because locally and nationally it's difficult to get young people to vote.

Statistics show that the 18-to-24 age group has the lowest percentage of registered voters and number of people who come to the polls.

Since 1972, the young voter participation rate has declined by about 13 percent overall — the largest drop of any age group, according to the National Association of Secretaries of State. In Monroe County, less than 8 percent of registered voters are ages 18 to 24, also the lowest of any age group.

Jennifer Kunselman, 27, of Rochester said festival attendees could benefit from being able to register to vote there. Yet she said having the option at a Red Wings game would be even better.

"I think it's important to target a younger audience," Kunselman said. "But there is a whole other population that won't be frequenting the festival."

David Mammano, president of the local chapter of the Young Entrepreneurs Organization, said the idea is good because it promotes voting, but he doubts it will help. He said people will vote if they want to, not because of free beers.

"Maybe they will have better luck if they have beer on Election Day."

## Defendant in voting scandal to tell side

August 20, 2005  
Marc B. Geller  
*The Monitor*

McALLEN — One of the people at the center of a purported votes-for-money scheme in the McAllen city elections expects to testify before the grand jury next week.

"I contacted (assistant criminal district attorney) Paul Tarlow and I said that I wanted to go before the grand jury; I wanted to tell them my side of the story," said Jose "Joey" Lopez, 22, of McAllen, on Friday. "I don't know if anybody is going to hear me, but I'm going to be able to go over there and tell them what truly happened."

The grand jury is investigating allegations that politiqueras, or paid political operatives, violated laws governing early voting via mail.

Hidalgo County District Attorney Rene Guerra also has said grand jurors would be reviewing surveillance recordings in which Lopez is heard offering Othal Brand Jr. 400 mail-in ballots in exchange for \$4,000. Brand is the son of former mayor Othal Brand Sr., and manager of the elder Brand's recent mayoral campaign.

Brand Jr. has said he called the FBI immediately after his first meeting with Lopez and was referred to the Texas Rangers. Sgt. Israel Pacheco, a Texas Ranger who conducted his own investigation, has said that he directed Brand to make the recordings.

Grand jurors are likely to hear a much different account of what happened from Lopez than the account they heard from Brand Jr. in earlier testimony.

Lopez acknowledges that he accepted money from Brand Jr., but maintains that he never had access to any ballots and denies he had any intention of actually delivering any. Lopez also asserts that Brand Sr. initiated the negotiations for the mail-in ballots and that Brand Jr. contacted law enforcement only after Lopez failed to deliver them.

"This guy wanted to get his dad elected by all means necessary, including getting a kid like me to try to get him votes," Lopez said. "I couldn't do it for him, so I kept on making excuses, and he kept on giving me money."

Brand Jr. disputes Lopez's account and doesn't think the grand jury will buy it.

"I've got nothing to hide," the younger Brand said. "I have no worries about anything that he would want to say to them."

Brand Jr. declined to discuss his own testimony before the grand jury, citing instructions from the District Attorney's Office.

State law prohibits disclosure of the proceedings of a grand jury.

"I cannot tell you who is or who is not going to testify before the grand jury," Tarlow, the assistant criminal DA, said. "What goes on in the grand jury room is secret, as a matter of law."

Guerra, the DA, said Wednesday that the grand jury continues to investigate the McAllen election scandal and could issue indictments as early as next week.

029857

Brand Jr. said he was optimistic the outcome will help bring integrity to future elections in the Rio Grande Valley.

"I'm just hoping that the grand jury has some impact on cleaning up the voting system," he said. "I certainly hope that will have some impact in deterring anybody attempting to do any voter fraud of any type in any election."

His optimism is guarded, however, in the event the grand jury indicts voters but not politiqueras.

"It will not deter politiqueras at all," he said. "If they think they're going to curb the activity by going after voters in the 75- to 100-year range, that's not going to accomplish anything."

Earlier this week, the grand jury investigating the McAllen elections indicted two women for voting twice in the San Juan city election. Maria Louisa Rodriguez and her daughter of the same name were charged with illegal voting, a third-degree felony that carries a two- to 10-year prison sentence and a maximum \$10,000 fine.

The politiqueras who brought the mother and daughter to vote for a second time on Election Day were identified in an internal city memorandum, but Guerra said neither of the women — Cindy Rodriguez, wife of City Commissioner Bobby Rodriguez, and Vicki Loreda, wife of ex-mayor Robert Loreda — would face charges.

Lopez, for his part, said he's prepared to face the consequences of accepting more than \$1,000 from Brand Jr. and breaching their verbal agreement, but added that he plans to fight any charges that he violated election laws.

"I feel like I'm part victim," he said. "It's like I'm being accused of something that I didn't do. I should have never gotten into it or even messed around with it, but I felt that I needed the cash. ..."

"I just want to make sure that they get my side of the story and they get what I feel is the true side of the story."

## DA INVESTIGATES ALLEGED BRIBES FOR EARLY VOTES

TX

STAFF & WIRE REPORTS

September 09, 2003

LONGVIEW - Gregg County District Attorney William Jennings is investigating a Gregg County-area employer who allegedly gave a handful of \$10 Neal McCoy concert tickets to workers who cast early ballots in the constitutional amendments election.

Jennings said he is choosing not to identify the employer yet.

He said he began his investigation Friday afternoon after he was contacted by the county elections administrator who had received phone calls from media.

"An employer in Gregg County had given concert tickets in exchange for people voting," he said. "I've got no indication that there was an exchange of a ticket to vote a certain way. Obviously, there would be no way an employer would know how that person voted under our system."

He said that a half a dozen to two dozen people received tickets to the concert, performed last week.

"The concern is not with the voter. It is whether the employer went too far in encouraging the employee to vote," Jennings said.

The most serious allegation possible in this incident is a state bribery law, that, if violated, is a second-degree felony, punishable by two to 20 years in prison, Jennings said.

"I'm not sure that's the offense that's been committed just yet," he said. "I'll get the facts and apply the facts to the law and see where we go from there."

There may be other election code issues he will also look at, not quite as serious as the state bribery law, he said.

The high-profile amendment on the ballot is Proposition 12, which would ratify limits on non-economic damages in medical malpractice lawsuits and clear the way for future Legislatures to set similar caps in other civil suits as well.

There are 22 proposed amendments on Saturday's election ballot. Early voting ended Tuesday.

Doctors, hospitals and other health care providers are waging a strong campaign for Prop. 12, while plaintiffs' lawyers and some consumer groups are fighting it.

The proposal has attracted a larger-than-normal early voting turnout in Gregg County for a constitutional amendments election, the county's elections administrator, Hattie Owen, told the Houston Chronicle in Tuesday's editions.

Meanwhile, Kathy Allbright, a paralegal at a Longview law firm, said she was puzzled when on the

029859

second day of early voting she went to cast her ballot at the Gregg County courthouse and was asked by an elections official if she were "legal or medical."

"She (the elections official) said the medical people were asking for receipts showing that they had voted because they were getting bonuses," Albright said.

But Owen said rumors that health-care providers had offered their employees bonuses for voting were unsubstantiated.

Jennings also said in his investigation he had not found any of these other rumors to be substantiated.

Virginia State Police are investigating allegations of voting fraud during last year's Appalachia town council election, Wise County Commonwealth's Attorney Chad Dotson confirmed Monday.

State police are looking at claims that supporters of an unidentified council candidate offered food, cigarettes and liquor to residents of the Inman Village public housing complex in exchange for letting the supporters fill out their absentee voting ballots, according to a story in Sunday's Roanoke Times.

Voters in the May 2004 election returned incumbent Councilman Ben Cooper to office and chose newcomers Eddie Gollaway and Owen "Andy" Sharrett III for the three open seats on the five-member council.

Cooper, a former mayor and acting town manager, led the polling with 351 votes, followed by Gollaway with 340 and Sharrett with 312.

Falling short were longtime councilman and current Mayor Gary Bush, with 244 votes; incumbent Rick Bowman with 221 votes; and former councilman Debbie Bouton with 212 votes. Also, Ben Surber received 28 votes despite having announced that he dropped out of the race.

The Roanoke Times story reported that of 585 people who voted, 108 cast absentee ballots - an absentee rate of 18 percent, compared with a usual statewide rate of about 5 percent.

The story quotes three Inman Village residents as confirming their absentee ballots were filled out by someone other than themselves. The Roanoke Times did not identify the candidate or the candidate's supporters who allegedly bribed the residents, because so far no charges have been filed in the investigation.

Dotson Monday said the investigation is ongoing, but he hopes to receive a state police report in about two weeks. At that time, he said, he will determine if anything in the report merits the filing of criminal charges.

# FBI's Sham Candidate Crawled Under W.Va.'s Political Rock

By Michael E. Ruane  
Washington Post Staff Writer  
Friday, December 2, 2005; A01

The three men were sitting in a car outside a rural elementary school in West Virginia when the candidate handed over \$2,000 in cash and said, "Buy all the votes you can."

In the hamlets and hollows of Logan County, where political shenanigans are legendary and it's said that a vote can be bought for a pint of whiskey or a \$10 bill, some say there was nothing extraordinary about the transaction.

Here's what made it unusual: Although Thomas E. Esposito was on the ballot as a candidate for the state House of Delegates, he wasn't really running for office.

The small-town lawyer and former mayor was just bait. And when the FBI lowered him into the murky waters of southern West Virginia politics last year, it dangled him like a shiny lure.

The whole affair landed yesterday in a Charleston courtroom, where a defense attorney cried foul, accusing the government of "outrageous" conduct and of violating the sanctity of the election process. He said the charade robbed 2,175 citizens who voted for Esposito -- unaware he wasn't for real -- of a constitutional right.

But a federal judge sided with the government, ruling after a 30-minute hearing that corruption in Logan County had been endemic "for longer than living memory" and that the bogus election campaign might have been the only way to root it out.

In Logan County, which is about an hour south and a world removed from Charleston, there are people who agree. "This stuff has been going on since I was a kid," Kenneth McCoy, 54, a disabled miner, said this week. "They had to come up with some way to stop it. Personally, I have no problem with it."

Political corruption in southern West Virginia goes back generations, residents and observers say.

"Federal authorities have been intervening in southern West Virginia for 80 years, at least," said Topper Sherwood, co-author of a 1994 book on longtime Logan County political chieftain Raymond Chafin. "More often than not, their role is to come in and remove power from those who have acquired it illegally."

Moss Burgess, 62, a retired Logan County high school chemistry teacher who has run unsuccessfully for local office, said: "I'm glad that somebody's trying to clean up the system in this county. Most people, they've more or less accepted it as common."

U.S. District Judge David A. Faber, chief judge for the Southern District of West Virginia, asserted in yesterday's ruling: "It has been nearly impossible to prosecute corruption in Logan County because persons with knowledge of it are reluctant to testify against others in their community."

Advertisement

029863

The current case began in 2003, when Esposito, a lawyer who had been mayor of the City of Logan for 16 years, entered a plea agreement with the government in a corruption case, according to court papers. He had been accused of paying the \$6,500 bar tab of a local magistrate for reasons not specified and then paying the magistrate to keep quiet about the arrangement. The magistrate was later indicted on an extortion charge.

Under the plea agreement, Esposito began helping the Justice Department in its investigation of county political corruption, which the department described as "commonplace and widespread."

Assistant U.S. Attorney R. Booth Goodwin II, in a court filing last month, said that as Esposito met under cover with people about vote buying in the run-up to the 2004 primaries, investigators concluded that a campaign sting could provide a "virtual treasure trove of evidence."

"Without that step, it was feared, the undercover operation would dissolve, and a valuable opportunity to catch a number of persons in the act . . . would be lost," Goodwin wrote. So the government had Esposito run. He entered the race Jan. 30, 2004, filing the appropriate papers with the West Virginia secretary of state. He was one of 10 Democratic candidates for four seats in House District 19, which includes Logan County.

"He had signs; he had stickers; he showed up at campaign events," said Chris Stratton, a reporter for the Logan Banner newspaper. "All that stuff was for show. It was there to make him look like a legitimate candidate."

Gregory J. Campbell, the attorney for Perry French Harvey Jr., 56, the defendant in the case, said: "The government knew that all this was false. [Esposito] was bait. Nothing more, nothing less. They tossed him out there, and they were seeing who'd come packing. And he was live bait. He was out there, and he was active."

According to court papers, on April 12, 2004, Esposito met with Harvey, a retired coal miner, and another man, Ernie Ray Mangus, at a political rally at the elementary school. They sat in Esposito's car, and Esposito gave Mangus the \$2,000. Mangus, who Campbell said has been granted government immunity, gave half the money to Harvey.

"The other guy gives my guy 1,000 bucks, and that was as far as it goes," Campbell said in a telephone interview Tuesday. "The other guy has been given immunity and will testify that my client knew that the money was to buy votes. . . . [Harvey] was told by the guy that had the money, 'Esposito gave me this and said buy all the votes you can.' My guy said, 'I ain't buying any votes,' and didn't."

Harvey, who voted for Esposito, was indicted Aug. 17 on one count of conspiracy to buy votes. He is scheduled to go on trial Dec. 14. Yesterday's ruling was on his attorney's October motion to have the charges dismissed. Esposito, reached at his law office in Logan County, declined to comment yesterday.

The FBI withdrew Esposito from the race two days after the meeting with Harvey and Mangus, and the Justice Department has said it took great pains to alert the public by way of the media. But his name remained on the ballot, and on primary day -- May 11, 2004 -- he got more than 2,000 votes, placing last in the field.

"By placing a false candidate in the election, a sham candidate, one [the government] knew could not take office, every vote that was cast for Esposito was a vote that an honest voter could have cast for an honest candidate," Campbell wrote in his motion to have the charges dismissed.

But Goodwin, the government attorney, countered in a filing that the decision to have Esposito run was approved by his office, the local FBI special agent in charge and the agency's Criminal Undercover Operations Review Committee in Washington, whose approval is required for all sensitive FBI undercover operations.

"Esposito did not engage in any unlawful conduct by becoming a candidate for the House of Delegates," Goodwin wrote. "Rather, his candidacy merely provided the stage on which defendant acted."

"The conduct of the United States in carrying out the undercover investigation was necessary and proper to root out

FBI's Sham Candidate Crawled Under W.Va.'s Political Rock  
systemic corruption," he wrote.

Page 3 of 3

Judge Faber noted yesterday that previous rulings have held that for a government investigative action to be improper it "must be so outrageous as to shock the conscience of the court."

"Here, in looking at the totality of the circumstances," he wrote, "the court's conscience is not shocked in the slightest."

During the hearing, Campbell said, the judge asked him: What else could the Justice Department have done?

"Not violate the constitutional rights of the voters of Logan County," he said he replied.

## Ky. Jury Convicts 2 Men of Election Fraud

Ky. Jury Convicts 2 Men of Election Fraud in 2002 Races; Both Men Face About 2 Years in Prison

*The Associated Press*

LONDON, Ky. Sept. 16, 2004 — A Kentucky businessman was found guilty Thursday of election fraud for orchestrating a scheme to buy votes from impoverished mountain residents in two races in 2002.

The jury deliberated about four hours before returning the verdict against Ross Harris, a Pikeville coal operator whom prosecutors portrayed as the kingpin of the election fraud conspiracy. An associate was also convicted, and both men face about two years in prison.

The verdicts came after a trial in which various witnesses told of voters gathering in a church parking lot in an Appalachian county to collect \$10 bills after leaving the polls in the 2002 election. Others testified about large contributions to some candidates before the election to be used to buy votes.

In closing arguments Wednesday, federal prosecutor Ken Taylor described Harris as a behind-the-scenes political player who "secretly funds campaigns with illegal contributions."

Defense attorney Larry Mackey said the depiction was false. He said his client was being treated for life-threatening cancer during the period in question and would not have taken time from his hospital bed to help buy votes in the elections.

"We appreciate the jury's attention throughout the trial, but at the end of the day we're disappointed with the verdict," Mackey said, who vowed to appeal.

Harris was convicted on one count of conspiracy to commit mail fraud and to buy votes, three counts of mail fraud and one count of structuring withdrawals from a bank account to avoid federal reporting requirements.

Glen Turner, an executive in Harris' mining company, was convicted of conspiracy to commit mail fraud and two counts of mail fraud. The mail fraud counts involve the sending of bogus campaign finance reports to the state.

Prosecutors claimed Harris illegally contributed some \$40,000 to a former state senator's unsuccessful judicial race, and that Harris and Turner gave an additional \$25,000 to the re-election campaign of a judge. They said the money was used in a scheme disguised as a "get out the vote" effort.

The two men showed no reaction as the verdict was read. Both men declined to comment to reporters afterward.

## Imprisoned judge-executive testifies in election fraud trial

ROGER ALFORD  
Associated Press

**LONDON, Ky.** - Imprisoned Knott County Judge-Executive Donnie Newsome testified Thursday that he received \$25,000 in cash from two eastern Kentucky businessmen who are on trial for election fraud.

Newsome, who is serving 26 months in federal prison after being convicted of election fraud last year, agreed to testify against Ross Harris of Pikeville and Glen Turner of Drift in exchange for a lighter sentence. Defense attorneys claim Newsome made up the story about illegal cash contributions in an effort to get leniency.

Prosecutors claim Harris is the kingpin in a scheme to buy votes from impoverished mountain residents. They allege that Harris illegally funneled money into Newsome's 2002 re-election campaign.

Newsome - dressed in white shoes, jeans and a red shirt - said he was given cash contributions on three occasions: One for \$5,000 from Harris; two for \$8,000 and \$12,000 from a man he said he believed to be Turner.

"I used it in my campaign," Newsome said. "When I needed it, I would put it in my account."

Newsome said he received \$60,000 in cash donations for his re-election campaign that year and an additional \$14,000 in checks.

Newsome, who has continued to serve as judge-executive despite his conviction, said he didn't use any of the money to buy votes.

Newsome is expected to be called back to the witness stand when the trial resumes Friday morning in U.S. District Court in London. His brother, Bobby Newsome, also is scheduled to testify. Prosecutors said Bobby Newsome was present when Turner gave the judge-executive money.

Harris also is accused of funneling money into a Pike County campaign in an unsuccessful effort to defeat an incumbent judge, whom he blamed for a sex scandal involving one of his friends. The FBI alleged that Harris conspired to influence the election by providing money for a scheme disguised as a "get out the vote" effort. That involved paying people to haul voters to the polls.

Defense attorneys say the only financial contribution Harris made to the John Doug Hays campaign for Pike County district judge was a legal donation of \$1,000.

A jury of 11 women and five men has been listening to testimony for 1 1/2 weeks.

The charges against Harris and Turner are the latest in a string of federal election fraud cases from the region. Hays and seven others are scheduled for trial in October.

Assistant U.S. Attorney Ken Taylor contends that Harris illegally funneled some \$40,000 into Hays' unsuccessful campaign after a sex scandal resulted in the resignation of Pike County Circuit Judge Charles Lowe Jr. Taylor said Harris and Lowe were close friends.

Lowe resigned last year rather than face possible removal by the Judicial Conduct Commission for a sexual relationship with a woman involved in an adoption and child custody dispute in his courtroom.

Taylor said Harris was so angered by the scandal that he tried to lash out at the woman, Debbi Hylton-Mullins, and her husband, Pike County District Judge Darrel Mullins, who was seeking re-election at the time.

Hays was running against Mullins.

## Logan Clerk to Plead Guilty in Election Fraud Case

Posted 11/29/2005 06:08 PM

### Voter Fraud in West Virginia

Story by The Associated Press

Logan County Clerk Glen Dale Adkins plans to plead guilty in the ongoing probe of election fraud in southern West Virginia.

Federal prosecutors Tuesday requested a plea hearing date for the 57-year-old. His defense lawyer disclosed plea negotiations earlier this month when his scheduled U-S District Court trial was postponed.

A federal grand jury indicted Adkins, also known as "Hound Dog," in July on charges alleging he conspired with others to bribe voters in elections between 1992 and 2002.

As part of their vote-buying probe, prosecutors previously landed guilty pleas by Logan County's sheriff and the city of Logan's police chief, prompting both to resign.

Like those former officials, Adkins is a Democrat. That party dominates both counties, and the election fraud charges largely focus on Democratic Party primaries.

## ***West Virginia Democrats on Defensive After Fraud Probe***

WV

CHARLESTON (AP) - West Virginia Democrats are on the defensive after the latest wave of election fraud charges again involve the Mountain State's dominant political party.

A federal magistrate last week arraigned and set July 11 trial dates for five men charged in an investigation into vote-buying in southern West Virginia.

Like five other area residents previously charged in the probe, the Lincoln County men are accused of aiding Democratic candidates with an alleged scheme to exchange cash or liquor for votes.

And like the 2004 round of criminal charges, the most recent indictment targets a Democratic officeholder: Lincoln County Circuit Clerk Greg Stowers. The then-sheriff of neighboring Logan County, Johnny "Big John" Mendez, was charged with vote-buying last year. Mendez resigned, pleaded guilty and was sentenced to home confinement and probation.

Stowers, 48, has vowed to fight the conspiracy count facing him. Though a lawyer, Stowers declined to comment on the pending case last week.

Gov. Joe Manchin considers the Stowers family to be political allies. Greg Stowers' brother, Lyle, volunteered for his campaign and was a "big supporter," Manchin spokeswoman Lara Ramsburg said.

Though no Republican has been named in the election fraud case, the state GOP has not been immune to criminal charges. A Republican state Senate candidate, Mark Anthony Reynolds of Fairmont, was convicted on federal wire fraud and obstruction of justice charges last year and sentenced to 10 years in prison. Reynolds had posed as a Republican Party insider as part of a shakedown scheme, prosecutors said.

And a pending Federal Election Commission complaint alleges former state GOP Chairman Kris Warner violated the law by pairing his brother's name with President Bush's on yard signs during Monty Warner's unsuccessful run for governor. The signs drew complaints from the Bush campaign before the election, and helped fuel the push to remove Kris Warner as chairman. He resigned last week.

The investigations are not a Democrat or Republican issue, Ramsburg said. "This is a law enforcement issue, just as the Republican Party leadership, specifically the Warners, are currently under federal investigation for things that happened during the campaign."

Political corruption is not new in West Virginia. Convictions have been numerous and both parties have a former governor sent to federal prison.

Republican Gov. Arch Moore pleaded guilty to five corruption-related felonies 15 years ago. Among his crimes, the three-term governor passed around \$100,000 in unreported campaign cash "to influence, secure, and retain the votes and influence of voters" during his successful 1984 campaign.

Democrat Wally Barron was cleared of a 1968 bribery indictment but in 1971 was indicted again on jury tampering charges stemming from his 1968 trial. He spent four years in prison.

The latest federal indictment alleges the Lincoln County defendants aimed to maintain power over county jobs, road gravel and paving materials, and property tax assessments, among other areas. Toward that end, the conspiracy sought to buy votes to secure the election of certain candidates, including Stowers, "to countywide office," the charges allege.

That has not prevented state Republicans from raising the question of wrongdoing by other Democratic candidates on the "slates" allegedly passed out by the conspirators. Several of the charges focus on the 2004 9869

primary, when Gov. Joe Manchin, U.S. Rep. Nick Rahall and even Sen. John Kerry, D-Mass., the Democrat's eventual nominee for president, were on the ballot.

Raleigh County businessman Rick Snuffer, for instance, offered Friday to seek Rahall's seat "if Rahall is forced to leave office due to the expanding level of indictments and investigations into voter fraud."

Snuffer, who ran unsuccessfully for the 3rd District seat last year, noted that "I understand no one has publicly tied the Congressman to vote buying and other voting improprieties."

Republican U.S. Attorney Kasey Warner's office filed the vote-buying charges. The cases are being handled by two assistant prosecutors whose tenure in that office precedes that of Kasey Warner, a Bush appointee.

Kasey Warner has repeatedly said he has erected an "incredibly high wall" to separate the activities of his office from the political activities of his brothers, Monty and Kris.

KY

## Man charged with offering beer for vote

LUDLOW, Kentucky (AP) -- A man tried to buy a vote with a 12-pack of beer, according to police in northern Kentucky.

Edward Lucas offered the beer to an 18-year-old student at Ludlow High School in exchange for a no vote on a proposed increase in school property taxes, Ludlow police officer James Tucker said in an affidavit.

Lucas was charged Friday with making or receiving expenditures for vote, a class D felony that can land him in prison for one to five years.

Lucas, 40, denied the charge.

"I don't know the boy, and that's not exactly what was said," Lucas said.

"I said, 'I hope it doesn't go through and if it doesn't, I'm going to have a big beer party.'"

Lucas was arrested Friday and released on bond Saturday.

Police dispute his version of the exchange, but declined to give specifics.

The tax increase was on the ballot Tuesday and lost.

It would have generated about \$75,000 a year for school construction projects.

Bysiewicz defends state voting rolls

Lolita C. Baldor, Register Washington Bureau October 22, 2002

WASHINGTON — Recent suggestions that up to 54 Connecticut voters may have cast ballots in two different states in 2002 are not true, Secretary of the State Susan Bysiewicz said Monday after a weeklong investigation.

Bysiewicz said the data provided by the Republican National Committee was "highly flawed" since more than half of the people named never even voted in Connecticut in 2000.

"It appears that the RNC has made allegations that were completely unfounded," she said. "And I hope this was not an attempt to distract voting officials or discourage voters from participating on Election Day."

Of the 54 voters listed by the RNC as possibly voting in two states, 15 voted only in Connecticut; 29 voted only in a state other than Connecticut; three were only registered in Connecticut and four names were discounted because they had different dates of birth.

Ultimately, she said, the names of three voters have been referred to the FBI and U.S. Attorney because Bysiewicz has been unable to get the necessary voting information from the other state.

RNC spokesman Dan Ronayne made it clear when the initial documents were released Oct. 8 that Republican officials were not charging anyone with wrongdoing or election fraud. Instead, he said the RNC had analyzed its voter lists, compared records, found the discrepancies and released them to state authorities to point out possible problems.

"To say this was an attempt to take time away from the election is patent nonsense," he said, adding that RNC officials were

"very disciplined" in their research.

Bysiewicz acknowledged that state officials found that some of the problems were caused by errors by local voting officials who entered the wrong names into the computer.

When voters cast their ballots on Election Day, the poll workers check off their names on large sheets.

That information is later transferred into the computer - which is where some of the errors occurred, Bysiewicz said.

She added that the problems with the 51 voters already cleared lead her to believe that the three names still being investigated also may simply be a case of human error.

Ronayne said Bysiewicz should examine and correct the problems, "instead of engaging in partisan accusations - after all, we all share the same goal: clean and fair elections."

"Our only motivation is to promote clean and fair elections, and the Secretary of the State has apparently found problems in the record-keeping in Connecticut as a result of an investigation brought on by our research," he said.

The RNC also turned over the names of about 7,700 voters who may be registered in Connecticut and one other state. Bysiewicz said she has referred those names to local voting officials in the various towns.

EMPLOYMENT MARKETPLACE

The officials have until the end of the year to research the voters and determine if the records are correct.

# Despite Crackdown, Some Double Voting

Worst Problems Cited Involve D.C., Md.

*DC/md/VA*

By Dan Keating  
Washington Post Staff Writer  
Thursday, October 31, 2002; Page B08

Double voting in the District and Maryland has persisted despite a 1998 effort to crack down on the practice, according to election records, and local officials say that an election reform law signed this week by President Bush will not fully address the problem.

Records indicate that two dozen voters cast ballots in both the District and Maryland in the Sept. 10 primary and that 90 voters did so in the November 2000 election. Double voting in the District and Virginia appears to be far less common -- the records show only six people voting in both the District and Northern Virginia in November 2000.

A provision in the new federal law requires states to create centralized, computerized voter rolls to prevent multiple voting by people registered in more than one place. The District and Maryland already have such records, however. The problem is that different jurisdictions seldom compare registration lists or voting records to spot duplicate names, Washington area elections officials said.

The last time such a review was done was in 1998, when D.C. elections officials looked at voting records and gave the U.S. attorney's office the names of 261 people who appeared to have double-voted in the District and Prince George's County during the previous three years.

But that investigation did not lead to any prosecutions, said Channing Phillips, a spokesman for the U.S. attorney in the District. Phillips said yesterday that officials could not find the paperwork explaining why no one was prosecuted, and Alice P. Miller, executive director of the D.C. Board of Elections and Ethics, said her office could not locate those records either.

Miller said the District has not made a more recent attempt to find double-voters, in part because the city's drive to obtain and install new voting equipment was a higher priority.

A review by The Washington Post found that more than 10,000 people are registered to vote in both the District and either Prince George's or Montgomery counties. The Post found people listed as having cast ballots in the District and Maryland on the same day by studying voter histories that were based on signatures collected when voters checked in at the polls.

When contacted by a reporter, the voters said that they had cast a ballot only once and that the records must be wrong.

"That must be a mistake," said Denise Daniels, 33, listed as voting in both Prince George's and the District in 2000 and 2002. "I'm going. I have to go. I don't know what this is about."

Harold Bobbitt Jr. also is listed as a double-voter.

"I moved to College Park," he said. "I'm no longer a District voter. I started voting in College Park in 2000, but I didn't vote in D.C. That might be a mistake in the D.C. computer."

Bobbitt noted that he has the same name as his father, Harold Nathaniel Bobbitt Sr. The voting records

029874

however, indicate that ballots were cast in the District and Maryland in 2000 and 2002 by Harold Nathaniel Bobbitt Jr., age 46. And Bobbitt and his father are listed as having voted in last month's D.C. primary.

The most prolific repeat voter, according to the records, is Betty J. Johns, 69, listed as casting ballots in both Maryland and the District in the 1996 and 2000 presidential elections, as well as in the Democratic primaries in the District and Prince George's on Sept. 10. A woman who answered the phone at her residence said no one there would talk to a reporter.

Larry Poteat Jr., 22, moved to Prince George's County this year from the District but was listed as voting in both places in September. His father, Larry Poteat Sr., said that he voted in the primary in the District, yet there is no record of the father's vote.

"If they don't have me down as voting, something's crazy," the father said. "They gave both of the votes to [my son], in Prince George's and D.C."

Election officials said it is possible for precinct workers to make mistakes when recording who voted. Such errors also would be a serious problem, voting reform activists say, because they could make it impossible to compare the number of ballots counted with the number of people listed as voting. Matching those two figures is a first step in making sure that ballots were not discarded and that phony ballots were not counted.

In the District, vote fraud is a felony punishable by five years in prison or a \$10,000 fine. In Maryland, the punishment is a fine of up to \$2,500 and up to five years in prison.

When registering to vote, people are asked on a form where they were previously registered, but some don't fill it out. The form is then sent directly to the previous jurisdiction if it is in the same state. But if it is not in the same state, the form goes to the capital of the state where they used to live, which slows down the process, election officials said.

Officials said the best way to weed out such names is to compare lists of all registered voters, which the District initiated in 1998. Election supervisors in Prince George's and Montgomery said it would be up to the state to launch such an effort.

Reform advocates said cleansing registration lists of old names and maintaining accurate voting records are crucial steps in ensuring clean elections.

"It doesn't matter what kind of voting equipment you have if you have dirty voter rolls and you don't have the people to keep them clean," said Deborah Phillips of Arlington, former head of the Voting Integrity Project.

## No fraud found in Duval vote

FBI probe finds no double ballots cast THE ASSOCIATED PRESS

**JACKSONVILLE** - Investigators found no evidence that anyone cast more than one ballot in the November election in Duval County, although an investigation into fraud allegations from early voting in the county continues.

County Elections Supervisor Jerry Holland said the FBI investigation didn't turn up any evidence that voters cast more than one ballot in the county either on Nov. 2 or in absentee voting.

Officials said in January that a review of voting records uncovered more than 50 cases in which it seemed the same person had cast an absentee ballot and voted on Election Day or otherwise voted twice in some way, such as voting in two places, leading U.S. Attorney Paul Perez to launch a federal investigation.

But Holland said each apparent case of double voting was attributed to a clerical error, such as someone signing the voter rolls at one polling place before being told they had to go to another location to vote. One case involved a father and son with the same name who signed in the wrong place.

About 380,000 people voted in the November election in Duval County, so the votes in question represented less than one-50th of 1 percent.

"These results show voters that they can have confidence in the elections office," Holland said.

Double voting is punishable by up to five years in prison and a \$10,000 fine.

The FBI will continue to look into some allegations of potential voter fraud that stemmed from early voting in the county, Holland said.

"These results show voters that they can have confidence in the elections office."

FL Sun-Sentinel – October 25, 2002

FL

**Florida has more double voters than any other state**

By Sam Trantum  
Staff Writer

More than 361,100 people were registered to vote in multiple states during the 2000 elections, and 1,636 of those apparently cast more than one ballot, according to the Republican National Committee.

Florida was the worst offender in both categories, with 67,065 duplicate registrants and 307 double-voters, according to the committee's report.

While the Republicans insist they released the report in an attempt to help state officials run clean elections, Democrats say it is a partisan ploy – part of the GOP's national strategy for Nov. 5.

Florida elections officials say have not looked into the Republicans' claims but at least two other states have investigated.

Connecticut Secretary of State Susan Bysiewicz, a Democrat, said her office found that 53 of 54 supposed Connecticut double-voters – including six who allegedly had cast ballots in both Connecticut and Florida – had not cast ballots in more than one state. The office did not investigate the claims of duplicate registration.

"We have highly flawed data and not one shred of evidence to support the very serious allegation of double-voting," Bysiewicz said.

She said her office had been unable to get the information it needed to figure out whether the 54th person on the list had voted in Virginia as well as Connecticut, so it referred the case to the FBI.

"Of course she's going to say that there's no cases of this happening," RNC spokesman Kevin Sheridan said. "The secretary of state is in an election fight, and she's defending her own record."

New York City elections officials also are investigating the Republicans' claims of voting fraud. There has been no resolution of the issue so far, spokeswoman Naomi Bernstein said.

Registering in more than one place is easy to do and isn't illegal if it isn't intentional.

"I think it's something that people do once. They move someplace and do it again," National League of Women Voters spokeswoman Kelly Ceballos said. "They might not be aware of it."

The problem is there's no good way to make sure someone doesn't vote in more than one state.

There's no official national voter database, and in many states there isn't even a statewide voter database. The RNC pieced together its national database by buying voter lists state by state, county by county.

Voting twice in the same election wouldn't be too hard, either. A voter could cast an absentee ballot in one state and vote in person in another, for example. Such double-voting

has long been rumored to be practiced by part-time residents of Florida.

"I'm sure that a lot of people that winter down here are registered down here just like they are up north," Boynton Beach resident Dan Winters said.

Casting multiple votes in one election is a felony, elections officials say.

By releasing the report on double-voting, the RNC was just trying to help ensure clean elections, Sheridan said.

"We tried to do nothing but be helpful to the authorities," Sheridan said.

But Bysiewicz said she did not think the RNC's intentions are so innocent.

"I believe this is a deliberate attempt to distract election officials across the country from their responsibility to encourage voter participation and administer fair elections," she said.

Republicans shouldn't spend so much time trying to keep people who shouldn't be voting from casting ballots, said Kevin Jefferson, president of the Democratic National Committee's Voting Rights Institute.

"What they should be doing is making sure that people are going to the polls, that they have the right to cast the ballot and have that ballot counted across Florida," Jefferson said.

## Lawyer admits voting twice in four elections

A Kansas City, Kan., lawyer admitted today to illegally voting in both Kansas and Missouri.

James D. Scherzer, 68, pleaded guilty in federal court in Kansas City to four counts. He cast double votes in two elections in 2000 and two elections in 2002. He will be sentenced later to a maximum on each count of one year in prison, one year of probation and a fine of up to \$100,000.

Scherzer was charged after an investigation by *The Kansas City Star* found thousands of double-registered voters in the area and several hundred cases of possible double voting. Scherzer declined comment Monday.

Previously, he told a reporter that he acted on his own with no particular motive.

"I don't have some rationale, or a highfalutin story," he said.

No sentencing date has been set.

## Man Pleads Guilty To Voting In Kansas, Missouri

Mon Mar 28, 3:41 PM ET

A Kansas man pleaded guilty in federal court Monday to voting in federal elections in both Kansas and Missouri.

James D. Scherzer, 68, of Kansas City, Kan., pleaded guilty to a federal charge accusing him of four counts of voting fraud, which is a misdemeanor civil rights violation. The information, which was filed on Dec. 13, 2004, replaces a criminal complaint filed against Scherzer on Oct. 21, 2004.

- [Unclaimed Property? Show Me The Money](#)
- [Get A Great Deal On Your Next Car](#)

Federal investigators said that Scherzer voted twice, in both Wyandotte County, Kan., and Kansas City, Mo., in the primary and general elections in 2000 and in the primary and general elections in 2002. As a resident of Kansas, Scherzer was not qualified to vote in Missouri.

"We take vote fraud seriously because it diminishes the value of legitimate votes cast by qualified voters. The Equal Protection Clause of the Fourteenth Amendment guarantees qualified voters the right to have their votes counted without being diluted by spurious ballots cast by unqualified voters," U.S. Attorney Todd P. Graves said a news release.

Scherzer could face a maximum of one year in jail and a \$100,000 fine.

Recounts serious matter

BY RICK THURMOND / SUN CHRONICLE STAFF

Eleanor Ruest, a longtime North Attleboro election commissioner, is not amused.

For days on end, jokes and gibes have been directed at Florida election officials who, for just as long, have been squinting through pinpricks in stacks of punch card ballots, trying to divine each voter's intent in the closest presidential election in more than a century. "What else would you expect to see," Ruest huffed. "Anyone who thinks that's funny obviously has never been through a recount."

*mas*

While the eyes of a nation look south to Florida and what seems an electoral train wreck, Ruest and others who have been through recounts say what's going on now in Florida has happened here, and can happen almost anywhere a voter walks up to a ballot box.

Messy litigation in a high-profile election? Massachusetts has been there, done that.

Four years ago, after a recount, it came down to the courts to decide who would be the Democratic nominee to represent Massachusetts' 10th Congressional District. That Democrat still holds the seat.

Voter fraud?

While election officials say outright fraud is so rare these days it's inconsequential, an Attleboro man came forward after the April 1996 primary to say he voted three times -- in North Attleboro -- just to prove it could be done.

Cliffhangers?

An Attleboro city council race in 1985 hung by a single chad, those pesky bits of paper that can dangle from a ballot when a vote is cast. After a recount, the victor suddenly was the loser -- again, by a single chad hanging from one of those punch card ballots.

029882

"No election is perfect. They can't be," Ruest said. "You've got humans and you've got machines. Both make mistakes."

Part of the system

Like it not, mistakes are part of the system. Mistakes usually don't matter, the reasoning goes, because they are random and are spread across the ballot.

"This goes on all over the country," said Rebecca Mercuri, a visiting professor of computer science at Bryn Mawr College in Pennsylvania and a frequent expert witness on computer security and voting systems.

"Voting anomalies happen all over the country, in most states," she said. "Most voting systems have an error rate of between 2 and 5 percent. Most election officials will admit to that."

The problem in Florida, and with this presidential election in general, is the margin of victory seems to be far less than the accepted margin of error.

"Flaws don't matter if the vote is 60-40," said Victor DeSantis, a political science professor at Bridgewater State College. "Those flaws show up when the vote is 50-50."

In Florida, much of the blame has been leveled at the now-infamous punch card ballot, a voting system that has been outlawed in Massachusetts since September 1998.

Massachusetts Secretary of State William Galvin threw out that type of ballot because of the havoc it caused in the 1996 Democratic primary for Massachusetts' 10th congressional seat.

The primary night count gave Philip Johnston a 266-vote lead over William Delahunt out of more than 35,000 votes cast. A subsequent recount whittled Johnston's lead to 181 votes, but still he prevailed.

Delahunt, dissatisfied with the outcome of the recount, took the matter to Superior Court where Judge Elizabeth Donovan re-examined the ballots by hand.

In question were almost 1,000 punch cards that had been blanked by voting machines and tossed out, mostly at polls in Weymouth, Abington and Orleans.

The judge determined in many cases that electronic scanners read ballots as blank only because they had not been punched

029883

cleanly through. She gave the election to Delahunt by 108 votes.

Johnston was campaigning with First Lady Hillary Clinton at a Democratic unity rally when that thunderbolt struck. He promptly filed an appeal with the Supreme Judicial Court, arguing that if ballots were left blank or were only slightly indented, it was because voters hadn't made up their minds.

But that would have meant, in Weymouth alone, almost 23 percent of voters had intentionally cast blanks and, Delahunt argued, they turned out on a stormy night to do it.

The Supreme Judicial Court affirmed Judge Donovan's ruling.

Galvin said he knew of nothing like that happening before in voting for such a high state office, and ordered state monitors to the polls for the Nov. 5 presidential election in cities and towns that used the punch card ballot.

The problem with punch cards is that votes aren't always cleanly punched through, and when they are, chad can then shift around, jamming other holes so that those votes are misread.

Attleboro area election officials had long been aware of the pitfalls of punch card ballots, and for the most part had junked them before the statewide ban was imposed.

"You could run the ballots through three times and get three different results because those chad would fall off," said North Attleboro Elections Chairwoman Diane Szpila.

North Attleboro discarded punch cards after an acrimonious election to build a new middle school in January 1995. A recount was held when the new school was approved by a 158-vote margin out of 5,290 votes cast. The school lost eight votes in the recount, but overall the project prevailed.

"A lot of the chad were still hanging on when we did the recount," Szpila said.

Ruest, who was elections chairwoman at that time, called that election, "the straw that broke the camel's back."

"Hardly any of them went through the first time," she said.

Election officials are told to keep punch card ballots away from moisture, lest they become even more difficult to punch through. So where were those ballots stored for years in

029886

01/24/2001 10:00 AM

Attleboro? On the basement floor of city hall, said Jessie Joubert, who worked for more than two decades in the city elections office.

Problems can also occur when the ballots are misaligned.

“We found a lot of ballots where the punches weren't where they should have been,” Joubert said. “There was nothing we could do. The machine automatically canceled them out. We had a lot of those, I'll tell you.”

In 1985, Tony Viveiros beat incumbent Thomas Dudson by one vote in the initial count for the Ward 2 city council seat. He lost by one vote in a recount.

“It was just like what you're seeing on TV now in Florida,” he said. “Election people looking up at a ballot, trying to figure out what was the voter's intent. If there was a hanging chad, it had to be more than half-way through.”

“I broke into tears when it was all over,” Viveiros said.

And what of punch card ballots?

“I hate 'em with a passion,” he said.

Bill Crowley, an Attleboro election commissioner, is more blunt. “They're a bitch,” he said.

“We would have disagreements every election because the count was off all the time,” Crowley said. “If we had 1,000 ballots, maybe the count would come out 995. On occasion, we'd run them through two or three times until the count came close to what it was supposed to be.

“That's sad, but that's the way it worked,” he said. “Those machines just weren't 100 percent.”

Punch card ballots are still widely used across the United States, despite their drawbacks, experts say.

In Massachusetts, four types of voting systems are used.

By far the most common is an optical scanning system which reads marks a voter makes on a ballot. It's in use throughout the Attleboro area and in 908 precincts in 147 cities and towns.

Old-style lever machines, which aren't manufactured anymore, are used in 434 precincts in 23 communities.

029885

Paper ballots are still used in 79 towns.

Four communities, Dighton, Franklin, Lawrence and Milton, still use a variation of the punch card ballot, although unlike in Florida, the names of candidates are printed on the card.

But even those systems can stumble.

"In any system, people can make mistakes," said Brian McNiff, spokesman for the secretary of state's office. "They can make mistakes with an opti-scan."

"I'm not sure the secretary would ever get into the acceptance rate of errors," he added.

Crowley said optical scanners are far better than the old punch card system, although "they're still subject to error."

"We have people who still try to punch holes through the ballot, or make an X or they circle the little oval they're supposed to fill in," he said.

And, sometimes optical scanners misread marks even when the marks are penciled in correctly.

"Readers, anything that scans things optically, have an error rate," Mercuri said.

"Even the SAT people will admit to an error rate," she said, referring to college entrance tests which for years have relied on optical scanners.

With the electoral mess in Florida flickering on television sets 24 hours a day, there have been rumblings in Congress to devise some kind of unified voting system.

It'll never happen, said Bruce Schulman, a history professor at Boston University.

"It's one of those things like the Electoral College," he said. "Legislation will be filed to reform it, but it won't get very far.

"Technologically, it's possible and it should be done," Schulman said. "But it won't be done for two reasons. First, it's too expensive. That's why so many cities are still using this ancient stuff. Then, there's the political side. Laws and established tradition say that states and local governments administer elections."

A statewide unified voting system hasn't even been discussed

029886

in Massachusetts, McNiff said.

A unified system is, so far, unworkable and unnecessary, Mercuri said.

"As long as you have a system that allows a manual recount, then you have the possibility of a recount," she said. "That's what most municipalities do.

"As long as you're willing to accept that, then every vote does count.

"Even a punch card you can hold in your hand; you can see the chad," she said. "You don't get that with an Internet system or a computer system where you touch the screen. There's no audit trail."

Besides, Mercuri said, "As a programmer, I could write an interface that would send 10 percent of Gore's vote to Buchanan. Even some high school students could do that."

And what of voter fraud?

So far, there have been no substantial charges of outright fraud in this election, although some college students in Wisconsin have admitted to casting multiple votes as a prank.

Those reports brought memories flooding back to Edmund Morrison, a South Attleboro man who said he cast three votes in North Attleboro during an April 1996 primary, just to prove it could be done.

Morrison said he did so because he had overheard a group of women in a North Attleboro restaurant talking about how they had voted more than once in the middle school election a year earlier.

Morrison had just moved from North Attleboro at that time, and still was listed on the town's voter registration rolls. He said he cast one vote as himself then used the names of two friends to cast opposing votes that canceled each other out.

"I didn't do any malice," he said. "I just wanted to show how easy it was to do, and that voters should be required to show some form of identification."

That little act could have cost Morrison a \$10,000 fine and up to five years in prison, but the court declined to prosecute because, other than his own word, there was no proof he had committed fraud.

029887

To this day, Morrison is unapologetic.

"Those college kids proved, again, how easy it is," he said.  
"I think it smells to high heaven."

And North Attleboro election officials are still unsure  
Morrison really did what he said he did.

"I think it was wishful thinking on his part," Ruest said. "He  
was all too anxious to call the Boston Globe.

"I looked over the voting list a long time, but I couldn't find  
anything."

**Dems blast GOP efforts on voter fraud**

By Jim Drinkard, USA TODAY

*Mixed*

WASHINGTON — Efforts by the Justice Department and the Republican Party to guard against voter fraud have ignited a long-smoldering dispute that could have an impact on close national elections less than two weeks away.

The Republican Party has compiled a national database of 3,273 names of people who it says apparently voted more than once in the 2000 elections. It is turning the list over to local authorities for investigation and possible prosecution.

But early looks at the data by state officials have found little evidence of multiple voting.

At the same time, the Justice Department is mounting what it calls an unprecedented effort to police voter discrimination at polling places and prosecute voting fraud. Attorney General John Ashcroft held a daylong "Voting Integrity Symposium" this month to train more than 300 representatives of FBI and U.S. attorney's offices across the nation "to prevent election offenses and to bring violators to justice."

Some Democrats accuse the GOP of aiming to intimidate voters — particularly minorities and new immigrants, who they believe lean Democratic.

*Voting more than once*

"The last thing we need are partisan efforts that could make it harder for law-abiding citizens to vote on Election Day," said Sen. Chris Dodd, D-Conn., chairman of the committee that oversees elections.

The stakes are immense. Majorities in the House and Senate hang on a handful of races scattered across the country. Both parties say the outcome will hinge on which side does the best job getting its supporters to the polls.

The skirmish is emblematic of longstanding tension between the Republicans and Democrats. It was evident most recently in the struggle over legislation in Congress to fix the election process after ballot problems in 2000. That legislation was stalled for months while Democrats and Republicans argued over whether to include anti-fraud provisions, including identification requirements for new voters, that had been sought by Republicans.

Connecticut, the first state to check the GOP's multiple-voting data, found it "highly flawed."

Officials said that at least 51 of 54 names listed as voting both in Connecticut and elsewhere were erroneous.

Secretary of State Susan Bysiewicz, a Democrat, called the list "a deliberate attempt to distract election officials across the country from their responsibility to encourage voter participation."

In North Carolina, officials found that the first name on the double-voting list was that of state Rep. Martha Alexander, a Democrat who chairs the General Assembly's panel on election laws. "It's got to be two people with the same name and birth date," said Gary Bartlett, director of the state Board of Elections.

Shad Balch, a spokesman for California Secretary of State Bill Jones, a Republican, said, "It looks like we're going to be able to refute their claims."

029889

Party spokesman Kevin Sheridan said the project was carefully done using publicly available voting records and other material.

"The intent was to provide it to authorities interested in our research ... and to take any action they deem necessary to clean up the process or to bring legal action against people involved," he said. Although the GOP knows in some cases the political affiliation of the voters on its list, "we're not making that available," he said.

Regarding the Justice Department's anti-fraud effort, Wade Henderson of the Leadership Conference on Civil Rights called it "a solution in search of a problem" and "a warmed-over plan for voter intimidation."

There is concern among civil rights advocates that Justice's investigation of alleged fraudulent voter registrations in South Dakota on and near Indian reservations is scaring off potential voters.

Ashcroft spokesman Mark Corallo dismissed the concerns: "The only people intimidated are the people who were going to cast fraudulent ballots, and that's the point here." Even so, the issue has flared in other places, as well:

- Party officials in Arkansas are trading charges of fraud and voter intimidation. Republicans say Democrats have generated bogus voter registrations; Democrats say Republicans have tried to photograph and intimidate minority voters waiting in line to cast early ballots in Pine Bluff.
- The Texas GOP on Oct. 10 announced a "ballot integrity" program to guard against voter fraud by "our less ethical opponents." The effort, detailed on the state party's Web site, calls for recruiting poll watchers who will look for irregularities on Election Day.

## County Probes Voter Fraud

May 12, 2005  
James Osborne  
*The Monitor*

Hidalgo County Elections Administrator Teresa Navarro emerges from behind closed doors Wednesday at Austin Middle School in San Juan after a ballot recount from Saturday's mayoral race.

## San Juan mayor's victory upheld

SAN JUAN — Mayor-elect San Juanita Sanchez's three-vote victory stood up in a recount Wednesday, but the city election will undergo further scrutiny when a county investigation into voter fraud begins later this week.

Hidalgo County Elections Administrator Teresa Navarro said she could go to a grand jury as early as next week, once she reviews election records to determine just how many people voted more than once in the city election.

On Monday two women admitted to having voted twice after being pressured to do so by politiqueras.

"It's under review until next week. From there it could go to the grand jury and then it could be investigated by the District Attorney's office," Navarro said.

"Depending on what we're able to get, if we feel something was orchestrated we proceed with the case ... a lot of the time a voter will say an election worker coerced them, but it depends on the individual."

Illegal voting is a Class A misdemeanor, carrying a possible \$4,000 fine and one-year jail sentence, according to the Texas Election Code.

Suspicion first arose Monday morning when three uncounted ballots were found under a box in the vote counting room by City Secretary Vicki Ramirez. All three votes for mayor were cast for veteran City Commissioner Eleazar Romero. Two of the voters admitted they voted during the early voting period before being taken by the politiqueras to vote "curbside" Saturday.

Curbside voting allows and elderly or disabled voters to cast their ballot from a vehicle without having to enter a polling station. The election official outside — in this case Ramirez — is supposed to make sure the individual is in fact elderly or disabled and cross-reference their name against a voter list before allowing them to cast a ballot.

"From what I understand, that didn't happen," Navarro said.

Ramirez declined to comment.

Romero said again he has no knowledge of any wrongdoing within his campaign.

"That's the county's deal, and I don't really have anything to say about that," he said.

"I played no part in that. If something did take place, I had no knowledge of that."

Both Sanchez and Romero accompanied county election officials around the city's polling stations Wednesday morning, as they checked the voting machine tallies against those recorded by city election officials. In tow were around 25 of Sanchez's friends and family, who waited anxiously for word Monday's election result would hold up.

029891

After officials counted up the paper mail-in and curbside ballots, the final tally was announced as 1,126 to 1,123 in favor of Sanchez.

For Sanchez, who lost to outgoing Mayor Robert Loredo in 2003, the news ended a difficult few days in which she had to sit in on a meeting concerning the three uncounted votes only hours after the funeral of her father, who died in a household accident Friday.

"It was a sigh of relief in that I'm finally on the different end of this," Sanchez said.

"But I had faith. I've been through so much this week, with the passing of my father, it puts everything in perspective."

Romero said he would not contest the election result in court.

"I'm going to let this one go by; she won fairly," he said.

"I wish Ms. Sanchez all the luck in the world."

Sanchez will be sworn in as mayor at a special meeting Tuesday evening. Asked if she expected any difficulties in serving alongside commissioners whom she has openly criticized for years, the 41-year-old attorney was optimistic.

"I'm anxious to get started and work with everyone who's there," she said.

"If they're willing to do the things they said they wanted to do for the city, which are a lot of the same things I want, then I think we can work together."

### A handful of Montgomery County voters tried to get more bang for their ballot during the March 9 primary elections.

According to Montgomery County Elections Administrator Carol Chedsey Gaultney, five of the county's registered voters cast a ballot in both the Republican and Democratic primaries, which violates the election code. None of the races was affected by the discovery.

"It came to my attention late last week when entering voter history into the computer," Gaultney said. "Most people don't understand the primary system in Texas."

That was the case for Jay Marshall Smith, 22, of Conroe, who said it was his first time to vote.

"When I went to vote, I did not see a sign that (the poll) was only for Republican voters," he said Wednesday. "By the time I figured it out, it was already too late."

Smith, who then went to vote in the Democratic primary, said he hopes to see better signs next election.

Gaultney has passed the voter information to District Attorney Michael McDougal, who can decide whether to prosecute the Class C misdemeanor violation, punishable by a fine of up to \$500 fine.

Montgomery County Republican Party Chairman Dr. Walter Wilkerson said the District Attorney's office at least should interview the voters to learn their motives.

In these cases, according to Montgomery County Democratic Party Chairman Raymond McNeel, district attorneys usually do not prosecute because they have larger fish to fry.

McDougal did not return calls Wednesday.

"The larger concern is making the public aware of this problem," McNeel said.

"What I care about is that the public know they can't do this."

Another person who learned his lesson was Dieter Hellerbach, 70, of The Woodlands.

His wife Edda said her husband was new to voting in America, since he was from Germany.

"He did not understand what the primary was about," she said.

When voters go to the primary polls, they must sign the polling book, which is a "voter's affidavit."

This says that the voter understands that it is a criminal offense to knowingly vote in a primary election or participate in a convention of another party during the same voting year.

Gaultney said this also means county residents who voted in either primary.

Hello,  
Well, here's my recent voting experience. Like any good voter, I showed up at BB Rice, the sign at the door confused me a little...it said that Democrats had to vote elsewhere, I forget the exact wording and rationalization, but since I had decided to vote Republican, I turned right and walked down the hall. I was the only voter in the building, what's going on there? Showed them my card and they informed me I was at the wrong place, and gave me directions to the right one. I backtracked, down Loop 336 to the Conroe YMCA. Parked, and did a walking tour of the facility. I'd never been there before. After walking a mile or so, and was about to give up, I spotted some movement in a small building out back and despite having to walk another mile, decided to check it out. Turned out it was the polling place. Again, I was the only voter there. The poll people told me how they were starving, seems like someone forgot to pick up their order of food at Vernon's. I offered to help, but they assured me they were ok and could stick it out. Like a good MC Democrat, I cast my vote for Jenkins, Dean, and left. The whole experience leaves me wondering if some "powers that be" are trying their best to keep MC citizens from voting.

It is true that something needs to be done to prevent something like this to happen again. However, it appears to me that on the Republican side they rubber stamp the voters card. Does the Demos do the same? If, so how come the second voting table didn't see it? Maybe, the both election judges need to determine how that system failed. It shouldn't cost a lot of time or money as a volunteer.

Someone dropped the ball. If, this would have been the general election I'm afraid you would probably see Demos screaming to recount. This may not be a big issue, but it does say that our penciling in process is a little out dated. Does anyone agree with that?

## Hearne man sentenced in illegal voting case

Associated Press

COLLEGE STATION -- A man has been fined \$2,500 and sentenced to five years probation after he pleaded guilty to illegal voting for casting 34 ballots during the May municipal elections in nearby Hearne.

Charles Workman did not cast a vote in his own name during the election, in which incumbent Mayor Ruben Gomez was re-elected.

But authorities said he did vote for nearly three dozen other residents using absentee ballots. He also forged forms saying some people had moved from one home to another.

Workman will not be allowed to campaign or collect absentee ballots during his probation, Robertson County District Attorney John Paschall told the Bryan-College Station Eagle for today's editions.

The district attorney said Workman is the fifth person to plead guilty to similar charges brought by a grand jury in August. At least one person will serve jail time for his role, he said.

Paschall could not immediately recall the names of the other four individuals.

Workman was one of 17 people indicted in the voting fraud case in August. Another Hearne resident, Corona Williams, was indicted on seven counts of illegal voting Wednesday.

Allegations of voter fraud surfaced shortly after the May 3 election. The election had a 45 percent voter turnout, which is high for Hearne, and nearly 50 percent of the votes were absentee ballots, mailed in by people who claimed to be disabled.

Illegal voting is a third-degree felony punishable by two to 10 years in prison and a fine of up to \$10,000.

# Ex-Candidate Accused of Voting Twice in Elections

NY

By Karen Freifeld  
STAFF WRITER

October 23, 2002

The former Conservative party candidate for lieutenant governor was arraigned yesterday on an indictment charging him with illegal voting.

Daniel Mahony, who was once Tom Golisano's running mate, allegedly voted twice in two general elections. In November 2000 and November 2001, he voted with both an East 14th Street address and an East 55th Street address, according to the Manhattan District Attorney's office. Mahony has denied that charge.

The politician was removed from this year's ballot because he said that, as of Aug. 14, he was no longer a resident of New York State. But prosecutors said a check of records show he is still listed as a tenant at the East 14th Street address.

Additionally, prosecutors in District Attorney Robert Morgenthau's office said their investigation uncovered evidence that Mahony faked a photo that he used as evidence in trying to get a parking fine reduced.

For that, Mahony was charged with a felony count of offering a false instrument for filing. Like the felony illegal voting charge, it is punishable by up to four years in prison.

Mahony, who was led to a Manhattan State Supreme Court courtroom yesterday in handcuffs but released on his own recognizance, pleaded not guilty.

Alan Futerfas, his attorney, later said he thought the charges were "unwarranted," and was disappointed they were brought. He also said he had never before seen a felony charge for a parking ticket.

The attorney said Mahony was an official resident of Connecticut.

## Voter names found twice

**By Keith Ervin and Justin Mayo**  
*Seattle Times staff reporters*

Just one month before voters decide the future of King County's Democratic executive, Ron Sims, Republican Party leaders yesterday accused his administration of failing to remove thousands of duplicate registrations from the voter rolls.

GOP officials and Republican members of the Metropolitan King County Council said they officially will challenge the registrations of about 2,050 voters Monday.

In all, they said they found nearly 3,400 voters they suspect are registered twice with the county's Elections Office. They say they are challenging only those they can fully document.

Duplicate registrations can occur when voters re-register with new addresses or name changes if their old registrations aren't deleted from the voter database. The duplications alleged by the Republicans represent less than half a percent of King County's more than 1 million registered voters.

If duplicate registrations are not purged from the rolls, those voters could cast more than one ballot in an election, which is illegal. Republicans yesterday released the names of 16 voters they say voted twice in the contested 2004 governor's race.

Illegal votes, accounting errors and mishandled ballots in King County played a prominent role in Republican Dino Rossi's lawsuit challenging the election of Democrat Christine Gregoire as governor last year. Chelan County Superior Court Judge John Bridges ruled in June that he did not find a basis for overturning the election.

Election officials and Sims quickly said yesterday that at least one name on the GOP's duplicate-voters list appeared to be a mistake — and they questioned the Republicans' motives in making a media splash.

Elections Office spokeswoman Bobbie Egan said a woman singled out by the Republican Party as having voted twice in the 2004 general election and again in the 2005 primary actually appears to be two women with the same name but different birthdates.

At least two other names on the list of suspected double voters have been referred to the county Prosecutor's Office, and criminal charges have been filed against one person.

Elections Director Dean Logan said the Republicans seemed more interested in scoring partisan political points than in solving problems.

But Republican County Councilman David Irons, who is running against Sims for county executive, said his party's analysis of the voting list shows that Sims and Logan aren't doing their jobs.

029897

Irons has repeatedly called for Logan's dismissal and has proposed a county charter amendment that would put elections in the hands of an elected auditor.

"It's a sad day that we're here again talking about election flaws from this election and past elections," Irons said. "Dean Logan, why didn't you do the data search that, quite frankly, any high-school computer student could do?"

Logan took the unusual step of meeting with reporters before the Republican news conference to defend his record and attack his critics. About 40 election workers attended the meeting to show support for their boss.

"This has gone beyond interest in the elections and election integrity. In essence, this is a witch hunt trying to make this a top-tier campaign issue," Logan said later.

Logan said his office, as part of routine list maintenance, has purged the voter list of 9,100 voters' duplicate registrations and has dropped the names of 8,900 dead voters this year.

He said County Councilwoman Kathy Lambert, R-Woodinville, asked him several weeks ago to look at a Republican Party list of apparent duplicate voters and he agreed to do so. But instead of bringing him the list so he could check those registrations, Logan said, he learned yesterday morning the Republicans were preparing to release their findings directly to news media.

When Logan reminded her of that conversation yesterday, Lambert said, she told him that Republicans would give Logan their list and any future lists so errors in the voter rolls could be corrected.

The voter challenges being prepared by the Republicans will address two categories of suspected double registrations: voters who have exact matches of birthdate, address, and first, middle and last names; and women with matching first names, addresses and birthdates. The second group, numbering 3,702, are believed to have changed their last names because of marriage or divorce.

The Republicans are not at this time challenging 2,650 registrations of voters who they believe moved to new addresses but whose previous registrations were not purged. They will continue to investigate those voters, said party vice chairwoman Lori Sotelo.

Election 2005

## Woman allegedly voted twice in elections

By Keith Ervin

*Seattle Times staff reporter*

A woman accused by the King County Republican Party of voting twice in the November 2004 election and again in last month's primary is under a criminal investigation for double voting, a county election official said yesterday.

The Elections Section referred the case to the county prosecutor's office Aug. 31 to investigate whether she voted twice in 2004, election spokeswoman Bobbie Egan said.

The woman, who lives in a downtown Seattle apartment building, has not been charged with a crime. The Seattle Times does not generally name suspects until they are charged.

She was on a list of 16 voters identified by the Republican Party as having voted twice in the 2004 election. The Seattle woman was the only person on the list accused of voting twice in each of two recent elections.

Egan said Wednesday the woman's name appeared twice in the voter-registration database with two different dates of birth, so it seemed there might be two voters with the same name.

Egan didn't realize on Wednesday that the woman's name had been forwarded to prosecutors, she said yesterday. She said she didn't know how election officials learned she might have cast extra ballots.

The woman apparently has had two registrations since 2004, but routine computer checks for duplicate registrations didn't bring up her name because she was registered under two different birth dates, Egan said.

Republican leaders said Wednesday they had found more than 3,000 voters who appear to be registered more than once, allowing the possibility of double voting. Their investigation of voter records is continuing.

## 6 accused of casting multiple votes

By Keith Ervin  
*Seattle Times staff reporter*

Criminal charges have been filed against six more King County voters for allegedly casting more than one ballot under a variety of circumstances in last November's election, prosecutors said yesterday.

Two defendants, William A. Davis of Federal Way and Grace E. Martin of Enumclaw, were accused of casting absentee ballots in the names of their recently deceased spouses, Sonoko Davis and Lawrence Martin, respectively.

A mother and daughter were also charged with casting a ballot in the name of the mother's dead husband. The mother, Harline H.L. Ng, and her daughter, Winnie W.Y. Ng, both of Seattle, signed their names as witnesses to the "X" marked on the ballot of Jacob Ng, who had died in February 2004.

Jared R. Hoadley of Seattle was accused of casting a ballot in the name of Hans Pitzen, who had lived at the same Seattle address as Hoadley and who died last May.

Dustin S. Collings, identified as a homeless Seattle resident, was charged with casting two ballots, both using the alias of Dustin Ocoilain, a name that was listed twice on the voter-registration rolls.

The defendants are charged with repeat voting, a gross misdemeanor that carries possible jail time of up to one year and a fine of up to \$5,000.

Election officials asked prosecutors to investigate the voters after news reporters and a blogger reported that they may have voted twice. The voters will be arraigned July 5 in King County District Court.

Two other voters previously received deferred sentences — and avoided jail time — after they pleaded guilty to charges of repeat voting.

The King County Sheriff's Office is investigating several other cases, prosecutors reported yesterday. The investigations resulted from the intense scrutiny surrounding the governor's election in which Democrat Christine Gregoire defeated Republican Dino Rossi by 129 votes after he narrowly won two earlier vote counts.

After the November election, prosecutors also successfully challenged the voter registrations of 648 felons whose right to vote had not been restored.

## Man charged with voting twice says he filled out extra card by mistake

By **GEORGIA PABST**  
[gpabst@journalsentinel.com](mailto:gpabst@journalsentinel.com)

Posted: Sept. 21, 2005

A 25-year-old Milwaukee man charged with voting twice in the Nov. 2 presidential election said Wednesday he filled out two on-site voter registration cards that day by mistake, but only voted once.

Testifying in his own defense, Enrique Sanders said he couldn't remember for whom he voted, though he knew it wasn't President Bush.

After irregularities appeared in Milwaukee's vote, a joint state and federal investigation led to illegal voting charges against more than a dozen people. Sanders is one of the first to go to trial.

"There's no evidence he was paid to vote and he's not even sure who he voted for," his attorney, Brian Mullins, told jurors during closing arguments. He said Sanders has a learning disability and has trouble reading and remembering.

But Assistant U.S. Attorney Richard Frohling asked jurors, if Sanders didn't care about the election, why did he wait in line at the Franklin Pierce School polling place for more than 1 1/2 hours to cast his ballot?

"He wanted to make sure his vote counted and it was important enough to make his vote count twice," he said.

Frohling said Sanders' two registration cards each show different numbers. Election officials testified that a number means a person was issued a ballot.

But Sanders insisted he did not vote twice. He said he went to the poll with his girlfriend, but the line was long so he took her home and returned alone.

Tiffany Harrell testified that she and Sanders got registration cards, and she said she thought Sanders put the card in the visor or door of his car.

Sanders said when he returned, he filled out one registration form in line with the address 1133 W. Highland. But there is no address and he actually had lived at 1133 N. 18th St.

He said when he gets rushed or is in a crowd, he tends to make mistakes. At the desk, he said, he told the poll worker he made a mistake and filled out another card. He said he didn't know what the worker did with the other card and said it might not have been destroyed as it should have been.

But Milwaukee police officers on said voting cards indicated that Sanders had been given two ballots.

Frohling said Sanders originally told police he couldn't explain why there were two registration cards. Milwaukee Police Officer Neil Saxton testified that Sanders' demeanor was different, too: "He spoke more clearly and concisely and didn't act like he didn't understand."

The jury is expected to decide the case today. Sanders faces up to five years in prison and a \$10,000 fine if convicted.

Earlier in the day, Kimberly Prude was convicted by a different federal jury of voting in the election. She was an ineligible felon at the time.

WS

# Nothing points to fraud in 9 double voting cases

## But U.S. attorney expects other charges in election investigation

By GREG J. BOROWSKI  
[gborowski@journalsentinel.com](mailto:gborowski@journalsentinel.com)

Posted: Aug. 22, 2005

Investigators found no evidence of fraud in nine cases of potential double voting cited this month by the state GOP, but U.S. Attorney Steven Biskupic indicated Monday the ongoing investigation will likely lead to more charges.

The state Republican Party used U.S. Postal Service change of address records to track voters from city to city.

At an Aug. 9 news conference, party officials said that they had found nine cases where people were listed as having voted in the November presidential election in Milwaukee while also casting ballots in Chicago, Madison or Minneapolis.

Biskupic said investigators reviewed each case cited and found assorted clerical errors and other inconsistencies, but no fraud.

He is leading the ongoing investigation with Milwaukee County District Attorney E. Michael McCann. They launched the probe after the Journal Sentinel found widespread irregularities in the vote, including thousands more votes tallied in Milwaukee than people recorded as having voted.

Biskupic and McCann have said more than 200 felons illegally voted in the city while still on probation or parole. At least another 100 people voted fraudulently, including voting twice, from non-existent addresses or voting in the name of a dead person.

So far, 10 felons have been charged with voting illegally. Two others have been charged with double voting. In addition to those federal cases, two were charged in Milwaukee County Circuit Court with falsifying voter registration cards. None of the cases has gone to trial.

"There still is no evidence of a widespread conspiracy," Biskupic said. "But there still is plenty of evidence of double voting and the like."

The GOP highlighted its allegations on the same day Republican lawmakers sent to Gov. Jim Doyle a bill that would have required voters to show a photo ID at the polls. Doyle quickly vetoed the bill, as he had done with two previous versions of the measure.

Doyle spokeswoman Melanie Fonder said Monday that the Republicans were grandstanding with their allegations of fraud.

"It's very clear this was just politics and not about real election reform," she said.

### Amendment possible

After Doyle's veto, Republican lawmakers said they are now considering working to put a photo ID requirement on the ballot as a proposed constitutional amendment, which would bypass the governor. Such an amendment would require passage in two sessions of the Legislature and then be approved in a statewide vote. Backers say it is needed to help curb fraud and tighten up a system that is among the most open in the nation. Critics say the bill would disenfranchise the elderly and the poor.

Doyle has indicated he would back a requirement that voters show an ID, such as a utility bill, but has balked at the GOP demand that it be a

029902

photo ID.

At its news conference, the GOP said it had nine cases of apparent double voting but refused to provide details to the media. The party's news conference was held outside a home on Milwaukee's east side.

The Journal Sentinel reviewed voting records at that address and found three people recorded as voting: Stuart and Gayle Schenk and their son, Joseph. The Schenks told the newspaper that Joseph had moved to Chicago to join the Franciscan order of the Roman Catholic Church and did not vote here.

They could not be reached for comment Monday.

## Poor recordkeeping

In a letter issued Monday, Biskupic's office outlines what it found in each of the nine cases.

Six of the names were incorrectly included in the city Election Commission's database of Nov. 2 voters because of clerical errors.

For instance, names were not recorded correctly in polling place logbooks. Or the wrong name was recorded when names from the books were later scanned into a computer.

In the other three cases, the letter says, the individuals voted only in Milwaukee. For instance, someone with a similar name but different birth date voted in the other city.

The letter underscores the level of recordkeeping problems in the Election Commission office.

During its investigation, the newspaper found hundreds of cases where people were listed in the database as voting twice, something city officials blamed on a computer glitch. The newspaper also found dozens of cases where the number of voters recorded in logbooks was different from the votes counted in the precinct.

"These raised a flag with us because of everything that has gone on over there," said Rick Wiley, executive director of the state Republican Party. "We're going to continue our investigation into what we consider a mess over there."

Wiley said the party last week sent 10 more names of potential double voters to investigators.

He also said before holding its news conference, the party had sent 49 cases of potential double voting within the city of Milwaukee to investigators. Of those, Wiley said, investigators had indicated 48 of the cases were not cases of fraud, while the other is being looked at as a fraudulent vote.

"The governor continues to blame this on clerical errors," Wiley said. "But the investigation has made it clear. People have been charged with voting fraudulently in this election."

Sue Edman, the new executive director of the city Election Commission, said she is working to clean up the system to cut down on clerical problems.

**Charge reduced in voter fraud**

College student gets probation for casting 2 ballots

By Dan Wilson  
Post-Crescent staff writer

APPLETON — A college student who voted in two cities last spring received probation Monday after a felony charge was reduced to a misdemeanor in a plea agreement.

Outagamie County Circuit Judge Dee Dyer placed Michael R. Howard of Appleton on probation for one year and ordered him to perform 150 hours of community service. Dyer also ordered the record of Howard's conviction expunged after he successfully completes probation.

Howard, 20, 1036 E. Moorpark Ave., was charged with felony voter fraud, but Assistant Dist. Atty. John Daniels told Dyer the facts justified amending the charge to making a false statement on a voter registration form, a misdemeanor.

Howard voted in the nonpartisan election last April by absentee ballot in Appleton and in person in Eau Claire, where he attends college.

"He did not vote twice for the same individuals," said Daniels. "Therefore, the state does not believe at his young age he should be labeled a felon for the rest of his life."

According to Daniels, the elections in both cities were local, and there were no state or national issues on the ballot.

Dyer asked Howard, who has good grades, how he could contemplate voting twice in the same election.

"I became aware of the city council elections and not thinking, I did it," Howard said.

Dan Wilson can be reached at 920-993-1000, ext. 304, or by e-mail at [dwilson@postcrescent.com](mailto:dwilson@postcrescent.com)

Subject Wendy Weiser

Just wanted to let you know that I called her today to tell her that I would be sending some responsive documents per her FOIA request about the vote fraud project that were not included in my previous response. Mostly these are emails that were not provided to me before, as well as a few memos and letters that were also not provided.

She said she was getting ready to send an appeal based on the belief that I did not provide her all of the emails and relevant letters, memos, and other documents. She noted that most of the emails involved only two EAC staffers. I explained that the new documents I was sending would include emails from additional staffers. However, I believe the bulk of what she has includes CCs of other staffers, so another search would only turn up duplicates, but I will verify that.

Wendy also asked about all of the attachments in the emails. I told her it would have taken many months to print all of those out and make the determination whether they were releasable under FOIA. She offered to identify the attachments they would like to see, and I told her that would be helpful. She also noted that in my letter, I estimated that she was received about 1,500 pages. She said they counted and there were only 800. I told her I estimated the page count, and she accepted that.

I asked her if she would consider holding off on the appeal until she received the additional documents, as they may satisfy her appeal. She agreed, and I told her I would send everything by the end of next week. She also requested that I send a scanned copy. I explained that only one of our scanners was working, and that it did not have the capacity to scan huge files.

I will keep you apprised...

Subject FOIA requests

Curtis,

In reference to FOIA requests about the vote fraud and voter intimidation and voter ID projects, and whether EAC should respond while the Office of Inspector General reviews circumstances surrounding these projects, I have come to a decision regarding this issue. After speaking with EAC's general counsel and reviewing your response to the chair's questions about communication during your review, I conclude that as EAC's FOIA officer, I must continue to follow the law and respond to FOIA requests regarding these topics. I will certainly provide copies of my responses to your reviewers and answer any questions you have. However, per your recommendation, I will decline answering questions from the media and the public until your review is complete. Please let me know if you have questions, and I appreciate your cooperation and counsel in this matter.

**U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW – Suite 1100  
Washington, DC 20005**

May 2, 2007

Ms. Wendy R. Weiser  
Deputy Director, Democracy Program  
Brennan Center for Justice  
161 Avenue of the Americas, 12<sup>th</sup> Floor  
New York, NY 10013

Dear Ms. Weiser:

This letter is in reference to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on November 13, 2006. The request sought certain agency records concerning two agency draft reports, *The Voter Fraud and Intimidation Report* and *The Voter Identification Report*. Specifically, the request sought: (1) “the report on voter identification prepared by the Eagleton Institute of Politics and the Moritz College of Law,” (2) “the report on voter fraud and voter intimidation prepared by Tova Wang and Job Serebrov,” (3) The voter identification and voting fraud report requests for proposals and contracts, and (4) communications relating to the above reports between the EAC and Eagleton Institute of Politics, the Moritz College of Law, Ms. Tova Wang, Mr. Job Serebrov, or other third parties.

On December 12, 2006, we provided a partial response to your request regarding items (1) through (3) above. In regard to item (4), on March 29, 2007, we provided copies of the responsive documents (approximately 1,500 pages). In reference to item (4), an estimated 300 pages of e-mails were withheld because the information in these e-mails is pre-decisional and protected by the Deliberative Process Privilege.

Since our March 29, 2007 response, I have found responsive emails and documents in reference to your original request that were not included the EAC’s responses. For your information, I have attached these documents.

Please let me know if I can be of further assistance, or if you have questions regarding this information.

Sincerely,

Jeannie Layson  
Director of Communications  
U.S. Election Assistance Commission

## Voting rights and wrongs

By Donna Brazile

THE WASHINGTON TIMES

Published April 16, 2007

Just when civil rights advocates were celebrating recent advances in restoring the voting rights of 5.3 million Americans prohibited from voting in several states because of their felony convictions, along comes the news that the Bush administration has been playing politics with meaningful electoral reform.

Geez, can't they focus on governing without engaging in partisan warfare?

The New York Times has reported that the Election Assistance Commission, a federal agency charged with administering federal elections, "played down the findings of experts who concluded last year that there was little voter fraud around the nation." According to the New York Times' review, the "original report on fraud cites 'evidence of some continued outright intimidation and suppression' of voters by local officials, especially in some American Indian communities, while the final report says only that voter 'intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation.' "

Just why would the EAC suppress or alter a report that could have helped restore citizens' confidence in our electoral system? Did someone pressure them to disown reports they commissioned? If so, we need to find the guilty parties and bring yet another shameful episode of partisanship to public attention.

As the Times notes, this issue played a "significant role" in the Bush administration's "firing of eight United States attorneys, several of whom, documents now indicate, were dismissed for being insufficiently aggressive in pursuing voter fraud cases." Perhaps disgraced Attorney General Alberto Gonzalez will have the decency to respond to these allegations next week when he testifies on Capitol Hill.

The Election Assistance Commission, according to its own mission statement, is supposed to be a clearinghouse for all "matters that affect the administration of federal elections," providing "information and guidance with respect to laws, procedures and technologies affecting the administration of federal elections." Fair enough, but why did they shove aside a report that could have provided timely guidance to members of Congress trying to address so-called voter fraud by imposing restrictive voter-ID requirements?

The EAC not only refused to accept the reasoned conclusion of its bipartisan consultants, they also refused to release those findings at a time when doing so would have discounted claims of rampant voter fraud that were the justification for the restrictive voter ID law passed last year by the Republican-controlled House of Representatives. Thank God the Senate had no appetite to

029912

take up a similar measure being pushed to address the phantom of voter fraud.

Here we approach another major electoral season and the agency in charge of helping states reform their electoral practices has lost its credibility. Loyola Law professor and election expert Richard Hansen have written that the "EAC needs to remain a credible broker and cannot be timid by what it finds." Mr. Hansen believes that if the evidence supports one side of the debate, that is "not a reason to disown a report and start over." Hmmmm, unless it's about politics and helping one side gain an electoral advantage.

Since the 2000 presidential election, states have moved to enact stringent voter ID requirements. According to election experts, as of the November 2006 election, 24 states had enacted some form of voter identification law, up from 11 in 2000.

While state and federal courts have thrown out some restrictive and punitive photo ID laws on the grounds they may lead to disenfranchising poor, elderly or minority citizens otherwise eligible to vote, the drumbeat still rages to put in place more punitive laws. The motives are simple: Suppress the turnout of eligible citizens who may not embrace the political priorities of one of the major political parties. Shameful.

No citizen should vote twice, and felons and others seeking to have their voting rights restored must remain patient while the wheels of justice turn in their favor. But, under the guise of people "stuffing ballot boxes," allowing the dead to vote or undocumented workers attempting to claim citizenship, Republican lawmakers have begun to erect new laws that could severely curtail the right of all eligible citizens to vote and have those votes counted accurately.

Perhaps it's time we all put aside partisan consideration and agree that no eligible citizen should have to pay to vote. As many civil rights advocates will tell you, proof of citizenship requirements can place an undue financial burden on voters. I know because many of my family members who had all their possessions washed away during Hurricane Katrina are still scurrying to replace passports, birth certificates and other proof of citizenship, and the expense is shocking.

We should also agree that no eligible citizen should face intimidation by partisan poll workers or be asked to produce ID at the polling place when state law only requires first-time voters and those who did not list an ID number on their registration forms to do so. It's wrong, and it's illegal.

The Justice Department and the Election Assistance Commission, you are now on notice that civil rights groups are watching your every step, your partisan reports and, yes, your role in destroying one of the most important ingredients of our democracy: the right of all citizens regardless of race, gender, disability, age or class to participate in the electoral process.

Donna Brazile is a political commentator on CNN, ABC and National Public Radio and former campaign manager for Al Gore.

**Carnahan urges time , resources to deal with election laws**  
By SAM HANANEL, The Associated Press  
Apr 18, 2007 8:07 PM (13 hrs ago)

**WASHINGTON** - States will need time and resources to comply with any changes that Congress might order to electronic voting systems, Missouri Secretary of State Robin Carnahan told a congressional panel on Wednesday.

"Obviously elections are run locally," Carnahan told the House Subcommittee on Information Policy, the Census, and the National Archives. "If you all take over the election process, that's a big change in our country and it will take money to do that."

The hearing examined the reliability and security of electronic voting systems that have been put into place across the country since the failure of paper ballots was exposed in the 2000 election.

Subcommittee chairman William Lacy Clay, D-Mo., said he wants Congress to require a paper trail to back up electronic voting machines and make the process of testing election software and verifying its security coding more transparent.

Clay cited results from the 2006 election that show some electronic voting systems still produced unreliable results, causing distrust among voters.

"It is absolutely vital that we utilize technology that provides an independent, auditable voting record that can be verified by election officials," Clay said.

Carnahan, a Democrat, said lawmakers need to give states a reasonable time frame to comply if Congress implements any changes, and guarantee full funding for any mandates that come down. She also urged lawmakers to gather input from state and local officials before taking action.

Carnahan described Missouri's elections as "fair, accurate and secure," and said the state's use of new optical scan and touch-screen voting systems was generally a success.

But there were some problems, such as long lines that formed when some polling places ran out of

029914

ballots. She said there is a need for more training for poll workers unfamiliar with the new technology.

Missouri is one of 27 states that already require paper records for electronic machines.

Gracia Hillman, a member of the U.S Election Assistance Commission, told Clay that only Congress has the authority to order nationwide use of paper voting verification.

Depending on what Congress does, Hillman said, at least 180,000 machines around the country would need to be replaced or upgraded. That could be a "recipe for colossal confusion" if lawmakers try to enact such legislation with only a year-and-a-half before the 2008 election, she said.

Clay also grilled Hillman about reports that EAC officials rewrote the findings of a government-funded report on voter fraud to downplay the pervasiveness of problems with electronic systems. Clay said he has concerns the EAC is improperly politicizing its work.

Hillman said changes in the report drafted by researchers at Rutgers University were made because some conclusions were not supported by the data.

"I do not believe that the EAC could have reached agreement on the conclusions offered by those researchers without being allowed to validate those conclusions," Hillman said.

Avi Rubin, a computer science professor at Johns Hopkins University, testified that an electronic voting system without a backup paper receipt cannot be properly audited.

#### **Lawmakers call for e-voting paper trails By Grant Gross , IDG News Service**

April 18, 2007

U.S. lawmakers on Wednesday called for electronic voting machines to include paper trail backups, while a government auditor said better security measures for the machines are needed.

A still-contested 2006 election for the U.S. House of Representatives in Florida's 13th district is a "prominent example of how, in some instances, electronic voting systems have produced unreliable results, raising concerns among voting-system experts and causing distrust among voters," said Representative William Lacy Clay, chairman of the House Information Policy, Census, and National Archives Subcommittee.

In the Florida House election, more than 18,000 voters failed to cast ballots on e-voting machines, and the Republican candidate won by fewer than 400 votes.

Clay, from Missouri, and other Democrats called for paper trail printouts to be required as a way to audit results from touchscreen DRE (Direct Recording Electronic) machines. But Gracia Hillman, a member of the U.S. EAC (Election Assistance Commission), warned Congress not to rush into paper-trail requirements.

Hillman avoided taking a position on paper trail ballots during a subcommittee hearing. But at least 180,000 DREs across the U.S. would have to be upgraded or replaced if Congress required paper trails, she said.

"When you combine the introduction of new equipment, earlier primaries, and the enormous tasks of recruiting and training poll workers to meet a presidential election year deadline -- which is only a year and a half from now -- you have all of the ingredients of a recipe for colossal confusion," Hillman said.

Robin Carnahan, secretary of state for Missouri, also called on Congress to allow reasonable time frames for changes in e-voting requirements. "Don't do things that create expectations but can't be met by local

election officials," she said.

Carnahan said the 2006 election in Missouri was "fair, accurate and secure." Voters there used optical scan and DRE machines with paper trails.

Other lawmakers seemed skeptical of the need for paper trails. Representative Bill Sali, an Idaho Republican, asked Hillman and Randolph Hite, director of information technology architecture and systems for the U.S. GAO (Government Accountability Office), if they knew of any e-voting machines that had been hacked during an election. Both said they were not aware of any.

But Hite called on state and local elections officials to pay more attention to e-voting security and machine life cycle.

Several groups have "raised significant concerns about the security and reliability of electronic voting systems," Hite said. "Many of these security and reliability concerns are legitimate and thus merit the combined and focused attention of federal, state, and local authorities."

In an extensive GAO review, the agency found that many jurisdictions did not use the most current voting system standards, and many do not consistently monitor election performance. Voting-machine best practices were implemented to "varying degrees," he said.

Security measures for e-voting machines "ranged from rigorous to ad hoc," Hite added. He called on the EAC to work with local and state election authorities to strengthen security measures.

#### **Commission urges caution on election reform**

National Journal's Congress Daily AM

An official with the commission charged with overseeing the administration of federal elections urged House lawmakers Wednesday to proceed with caution as they consider sweeping electoral reform legislation.

Election Assistance Commission member Gracia Hillman told the House Oversight and Government Reform Information Policy Subcommittee that earlier primary elections, new equipment and increased poll-worker training demands already stand to complicate the administration of federal elections next year, *National Journal's Technology Daily* reported.

During a hearing on electronic voting machines, she said lawmakers are right to question the use of certain e-voting machines. A measure sponsored by Rep. Rush Holt, D-N.J., would require all e-voting machines to be backed up by paper trails.

But Hillman said Congress needs to be aware of the confusion that extensive e-voting upgrades might cause. She also urged the panel to consider other electoral issues such as voter registration, participation and disenfranchisement.

#### **Rodriguez elected EAC vice -chair**

VoteTrust USA

Former Denver City Council President Rosemary E. Rodriguez today was elected vice chair of the U.S. Election Assistance Commission (EAC) during a public meeting.

As vice chair, she will work with EAC Chair Donetta Davidson as part of the bipartisan leadership team at the commission to set priorities and communicate EAC initiatives.

"My foremost conviction is that all eligible voters should be empowered with simple, unfettered and uncomplicated access to registration and to the voting booth" said Rodriguez. "I look forward to working with my colleagues as we seek practical means to improve elections in this country in ways that most benefit the voters."

Vice Chair Rodriguez joined the EAC in March. She was nominated to EAC by President Bush in 2006 and confirmed by the U.S. Senate in February. She will serve until December 12, 2007, filling the remaining term of Ray Martinez, who resigned in August 2006.

She served on the Denver, Colorado City Council for three years, and was its president from 2005 to 2006. She was director of Boards and Commissions for the mayor's office from 2002 to 2003 and a clerk and recorder for the City and County of Denver from 1997 to 2002. In 1997 she was acting director of the Denver Election Commission where she supervised city elections. She has been active in numerous grass roots civic and voter advocacy organizations, including the Colorado Voter Initiative where she co-chaired a statewide initiative to allow Election Day voter registration. She was also a co-founder and chair of Latinos Vote, a voter registration project to register Latino voters and provide non-partisan election information to the Latino community.

EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

Rosemary Rodriguez elected EAC vice-chair  
NALEO Press Release

029917

**Los Angeles, CA** - The National Association of Latino Elected and Appointed Officials (NALEO), the nation's preeminent Latino leadership organization, congratulates Commissioner Rosemary Rodriguez on her election today to serve as Vice-Chair of the U.S. Election Assistance Commission (EAC). Commissioner Rodriguez, who is a former NALEO Educational Fund Board member, joined the EAC in March 2007, and was elected Vice-Chair by her fellow Commissioners at a meeting held in Kansas City, Missouri. The EAC is an independent bipartisan commission created to provide guidelines and resources to states for federal election reform.

Commissioner Rodriguez comes to her position with over a decade of experience in public service where she gained extensive expertise with many different aspects of election administration. In the 1990's, she was actively involved in educating community members about the need for representative districts during redistricting, and in 2001, she was appointed to the Colorado Reapportionment Commission and served as its Chair. For several years, she served as the City of Denver's Clerk and Recorder, where she was responsible for supervising candidate filings, voter registration and the dissemination of official election information. As Clerk and Recorder, she was a member of Denver's Election Commission, which directs city-wide elections.

Commissioner Rodriguez also served as a member of the Denver City Council since 2003, and in 2005, she was elected by her peers to serve a one-year term as Council President. Through her experiences in public service, Commissioner Rodriguez developed a thorough understanding of the challenges that voters face in gaining access to the electoral process. As a board member of the NALEO Educational Fund, she was involved in efforts to further Latino political participation through the organization's U.S. citizenship promotion work and non-partisan voter engagement project *Voces del Pueblo*.

"Rosemary Rodriguez brings a wealth of knowledge on election issues to the Election Assistance Commission," said John Bueno, NALEO President and former President Pro-Tem for the City of Pontiac, Michigan. "Throughout her career, she has demonstrated a strong commitment to ensuring that all voters

have a voice on Election Day, and she will provide the Commission with invaluable perspectives and expertise. NALEO congratulates Commissioner Rodriguez on her election," concluded Mr. Bueno.

The EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA).

It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource information regarding election administration. In addition to Commissioner Rodriguez, the members of the EAC are Chair Donnetta Davidson, Gracia Hillman, and Caroline Hunter. Commissioner Rodriguez succeeds former Commissioner Raymundo Martinez III, who resigned in August 2006.

### **The fraudulence of fraud**

By Joel Bleifuss  
In Our Times

On April 6, 2006, in Washington, D.C., Karl Rove gave a speech to the Republican National Lawyers Association and issued this dire warning:

We are, in some parts of the country, I'm afraid to say, beginning to look like we have elections like those run in countries where the guys in charge are, you know, colonels in mirrored sunglasses. I mean, it's a real problem, and I appreciate all that you're doing in those hot spots around the country to ensure that the ballot--the integrity of the ballot--is protected, because it's important to our democracy.

When Rove talks about protecting "ballot integrity," that is shorthand for disenfranchising Democratic Party voters. Over the last several years, the Justice Department, with the help of White House

operatives, has sought to boost GOP electoral fortunes by orchestrating a national campaign against voter fraud. But the administration overreached on Dec. 7, when President George W. Bush fired eight U.S. attorneys, a political scandal that some say could become this president's Watergate.

When Republicans talk about *voter* fraud they are referring to illegal voting by individuals, as opposed to *vote* fraud--systematic attempts to steal an election by an organized group of partisans. This emphasis on voter fraud has convinced eight states to pass laws requiring voters to present official photo identification in order to cast a ballot--laws that studies have shown suppress Democratic turnout among voters who are poor, black, Latino, Asian-American or disabled.

Understanding that one way to win closely contested elections is to keep Democratic voters away from the polls, the Republican Party has tried to stoke public fears of voter fraud. On Feb. 15, 2005, the U.S. Senate Republican Policy Committee issued a report, "Putting an End to Voter Fraud," which said, "Voter fraud continues to plague our nation's federal elections, diluting and canceling out the lawful votes of the vast majority of Americans." To remedy the situation, the Senate Republicans advised Congress to "require that voters at the polls show photo identification."

But voting experts maintain that voter fraud is not a national problem. In March, Lorraine C. Minnite, a professor of political science at Columbia University, released "The Politics of Voter Fraud," a report she prepared for Project Vote, an advocacy group based in Arkansas. She writes:

The claim that voter fraud threatens the integrity of American elections is itself a fraud. It is being used to persuade the public that deceitful and criminal voters are manipulating the electoral system. ... The exaggerated fear of voter fraud has a long history of scuttling efforts to make voting easier and more inclusive, especially for marginalized groups in American society. With renewed partisan vigor, fantasies of fraud are being spun again to undo some of the progress America has made lowering barriers to vote.

This is borne out by a study from the Eagleton Institute of Politics at Rutgers University, which found that in the 2004 election, voters in states that required documentation of identity were 2.7 percent less likely to vote than voters in states where documentation was not required. Specifically, the study, commissioned by the U.S. Election Assistance Commission, found that Latinos were 10 percent less likely to vote, Asian-Americans 8.5 percent less likely to vote and blacks 5.7 percent less likely to vote.

What's more, despite GOP claims to the contrary, voter fraud is a very rare occurrence. In 2002 the Justice Department established the Ballot Access and Voting Integrity Initiative to ferret out fraudulent voters. On Oct. 4, 2005, Attorney General Alberto Gonzales, with great fanfare, proclaimed, "We've made enforcement of election fraud and corrupting offenses a top priority." Yet according to an April 12 *New York Times* article, only 120 people have been charged with the crime over the past five years, leading to 86 convictions. Furthermore, the *Times* noted, federal attorneys say that most of the transgressions have been mistakes by immigrants and felons who simply misunderstood eligibility requirements.

The extent of voter fraud is further complicated by the fact that earlier this year the Election Assistance Commission changed the conclusions of a report it had commissioned. The original report by outside election experts concluded, "There is widespread but not unanimous agreement that there is little polling place fraud." The commission deleted that sentence and replaced it with, "There is a great deal of debate on the pervasiveness of fraud."

Rep. José Serrano (D.-N.Y.), who chairs the House Appropriations subcommittee that oversees the commission, is disturbed by this apparently politically motivated substitution. He told *In These Times*:

This possibly could be another Watergate. We have to ask the questions, "Why was this report doctored, and how does this play into the larger picture of voter suppression and intimidation?" By directing public attention to voter fraud you divert attention from the fact that Americans in certain communities are not able to cast their votes properly and that their votes are not being counted. Is this something that this small new agency thought of by themselves or did they get marching orders from somewhere else, perhaps as far up as the White House?

**Firing prosecutors**

029919

It appears that, under Rove's direction the White House has been planning to use U.S. attorneys to fan national fears of voter fraud. In his speech to the GOP lawyers, Rove listed 11 states that would play a pivotal role in the 2008 elections. Since 2005, Bush has appointed new U.S. attorneys in nine of those states: Florida, Colorado, Wisconsin, Minnesota, Iowa, Michigan, Nevada, Arkansas and New Mexico.

What's more, the firings of U.S. attorneys in New Mexico, Arkansas and Washington appear directly related to this Republican plan to exploit the issue of voter fraud and suppress Democratic turnout.

In Arkansas, Bush fired a sitting U.S. attorney in order to appoint Rove protégé Tim Griffin. (See "The Talented Mr. Griffin" by Greg Palast on page 31.)

In Washington, fired U.S. Attorney John McKay had refused to prosecute alleged voter fraud in the 2004 Washington governor's race, in which Democrat Chris Gregoire beat Republican Dino Rossi by 129 votes.

On March 6, McKay testified before the Senate that after the election Republicans pressured him to open an investigation. He said his office had examined the allegations of voter fraud and decided there was not enough evidence to pursue a case.

"Had anyone at the Justice Department or the White House ordered me to pursue any matter criminally in the 2004 governor's election, I would have resigned," McKay told the *Seattle Times*. "There was no evidence, and I am not going to drag innocent people in front of a grand jury."

In New Mexico, David C. Iglesias was equally suspect in the eyes of the GOP. Recall that in 2000, Gore beat Bush by 377 votes in New Mexico. Consequently, in 2004, Democrat-affiliated groups initiated voter registration campaigns in New Mexico. As a result, two boys, age 13 and 15, received voter cards in the mail. Iglesias responded by setting up a bipartisan task force to investigate. This didn't satisfy attorney Mickey D. Barnett, who represented the 2004 Bush-Cheney campaign in New Mexico. He told Iglesias he should bring federal charges against a canvasser who forged their signatures, which he refused to do.

In a *New York Times* op-ed, Iglesias wrote:

What the critics, who don't have any experience as prosecutors, have asserted is reprehensible--namely that I should have proceeded without having proof beyond a reasonable doubt. The public has a right to believe that prosecution decisions are made on legal, not political grounds.

#### **Manufacturing voter fraud**

The issue of fraudulent voters undermining American democracy did not spontaneously erupt. To promote national concern about voter fraud, in March 2005 GOP operatives with ties to the White House established a 501(c)4 organization called the American Center for Voting Rights Legislative Fund (ACVR). The group went public by establishing a Web site, ac4vr.com. (The site has since been taken down for unknown reasons.)

According to its 990 tax forms, ACVR is based in Midlothian, Va., and its executive director is Robin DeJarnette, who is also the founder and executive director of the Virginia Conservative Action PAC. However, according to the registration form for its Internet domain name, the group's address is a mailbox at a UPS Store in Dallas. The chairman of ACVR is Brian Lunde, a former Democratic National Committee official from Texas, who in 2004 was head of Democrats for Bush.

ACVR specializes in issuing studies that purport to document a host of voter fraud cases, like the report titled: "Democrat operatives far more involved in voter intimidation and suppression in 2004 than Republicans."

On March 21, 2005, four days after ACVR went public, Rep. Bob Ney (R-Ohio), then chair of the Committee on House Administration, opened hearings on 2004 election irregularities. One person who testified was ACVR National Counsel Mark "Thor" Hearne II, who described himself as "a longtime advocate of voter rights and an attorney experienced in election law." In the aftermath of the 2000

029920

presidential campaign, Hearne was dispatched to Florida as a Republican observer in Broward County's manual recount, and in 2004 he worked as the national general counsel for Bush/Cheney '04 Inc.

In his testimony, Hearne described ACVR as "committed to defending the rights of voters and working to increase public confidence in the fairness of the outcome of elections." And he submitted to the committee a copy of the ACVR's "Ohio Election Report," of which he was the lead author. That report read in part:

This [Democratic] voter registration effort was not limited to registration of legal voters but, criminal investigations and news reports suggest, that this voter registration effort also involved the registration of thousands of fictional voters such as the now infamous Jive F. Turkey, Sr., Dick Tracy and Mary Poppins. Those individuals registering these fictional voters were reportedly paid not just money to do but were, in at least one instance, paid in crack cocaine.

And in testimony on Dec. 7, 2006, the same day the prosecutors were fired, Hearne told the Election Assistance Commission: "Recent press reports suggest that voter registration fraud remains a significant issue in the recent mid-term elections."

The press contact for ACVR is Jim Dyke, who was the communications director of the Republican National Committee during the 2004 election. In the fall of 2005 he was working in the White House trying to get Harriet Miers on the Supreme Court, before moving on to work in Vice President Dick Cheney's office. Brad Friedman of [BradBlog.com](http://BradBlog.com) reported that according to internet records, Dyke registered the ACVR Internet domain name, ac4vr.com, in December 2004. Those records have since disappeared from public view. (The source of ACVR's funding is also mysterious. According to the *Pittsburgh Tribune-Review*, "When asked to name any contributors to his nonprofit, Hearne claimed he did not know but said Lunde did. When Lunde was asked, he claimed he did not know but said Hearne did.")

Dyke is a good friend of his fellow Arkansan Tim Griffin, the new U.S. attorney in Arkansas. In 2004, both worked at the Republican National Committee helping Bush get re-elected. Dyke has been a vocal defender of Griffin's appointment as U.S. Attorney. "He has a real passion for the law," Dyke told the *Arkansas Democrat-Gazette*.

Rounding out the GOP operatives is Pat Rogers, who sits on the board of ACVR. An attorney for the Republican Party in New Mexico, he has been a vocal critic of fired U.S. Attorney Iglesias. According to the *Albuquerque Tribune*, Rogers is on the short list to replace Iglesias.

#### Rove's role

Minnite, who did the study on voter fraud, has read through the reports prepared by ACVR and presented by Hearne at various official hearings. She noticed that the claims follow a predictable script. "It all starts to look the same," she says. "There is a pattern in the way the documents that claim to show voter fraud are put together. It is usually a compilation of news reports on allegations. There is no follow up, no research done, no analysis."

"As I delved into it, I was faced with the question: 'Why do people think there is a lot of fraud when there isn't any real evidence?' I think people are being manipulated by politics, which takes the form of these reports that are dumped on the public. It is as if you get a big enough pile maybe you will convince people that the volume of fraud is quite large and that we have a serious problem."

Wisconsin provides a case in point. At a March 13 press conference, White House Counsel Dan Bartlett identified Wisconsin as one of the states from which the White House had "received complaints about U.S. attorneys."

In 2005, U.S. Attorney Steve Biskup, who was appointed by Bush, investigated these allegations of voter fraud and reported that he found no evidence on which to press charges.

It turns out that early in 2005, Republican officials in Wisconsin prepared a report titled "Fraud in Wisconsin 2004: A Timeline/Summary." The document, which was found in White House and Justice Department records released by the House Judiciary Committee, was written by Chris Lato, the former

029921

communications director for the state Republican Party, on orders from Rick Wiley, the party's executive director. The 30-page report, which covers Aug. 31, 2004 to April 1, 2005, contains 65 entries detailing voter fraud. The final example is titled: "RPW [Republican Party of Wisconsin] News Release: Evidence of Election Fraud Piles Up."

The information contained in this Wisconsin compilation, made its way into a 78-page report released on July 21, 2005, by ACVR: "Vote Fraud, Intimidation & Suppression in the 2004 Presidential Election." In the introduction, the ACVR's Hearne and Lunde wrote that the report "documents hundreds of incidents and allegations from around the country. ... [T]housands of Americans were disenfranchised by illegal votes cast on Election Day 2004 ... [P]aid Democrat operatives were far more involved in voter intimidation and suppression activities than were their Republican counterparts. ... [R]equiring government-issued photo ID at the polls ... will help assure ... that no American is disenfranchised by illegal votes."

And who was behind this trail of misinformation? On April 7, Daniel Bice, a columnist for the *Milwaukee Journal Sentinel*, reported that a source familiar with the document told him, "The report was prepared for Karl Rove. Rick [Wiley] wanted it so he could give it to Karl Rove."

On April 6, 2006, in Washington, at the aforementioned speech to Republican Party attorneys, Rove began with a joke: "I ran into [ACVR's] Thor Hearne as I was coming in. He was leaving; he was smart, and he was leaving to go out and enjoy the day." Rove then told the assembled party lawyers, "We have, as you know, an enormous and growing problem with elections in certain parts of America today."

Rove should know. He helped grow the problem.

#### **A Selective View of Fraud**

**By: Joe Conason  
New York Observer**

Even as Alberto Gonzales rehearses his excuses for the strange dismissal of eight United States Attorneys, which he will perform in public at a Senate hearing this week, he is looking like a marginal player in this scandal. The Attorney General fumbled his role, but in keeping with his Presidential nickname (Fredo), he probably never understood the broader scheme originating in the Bush White House.

Developed by deputy chief of staff Karl Rove, the President's top political aide, that scheme was evidently designed to advance his objective of discouraging minority voters and others with the bad habit of supporting Democratic candidates. In Republican parlance, such attempts to hamper registration, intimidate citizens and reduce turnout in targeted communities are lauded as "combating voter fraud." Several of the fired U.S. Attorneys had angered party operatives, including Mr. Rove, because they had shown so little enthusiasm for trumping up fraud cases against Democrats.

Following the 2004 election, David Iglesias, then serving as the U.S. Attorney in New Mexico, set up a task force to investigate Republican allegations of fraud. Those accusations boiled down to a single case where a woman had created a handful of phony registrations. (She did so for financial reasons, rather than out of any desire to manipulate the election.) When Mr. Iglesias declined prosecution for lack of airtight evidence, local Republicans began to demand his replacement with a more pliable and less professional prosecutor—a demand eventually fulfilled by Mr. Rove and President Bush.

In Wisconsin, by contrast, U.S. Attorney Steven Biskupic prosecuted voter-fraud allegations regardless of merit, winning big headlines when he indicted 14 black Milwaukee residents for casting ballots illegally. Nine of those cases were either tossed out or lost in court—an awful result compared with the normal conviction rate of over 90 percent. But at least the mediocre Mr. Biskupic—whose conviction of a Democratic state official was just overturned on appeal—managed to remain in the good graces of the White House and keep his job.

The Republican cry of "voter fraud" is a specious complaint, amplified by right-wing hacks to conceal the

029922

fact that in recent years, the most sustained efforts to interfere with orderly elections and voting rights can be traced to the Republican National Committee.

Harassing minority voters with bogus claims of fraud is a venerable tradition in the G.O.P., as anyone familiar with the career of the late Supreme Court Chief Justice William Rehnquist would know. Back in the early 60's, when Rehnquist was just another ambitious young lawyer in Arizona, he ran a partisan campaign to confront black and Hispanic voters over their "qualifications." Along with many of today's generation of Republican leaders, he was a stalwart of the Goldwater campaign in 1964, which garnered its handful of electoral votes in the South by opposing the Voting Rights Act.

Then came Richard Nixon's Southern strategy of nurturing racist grievances to build Republican majorities—around the time that a young operative named Karl Rove was rising in the party. Under his leadership, the G.O.P. has repeatedly been disgraced by conspiracies to diminish voter participation.

In 2002, Republican operatives used a telemarketing firm to illegally jam Democratic phone banks in New Hampshire to win the U.S. Senate seat now held by John Sununu. In 2004, Florida state officials sent armed officers into certain Orlando neighborhoods to scare elderly black registrants, while Republicans sought to challenge minority voters en masse in communities in Kentucky, Nevada, South Carolina, Pennsylvania and Ohio, and paid for the destruction of Democratic voter registrations in Nevada and Oregon.

Actual voter fraud of the kind decried in Republican propaganda is rare, according to nonpartisan experts. Although the White House recently rewrote a careful federal study by the Election Assistance Commission to hide that basic fact, it remains true that very few individuals intentionally seek to fabricate a registration or cast an illegal ballot. There are exceptions, of course—most notably illustrated by Republican celebrity Ann Coulter.

When the far-right columnist and television personality registered to vote in Palm Beach, Fla., in 2005, she wrote down the address of her realtor's office rather than her own home address. She then signed the form, despite its plain warning that falsifying any information on it would make her liable to felony prosecution—and which she, as a lawyer, surely understood. According to Palm Beach County election officials, she also voted in the wrong precinct the following year, disregarding a poll worker who explained her error. (Coulter fans can view her dubious voter-registration form online at [www.bradblog.com](http://www.bradblog.com).)

If proved, those acts would be crimes punishable by prison terms of up to five years, but Ms. Coulter has stonewalled the ongoing investigation. (She says the Palm Beach officials are syphilitic and mentally defective.) No charges have been filed so far, perhaps because her lawyer is a prominent Republican who worked on *Bush v. Gore* in 2000—and whom the President then appointed as U.S. Attorney for the Southern District of Florida. He must know a lot about voter fraud.

#### **Voter ID laws need measured implementation**

Timothy J. Ryan, AEI-Brookings, 4/17/2007

The controversy over laws that require citizens to present identification in order to vote returned to national attention last week with a prominent report cataloging steps that the Election Assistance Commission took to lessen the splash of a study examining voter fraud in the United States. Where the original study concluded that there is "widespread but not unanimous agreement that there is little polling place fraud," the version revised by the EAC finds that "there is a great deal of debate" about the prevalence of voter fraud and made other adjustments to temper the findings.

Voter ID laws tend to invite rancor because partisans on both sides of the aisle believe any changes could affect the outcome of various elections. Republicans generally express concern that lax requirements open the door for elections to be stolen by duplicate voters and the like, while Democrats point to a lack of evidence about the extent of fraud and fear that identification requirements dissuade a large number of poor and minority voters—traditionally Democratic constituencies—from voting. Many people in these demographics, the argument goes, do not have drivers' licenses or comparable

identification and can experience difficulty in acquiring them. Further, even the identifications that some states provide for free require documentation—birth certificates or the like—that themselves can require high fees. In this way, ID requirements are compared to modern poll taxes.

A balanced take on the situation is made more difficult by a terrible paucity of convincing evidence regarding both the extent of fraud and the degree to which ID requirements depress turnout. Timothy Vercellotti and David Anderson have released one study suggesting a small negative influence on turnout, but they will be the first to admit that good evidence is hard to come by and that their conclusions are hardly definitive. Similarly, Tova Wang, Spencer Overton, and others point to the fact that relatively few examples of voter fraud have been reported, but skeptics can always respond with the valid concern that fraud, being a criminal activity, is undetectable whenever it is successful. We only know about fraud when it is caught; who knows how much fraud escapes our attention? And even if fraud is uncommon today, could it not become a problem tomorrow?

Aside from the difficulty of balancing integrity and accessibility, proponents of voter ID laws argue that identification requirements will help to restore the flagging confidence in election administration (see Indiana Secretary of State Todd Rokita's Q&A here) and that the standards are needed to bring U.S. practices on par with the rest of the world; most advanced democracies require identification of some kind (though the onus of providing the ID oftentimes lies on the government).

Perhaps there are a few items within the debate upon which both sides of the aisle can agree. First, voter ID laws would not prevent all kinds of fraud or even the most consequential. Requiring an ID might prevent impersonation of other individuals at the polling places, but it would not, for example, prevent the stuffing of ballot boxes, either in the old, literal sense or the modern electronic equivalent: the subversion of machine software through hacking.

Second, it is difficult to perpetrate fraud—at least the kind of fraud that IDs are designed to prevent—in the volume that would be necessary to swing an election. Impersonating a voter would require either falsifying registration forms to place fictional voters on the rolls or stealing the persona of someone who had already registered. In the first case, an election thief would typically have to contrive fake addresses, a kind of fraud that could well be discovered if perpetrated on a large scale. Similarly, stealing the identity of a real person would require an assurance that the victim had not already voted. Otherwise, a fraudulent voter could be caught red-handed.

Furthermore, in-person fraud would require the perpetrators to travel to enough polling stations on Election Day so as to cast a significant number of fraudulent votes. How many polling places could a single person visit in one day? Fifteen? Perhaps twenty? Such a small number of fraudulent votes is unlikely to change the outcome of an election, and so it seems that any successful scheme would have to employ a group of individuals. Of course, as the number of perpetrators increases, so does the probability of being caught. How many of even the most avid partisans would undertake the formidable risk of jail time in order to marginally increase the likelihood of their favored candidate winning? In many ways, the kind of fraud that an ID requirement would prevent is akin to the counterfeiting of nickels and dimes: high risk for low reward.

Finally, any effort to neutralize voter fraud without a sober consideration of absentee voting would be sorely incomplete. Absentee voting, which routinely constitutes 30 percent or more of the votes cast in some states (such as California), requires no proof of ID and is very much the Achilles heel of election security. Because a single individual could theoretically acquire hundreds of absentee ballots and complete them in private, it is the method most likely to facilitate wholesale voter fraud. If fraud through impersonation is analogous to counterfeiting nickels and dimes, absentee voting could be the equivalent of counterfeiting \$100 bills. It is for this reason that efforts to encourage absentee voting, such as allowing absentee voting without an excuse, should be considered with great caution.

Nevertheless, if the states do want to employ some kind of ID requirement, they should take steps to minimize the possibility that ID laws will prevent legitimate votes from being cast. For instance, Virginia allows ID-less voters to cast a ballot as long as they are registered and sign an affidavit affirming their

identity. It is a practice not altogether satisfactory to hard-liners on either side, but a reasonable middle ground between security and accessibility. Administrators might even consider strengthening this practice by allowing ID-less voters to check a box indicating that they do not own an acceptable identification. If checked, that individual would receive an ID application in the mail. He or she could then submit the application along with a utility bill or other proof of identity in order to receive a free voter identification card. To reinforce the affidavit's status as a short-term fix, voters who habitually show up to Election Day without an ID might eventually lose the privilege of identifying by affidavit.

There remains room for spirited debate about the merits of voter ID laws. One could plausibly favor them for reasons of confidence and facility of recordkeeping while still denying that large-scale fraud exists at all. Still, hastily implemented ID laws could disenfranchise legitimate voters to a far greater degree than they would prevent illegitimate voting. For this reason, lawmakers who genuinely seek to administer elections with an eye towards inclusiveness as well as integrity should consider the imposition of greater requirements with the utmost care.

### What the Senators Should Ask Gonzalas

By Mark A.R. Kleiman

There are really only two questions the Senate Judiciary Committee needs to ask Alberto Gonzales today:

1. Why are you such a lying turkey?
2. When are you going to resign?

But that would make for an unduly short hearing, so here are a few more questions, just to fill in the time:

1. In your prepared testimony released over the weekend, you assert that you had no advance role in planning for the Pearl Harbor Day massacre. An email sent last year by your assistant, Kyle Sampson, says otherwise. Can you explain the discrepancy?
2. If you were concerned about the performance of the U.S. Attorneys who were fired, why didn't you or anyone from DoJ HQ write them to document those concerns and ask for plans of improvement? Isn't that normal management practice?
3. If you were concerned about the performance of the U.S. Attorneys who were fired, why did the Director of the Executive Office of U.S. Attorneys not know anything about those concerns until the firings happened?
4. Did anyone in the White House, directly or indirectly, ever express concern about Carol Lam's corruption investigations? Who? When? What was said?
5. Do you agree with the theory offered by U.S. Attorney Biskupic than anytime political considerations

029925

enter into the award of a public contract, that constitutes misappropriation of funds? Has the Public Integrity Section considered or brought such cases against any Bush Administration officials? Why not? And if you don't think that theory is legally sound, why does Mr. Biscupic still have a job?

6. Is it true that Karl Rove and/or Pete Domenici asked you to fire David Iglesias? If so, what were their stated reasons? Is it true that you refused to fire him without a direct order from the president? Did you ever discuss Mr. Iglesias's tenure with the president? Did he instruct you to fire Mr. Iglesias?

7. No doubt you've seen the letter sent by an anonymous group of DoJ career staff, charging that the Honors Program hiring process has been politicized, and that summa cum laude graduates of Harvard and Yale Law Schools chosen by the operating divisions as potential new hires were denied interviews on the orders of the Deputy Attorney General's office because their resumes indicated liberal political leanings or experience working for Democratic legislators. What inquiries have you made into the truth of those allegations? When can you have us a full report, with the names of the candidates redacted?

8. When was it decided that the Civil Rights Division would give preference in hiring to attorneys with no experience in civil rights law? Why? Is it helpful for fewer than half of the new hires to have relevant experience, compared to the historical average of more than three-quarters?

Or is it simply that less experienced attorneys generally aren't as likely as career professionals to resist political interference?

9. During your tenure, the Department has moved away from prosecuting cases of voter intimidation and suppression and toward prosecuting cases of "voter fraud." But you have yet to develop a case where there was any concerted effort to steal a federal election by having ineligible people vote, and in fact a high proportion of the "vote fraud" indictments brought have ended in acquittals. A consultant's report to the Election Assistance Commission found no evidence of any widespread vote fraud, but did find systematic voter suppression and intimidation. Why, in the face of this evidence, do the Department and the White House and the RNC continue to insist that "voter fraud" is a serious problem. If it is, why can't you seem to find any?

10. In your view, does the theory of the unitary executive bar the Justice Department from prosecuting White House officials for contempt of Congress if they refuse to comply with Congressional subpoenas?

11. After Deputy Attorney General Paul McNulty testified before this committee that the U.S. Attorney for Arkansas, Bud Cummins, had been let go for purely political reasons, Brian Roehrkas of your public affairs staff, who was traveling with you in Argentina, sent an email to your chief of staff, Kyle Sampson, saying that you were unhappy with that testimony. Were you unhappy about it because it was false, or

because it was true? If you thought it was false -- if you thought, that is, that the Deputy Attorney General of the United States had testified falsely before this committee -- why did you not notify the committee, or insist that Mr. McNulty notify the committee, about the error? If you didn't think it was false, what was the basis of your concern? Did you think it inappropriate for the Deputy Attorney General to tell the truth under oath?

12. There are conflicting stories about the role of the junior senator from Minnesota, Mr. Coleman, in the appointment of Rachel Paulose as U.S. Attorney. It would have been normal for the only senator of the President's party from the affected state to be consulted. Did you, or to your knowledge anyone in DoJ or the White House, ever discuss Ms. Paulose's appointment with Senator Coleman? If so, what was his advice?

13. What was your role in inserting the provision allowing the president to appoint replacement U.S. Attorneys without Senate confirmation into the USA PATRIOT Act reauthorization? To your knowledge, who first came up with that proposal? At what point did you first consider using that provision in connection with the Pearl Harbor Day massacre? How did it happen that Mr. Tolman, formerly the Chief Counsel to this committee who (according to the senator from Pennsylvania, Mr. Specter, then the Chairman) oversaw the somewhat surreptitious insertion of that provision into the law, then became United States Attorney for Utah? Why did the Department oppose the repeal of that provision after the Pearl Harbor Day massacre? What communications have you had with the senator from Arizona, Mr. Kyl, about his placing of a hold on that repeal proposal even after DoJ reversed its stated position?

14. Why wasn't Monica Goodling dismissed immediately after she asserted her right against self-incrimination in connection with the Pearl Harbor Day massacre? Would that not be consistent with the Department's pressure on corporations to fire employees who refuse to cooperate in investigations?

#### **A really important homework assignment**

*By Joan Brunwasser  
Op-Ed News*

**A Really Important Homework Assignment**  
By Joan Brunwasser, Voting Integrity Editor, OpEdNews April 18, 2007

I am better at writing than doing, talking than doing, virtually anything than actually doing. I'm probably not the only one, but it sometimes makes a mockery of my so-called activism.

My heart is in the right place, but I was born in the wrong generation. High-tech is just not me. If I had been around in the early twentieth century, I would have been a hold-out for the horse and buggy, flustered by those whippersnappers flashing by in their horseless wonders. Paper and pencil are my

preferred means of communication, which is why you'll never catch me with a PDA. My sore rear end is a result of my work at OpEdNews, not from surfing the web.

One of the perks of my role as voting integrity editor is that I've been able to connect and establish a rapport with many of the people who have been driving the election integrity movement over the last few years. I do my best to be fair, and I have no particular axe to grind, so people are pretty patient about my technological shortcomings. OpEdNews does its best to include as many of the activists and their work as possible, and we've done a pretty good job at it.

Brad Friedman is one of my cyber-buddies. I have gotten a great education on election integrity from BradBlog.com. His daily exposés are, for me, what I imagine a cup of coffee is for caffeine addicts. I need my fix to feel like I'm on top of things. We have corresponded for quite a while, and even once had a freewheeling phone conversation with the potential of turning into an interview (except for the fact that I don't know how to do interviews and my computer ate the file of the transcript that he sent me). I am grateful to him for teaching me how to insert links so that my articles would look more professional, even though I wasn't a particularly quick study.

I often feel like a cheerleader (finally, sort of fulfilling my aspirations as a junior high schooler). People do great work, and I commend them for it by posting their articles at OpEdNews to give them more exposure. But, in terms of being able to follow exactly what they're saying or actually follow through on their calls to action, there's the rub. And I don't think I'm the only one, either.

I've had an idea for a while about developing a prototype so that people could print it up and have it in front of them when they made calls to their secretaries of state to enlist their support for election reform. It's a project that is on my friend Nancy (of the Election Defense Alliance) Tobi's list, but the truth is that she is so busy with everything else she's doing, she hasn't been able to get to it yet. Nancy believes that our congressional representatives need to hear from their constituents, and that we all need to begin identifying which ones are on our side and which are not. We need to be strategic in order to win. (Stay tuned for your next assignment. Our template for contacting your congressional reps is in the works.)

In the meantime, there I am, full of good intentions. But, have I picked up the phone and called my own Secretary of State, Jesse White? No, I shamefacedly admit, I have not. And if I haven't, I venture to guess that most people haven't either.

Why haven't I? I'm uncomfortable doing it because I don't feel that I really get all the issues yet, which makes me tentative. That's why I thought of this how-to template that would lay out the issues in a very straightforward, easy-to-follow format. That way, I could just clutch it in front of me when I made my phone call.

I wrote Brad about his article on the latest electronic voting machine/EAC scandal - [click here](#) "Exclusive: ES&S Touch-Screen Voting Systems Found Vulnerable to 'Serious' Viral Vote-Flipping Attack; US Election Assistance Commission Refuses to Issue Warning" - which reads in part,

The vulnerability is said to allow for a single malicious user to introduce a virus into the system which "could potentially steal all the votes in that county, without being detected," according to a noted computer scientist and voting system expert who has reviewed the findings.

I commended Brad (and co-author Michael Richardson) on the post. This is what he wrote me when I asked what we can be doing.

[Make] noise, noise, noise. Any way possible. You're media! Call the EAC [Election Assistance Commission] and see if they have any explanation for that article!

When they give you the same old song and dance, report it again! Call a couple of the SoS offices at the affected states and ask them if they know their systems were found to have been vulnerable to viruses from a single person that could flip an entire county's election undetectedly, and ask them why they didn't

029928

know about it, since the EAC did, and if they think the EAC should have let them know. Etc.

Advance the story, report it. We could use ya, teammate!

So, here's what I did. I went online and got the telephone number of the EAC, (toll-free 866-747-1471) and the name of the director (Jeannie Layson).

Then, I went online again and got the link for the complete roster of all 50 states (<http://www.nass.org/sos/soscontact.html>) with the Secretaries of States and their phone and fax numbers, snail mail and e-mail addresses. In short, more information than you or I will ever need.

Then, I printed up a copy of the original article from April 16th by Michael Richardson and Brad Friedman (<http://www.bradblog.com/?p=4396#more-4396>) as well as an update that lists the 16 states affected by this newly discovered "virus vulnerability" (<http://www.bradblog.com/?p=4416>). So now I'm all set with everything I need.

Unfortunately, it's too late today to call. But, tomorrow, I will take all of my pieces and:

1. Call the EAC and ask them about the article and why they take no responsibility for contacting and warning the states affected by this serious breach. (Keep in mind that this incompetent group is about to be made a permanent fixture on the political landscape if HR 811 is passed.) I will note any comment, or refusal to comment.
2. Then, I will call as many of the 16 secretaries of state as I can to ask what they think about this article, which I will offer to fax or email to them. (I'm assuming that after one or two calls, it will be pretty easy and the words will just roll off my tongue.)
3. Then, I will contact my own secretary of state (thankfully, Illinois is not on this list, but we have plenty of our own problems) and discuss how we can work together on spreading the word about the problems with the EAC, electronic voting and HR 811.
4. Then, I will write another OpEdNews piece and tell you how it went!

Hopefully, you will all take heart from this boiled-down, step-by-step template and be empowered to follow the steps yourselves. Let me know where you got to and what they said. Trust me when I say that this kind of approach can make a difference. In the meantime, we will be creating dozens - hopefully even hundreds or thousands - of citizen journalists who are stepping forward to do the job so disastrously abandoned by the mainstream corporate press.

I almost forgot the last step:

5. I will take my shoes off, put my feet up, and heave a big sigh of relief. Thanks, Brad, for making me do this. I feel a lot better now. And it wasn't even as hard as I thought it would be.

Authors Bio:

Joan Brunwasser of Citizens for Election Reform is a citizen activist working hard to restore and preserve free and fair elections. She started a lending library project to distribute the "Invisible Ballots" DVD in mid September 2005. In the following eighteen months, she loaned the DVD to almost 3,200 'borrowers' in 37 states, DC, Puerto Rico, Canada, Holland, England, Ireland and Japan. Since the DVD's release in spring 2004, there have been numerous studies and hacks, all of them critical of electronic voting. Her new focus is on raising public awareness about what's wrong with our elections and how to achieve a fair, secure and transparent election system. She welcomes your help in spreading the word. She has been the Voting Integrity Editor for Op Ed News since December 2005.

029929

## **Millender-McDonald reveals few details**

After feeling ill earlier this month, House Administration Chairwoman Juanita Millender-McDonald (D) visited at least one doctor in Washington, D.C., and returned home to California prior to the April recess for several more sessions with physicians before informing House Democratic leaders Friday that she is suffering from cancer.

According to Millender-McDonald's chief of staff, Bandele McQueen, the Congresswoman, who has closely guarded information regarding her health over the years, has not even told her Capitol Hill staff what type of cancer she is suffering from or how aggressive it might be.

"We appreciate the concerns folks have for the Congresswoman, but at this point we don't have any more information on the type of cancer or the type of treatment," McQueen said.

Millender-McDonald's official leave of absence, granted by Majority Leader Steny Hoyer (D-Md.), extends through May 25.

"She's not going into the office this week or anything, but by being in the district she will have the ability, whether it's working from home or going into the office, to continue to conduct the business of the 37th," said McQueen. "But right now the main focus is making sure that she's well. Hence she's asked for this leave of absence. ... She is hoping to return as soon as possible."

However, McQueen added, "I would be lying to you if my concern is her return to Congress. My concern is her return to good health."

He added that Millender-McDonald has medical staff attending to her at home on an hourly basis, but he dismissed rumors that it was any kind of hospice situation.

On Wednesday, Millender-McDonald was elected, in absentia, to serve as vice chairwoman of the Joint Committee on the Library at the panel's organizational hearing.

During that session, several Members on both sides of the aisle expressed their sympathy and wishes for a speedy recovery, including Sen. Dianne Feinstein (D-Calif.), the newly elected chairwoman of the Library of Congress panel.

Immediately afterward, the Joint Committee on Printing held its organizational hearing, in which House Administration Vice Chairman Robert Brady (D-Calif.) was elected chairman of the joint panel (Feinstein will serve as his vice chairwoman). While the Printing gavel has in the past fallen to the chairman of the House Administration Committee, the decision that Brady would run the committee in the 110th Congress was made with input from the Democratic leadership well before Millender-McDonald announced her illness, according to Brady's chief of staff.

Meanwhile Brady will be leading the House Administration Committee during Millender-McDonald's absence, although he stressed on Wednesday that "I'm just keeping things warm until the lady comes back."

But while giving his remarks at the joint committee's meeting, House Administration ranking member Vernon Ehlers (R-Mich.) – who also is serving on both joint panels and led the Library committee in the 109th Congress – jokingly referred to Brady as "Mr. Mayor" in reference to his ongoing campaign for mayor of Philadelphia.

The primary for that election will be held more than a week before Millender-McDonald is due to return from her leave of absence.

When asked about the joke after the hearing, Ehlers simply noted that Brady will have "a very busy life" chairing the committee while seeking another office.

"But," he added, "it's Speaker [Nancy] Pelosi's (D-Calif.) appointment and he's going to have to decide if

029930

he wants to do it" while he's actively campaigning.

But even prior to this week's news about Millender-McDonald's illness, Republican committee staff have raised concerns about the panel's inaction in certain areas of jurisdiction including the Capitol Visitor Center project and Smithsonian Institution. Meanwhile, other House and Senate committees have been holding hearings on those subjects.

Earlier this month, Ehlers wrote a letter to Millender-McDonald criticizing Democratic leaders for not yet appointing Members to serve on the Franking Commission, which oversees House lawmakers' official mail. Ehlers pointed to a rise in unsolicited e-mail as "evidence of the toll that a lack of oversight has taken."

Subject Re: Need your help ASAP 

Jeannie:

I did not receive your request in time to type responses on my blackberry by 2 PM, given the information needed. Here are the answers to your questions:

*1. Why did we only contact DOJ officials regarding the accuracy of their interviews?*

As far as I know, we didn't. contact DOJ officials about this except in response to concerns they had previously expressed to us. Also, I don't believe we ever allowed DOJ to edit the summaries. (I certainly didn't.) I believe the consultants and I discussed the idea of having all the interviewees review their respective interview summaries, but the consultants objected to the idea and there were concerns that the all of the money remaining available was needed to complete the final report.

Craig Donsanto, Election Crimes Branch, saw the summary of his interview among the documents provided to the Working Group (prior to the meeting of that group), and pointed out an important factual error. The summary, as originally written, portrayed DOJ as switching from the prosecution of conspiracies to the prosecution of individuals. I was present at this interview and this was not what Craig had said, nor is it supported by the information available on the election crimes pursued by that branch. DOJ continues to pursue conspiracies and, in addition, has begun to pursue individuals (specifically, double voting, felon voting and alien voting) in an effort to deter others from election crime.

To my knowledge, John Tanner, Voting Section, Civil Rights Division, had not seen the consultants' full summary of his interview; but he expressed concern to Tova Wang and EAC about the consultants' characterization of the interviews with Donsanto and him that had been included in the May 2006 status report. This report was provided to the members of the EAC Standards and Advisory Boards. Per HAVA requirements, the Voting Section is represented on the Advisory Board. Tanner pointed to the following errors:

- First, the consultants stated that DOJ was not pursuing voter suppression cases. Tanner responded that "[t]he Department has brought two 11(b) cases, one of the two in this Administration. The focus of DOJ activity has shifted, in fact, to voter suppression as there are fewer cases over voter dilution (challenges to at-large election systems, etc.) being brought by anyone as the number of jurisdictions with at-large election systems has shrunk dramatically. This Administration has, in fact, brought far more voter-suppression cases ... than ever in the past, including a majority of all cases under Sections 203 and 208 of the Act, and such key recent Section 2 cases as US v. City of Boston and US v. Long County, Georgia."
- Second, the consultants implied that DOJ is not pursuing instances of unequal implementation of ID rules. Tanner's response was that "[c]hallenges based on race and unequal implementation of ID rules are indeed actionable and we have brought lawsuits, such as in Boston and Long County; we have not identified instances of such discrimination in which we have not taken action."

Tanner also pointed to the consultants' refusal during the interview to define what they meant by "voter intimidation", which Tanner suspected did not jibe with the meaning of the term in federal prosecutions and probably contributed to misunderstandings. (Federal voter intimidation prosecutions require the threat of economic or physical harm.)

By the way, both of these officials are career attorneys, not political appointees. They have years of service at DOJ, working under a number of different administrations.

029932

*2. Exactly what did we change and why?*

In the case of the Donsanto interview summary, I spoke with our consultants and asked them to make the correction. At first, they both refused. Later, they revised the summary to be a little less blatant, but the implication that there had been a complete change in approach remained. We revised the summary to clearly indicate that prosecution of conspiracies continues. The revised paragraph is on page 4 of the published summary. We also added an intro paragraph similar to other interview summaries submitted by the consultants to summarize the enforcement authority of the Election Crimes Branch and to distinguish it from the Voting Section, Civil Rights Division.

In the case of the actual John Tanner interview summary, we added an intro paragraph similar to other interview summaries submitted by the consultants to summarize the enforcement authority of the Voting Section and to distinguish it from the Election Crimes Branch. We also moved the consultants' note about the refusal to share certain internal working papers to the end of the summary because it seemed to distract from the main interview points if left as an introduction.

Making the distinction between the Election Crimes Branch and the Voting Section is important. The Voting Section brings cases involving "systemic" discrimination because federal voting statutes focus on discriminatory action by local governments. It is criminal statutes that involve malfeasance by individuals and that are enforced by the Election Crimes Branch through Us Attorneys' offices. The difference is key to understanding federal election law enforcement.

## Deliberative Process Privilege

Interview with Craig Donsanto, Director, Elections Crimes Branch, Public Integrity  
Section, U.S. Department of Justice  
January 13, 2006

The Department of Justice's (DOJ) Election Crimes Branch is responsible for supervising  
federal criminal investigations and prosecutions of election crimes.

### Questions

#### *How are Prosecution Decisions Made?*

Craig Donsanto must approve all investigations that go beyond a preliminary stage, all charges, search warrant applications and subpoenas and all prosecutions. The decision to investigate is very sensitive because of the public officials involved. If a charge seems political, Donsanto will reject it. Donsanto gives possible theories for investigation. Donsanto and Noel Hillman will decide whether to farm out the case to an Assistant U.S. Attorney (AUSA). Donsanto uses a concept called predication. In-other-words, there must be enough evidence to suggest a crime has been committed. The method of evaluation of this evidence depends on the type of evidence and its source. There are two types of evidence---factual (antisocial behavior) and legal (antisocial behavior leading to statutory violations). Whether an indictment will be brought depends on the likelihood of success before a jury. Much depends on the type of evidence and the source. Donsanto said he "knows it when he sees it." Donsanto will only indict if he is confident of a conviction assuming the worst case scenario – a jury trial.

A person under investigation will first receive a target letter. Often, a defendant who gets a target letter will ask for a departmental hearing. The defendant's case will be heard by Donsanto and Hillman. On occasion, the assistant attorney general will review the case. The department grants such hearings easily because such defendants are likely to provide information about others involved.

The Civil Rights Division, Voting Rights Section makes its own decisions on prosecution. The head of that division is John Tanner. There is a lot of cooperation between the Voting Section and the Election Crimes Branch.

*Does the Decision to Prosecute Incorporate Particular Political Considerations within a State Such as a One Party System or a System in which the Party in Power Controls the Means of Prosecution and Suppresses Opposition Complaints?*

Yes. Before, the department would leave it to the states. Now, if there is racial animus involved in the case, there is political bias involved, or the prosecutor is not impartial, the department will take it over.

*Does it Matter if the Complaint Comes from a Member of a Racial Minority?*

029936

No. But if the question involves racial animus, that has also always been an aggravating factor, making it more likely the Department will take it over

*What Kinds of Complaints Would Routinely Override Principles of Federalism?*

Federalism is no longer big issue. DOJ is permitted to prosecute whenever there is a candidate for federal office on the ballot.

*Are There Too Few Prosecutions?*

DOJ can't prosecute everything.

*What Should Be Done to Improve the System?*

The problem is asserting federal jurisdiction in non-federal elections. It is preferable for the federal government to pursue these cases for the following reasons: federal districts draw from a bigger and more diverse jury pool; the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected; DOJ has more resources -- local prosecutors need to focus on personal and property crimes---fraud cases are too big and too complex for them; DOJ can use the grand jury process as a discovery technique and to test the strength of the case.

In *U.S. v. McNally*, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to "fix" *McNally*, did not include voter fraud.

As a result, the department needs a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce. The department has drafted such legislation, which was introduced but not passed in the early 1990s. A federal law is needed that permits prosecution in any election where any federal instrumentality is used.

*Other Information*

The Department has held four symposia for District Election Officers (DEOs) and FBI agents since the initiation of the Ballot Access and Voting Integrity Initiative. In 2003, civil rights leaders were invited to make speeches, but were not permitted to take part in the rest of the symposium. All other symposia have been closed to the public. ~~(Peg will be sending us the complete training materials used at those sessions. These are confidential and are the subject of FOIA litigation).~~

There are two types of attorneys in the division: prosecutors, who take on cases when the jurisdiction of the section requires it; the US Attorney has recused him or herself; or when the US Attorney is unable to handle the case (most frequent reason) and braintrust attorneys who analyze the facts, formulate theories, and draft legal documents.

Cases:

Formatted: Underline

Donsanto provided us with three case lists: ~~Open cases (still being investigated) as of January 13, 2006 – confidential; election fraud prosecutions and convictions as a result of the Ballot Access and Voting Integrity Initiative October 2002-January 13, 2006; and cases closed for lack of evidence as of January 13, 2006.~~

If we want more documents related to any case, we must get those documents from the states. The department will not release them to us.

Although the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate complaints of fraud, *the number of cases that the department is investigating and the number of indictments the department is pursuing are both up dramatically.*

Since 2002, the department has brought more cases against alien voters, felon voters, and double voters than ever before. Previously, cases were only brought against conspiracies when there was a pattern or scheme to corrupt the process rather than individual offenders acting alone. For deterrence purposes, (Charges were not brought against individuals – those cases went un-prosecuted. This change in direction, focus, and level of aggression was by the decision of the Attorney General. The reason for the change was for deterrence purposes, he Attorney General decided to add the pursuit of individuals who vote when not eligible to vote (noncitizens, felons) or who vote more than once.

The department is currently undertaking three pilot projects to determine what works in developing the cases and obtaining convictions and what works with juries in such matters to gain convictions:

1. Felon voters in Milwaukee.

Formatted: Bullets and Numbering

2. Alien voters in the Southern District of Florida. FYI – under 18 USC 611, to prosecute for “alien voting” there is no intent requirement. Conviction can lead to deportation. Nonetheless, the department feels compelled to look at mitigating factors such as was the alien told it was OK to vote, does the alien have a spouse that is a citizen.

Formatted: Bullets and Numbering

3. Double voters in a variety of jurisdictions.

Formatted: Bullets and Numbering

The department does not maintain records of the complaints that come in from DEOs, U.S attorneys and others during the election that are not pursued by the department. Donsanto asserted that U.S. attorneys never initiate frivolous investigations.

*According to the new handbook, the department can take on a case whenever there is a federal candidate on the ballot*

Interview with John Tanner, ~~Director~~ Chief, Voting Section, Civil Rights Division,  
U.S. Department of Justice

February 24, 2006

The Department of Justice's (DOJ) Voting Section is charged with the civil enforcement of the Voting Rights Act, the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), the National Voter Registration Act (NVRA), and Title III of the Help America Vote Act (HAVA).

Note: Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. Mr. Tanner would not give us any information about or data from the section's election complaint intake phone logs; data or even general information from the Interactive Case Management (ICM) system its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws; and would give us only a selected few samples of attorney-observer reports, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. He would not discuss in any manner any current investigations or cases the section is involved in. He also did not believe it was his position to offer us recommendations as to how his office, elections, or the voting process might be improved.

Authority and Process

The Voting Section, in contrast to the Public Integrity Section as Craig Donsanto described it, typically focuses looks only on systemic problems resulting from government action or inaction, not problems caused by individuals. Indeed, the section never goes after individuals because it does not have the statutory authority to do so. In situations in which individuals are causing problems at the polls and interfering with voting rights, the section calls the local election officials to resolve it.

Federal voting laws enforced by the section only apply to state action, so the section only sues state and local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. Doing it this way has been most effective – for example, while the section used to have the most observers in the South, with systematic changes forced upon those jurisdictions, ~~have made it so now~~ the section now does not get complaints from the South.

The section can get involved even where there is no federal candidate on the ballot if there is a racial issue under the 14<sup>th</sup> and 15<sup>th</sup> Amendments.

When the section receives a complaint, attorneys first determine whether it is a matter that involves individual offenders or a systemic problem. When deciding what to do

with the complaint, the section errs on the side of referring it criminally to avoid having any because they do not want civil litigation to complicate a possible criminal case.

When a complaint comes in, the attorneys ask questions to see if there are even problems there that the complainant is not aware are violations of the law. For example, in the Boston case, the attorney did not just look at Spanish language cases under section 203, but also brought a Section 2 case for violations regarding Chinese and Vietnamese voters. When looking into a case, the attorneys look for specificity, witnesses and supporting evidence.

Often, lawsuits bring voluntary compliance.

#### Voter Intimidation

Many instances of what some people refer to as voter intimidation are more unclear now. For example, photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera. It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation.

The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.

The inappropriate use of challengers on the basis of race would be a violation of the law. Mr. Tanner was unaware that such allegations were made in Ohio in 2004. He said there had never been a formal investigation into the abusive use of challengers.

Mr. Tanner said a lot of the challenges are legitimate because you have a lot of voter registration fraud as a result of groups paying people to register voters by the form. They turn in bogus registration forms. Then the parties examine the registration forms and challenge them because 200 of them, for example, have addresses of a vacant lot.

However, Mr. Tanner said the dDepartment was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama, as was referenced in a February 23 Op-Ed in USA Today. Mr. Tanner reiterated the section takes racial targeting very seriously.

Refusal to provide provisional ballots would be a violation of the law that the section would investigate.

Deceptive practices are committed by individuals and would be a matter for the Public Integrity Section. Local government would have to be involved for the ~~voting~~ Voting Section to become involved.

Unequal implementation of ID rules, or asking minority voters only for ID would be something the section would go after. Mr. Tanner was unaware of allegations of this in 2004. He said this is usually a problem where you have language minorities and the poll workers cannot understand the voters when they say their names. The section has never

formally investigated or solely focused a case based on abuse of ID provisions. However, implementation of ID rules was part of the Section 2 case in San Diego. Mr. Tanner reiterated that the section is doing more than ever before.

When asked about the section's references to incidents of vote fraud in the documents related to the new state photo identification requirements, Mr. Tanner said the section only looks at retrogression, not at the wisdom of what a legislature does. In Georgia, for example, everyone statistically has identification, and more blacks have ID than whites. With respect to the letter to Senator Kit Bond regarding voter ID, the section did refer to the perception of concern about dead voters because of reporting by the Atlanta Journal-Constitution. It is understandable that when you have thousands of bogus registrations that there would be concerns about polling place fraud. Very close elections make this even more of an understandable concern. Putting control of registration lists in the hands of the states will be helpful because at this higher level of government you find a higher level of professionalism.

It is hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. However, the enforcement of federal law over the years has made an astounding difference so that the level of discrimination has plummeted. Registration of minorities has soared, as can be seen on the section's website. Mr. Tanner was unsure if the same was true with respect to turnout, but the gap is less. That information is not on the section's website.

The section is not filing as many Section 2 cases as compared to Section 203 cases because many of the jurisdictions sued under Section 2 in the past do not have issues anymore. Mr. Tanner said that race based problems are rare now.

NVRA has been effective in opening up the registration process. In terms of enforcement, Mr. Tanner said they do what they can when they have credible allegations. There is a big gap between complaints and what can be substantiated. Mr. Tanner stated that given the high quality of the attorneys now in the section, if they do not investigate it or bring action, that act complained of did not happen.

#### Recommendations

Mr. Tanner did not feel it was appropriate to make recommendations.

Note: Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. We did not have access to any information about or data from the section's election complaint in-take phone logs or data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws. Only a selected few samples of attorney-observer reports were provided, reports that every Voting Section attorney who is observing

elections at poll sites on Election Day is required to submit. Mr. Tanner would not discuss any current investigations or cases the section is involved in.

Subject EAC and the Vote Fraud and Voter Intimidation Project

Ms. Bertelson and Mr. Horrigan,  
Thank you so much for speaking with me. Here's information about the vote fraud/voter intimidation project:

The vote fraud and voter intimidation project began in Sept. 2004. As I said, the statement that this project had been five years in the making is incorrect -- that predates the creation of the EAC. Commissioners were appointed in Dec. 2003, and the agency's first year of operations was 2004 with a \$1.2 million operating budget.

Also, any assertion that the administration edited the final report, Election Crimes: An Initial Review and Recommendations for Further Study, is absolutely false. And just to be clear, at no point in this process did the administration play any role at any time during the life of this project. As we discussed, EAC contracted with two consultants to do two things: define "vote fraud" and "voter intimidation" and provide recommendations for future study based on their review of court cases, literature and interviews with 24 people who have experience in these areas. On page 24 of the final report, there are links to appendices which contain the consultants' bios, as well as interview summaries, and all of the court cases and literature they reviewed. EAC advisory boards were briefed on this project at a public meeting in May 2006.

EAC staff reviewed every article, every court case and every interview for accuracy, as we have a responsibility to do. This review process was conducted within the agency by EAC staff. After the staff reviewed the document and edited it for accuracy, added information reflecting which recommendations the commission should adopt, it presented its recommended report to the commission. The commission adopted the final report at a public meeting in December 2006. This meeting was also webcast.

Since the adoption of the final report, the Commission's actions have been questioned by Members of Congress, the media and others. Yesterday, EAC Chair Donetta Davidson requested that the inspector general conduct a review surrounding the circumstances of this project and the voter ID research project. Go here to read the Commission's statement, the memo to the IG and the letters we've received from Congress.

Criticism is fair and healthy. However, I request that criticism be based on facts. It is not factual to state that it took five years to complete this project. And it is not factual to state that the administration played any role -- editing or otherwise -- in this project.

I request a correction that clarifies both of the above points. Also, I think it would be fair to point out that the chair has asked the IG to look into the process. You could link to the IG memo and let readers see our point of view, and the point of view of those who are critical of EAC decisions.

I thank both of you for your consideration in this matter. And again, let me reiterate the fair and professional treatment EAC has received from the reporters in the DC bureau. We look forward to answering any questions the editorial board or the news side of your organization has about EAC or its decisions or actions. Please don't hesitate to call me if I can be of assistance in the future.

Subject Statement for PDF'ing

History:  This message has been replied to.

Hillman Statement on the release of the voting fraud report 12.01.06 (DRAFT).doc

U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW – Suite 1100  
Washington, DC 20005

**STATEMENT BY ELECTION ASSISTANCE COMMISSIONER GRACIA HILLMAN ON  
“THE EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY”**

**Washington, D.C. – December 7** – Today the Election Assistance Commission (EAC) voted on the findings of the “Voting Fraud and Voter Intimidation Study” and accepted recommendations to conduct a comprehensive study to assess all claims, charges and prosecutions of voting crimes. This report, which was largely based on anecdotal information, was months in development and is the result of two independent researchers’ assessment of what characterizes voting fraud and voter intimidation in the United States.

Today’s vote sets in motion the EAC’s acceptance of the researchers’ and subsequent working group’s core recommendation that the matter of voting fraud and voter intimidation deserves more than just an anecdotal assessment, but rather a “comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes” based on “hard data on complaints, charges and prosecutions”.

While I would have liked this report to have been made to the recent 2006 mid-term elections, I am confident that the EAC is on the right path toward next steps which include:

- 1) A comprehensive survey/study on voting fraud and voter intimidation based on hard data by the end of calendar year 2007, and
- 2) By mid-2008, a set of standards/best practices for state election officials and prosecuting authorities to use in assessing legitimate claims and bringing them to justice.

For the EAC’s full report and news release on the “Voting Fraud and Voter Intimidation Study” please visit [www.eac.gov](http://www.eac.gov).

Thanks, Jeannie— I appreciate the 'head's up.' I had heard that from Bryan's list serve a couple of minutes before your email. I will make sure that Howard has seen the release and memo. I will forward it to Senator Durbin's Appropriations staff as well. When you have an estimated timeline for the Commission's projected response to Sens. Durbin and Feinstein, please let me know.

Also- I've been asked to let you all know that Chairman Feinstein has set a tentative date of June 13<sup>th</sup> for a hearing on the Election Assistance Commission. Beyond the tentative date—there are no other details.

I hope that you're doing ok— drop me a line or call if there's anything else that's new.

Best,  
Adam

## EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects

WASHINGTON - U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission's inspector general to conduct a review of the commission's contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair's memo to the inspector general is attached ( to view the memo and attachments, click [here](#) ).

"The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter," said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

EAC is an independent bipartisan commission created by HAVA. It is charged with administering

029953

payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary E. Rodriguez, Caroline Hunter and Gracia Hillman.

Subject Re: IG Press Release 

The IG's request contains the following information, which is what was in the earlier version of the press release.

This report was the culmination of research conducted by Tova Wang and Job Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort."

Sorry about that... is this sentence acceptable to everyone? It's the last sentence in the fifth paragraph.  
Revised press release is attached.

"EAC staff reviewed the consultants' material, and found inconsistencies in their conclusions and the data they submitted. The material in the final report was motivated by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions."

## EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects

For Immediate Release  
April 16, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

WASHINGTON – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission's inspector general to conduct a review of the commission's contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair's memo to the inspector general is attached.

"The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter," said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

Last month, the commission voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report was not sufficient to draw any conclusions. The commission declined to adopt the report, but released all of the data to the public. The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov).

At a public meeting in December 2006, the commission adopted *Election Crimes: An Initial Review and Recommendations for Further Study*, available at [www.eac.gov](http://www.eac.gov). This report was the culmination of research conducted by Tova Wang and Job Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort." EAC staff reviewed the consultants' material, and found inconsistencies in their conclusions and the data they submitted. The material in the final report was motivated by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions.

*EAC is an independent bipartisan commission created by HAVA. Subject Chair Requests Internal Review

Commissioners,

The chair has asked me to provide you with the memo she just submitted to Curtis Crider, requesting a review of our contracting procedures surrounding the voter identification and vote fraud and voter intimidation research projects. She has asked me to write a press release about this decision, which I will send to you shortly. She requests that we incorporate the commission's request into the letter to the advisory boards and to Congresswoman Lofgren. She also requests that we respond to Sen. Feinstein's letter, letting her know that we are working to comply with her request, but we wanted to alert her to the action we've taken.

I am going to circulate this to the staff so everyone will be aware of this action. Please let me know if you have any questions, and I will have a press release for your review shortly. Attached to the press release will be this memo, letters from Members of Congress regarding this issue, and the recent statements from Congressmen Hinchey and Serrano.

**April 16, 2007**

**MEMORANDUM**

**To:** EAC Inspector General Curtis Crider  
**Fr:** EAC Chair Donetta Davidson  
**Cc:** Commissioners Rodriguez, Hillman and Hunter, Tom Wilkey, and Julie Hodgkins  
**RE:** EAC requests review of contracting procedures

On Friday, April 13, each of my three colleagues – Rosemary Rodriguez, Gracia Hillman, and Caroline Hunter -- agreed with my recommendation that we issue the following formal request to the Commission’s Office of Inspector General to review the circumstances surrounding two recent EAC research projects – vote fraud and voter intimidation and voter identification.

**Background**

The U.S. Election Assistance Commission (EAC) is an independent, bipartisan Commission created by the Help America Vote Act (HAVA) of 2002.

EAC develops guidance to meet HAVA requirements, adopts voluntary voting system guidelines, accredits voting system test laboratories, certifies voting systems and audits the use of HAVA funds. HAVA also directs EAC to maintain the national mail voter registration form developed in accordance with the National Voter Registration Act (NVRA) of 1993.

The Commission serves as a national clearinghouse and resource of information regarding election administration. It is under the Commission’s clearinghouse role that research projects are conducted with the goal of providing information that will lead to improvements in election administration, as well as inform the public about how, where and when we vote.

The voter identification research was conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics (“Contractor”). The contract, awarded in May 2005, required the Contractor to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches. Last month, the commission voted

unanimously not to adopt the report, citing concerns with its methodology, but voted to release all of the data provided by the Contractor.

The vote fraud and voter intimidation research was conducted by Tova Wang and Job Serebrov ("Consultants"). The contracts, awarded in September 2005, issued to these Consultants tasked them with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the Consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort."

### **Review Request**

The actions taken by the Commission regarding both the voter identification and the vote fraud and voter intimidation research projects have been challenged. Specifically, Members of Congress, the media, and the public have suggested that political motivations may have been part of the Commission's decision making process regarding these two projects. Also, the Commission has been criticized for the amount of taxpayer dollars that were spent on these two projects, as well as how efficiently these projects were managed.

The Commission takes these allegations very seriously, and we request that you fully review the following issues and provide the Commission and the Congress with a report of your findings as soon as possible. The Commission stands ready to assist you in these efforts and will provide whatever information, including memos, emails and other documents you will need. Cooperating with your review will be the staff's top priority.

1. Current Commission policy regarding awarding and managing research contracts.
2. Issuance and management of the vote fraud and voter intimidation contract.
3. Circumstances surrounding the receipt of information from Consultants regarding the vote fraud and voter intimidation project.
4. Circumstances surrounding staff efforts to write a final report for Commission consideration.
5. Identification of staff members who assisted in the editing and collaboration of the final vote fraud and voter intimidation report for Commission consideration.
6. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the vote fraud and voter intimidation project.
7. Circumstances surrounding Commission discussion and deliberation of final adoption of *Election Crimes: An Initial Review and Recommendation for Further Study*.
8. Issuance and management of the voter identification contract.
9. Circumstances surrounding the receipt of information from Contractor regarding the voter identification report.
10. Identification of staff members who assisted in the editing, collaboration, and recommendation to the Commission regarding final adoption of the voter identification report.

11. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the voter identification project.
12. Circumstances surrounding Commission deliberation whether to adopt a final voter identification report.

For your information, I have attached statements and related correspondence from Members of Congress, and a statement issued by the Commission regarding the criticism.

It is our hope that your findings will instruct us how to move forward in a more efficient, effective and transparent manner. The Commission takes its mandates under HAVA very seriously, and this small Commission has an enormous amount of work to conduct, including testing and certifying voting equipment, providing guidance and assistance to election officials, and auditing the proper use of the \$3.1 billion that was distributed under HAVA.

We look forward to your findings so that we may take the actions necessary to improve the way we conceive research projects, manage research contracts, and make decisions regarding the final release of data provided to the Commission from a third party.

Subject FOIA Request

Today I will circulate a formal FOIA request to all of you. Please note that this request is from a journalist. The information I circulate will include a copy of the original request, which was made by the DC bureau of McClatchy Newspapers. An abbreviated version of the request follows:

"Copies of all emails between Job Serebrov and Election Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for EAC."

Some of you have provided similar information in the past, but I will need another complete submission that includes any related files that may have been generated since your last submission.

Please anticipate a formal request to be distributed to everyone today, and take note that the deadline to provide this information is April 30. Thank you.

Jeannie:

I haven't had any relevant emails with Job or Tova that occurred after the batch I gave you in response to the Brennan Center FOIA. I last heard from Tova in August 2006 and included that message in the stuff I sent you earlier. Job and I corresponded in February 2007 about how his pay had been reported (what amounts were reported in which tax year). As there was no discussion of the research project itself, I don't think that is relevant.

If you could reuse the information I provided last time, I would really appreciate it. (It took me hours to pull that together and I would rather not have to repeat that.) I think the stuff I sent you earlier also included correspondence with Working Group and other folks outside of the EAC, which would need to be culled.. — Peggy

Dear Ms. Layson:

This is an official request under the Freedom of Information Act, 5 U.S.C., 552 as amended.

I am writing on behalf of McClatchy Newspapers to request copies of all emails between Job Serebrov and Elections Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for the EAC.

029980

In the event that this request results in research or copying, McClatchy Newspapers requests a public interest fee waiver because the material being sought is likely to be used in a newspaper story. We would argue strongly that there is a significant public interest in our reviewing the material being sought. As the nation's second largest newspaper group with 32 daily newspapers and a new service serving 400 newspapers, McClatchy easily qualifies as acting in the public interest.

If possible, I would appreciate your expediting this request, especially any emails transmitted after the draft report was submitted, because of the obvious topical import of these documents.

Should this letter prompt questions, please feel free to phone me at 202-383-0005. Thanks for your assistance.

Sincerely,

Gregory Gordon  
McClatchy Newspapers

Subject EAC Statement

Hello everyone,

I'm sure you have read the article in today's NYT about the voter fraud report this agency issued. Today, Congressmen Hinchey and Serrano have issued the following statement. Very shortly, EAC will post and distribute the attached statement to articulate our role and approach to conducting research and the steps we will take to improve our process. Please let me know if you have any questions about this, as I am sure we will all receive phone calls today about this issue. You may also direct people with questions to the statement that will be on the website. I will keep everyone informed as this situation evolves.

2007-11 [ 4-11-07 ] Statement on Research & Contracting Policies.pdf

For  
Immediate  
Release

April 11, 2007

## **Hinchey, Serrano Urge Non-Partisanship, Greater Transparency at Election Assistance Commissic**

**Washington, DC** - Today, Congressmen Maurice Hinchey (NY-22) and José E. Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

"The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner," said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during subcommittee hearing last month. "The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just

029933

some of them. The EAC must never limit discussion and debate.”

“The EAC is charged with helping to ensure our elections are trustworthy and administered fairly,” said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget. “I’m concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information is an analysis that undermines the notion that voter fraud is rampant

“I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people’s faith in it, is far more important than any short-term political advantage.”

The draft report was written by outside experts under contract with the EAC. The final report was entitled “Election Crimes: An Initial Review and Recommendations for Future Study” and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

## **EAC Statement Regarding Research and Contracting Policies**

### ***Commission to Review Internal Procedures***

For Immediate Release  
April 11, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The Help America Vote Act of 2002 (HAVA) directs the Election Assistance Commission (EAC) to serve as a national clearinghouse and resource by, among other things, conducting studies with the goal of improving the administration of federal elections. To fulfill this mandate, the EAC has entered into contracts with a variety of persons and entities. Reports adopted by the EAC, a bipartisan federal entity, are likely to be cited as authoritative in public discourse. Prior to the EAC's adopting a report submitted by a contractor, the EAC has the responsibility to ensure its accuracy and to verify that conclusions are supported by the underlying research.

The Commission takes input and constructive criticism from Congress and the public very seriously. We will take a hard look at the way we do business. Specifically, we will examine both the manner in which we have awarded contracts and our decision-making process regarding the release of research and reports. The EAC takes its mandates very seriously, and we will continue to move forward in a bipartisan way to improve the way America votes.

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.*

Subject your questions

Laura,

The fraud and intimidation research contract was for \$147,106, and the voter ID and provisional voting research contract was \$560,002. Voter ID was only part of the contract. It also tasked Eagleton to provide information about provisional voting practices. In Oct. 2006, the Commission issued provisional voting best practices.

Please let me know if you need anything else, and I'll send you the statement as soon as it's ready to go.

**U.S. ELECTION ASSISTANCE COMMISSION**  
**1225 New York Ave. NW - Suite 1100**  
**Washington, DC 20005**

March 29, 2007

Ms. Wendy R. Weiser  
Deputy Director, Democracy Program  
Brennan Center for Justice  
161 Avenue of the Americas, 12<sup>th</sup> Floor  
New York, NY 10013

Dear Ms. Weiser:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on November 13, 2006. The request sought certain agency records concerning two agency draft reports, *The Voter Fraud and Intimidation Report* and *The Voter Identification Report*. Specifically, the request sought: (1) "the report on voter identification prepared by the Eagleton Institute of Politics and the Moritz College of Law," (2) "the report on voter fraud and voter intimidation prepared by Tova Wang and Job Serebrov," (3) The voter identification and voting fraud report requests for proposals and contracts, and (4) communications relating to the above reports between the EAC and Eagleton Institute of Politics, the Moritz College of Law, Ms. Tova Wang, Mr. Job Serebrov, or other third parties.

**Responsive records.** On December 12, 2006, we provided a partial response to your request regarding items (1) through (3) above. In regard to item (4), copies of the responsive documents are attached (approximately 1,500 pages). Upon review of the records, you will find a few places where small portions of information have been redacted (in black). As required by FOIA exemption 6, the EAC has redacted personal information, including home addresses, telephone numbers, personal e-mail addresses, personal financial information, social security numbers, and tax identification numbers.

**Withheld records.** In reference to item (4) an estimated 300 pages of e-mails have been withheld because the information in these e-mails is pre-decisional and protected by the Deliberative Process Privilege for the same reasons discussed in our December 12, 2006 letter, which I have attached.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you will have an opportunity to appeal it to the Election Assistance Commission. However, as this letter is only partially responsive to your request, please hold any appeal until your request has been fully addressed. At that time, your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of EAC's final response letter.

Please include your reasons for reconsideration and attach a copy of this and subsequent EAC responses.

Sincerely,

Jeannie Layson  
Director of Communications  
U.S. Election Assistance Commission

Subject Board agenda docs

Rich,

When you get to the point you need to speak with anyone for attribution, please let me know and I'll check with our spokesperson, Jeannie Layson. As we discussed, here are the docs you asked about that were presented at the board meetings in May and links to the meeting agenda. There are two reports: (1) a draft report produced by Eagleton Institute concerning provisional voting; and (2) a status report produced by EAC contractors regarding research being conducted on voter fraud and intimidation. The reports were presented by the contractors to the Standards Board and Board of Advisors for their input. This type of input is required for any guidance issued by EAC and is desired for any product that we provide to the election community and the public. Based on the input that was received from these boards, particularly regarding the questionable information contained in Eagleton's provisional voting report, EAC has not issued the Eagleton draft report as a final EAC document. As for the voter fraud and intimidation status report, it is merely an update by EAC staff on the status of the research conducted by the EAC contractors. A report and recommendations on future actions regarding this topic will be produced after EAC review of the preliminary research.

Please do not hesitate to contact me if I can be of further assistance.

**U.S. ELECTION ASSISTANCE COMMISSION**

**Status Report on the  
Voting Fraud-Voter Intimidation Research  
Project**

**May 17, 2006**

**029991**

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. Interviews with DOJ personnel indicate that the Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance in this area. While the Election Crimes Branch, Public Integrity Section, continues to maintain an aggressive pursuit of systematic schemes to corrupt the electoral process (including voter suppression), it also has increased prosecutions of individual instances of felon, alien, and double voting.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, in addition to pursuing systematic election corruption schemes, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots "for cause" only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

### NEWS ARTICLES

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

#### Absentee Ballots

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota, and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from "battleground" states. There were several such reports out of Florida, Ohio, and Pennsylvania.

#### **"Dead Voters and Multiple Voting"**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

**The Research Team**

This research report on Provisional Voting in the 2004 election is part of a broader analysis that also includes a study of Voter Identification Requirements, a report on which is forthcoming. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

## EXECUTIVE SUMMARY

### Background and Methodology

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005.

The Help America Vote Act of 2002 (HAVA, (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient. Section 302(a) of HAVA required states to establish provisional balloting procedures by January 2004.<sup>1</sup> The process HAVA outlined left considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voter eligible to cast a provisional ballot that will be counted and in what jurisdiction (precinct or larger unit) the ballot must be cast in order to be counted.<sup>2</sup>

The general requirement for provisional voting is that, if a registered voter appears at a polling place to vote in an election for Federal office, but either the potential voter's name does not appear on the official list of eligible voters for the polling place, or an election official asserts that the individual is not eligible to vote, that potential voter must be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the EAC's Election Day Survey, "first-time voters who registered by mail without identification and cannot provide identification, as required under HAVA. . ." <sup>3</sup> HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. Election administrators are required by HAVA to notify individuals of their opportunity to cast a provisional ballot.

<sup>1</sup>The Election Center's National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing "voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted." It recommended "in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions." See [www.electioncenter.org](http://www.electioncenter.org).

<sup>2</sup> The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in *Sandusky County Democratic Party v. Blackwell*, 387 F.3d565 (6<sup>th</sup> Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA's definition of "jurisdiction" incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define "jurisdiction" for the purpose of counting a provisional ballot.

<sup>3</sup> The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See <http://wired.com/news/evote/0,2645,63298,00.html>. (Our analysis revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)

030007

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Our research began in late May 2005. It focused on six key questions raised by the EAC.

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, we:

1. Surveyed 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Reviewed the EAC's Election Day Survey, news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.<sup>4</sup>
3. Analyzed statistically provisional voting data from the 2004 election to determine associations between the use of provisional voting and such variables as states' experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification.
4. Collected and reviewed the provisional voting statutes and regulations in all 50 states.
5. Analyzed litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Our research is intended to provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states move forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly those states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

### KEY FINDINGS

#### Variation among the states

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63%, were counted. Provisional ballots accounted for a little more than 1% of the final vote tally. These totals obscure the wide variation in provisional voting among the states.<sup>5</sup>

---

<sup>4</sup> Attachment 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures. It also describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

<sup>5</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Six states accounted for two-thirds of all the provisional ballots cast.<sup>6</sup>
- The percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%.
- The portion of provisional ballots cast that were counted ranged from 96% in Alaska to 6% in Delaware.
- States with voter registration databases counted, on average, 20% of the provisional ballots cast.
- States without databases counted ballots at more than twice that rate: 44%.<sup>7</sup>
- States that provided more time to evaluate provisional ballots counted a greater proportion of those ballots. Those that provided less than one week counted an average of 35.4% of their ballots, while states that permitted more than 2 weeks, counted 60.8%.

An important source of variation among states was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>8</sup>

### Variation within states

Within states, too, there was little consistency among different jurisdictions. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors (including the training of election judges or poll workers) beyond statewide factors, such as experience or the existence of voter registration databases, also influence the use of provisional ballots.

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot.

Resources available to administer provisional voting varied considerably among and within states. Differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.

<sup>6</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>7</sup> As the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without." Report on the Commission on Federal Election Reform, "Building Confidence in U. S. Elections," September 2005, p. 16.

<sup>8</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.

In precincts located in districts where many voters live in poverty and have low levels of income and education, the voting process, in general, may be managed poorly. Provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

### **The lessons of litigation**

Successful legal challenges highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called "wrong precinct issue" – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. Most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots. This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right --the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot.

### **States move to improve their processes**

Shortly after the 2004 election, several states came to the conclusion that the administration of their provisional voting procedures needed to be improved, and they amended their statutes. The new legislation highlights areas of particular concern to states about their provisional voting process.

- Florida, Indiana, Virginia, and Washington have clarified or extended the timeline to evaluate the ballots.
- Colorado, New Mexico, North Carolina, and Washington have passed legislation focused on improving the efficacy and consistency of the voting and counting process.
- Colorado, Arkansas, and North Dakota took up the issue of counting provisional ballots cast in the wrong precinct.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices that draw on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting. The important effect of experience on the administration of the provisional ballot process indicates that the states have much they can learn from each other.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### SUMMARY OF RECOMMENDATIONS FOR BEST PRACTICES

State efforts to improve the provisional voting process have been underway since the 2004 election. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states.

#### Take a quality-improvement approach

Defining what constitutes a successful provisional voting system is difficult. Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. A first step is for states to recognize that improving quality begins with seeing the provisional voting process as a system and taking a systems approach to regular evaluation through standardized metrics with explicit goals for performance. EAC can facilitate action by the states by recommending as a best practice that:

- Each state collect data systematically on the provisional voting process to permit evaluation of its voting system and assess changes from one election to the next. The data collected should include: provisional votes cast and counted by county; reasons why provisional ballots were not counted, measures of variance among jurisdictions, and time required to evaluate ballots by jurisdiction

#### Emphasize the importance of clarity

Above all else, the EAC should emphasize the importance of clarity in the rules by which each state governs provisional voting. As state legislators and election officials prepare for the 2006 election, answers to the questions listed in the recommendation section of this report could be helpful. Among those questions are:

- Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate?
- Do the procedural requirements of the system permit cost-efficient operation?
- How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

#### Court decisions suggest areas for action

The court decisions following the 2004 election also suggest procedures for states to incorporate into their procedures for provisional voting. EAC should recommend to the states that they:

- Promulgate clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.
- Provide effective materials to be used by local jurisdictions in training poll workers on such procedures as how to locate polling places for potential voters who show up at the wrong place.
- Make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.

#### Assess each stage of the provisional voting process

030011

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Beyond the procedures suggested by court decisions, states should assess each stage of the provisional voting process. They can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process.

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot. Our recommendations for best practices to avoid error at the polling place include:

- The layout and staffing of the multi-precinct polling place is important. States should ensure that training materials distributed to every jurisdiction make poll workers familiar with the options available to voters.
- The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting and include take-away information for the voter on the steps in the ballot evaluation process.
- Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. Best practice would be for states should provide guidelines (as do Connecticut and Delaware) to estimate the supply of provisional ballots needed at each polling place.

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted.

- State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Kansas allows voters to proffer their ID by electronic means or by mail, as well as in person.
- More provisional voters have their ballots counted in those states that count ballots cast outside the correct precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence.
- If a state does require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location. While the best practice might be for poll workers to direct the voter to correct precinct poll workers' advice is not always correct, and the voter should be protect against ministerial error.
- Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.

In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. Our research did not identify an optimum division of the five weeks available.

030012

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

- The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

After the election, timely information to voters about the disposition of their provisional ballot can enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

- Best practice for the states is to establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### Final observation

The detailed examination of each stage in the provisional voting process can lay the foundation each state needs to improve its system. Efforts to improve provisional voting may be most effective as part of a broader effort by state and local election officials to strengthen their systems. Collecting and analyzing data about those systems will enable states to identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as ways to reduce the need for voters to cast their ballots provisionally.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### Provisional Voting in 2004

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.

These totals obscure the wide variation in provisional voting among the states.<sup>9</sup> Six states accounted for two-thirds of all the provisional ballots cast.<sup>10</sup> State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted provisional ballots at more than twice that rate, 44%.

An important source of variation was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>11</sup>

- The percentage of the total vote cast as provisional ballots averaged more than 2% in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.<sup>12</sup>
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Those voting with provisional ballots in experienced states had their ballots counted more frequently than those in the new states. This experience effect is evidence that there is room for improvement in provisional balloting procedures, especially in those states new to the process.<sup>13</sup> That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

<sup>9</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

<sup>10</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>11</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

<sup>12</sup> To compensate for the wide differences in vote turnout among the 50 states the average figures here are calculated as the mean of the percent cast or counted rather than from the raw numbers of ballots cast or counted.

<sup>13</sup> Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit's "6-day time limit to process provisional ballots was very challenging and unrealistic. To overcome this challenge, *the entire department's employees were mobilized to process provisional ballots.*" (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.

030014

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Be prepared to direct voters to their correct precincts with maps;
- Regard provisional voting as easy to implement;
- Report that provisional voting sped up and improved polling place operations
- Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from "new" states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC can facilitate the exchange of experience among the states and can offer all states information on more effective administration of provisional voting.

Concluding optimistically that experience will make all the difference, however, may be unwarranted. Only if the performance of the "new" states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Our current understanding of how provisional voting worked in 2004 is not sufficient to determine unambiguously which view is correct.

1. "New" states may have a political culture different from "old" states. That is, underlying features of the "new" states political system may be the reason they had not adopted some form of provisional voting before HAVA. The "new" states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. The training they offer poll workers about provisional ballots may not be as frequent or effective as in other states. If the inconsistent performance in the "new" states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots -- as measured by intrastate consistency in administration--- will be harder and take longer to achieve.<sup>14</sup>
2. "Old" states may devote fewer resources to updating their registration files or databases because they consider provisional ballots as a reasonable fail safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

---

<sup>14</sup> Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, "no state gave the voter the right to find out the status of their ballot after the election." Now all offer that opportunity. See Bali and Silver, "The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000," manuscript, Department of Political Science, Michigan State University. Resisting HAVA's mandates through foot-dragging lacks any legitimate foundation in law or policy.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- The more rigorous the verification requirements, the smaller the percentage of provisional ballots that were counted. Some states verified provisional ballots by comparing the voter's signature to a sample, some matched such identifying data as address, birth date, or social security number, others required voters who lacked ID at the polling place to return later with the ID to evaluate the provisional ballot, and some required provisional voters to execute an affidavit.<sup>15</sup>
  - In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
  - In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
  - In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
  - In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office
- Voter registration databases provided information that reduced the number of provisional ballots counted.<sup>16</sup> In states using provisional voting for the first time, states with registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.
- States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted ballots cast only in the proper precinct counted an average of 42% of provisional ballots.<sup>17</sup>

<sup>15</sup> See Table 2 in Appendix 2 for information on the verification method used in each state.

<sup>16</sup> The Election Day Survey found that states using statewide voter registration databases reported a lower incidence of casting provisional ballots than states without voter registration databases, suggesting that better administration of voter registration rolls might be associated with fewer instances where voters would be required to cast a provisional ballot due to a problem with their voter registration.

<sup>17</sup> The Election Day Survey concluded that : "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In experienced states, the disparity was even more pronounced: 52% of provisional ballots cast were counted in states requiring in-district ballots, while 70% were counted in those allowing out-of-precinct ballots.
- If all states had counted out-of-precinct ballots, perhaps 290,000 more provisional ballots would have been counted across the country.<sup>18</sup>
- States that provide a longer the time to evaluate provisional ballots counted a higher proportion of those ballots.<sup>19</sup>
  - Fourteen states permitted less than one week to evaluate provisional ballots, 15 states permitted between one and two weeks, and 14 states permitted greater than two weeks<sup>20</sup>.
  - Those states that permitted less than one week counted an average of 35.4% of their ballots.
  - States that permitted between one and two weeks counted 47.1%.
  - States that permitted more than 2 weeks, counted 60.8% of the provisional ballots cast<sup>21</sup>.
  - The effect of allowing more time for evaluation is felt most strongly in states where more than 1% of the overall turnout was of provisional ballots. In states where provisional ballots were used most heavily, those that permitted less than one week to evaluate ballots counted 58.6% while those that permitted one to two weeks counted 65.0% of ballots, and those states that permitted greater than three weeks verified the highest proportion of provisional ballots, at 73.8%.

### Variation Within States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors beyond statewide factors, such as verification requirements or the time provided for ballot evaluation, also influence the provisional voting process. Reacting to the lack of consistency within states, the Carter-Baker Commission recommended that "states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state."<sup>22</sup>

Election Line reported that:

<sup>18</sup> This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

<sup>19</sup> See Appendix \_\_, Relationship Between Time Allotted to Verify Provisional Ballots and the Level of Ballots that are Verified, David Andersen, The Eagleton Institute of Politics

<sup>20</sup> Many thanks to Ben Shepler, of the Moritz College of Law, for assembling complete data on the time requirements states permitted for the counting of provisional ballots.

<sup>21</sup> 43 states are included in this analysis, including Washington D.C. The 7 election-day registration states are omitted, as is Mississippi, which never provided data on provisional ballots. North Carolina is also omitted from the regressions, as it does not have a statewide policy on how it verifies provisional ballots.

<sup>22</sup> Recommendation 2.3.2 of the Report of the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p.16. The report also observed that, "...different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated."

030017

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, and inadequately staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important in such districts. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

### **Effectiveness of Provisional Voting**

The certainty of our conclusions about the effectiveness of provisional voting is limited because of the complexity of the problem and a lack of important information. An ideal assessment of how well provisional ballots worked in 2004 would require knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting; their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. Information needed about the eligibility or registration status of provisional voters is also not available.

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were not

030018

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know that in 2004 provisional ballots allowed 1.2 million citizens to vote, citizens who would otherwise have been turned away from the polls.

Since we do not know the total number of registered voters who might have voted but could not makes a precise, quantitative estimate of the effectiveness of provisional voting impossible. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the 2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

<b>Votes Lost (Millions)</b>	<b>Cause</b>
1.5 – 2	Faulty equipment and confusing ballots
1.5 – 3	Registration mix-ups
<1	Polling place operations
?	Absentee ballot administration

**Table 1 Cal Tech – MIT Voting Technology Project Estimates**

4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. In 2004, about 1.2 million provisional voters were counted. A rough estimate, then, of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)<sup>23</sup>. Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

### Legislative Response

Indeed, several states<sup>24</sup> came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

<sup>23</sup> Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems. After each election the CPS asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or they were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

<sup>24</sup> Twelve states made statutory or regulatory changes: Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Louisiana, Montana, New Mexico, North Carolina, Virginia and Wyoming. See Table 4 in Appendix 2.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Not enough time to examine and count the provisional ballots. Florida, Indiana, Virginia, and Washington all have clarified or extended the timeline to evaluate the ballots. But taking more time can prove a problem, particularly in presidential elections with the looming deadline to certify the vote for the Electoral College.<sup>25</sup>

Lack of uniform rules for counting ballots and effective training of the election officials in interpreting and applying those rules to determine the validity of ballots. Colorado, New Mexico, North Carolina, and Washington have all passed legislation focused on improving the efficacy and consistency of the voting and counting process.

### Litigation

Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called "wrong precinct issue" – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right --the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to

<sup>25</sup> The resources available to evaluate and count provisional ballots within a tight schedule may not be easily available. The General Accounting Office reports that Detroit, where 1,350 provisional ballots were cast and 123 counted, found the 6-day time frame for processing provisional ballots "very challenging and unrealistic. To overcome this challenge, the *entire department's employees were mobilized to process provisional ballots.*" The report also found that in Los Angeles County, "staff had to prepare duplicate ballots to remove ineligible or invalid contests when voters cast their ballots at the wrong precinct. To overcome this challenge, staffing was increased to prepare the duplicate ballots." In a close, contested election, "duplicate" ballots would doubtless receive long and careful scrutiny." See Appendix 7, GAO, "Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," September 2005. (GAO Report-05-997)

050020

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted an absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

### **RECOMMENDATIONS**

Because every provisional ballot counted represents a voter who, if the system had worked perfectly, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use of provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. The statewide voter registration database will facilitate verifying that ballot, but the voter will still have voted provisionally. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

The wide variation in the implementation of provisional voting among and particularly within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting.

#### **Recommendations for Best Practices**

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

#### **Self-evaluation of Provisional Voting –4 Key Questions**

The first need to achieve greater consistency within each state is to think about provisional voting systematically. As legislators, election officials, and citizens in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?
2. Is the provisional voting system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and litigation looms?
3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?

030021

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

If the answers to these questions leave room for doubt about the effectiveness of the system or some of its parts, the EAC's recommendation of best practices should provide the starting point for a state's effort to improve its provisional voting system.

### Best Practices For Each Step In The Process

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention to reduce the inconsistencies noted in our analysis. We offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

#### The Importance of Clarity

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots. . . To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result-- well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."<sup>26</sup>

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

- Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards. For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant recanvassing.<sup>27</sup> Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.
- States should provide poll workers standard information resources for the training of poll workers by local jurisdictions. Training materials might include, for example, maps or databases with instruction on how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.<sup>28</sup>

<sup>26</sup> The Century Foundation, *Balancing Access and Integrity, Report of the Working Group on State Implementation of Election Reforms*, July 2005.

<sup>27</sup> See *Washington State Republican Party v. King County Division of Records*, 103 P3d 725, 727-728 (Wash. 2004)

<sup>28</sup> See *Panio v. Sunderland* 824 N.E.2d 488, 490 (NY, 2005) See also Order, *Hawkins v. Blunt*, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even

030023  
20

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- State training materials provided to local jurisdictions should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.<sup>29</sup> Recent legislation in Arizona indicates that recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll workers may need appropriate training to understand their duty to give such voters a provisional ballot.<sup>30</sup>

### A. Registration and Pre-Election Information for Voters

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, "You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency."<sup>31</sup>
2. The process to re-enfranchise felons should be clear and straightforward. To avoid litigation over the registration status of felons, best practice should be defined as making re-enfranchisement automatic, or no more burdensome than the process required for any new registrant.<sup>32</sup>
3. State or county websites for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

### B. At the Polling Place

---

wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

<sup>29</sup> *Sandusky County Democratic Party v. Blackwell*, 387 F.3d 565, 774 (6<sup>th</sup> Cir. 2004)

<sup>30</sup> *The Florida Democratic Party v. Hood*, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

<sup>31</sup> Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina) they can verify their registration on the website.

<sup>32</sup> The Century Foundation, *op. cit.*

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display.<sup>33</sup> Many states require training of poll workers. In some states that requirement is recent: after the 2004 election, New Mexico adopted a requirement for poll workers to attend an "election school."<sup>34</sup> A state statutory requirement for training could facilitate uniform instruction of poll workers in those states that do not already provide it.
2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: "Reasons Why Your Provisional Ballot Might Not Be Counted" on one side and "What to Do if My Provisional Ballot Is Not Counted" on the other.
3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk "in the event additional provisional ballots are required . . . to photocopy official provisional ballots."<sup>35</sup> At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%.<sup>36</sup> States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the number of provisional ballots actually cast in recent elections.
4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. All states should examine their chain-of-custody requirements for clarity. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.

<sup>33</sup> 8 Colo. Code Regs. § 1505-1, Rule 7.1.

<sup>34</sup> 2005 N.M. Laws 270 page no. 4-5.

### C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. Public recognition of the validity of those criteria is important to establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underlines the importance of clear criteria. As the Century Foundation report put it, "Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation."<sup>37</sup> Nonetheless, the *Panio v. Sutherland*<sup>38</sup> decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is "clerical error" judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted and the individual returning later with identification is, in fact, the same person. Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.<sup>39</sup>
2. More provisional ballots are counted in those states that verify ballots cast outside the correct precinct.<sup>40</sup> While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the

<sup>37</sup> The Century Foundation, *op. cit.*

<sup>38</sup> 4 N.Y.3d 123, 824 N.E.2d 488 (N.Y. 2005) and Memorandum (LaPlante—Foley) Provisional Ballot Cases by State, July 19, 2005.

<sup>39</sup> In Kansas, the voter can provide ID to a County Election Officer any time before the County Board of Canvassers meets to count provisional ballots. KS. ST. 25-1122(d). ID can be presented in person, OR via mail or electronic means. *Id.* The Board must meet either on the Friday or Monday following a Tuesday election. *Id.* at 25-3104. Deadlines in other states are: Alabama -- 5:00 P.M. on the Monday following the election AL ST § 17-10A-2(c)(1) Florida: until 5:00 P.M. on the third day following the election. Fla. Stat. Ann. § 101.048 (adopted after the 2004 election); Georgia—no later than 2 days after the election. GA ST § 21-2-417; 419. Illinois- 2 days to submit additional information 10 Ill. Comp. Stat. Ann. 5/18A-15(d); Indiana— in 2004 the deadline was the close of the polls IN. ST. §. 3-11.7-5-2(a). The time period was extended to 13 days by the adoption of Indiana Code 3-11-8, Section 25, Subsection (l); Maryland—until the meeting of the Election Board; MD ELEC LAW § 11-303. New Jersey— until the close of business on the second day after the election 19:53C-3(i). Nevada— until 5:00 P.M. on the Friday following the election NV ST 293.3085; New Mexico—until 7:00 P.M. on Election Day NM ADC 1.10.22 (8) (H).

<sup>40</sup> See Andersen, *op. cit.*, pgs. 23 – 24 for an analysis of the significant effect of counting out-of-precinct ballots. The Election Day Survey found that, "Most notably, jurisdictions that permitted jurisdiction-wide acceptance of provisional ballots reported higher rates of provisional ballots being cast, but also reported a much higher incidence of provisional ballots being counted, than other jurisdictions."

030025

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence. One option for states is to involve the voters in the decision by pointing out that voters who cast their provisional ballots in the wrong precinct may not be able to participate in the local election. The voter could then decide to go to the correct precinct or vote provisionally for the higher offices at the top of the ticket only.

3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location.<sup>41</sup> Ideally the voter could be directed to the correct machine, but poll worker advice will not always be correct. One way to assess the balance of issues here is to consider that, if a voter in a multi-precinct polling place is sent to the wrong machine, the error is probably the poll worker's, and the voter should not be penalized.
4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box "unregistered voter"; "lack of signature match" "wrong precinct," etc.) Those forms should be disclosed publicly when completed. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.<sup>42</sup>

### Colorado Rejection Codes (Any ballot given a rejection code shall not be counted):

RFS	(Rejection federal or state) No federal or state candidates or issues to duplicate.
RNS	(Rejection not signed) Provisional Ballot Affidavit not signed.
RIN	(Rejection incomplete information provided) Required information is incomplete and the designated election official is unable to confirm voter's eligibility.
RNR	(Rejection not registered) Voter did not register by the voter registration deadline or by emergency registration, Colorado voter registration record was not found, or voter was previously cancelled and has not been reinstated pursuant to 1-2-605(10). C.R.S.
REE	(Rejection envelope empty) Provisional ballot envelope is empty.
RAB	(Rejection voter voted absentee) Designated election official has confirmed that voter voted an absentee ballot.
REV	(Rejection based on ballot cast in early voting) Voter voted early.
RIP	(Rejection based on incorrect party) Incorrect Party in Primary Election.
RFE	(Rejection felon not eligible to vote) Individual was convicted of a felony and is either serving a sentence of confinement or detention or is on parole.
RWC	(Rejection elector not registered in county or State of Colorado) Non-county or non-state resident; therefore voter not eligible to vote in the county where the provisional ballot was voted.
RID	(Rejection first time voter has not supplied identification upon registration or thereafter prior to and during time voter voted) First Time Voter who

<sup>41</sup> Chances are administrative error accounts for the voter being directed to the wrong precinct under these circumstances.

<sup>42</sup> 8 CCR 1505-1, at 26.5.4, adopted august 4, 2005. See also 1-2-509(3) C.R.S.

030026

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

registered by mail or through a voter registration drive, is tagged as id deficient, and did not provide id at the time of voting.

RRD (Rejection registration deficient) Voter had deficient or incomplete registration and required information was not provided prior to or at the time of filling in the provisional ballot envelope. Voter's eligibility cannot be established.

### D. Verification of Provisional Ballots

1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections
2. In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. States should consider in particular how to divide the time allowed them by the safe-harbor provisions that apply in presidential elections to the certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The prudent course here would be to encourage states to consider the issue and then make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

### E. Post-election Information for Voters

Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### F. State Laws Governing Litigation over Provisional Voting

1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot

### Broader Considerations

#### G. Integrity and the Appearance of Integrity

1. State laws or regulations providing for non-partisan or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.

030027

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.
3. State laws or regulation should require the evaluation process for provisional ballots to be public, while protecting the names of those who voted provisionally.

### H. Continuous Assessment of the Provisional Ballot -- Process and Performance

Defining what makes for a successful provisional voting system is difficult. The most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed.

Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations or processes, such as Six Sigma<sup>43</sup> or the Baldrige Quality process<sup>44</sup> to evaluate the provisional ballot process. Pending such a review, the EAC can recommend that states take the following actions.

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.
2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:
  - Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (lack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.
  - Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.
  - Measures of variance among jurisdictions.
  - Number of poll workers trained in administration of provisional voting by polling place
  - Number of jurisdictions posting information on provisional voting in the polling place
  - Time required to evaluate ballots by jurisdiction

---

<sup>43</sup> Six Sigma is a measure of quality that strives for near perfection. Six Sigma is a disciplined, data-driven approach and methodology for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process -- from manufacturing to transactional and from product to service.

<sup>44</sup> The Baldrige Criteria for Performance Excellence provide a systems perspective for understanding performance management. They reflect validated, leading-edge management practices against which an organization can measure itself. With their acceptance nationally and internationally as the model for performance excellence, the Criteria represent a common language for communication among organizations for sharing best practices. The Criteria are also the basis for the Malcolm Baldrige National Quality Award process.

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.

030028

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### ATTACHMENT 1 – Data Sources for Classification of the States

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The variables used to analyze a state's use of provisional ballots:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and included it in our analysis.

#### New vs. Old States

We classified states as "new" or "old" based on the 2001 Electionline study of provisional voting,<sup>45</sup> but condensed its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We included in the list of "Old States" all states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots. States in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as "new" states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they

<sup>45</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Provisional%20Voting.pdf>.

were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline's map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct's list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter's name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island's first use of provisional voting was in 2004 and, therefore, classified the state as "new" to the system of provisional balloting.

<b>Old States</b>	<b>New States</b>	<b>HAVA Exempt or NA</b>
Alaska	Connecticut	Idaho
Alabama	Delaware	Maine
Arkansas	Georgia	Minnesota
California	Hawaii	New Hampshire
Colorado	Illinois	North Dakota
DC	Indiana	Wisconsin
Florida	Louisiana	Wyoming
Iowa	Massachusetts	
Kansas	Missouri	
Kentucky	Montana	
Maryland	Nevada	
Michigan	Oklahoma	
Mississippi	Pennsylvania

### Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>46</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found it had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

### Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as "out-of-precinct." States that invalidated such ballots were categorized as "In-precinct only."

<b>Out-of-Precinct</b>	<b>In-Precinct Only</b>	<b>HAVA EXEMPT OR NA</b>
Alaska	Alabama	Idaho
Arkansas	Arizona	Maine
California	Colorado	Mississippi
Delaware	Connecticut	New Hampshire
Georgia	District of Columbia	North Dakota
Illinois <sup>47</sup>	Florida	Wisconsin
Kansas	Hawaii	Wyoming
Louisiana	Indiana	
Maryland	Iowa	
New Mexico	Kentucky	
North Carolina	Massachusetts	
Oregon	Michigan	
Pennsylvania	Missouri	
Rhode Island	Montana	
Utah	Nebraska	
Vermont	Nevada	
Washington	New Jersey	
	New York	
	Ohio	
	Oklahoma	
	South Carolina	
	South Dakota	
	Tennessee	
	Texas	
	Virginia	
	West Virginia

## Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

<b>Signature Match</b>	<b>Data Match</b>	<b>Affidavit</b>	<b>Return with ID</b>	<b>NA</b>
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire
	Louisiana	Kentucky	Montana	N. Carolina*
	Missouri	Massachusetts	New Jersey	N. Dakota
	Ohio	Nebraska	New Mexico	Wisconsin
	Oklahoma	Nevada	Texas	Wyoming
	Pennsylvania	New York	Utah	
	Rhode Island	South Dakota		
	S. Carolina	Tennessee		
	Washington	Vermont		
	West Virginia	Virginia		
4	14	14	10	9

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

## Data Collection

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

<b>Received Updated Data</b>	<b>Did Not Receive Updated Data</b>
California	Alabama
District of Columbia	Alaska <sup>48</sup>
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland <sup>49</sup>	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska <sup>50</sup>	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
<b>26 States</b>	<b>25 States</b>

<sup>48</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>49</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>50</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### Data Differences

The data used in this study differ from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

State	EDS Numbers Cast/Counted	Our Numbers Cast/Counted	Differences	Updated Info from State? <sup>51</sup>
Alabama	6,478/1,865	6560/1836	82/29	No
Alaska	23,285/22,498	23,275/22,498	10/0	No
Colorado	51,529/39,086	51,477/39,163	52/77	No
Georgia	12,893/4,489	12,893/3,839	0/650	No
Hawaii	346/25	348/25	2/0	Yes
Iowa	15,406/8,038	15,454/8,048	48/10	Yes
Kansas	45,535/32,079	45,563/31,805	28/274	Yes
Montana	688/378	653/357	35/21	Yes
Nebraska	17,421/13,788	17,003/13,298	418/490	Yes
Nevada	6,153/2,446	6,154/2,447	1/1	Yes
New Mexico	6,410/2,914	15,360/8,767	8,950/5,853	Yes
N. Carolina	77,469/50,370	77,469/42,348	0/8,022	No
Ohio	157,714/123,902	158,642/123,548	928/354	Yes
Pennsylvania	No data	53,698/26,092	53,698/26,092	Yes
Texas	35,282/7,156	36,193/7,770	911/614	Yes
Vermont	121/30	101/37	20/7	No
Virginia	4,608/728	4,609/728	1/0	Yes
Washington	92,402/73,806	86,239/69,273	6,163/4,533	Yes
Wisconsin	374/119	373/120	1/1	No

<sup>51</sup> Data not provided by the state itself is taken from Electionline figures.

cc Jeannie Layson/EAC/GOV@EAC  
Subject Media request - USA Today

All

Richard Wolf of USA Today called and asked for the following. Jeannie and I ask that you consider this carefully and let us know ASAP what to provide .

(1) The status report on voter fraud and consultant update that was presented to the advisory boards in May, 2006.

(2) The status of the required guidance document on provisional voting and voter ID that is referenced in the following passage in today's Electionline Weekly by Doug Chapin.

In addition to the EAC's considerable election management responsibilities (especially in the area of voting equipment certification and testing), the agency has key policy issues to resolve in the immediate to near-term future, including a required guidance document on provisional voting and voter ID (now nearly two years overdue) and continued regulatory oversight over state implementation of "motor voter". This latter issue will almost certainly involve questions about the intersection of state and federal laws on voter registration - questions which divided the Commission when applied to Arizona, and could divide it again as Republicans and Democrats continue their traditional struggle to balance access to the franchise with concerns about the potential for fraud at the polls.

Thanks,  
Bryan

030038

**Interview with Craig Donsanto, Director, Elections Crimes Branch, Public Integrity Section, U.S. Department of Justice**  
January 13, 2006

The Department of Justice's (DOJ) Election Crimes Branch is responsible for supervising federal criminal investigations and prosecutions of election crimes.

Questions

*How are Prosecution Decisions Made?*

Craig Donsanto must approve all investigations that go beyond a preliminary stage, all charges, search warrant applications and subpoenas and all prosecutions. The decision to investigate is very sensitive because of the public officials involved. If a charge seems political, Donsanto will reject it. Donsanto gives possible theories for investigation. Donsanto and Noel Hillman will decide whether to farm out the case to an Assistant U.S. Attorney (AUSA). Donsanto uses a concept called predication. In-other-words, there must be enough evidence to suggest a crime has been committed. The method of evaluation of this evidence depends on the type of evidence and its source. There are two types of evidence---factual (antisocial behavior) and legal (antisocial behavior leading to statutory violations). Whether an indictment will be brought depends on the likelihood of success before a jury. Much depends on the type of evidence and the source. Donsanto said he "knows it when he sees it." Donsanto will only indict if he is confident of a conviction assuming the worst case scenario – a jury trial.

A person under investigation will first receive a target letter. Often, a defendant who gets a target letter will ask for a departmental hearing. The defendant's case will be heard by Donsanto and Hillman. On occasion, the assistant attorney general will review the case. The department grants such hearings because such defendants are likely to provide information about others involved.

Deleted:  
Deleted:  
Deleted:  
Deleted: easily

The Civil Rights Division, Voting Rights Section makes its own decisions on prosecution. The head of that division is John Tanner. There is a lot of cooperation between the Voting Section and the Election Crimes Branch.

*Does the Decision to Prosecute Incorporate Particular Political Considerations within a State Such as a One Party System or a System in which the Party in Power Controls the Means of Prosecution and Suppresses Opposition Complaints?*

Yes. Before, the department would leave it to the states. Now, if there is racial animus involved in the case, there is political bias involved, or the prosecutor is not impartial, the department will take it over.

Deleted: ¶

*Does it Matter if the Complaint Comes from a Member of a Racial Minority?*

No. But if the question involves racial animus, that has also always been an aggravating

factor, making it more likely the department will take it over

Deleted: D

### *What Kinds of Complaints Would Routinely Override Principles of Federalism?*

Federalism is no longer big issue. DOJ is permitted to prosecute whenever there is a candidate for federal office on the ballot.

### *Are There Too Few Prosecutions?*

DOJ can't prosecute everything.

### *What Should Be Done to Improve the System?*

The problem is asserting federal jurisdiction in non-federal elections. It is preferable for the federal government to pursue these cases for the following reasons: federal districts draw from a bigger and more diverse jury pool; the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected; DOJ has more resources – local prosecutors need to focus on personal and property crimes---fraud cases are too big and too complex for them; DOJ can use the grand jury process as a discovery technique and to test the strength of the case.

In *U.S. v. McNally*, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to “fix” *McNally*, did not include voter fraud.

As a result, the department needs a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce. The department has drafted such legislation, which was introduced but not passed in the early 1990s. A federal law is needed that permits prosecution in any election where any federal instrumentality is used.

### *Other Information*

The Department has held four symposia for District Election Officers (DEOs) and FBI agents since the initiation of the Ballot Access and Voting Integrity Initiative. In 2003, civil rights leaders were invited to make speeches, but were not permitted to take part in the rest of the symposium. All other symposia have been closed to the public.

Deleted: (Peg will be sending us the complete training materials used at those sessions. These are confidential and are the subject of FOIA litigation).

There are two types of attorneys in the division: prosecutors, who take on cases when the jurisdiction of the section requires it; the US Attorney has recused him or herself; or when the US Attorney is unable to handle the case (most frequent reason) and braintrust attorneys who analyze the facts, formulate theories, and draft legal documents.

### Cases

Deleted: :

Formatted: Underline

030040

Donsanto provided us with three case lists: cases still being investigated as of January 13, 2006 – confidential; election fraud prosecutions and convictions as a result of the Ballot Access and Voting Integrity Initiative October 2002-January 13, 2006; and cases closed for lack of evidence as of January 13, 2006.

Deleted: Open  
Deleted: (  
Deleted: )

If we want more documents related to any case, we must get those documents from the states. The department will not release them to us.

Although the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate complaints of fraud, *the number of cases that the department is investigating and the number of indictments the department is pursuing are both up dramatically.*

Since 2002, the department has brought more cases against alien voters, felon voters, and double voters than ever before. Previously, cases were only brought against conspracies to corrupt the process rather than individual offenders acting alone. For deterrence purposes, the Attorney General decided to add the pursuit of individuals who vote when not eligible to vote (noncitizens, felons) or who vote more than once. The department is currently undertaking three pilot projects to determine what works in developing the cases and obtaining convictions and what works with juries in such matters to gain convictions:

Deleted: when there was a pattern or scheme  
Deleted: .  
Deleted: Charges were not brought against individuals – those cases went un-prosecuted. This change in direction, focus, and level of aggression was by the decision of the Attorney General. The reason for the change was for deterrence purposes.  
Deleted: ¶  
Formatted: Bullets and Numbering  
Formatted: Bullets and Numbering

1. Felon voters in Milwaukee.

2. Alien voters in the Southern District of Florida. FYI – under 18 USC 611, to prosecute for “alien voting” there is no intent requirement. Conviction can lead to deportation. Nonetheless, the department feels compelled to look at mitigating factors such as was the alien told it was OK to vote, does the alien have a spouse that is a citizen.

3. Double voters in a variety of jurisdictions.

Formatted: Bullets and Numbering

The department does not maintain records of the complaints that come in from DEOs, U.S attorneys and others during the election that are not pursued by the department. Donsanto asserted that U.S. attorneys never initiate frivolous investigations.

*According to the new handbook, the department can take on a case whenever there is a federal candidate on the ballot*

Interview with John Tanner, Chief, Voting Section, Civil Rights Division, U.S. Department of Justice

Deleted: Director

February 24, 2006

The Department of Justice's (DOJ) Voting Section is charged with the civil enforcement of the Voting Rights Act, the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), the National Voter Registration Act (NVRA), and Title III of the Help America Vote Act (HAVA).

Authority and Process

The Voting Section, in contrast to the Public Integrity Section as Craig Donsanto described it, typically focuses only on systemic problems resulting from government action or inaction, not problems caused by individuals. Indeed, the section never goes after individuals because it does not have the statutory authority to do so. In situations in which individuals are causing problems at the polls and interfering with voting rights, the section calls the local election officials to resolve it.

Deleted: Note: Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. Mr. Tanner would not give us any information about or data from the section's election complaint in-take phone logs; data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws; and would give us only a selected few samples of attorney-observer reports, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. He would not discuss in any manner any current investigations or cases the section is involved in. He also did not believe it was his position to offer us recommendations as to how his office, elections, or the voting process might be improved.¶

Federal voting laws enforced by the section only apply to state action, so the section only sues state and local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. Doing it this way has been most effective – for example, while the section used to have the most observers in the South, with systematic changes forced upon those jurisdictions, the section now does not get complaints from the South.

The section can get involved even where there is no federal candidate on the ballot if there is a racial issue under the 14<sup>th</sup> and 15<sup>th</sup> Amendments.

When the section receives a complaint, attorneys first determine whether it is a matter that involves individual offenders or a systemic problem. When deciding what to do with the complaint, the section errs on the side of referring it criminally to avoid having any civil litigation complicate a possible criminal case.

- Deleted: s
- Deleted: looks
- Deleted: at
- Deleted: have made it so now
- Deleted: of
- Deleted: because they do not want
- Deleted: to

When a complaint comes in, the attorneys ask questions to see if there are even problems there that the complainant is not aware are violations of the law. For example, in the Boston case, the attorney did not just look at Spanish language cases under section 203, but also brought a Section 2 case for violations regarding Chinese and Vietnamese voters. When looking into a case, the attorneys look for specificity, witnesses and supporting evidence.

Often, lawsuits bring voluntary compliance.

Voter Intimidation

Many instances of what some people refer to as voter intimidation are more unclear now. For example, photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera. It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation.

The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.

The inappropriate use of challengers on the basis of race would be a violation of the law. Mr. Tanner was unaware that such allegations were made in Ohio in 2004. He said there had never been a formal investigation into the abusive use of challengers.

Deleted: n

Mr. Tanner said a lot of the challenges are legitimate because you have a lot of voter registration fraud as a result of groups paying people to register voters by the form. They turn in bogus registration forms. Then the parties examine the registration forms and challenge them because 200 of them, for example, have addresses of a vacant lot.

However, Mr. Tanner said the department was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama, as was referenced in a February 23 Op-Ed in USA Today. Mr. Tanner reiterated the section takes racial targeting very seriously.

Deleted: D

Refusal to provide provisional ballots would be a violation of the law that the section would investigate.

Deceptive practices are committed by individuals and would be a matter for the Public Integrity Section. Local government would have to be involved for the Voting Section to become involved.

Deleted: voting

Deleted: s

Unequal implementation of ID rules, or asking minority voters only for ID would be something the section would go after. Mr. Tanner was unaware of allegations of this in 2004. He said this is usually a problem where you have language minorities and the poll workers cannot understand the voters when they say their names. The section has never formally investigated or solely focused a case based on abuse of ID provisions. However, implementation of ID rules was part of the Section 2 case in San Diego. Mr. Tanner reiterated that the section is doing more than ever before.

When asked about the section's references to incidents of vote fraud in the documents related to the new state photo identification requirements, Mr. Tanner said the section only looks at retrogression, not at the wisdom of what a legislature does. In Georgia, for example, everyone statistically has identification, and more blacks have ID than whites. With respect to the letter to Senator Kit Bond regarding voter ID, the section did refer to the perception of concern about dead voters because of reporting by the Atlanta Journal-Constitution. It is understandable that when you have thousands of bogus registrations that there would be concerns about polling place fraud. Very close elections make this even more of an understandable concern. Putting control of registration lists in the hands

of the states will be helpful because at this higher level of government you find a higher level of professionalism.

It is hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. However, the enforcement of federal law over the years has made an astounding difference so that the level of discrimination has plummeted. Registration of minorities has soared, as can be seen on the section's website. Mr. Tanner was unsure if the same was true with respect to turnout, but the gap is less. That information is not on the section's website.

The section is not filing as many Section 2 cases as compared to Section 203 cases because many of the jurisdictions sued under Section 2 in the past do not have issues anymore. Mr. Tanner said that race based problems are rare now.

NVRA has been effective in opening up the registration process. In terms of enforcement, Mr. Tanner said they do what they can when they have credible allegations. There is a big gap between complaints and what can be substantiated. Mr. Tanner stated that given the high quality of the attorneys now in the section, if they do not investigate it or bring action, that act complained of did not happen.

#### Recommendations

Mr. Tanner did not feel it was appropriate to make recommendations.

Note: We contend that Mr. Tanner's reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. We did not have access to any information about or data from the section's election complaint intake phone logs or data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws. Only a selected few samples of attorney-observer reports were provided, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. Mr. Tanner would not discuss any current investigations or cases the section is involved in.

John, Based on the 6 article Layson sent and the others that I distributed over the weekend, I conclude this: We lost the battle, but won the war.

I am concerned about the news that Rush Holt's election reform bill would make the EAC permanent. Perhaps we could arrange to talk to him during the 2 week House Easter break and make some suggestions about how the EAC should be restructured before it is made permanent. (Ray Martinez would, I believe, have much to contribute on that topic.)

## **EAC to Launch Comprehensive Study of Voter ID Laws**

For Immediate Release  
March 30, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report, which focused on only one election cycle, was not sufficient to draw any conclusions. The Commission declined to adopt the report, but is releasing all of the data to the public.

The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov). The Commission's statement regarding its decision is attached.

“After careful consideration of the initial research, the Commission decided this important issue deserves a more in-depth research approach, and that it should be examined beyond only one election cycle,” said EAC Chair Donetta Davidson. “The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers.”

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting, including the agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

EAC's future research on this topic will be expanded to include more than one federal election, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC's comprehensive research approach will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation. EAC will use some of the information collected by the contractor as well as additional data from the states to develop this baseline.

030050

- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification.
- Study how voter identification provisions that have been in place for two or more federal elections have impacted voter turnout, voter registration figures, and fraud.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###

030051

# **EAC Statement on Study of Voter Identification Requirements**

## **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, [www.eac.gov](http://www.eac.gov).

## **EAC Declines to Adopt Draft Report**

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.

---

<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

---

<sup>4</sup> See Transcript of EAC Public Meeting, February 8, 2007, page 109.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

## The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

### **Peer Review Group**

A draft of this report and the statistical analysis in its appendix were critiqued by a Peer Review Group. The comments of its members improved the quality of our work. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in our recommendations.

# **REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES**

---

## **Report Background**

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

## **EXECUTIVE SUMMARY AND RECOMMENDATIONS**

### Background and Methods

This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.

- Opponents seek to forestall more stringent identification requirements, such as government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters –such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.
- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate. It inquires whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout. That analysis would constitute an important first step in assessing tradeoffs between ballot security and ballot access. The aim of this research is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis examined the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information (such as the specific reasons some potential voters are not allowed to cast a regular ballot) that that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on

030060

turnout and on vote fraud is to collect more information on both topics systematically and regularly.

Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:<sup>1</sup> the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.<sup>2</sup> Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, the different statistical methods and two different sets of data on turnout in 2004 election used in the study point to the same general finding. Stricter voter identification requirements (for example, requiring voters to present non-photo ID compared to simply stating their names) were correlated with reduced turnout in the models employed, as described in detail in Appendix C.<sup>3</sup> As explained below, these models find that a statistically

---

<sup>1</sup> See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

<sup>2</sup> The EAC has contracted with other researchers to study vote fraud issues.

<sup>3</sup> Appendix C: Tim Vercellotti, Eagleton Institute of Politics, *Analysis of Effects of Voter Identification Requirements on Turnout*. Using the aggregate data, photo ID did not have a significant effect on turnout, possibly because in the

significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. (But note that in the model using the aggregate data, photo ID did not have a significant effect on turnout. The reason may have been that in this election, each state with a photo ID requirement provided an alternate way for those without a photo ID to cast a regular ballot.) Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible voters, however, the tradeoffs between ballot security and ballot access cannot be assessed.

### Methodology

The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.<sup>4</sup> The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be *asked* to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be *required* to do or show, in order to cast regular ballot (again leaving aside a state

---

2004 election every state requiring photo ID provided an alternative way to cast a regular ballot for those voters who lacked photo identification. The individual data from the Current Population Survey did show a significant effect, but only for the overall sample and for white voters, which may be an artifact of the large sample size.

<sup>4</sup> Even the most relaxed provisions for identification at the polls –anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146

challenge process). We have included “maximum” requirements in our analysis, and not simply “minimum” requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the “maximum” of being asked to show photo ID may deter some voters even though the “minimum” would allow them to vote without photo ID.

It is worth emphasizing that, at the time of the 2004 election, there was *no* state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

### Summary of Findings

As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis’s aggregate data and the individual-level data, although not always

for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, for the maximum ID requirements, the match-signature requirement and the provide-a- non-photo-ID requirement, but not the photo ID requirement, were all correlated with lower turnout compared to requiring that voters state their names. When the registration closing deadline was added as an independent variable in the aggregate analysis, signature match and non-photo id remained significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a “maximum” requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a “minimum” requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such

030064

knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>5</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

#### Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls-- are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

---

<sup>5</sup> Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.
2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. A "Voter Impact Statement" would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.
3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC might also use the information reported by the states to encourage further assessment by the states of the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
  - I. Useful information could be supplied by state-sponsored surveys of voters conducted by local election officials. Such surveys would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
  - II. Surveys to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
  - III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks

statutory or regulatory requirements. Such reports should be available to the public.

4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots<sup>6</sup>, and the safe harbor provision in presidential elections.
5. Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is less certain.

## **SUMMARY OF RESEARCH**

### **Background and Approach of the Study**

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether to vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

---

<sup>6</sup> Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". *The Journal of Politics*, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." *American Political Science Review*. 61:2 (June 1967) found that local variations in the rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.
- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly*. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics*. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.
- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior*. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review*. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review*. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review*. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior*. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.
- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics*., 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

#### Voter ID requirements on Election Day

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>7</sup> The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

---

<sup>7</sup> As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.<sup>8</sup>

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.<sup>9</sup> Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that

---

<sup>8</sup> Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

<sup>9</sup> "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.<sup>10</sup> Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.<sup>11</sup> And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

---

<sup>10</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>11</sup> The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest seven questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?<sup>12</sup>
2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>13</sup>
3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>14</sup>
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.<sup>15</sup> A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

---

<sup>12</sup> "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)

<sup>13</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

<sup>14</sup> In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>15</sup> "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>16</sup>
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it, intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

### **Voter ID and Turnout**

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>17</sup> Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.<sup>18</sup>

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the

---

<sup>16</sup> For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).

<sup>17</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

<sup>18</sup> As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.

minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, *no* state had a "minimum" requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice.<sup>19</sup> Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

---

<sup>19</sup> One state election official told us that, "We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is."

\* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

<sup>1</sup> Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

<sup>2</sup> Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

<sup>3</sup> Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

<sup>4</sup> Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

<sup>5</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>6</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>7</sup> Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

<sup>8</sup> Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

### Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

030076

Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ( $r = -.30, p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20, p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	64.2 %	State Name	63.0 %
Sign Name	61.1 %	Sign Name	60.4 %
Match Signature	60.9 %	Match Signature	61.7 %
Provide Non-Photo ID	59.3 %	Provide Non-Photo ID	59.0 %
Provide Photo ID	58.1 %	Swear Affidavit	60.1 %
<i>Average Turnout (All States)</i>	<b>60.9 %</b>		

This table displays the mean turnout using the aggregate county level data for each state in 2004.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend

emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables.<sup>21</sup> (Dichotomous variables reflect either the presence or absence of a characteristic. In the dummy variable for non-photo ID, a state would be coded as 1 if it required non-photo ID, and 0 otherwise.)

Voter identification requirements are just one factor that might affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American<sup>22</sup>
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering

---

<sup>21</sup> The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

<sup>22</sup> The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.

to register to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

The dependent variable in each model using the aggregate data was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that the stricter voter identification requirements of matching one's signature to a signature on file with election authorities or presenting a non-photo ID are associated with lower turnout compared to turnout in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. (A "dummy variable" represents a particular attribute and has the value zero or one for each observation, e.g. 1 for male and 0 for female.) Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.<sup>23</sup>

---

<sup>23</sup> This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum requirements, a signature match and non-photo identification –but not photo identification– were correlated at a significant level with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote.<sup>24</sup> Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

#### Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>25</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from *self-described* registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens, who in this survey were not asked the voter registration and turnout questions. In

---

<sup>24</sup> For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>24</sup> Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

<sup>25</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have influenced turnout in 2004.<sup>26</sup> The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>27</sup>

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation.<sup>28</sup> Table 3 below shows predicted probabilities (calculated from the probit

---

<sup>26</sup> The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

<sup>27</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>28</sup> A probit model is a popular specification of a generalized linear regression model, using the probit link function.

coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>29</sup>

<b>Table 3. Predicted probability of voter turnout – all voters</b>		
	<b>Maximum requirement</b>	<b>Minimum requirement</b>
<b>State name</b>	91.7%	91.5%
<b>Sign name</b>	89.9%	90.2%
<b>Match signature</b>	Not significant	Not significant
<b>Non-photo ID</b>	89.0%	89.0%
<b>Photo ID</b>	88.8%	---
<b>Affidavit</b>	---	87.5%
<b>Total difference from “state name” to “photo ID” or “affidavit”</b>	<b>2.9%</b>	<b>4.0%</b>
<b>N</b>	54,973	
Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies from stating one’s name to providing photo identification or an affidavit, with all other variables held constant.		
Data source: U.S. Census Bureau, Current Population Survey, Voting and Registration Supplement, November 2004.		

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one’s name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>30</sup> In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those with fewer years of education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum

<sup>29</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

<sup>30</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter ID requirements.<sup>31</sup> The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

More rigorous voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

#### Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data,

---

<sup>31</sup> Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.

although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

In the aggregate data, the match-signature requirement and the provide-a-non-photo ID requirement were correlated with lower turnout compared to requiring that voters state their names. But the photo-ID requirement did not have an effect that was statistically significant, possibly because in 2004 each state requiring a photo-ID provided an alternative way to cast a regular ballot for voters who lacked that document.

In the model using the individual-level data the signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names (in the entire sample and for white voters, but the statistical significance may be an artifact of the very large sample size). That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

030084

## Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (*Common Cause v. Billups* and *Indiana Democratic Party v. Rokita*). Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.<sup>32</sup> Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a

---

<sup>32</sup> Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.

substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a

balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

#### **Developments since 2004**

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgement in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### **State Voter Databases and Voter ID**

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the

Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### **Conclusions**

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.<sup>33</sup>

---

<sup>33</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents with them to the polls, while assuring that each voter who casts a ballot is eligible and votes only once.

B. If a statewide voter registration database is not yet operational, for any person who has registered to vote by mail for the first time in this state after January 1, 2003 or who is reregistering by mail after January 1, 2003 after moving from one county to another county in this state, the person shall comply with the following in order to be issued a ballot:

Ariz. Rev. Stat. Ann. § 16-579

1. The person shall present either one of the following:

(a) A current form of identification that bears a photograph of the person and the name of the person.

(b) A current utility bill, bank statement, paycheck, government issued check or other government document that shows the name and registration address of the person.

2. If the person does not present a document that complies with paragraph 1, the person is only eligible to vote a provisional ballot as prescribed by § 16-584.

Arkansas Provide ID

Effective Dec. 1, 2003  
7-5-305. Requirements.

Arkansas Code Annotated § 7-5-305

(a) Before a person is permitted to vote, the election official shall:

(1) Request the voter to identify himself in order to verify the existence of his name on the precinct voter registration list;

(2) Request the voter, in the presence of the election official, to state his address and state or confirm his date of birth;

(3) Determine that the voter's date of birth and address are the same as those on the precinct voter registration list;

(4) If the date of birth given by the voter is not the same as that on the precinct voter registration list, request the voter to provide identification as the election official deems appropriate;

(5)(A) If the voter's address is not the same as that on the precinct voter registration list, verify with the county clerk that the address is within the precinct.

(B) If the address is within the precinct, request the voter to complete a voter registration application form for the purpose of updating county voter registration record files.

(C) If the address is not within the precinct, instruct the voter to contact the county clerk's office to determine the proper precinct;

(6) If the voter's name is not the same as that on the precinct voter registration list, request the voter to complete a voter registration application form for purposes of updating county voter registration record files;

(7) Request the voter, in the presence of the election official, to sign his name, including his given name, his middle name or initial, if any, and his last name in the space provided on the precinct voter registration list. If a person is unable to sign his signature or make his mark or cross, the election official shall enter his initials and the voter's date of birth in the space for the person's signature on the precinct voter registration list; and

(8)(A) Request the voter for purposes of identification to provide a valid driver's license, photo identification card issued by a governmental agency, voter card, social security card, birth certificate, United States passport, employee identification card issued by a governmental agency containing a photograph, employee identification card issued in the normal course of business of the employer, student identification card, Arkansas hunting license, or United States military identification card.

030092<sup>3</sup>

(B)(i) If a voter is unable to provide this identification, the election official shall indicate on the precinct voter registration list that the voter did not provide identification.

(ii) Following each election, the county board of election commissioners may review the precinct voter registration lists and may provide the information of the voters not providing identification at the polls to the prosecuting attorney.

(iii) The prosecuting attorney may investigate possible voter fraud; and

(9) Follow the procedures under §§ 7-5-310, 7-5-311, and 7-5-523, if the person is a disabled voter and presents himself or herself to vote.

California

Sign Name

Effective: July 16, 2003

Any person desiring to vote shall announce his or her name and address in an audible tone of voice, and when one of the precinct officers finds the name in the index, the officer shall in a like manner repeat the name and address. The voter shall then write his or her name and residence address or, if the voter is unable to write, shall have the name and residence address written by another person on a roster of voters provided for that purpose, whereupon a challenge may be interposed as provided in this article.

(Enacted in 1994, no amendments since)

Colorado

Provide ID

(1) Except as provided in subsection (4) of this section, any eligible elector desiring to vote shall show his or her identification as defined in section 1-1-104(19.5), write his or her name and address on the signature card, and give the signature card to one of the election judges,  
\* \* \*

Colo. Rev. Stat.  
Ann. § 1-7-110;  
Colo. Rev. Stat.  
Ann. § 1-1-104

(4) An eligible elector who is unable to produce identification may cast a provisional ballot in accordance with article 8.5 of this title.

(19.5)(a) "Identification" means:

(I) A valid Colorado driver's license;

(II) A valid identification card issued by the department of revenue in accordance with the requirements of part 3 of article 2 of title 42, C.R.S.;

(III) A valid United States passport;

(IV) A valid employee identification card with a photograph of the eligible elector issued by any branch, department, agency, or entity of the United States government or of this state, or by any county, municipality, board, authority, or other political subdivision of this state;

(V) A valid pilot's license issued by the federal aviation administration or other authorized agency of the United States;

(VI) A valid United States military identification card with a photograph of the eligible elector;

(VII) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the elector;

(VIII) A valid medicare or medicaid card issued by the United States health care financing administration;

(IX) A certified copy of a birth certificate for the elector issued in the United States; or

(X) Certified documentation of naturalization.

(b) Any form of identification indicated in paragraph (a) of this subsection (19.5) that shows the address of the eligible elector shall be considered identification only if the address is in the state of Colorado.

Connecticut	Provide ID	Effective 5/28/2004 (a) In each primary, election or referendum, when an elector has entered the polling place, the elector shall announce the elector's street address, if any, and the elector's name to the checkers in a tone sufficiently loud and clear as to enable all the election officials present to hear the same. Each elector who registered to vote by mail for the first time on or after January 1, 2003, and has a "mark" next to the elector's name on the official registry list, as required by <u>section 9-23r</u> , shall present to the checkers, before the elector votes, either a current and valid photo identification that shows the elector's name and address or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the elector. Each other elector shall (1) present to the checkers the elector's Social Security card or any other preprinted form of identification which shows the elector's name and either the elector's address, signature or photograph, or (2) on a form prescribed by the Secretary of the State, write the elector's residential address and date of birth, print the elector's name and sign a statement under penalty of false statement that the elector is the elector whose name appears on the official checklist. Such form shall clearly state the penalty of false statement. A separate such form shall be used for each elector. If the elector presents a preprinted form of identification under subdivision (1) of this subsection, the checkers shall check the name of such elector on the official checklist. If the elector completes the form under subdivision (2) of this subsection, the assistant registrar of voters shall examine the information on such form and either instruct the checkers to check the name of such elector on the official checklist or notify the elector that the form is incomplete or inaccurate.	Conn. Gen. Stat. Ann. § 9-261
Delaware	Provide ID	Effective May 10., 2004 (a) A voter, upon entering the room where an election is being held, shall announce his or her name and address and provide proof of identity, whereupon the clerks shall place a mark or make a notation of his or her name upon the election district record. In the event the voter does not have proof of identity with them, he or she shall sign an affidavit of affirmation that he or she is the person listed on the election district record.	15 Del. Code § 4937
D.C.	Sign Name	Effective: July 9, 2002 (i)(1) A person shall be entitled to vote in an election in the District of Columbia if he or she is a duly registered voter. A qualified elector shall be considered duly registered in the District if he or she has met the requirements for voter registration and, on the day of the election, either resides at the address listed on the Board's records or files an election day change of address pursuant to this subsection.  (2) Each registered voter who changes his or her place of residence from that listed on the Board's records shall notify the Board, in writing, of the new residence address. A change of address shall be effective on the date the notification was mailed as shown by the United States Postal Service postmark. If not postmarked, the notification shall be effective on the date of receipt by the Board. Change of address notifications from registrants shall be accepted pursuant to subsection (g) of this section, except that any registrant who has not notified the Board of his or her current residence address by the deadline established by subsection (g) of this section may be permitted to vote at the polling place that serves the current residence address by filing an election day change of address notice pursuant to paragraph (4) of this subsection.  (3) Each registered voter who votes at a polling place on election day shall affirm his or her residence address as it appears on the official registration roll for the precinct. The act of signing a copy of the official registration roll for the precinct shall be deemed affirmation of the voter's address as it appears on the Board's registration records.	D.C. Code § 1-1001.07

101.043 (1) The precinct register, as prescribed in s. 98.461, shall be used at the polls in lieu of the registration books for the purpose of identifying the elector at the polls prior to allowing him or her to vote. The clerk or inspector shall require each elector, upon entering the polling place, to present a current and valid picture identification as provided in s. 97.0535(3)(a). If the picture identification does not contain the signature of the voter, an additional identification that provides the voter's signature shall be required. The elector shall sign his or her name in the space provided, and the clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.

West's Fla.  
Stat. Ann. §  
101.043  
& West's Fla.  
Stat. Ann. §  
97.0535

(2) Except as provided in subsection (3), if the elector fails to furnish the required identification, or if the clerk or inspector is in doubt as to the identity of the elector, such clerk or inspector shall follow the procedure prescribed in s. 101.49.

**97.0535** (3)(a) The following forms of identification shall be considered current and valid if they contain the name and photograph of the applicant and have not expired:

1. Florida driver's license.
2. Florida identification card issued by the Department of Highway Safety and Motor Vehicles.
3. United States passport.
4. Employee badge or identification.
5. Buyer's club identification.
6. Debit or credit card.
7. Military identification.
8. Student identification.
9. Retirement center identification.
10. Neighborhood association identification.
11. Entertainment identification.
12. Public assistance identification.

(b) The following forms of identification shall be considered current and valid if they contain the name and current residence address of the applicant:

1. Utility bill.
2. Bank statement.
3. Government check.
4. Paycheck.
5. Other government document (excluding voter identification card).

Georgia

Provide ID

Version effective 1/1/2005-12/31/2005

(a) Each elector shall present proper identification to a poll worker at or prior to completion of a voter's certificate at any polling place and prior to such person's admission to the enclosed space at such polling place. Proper identification shall consist of any one of the following:

- (1) A valid Georgia driver's license;
- (2) A valid identification card issued by a branch, department, agency, or entity of the State of Georgia, any other state, or the United States authorized by law to issue personal identification;
- (3) A valid United States passport;
- (4) A valid employee identification card containing a photograph of the elector and issued by any branch, department, agency, or entity of the United States government, this state, or any county, municipality, board, authority, or other entity of this state;
- (5) A valid employee identification card containing a photograph of the elector and issued by any employer of the elector in the ordinary course of such employer's business;
- (6) A valid student identification card containing a photograph of the elector from any public or private college, university, or postgraduate technical or professional school located within the State of Georgia;
- (7) A valid Georgia license to carry a pistol or revolver;
- (8) A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States;
- (9) A valid United States military identification card;
- (10) A certified copy of the elector's birth certificate;
- (11) A valid social security card;
- (12) Certified naturalization documentation;
- (13) A certified copy of court records showing adoption, name, or sex change;
- (14) A current utility bill, or a legible copy thereof, showing the name and address of the elector;
- (15) A bank statement, or a legible copy thereof, showing the name and address of the elector;
- (16) A government check or paycheck, or a legible copy thereof, showing the name and address of the elector; or
- (17) A government document, or a legible copy thereof, showing the name and address of the elector.

(b) If an elector is unable to produce any of the items of identification listed in subsection (a) of this Code section, he or she shall sign a statement under oath in a form approved by the Secretary of State, separate and distinct from the elector's voter certificate, swearing or affirming that he or she is the person identified on the elector's voter certificate. Such person shall be allowed to vote without undue delay; provided, however, that an elector who registered for the first time in this state by mail and did not provide one of the forms of identification set forth in subsection (a) of this Code section at the time of registration and who is voting for the first time may vote a provisional ballot pursuant to Code Section 21-2-418 upon swearing or affirming that the elector is the person identified in the elector's voter certificate. Such provisional ballot shall only be counted if the registrars are able to verify current and valid identification of the elector as provided in this Code section within the time period for verifying provisional ballots pursuant to Code Section 21-2-419. Falsely swearing or affirming such statement under oath shall be punishable as a felony, and the penalty shall be distinctly set forth on the face of the statement."

voting  
procedure at the  
polls), § 2-51-  
83 (Punchcard

ballots; voting procedure at polls), 2-51-85.1 (Marksense ballots; voting procedure at the polls.) – All have same subsection (b)  
  
Haw. Code. R. T. 2, SUBT. 4, CH. 51, Appendix

***Do I Need an I.D. to Vote on Election Day?***

Yes. Be sure to have an I.D. with a picture and signature (such as a Hawaii driver's license or state I.D. card) when you go to vote. The NVRAC card is not an acceptable form of identification.

From the 2004 version of the administrative code.

**§ 11-136 Poll book, identification, voting.**

Every person upon applying to vote shall sign the person's name in the poll book prepared for that purpose. This requirement may be waived by the chairperson of the precinct officials if for reasons of illiteracy or blindness or other physical disability the voter is unable to write. Every person shall provide identification if so requested by a precinct official. A poll book shall not contain the social security number of any person.

HRS 11-136

After signing the poll book and receiving the voter's ballot, the voter shall proceed to the voting booth to vote according to the voting system in use in the voter's precinct. The precinct official may, and upon request shall, explain to the voter the mode of voting.

Last amended 2003.

(1) An elector desiring to vote shall state his name and address to the judge or clerk in charge of the combination election record and poll book.

Id. St. §34-1106

(2) Before receiving his ballot, each elector shall sign his name in the combination election record and poll book following his name therein.

(5) The elector shall then be given the appropriate ballots which have been stamped with the official election stamp and shall be given folding instructions for such ballots.

Illinois

Give Name

(Last amended in 1972)

Any person desiring to vote shall give his name and, if required to do so, his residence to the judges of election, one of whom shall thereupon announce the same in a loud and distinct tone of voice, clear, and audible; the judges of elections shall check each application for ballot against the list of voters registered in that precinct to whom absentee or early ballots have been issued for that election, which shall be provided by the election authority and which list shall be available for inspection by pollwatchers. A voter applying to vote in the precinct on election day whose name appears on the list as having been issued an absentee or early ballot shall not be permitted to vote in the precinct. All applicable provisions of Articles 4, 5 or 6 shall be complied with and if such name is found on the register of voters by the officer having charge thereof, he shall likewise repeat said name, and the voter shall be allowed to enter within the proximity of the voting booths, as above provided. One of the judges shall give the voter one, and only one of each ballot to be voted at the election, on the back of which ballots such judge shall indorse his initials in such manner that they may be seen when each such ballot is properly folded, and the voter's name shall be immediately checked on the register list. In those election jurisdictions where perforated ballot cards are utilized of the type on which write-in votes can be

10 Ill. Comp. Stat. 5/17-9

cast above the perforation, the election authority shall provide a space both above and below the perforation for the judge's initials, and the judge shall endorse his or her initials in both spaces. Whenever a proposal for a constitutional amendment or for the calling of a constitutional convention is to be voted upon at the election, the separate blue ballot or ballots pertaining thereto shall, when being handed to the voter, be placed on top of the other ballots to be voted at the election in such manner that the legend appearing on the back thereof, as prescribed in Section 16-6 of this Act, shall be plainly visible to the voter. At all elections, when a registry may be required, if the name of any person so desiring to vote at such election is not found on the register of voters, he or she shall not receive a ballot until he or she shall have complied with the law prescribing the manner and conditions of voting by unregistered voters. If any person desiring to vote at any election shall be challenged, he or she shall not receive a ballot until he or she shall have established his right to vote in the manner provided hereinafter; and if he or she shall be challenged after he has received his ballot, he shall not be permitted to vote until he or she has fully complied with such requirements of the law upon being challenged. Besides the election officer, not more than 2 voters in excess of the whole number of voting booths provided shall be allowed within the proximity of the voting booths at one time. The provisions of this Act, so far as they require the registration of voters as a condition to their being allowed to vote shall not apply to persons otherwise entitled to vote, who are, at the time of the election, or at any time within 60 days prior to such election have been engaged in the military or naval service of the United States, and who appear personally at the polling place on election day and produce to the judges of election satisfactory evidence thereof, but such persons, if otherwise qualified to vote, shall be permitted to vote at such election without previous registration.

If the voter registration cards are used in the precinct, the election official in charge of the precinct registration file shall compare the signature upon the application with the signature upon the registration card. If voter registration lists are used in the precinct, the election inspector shall determine if the name on the application to vote appears on the voter registration list. If the name appears on the voter

registration list, the elector shall provide further identification by giving his or her date of birth or other information stated upon the voter registration list. In precincts using voter registration lists, the date of birth may be required to be placed on the application to vote. If the signature or an item of information does not correspond, the vote of the person shall be challenged, and the same procedure shall be followed as provided in this act for the challenging of an elector. If the person offering to vote has signed the registration card or application by making a mark, the person shall identify himself or herself by giving his or her date of birth, which shall be compared with the date of birth stated upon the registration card or voter registration list, or shall give other identification as may be referred to upon the registration card or voter registration list. If the elector does not have an official state identification card, operator's or chauffeur's license as required in this subsection, or other generally recognized picture identification card, the individual shall sign an affidavit to that effect before an election inspector and be allowed to vote as otherwise provided in this act. However, an elector being allowed to vote without the identification required under this subsection is subject to challenge as provided in section 727.

(2) If, upon a comparison of the signature or other identification, it is found that the applicant is entitled to vote, the election officer having charge of the registration list shall approve the application and write his or her initials on the application, after which the number on the ballot issued shall be noted on the application. The application shall serve as 1 of the 2 poll lists required to be kept as a record of a person who has voted. The application shall be filed with the township, city, or village clerk. If voter registration cards are used in the precinct, the date of the election shall be noted by 1 of the election officials upon the precinct registration card of each elector voting at an election. If voter registration lists are used in the precinct, the election official shall clearly indicate upon the list each elector voting at that election. The clerk of a city, village, or township shall maintain a record of voting participation for each registered elector.

The Attorney General declared that this statute violated the Equal Protection Clause of the Fourteenth Amendment. Op. Atty. Gen. 1997, No. 6930. That decision is binding on all state agencies.

(Effective March 31, 1997)

Minnesota

Sign Name

(a) An individual seeking to vote shall sign a polling place roster which states that the individual is at least 18 years of age, a citizen of the United States, has resided in Minnesota for 20 days immediately preceding the election, maintains residence at the address shown, is not under a guardianship in which the court order revokes the individual's right to vote, has not been found by a court of law to be legally incompetent to vote or convicted of a felony without having civil rights restored, is registered and has not already voted in the election. The roster must also state: "I understand that deliberately providing false information is a felony punishable by not more than five years imprisonment and a fine of not more than \$10,000, or both."

Minn. Stat. §  
204C.10

(b) A judge may, before the applicant signs the roster, confirm the applicant's name, address, and date of birth.

(c) After the applicant signs the roster, the judge shall give the applicant a voter's receipt. The voter shall deliver the voter's receipt to the judge in charge of ballots

Nebraska Sign Name (1) The clerks of election shall have a list of registered voters of the precinct and a sign-in register at the polling place on election day. The list of registered voters shall be used for guidance on election day and may be in the form of a computerized, typed, or handwritten list or precinct registration cards. Registered voters of the precinct shall place and record their signature in the sign-in register before receiving any ballot. The list of registered voters and the sign-in register may be combined into one document. Neb. Rev. Stat. § 32-913

(Last amended in 2003) Neb. Rev. Stat. § 32-914

Official ballots shall be used at all elections. No person shall receive a ballot or be entitled to vote unless and until he or she is registered as a voter except as provided in section 32-914.01, 32-914.02, 32-915, 32-915.01, or 32-936. Except as otherwise specifically provided, no ballot shall be handed to any registered voter at any election until (1) he or she announces his or her name and address to the clerk of election, (2) the clerk has found that he or she is a registered voter at the address as shown by the precinct list of registered voters unless otherwise entitled to vote in the precinct under section 32-328, 32-914.01, 32-914.02, 32-915, or 32-915.01, (3) if the voter registered by mail after January 1, 2003, and has not previously voted in an election for a federal office within the county, the clerk shall ask the registered voter to present a photographic identification which is current and valid or a copy of a utility bill, bank statement, government check, paycheck, or other government document that is current and that shows the name and address of the voter, (4) the clerk has instructed the registered voter to personally write his or her name in the precinct sign-in register on the appropriate line which follows the last signature of any previous voter, and (5) the clerk has listed on the precinct list of registered voters the corresponding line number and name of the registered voter.

Nevada Match Sig. (Last updated in 2003) 1. Except as otherwise provided in NRS 293.541, if a person's name appears in the election board register or if he provides an affirmation pursuant to NRS 293.525, he is entitled to vote and must sign his name in the election board register when he applies to vote. His signature must be compared by an election board officer with the signature or a facsimile thereof on his original application to register to vote or one of the forms of identification listed in subsection 2. Nev. Rev. Stat. § 293.277

2. Except as otherwise provided in NRS 293.2725, the forms of identification which may be used individually to identify a voter at the polling place are:

- (a) The card issued to the voter at the time he registered to vote;
- (b) A driver's license;
- (c) An identification card issued by the Department of Motor Vehicles;
- (d) A military identification card; or
- (e) Any other form of identification issued by a governmental agency which contains the voter's signature and physical description or picture.

NH Give Name Last Amendment Effective Jan. 1, 2004. A person desiring to vote shall, before being admitted to the enclosed space within the guardrail, announce his or her name to one of the ballot clerks who shall thereupon repeat the name; and, if the name is found on the checklist by the N.H. Rev. Stat. Ann. 659:13

030103  
14

ballot clerk, the ballot clerk shall put a checkmark beside it and again repeat the name. The ballot clerk shall state the address listed on the checklist for the voter, and ask if the address is correct; if the address on the checklist is not correct, the ballot clerk shall correct the address in red on the checklist. The voter, if still qualified to vote in the town or ward and unless challenged as provided for in RSA 659:27-33, shall then be allowed to enter the space enclosed by the guardrail. After the voter enters the enclosed space, the ballot clerk shall give the voter one of each ballot to be voted on in that election which shall be folded as it was upon receipt from the secretary of state.

Last Amendment Effective July 2, 2002.

19:15-17. Comparison of signatures or statements made openly; provisional ballots for newly registered voters without proper identification

N.J. Stat. Ann.  
19:15-17

a. The comparison of signatures of a voter made upon registration and upon election day, and if the voter alleges his inability to write, the comparison of the answers made by such voter upon registration and upon election day, shall be had in full view of the challengers.

b. If a voter has registered by mail after January 1, 2003 to vote for the first time in his or her current county of residence and did not provide personal identification when registering pursuant to section 16 of P.L.1974, c. 30 (C.19:31-6.4), the voter shall be permitted to vote starting at the first election held after January 1, 2004 at which candidates are seeking federal office after displaying one of the following items: (1) a current and valid photo identification card; (2) a current utility bill, bank statement, government check or pay check; (3) any other government document that shows the voter's name and current address; or (4) any other identifying document that the Attorney General has determined to be acceptable for this purpose. If the voter does not display one of these documents, the voter shall not be permitted to vote by machine but shall instead be provided with a provisional ballot, pursuant to the provisions of P.L.1999, c. 232 (C.19:53C-1 et seq.). This subsection shall not apply to any voter entitled to vote by absentee ballot under the "Uniformed and Overseas Citizens Absentee Voting Act" (42 U.S.C. 1973ff-1 et seq.) or to any voter who is provided the right to vote other than in person under section 3 of Pub.L.98-435, the "Voting Accessibility for the Elderly and Handicapped Act," or any other voter entitled to vote otherwise than in person under any other federal law. This subsection shall also not apply to any person who registers to vote by appearing in person at any voter registration agency or to any person whose voter registration form is delivered to the county commissioner of registration or to the Attorney General, as the case may be, through a third party by means other than by mail delivery.

c. Each county commissioner of registration shall collect and maintain, in the manner prescribed by the Attorney General, the information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31- 6.4). Access to the personal identification information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31- 6.4). shall be prohibited, in accordance with subsection a. of section 6 of P.L.2001, c. 404 (C.47:1A-5).

(Recompiled as  
§1-12 -7.1 by  
L. 2005, Ch.  
270, §63,  
effective July 1,  
2005)

030104  
15

E. The election clerk shall locate that list number and name on the signature roster and shall require the voter to sign his usual signature or, if unable to write, to make his mark opposite his printed name. If the voter makes his mark, it shall be witnessed by one of the judges of the precinct board. If the signature roster indicates that the voter is required to present a form of identification before voting, the election judge shall ask the voter for a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows and matches the name and address of the voter as indicated on the signature roster. If the voter does not provide the required identification, he shall be allowed to vote on a provisional paper ballot.

G. A voter shall not be permitted to vote until he has properly signed his usual signature or made his mark in the signature roster.

New York

Match Sig.

1. A person before being allowed to vote shall be required, except as provided in this chapter, to sign his name on the back of his registration poll record on the first line reserved for his signature at the time of election which is not filled with a previous signature, or on the line of the computer generated registration list reserved for his signature. The two inspectors in charge shall satisfy themselves by a comparison of this signature with his registration signature and by comparison of his appearance with the descriptive material on the face of the registration poll record that he is the person registered. If they are so satisfied they shall enter the other information required for the election on the same line with the voter's latest signature, shall sign their names or initials in the spaces provided therefor, and shall permit the applicant to vote. Any inspector or inspectors not satisfied shall challenge the applicant forthwith.

N.Y. Law § 8-304  
(McKinney)

2. If a person who alleges his inability to sign his name presents himself to vote, the board of inspectors shall permit him to vote, unless challenged on other grounds, provided he had been permitted to register without signing his name. The board shall enter the words "Unable to Sign" in the space on his registration poll record reserved for his signature or on the line of the computer generated registration list reserved for his signature at such election. If his signature appears upon his registration record or upon the computer generated registration list the board shall challenge him forthwith, except that if such a person claims that he is unable to sign his name by reason of a physical disability incurred since his registration, the board, if convinced of the existence of such disability, shall permit him to vote, shall enter the words "Unable to Sign" and a brief description of such disability in the space reserved for his signature at such election. At each subsequent election, if such disability still exists, he shall be entitled to vote without signing his name and the board of inspectors, without further notation, shall enter the words "Unable to Sign" in the space reserved for his signature at such election.

3. The voter's signature made by him upon registration and his signature made at subsequent elections shall be effectively concealed from the voter by a blotter or piece of opaque paper until after the voter shall have completed his signature.

4. In any case where a person who has heretofore voted has placed his voting signature on the back of his registration poll record on the first or any succeeding line or lines at the time or times of an election, instead of on the last line of the space thereon required to be reserved for such voting signatures and on any lines next running upward therefrom, the inspectors of election shall obliterate such misplaced signature or signatures, initial the obliteration and require such voter to sign his name again in the correct place on such registration poll record.

5. Any person who has heretofore registered and who at such time placed his or her registration signature on the back of the registration poll record otherwise

030105

than in the space required to be provided therefor at the bottom of such poll record, shall, before being permitted to vote at any election thereafter, subscribe a new registration signature for himself on the last line at the bottom of such poll record, and, at the same time, if the inspectors of election are satisfied that the signatures were made by the same person, obliterate his original registration signature placed elsewhere than on the bottom of such record. Such obliterations may be made by crossing out the signature so as to completely efface the same or by affixing thereover a piece of gummed tape of a size sufficient only to cover such signature and of a type adequate to fully conceal the same

(Residence Address)

Number Approved \_\_\_\_\_

(Supervisor of Election)

030108

(b) The voter shall sign the application in the presence and view of a bipartisan pair. They shall locate the voter's name on the certified voting list for the voting district. Upon finding the voter's name on the certified voting list for the district, they shall initial the ballot application in the place provided next to the word "Approved" and shall enter on the certified list of voters a proper notation that the applicant has voted in the election. They shall then return the ballot application to the voter who shall pass down the line and present it to the clerk. After the voter has handed the approved ballot application to the clerk, the clerk shall provide the voter with the appropriate computer ballot and security sleeve, the warden shall direct the voter to the voting booth which the voter shall use, and unless the voter needs instruction or assistance as provided in this chapter, the voter shall cast his or her vote, and if he or she desires place the voted computer ballot in a security sleeve, and shall proceed to the optical scan precinct count unit and shall personally place his or her voted ballot into the designated ballot slot on the unit, and after doing so, shall leave the enclosure at once. No voter shall remain within the voting booth longer than ten (10) minutes, and if the voter refuses to leave after the lapse of ten (10) minutes, the voter shall be removed from the voting booth by order of the warden. Except for the election officials and the election inspector, not more than two (2) voters in excess of the number of voting booths shall be permitted within the enclosed space at any time.

(Last amended 2004, Current through January 2005 Session)

South Carolina Photo ID

**§ 7-13-710. Proof of right to vote; signing poll list; comparison of signatures.**

S.C. Code Ann.  
§ 7-13-710

When any person presents himself to vote, he shall produce his valid South Carolina driver's license or other form of identification containing a photograph issued by the Department of Motor Vehicles, if he is not licensed to drive, or the written notification of registration provided for by §§ 7-5-125 and 7-5-180 if the notification has been signed by the elector. If the elector loses or defaces his registration notification, he may obtain a duplicate notification from his county board of registration upon request in person, or by telephone or mail. After presentation of the required identification, his name must be checked by one of the managers on the margin of the page opposite his name upon the registration books, or copy of the books, furnished by the board of registration. The managers shall keep a poll list which must contain one column headed "Names of Voters". Before any ballot is delivered to a voter, the voter shall sign his name on the poll list, which must be furnished to the appropriate election officials by the State Election Commission. At the top of each page the voter's oath appropriate to the election must be printed. The signing of the poll list or the marking of the poll list is considered to be an affirmation of the oath by the voter. One of the managers shall compare the signature on the poll list with the signature on the voter's driver's license, registration notification, or other identification and may require further identification of the voter and proof of his right to vote under this title as he considers necessary. If the voter is unable to write or if the voter is prevented from signing by physical handicap, he may sign his name to the poll list by mark with the assistance of one of the managers.

South Dakota Photo ID

Last amended: 1968

When a voter is requesting a ballot, the voter shall present a valid form of personal identification. The personal identification that may be presented shall be either:

S.D. Codified  
Laws § 12-18-  
6.1

- (1) A South Dakota driver's license or nondriver identification card;
- (2) A passport or an identification card, including a picture, issued by an agency of the United States government;
- (3) A tribal identification card, including a picture; or
- (4) An identification card, including a picture, issued by a high school or an accredited institution of higher education, including a university, college, or

technical school, located within the State of South Dakota.

Last amended March 2004

Tennessee	Provide ID	<p>Identification of eligible voters</p> <p>(a)(1) A voter shall sign an application for ballot, indicate the primary in which the voter desires to vote, if any, and present it to a registrar. The application for ballot shall include thereon a space for the address of the voter's current residence, and the voter shall write or print such address on the application when the voter signs it. The registrar shall compare the signature and information on the application with the signature and information on the duplicate permanent registration record. The registrar shall make a determination whether the voter's address is different from the address on the voter's permanent registration record or if the registration is in inactive status. If the voter has changed residence, or the voter's registration is inactive, the registrar shall follow the procedures for voting pursuant to § 2-7-140. If, upon comparison of the signature and other identification, it is found that the applicant is entitled to vote, the registrar shall initial the application and shall note on the reverse side of the voter's duplicate permanent registration record the date of the election, the number of the voter's ballot application, and the elections in which the voter votes. If the applicant's signature is illegible, the registrar shall print the name on the application. The registrar shall give the voter the ballot application which is the voter's identification for a paper ballot or ballots or for admission to a voting machine. The voter shall then sign the duplicate poll lists without leaving any lines blank on any poll list sheet.</p> <p>(2) In any computerized county, the county election commission shall have the option of using an application for a ballot as provided in this section, or using the computerized voter signature list. A computerized voter signature list shall include the voter's name, current address of residence, social security number or registration number, birth date and spaces for the voter's signature, elections voted, ballot number and precinct registrar's initials. The following procedures shall be followed in the case of computerized voter signature lists:</p> <p>(A) The voter shall sign the signature list and indicate the election or elections the voter desires to vote in and verify the voter's address in the presence of the precinct registrar;</p> <p>(B) The registrar shall compare the voter's signature and information on the signature list with other evidence of identification supplied by the voter. If, upon comparison of the signature and other evidence of identification, it is found that the applicant is entitled to vote, the registrar shall initial the signature list;</p> <p>(C) If the applicant's signature is illegible, the registrar shall print the name of the applicant on the voter list; and</p> <p>(D) If a voter is unable to present any evidence of identification specified in subsection (c), the voter shall be required to execute an affidavit of identity on a form provided by the county election commission.</p>	Tenn. Code Ann. § 2-7- 112
Texas	Provide ID	<p>Last amended 2003</p> <p>(b) On offering to vote, a voter must present the voter's voter registration certificate to an election officer at the polling place.</p>	Tex. Elec. Code Ann. § 63.001
Utah	Give Name	<p>(Last amended in 1997)</p> <p>(1)(a) Any registered voter desiring to vote shall give his name, and, if requested, his residence, to one of the election judges.</p> <p>(b) If an election judge does not know the person requesting a ballot and has reason to doubt that person's identity, the judge shall request identification or have the voter identified by a known registered voter of the district.</p> <p>(3) If the election judge determines that the voter is registered:</p> <p>(a) the election judge in charge of the official register shall:</p> <p>(i) write the ballot number opposite the name of the voter in the official register;</p> <p>and</p>	Utah Code Ann. § 20A-3- 104

- (ii) direct the voter to sign his name in the election column in the official register;
- (b) another judge shall list the ballot number and voter's name in the pollbook; and
- (c) the election judge having charge of the ballots shall:
  - (i) endorse his initials on the stub;
  - (ii) check the name of the voter on the pollbook list with the number of the stub;
  - (iii) hand the voter a ballot; and
  - (iv) allow the voter to enter the voting booth.

(In effect at time of last update prior to 2005: Laws 2003, c. 37, § 1, eff. May 5, 2003)

Vermont Give Name

Before a person may be admitted to vote, he or she shall announce his or her name and if requested, his or her place of residence in a clear and audible tone of voice, or present his or her name in writing, or otherwise identify himself or herself by appropriate documentation. The election officials attending the entrance of the polling place shall then verify that the person's name appears on the checklist for the polling place. If the name does appear, and if no one immediately challenges the person's right to vote on grounds of identity or having previously voted in the same election, the election officials shall repeat the name of the person and:

Vt. Stat. Ann. tit. 17, § 2563

(1) If the checklist indicates that the person is a first-time voter in the municipality who registered by mail and who has not provided required identification before the opening of the polls, require the person to present any one of the following: a valid photo identification; a copy of a current utility bill; a copy of a current bank statement; or a copy of a government check, paycheck, or any other government document that shows the current name and address of the voter. If the person is unable to produce the required information, the person shall be afforded the opportunity to cast a provisional ballot, as provided in subchapter 6A of this chapter. The elections official shall note upon the checklist a first-time voter in the municipality who has registered by mail and who produces the required information, and place a mark next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting.

(2) If the voter is not a first-time voter in the municipality, no identification shall be required, the clerk shall place a check next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting

Virginia Provide ID

(Last amended in 2003)

§ 24.2-643. Qualified voter permitted to vote; procedures at polling place; voter identification

Va. Code. Ann.

A. After the polls are open, each qualified voter at a precinct shall be permitted to vote. The officers of election shall ascertain that a person offering to vote is a qualified voter before admitting him to the voting booth and furnishing an official ballot to him.

B. An officer of election shall ask the voter for his full name and current residence address and repeat, in a voice audible to party and candidate representatives present, the full name and address stated by the voter. The officer shall ask the voter to present any one of the following forms of identification: his Commonwealth of Virginia voter registration card, his social security card, his valid Virginia driver's license, or any other identification card issued by a government agency of the Commonwealth, one of its political subdivisions, or the United States; or any valid employee identification card containing a photograph of the voter and issued by an employer of the voter in the ordinary course of the employer's business.

If the voter's name is found on the pollbook, if he presents one of the forms of

030111

identification listed above, if he is qualified to vote in the election, and if no objection is made, an officer shall enter, opposite the voter's name on the pollbook, the first or next consecutive number from the voter count form provided by the State Board, or shall enter that the voter has voted if the pollbook is in electronic form; an officer shall provide the voter with the official ballot; and another officer shall admit him to the voting booth.

Except as provided in subsection E of this section, if a voter is entitled to vote except that he is unable to present one of the forms of identification listed above, he shall be allowed to vote after signing a statement, subject to felony penalties for false statements pursuant to § 24.2-1016, that he is the named registered voter who he claims to be. A voter who requires assistance in voting by reason of physical disability or inability to read or write, and who requests assistance pursuant to § 24.2-649, may be assisted in preparation of this statement in accordance with that section. The provisions of § 24.2-649 regarding voters who are unable to sign shall be followed when assisting a voter in completing this statement.

Washington	Sign Name	(Version in effect as of 2004- effective 4/12/2004) 29A.44.201.  A voter desiring to vote shall give his or her name to the precinct election officer who has the precinct list of registered voters. This officer shall announce the name to the precinct election officer who has the copy of the inspector's poll book for that precinct. If the right of this voter to participate in the primary or election is not challenged, the voter must be issued a ballot or permitted to enter a voting booth or to operate a voting device. For a partisan primary in a jurisdiction using the physically separate ballot format, the voter must be issued a nonpartisan ballot and each party ballot. The number of the ballot or the voter must be recorded by the precinct election officers. If the right of the voter to participate is challenged, RCW 29A.08.810 and 29A.08.820 apply to that voter.  (In effect at time of last update prior to 2005: 2004 c 271 § 136, eff. June 10, 2004)  29A.44.210.  Any person desiring to vote at any primary or election is required to sign his or her name on the appropriate precinct list of registered voters. If the voter registered using a mark, or can no longer sign his or her name, the election officers shall require the voter to be identified by another registered voter.	Wash. Rev. Code § 29A.44.201 & 29A.44.210
------------	-----------	--	--

The precinct election officers shall then record the voter's name.

Effective date: July 1, 2004

West Virginia	Match Sig.	(a) Any person desiring to vote in an election shall, upon entering the election room, clearly state his or her name and residence to one of the poll clerks who shall thereupon announce the same in a clear and distinct tone of voice. If that person is found to be duly registered as a voter at that precinct, he or she shall be required to sign his or her name in the space marked "signature of voter" on the pollbook prescribed and provided for the precinct. If that person is physically or otherwise unable to sign his or her name, his or her mark shall be affixed by one of the poll clerks in the presence of the other and the name of the poll clerk affixing the voter's mark shall be indicated immediately under the affixation. No ballot may be given to the person until he or she so signs his or her name on the pollbook or his or her signature is so affixed thereon. * * *  (c) When the voter's signature is properly on the pollbook, the two poll clerks shall sign their names in the places indicated on the back of the official ballot and deliver the ballot to the voter to be voted by him or her without leaving the	W. Va. Code § 3-1-34 (a)
---------------	------------	--	-----------------------------

030112

election room. If he or she returns the ballot spoiled to the clerks, they shall immediately mark the ballot "spoiled" and it shall be preserved and placed in a spoiled ballot envelope together with other spoiled ballots to be delivered to the board of canvassers and deliver to the voter another official ballot, signed by the clerks on the reverse side required by this subsection. The voter shall thereupon retire alone to the booth or compartment prepared within the election room for voting purposes and there prepare his or her ballot using a ballpoint pen of not less than five inches in length or other indelible marking device of not less than five inches in length. In voting for candidates in general and special elections, the voter shall comply with the rules and procedures prescribed in section five, article six of this chapter.

Wisconsin	Give Name	(In effect at time of last update prior to 2005: Acts 2003, c. 100, eff. 90 days after March 7, 2003) 6.79(2)(a) Except as provided in sub. (6), where there is registration, each person, before receiving a voting number, shall state his or her full name and address. Upon the prepared registration list, after the name of each elector, the officials shall enter the serial number of the vote as it is polled, beginning with number one. Each elector shall receive a slip bearing the same serial number. A separate list shall be maintained for electors who are voting under s. 6.15, 6.29 or 6.55(2) or (3) and electors who are reassigned from another polling place under s. 5.25(5)(b). Each such elector shall have his or her full name, address and serial number likewise entered and shall be given a slip bearing such number.	Wis. Stat. § 6.79
-----------	-----------	---	-------------------

Wyoming	Give Name	(In effect at time of last update prior to 2005: 2003 Act 327, § 4, eff. June 12, 2004) (a) Unless a voter is challenged pursuant to W.S. 22-15-101 through 22- 15-109, no identification shall be required when:  (i) Voting in person or by mail after having registered in person; or  (ii) Voting in person or by mail after having registered by mail and having previously voted in a Wyoming federal election.	Wyo. Stat. Ann. § 22-3-118
---------	-----------	--	----------------------------

(In effect at time of last update prior to 2005: Effective dates. -- Laws 2004, ch. 94, § 5, makes the act effective immediately upon completion of all acts necessary for a bill to become law as provided by art. 4, § 8, Wyo. Const. Approved March 5, 2004.)

030113

**APPENDIX B: COURT DECISIONS AND LITERATURE ON VOTER  
IDENTIFICATION AND RELATED ISSUE COURT DECISIONS**

**June 28, 2006**

030114

## **Summary of Relevant Cases:**

### **Challenges Prevailed:**

#### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

#### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

### **Challenges Rejected:**

#### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

#### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination
    - Preventing voter fraud is a compelling interest since it is irreversible once vote is cast

030115

- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

*McKay v. Thompson*, 2000

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

*Kemp v. Tucker*, 1975

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

*Perez v. Rhiddlehoover*, 1966

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

**Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

***American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).**

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

030116

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

**Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that provisional ballots would not be counted if the voter applied for an

absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal

protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

**Current Litigation Concerning Voter ID Issues<sup>1</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

---

<sup>1</sup> As of January 2, 2006

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

**Georgia** (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>2</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>3</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

<sup>3</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

**Indiana** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>4</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>4</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

**APPENDIX C: ANALYSIS OF EFFECTS OF  
VOTER ID REQUIREMENTS ON TURNOUT**

**Tim Vercellotti  
Eagleton Institute of Politics  
Rutgers University  
June 28, 2006**

030122

## Introduction

A key area of disagreement in the policy debate over voter identification requirements concerns whether such requirements dampen turnout among those eligible to vote. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics of voter identification requirements contend that the effect is greater based on specific types of requirements. Critics argue that requiring voters to produce some form of government-issued photo identification on Election Day is more demanding than requiring, for example, that they state their names at the polling place because of the various steps needed to procure a photo identification card, such as a driver's license. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. This report draws from two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

### Types of voter identification requirements

Based on research by the Moritz College of Law, states had one of five types of requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (10 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>1</sup> It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification.

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum

---

<sup>1</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). For the purposes of this analysis I also tested the array of minimum identification requirements to assess whether they posed increasing levels of demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

### **Estimating turnout among citizens in the voting-age population**

This report examines turnout among U.S. citizens of voting age in both the aggregate- and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

In the aggregate data, determining the percentage of the voting-age population that has U.S. citizenship posed a methodological challenge. The Census Bureau gathers information on the citizenship status of adults ages 18 and older only during the decennial census. While the Census Bureau provides annual estimates of the population to account for changes between decennial censuses, the bureau does not offer estimates for the proportion of the adult population who are citizens as part of the annual estimates. To address this issue I estimated the 2004 citizen voting-age population for each county using a method reported in the analysis of the 2004 Election Day Survey conducted for the U.S. Election Assistance Commission (U.S. Election Assistance Commission, 2005). I calculated the percentage of the 2000 voting-age population who were citizens in 2000, and applied that percentage to the July 1, 2004 estimates for voting-age population in each county. In other words, I assumed that the percentage of the voting-age population that had U.S. citizenship in 2004 was similar to the percentage of the voting-age population who were citizens in 2000.<sup>2</sup>

### **Analysis of aggregate data**

If one treats maximum voter identification requirements as a continuous variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ( $r = -.30$ ,  $p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20$ ,  $p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

---

<sup>2</sup> McDonald and Popkin (2001) recommend an even more stringent approach to voter turnout calculations. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.2 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, I opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.<sup>3</sup>

Voter identification requirements alone do not determine voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county.

I coded the voter identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

To capture electoral context I included whether the county was in a presidential battleground state (any state in which the margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus I added a variable to reflect the number of days between each state's registration deadline and the election.<sup>4</sup>

Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the median household income for 2002 in each county.<sup>5</sup>

---

<sup>3</sup> Treating maximum voter identification requirements as a continuous variable yielded results in which voter identification requirements were negatively related to aggregate turnout. Those results can be found in Table A-1 in the Appendix to this report.

<sup>4</sup> For states that had Election Day registration or no registration requirement (North Dakota), I assigned a value of zero to this variable.

<sup>5</sup> To bring the income figures into a scale comparable to those of the other variables, I used the natural log of median household income.

I estimated a series of random effects models to account for the likelihood that data from counties were correlated within each state (for further explanation of random effects and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998).<sup>6</sup> I allowed the median income variable to have both fixed and random effects in each state to take into account variation in the cost of living in each state. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the estimated citizen voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, two of the four requirements had a small and negative effect on turnout in 2004: matching one's signature and providing a non-photo identification. Taking into account the reference variable of stating one's name, the results indicate that turnout was lower in states that required signature matches or a non-photo identification than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Two contextual factors -- whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate-- increased voter turnout. The time between the closing date for registration and the election had a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income had positive effects on turnout. The percentage of African-Americans in the county did not have a significant effect.

The effects of the minimum voter identification requirements were non-existent. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to have a negative effect on turnout, as did the number of days between the closing date for registration and the election.

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. A chi-square test of the difference in the deviance for each model (represented by -2 log likelihood in Table 2), showed no significant improvement by including the interactions ( $p > 0.05$ ). I report the coefficients for the models with the interactions in the Appendix in tables A-2 and A-3.

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the identification requirements for voting vary, so does turnout. Specifically, in terms of the maximum requirements, the results suggest that requiring a signature match or non-photo identification is negatively related to turnout compared to requiring that a voter state his or her name. But the analysis showed that adding interactions between identification

---

<sup>6</sup> The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the intercept as a predictor generated an intraclass correlation of .43, indicating considerable variation between the states.

requirements and the percentage of the county that was African-American or Hispanic did not improve the fit of the model to the data.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>7</sup> Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

### Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>8</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not registered to vote. I also excluded those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S. citizens because the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey.

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>9</sup> As in the analysis of aggregate data, I coded the voter identification requirements as a series of dummy variables, coding each variable as one if the

---

<sup>7</sup> A reviewer for an earlier version of this paper recommended adding an education variable to the aggregate model. One version of the aggregate model not reported here included the percentage of adults in the county who had at least a college degree. The measure was highly collinear with the percentage of residents living below the poverty line, necessitating removal of the college degree variable from the model.

<sup>8</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

<sup>9</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.<sup>10</sup>

In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate data analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less.<sup>11</sup> At the individual level, I controlled for gender, household income, and dummy variables for race/ethnicity, age and education. In terms of race and ethnicity, I created dummy variables to represent whether a voter was Black/non-Hispanic, Hispanic, or Asian (with white/non-Hispanic/other voters as the omitted category for reference purposes). I separated education into five dummy variables: less than high school, high school diploma, some college, college graduate, and graduate training. I omitted the "less than high school" variable from the model for reference purposes. Regarding age, I created four dummy variables to represent 18 to 24 years of age, 29 to 44, 45 to 64, and 65 years and older. I omitted the 18-to-24 category as the reference variable in the model.

Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

## Results

The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted. I estimated the models using robust standard errors to control for correlated error terms for observations from within the same state.

[Table 3 here]

---

<sup>10</sup> Earlier versions of this paper included an individual-level analysis that included the five maximum voter identification requirements combined into a continuous variable. The results of that analysis, which found that voter identification requirements had a negative relationship with turnout, can be found in table A-4 in the Appendix.

<sup>11</sup> Given that the individual-level analysis focused on registered voters (as opposed to the citizen voting-age population in the aggregate analysis), I did not include the closing date for registration as a predictor of turnout in the individual-level analysis.

The two models in Table 3 use either the maximum or minimum voter identification requirements in each state. The two models generate similar results. In each model, three of the voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. In other words, compared to states that require voters only to state their names, the requirements to sign one's name, provide a non-photo identification, photo identification in the maximum requirements or affidavit in the minimum requires exert a negative influence on turnout.

Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had finished high school. Respondents who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>12</sup> I calculated the probabilities taking into account both maximum and minimum requirements.

[Table 4 here]

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability appear to decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>13</sup> In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum

---

<sup>12</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

<sup>13</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter identification requirements. But incorporating dummy variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, I divided the sample into sub-samples and re-ran the probit models.

[Table 5 here]

The effects of voter identification requirements were similar for white voters compared to the entire sample, which was not surprising given that white voters comprised 81 percent of the sample. Voters in states where the maximum requirement involved signing one's name, providing a non-photo identification or photo identification were less likely to vote than those in a state that required voters to give their names. Taking into consideration the minimum requirements, this was true only for voters in states that require a non-photo identification or an affidavit. White voters in photo identification states were 3.7 percent less likely to vote than were white voters in states where respondents gave their names. The difference in probability was 4.4 percent for voters in states where an affidavit was the minimum requirement.

Voter identification requirements also influenced turnout among Black voters, but to a lesser extent relative to white voters.

[Table 6 here]

Of the maximum voter identification requirements, only the non-photo identification requirement reduced turnout compared to turnout in states that required voters to state their names. The predicted probability of voting was 5.7 percent lower for Black respondents in states that required non-photo identification. In terms of age, only African-Americans age 65 and older were more likely to vote than respondents in the 18 to 24 referent group. Respondents in all levels of education were more likely to vote than respondents without a high school diploma. Gender, income, living in a battleground state, being a part of the workforce and having been born in the United States also were positive predictors. Recent mobility tended to lower the probability of voting. None of the minimum identification requirements had a significant effect on voting, while most of the remaining variables had effects similar to those in the maximum requirement model.

Hispanic voters also were less likely to vote in states that required non-photo identification as opposed to stating one's name.

[Table 7 here]

Using the coefficients from Table 7 to calculate predicted probabilities, for both the maximum and minimum requirements, Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. Hispanic voters ages 45 to 64 and 65 and over were more likely to vote than their 18-to-24-year-old counterparts. Education and income also were positive predictors of voting. Interestingly, being

a native-born citizen lowered the probability of voting, while native-born citizenship was a positive predictor for African-American voters and was not a predictor at all for white voters. It may be that naturalized citizens of Hispanic descent are more conscious of the value of voting rights than other groups.

Varying voter identification requirements influenced Asian-American voters as well. As with Hispanic and Black voters, Asian-American voters were less likely to turn out in states with non-photo identification requirements than in states where voters gave their names.

[Table 8 here]

Using the probit coefficients to calculate predicted probabilities, Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement. Asian-American voters also were 2.2 percent less likely to vote when signatures were the maximum requirement compared to stating one's name.

In terms of other predictors, there were no significant differences in terms of age or income. In contrast to Hispanic voters, where one was a naturalized or natural-born citizen did not affect the probability of voting. Those with high school or college diplomas or graduate training were more likely to turn out than those with less than a high school diploma. Women and married voters also were more likely to turn out than men and voters who were not married.

### **Discussion and conclusion**

The results presented here provide evidence that as voter identification requirements vary, voter turnout does as well. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but still statistically significant.

In the aggregate data, requirements that voters match signatures on file or provide a non-photo identification had negative effects on turnout compared to requiring that voters state their names. Interactions with specific groups – African-Americans and Hispanics – did not improve the fit of the aggregate data to the models. But differences emerged among specific groups in the individual-level data. For the overall sample, the signature, non-photo identification and photo identification requirements all had negative effects compared to the requirement that voters simply state their names. These effects translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters (the gap widened to 3.7 percent for white voters when comparing photo identification to simply stating one's name).

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This begs the question as to why photo identification requirements did not have a greater influence in 2004. It may have been due to the fact that

photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement.

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements?<sup>14</sup> Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

<sup>14</sup> The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using the November 2004 Current Population Survey data and voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not registered). Of all of the voter identification requirements, only requiring signatures or matching signatures had a significant effect on whether a respondent said he or she was registered to vote in 2004. In each instance the effect was negative.

## Alabama

### **Summary:**

In Alabama, all voters must show identification prior to voting at the polls. Ala. Code § 17-11A-1 (2005). The identification forms permitted are similar to the forms permitted under HAVA. *Id.* Alabama also permits a voter who lacks identification to be identified by two poll workers who can attest to the voter's identity. *Id.* If the voter lacks identification and no two poll workers can vouch for him, the voter may sign an affidavit and vote a provisional ballot. *Id.*

Absentee voters who registered by mail and are voting for the first time in an election for federal office must also provide identification. Ala. Code § 17-10A-1 (2005). They may provide the identification with their ballot or their registration or at any time prior to the election. *Id.* If an absentee voter required to provide identification does not provide it, his ballot will be considered a provisional ballot. Ala. Code § 17-10A-2 (2005). The voter must provide identification by the Monday following the election in order for his ballot to count. *Id.*

There are two bills pending in the Alabama legislature. One would eliminate social security cards as a valid form of identification. HB 218, 2005 Reg. Sess. (Ala. 2005). The other would require proof of citizenship with registration. HB 743, 2005 Reg. Sess. (Ala. 2005).

- **Statutes:** Ala. Code § 17-11A-1 (2005).
  - **Passed:**
    - § 17-11A-1 – 2003
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - HB 218, 2005 Reg. Sess. (Ala. 2005): eliminates social security card as valid identification [pending].
  - HB 743, 2005 Reg. Sess. (Ala. 2005): requires proof of citizenship with voter registration [4/6/05 in committee].
- **Case law (from annotations):** none
- **Administrative regulations:** none for voter identification.
- **What the law requires:**
  - **Is ID required?**
    - **At polls – all voters:**
      - All voters must show identification. Ala. Code § 17-11A-1 (2005).
    - **Absentee voters:**
      - Only those who registered by mail and have not voted in a federal election (HAVA requirement). Ala. Code § 17-10A-1 (2005).
  - **First time voters or all?**
    - All voters at polls. Ala. Code § 17-11A-1 (b) (2005).
  - **When?**

- At the polls for all in-person voters. Ala. Code § 17-11A-1 (2005).
- At either registration or with mailed ballot or prior to election day for voters voting by mail. Ala. Code § 17-10A-1 (2005).
- **What types of ID?**
  - Valid photo identification: government issued, issued by employer, student identifications from AL schools
  - Or
  - A copy of a current utility bill, bank statement, government check, or paycheck
  - Or
  - Other government document: identification card issued by government agency (AL state or federal), passport, AL hunting license, AL gun permit, pilot's license, military identification card, birth certificate, social security card, naturalization certificate, copy of court record of name change or adoption, or Medicare or Medicaid card
  - Or
  - Identified by two poll worker who will attest to the voter's identity.
  - Ala. Code § 17-11A-1 (2005).
- **State or federal elections?**
  - All elections. Ala. Code § 17-11A-1 (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Ala. Code § 17-11A-1 (e) (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit. Ala. Code § 17-10A-2 (b)(2) (2005).
  - Absentee voters whose ballots are considered provisional must provide identification by the Monday following the election or their ballots will not be counted. Ala. Code § 17-10A-2 (2005).
- **Challenge available at polls?**
  - No. Statute repealed in 2003. Ala. Code § 17-12-1 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 20, 2005  
**RE:** States for ID requirements chart: Alaska

---

### Alaska

#### Summary:

At the polls, all voters must provide proof of identification. Alaska Stat. § 15.15.225 (2005). Absentee voters are required to provide identification as well. Alaska Stat. § 15.20.081 (2005). The types of identification permitted are: an official voter registration card, driver's license, state identification card, current and valid photo identification, birth certificate, passport, hunting or fishing license, an original or a copy of a current utility bill, bank statement, paycheck, government check, or other government document. Alaska Stat. § 15.15.225 (2005). Alternatively, a voter who is known to an election official may have the requirement waived (except if he registered by mail and is voting for the first time). *Id.* Without identification, a voter may sign a statement and vote a questioned ballot. *Id.*

There are no pending or recently passed bills concerning voter identification.

- **Statutes:** Alaska Stat. § 15.15.225 (2005).
  - **Passed:**
    - §15.15.225 – 1980
- **Session law/recent legislation passed:** none
- **Pending legislation:** none
- **Case law (from annotations):** none
- **Administrative regulations:** none concerning voter identification.
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - None
    - **Absentee voters:**
      - Must provide proof of identification. Alaska Stat. § 15.20.081 (2005).
    - **At polls:**
      - All voters required to show identification at polls. Alaska Stat. § 15.15.225 (2005).
  - **First time voters or all?**
    - All voters. Alaska Stat. § 15.15.225 (2005).
  - **When?**
    - At polls. Alaska Stat. § 15.15.225 (2005).

- **What types of ID?**
  - An official voter registration card, driver's license, state identification card, current and valid photo identification, birth certificate, passport, or hunting or fishing license;
- OR
- an original or a copy of a current utility bill, bank statement, paycheck, government check, or other government document; must show the name and current address of the voter;
- OR
- have the requirement waived because the voter is known to an election official (first time voters who registered by mail or fax may not have the requirement waived)
- Alaska Stat. § 15.15.225 (2005).
- **State or federal elections?**
  - All elections. Alaska Stat. § 15.15.225 (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Questioned ballot. Alaska Stat. § 15.15.225 (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Sign a statement. Alaska Stat. § 15.15.215 (2005); Alaska Stat. § 15.15.210 (2005).
- **Challenge available at polls?**
  - Yes. Alaska Stat. § 15.15.210 (2005).
- **Miscellaneous:**
  - Has early voting – early voters may vote early at specified locations for fifteen days prior to the election & must show identification (same forms and procedure as at the polls on election day). Alaska Stat. § 15.20.064 (2005).

## MEMORANDUM

**TO:** Sara Sampson

**FROM:** Jamie LaPlante

**DATE:** July 21, 2005 [Note that the law has changed- the chart reflects law current to 9/1/05]

**RE:** States for ID requirements chart: Arizona

---

### Arizona

#### Summary:

Recently, in the 2004 election, Arizona passed Prop. 200, which included a vague requirement of identification at the polls. All voters at the polls must provide either one form of identification with their name, address, and photo or two forms of identification with their name and address. Ariz. Rev. Stat. § 16-579 (2004). The requirement is not more specific regarding the types of identification accepted and the consequences of having no identification. The legislature and the governor have yet to agree on the specifics for this requirement.

There were four bills which were introduced in this session concerning voter identification. HB 2658 and 2044 would define the identification types broadly, similar to HAVA. HB 2658, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005); HB 2044, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005). SB 1186 and 1118 would also define identification broadly but would also require proof of citizenship at registration and showing identification prior to voting a provisional ballot. SB 1186, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005); SB 1118, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005). Both SB 1186 and 1118 passed both houses but were vetoed by the governor because of the identification requirement for provisional voting.

- **Statutes:** Ariz. Rev. Stat. § 16-579 (2004). [Part of Prop. 200 from 2004 election]
  - **Passed:**
    - § 16-579 – 2004
    - No details regarding particulars of these requirements have been decided between the legislature and governor; last proposal by legislature was vetoed by the governor.
- **Session law/recent legislation passed:** Prop. 200 in November 2004 (see above).
- **Pending legislation:**
  - HB 2658, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005): defines identification as a document delivered through postal system, bill, bank statement, paycheck, government issued document, employee identification document, tribal document, military identification card, or passport; provides for provisional voting for those lacking identification. [2/15/05 second reading in House]
  - HB 2044, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005): provides that any identification with the voter's address and matching the information in the signature record is sufficient. [third reading in House 3/3/05]
  - SB 1186, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005): requires proof of citizenship at registration; requires identification in order to vote a

provisional ballot; does not specify identification types further than under Prop. 200 [vetoed on 5/20/05].

- SB 1118, 47<sup>th</sup> Leg., 1<sup>st</sup> Reg. Sess. (Ariz. 2005): similar bill [vetoed 4/1/05].

- **Case law (from annotations):** none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - None.
    - **Early voting:**
      - Must provide date and state of birth with request for early ballot. Ariz. Rev. Stat. § 16-542 (A) (2004).
        - If the voter is voting for the first time, he shall submit a copy of identification (HAVA compliance) [but keep in mind this statute was passed prior to Prop. 200, and when the specifics of the identification requirement are worked out, this requirement may be modified as well]. Ariz. Rev. Stat. § 16-542 (C) (2004).
    - **At polls:**
      - All voters must provide either one form of identification with their name, address, and photo or two forms of identification with their name and address [Prop. 200]. Ariz. Rev. Stat. § 16-579 (2004).
  - **First time voters or all?**
    - All voters. Ariz. Rev. Stat. § 16-579 (2004).
  - **When?**
    - At the polls. Ariz. Rev. Stat. § 16-579 (2004).
  - **What types of ID?**
    - None specified yet.
  - **State or federal elections?**
    - Both. Ariz. Rev. Stat. § 16-579 (2004).
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Not specified yet.
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - Not specified yet.
  - **Challenge available at polls?**
    - Yes. Ariz. Rev. Stat. § 16-591 (2004).
  - **Miscellaneous:**
    - Has early voting in which any voter may take part. Ariz. Rev. Stat. § 16-542 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 21, 2005  
**RE:** States for ID requirements chart: Arkansas

---

### Arkansas

#### Summary:

Arkansas voters are required to identify themselves and state their address or date of birth to election officials at the polls. Ark. Code Ann. § 7-5-305 (2005). They also must provide identification at the polls. *Id.* The forms of identification are the same forms as permitted under HAVA. *Id.* This requirement applies to state and federal elections. *Id.* Without identification, a first time voter who registered by mail must sign an affidavit and vote provisionally. *Id.* For all other voters without identification, they may vote a regular ballot, but precinct officials will note in the precinct list that they did not provide identification. *Id.* The prosecutor may wish to use the list to prosecute potential election fraud.

Arkansas also has early voting, but the procedure for identification is the same as election day voting.

As required by HAVA, absentee voters who registered by mail and are voting for the first time must provide identification with their ballot if they did not do so with their registration. Ark. Code Ann. § 7-5-201 (2005).

The legislature recently passed a bill which removes HAVA's vague language regarding provisional voters in the wrong precinct from its code. 2005 Ark. Acts 238. Arkansas makes it clear that a voter must be in the correct precinct in order for his vote to count. *Id.* There are also two bills pending this session which would require proof of citizenship at registration. SB 1111, 85<sup>th</sup> Gen. Assem. 2005 Reg. Sess. (Ark. 2005); SB 206, 85<sup>th</sup> Gen. Assem. 2005 Reg. Sess. (Ark. 2005).

- **Statutes:** Ark. Code Ann. § 7-5-305 (2005).
  - **Passed:**
    - § 7-5-305 – 1999; 2003 added provision for provisional vote for first time voters without identification
- **Session law/recent legislation passed:**
  - 2005 Ark. Acts 238: provides that voters in the incorrect precinct should be directed to the correct precinct; voters only permitted to vote a provisional ballot if they sign an affidavit that they are eligible in that precinct (changed “jurisdiction” to “precinct” – removed vague terms used in HAVA). [SB 256 – approved 2/17/05]
- **Pending legislation:**
  - SB 1111, 85<sup>th</sup> Gen. Assem. 2005 Reg. Sess. (Ark. 2005): requires evidence of citizenship for registration, which includes a driver's license if proof of citizenship was required, birth certificate, passport, naturalization

documents, tribal identification card, and other proof of citizenship under Immigration Act. [3/7/05 introduced and referred to committee]

- SB 206, 85<sup>th</sup> Gen. Assem., 2005 Reg. Sess. (Ark. 2005): requires evidence of citizenship for registration, which includes a driver's license if proof of citizenship was required, birth certificate, passport, naturalization documents, tribal identification card, and other proof of citizenship under Immigration Act. [1/26/05 introduced; 4/13/05 referred to a second committee]
- **Case law (from annotations):**
  - none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - Provide driver's license number or last four digits of social security number or state that he does not have either one. Secretary of State, Charlie Daniels, Voting 101: A Pocket Guide to Voting in the Natural State, 3, [http://www.sosweb.state.ar.us/elections/elections\\_pdfs/education/voting101layout-all.pdf](http://www.sosweb.state.ar.us/elections/elections_pdfs/education/voting101layout-all.pdf).
      - If a first time voter who registers by mail wishes to avoid the possibility of voting a provisional ballot, he should provide a copy of identification with his registration. Secretary of State, Charlie Daniels, Voting 101: A Pocket Guide to Voting in the Natural State, 3, [http://www.sosweb.state.ar.us/elections/elections\\_pdfs/education/voting101layout-all.pdf](http://www.sosweb.state.ar.us/elections/elections_pdfs/education/voting101layout-all.pdf). Then, if he has no identification at the polls, he may vote a regular ballot. *Id.*
    - **At polls:**
      - All voters must identify themselves and state their address or date of birth. Ark. Code Ann. § 7-5-305 (2005).
      - All voters must provide identification at the polls. Ark. Code Ann. § 7-5-305 (a)(8)(A) (2005).
    - **Early voting at polls:**
      - Same as election day at polls procedure. Secretary of State, Charlie Daniels, Voting 101: A Pocket Guide to Voting in the Natural State, 15, [http://www.sosweb.state.ar.us/elections/elections\\_pdfs/education/voting101layout-all.pdf](http://www.sosweb.state.ar.us/elections/elections_pdfs/education/voting101layout-all.pdf).
    - **Absentee voters:**
      - If they registered by mail and are voting for the first time, they must provide a copy of identification with their ballot. Ark. Code Ann. § 7-5-201 (2005).
  - **First time voters or all?**
    - All, although the consequences of not having identification differ between first time voters who registered by mail and other voters. Ark. Code Ann. § 7-5-305 (a)(8)(B) (2005).

- **When?**
  - At the polls. Ark. Code Ann. § 7-5-305 (2005).
- **What types of ID?**
  - Current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. Ark. Code Ann. § 7-5-305 (a)(8)(A) (2005).
- **State or federal elections?**
  - All elections. Ark. Code Ann. § 7-5-305 (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - **First time voters who registered by mail without providing identification:** must vote a provisional ballot. Ark. Code Ann. § 7-5-305 (a)(8)(B)(i) (2005).
  - **All other voters:** vote a regular ballot and election official notes on the precinct list that the voter did not provide identification. Ark. Code Ann. § 7-5-305 (a)(8)(B)(ii) (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - None except that the prosecutor reviews the list of voters who voted without identification and may prosecute election fraud. Ark. Code Ann. § 7-5-305 (a)(8)(B)(iv) (2005).
  - For first time voters voting by provisional ballot – affidavit. Ark. Code Ann. § 7-5-306 (2005).
- **Challenge available at polls?**
  - Yes but only by appointed poll watchers. Ark. Code Ann. § 7-5-312 (a)(1) (2005)

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: California

---

### California

#### Summary:

California law does not require identification at registration or at the polls. The only identification procedures in place under state law are signature verification and requiring the voter recite his name and address prior to voting. Cal. Elec. Code § 14216 (2005). California does have a place on the registration form for driver's license or state identification number, and this information is checked against motor vehicle records. However, California does not require that voters provide this information as a prerequisite to registration. Cal. Elec. Code § 2150 (2005). The only identification procedures in place are those under HAVA, and the HAVA identification requirement for first-time registrants only applies in Federal elections. Cal. Code Regs. tit. 2, § 20107 (2005). California allows all types of identification under HAVA and liberally construes the identification requirement. *Id.*

There is a bill pending in the Senate, which would require all voters to show either one form of identification with name, address, and photograph or two forms of identification with name and address. S.B. 226, 2005-06 1<sup>st</sup> Extraordinary Sess. (Cal. 2005).

- **Statutes:** Cal. Elec. Code § 2188 (2005). & Cal. Elec. Code § 2150 (2005).
  - **Passed:**
    - §2188 – 1994 – effective 1/1/95
    - §2150 – 1995 – effective 1/1/96
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - SB 226 – would require all voters to show identification at polls (1 form w/ name, address & photograph or 2 forms w/ name & address) [2/15/05 – Introduced; 2/15/05 - To Elections, Reapportionment, and Constitutional Amendment Committee; 3/17/05 - Set hearing for April 6; 4/6/05 - Hearing, didn't pass Committee; 4/27/05 - Reconsideration granted]
    - S.B. 226, 2005-06 Sess. (Cal. 2005).
  - SB 1016 [passed Senate] – S.B. 1016, 2005-06 Sess. (Cal. 2005).
    - §2150 – does not add any voter identification provisions but would make minor changes to make clear that failure to provide social security number or driver's license number will not result in a failure to register
    - §2188 – amends an irrelevant portion of the section
- **Case law (from annotations):**
  - *People v. Gordon*, 5 Cal. 235 (1855): cannot require a challenged voter to produce proof of citizenship
  - *Richardson v. Ramirez*, 418 U.S. 24 (1974): felon disenfranchisement does not violate equal protection clause of Fourteenth Amendment

030167

- *Russell v. McDowell*, 23 P. 183 (Cal. 1890): concerning establishing prima facie case for fraudulent voting
  - **Administrative regulations:** Cal. Code Regs. tit. 2, § 20107 (2005).
  - **What the law requires:**
    - **Is ID required?**
      - **For registration:**
        - No, statute states that voters should put driver's license number or other identification on registration form but specifically states that it is not required for registration. Cal. Elec. Code § 2188 (2005); Cal. Elec. Code § 2150 (2005).
      - **At polls:**
        - Not beyond HAVA, announce name and address only. Cal. Elec. Code § 14216 (2005).
    - **First time voters or all?**
      - Nothing beyond HAVA, so just first time voters in Federal elections.
    - **When?**
      - HAVA – either at registration or when voter votes for first time
    - **What types of ID?**
      - (1) a current and valid photo identification: (A) a driver's license or identification card of any state; (B) a passport; (C) an employee identification card; (D) an identification card provided by a commercial establishment; (E) a credit or debit card; (F) a military identification card; (G) a student identification card; (H) a health club identification card; (I) an insurance plan identification card;
- OR
- (2) any of the following documents, provided that the document includes the name and address of the individual presenting it, and is dated since the date of the last general election, unless the document is intended to be of a permanent nature such as a pardon or discharge, including: (A) a utility bill; (B) a bank statement; (C) a government check; (D) a government paycheck; (E) a document issued by a governmental agency; (F) a sample ballot issued by a governmental agency; (G) a voter notification card issued by a governmental agency; (H) a public housing identification card issued by a governmental agency; (I) a lease or rental statement or agreement issued by a governmental agency; (J) a student identification card issued by a governmental agency; (K) a tuition statement or bill issued by a governmental agency; (L) an insurance plan card issued by a governmental agency; (M) discharge certificates, pardons, or other official documents issued to the voter by a governmental agency in connection with the resolution of a criminal case, indictment, sentence, or other matter; (N) public transportation authority senior citizen discount cards issued by a governmental agency; (O) identification documents issued by governmental disability agencies; (P) identification documents issued by government homeless shelters and other

government temporary or transitional facilities; (Q) a drug prescription issued by a government doctor or other governmental health care provider; (R) property tax statement issued by a governmental agency; (S) vehicle registration or certificate of ownership issued by a governmental agency. Cal. Code Regs. tit. 2, § 20107 (2005).

- **State or federal elections?**
  - Cal. Code Regs. tit. 2, § 20107 (2005) states that the identification requirement applies only to voters required to provide identification under HAVA, thus, only Federal elections.
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Cal. Code Regs. tit. 2, § 20107 (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - None, just vote provisionally subject to the normal restrictions and rules on provisional ballots. Cal. Code Regs. tit. 2, § 20107 (2005).
- **Challenge available at polls?**
  - Yes, challenge may be on several grounds: (1) the voter is not the person whose name appears on the index; (2) the voter is not a resident of the precinct; (3) the voter is not a citizen of the United States; (4) the voter has voted that day; (5) the voter is presently on parole for the conviction of a felony. Cal. Elec. Code § 14240 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Donnie Scheetz  
**DATE:** August 11, 2005  
**RE:** States for ID requirements chart: Colorado

---

### Colorado

#### Summary:

Everyone must present some form of ID at the polls. A Social Security Number will not suffice. If one is registering to vote by mail or voting absentee, a form of ID must be included. To register at least the last four digits of the Social Security number will work. If no ID can be presented then the elector will vote absentee. The ID requirement is the same whether voting early or not.

- **Statutes:** C.R.S. 1-2-501(2)(B); C.R.S. 1-1-104(19.5); C.R.S. 1-2-204(2)(f.5); C.R.S. 1-7-201
  - **Passed:**
    - Articles 1 to 12 of this title were originally enacted as articles 1, 3, 4, 9 to 19, and 24 of chapter 49 in C.R.S. 1963. The substantive provisions of these articles were recodified in 1992, effective January 1, 1993. There were subsequent amendments in 2004.
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - None
- **Case law (from annotations):**
- Provisions not mandatory. To treat all of the provisions of this statute as mandatory so as to deprive those who attempt to register would provide an unequal application of the statute and an inconsistency not warranted by any express language in the enactment. Meyer v. Putnam, 186 Colo. 132, 526 P.2d 139 (1974).

Obtaining social security numbers from vast majority of voters is only directory. Meyer v. Putnam, 186 Colo. 132, 526 P.2d 139 (1974).

**Administrative regulations:** none

- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - If you are a first time voter who registers to vote by mail, you must submit a copy of one of the following forms of ID: valid driver's license, ID issued by the Department of Revenue, passport, employee identification with a photo issued by a governmental entity, pilot's license, military ID, copy of current utility bill, bank statement, government check or other government document that shows the name and address of the elector, Medicare or Medicaid card, copy of birth certificate,

030170

documentation of naturalization. Instead of any of those the elector may provide one of the following numbers: Driver's License number, Colorado Dept. of Revenue Identification number, or at least the last four digits of Social Security number.

[http://www.sos.state.co.us/pubs/elections/id\\_requirements.pdf](http://www.sos.state.co.us/pubs/elections/id_requirements.pdf)

- If you are a first time Voter who registers to vote in person, you must provide the number from one of the following forms of identification: Driver's License number, Colorado Department of Revenue Identification number, or at least the last four digits of the voter's Social Security number.  
[http://www.sos.state.co.us/pubs/elections/id\\_requirements.pdf](http://www.sos.state.co.us/pubs/elections/id_requirements.pdf)
- If voting absentee, an elector must include a copy of one of the forms of ID listed above. If it is not included then the ballot is treated as a provisional ballot. *C.R.S. 1-8-113*
  - **At polls:**
    - If you vote in person (including early voting, polling place voting), you must provide a copy of any of the above forms identification. However, a Social Security Number (or last four digits) is NOT enough to vote in person.  
[http://www.sos.state.co.us/pubs/elections/id\\_requirements.pdf](http://www.sos.state.co.us/pubs/elections/id_requirements.pdf)
- **First time voters or all?**
  - ID must be provided by all voters who vote in person.
- **When?**
  - At the polls
- **What types of ID?**
  - Listed above
- **State or federal elections?**
  - All types of elections
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - provisional ballot
- C.R.S. 1-7-103  
**Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
- **Challenge available at polls?**
  - Yes

  - none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - If you are registering by mail you may include a copy of ID. The same applies if you are registering in person for the first time.  
<http://www.sots.state.ct.us/ElectionsDivision/elecfrms/ed671.pdf>
      - The same requirements apply if the elector is voting absentee.  
<http://www.sots.state.ct.us/ElectionsDivision/HAVA/IDRequirements.pdf>
    - **At polls:**
      - All voters must provide ID at the polls.  
<http://www.sots.state.ct.us/ElectionsDivision/HAVA/HowToRegisterVotersEng.pdf>
  - **First time voters or all?**
    - All voters
  - **When?**
    - At the polls
  - **What types of ID?**
    - Driver's license, social security card, a rent receipt, a utility bil, or a form of ID with (a) elector's name and address, or (b) their name and signature, or (c) their name and photo. Any of the following will work: a copy of current valid photo ID, or a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows your name and address.  
<http://www.sots.state.ct.us/ElectionsDivision/elecfrms/ed671.pdf>

- **State or federal elections?**
  - All elections
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. *Id.*
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit. *Id.*
- **Challenge available at polls?**
  - Yes. *Conn. Gen. Stat. § 9-232*

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Donnie Scheetz  
**DATE:** August 11, 2005  
**RE:** States for ID requirements chart: Delaware

---

### Delaware

#### Summary:

ID must be presented when registering. If it is not then it must be presented at the polls. If ID presented at registration or not a first time voter, then only a signature comparison is done. To vote absented one does not have to submit ID if properly registered; only an affidavit is required.

- **Statutes:** 15 Del. C. § 2011, 15 Del. C. § 2033
  - **Passed:**
    - 2003
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - none
- **Case law (from annotations):**
  - None
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - The elector must provide proof of identity to register. 15 Del. C. § 2011. Elector must submit with that person's application a copy of a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the voter. 15 Del. C. § 2033
      - Should the person not include a copy of the required identification with the voter registration application, the voter shall provide a valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the voter prior to voting for the first time at a polling place in the State. 15 Del. C. § 2033
    - **At polls:**
      - No ID is required at the polls, unless none was submitted during registration [http://www.state.de.us/sos/gic/lwv/body/dgbody-08.shtml#P1251\\_139266](http://www.state.de.us/sos/gic/lwv/body/dgbody-08.shtml#P1251_139266)
  - **First time voters or all?**

    - 2003
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - none
- **Case law (from annotations):**
  - none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - Yes. You must have a driver's license number, or Florida ID card number. If the elector has none of these, they must provide the last four digits of their social security number.  
<http://election.dos.state.fl.us/publications/pdf/2004VoterGuide.pdf>
      - If registering by mail and are a first time voter, then must submit ID when the form is mailed. Id.
      - Absentee voters must provide proper ID prior to 7 p.m. election day. They can provide a copy of a current and valid utility bill, bank statement, government paycheck, or other government document containing their name and address of current residence. Id.
    - **At polls:**
      - Yes.  
<http://election.dos.state.fl.us/publications/pdf/2004VoterGuide.pdf>
  - **First time voters or all?**
    - All <http://election.dos.state.fl.us/publications/pdf/2004VoterGuide.pdf>
  - **When?**
    - Before voting  
<http://election.dos.state.fl.us/publications/pdf/2004VoterGuide.pdf>
  - **What types of ID?**
    - Florida Driver's license, ID card issued by the Dept. of Highway Safety and Motor Vehicles, Passport, Employee badge or identification, Buyer's club ID, Debit/credit card, Military ID, Student ID, Retirement Center ID, Neighborhood association ID, Entertainment ID, Public assistance ID.  
<http://election.dos.state.fl.us/publications/pdf/2004VoterGuide.pdf>

030176

- **State or federal elections?**
  - All
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional if you are a first time voter who registered by mail and have not previously provided the required ID.  
<http://election.dos.state.fl.us/publications/pdf/2004VoterGuide.pdf>
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit <http://election.dos.state.fl.us/publications/pdf/2004VoterGuide.pdf>
- **Challenge available at polls?**

Yes.

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Doug Koppel  
**DATE:** August 11, 2005  
**RE:** States for ID requirements chart: Georgia

---

### **Georgia**

#### **Summary:**

In any election or primary, Georgia voters must produce valid identification at the polling place before being allowed to vote. A voter whose name is on the list but cannot provide proper identification at the polling place is allowed to cast a provisional ballot upon swearing or affirming to his identity. Georgia Administrative Code 183-1-12-.06(5)(a). The voter then has to present the proper ID by the end of the statutory period for verification of all provisional ballots, or the ballot will not be counted. Georgia Administrative Code 183-1-12-.06(5)(c). This period ends upon the closing of business on the second business day after the election. Georgia Administrative Code 183-1-12-.06(11)(d). This information is also found in Ga. Code Ann. §21-2-417. Appropriate forms of identification are listed in Ga. Code Ann. §21-2-417(a). When registering to vote for the first time, whether by mail or in person, the voter must supply proper identification as listed in Ga. Code Ann. §21-2-417(c). If a voter attempted to register by mail but failed to include the proper ID, he can present this identification at the polling place along with the required photo ID and vote as normal. Ga. Code Ann. §21-2-221.

#### **Statutes:**

Ga. Code Ann., §21-2-417 – proper identification presentation to poll workers. Proper ID includes driver's license, state ID card with photo, US passport, employee ID with photo, military ID with photo, or tribal identification card with photo.

Ga. Code Ann. §21-2-221 – identification required for registration, by mail or in person.

#### **Administrative Regulations:**

Ga Administrative Code 183-1-12 -.06 – provisional ballots; process and rules for distributing provisional ballot when proper ID is not presented.

#### **Pending legislation:**

2005 GA HB 597 (SN) – no substantive changes

2005 GA SB 84 (SN) – no substantive changes

#### **Case law:**

None.

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Doug Koppel  
**DATE:** August 11, 2005  
**RE:** States for ID requirements chart: Hawaii

---

### Hawaii

#### **Summary:**

When an elector registers, Hawaii administrative law calls for a signed affidavit along with submission of the elector's social security number (not card), birth date, and address of residence. Hawaii Admin. Rules §2-51-20(a). The chief election officer may add additional requirements to the registration form. Hawaii Admin. Rules §2-51-20(b). This completed form serves as prima facie evidence of the voter's identity. However, if the identity is challenged, the clerk can request substantiating evidence. Hawaii Admin. Rules §2-51-24 (a), (b). It is not specified what evidence will be determined sufficient or what can or cannot be used as valid evidence.

At the polling place, Hawaii statutory law requires only that identification be produced if requested by a precinct official. HRS §11-136. What is to be accepted as proper identification, or when it should be requested of an elector, is not stated. Assumedly, failure to produce the ID would result in the elector being treated as a challenged voter and voting via challenged ballot pursuant to Hawaii Admin. Rules §2-51-45. Regulations from the Office of the Lieutenant Governor require identification to be produced to the official in charge of the poll book but does not state which forms of identification are to be sufficient. Hawaii Admin. Rules §2-51-80(b). The voter must also sign the poll book. Hawaii Admin. Rules §2-51-80(d).

#### **Statutes:**

HRS §11-136 – poll book, identification, voting

#### **Administrative Regulations:**

Hawaii Admin. Rules §2-51-20 – voter registration form requirements

Hawaii Admin. Rules §2-51-24 – rules for clerk's approval of registration

Hawaii Admin. Rules §2-51-80 – voting procedure at the polls

**Pending legislation:** None.

**Case law:** None.

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Idaho

---

### Idaho

#### Summary:

Idaho law requires voters to supply their driver's license number or social security number at registration. Idaho Code § 34-411 (2004). It also requires identification for all first-time voters who registered by mail, as required under HAVA for voting in Federal elections. Idaho Code § 34-410 (2004). Voters may present a current photo identification, utility bill, bank statement, government check, paycheck, or any other government document with the name and address of the voter. Idaho Code § 34-410 (2004). Idaho also permits election day registration for all elections, and identification in the form of (1) a driver's license or state ID, (2) any document with the voter's address together with a picture ID, or (3) a student ID and tuition bill with address is required in order to same-day register. Idaho Code § 34-408A (2004).

Because Idaho provides for election day registration, it was exempted from the NVRA. Even so, Idaho accepts mail-in registrations anyway. However, because of the availability of election day registration, it is not required to provide a provisional voting scheme. Ben Ysursa, Secretary of State, State of Idaho: State Plan, 11 (2004), [http://www.idsos.state.id.us/ELECT/Idaho\\_State\\_Plan.pdf](http://www.idsos.state.id.us/ELECT/Idaho_State_Plan.pdf). Idaho believes election day registration is an adequate substitute. *Id.* Thus, if voters do not have proper identification at the poll, they cannot vote. *Id.*

There is no pending legislation in Idaho.

- **Statute:**
  - Idaho Code §34-410 (2004) & Idaho Code §34-408A (2004) & Idaho Code §34-411 (2004).
  - **Passed:**
    - §34-408A – 1994
    - §34-410 – 2003
    - §34-411 – 2003
- **Session law:** none
- **Pending legislation:** none
- **Case law (from annotations):**
  - none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?** Yes, but not beyond HAVA requirements. Idaho Code § 34-410 (2004).
  - **First time voters or all?**
    - First time voters registering by mail or election day registrants at polls. Idaho Code § 34-410 (2004); Idaho Code § 34-408A (2004).
  - **When?**
    - **At registration:** must supply driver's license number or the last four digits of the voter's social security number. Idaho Code § 34-411 (2004).

030180

- **Mail-in registration (HAVA):**
  - Codified requirements of HAVA for federal elections when elector mails registration, thus, voter can provide identification with registration or at the polls. Idaho Code § 34-410 (2004).
- **Election day registration at polls:**
  - Requires proof of residence, which can be done in 3 ways: (1) driver's license or Idaho identification card issued through the department of transportation; (2) any document which contains a valid address in the precinct together with a picture identification card; or (3) a current valid student identification card from a postsecondary educational institution in Idaho accompanied by a current student fee statement that contains the student's valid address. Idaho Code § 34-408A (2004).
- **What types of ID?**
  - For 1<sup>st</sup> time voters who registered by mail: (1) A current and valid photo identification; or (2) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. Idaho Code § 34-410 (2004)(essentially HAVA requirements).
  - For election day registrants: (1) driver's license or Idaho identification card issued through the department of transportation; (2) any document which contains a valid address in the precinct together with a picture identification card; or (3) a current valid student identification card from a postsecondary educational institution in Idaho accompanied with a current student fee statement that contains the student's valid address. Idaho Code § 34-408A (2004).
- **State or federal elections?**
  - Mail-in HAVA requirements: seems to be just Federal elections (Code seems to limit the ID requirements for mail-in first-time registrants to the scope of HAVA by stating "as required by HAVA"). Idaho Code § 34-410 (2004).
  - All other requirements: all elections (Code makes no distinction between state or local and federal elections for all other ID requirements, especially the election day registration requirements)
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - No provisional voting system because of exemption from NVRA because of same-day registration; so, no ID, no vote. Ben Ysursa, Secretary of State, State of Idaho: State Plan, 11 (2004), [http://www.idsos.state.id.us/ELECT/Idaho\\_State\\_Plan.pdf](http://www.idsos.state.id.us/ELECT/Idaho_State_Plan.pdf).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - No provisional voting system because of election-day registration; so, no ID, no vote. Ben Ysursa, Secretary of State, State of Idaho: State Plan, 11 (2004), [http://www.idsos.state.id.us/ELECT/Idaho\\_State\\_Plan.pdf](http://www.idsos.state.id.us/ELECT/Idaho_State_Plan.pdf).
- **Challenge available at polls?**
  - Yes, Idaho Code § 34-431 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Illinois

---

### Illinois

#### Summary:

Illinois law technically requires in person registration, but, as a result of a Court decision in 1996, Illinois permits mail-in registration under the NVRA for both State and Federal elections. Ill. Admin. Code tit. 26, § 216.30 (2005). In person registrants must show two forms of identification, and one of them must contain an address. 10 Ill. Comp. Stat. 5/4-10 (2005); 10 Ill. Comp. Stat. 5/5-9 (2005); 10 Ill. Comp. Stat. 5/6-37 (2005). The forms of identification accepted are: driver's license, social security card, public aid identification card, utility bill, employee or student identification card, credit card, or a civil, union or professional association membership card. *Id.* At the polls, voters who registered in person are only required to state their name and address prior to voting; however, voters who registered by mail must meet the HAVA requirements for identification. 10 Ill. Comp. Stat. 5/17-9 (2005); 10 Ill. Comp. Stat. 5/1A-16 (2005). Illinois law does not require any identification beyond HAVA for voters registering by mail.

There is a bill pending in the Senate which would require all voters to present proof of citizenship with their registration form and to present one form of identification with name, address, and photograph or two different forms of identification with name and address at the polls prior to receiving a ballot. SB 2081, 94<sup>th</sup> Gen. Assem., Reg. Sess. (Ill. 2005). Proof of citizenship documents include: birth certificate, naturalization certificate, driver's license if proof of citizenship was required, tribal identification, and passport. *Id.*

- **Statutes:**

- Provisions concerning in-person registration still in the code:
  - 10 Ill. Comp. Stat. 5/4-10 (2005)(for counties with a population of less than 500,000).
  - 10 Ill. Comp. Stat. 5/5-9 (2005)(for counties with a population of at least 500,000).
  - 10 Ill. Comp. Stat. 5/6-37 (2005)(for certain cities, villages and incorporated towns).
- Provision stating that mail-in registration in compliance with HAVA and NVRA is acceptable and ID provisions conform w/ HAVA (either provide ID w/ registration or at polls): 10 Ill. Comp. Stat. 5/1A-16 (2005).
- Identification at polls for in person registrants: 10 Ill. Comp. Stat. 5/17-9 (2005)
- **Passed:**
  - 5/4-10 & 5/5-9 & 5/6-37 – pre-1989
  - 5/1A-16 – 2003
  - 5/17-9 – at least since 1980s

- **Session law:** none
- **Pending legislation:**

030182

- SB 2081 – would require all voters at the polls to present one form of identification with name, address, and photograph or two different forms of identification with name and address; would also require all voters to submit proof of citizenship with their registration form (proof of citizenship: birth certificate, naturalization certificate, driver’s license if proof of citizenship was required, tribal identification, and passport) [2/25/05- Introduced, referred to Rules Committee]. SB 2081, 94<sup>th</sup> Gen. Assem., Reg. Sess. (Ill. 2005).
- HB 1968 – expands the institutions which must provide voter registration forms [passed both houses 5/28/05]. HB 1968, 94<sup>th</sup> Gen. Assem., Reg. Sess. (Ill. 2005).
- HB 715 – adds higher education institutions to those which must provide voter registration forms [passed both houses 5/17/05]. HB 715, 94<sup>th</sup> Gen. Assem., Reg. Sess. (Ill. 2005).
- **Case law (from annotations):**
  - *Orr, et al. v. Edgar, et al.*, 670 N.E.2d 1243 (Ill. App. Ct. 1 Dist. 1996): ruling that the two-tiered system of registration for State and Federal elections violated the voter registration notice provisions in the Illinois Vehicle Code and required the applicant be given notice of their right to vote in state and local elections (after which the State honored mail-in registration as registration for both Federal and State elections).
  - *Jordan v. Officer*, 525 N.E. 2d 1067 (Ill. App. Ct. 5 Dist. 1988): unsuccessful candidates do not waive the right to challenge the eligibility of voters if they failed to use the procedures for poll site challenges (10 ILCS 5/17-9 (2005)).
- **Administrative regulations:**
  - Ill. Admin. Code tit. 26, § 216.30 (2005): implemented NVRA, applications complying with NVRA register voter for Federal and State elections.
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - Still law in effect requiring in-person registration. Law states that a registrant must have two forms of identification, and one of them must contain the voter’s address, many forms being acceptable. Homeless persons must produce proof of use of a certain address, but the address does not have to be on the identifications. 10 Ill. Comp. Stat. 5/4-10 (2005); 10 Ill. Comp. Stat. 5/5-9 (2005); 10 Ill. Comp. Stat. 5/6-37 (2005).
      - Another statute complies with NVRA and HAVA and allows mail-in registration and requires ID be provided at polls or with registration (essentially HAVA codified). 10 Ill. Comp. Stat. 5/1A-16 (2005).
        - Mail-in registration registers voter for both State and Federal elections as of October 1996. Ill. Admin. Code tit. 26, § 216.30 (2005).
    - **At polls:** Only required to state name and address, can ask questions from information provided at registration. 10 Ill. Comp. Stat. 5/17-9 (2005).
      - HAVA applies if no identification provided with registration. 10 Ill. Comp. Stat. 5/1A-16 (2005).
  - **First time voters or all?**

- First time registrants only for the HAVA requirements for mail-in registrants. 10 Ill. Comp. Stat. 5/1A-16 (2005).
- **When?**
  - At registration (with mailing or in person) or if not (and mail-in registration), at polls before voter votes for first time. 10 Ill. Comp. Stat. 5/1A-16 (2005).
- **What types of ID?**
  - For in person registrants: driver's license, social security card, public aid identification card, utility bill, employee or student identification card, credit card, or a civil, union or professional association membership card. 10 Ill. Comp. Stat. 5/4-10 (2005); 10 Ill. Comp. Stat. 5/5-9 (2005); 10 Ill. Comp. Stat. 5/6-37 (2005).
  - For mail-in registrants: Either (i) a copy of a current and valid photo identification, or (ii) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. 10 Ill. Comp. Stat. 5/1A-16 (2005).
- **State or federal elections?**
  - Seems to apply to all elections since it is in the state code w/ no distinction between federal and state. 10 Ill. Comp. Stat. 5/1A-16 (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - HAVA – provisional ballot.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - No law – assume HAVA applies then.
- **Challenge available at polls?**
  - Yes. If challenged, must provide two forms of ID and execute an affidavit, otherwise provisional ballot. 10 Ill. Comp. Stat. 5/18A-5 (2005).
  - Poll watchers permitted. 10 Ill. Comp. Stat. 5/17-23 (2005).

030185

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Iowa

---

### Iowa

#### Summary:

Iowa has essentially codified the requirements of HAVA and requires voters who registered by mail to provide identification either with their registration or prior to voting in the voter's first election, whether State or Federal. Iowa Code § 48A.8 (2005). The forms of identification accepted are the same forms of identification permitted under HAVA. *Id.* If no identification was provided with the mailed registration form and the voter has no identification at the polls, the voter may vote provisionally. *Id.* In order for the vote to count, the voter must later bring or send a copy of identification proving his/her identity, as well as sign an affidavit at the polls affirming his/her identity. *Id.*

In order to register in Iowa, all voters must provide their driver's license numbers, state identification card numbers, or social security numbers unless they notify the State that they do not have a state identification card or social security number. Iowa Code § 48A.11 (2005). When a voter lacks one of these identifying numbers, the State assigns one to the voter. The information provided on the registration form is checked against other State databases. At the polls, precinct officials are permitted, but not required, to ask for some identification with a signature to verify the identity of the voter. Iowa Code § 49.77 (2005).

Iowa law permits voter challenges at the polls. Iowa Code § 49.79 (2005). Currently, there are no pending bills concerning voter identification.

- **Statute:**
  - Iowa Code § 48A.8 (2005)
  - Iowa Code § 48A.11 (2005)
  - Iowa Code § 49.77 (2005)
  - **Passed:**
    - § 48A.8 – 2004
    - § 48A.11 – 2004
    - § 49.77 – 1983
- **Session law:** HF 227, 81<sup>st</sup> Gen. Assem., 1<sup>st</sup> Reg. Sess. (Iowa 2005)(enacted)(specifying that driver's license numbers provided on registration form must be Iowa driver's licenses).
  - Signed by governor 4/6/05
- **Pending legislation:**
  - SF 152, 81<sup>st</sup> Gen. Assem., 1<sup>st</sup> Reg. Sess. (Iowa 2005)(allowing for late registration, up until voting, but requiring proof of residency for late registrants) [in Senate committee 2/16/05]
  - HF 793, 81<sup>st</sup> Gen. Assem., 1<sup>st</sup> Reg. Sess. (Iowa 2005)(makes signature on application required for registration) [passed House 3/31/05, in Senate committee 4/5/05]

030186

- SF 364, 81<sup>st</sup> Gen. Assem., 1<sup>st</sup> Reg. Sess. (Iowa 2005)(makes signature on application required for registration) [In Senate committee 4/14/05]
- **Case law (from annotations):** none
- **Administrative regulations:** Title 821 in the Iowa Administrative Code pertains to election registration but no provision is more specific as to voter identification.
- **What the law requires:**
  - **Is ID required?**
    - **Mail in registrants:** identification required at either registration or at polls, essentially codifies HAVA, requires identification for a mail-in registrant voting for the first time. Iowa Code § 48A.8 (2005).
    - **For registration:** must provide driver's license number, state identification card number or the last four digits of the social security number on the registration form or the application will be rejected or indicate that the voter has none of those and a unique number will be assigned. Iowa Code § 48A.11 (2005).
    - **At polls:** precinct officials *may* require some identification for signature verification if they do not personally know the voter. Iowa Code § 49.77 (2005).
  - **First time voters or all?**
    - First time voters only: HAVA requirements codified - first time voters who have never voted in a Federal election. Iowa Code § 48A.8 (2005).
  - **When?**
    - Mail in registrants – either at registration or at polls. Iowa Code § 48A.8 (2005).
  - **What types of ID?**
    - Mail in registrants:
      - Current and valid photo identification
      - Utility bill
      - Bank statement
      - Paycheck
      - Government check
      - Other government document
      - Iowa Code § 48A.8 (2005).
  - **State or federal elections?**
    - Seems to apply to all elections, as the wording of Iowa Code § 48A.8 (2005) states that “an eligible elector who registers by mail and who has not previously voted in an election for federal office in the county ... shall be required to provide identification documents when voting for the first time in the county” (does not mention federal election, rather says “when voting for the first time in the county”).
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Provisional ballot. Iowa Code § 48A.8 (2005).
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - Vote provisionally subject to normal provisional ballot rules. Iowa Code § 48A.8 (2005). Normal provisional ballot rules require that the voter bring or

send identification later and sign an affidavit prior to voting. Iowa Code § 49.81 (2005).

- **Challenge available at polls?**
  - Yes, by any registered voter or precinct official. Iowa Code § 49.79 (2005).

030189

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Kansas

---

### Kansas

#### Summary:

Under Kansas law, all voters in all types of elections are required to state their name and address, if asked, prior to voting. Kan. Stat. Ann. § 25-2908(b) (2004). As a result of HAVA, Kansas enacted a statute requiring first time voters in *all* elections to provide identification either with their registration or when they vote for the first time. Kan. Stat. Ann. § 25-2908(c)(4) & (h) (2004). These voters may provide a Kansas driver's license, state identification card, utility bill, bank statement, paycheck, government check, or other government document. Kan. Stat. Ann. § 25-2908(d) (2004). If they do not provide the identification, the voters may vote a provisional ballot. Kan. Stat. Ann. § 25-2908(e) (2004). In order for the provisional ballot to be counted, the voter must provide one of the identification documents to county election officers before the canvass begins. *Id.*

There is no pending legislation in Kansas. Interestingly, Kansas election law allows for limited elections by mail, and that provision of the Kansas Code has been challenged and ruled constitutional based on the fact that the compelling interest in voter participation outweighed the interest in preventing voter fraud. Mail Ballot Election Act, Kan. Stat. Ann. § 25-432 (2004); *Sawyer v. Chapman*, 729 P.2d 1220 (Kan. 1986).

- **Statute:**
  - Kan. Stat. Ann. § 25-2908 (2004).
  - **Passed:** In 1861 but section significantly rewritten in 2004 and HAVA compliant section added which applied HAVA requirements to both State and Federal elections.
- **Session law:** none
- **Pending legislation:** none
- **Case law (from annotations):**
  - *Sawyer v. Chapman*, 729 P.2d 1220 (Kan. 1986): declared the Act constitutional; compelling state interest in increased voter participation outweighs fraud potential and loss of secrecy.
    - Could be important – essentially ruled that voter participation is more important than voter fraud potential.
- **Administrative regulations:** no ID provisions. *See generally* Kan. Admin. Regs. Agency 7.
- **What the law requires:**
  - **Is ID required?**
    - **For registration or at polls/HAVA:** must provide identification (HAVA codified). Kan. Stat. Ann. § 25-2908(c)(4) (2004).
    - **At polls:** required to announce name and address. Kan. Stat. Ann. § 25-2908(b) (2004).

030190

- **First time voters or all?**
  - First time voters only must provide identification at polls or at registration. Kan. Stat. Ann. § 25-2908(c)(4) (2004).
  - All voters must provide their name and address each time they vote. Kan. Stat. Ann. § 25-2908(b) (2004).
- **When?**
  - HAVA compliance: either at registration or at polls. Kan. Stat. Ann. § 25-2908 (2004).
- **What types of ID?**
  - Kansas driver's license
  - Nondriver's identification card
  - Utility bill
  - Bank statement
  - Paycheck
  - Government check
  - Other government document
  - Kan. Stat. Ann. § 25-2908(d) (2004).
  - Specifically:
    - The identification presented must have the voter's name and 1 of these 2 things: current address or photo
    - Office of Secretary of State Ron Thornburgh & the Kansas County Clerks and Election Officials Association, Kansas Election Standards, I-4 (2004), at [http://www.kssos.org/elections/elections\\_reform\\_standards.html](http://www.kssos.org/elections/elections_reform_standards.html).
- **State or federal elections?**
  - All elections, no distinction made in § 25-2908(h), says "any election". Kan. Stat. Ann. § 25-2908(h) (2004).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Kan. Stat. Ann. § 25-2908(e) (2004).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Vote a provisional ballot and must provide identification types described above either in person, electronically, or by mail to county election officers before canvass in order for vote to be counted. Kan. Stat. Ann. § 25-2908(e) (2004).
- **Challenge available at polls?**
  - Election judges may challenge at polls. Kan. Stat. Ann. § 25-414(a) (2004).
- **Miscellaneous:**
  - Kansas law allows for mail ballot elections when the election involves an issue rather than a candidate and the election is bipartisan. Mail Ballot Election Act, Kan. Stat. Ann. § 25-432 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jaime Lebo  
**DATE:** 9/1/05  
**RE:** States for ID requirements chart: Kentucky

---

### Kentucky

#### Summary:

All Kentucky voters are required to present identification before being allowed to vote on election day. KRS §117.227 (2004) and 31 KAR 4:010 (2005). This can be by personal acquaintance, or by a document, such as a driver license, Social Security card, credit card, or any identification card that bears both the picture and signature of the voter. *Id.*

If the voter does not have identification, then they must sign a written affirmation that they are qualified to vote and then must vote provisionally. 31 KAR 6:020.

- **Statutes:** KRS §117.227 (2004).
  - Effective: July 15, 2002
    - Amended 2002 Ky. Acts ch. 10, sec. 1, effective July 15, 2002. –Created 1988 Ky. Acts ch. 341, sec. 9, effective July 15, 1988.
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - none
- **Case law (from annotations):**
  - none
- **Administrative regulations:** 31 KAR 4:010 (2005). In effect as of April 22, 2005.
  - 31 KAR 6:020: provides procedures for voting provisionally
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - No. KRS §116.115
    - **At polls:**
      - All voters are required to present identification before being allowed to vote on election day. KRS §117.227 (2004) and 31 KAR 4:010.
  - **First time voters or all?**
    - All voters are required to present identification before being allowed to vote on election day. KRS §117.227 (2004) and 31 KAR 4:010.
  - **When?**
    - At polls. KRS §117.227 (2004)
  - **What types of ID?**
    - Personal acquaintance or by a document, such as a motor vehicle operator's license, Social Security card, or credit card. KRS §117.227 (2004). Also, any identification card that bears both the picture and signature of the voter, or any identification card that has been issued by the county, and

030192

which has been approved in writing by the State Board of Elections. 31 KAR 4:010.

- Voters are required to give their name and address to the clerk of the election. If his name is listed on the precinct list, he is to sign the precinct list and his signature should be compared with that on the original registration form. KRS §117.225 (2004).
- **State or federal elections?**
  - Both. KRS §117.227 (2004)
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. 31 KAR 6:020.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Written affirmation. 31 KAR 6:020.
- **Challenge available at polls?**
  - Yes. KRS §117.245 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jaime Lebo  
**DATE:** August 28, 2005  
**RE:** States for ID requirements chart: Louisiana

---

### Louisiana

#### Summary:

Louisiana voters are required to identify themselves and state their address to election officials at the polls. La. R.S. §18:562 (2005). In addition, they must provide a picture identification card. *Id.* If the voter does not possess the requisite identification, he must sign an affidavit and provide further identification that is requested by the commissioner. *Id.* If the further identification is provided, then the voter may vote on a regular ballot. *Id.*

Louisiana has early voting, but before voting, the voter is required to submit his Louisiana driver's license, his current registration certificate, or other identification card to compare with the descriptive information on the precinct register. La. R.S. §18:1309(D)(1) (2005).

When registering, a Louisiana voter must provide identification which reasonably and sufficiently establishes his identity, age, and residence. La. R.S. §18:105 (2005).

- **Statutes:** La. R.S. 18:562 (2005).
- **Session law/recent legislation passed:** 2005 La. Sess. Law Serv. Act 220 (H.B. 336): providing provisions for early voting. Will become activated on January 1, 2006.
  - Act 423 of 2003 Regular Legislative Session implements provisional voting in Louisiana only in elections for federal office. Louisiana Secretary of State Elections Division, Lu<http://www.sec.state.la.us/elections/elections-index.htm#votereg>.
- **Pending legislation:**
  - none
- **Case law (from annotations):**
  - none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - The applicant's driver's license number or last 4 digits of social security number is required on the form. If applicant has neither, then he must attach either a copy of a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the applicant. La. R.S. §18:104 (2005).
      - Also, the applicant must submit his current Louisiana driver's license, if he has one, or his birth certificate, or other documentation which

030194

reasonably and sufficiently establishes the applicant's identity, age, and residency. La. R.S. §18:105 (2005).

- **At polls:**
  - All voters must identify themselves by stating their name and address to the commissioner. La. R.S. §18:562(A)(1) (2005).
  - Each voter must also provide identification. La. R.S. §18:562(A)(2) (2005).
- **Early voting/Absentee voting:**
  - Before any voter is allowed to vote during early voting, the voter is required to submit his Louisiana driver's license, his current registration certificate, or other identification card to compare with the descriptive information on the precinct register. La. R.S. §18:1309(D)(1) (2005).
- **First time voters or all?**
  - All voters. La. R.S. §18:562 (2005).
- **When?**
  - At polls. La. R.S. §18:562 (2005).
- **What types of ID?**
  - Louisiana driver's license, Louisiana special identification card issued pursuant to R.S. §40:1321, or other generally recognized picture identification card. La. R.S. §18:562(A)(2) (2005).
  - In addition, the applicant's signature on the precinct register should be compared to his signature on his picture identification. La. R.S. §18:652(C) (2005).
- **State or federal elections?**
  - Both. La. R.S. §18:562 (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Regular ballot. La. R.S. §18:562(A)(2) (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Voters who have no picture ID and bring only a utility bill, payroll check or government document that includes their name and address will have to sign an affidavit furnished by the Elections Division in order to vote. La. R.S. §18:562(A)(2) (2005).
  - The applicant shall provide further identification by presenting his current registration certificate, giving his date of birth or providing other information stated in the precinct register that is requested by the commissioner. La. R.S. §18:562 A(2) (2005).
- **Challenge available at polls?**
  - Yes. La. R.S. §18:565 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Maine

---

### Maine

#### Summary:

Maine law allows for in person registration and registration by mail. It also allows voters to register up until and on election day. Me. Rev. Stat. Ann. tit. 21-A, § 122 (2004). However, any voter registering nine or less days prior to an election (Federal or State) or on election day must register in person and show proof of identity and residency. Me. Rev. Stat. Ann. tit. 21-A, § 121 (2004). Otherwise, the voter must only complete an application including his/her name; address; date of birth; signature; and driver's license, state identification number or social security number (if the voter has one of these). Me. Rev. Stat. Ann. tit. 21-A, § 152 (2004). There is no identification requirement for voters at the polls beyond HAVA. At the polls, voters that have satisfied HAVA's requirements must only announce their name and address in order to vote. Me. Rev. Stat. Ann. tit. 21-A, § 671 (2004).

The types of identification that are permissible as proof of residency or identity for in person registrants are not specifically stated, but I would assume the requirements are fairly liberal since no specific types are enumerated or suggested on the Secretary of State's website. Maine permits all types of identification permissible under HAVA in order to meet the HAVA requirements for identification. Further, HAVA seems to apply to State and Federal elections in Maine, as the Secretary of State updated the State's registration form and included a disclaimer that voters must submit identification with their registration. Mathew Dunlap, Secretary of State, State of Maine Voter Guide 2004 (2004), at <http://www.maine.gov/sos/cec/elec/votguid04.htm>; State of Maine Preliminary State Plan for the Implementation of the Help America Vote Act of 2002, 17, at <http://www.maine.gov/sos/cec/elec/hava/havaplan.doc>. The disclaimer makes no distinction between Federal and State elections. *Id.*

Without identification at the polls (does not matter if registering at polls or required by HAVA) a voter may vote a challenged ballot. Me. Rev. Stat. Ann. tit. 21-A, § 673 (2004). There is no pending legislation concerning voter identification.

#### • Statute:

- Me. Rev. Stat. Ann. tit. 21-A, § 671 (2004).
- Me. Rev. Stat. Ann. tit. 21-A, § 152 (2004).
- Me. Rev. Stat. Ann. tit. 21-A, § 121 (2004).
- Me. Rev. Stat. Ann. tit. 21-A, § 122 (2004).
- **Passed:**
  - § 671 – 1985 (at least)
  - § 152 – 1985 (at least); 2003 added a place on registration form for HAVA information

030198

- § 121 – 1985; 1993 added provision requiring identification for voters registering close to election; 1999 established 9 days as time period which requires in-person registration and proof of identity and residency
  - § 122 – 1985 – added election day registration provision; the in-person registration language has been in the Code at least that long, possibly since 1954.
- **Session law:** none
- **Pending legislation:** none
- **Case law (from annotations):** none
- **Administrative regulations:** nothing in administrative code on voter identification.
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - Not if the registration is received at least 10 days prior to the election, only name, address, date of birth, signature, and driver’s license, state identification number or social security number (if applicable) are required. Me. Rev. Stat. Ann. tit. 21-A, § 152 (2004).
        - Maine law allows in person registration up until and including election day. Me. Rev. Stat. Ann. tit. 21-A, § 122 (2004). Anyone who registers nine or less days prior to election day or on election day must register in person and must show proof of identity and residency. Me. Rev. Stat. Ann. tit. 21-A, § 121 (2004).
    - **At polls:**
      - No, a voter must only announce his/her name and, if asked, his address. Me. Rev. Stat. Ann. tit. 21-A, § 671 (2004).
    - HAVA requirements, of course, apply.
  - **First time voters or all?**
    - The registration identification requirements obviously apply only to new registrants.
    - There are no requirements for identification at the polls applying to all voters in Maine.
  - **When?**
    - There are only identification requirements for registration, not prior to voting.
  - **What types of ID?**
    - For the registration within nine days of election day or on election day – no types are specified.
    - HAVA – all types permissible under HAVA. (see below)
  - **State or federal elections?**
    - The provisions requiring identification for registration within nine days of election day apply to all elections. Me. Rev. Stat. Ann. tit. 21-A, § 121 (2004).
    - **HAVA:** seems to apply to all elections. Maine law designated the Secretary of State as the authority for promulgating rules complying with HAVA. Me. Rev. Stat. Ann. tit. 21-A, § 222 (2004). The Secretary of State updated Maine’s registration form to comply with the HAVA identification

requirements for mail-in registrants by placing a disclaimer on the form that the voter must submit a copy of a Maine driver's license or other valid photo ID, a current utility bill, or bank statement, or paycheck, or other government document that shows the voter's name and address with the registration. Mathew Dunlap, Secretary of State, State of Maine Voter Guide 2004 (2004), at <http://www.maine.gov/sos/cec/elec/votguid04.htm>; State of Maine Preliminary State Plan for the Implementation of the Help America Vote Act of 2002, 17, at <http://www.maine.gov/sos/cec/elec/hava/havaplan.doc>.

- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - If the voter registers nine or less days prior to the election or on election day and has no proof of residency and identity, the voter must cast a challenged ballot. Me. Rev. Stat. Ann. tit. 21-A, § 121 (2004).
  - If the voter is subject to HAVA identification requirements but does not provide identification, the voter must also cast a challenged ballot. State of Maine Preliminary State Plan for the Implementation of the Help America Vote Act of 2002, 17, at <http://www.maine.gov/sos/cec/elec/hava/havaplan.doc>.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Challenged ballot, subject to normal challenged ballot rules. Nothing for voter to do post-election. In fact, challenged ballots are counted the same as regular ballots unless they affect the outcome of the election. Me. Rev. Stat. Ann. tit. 21-A, § 696 (2004).
- **Challenge available at polls?**
  - Yes, any voter of the municipality may challenge any other voter for cause. The voter then votes a challenged ballot. Me. Rev. Stat. Ann. tit. 21-A, § 673 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 23, 2005  
**RE:** States for ID requirements chart: Maryland

---

### Maryland

#### Summary:

Maryland law does not require any identification beyond the HAVA requirements for first time registrants who register by mail. Md. Regs. Code tit. 33, § 05.02.02 (2005); Md. Regs. Code tit. 33, § 07.06.01 (2005). The types of identification permitted are the same as permitted under HAVA. Md. Regs. Code tit. 33, § 05.02.02 (2005); Md. Regs. Code tit. 33, § 07.06.02 (2005). Maryland applies this standard to State and Federal elections. Md. Regs. Code tit. 33, § 05.02.02 (2005); Md. Regs. Code tit. 33, § 07.06.01 (2005). Without identification at the polls or registration, a new voter may vote a provisional ballot but must bring identification before the canvass begins in order for the vote to be counted. Md. Code Ann., Elec. Law § 11-303 (d)(4)(iii) (2005).

Recently, Maryland passed a law altering State election law to comply with the voter registration list requirements of HAVA, but the law does not address the identification provisions of HAVA. 2005 Md. Laws 572. There are three bills pending in the House which would require identification at the polls. HB 105, 419<sup>th</sup> Sess., Reg. Sess. (Md. 2005); HB 1279, 419<sup>th</sup> Sess., Reg. Sess. (Md. 2005); HB 1166, 419<sup>th</sup> Sess., Reg. Sess. (Md. 2005).

- **Statutes:** none concerning HAVA's identification requirements or identification at polls.
- **Administrative regulations:**
  - Md. Regs. Code tit. 33, § 05.02.02 (2005).
  - Md. Regs. Code tit. 33, § 07.06.01 (2005).
  - Md. Regs. Code tit. 33, § 07.06.02 (2005).
  - Md. Regs. Code tit. 33, § 07.06.05 (2005).
- **Session law/recent legislation passed:**
  - 2005 Md. Laws Ch. 572: Altering State election law to comply with the voter registration list requirements of the Help America Vote Act of 2002; establishing a statewide voter registration list; requiring the State Administrator of Elections to perform specified tasks; establishing when specified voters are restored to active status; altering requirements to challenge special actions of local election boards; providing for a delayed effective date; but not enacting identification provision [5/26/05 signed by governor]
    - Bill HB 723
- **Pending legislation:**
  - HB 1166, 419<sup>th</sup> Sess., Reg. Sess. (Md. 2005): would require proof of citizenship at registration – birth certificate, passport, or naturalization documents; require that voters present a voter identification card at the polls. [3/7/05 reported from committee unfavorably]
  - HB 1279, 419<sup>th</sup> Sess., Reg. Sess. (Md. 2005): would require identification at the polls from all voters in the form of a driver's license, state identification card, or voter identification card. If the voter has none of those, they may present any

030199

other government-issued identification that has the voter's name, address, and date of birth; or, the voter may state the month and day of his/her birth and have it verified against the precinct register. [3/7/05 reported from committee unfavorably]

- HB 105, 419<sup>th</sup> Sess., Reg. Sess. (Md. 2005): would require identification at the polls from all voters in the form of a driver's license, state identification card, or voter identification card. If the voter has none of those, they may present any other government-issued identification that has the voter's name, address, and date of birth; or, the voter may state the month and day of his/her birth and his address and have it verified against the precinct register. [3/26/05 reported from committee unfavorably]
- **Case law (from annotations):** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - HAVA requirements: provide driver's license number, MVA identification card, or last four digits of social security number OR identification (see below for forms). Md. Regs. Code tit. 33, § 05.02.02 (2005); Md. Regs. Code tit. 33, § 07.06.01 (2005).
    - **At polls:**
      - Orally state month and day of birth and compare it to precinct register; verify address. Md. Code Ann., Elec. Law § 10-310 (2005).
  - **First time voters or all?**
    - Just first time voters – no requirement beyond HAVA. Md. Regs. Code tit. 33, § 07.06.01 (2005).
  - **When?**
    - At registration or at polls. Md. Regs. Code tit. 33, § 05.02.02 (2005).
  - **What types of ID?**
    - A copy of a current and valid photo identification (i.e., Maryland driver's license, MVA-issued identification card, student photo identification card, or employee photo identification card).
    - OR
    - A copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the voter's name and address.
    - Md. Regs. Code tit. 33, § 05.02.02 (2005); Md. Regs. Code tit. 33, § 07.06.02 (2005).
  - **State or federal elections?**
    - No distinction made between requirements for State or Federal elections. Md. Regs. Code tit. 33, § 05.02.02 (2005); Md. Regs. Code tit. 33, § 07.06.01 (2005).
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Provisional ballot. Md. Code Ann., Elec. Law § 9-404 (b)(2)(iii) (2005); Md. Regs. Code tit. 33, § 07.06.05 (2005).

- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Provide identification before canvass begins. Md. Code Ann., Elec. Law § 11-303 (d)(4)(iii) (2005); Maryland State Board of Elections Webpage, [http://www.elections.state.md.us/registered\\_voters/election\\_day\\_faq.html](http://www.elections.state.md.us/registered_voters/election_day_faq.html).
- **Challenge available at polls?**

Yes. Md. Code Ann., Elec. Law § 10-311 (2005); Md. Code Ann., Elec. Law § 10-312 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 27, 2005  
**RE:** States for ID requirements chart: Massachusetts

---

### Massachusetts

#### Summary:

Massachusetts does not require any identification beyond HAVA for voters who register by mail and are voting for the first time in a federal election. Mass. Gen. Laws ch. 54, §76B (2005). They must present identification either at the polls or at registration or supply their driver's license or social security number on their registration form. *Id.* The forms of acceptable identification are the same as under HAVA, and this requirement seems to apply only to federal elections. Mass. Gen. Laws ch. 54, § 76B (b)(2)(A)(a) (2005); Mass. Gen. Laws ch. 54, § 76B (b)(1) (2005). Without proper identification, the voter may execute an affidavit and vote a provisional ballot. Mass. Gen. Laws ch. 54, § 76B (b)(2)(B)(i) (2005); Mass. Gen. Laws ch. 54, § 76C (b) (2005).

Massachusetts law also allows for election officials to request identification of any voter randomly or based on reasonable suspicion. Mass. Regs. Code tit. 950, § 52.03 (2005); Mass. Regs. Code tit. 950, § 53.03 (2005); Mass. Regs. Code tit. 950, § 54.04 (2005). This requirement applies to all voters, not just new registrants. *Id.* Upon request, the voter must produce written identification, which includes: driver's license, recent utility bill, rent receipt, lease, voter registration affidavit copy, or any other printed identification which contains the voter's name and address. *Id.* If the voter does not provide the identification, he may vote normally but may be challenged. *Id.*

There are several pending bills which concern voter identification. HB 92, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005) would apply HAVA to all elections, rather than just federal elections. HB 46, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005) would require voters to recite their date of birth (in addition to name and residence) prior to voting. HB 51, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005) would require all voters to provide government-issued identification prior to voting with no allowance for provisional ballots. HB 112, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005) is similar to HB 51 but allows the voter to satisfy the identification requirement with an employee identification card. HB 132, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005) requires identification of all voters but allows many more forms of identification than HB 51 or 112.

- **Statutes:** Mass. Gen. Laws ch. 54, § 76B (2005).
  - **Passed:** 2004
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - HB 46, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005): requires voters to state their name, residence, and date of birth prior to voting (date of birth added by the bill) [1/26/05 introduced and referred to committee]
  - HB 51, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005): rewrites § 76B and § 76, requiring identification for all voters prior to voting, which includes a Massachusetts driver's license, an official Massachusetts photo identification card,

030202

a United States passport, or a Social Security card; does not provide for provisional balloting system for those without identification. [1/26/05 introduced and referred to committee]

- HB 92, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005): applies HAVA requirements to all elections, primaries, caucuses, and preliminaries, not just federal elections. [1/26/05 introduced and referred to committee]
- HB 112, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005): rewrites § 76B and § 76, requiring identification for all voters at the polls, which includes a voter registration card, social security card, valid Massachusetts drivers license, or any other identification card issued by a government agency, or any valid employee identification card containing a photograph of the voter; provides for no provisional balloting system for those without identification. [1/26/05 introduced and referred to committee]
- HB 132, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005): rewrites § 76B completely, requiring identification for all voters at the polls including: a valid driver's license, birth certificate, fishing or hunting license, student identification card from a post-secondary education institution in the Commonwealth or such other documentation which establishes the applicant's identity, age and residency. [1/26/05 introduced and referred to committee]
- **Case law (from annotations):** none
- **Administrative regulations:**
  - Mass. Regs. Code tit. 950, § 52.03 (2005): Voting procedure and challenges for precincts using paper ballots.
  - Mass. Regs. Code tit. 950, § 53.03 (2005): Voting procedure and challenges for precincts using voting machines.
  - Mass. Regs. Code tit. 950, § 54.04 (2005): Voting procedure and challenges for precincts using electronic voting systems.
- **What the law requires:**
  - **Is ID required?**
    - **For registration/at polls/HAVA requirements:**
      - Must present identification either with registration or at polls prior to voting unless the voter supplied his/her driver's license number or social security number on his/her registration form. Mass. Gen. Laws ch. 54, § 76B (2005).
    - **At polls/all voters:**
      - State name and address, if requested. Mass. Gen. Laws ch. 54, § 76 (2005); Mass. Regs. Code tit. 950, § 52.03 (2005); Mass. Regs. Code tit. 950, § 53.03 (2005); Mass. Regs. Code tit. 950, § 54.04 (2005).
      - **Id at polls for all:** The election officers may ask for written identification randomly or based on reasonable suspicion. Mass. Regs. Code tit. 950, § 52.03 (2005); Mass. Regs. Code tit. 950, § 53.03 (2005); Mass. Regs. Code tit. 950, § 54.04 (2005).
  - **First time voters or all?**
    - **HAVA requirements:** First time voters who have not previously voted in an election for federal office. Mass. Gen. Laws ch. 54, § 76B (b)(1)(b) (2005).

- **At polls/random ID checks:** However, all voters are subject to random identification checks or checks based on reasonable suspicion. Mass. Regs. Code tit. 950, § 52.03 (2005); Mass. Regs. Code tit. 950, § 53.03 (2005); Mass. Regs. Code tit. 950, § 54.04 (2005).
  - **When?**
    - **HAVA requirement:** Either at registration or at polls. Mass. Gen. Laws ch. 54, § 76B (2005).
  - **What types of ID?**
    - **For HAVA / new registrants who registered by mail:**
      - Current and valid photo identification.
      - OR
      - Current utility bill, bank statement, government check, paycheck, or government document that shows the name and address of the voter.
      - Mass. Gen. Laws ch. 54, § 76B (b)(2)(A)(a)(2005).
    - **For ID at polls for all voters upon request (random checks):**
      - Driver's license, recent utility bill, rent receipt, lease, voter registration affidavit copy, or any other printed identification which contains the voter's name and address. Mass. Regs. Code tit. 950, § 52.03 (2005); Mass. Regs. Code tit. 950, § 53.03 (2005); Mass. Regs. Code tit. 950, § 54.04 (2005).
  - **State or federal elections?**
    - **HAVA:** Language of statute says "a person asserting a right to vote in an election for federal office," and implies that it applies to federal elections only. Mass. Gen. Laws ch. 54, § 76B (b)(1) (2005).
      - *See also* HB 92, which strikes this language and applies the identification requirement to all elections. HB 92, 184<sup>th</sup> Gen. Ct., 2005 Reg. Sess. (Mass. 2005).
    - **Random checks of all voters at polls:** applies to all elections.
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - **HAVA:** Provisional ballot. Mass. Gen. Laws ch. 54, § 76B (b)(2)(B)(i) (2005).
    - **Random ID checks of all voters at polls:** If the voter does not provide identification, the voter may still vote but can be challenged. Mass. Regs. Code tit. 950, § 52.03 (2005); Mass. Regs. Code tit. 950, § 53.03 (2005); Mass. Regs. Code tit. 950, § 54.04 (2005).
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - A voter subject to HAVA who does not provide identification may sign an affidavit and vote provisionally. Mass. Gen. Laws ch. 54, § 76C (b) (2005).
  - **Challenge available at polls?**
    - Yes. Mass. Gen. Laws ch. 54, § 85A (2005); Mass. Regs. Code tit. 950, § 52.03 (2005); Mass. Regs. Code tit. 950, § 53.03 (2005); Mass. Regs. Code tit. 950, § 54.04 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Michigan

---

### Michigan

#### **Summary:**

Michigan law requires that certain information be supplied on the registration form, including the voter's state identification card or driver's license number (if the voter has one), but does not require any identification for registration. Mich. Comp. Laws Ann. § 168.495 (2005). At the polls and registration, Michigan does not require any identification beyond the requirement for first time voters in Federal elections. Mich. Comp. Laws Ann. § 168.509t (2) (2005).

In 1996, Michigan enacted a statute requiring photo identification for all voters prior to voting. Mich. Comp. Laws Ann. § 168.523 (2005). However, immediately after its passage, the Attorney General declared that the statute violated the Equal Protection Clause of the Fourteenth Amendment. Op. Atty. Gen. 1997, No. 6930. That decision is binding on all state agencies.

Michigan's provisional ballot rules for voters without identification under HAVA have been recently challenged. *Bay County Democratic Party v. Land*, 347 F. Supp. 2d 404 (E.D. Mich. 2004). Michigan requires that first-time voters without the identification required by HAVA vote provisionally and must return with identification within six days after the election in order for their vote to be counted. *Id.* The District Court ruled that the requirement was valid under the First and Fourteenth Amendments and under HAVA and Federal law. *Id.*

- **Statute:**
  - Mich. Comp. Laws Ann. § 168.495 (2005).
  - Mich. Comp. Laws Ann. § 168.509t (2005).
  - **Passed:**
    - § 168.495 – 1954, has been refined over time, but requirement since 1954.
    - § 168.509t – 1994 recognized registration by mail contingent on NVRA being constitutional; HAVA compliant portion added in 2004.
- **Session law:** none
- **Pending legislation:** HB 4228, 93<sup>rd</sup> Legis., 1<sup>st</sup> Reg. Sess. (Mich. 2005)(changing the name of the registration from “affidavit” to “application”) [referred to House Committee 2/8/05]
- **Case law (from annotations):**
  - *Bay County Democratic Party v. Land*, 347 F. Supp. 2d 404 (E.D. Mich. 2004): requirement that a voter without identification under HAVA on election day return with proper identification within six days after the election in order for his/her vote to be counted does not violate First or Fourteenth Amendment rights or violate HAVA or other Federal law.
  - Op. Atty. Gen. 1997, No. 6930: declaring photo identification requirement statute unconstitutional – Opinion binding on State agencies.
- **Administrative regulations:** none

030206

- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - Registration affidavit required, which must contain name, address, birthplace, date of birth, driver's license or state identification card number (if the voter has one), statement that the voter is a citizen of the U.S., statement that the voter is or will be eighteen, statement that the voter has lived or will have lived in the state for thirty days prior to the election. Mich. Comp. Laws Ann. § 168.495 (2005).
    - **At polls:**
      - Any voter who registered by mail and is voting for the first time must vote in person and must provide identification (essentially HAVA). Mich. Comp. Laws Ann. § 168.509t (2) (2005).
      - Otherwise, voters do not have to meet any identification requirement at the polls. Mich. Comp. Laws Ann. § 168.736 (2005).
    - **Invalid statute:**
      - In 1996, Michigan passed a law requiring official state identification card, driver's license, or other generally recognized picture identification card (which must include name and residence address) be shown prior to receiving a ballot; without such identification, the voter must execute an affidavit and vote a challenged ballot. Mich. Comp. Laws Ann. § 168.523 (2005).
      - However, immediately after its passage, the law's validity was challenged. The Attorney General declared that the law violated the Equal Protection Clause of the Fourteenth Amendment. Op. Atty. Gen. 1997, No. 6930.
      - The rationale for doing so was that voting is a fundamental right, and the law is not "necessary" to prevent voter fraud, even though preventing voter fraud is a "compelling" interest. *Id.* The Attorney General felt that the qualified voter file, criminal penalties for voting fraud, and required affidavits were sufficient to prevent voter fraud. *Id.* In Michigan, Attorney General Opinions are binding on all state agencies, and this opinion was never overruled by a court. Thus, it is binding on election officials. However, the provision is still in Michigan's Code and has not been repealed.
  - **First time voters or all?**
    - First time voters.
  - **When?**
    - Identification must be provided at registration or at polls – HAVA requirements.
  - **What types of ID?**
    - Same types listed in § 303 (b) of HAVA. Mich. Comp. Laws Ann. § 168.509t (2) (2005).  
Types allowed:
      - Driver's license with photo (any state); personal identification card with photo (any state); government issued photo identification

card; passport; student identification card with photo; credit or automated teller card with photo; military identification card with photo; employee identification with photo. Memorandum from Terry Lynn Land, Secretary of State (Oct. 13, 2004), [http://www.michigan.gov/documents/Fed\\_ID\\_Req\\_105890\\_7.pdf](http://www.michigan.gov/documents/Fed_ID_Req_105890_7.pdf).

- A paycheck or paycheck stub from any employer issued within the last year; a Social Security Administration check statement issued within the last year; government or military paycheck or paycheck stub issued within the last year; tax return check or check statement issued by the IRS or the State of Michigan within the last year; a gas, telephone, electric, water, cable or other utility bill issued within the last year; a statement from a bank or credit union dated within the last year; vehicle registration; Electronic Benefit Transaction (EBT) card; Department of Social Services (DSS) card; insurance card issued pursuant to a government administered or subsidized health insurance program such as Medicare or Medicaid; veteran's identification card; lease agreement provided under a public housing program or subsidized housing program; public housing identification card; tuition statement or bill from a public college or university; correspondence or a bill received from a federal, state or local government; discharge certificate, release papers, pardon, or other official document issued to the voter in connection with the resolution of a criminal case, indictment, sentence or other matter, in accordance with state law; discount card issued by a public transportation authority or a provider to senior citizens or persons with disabilities; marriage license. Memorandum from Terry Lynn Land, Secretary of State (Oct. 13, 2004), [http://www.michigan.gov/documents/Fed\\_ID\\_Req\\_105890\\_7.pdf](http://www.michigan.gov/documents/Fed_ID_Req_105890_7.pdf).
- **State or federal elections?**
  - Appears to be federal only since § 168.509t only requires identification "as required under section 303(b) of the help America vote act of 2002." Mich. Comp. Laws Ann. § 168.509t (2) (2005).
  - Also the Memorandum from the Secretary of State only refers to it as a "federal" requirement. Memorandum from Terry Lynn Land, Secretary of State (Oct. 13, 2004), [http://www.michigan.gov/documents/Fed\\_ID\\_Req\\_105890\\_7.pdf](http://www.michigan.gov/documents/Fed_ID_Req_105890_7.pdf).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Memorandum from Terry Lynn Land, Secretary of State (Oct. 13, 2004), [http://www.michigan.gov/documents/Fed\\_ID\\_Req\\_105890\\_7.pdf](http://www.michigan.gov/documents/Fed_ID_Req_105890_7.pdf).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Provide identification permitted under HAVA within six days after election.

030208

- **Challenge available at polls?**
  - Yes, and poll challengers permitted as well. Mich. Comp. Laws Ann. § 168.727 – 168.730 (2005).
- **Miscellaneous:**
  - Uses verification postcards, if returned by postal service, no registration. Mich. Comp. Laws Ann. § 168.500c (2005).
  - Already uses qualified voter file.

030209

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Minnesota

---

### Minnesota

#### Summary:

Minnesota requires identification prior to a voter being registered. Minn. Stat. § 201.061 (1) (2004). A mailed registration lacking identification or unique identifier (either social security number, state identification card number or driver's license number) is considered incomplete and does not register the voter. *Id.* Technically, Minnesota law requires a photo identification (driver's license, state identification card, passport, or student identification card) and if the address is not correct on that identification, another document with the voter's current address (tuition bill or utility bill). Minn. Stat. § 201.061 (3) (2004). Native Americans are permitted to show a tribal identification card with name, address and signature (requirement modified by law below). *Id.* As an alternative to formal identification, all registered voters are allowed to vouch for another voter's identity and residency and sign an affidavit to that effect. *Id.* These identification requirements only apply to new registrants and apply to all elections. Minnesota does not require any identification prior to voting; the voter must simply sign the register, attesting to his/her eligibility to vote. Minn. Stat. § 204C.10 (2004).

Minnesota just passed a new law regarding voter identification. 2005 Minn. Sess. Law Serv. Ch. 156, sec. 15, 45, § 201.061, § 204C.10 (West). The law allows employees of residential facilities (apartments, nursing homes, etc.), in addition to other voters, to vouch for the identity and address of residents of the facility and also limits the number of persons a voter (but not residential facility employees) may vouch for to fifteen. *Id.* The law also changes the affidavit used when a voter vouches for another voter and loosens the requirements for using a tribal identification card as identification. *Id.* It also changes the language of the affidavit the voter must sign prior to voting relating to felony disenfranchisement. *Id.*

Minnesota has many bills pending concerning voter identification requirements; however, many of the bills were considered settled in passing the recent voter identification law. Minnesota has considered a variety of changes to voter identification including requiring photo identification for all voters prior to voting as well as loosening the identification requirements for registration of new voters.

- **Statute:**
  - Minn. Stat. § 201.061 (2004).
  - Minn. Stat. § 204C.10 (2004).
  - **Passed:**
    - § 201.061 – At least since 1977.
    - § 204C.10 – 1981.
- **Session law:** 2005 Minn. Sess. Law Serv. Ch. 156, sec. 15, 45, § 201.061, § 204C.10 (West).
  - Bill: HF 1481, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(enacted).

030210

- § 204C.10: Changed language of affidavit voter must sign prior to voting concerning felony disenfranchisement – attesting that voter is not a felon.
- § 201.061: Changes provision concerning one voter vouching for another; allows an employee of a residential facility to vouch for a resident of the facility; limits the number of persons a voter may vouch for to fifteen; more specifics on content of affidavit vouching for a voter; tribal members using tribal identification card as identification not required to live on reservation.
- **Pending legislation:** bills considering adding a photo identification requirement for all voters and some bills considering loosening identification requirements for registration.
  - Both § 204C.10 & § 201.061
    - **HF 1443**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(requiring photo identification for all voters at polls & requiring proof of U.S. citizenship at registration) [House committee 3/3/05]
      - Companion Bill: SF 923
    - **SF 923**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(requiring photo identification for all voters at polls & requiring proof of U.S. citizenship at registration) [Senate committee 2/10/05]
      - Companion Bill: HF 1443
    - **SF 2266**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(adds utility bill, residential lease, bank statement, government check, paycheck, or other government document that shows the name and valid residential address of the voter to the list of valid forms of identification; loosens requirements for students – not requiring a photo ID with address ID; adds landlord to list of persons who can vouch for a voter; tribal members using tribal identification card as identification not required to live on reservation; changes language of felony disenfranchisement on voting affidavit) [first reading 4/26/05; second reading 4/27/05; amended 4/29/05; third reading & passed 4/29/05; HF 1481 substituted by motion 4/29/05]
      - HF 1481 substituted which was passed and signed into law.
    - **SF 1551**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(lengthening the time by which state agencies must forward voter registration applications to the secretary of state; adds utility bill, residential lease, bank statement, government check, paycheck, or other government document that shows the name and residential address of the voter to the list of valid identifications when presented in conjunction with a current photo identification and adds student lease (in conjunction with a photo identification) to list of valid identifications; adds landlord to list of persons who can vouch for a voter; changes language of felony disenfranchisement on voting affidavit) [Senate committee 3/10/05; referred to another committee 3/29/05; referred to another committee 4/7/05]
      - Absorbed into HF 1481, which was passed and signed into law.
      - Companion Bill: HF 2226
    - **HF 2342**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(eliminates requirement that tribal members using tribal identification card live on reservation; changes language of felony disenfranchisement on voting affidavit) [House committee 4/6/05]
      - Essentially accomplished through HF 1481
    - **SF 386**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005) (eliminates requirement that tribal members using tribal identification card live on reservation; changes language of

felony disenfranchisement on voting affidavit) [House committee 1/19/05; second reading 2/3/05; referred back to committee 2/3/05]

- Absorbed into HF 1481, which was passed and signed into law.

§ 204C.10 only

- **HF 1494**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(requires all voters to present picture ID, document issued by the State of Minnesota or US government, or tribal ID with name, address and date of birth prior to voting at polls– without identification, voter may execute affidavit and vote a regular ballot) [House committee 3/3/05]

201.061 only

- **HF 1785**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(eliminates requirement that tribal members using tribal identification card live on reservation) [House committee 3/14/05; second reading 4/11/05; referred back to committee 5/23/05]
  - Essentially accomplished through HF 1481
  - Companion Bill: SF 1692
- **HF 2226**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(lengthening the time by which state agencies must forward voter registration applications to the secretary of state; adds utility bill, residential lease, bank statement, government check, paycheck, or other government document that shows the name and residential address of the voter to the list of valid identifications when presented in conjunction with a current photo identification; adds student lease (in conjunction with a photo identification) to list of valid identifications) [House committee 3/30/05; second reading in House 4/18/05; referred back to committee 5/23/05]
  - Companion Bill: SF 1551
- **SF 852**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(adds current utility bill, residential lease, wireless telephone bill, bank statement, government check, paycheck, or other government document that shows the name and valid residential address of the voter to the list of acceptable identifications; loosens student identification requirements – not requiring an accompanying photo identification with address verification; eliminates requirement that tribal members using tribal identification card live on reservation) [first reading 2/10/05; referred to committee 2/10/05; second reading & returned to committee 3/29/05]
  - Absorbed into HF 1481, which was passed and signed into law.
  - Companion Bill: HF 975
- **HF 2099**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(limiting the number of voters that a person may vouch for to three) [House committee 3/23/05; second reading 4/7/05; referred back to committee 5/23/05]
- **HF 975**, 84<sup>th</sup> Legis. Sess., Reg. Sess. (Minn. 2005)(adds current utility bill, residential lease, wireless telephone bill, bank statement, government check, paycheck, or other government document that shows the name and valid residential address of the voter to the list of acceptable identifications; loosens student identification requirements – not requiring an accompanying photo identification with address verification; eliminates requirement that tribal members using tribal identification card live on reservation) [House committee 2/10/05]

- Companion Bill: SF 852
- **Case law (from annotations):**
  - *State v. Board of Educ. of City of Duluth*, 197 N.W. 964 (Minn. 1924): registration requirement as a prerequisite to voting is constitutional.
- **Administrative regulations:**
  - Minn. R. 8200.2900 (2004): deficient registration procedures – deficient registration is not a “challenged” voter, not registered.
  - Minn. R. 8200.3100 (2004): incomplete registrations – procedure for completing registration; notification.
  - Minn. R. 8200.3200 (2004): persons exempt from identification requirement – same as HAVA
  - Minn. R. 8200.5500 (2004): procedure & requirements for election day registration including identification requirements
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - Minnesota modifies HAVA and requires a copy of identification be submitted with the mailed registration or driver’s license or social security number be provided on the registration form (which must be able to be verified against other state records). If not, the voter may:
        - Provide identification more than twenty days prior to the election to the county auditor
        - Register in person on election day
        - Provide proof of residence at the polls
        - Minn. Stat. § 201.061 (1) (2004).
    - **At polls:**
      - No, not unless for election day registration.
      - At polls, voter must only sign register, attesting to the fact that the voter is eligible to vote, and may be required to verify name, address, and date of birth. Minn. Stat. § 204C.10 (2004).
  - **First time voters or all?**
    - First time voters only – who did not provide either form of identification verification (DL or SS number or a copy of identification) with their mailed in registration. Minn. Stat. § 201.061 (2004).
  - **When?**
    - At registration technically because without identification the voter is not registered at all. Minn. Stat. § 201.061 (1a) (2004); Minn. R. 8200.2900 (2004).
  - **What types of ID?**
    - Driver’s license or Minnesota state identification card with current address (or bring utility bill with correct address together with driver’s license); passport with utility bill with current address; student identification card with current address; tuition bill in combination with photo identification card; affidavit by another registered voter vouching for the voter; tribal identification card with name, address and signature; and other identification forms approved by the Secretary of State. Minn. Stat. § 201.061 (3) (2004); Minnesota Secretary of

030213

State, Polling Place Posters (2004), <http://www.sos.state.mn.us/election/PollingPlacePosters.pdf>.

- **State or federal elections?**
  - Appears to apply to all elections, no distinction made in statute.
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Voter is not registered. See Minn. Stat. § 201.061 (2004); Minn. R. 8200.2900 (2004).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Cannot vote, not registered. See Minn. Stat. § 201.061 (2004); Minn. R. 8200.2900 (2004).
- **Challenge available at polls?**
  - In a partisan election, each party gets one challenger at the polls; in a nonpartisan election, each candidate gets one challenger at the polls. Minn. Stat. § 204C.07 (2004).
- **Miscellaneous:**
  - Has postcard verification; if postcard returned, voter's status is changed to "challenged" and must comply with challenged voter rules. Minn. Stat. § 201.12 (2004).
  - Mail balloting permitted in municipal, county and state elections in small municipalities or unorganized portions of a county. Minn. Stat. § 240B.45 (1) (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Mississippi

---

### Mississippi

**Citation:**

I was not sure how to cite some of these documents, but they are all included with the Mississippi sources. [ID requirement poster & 3 Administrative Procedures titled – “Mississippi Guide to Elections – 2004”]

**Summary:**

Mississippi has no statutes in its Code concerning voter identification specifically. Prior to HAVA, Mississippi did not require any identification to register or vote. Since HAVA, Mississippi delegated the authority to promulgate rules complying with HAVA to the Secretary of State. Miss. Code Ann. § 23-15-169.5 (2004). By rule, Mississippi has taken the HAVA requirements and applied them to State and Federal elections. Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster). Essentially, the exact same rules apply, and the same forms of identification are acceptable. *Id.*; ID poster from Secretary of State – Elections website – [http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted\\_ID.jpg](http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted_ID.jpg). If a voter lacks identification at the polls and did not provide it with his/her registration, the voter may cast an “affidavit ballot,” which is very similar to a provisional ballot. Mississippi Guide to Elections – 2004, July 12, 2004; ID poster from Secretary of State – Elections website – [http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted\\_ID.jpg](http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted_ID.jpg).

At the polls, voters need only to state their name prior to voting, except for new registrants that did not provide identification with their registration. Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster).

Mississippi considered voter identification extensively in its last session, but ultimately, all bills introduced died in committee. Shelia Byrd, *Deadline Expires on Voter ID Bill – Changes in Marriage License Law Also Won't Be Made*, Memphis Commercial Appeal, March 2, 2005. This issue is expected to reemerge as a hot topic in the legislature's next session. *Id.*

- **Statute:**
  - None concerning voter ID specifically, but, prior to HAVA, Mississippi did not require any identification for registration or voting.
  - **Passed:** N/A
- **Session law:** none
- **Pending legislation:**
  - Several bills concerning voter identification, some requiring photo identification, were introduced in the 2005 Session but all died in committee because of the March 1, 2005 deadline for pending bills to either pass the other chamber or die in committee: HB 1045, SB 2067, SB 2634, SB 2910, HB 1421, HB 1045, HB 996,

030216

HB 434, SB 2123, HB 345, HB 361, HB 185. – However, many similar proposals are expected to reemerge in the next session.

- **Case law (from annotations):** none
- **Administrative regulations:** No formal administrative code in Mississippi but the Secretary of State has the power to promulgate rules and has promulgated a series of rules implementing HAVA. (three relevant ones enclosed)
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - Yes, but not beyond HAVA requirements except that it applies to all elections. Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster).
    - **At polls:**
      - Nothing beyond HAVA requirements for new registrants; all other voters must simply state their name. Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster).
  - **First time voters or all?**
    - First time voters/new registrants only. Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster).
  - **When?**
    - Same as HAVA – either at registration or at polls. Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster).
  - **What types of ID?**
    - Photo ID
    - Utility bill with name and address
    - Bank statement with name and address
    - Paycheck with name and address
    - Any other government document with name and address
    - Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster); ID poster from Secretary of State – Elections website - [http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted\\_ID.jpg](http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted_ID.jpg).
  - **State or federal elections?**
    - Both, Mississippi's Secretary of State has promulgated several rules implementing HAVA's requirements for all elections in Mississippi. Mississippi Guide to Elections – 2004, July 12, 2004; ID poster from Secretary of State – Elections website - [http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted\\_ID.jpg](http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted_ID.jpg).
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Voter may cast an "affidavit ballot," which is essentially the same thing as a provisional ballot. Mississippi Guide to Elections – 2004, July 12, 2004; ID poster from Secretary of State – Elections website – [http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted\\_ID.jpg](http://www.sos.state.ms.us/elections/2004/Handbook/FinalAccepted_ID.jpg).
      - Procedures for affidavit ballot – Miss. Code Ann. § 23-15-573 (2004).

- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Vote affidavit ballot which requires executing an affidavit including: name, address, telephone number, statement that the voter believes that he/she is registered to vote, and signature. The vote may or may not be counted depending on whether the voter's status can be determined after the election. Miss. Code Ann. § 23-15-573 (2004); Mississippi Guide to Elections – 2004, July 12, 2004 (State of Mississippi Voter Information poster).
- **Challenge available at polls?**
  - Yes, poll watchers, election judges, registered voters, and candidates may challenge voters at the polls. Miss. Code Ann. § 23-15-571 (2004).

**MEMORANDUM**

**TO:** Sara Sampson  
**FROM:** Sarah Shive  
**DATE:** August 21, 2005  
**RE:** States for ID requirements chart: Missouri

---

**Missouri**

**Summary:**

Missouri requires voters to present a copy of a birth certificate, a Native American tribal document, other proof of United States citizenship, a valid Missouri drivers license or other form of personal identification at the time of registering to vote. §115.135.2 R.S. Mo.

If registering by mail for the first time, voters are asked to send a copy of valid photo identification. §115.155.1 R.S. Mo. If voters do not submit one of these documents, they will be asked to present a copy of a birth certificate, a Native American tribal document, other proof of United States citizenship, a valid Missouri drivers license, or other personal identification when voting for the first time. *Id.*

Before receiving a ballot, a voter must present identification issued by Missouri, an agency of the state, or a local election authority in the state; identification issued by the U.S. government or an agency; identification issued by an institute of higher education located in Missouri; a copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter; a driver's license or state identification card issued by another state; or other identification approved by the Secretary of State. §115.427.1 R.S. Mo. If two election judges, one from each party, personally know the voter and vouch for their identity, signing an affidavit, this may be substituted for other identification. *Id.*

A voter who has registered to vote by mail but does not present proper identification at the polls when voting in person for the first time may cast a provisional ballot. §115.159.2 R.S. Mo. A voter who has registered by mail but did not submit identification and has not voted in person and presented identification may not vote by absentee ballot. *Id.*

• **Statutes:**

○ **Passed:**

- **§115.135.2** – 1977; 1994 changed “no person shall be allowed to register unless he or she presents...identification” to “A person applying to register with an election authority or a deputy registration official shall present...identification.”
- **§115.155.1** – 1977; 2003 added language to the voter registration form asking the voter to submit a copy of valid photo identification or other personal identification, or a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows their name and address (the latter portion being later repealed) when registering by mail, or to be prepared to present identification when voting for the first time.
- **§115.159** – 1977; 2003 added permission for a voter who had registered by mail but had not presented proper identification to vote provisionally, and indicated that a voter who registered by mail may vote absentee for the first time if they submitted proper identification with their application to register.

030221

- **§115.427 – 1977**; indicates that before voting, a voter must present identification issued by Missouri, an agency of the state, or a local election authority in the state; identification issued by the U.S. government or an agency; identification issued by an institute of higher education located in Missouri; a copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter; a driver’s license or state identification card issued by another state; or other identification approved by the Secretary of State. Additionally, two election judges, one from each party, may vouch for the identity of the voter if they know the voter personally.
- **Session law/recent legislation passed:**
  - **2005 Mo. HB 353**: adds to §115.135.2 the specific enumeration “a copy of a birth certificate, a Native American tribal document, other proof of United States citizenship” as acceptable forms of identification to show when registering to vote. [HB 353, signed by governor July 17, 2005]. Also deletes from the voter registration form outlined in §115.155.1 language allowing a voter to submit a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows their name and address when registering by mail in order to avoid being asked for identification when voting for the first time.
- **Pending legislation:**
  - **2005 Mo. H.B. 149/2005 Mo. H.B. 762**: proposes to change §115.159 to prohibit a voter who registered by mail from being given an advance (rather than absentee) ballot unless they have provided proper identification either in person or by mail. (Feb. 10, 2005/Mar. 31, 2005)
  - **2005 Mo. S.B. 472**: proposes to change §115.159 to prohibit a voter who registered by mail from being given an advance (rather than absentee) ballot unless they have provided proper identification either in person or by mail. (Mar. 2, 2005)
  - **2005 Mo. H.B. 66**: proposes to change §115.135 and §115.155 such that a voter would be required to present both a valid Missouri driver’s license or other form of personal identification and a copy of a birth certificate or other proof of United States citizenship when registering in person, or to submit both a copy of current, valid photo identification and a copy of a birth certificate or other proof of United States citizenship when registering by mail. (Jan. 6, 2005)
  - **2005 Mo. S.B. 50**: proposes to change §115.135 and §115.155 such that a voter would be required to present both a valid Missouri driver’s license or other form of personal identification and a copy of a birth certificate, Social Security card, or other proof of United States citizenship when registering in person, or to submit both a copy of current, valid photo identification and a copy of a birth certificate, Social Security card, or other proof of United States citizenship when registering by mail. (Mar. 8, 2005)
- **Case law (from annotations):**
  - none
- **Administrative regulations:**

- **15 CSR 30-3.010:** provides that personal knowledge of a voter by two election judges, one from each major political party, suffices as identification, if the election judges complete an affidavit attesting to the voter's identity.
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - When registering in person, a copy of a birth certificate, a Native American tribal document, other proof of United States citizenship, a valid Missouri drivers license or other form of personal identification should be presented. A copy of valid photo identification should be submitted when registering by mail. Otherwise, the voter will be asked for a copy of a birth certificate, a Native American tribal document, other proof of United States citizenship, a valid Missouri drivers license, or other personal identification when voting for the first time.
    - **At polls:**
      - Before voting, voters must present identification issued by Missouri, an agency of the state, or a local election authority in the state; identification issued by the U.S. government or an agency; identification issued by an institute of higher education located in Missouri; a copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter; a driver's license or state identification card issued by another state; or other identification approved by the Secretary of State. Two election judges, one from each party, may also vouch for the identity of the voter if they personally know them.
- **First time voters or all?**
  - All
  - **When?**
    - A copy of valid photo ID may be submitted when registering by mail. When registering in person, ID must be presented. ID must also be presented at the polls.
  - **What types of ID?**
    - When registering by mail: a copy of valid photo identification
    - When registering in person: a copy of a birth certificate, a Native American tribal document, other proof of United States citizenship, a valid Missouri drivers license or other form of personal identification
    - At the polls: a voter must present identification issued by Missouri, an agency of the state, or a local election authority in the state; identification issued by the U.S. government or an agency; identification issued by an institute of higher education located in Missouri; a copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter; a driver's license or state identification card issued by another state; or other identification approved

by the Secretary of State (personal knowledge of the voter by two election judges may also suffice).

- **State or federal elections?**
  - Both
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - A voter with no identification at the polling place may not vote.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - A voter with no identification at the polling place may not vote.
- **Challenge available at polls?**
  - No.

030224

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Sarah Shive  
**DATE:** August 21, 2005  
**RE:** States for ID requirements chart: Montana

---

### Montana

#### Summary:

Montana requires that before a voter may receive a ballot, they must present current photo identification showing their name, which may include a valid driver's license, a school photo identification card, or a tribal photo identification card. MCA §13-13-114(1)(a). If they do not provide current photo identification, they may provide instead a current utility bill, bank statement, paycheck, notice of confirmation of voter registration, government check, or other government document that shows the elector's name and current address. *Id.* The identification need not perfectly match the information in the precinct register, as long as an election judge is able to the voter's identity and eligibility. MCA §13-13-114(1)(c). If the information provided is insufficient to verify the voter's identity and eligibility, or the voter's name does not appear in the precinct register, they may still vote provisionally. MCA §13-13-114(2). A voter who has voted provisionally may verify their eligibility to vote by providing a form of identification permitted by §13-13-114(1)(a) in person by 5 p.m. on the day after the election, by fax or email by 5 p.m. on the day after the election, or by mail postmarked either the day of the election or the day after the election. MCA §13-15-107.

When registering to vote by mail, a voter must enclose a copy of current and valid photo identification showing the individual's name, such as a valid driver's license, a school photo identification card, or a tribal photo identification card; or a current utility bill, bank statement, paycheck, government check, or other government document that shows the individual's name and current address. MCA §13-2-110(5)(b). When registering in person, a voter must present current and valid photo identification with the individual's name, such as valid driver's license, a school district or postsecondary education photo identification, or a tribal photo identification card; or a current utility bill, bank statement, paycheck, government check, or other government document that shows the individual's name and current address. MCA §13-2-110(5)(a).

- **Statutes:**
  - **Passed:**
    - §13-13-114 – 1979; 2003 changed the requirement that the voter state their name and address before signing the precinct register and voting to a requirement that the voter present identification of one of the types enumerated by the statute (photo identification, or a current utility bill, bank statement, paycheck, notice of confirmation of voter registration, government check, or other government document that shows the voter's name and current address).
    - §13-15-107 – 2003
    - §13-2-110 – 2003
- **Session law/recent legislation passed:**
  - None.

030225

- **Pending legislation:**
  - **2005 MT S.B. 234:** proposes that a voter whose name appears on the precinct register and is voting in person not be required to show identification, and that a voter whose name appears in the register as a provisionally registered voter receive a regular ballot if presenting either valid photo identification or a current utility bill, bank statement, paycheck, notice of confirmation of voter registration, government check, or other government document that shows the elector's name and current address. (Mar. 1, 2005 – died in committee)
  - **2005 MT S.B. 367:** proposes to remove a driver's license from the enumerated list of acceptable forms of identification to present when registering to vote. Also proposes that if a voter's name does not appear in the precinct register, but the voter is in the correct precinct, or the voter's registration is outdated, that the voter must be permitted to register or to update their registration, and be provided with a regular ballot. (Feb. 4, 2005)
  - **2005 MT S.B. 302:** proposes to remove a driver's license from the enumerated list of acceptable forms of identification to present when registering to vote. (Apr. 18, 2005)
  - **2005 MT D. 375/2005 MT D. 458:** proposes that identification requirements may not be more stringent than those laid out in the Help America Vote Act of 2002. Also proposes to remove the identification requirements for registration in person, and to alter those required for registration by mail to require that a voter submit a copy of valid, current photo identification showing their name and current address, or if such identification does not exist, a current utility bill, bank statement, paycheck, government check, or other government document that shows the individual's name and current address. Also proposes to remove the identification requirements for voters voting in person, and to allow voters whose names appear in the precinct register as provisionally registered voters to vote by regular ballot if they present current photo identification showing their name and current address, or if the voter does not have such document, a current utility bill, bank statement, paycheck, notice of confirmation of voter registration, government check, or other government document that shows the elector's name and current address. (Dec. 30, 2004/Jan. 10, 2005)
  - **2005 MT D. 1213:** proposes to provide for same-day registration to vote, and removes a driver's license from the enumerated list of acceptable forms of identification for a voter to present when registering to vote. (Jan. 31, 2005)
- **Case law (from annotations):**
  - None.
- **Administrative regulations:**
  - None.
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - By mail: A voter must enclose a copy of current and valid photo identification showing the individual's name, such as a valid driver's license, a school photo identification card, or a tribal photo identification card; or a current utility bill, bank statement,

paycheck, government check, or other government document that shows the individual's name and current address.

- In person: A voter must present current and valid photo identification with the individual's name, such as valid driver's license, a school district or postsecondary education photo identification, or a tribal photo identification card; or a current utility bill, bank statement, paycheck, government check, or other government document that shows the individual's name and current address.
- **At polls:**
  - Montana requires that before a voter may receive a ballot, they must present current photo identification showing their name, which may include a valid driver's license, a school photo identification card, or a tribal photo identification card. If they do not provide current photo identification, they may provide instead a current utility bill, bank statement, paycheck, notice of confirmation of voter registration, government check, or other government document that shows the elector's name and current address.
- **First time voters or all?**
  - All
  - **When?**
    - When registering to vote, and at the polls before voting.
  - **What types of ID?**
    - When registering by mail: A voter must include a copy of current and valid photo identification with the individual's name, such as valid driver's license, a school district or postsecondary education photo identification, or a tribal photo identification card; or a current utility bill, bank statement, paycheck, government check, or other government document that shows the individual's name and current address.
    - When registering in person: A voter must present current and valid photo identification with the individual's name, such as valid driver's license, a school district or postsecondary education photo identification, or a tribal photo identification card; or a current utility bill, bank statement, paycheck, government check, or other government document that shows the individual's name and current address.
    - At the polls: Before a voter may receive a ballot, they must present current photo identification showing their name, which may include a valid driver's license, a school photo identification card, or a tribal photo identification card. If they do not provide current photo identification, they may provide instead a current utility bill, bank statement, paycheck, notice of confirmation of voter registration, government check, or other government document that shows the elector's name and current address.
  - **State or federal elections?**

030227

- Both
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - A voter with no identification or insufficient identification at the polling place must vote provisionally.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - A voter who has voted provisionally may verify their eligibility to vote by providing a form of identification permitted by §13-13-114(1)(a) in person by 5 p.m. on the day after the election, by fax or email by 5 p.m. on the day after the election, or by mail postmarked either the day of the election or the day after the election.
- **Challenge available at polls?**
  - A challenger may challenge a voter's eligibility to vote at any time by filling out an affidavit stating the grounds of the challenge and any evidence supporting it and submitting the affidavit to the election administrator or, on election day, an election judge. §13-13-301(1) as amended by 2005 Mt. ALS 286.

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 7, 2005  
**RE:** 10 states for ID requirements chart: Nebraska

---

### Nebraska

#### Summary:

Nebraska law requires that an applicant supply his/her name, address, phone number, date of birth, place of birth, and driver's license number or the last four digits of his/her social security number (if the applicant has either) in order to register to vote. Neb. Rev. Stat. § 32-312 (2004); 2005 Neb. Laws 566. Nebraska has also codified the HAVA identification requirements and applied them to State and Federal elections. Neb. Rev. Stat. § 32-319 (2004); Neb. Rev. Stat. § 32-914 (2004). Thus, new voters who registered by mail are required to present identification with their registration, prior to voting, or at the polls. *Id.* The forms of identification are the same forms acceptable under HAVA. *Id.* Without proper identification, these voters may vote a provisional ballot. Neb. Rev. Stat. § 32-915 (2004); 2005 Neb. Laws 566. At the polls, all other voters are only required to announce their name and address and sign their name in the record. Neb. Rev. Stat. § 32-913 (2004); Neb. Rev. Stat. § 32-914 (2004).

Nebraska recently passed two laws concerning elections. 2005 Neb. Laws 53; 2005 Neb. Laws 566. 2005 Neb. Laws 53 makes a change to the length of time felons are not permitted to vote. 2005 Neb. Laws 566 makes extensive changes to HAVA updates passed in 2003. It specifies what information is required on the registration form and that a registration may be rejected for failure to provide certain information. 2005 Neb. Laws 566. It also clarifies the identification requirements for new voters who registered by mail and includes a requirement that photo identification be valid and current and all other forms of identification be dated within the last sixty days. *Id.*

#### • Statute:

- Neb. Rev. Stat. § 32-312 (2004).
- Neb. Rev. Stat. § 32-319 (2004).
- Neb. Rev. Stat. § 32-914 (2004).
- Neb. Rev. Stat. § 32-915.02 (2004).
- **Passed:**
  - § 32-312 – 1994; 2003 driver's license or social security number added as a registration information requirement
  - § 32-319 – 2003
  - § 32-914 – 2003
  - § 32-915.02 – 2003

#### • Session law:

- 2005 Neb. Laws 53 (passed over governor's veto March 10, 2005): amending § 32-312 and lengthening time for felony disenfranchisement to two years after sentence is complete
- 2005 Neb. Laws 566 (signed into law May 31, 2005):
  - gives Secretary of State the power to promulgate rules and regulations

030229

- amending 32-319: rewords section regarding providing identification with registration
- amending 32-312: telephone number and place of birth no longer optional; adds a statement that an incomplete application may be rejected; adds a statement that failure to provide driver's license or social security number will not result in rejection; makes minor word & phrasing changes
- amending 32-318: new provision added mandating that the identification provided by mail in registrants must be dated within the last sixty days or, for photo identification, that it is current and valid; also adds that the identification may be shown at registration, after registration, or at the polls and by mail, fax, or in person
- amending 32-914: rewrote requirement on showing identification at polls
- repealing 32-915.02 but the relevant portion regarding provisional ballots for new voters who do not present identification was moved to § 32-915.
- **Pending legislation:** none
- **Case law (from annotations):** none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - State law requires that the applicant supply his/her name, address, driver's license number or the last four digits of his/her social security number (if the applicant has either), and date of birth in order to register. Neb. Rev. Stat. § 32-312 (2004).
        - Phone number & place of birth now no longer optional; incomplete application may be rejected (but not because driver's license or social security number omitted). 2005 Neb. Laws 566.
      - New registrants who register by mail are also instructed to provide a copy of a current photo identification, utility bill, bank statement, government check, paycheck, or other government document that is current and show the voter's name and address either at registration or at the polls. Neb. Rev. Stat. § 32-319 (2004).
    - **At polls:**
      - New mail in registrants – required to provide identification at the polls if they did not provide a copy with their registration. Neb. Rev. Stat. § 32-319 (2004); Neb. Rev. Stat. § 32-914 (2004).
      - All voters - Only required to announce their name and address and sign their name in record. Neb. Rev. Stat. § 32-913 (2004); Neb. Rev. Stat. § 32-914 (2004).
  - **First time voters or all?**
    - Identification requirements only for first time voters who register by mail – must provide identification either with their registration or at the polls. Neb. Rev. Stat. § 32-319 (2004); Neb. Rev. Stat. § 32-914 (2004).

- **When?**
  - Either at the polls or with registration. Neb. Rev. Stat. § 32-319 (2004); Neb. Rev. Stat. § 32-914 (2004).
- **What types of ID?**
  - Current photo identification OR
  - Utility bill, bank statement, government check, paycheck, or other government document that is current and shows the voter's name and address
  - Neb. Rev. Stat. § 32-319 (2004); Neb. Rev. Stat. § 32-914 (2004).
    - New provision added to § 32-318 by 2005 Neb. Laws 566 requiring photo identification be valid and current and all other forms of identification be dated within the last sixty days.
- **State or federal elections?**
  - All elections.
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Neb. Rev. Stat. § 32-915.02 (2004).
    - § 32-915.02 repealed by 2005 Neb. Laws 566 but the relevant language was added to § 32-915.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - The voter must also fill out voter registration form and execute an affidavit that the voter is a registered voter. Neb. Rev. Stat. § 32-915.02 (2004).
    - § 32-915.02 repealed by 2005 Neb. Laws 566 but the relevant language was added to § 32-915.
- **Challenge available at polls?**
  - Yes, of any voter by an election judge, inspector, clerk, or registered voter. Neb. Rev. Stat. § 32-926 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 21, 2005

### Nevada

#### **Summary:**

Nevada requires first time voters who register by mail to present identification either at registration or at the polls (identification forms are the same as under HAVA). Nev. Rev. Stat. 293.2725 (2005). Without proper identification, the voter may execute an affidavit and vote a provisional ballot for federal candidates only. Nev. Rev. Stat. 293.2725 (2005).

All other voters are only required to state their name and sign the poll register, which is compared to their registration card or one of a variety of forms of alternative signature comparison documents. However, if the signatures do not match, the voter must produce additional identification with a signature and a picture (types are specified by law). Nev. Rev. Stat. 293.277 (2005).

Nevada has recently passed two bills which allow voters who vote provisionally to vote for federal offices as well as state and local offices. Several bills were introduced this session concerning voter identification and registration.

Interestingly, Nevada has implemented a statewide touch screen voting system with voter verifiable paper audit trail, which Nevada boasts was a complete success in 2004. Nevada Secretary of State Homepage, at <http://sos.state.nv.us/publications/hava.htm>.

- **Statutes:** Nev. Rev. Stat. 293.2725 (2005); Nev. Rev. Stat. 293.285 (2005); Nev. Rev. Stat. 293.277 (2005).
  - **Passed:**
    - 293.2725 – 2003
    - 293.285 – 1960
    - 293.277 – at least since 1991; possibly since 1960.
- **Session law/recent legislation passed:**
  - 2005 Nev. Stat. 500, sec. 9, 10, 293.3081, 293.3082: allowing voters who vote provisionally to vote for State and Federal issues and candidates
    - Bill: AB 500, 73<sup>rd</sup> Leg. Sess., Reg. Sess. (Nev. 2005) [approved by governor June 17, 2005]
  - 2005 Nev. Stat. 455, sec. 23, 24, 293.3081, 293.3082: allowing voters who vote provisionally to vote for State and Federal issues and candidates
    - Bill: AB 455, 73<sup>rd</sup> Leg. Sess., Reg. Sess. (Nev. 2005) [approved by governor June 13, 2005, effective October 1]
- **Pending legislation:**
  - AB 269, 73<sup>rd</sup> Leg. Sess., Reg. Sess. (Nev. 2005): Require all voters to present either a current and valid photo identification or a copy of a current utility bill, bank statement, paycheck or document issued by a governmental entity prior to voting; changes 293.277 to require signature verification, identification document,

and name in election register in order for a voter to be permitted to vote. [3/21/05 - Introduced; 4/16/05 - No further action allowed]

- SB 478, 73<sup>rd</sup> Leg. Sess., Reg. Sess. (Nev. 2005): Substitutes “current utility bill, bank statement, paycheck, or document issued by a governmental entity, including, without limitation, a check, which indicates the name and address of the person” for “sufficient proof of residence and identity” in 293.2725 (HAVA compliant statute); limits alternative signature verification document (when voter registration card unavailable) to only a valid photo identification card in 293.277. [3/29/05 – introduced; 4/27/05 no further action allowed]
- AB 499, 73<sup>rd</sup> Leg. Sess., Reg. Sess. (Nev. 2005): adds school identification card to list of alternative signature verification documents; allows a voter to show identification instead of signature comparison to prove identity in 293.277 [3/28/05 introduced; 5/23/05 passed out of committee; 6/3/05 referred to another committee; 6/6/05 passed out of committee]
- SB 386, 73<sup>rd</sup> Leg. Sess., Reg. Sess. (Nev. 2005): allowing appointed poll challengers; modernizing the election code to accommodate modern methods of voting and running polls and registration; removing references to punch ballots [conference committee 6/3/05]
- **Case law (from annotations):** none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **HAVA:** First time voters who registered by mail must have identification (either with registration or at polls). Nev. Rev. Stat. 293.2725 (2005).
      - Alternative: Provide social security number or state identification number on registration form, and voter’s name and date of birth match with an existing state record. Nev. Rev. Stat. 293.2725 (2)(b) (2005).
    - **All other voters:** At polls, all voters must state their names and then sign in register. Their signatures are compared to either voter registration cards or a variety of identification documents with a signature. Nev. Rev. Stat. 293.277 (1) (2005); Nev. Rev. Stat. 293.285 (1) (2005).
      - If signatures do not match, the voter must produce additional identification: voter registration card, driver’s license, state identification card, military identification card, or any other form of identification issued by a government agency with signature and picture. Nev. Rev. Stat. 293.277 (2005).
  - **First time voters or all?**
    - First time voters only for the identification requirement. Nev. Rev. Stat. 293.2725 (2005).
    - Signature verification applies to all voters. Nev. Rev. Stat. 293.277 (2005).
  - **When?**
    - HAVA requirement: Either at registration or at polls. Nev. Rev. Stat. 293.2725 (2)(a) (2005).

- **What types of ID?**
  - HAVA requirement: Photo identification, utility bill, bank statement, paycheck, or government issued document (must contain name and address). Nev. Rev. Stat. 293.2725 (1)(a) (2005).
- **State or federal elections?**
  - Both. Except that without identification, a first time voter who registered by mail is only allowed to vote provisionally for federal candidates, not state or local candidates. Nev. Rev. Stat. 293.3082 (2005).
    - RECENT CHANGE: 2005 Nev. Stat. 500, sec. 9, 10, 293.3081, 293.3082 & 2005 Nev. Stat. 455, sec. 23, 24, 293.3081, 293.3082: voters voting provisionally may vote for state and federal candidates and issues.
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Nev. Rev. Stat. 293.3081 (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit & can vote provisionally. Nev. Rev. Stat. 293.3082 (2005).
- **Challenge available at polls?**
  - Yes, by any registered voter. Nev. Rev. Stat. 293.303 (2005).
- **Miscellaneous:**
  - Uses touch screen voting with voter verifiable paper audit trail
  - Has vote by mail for precincts with less than 200 registered voters. Nev. Rev. Stat. 293.343 (2005).
  - Allows early voting. Nev. Rev. Stat. 293.356 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 22, 2005  
**RE:** States for ID requirements chart: New Hampshire

---

### New Hampshire

#### Summary:

New Hampshire, like a few other states with election day registration, was exempted from the NVRA and from the provisional balloting requirement of HAVA. New Hampshire Secretary of State, 2005 State Plan Draft, 16 (2005), <http://www.sos.nh.gov/HAVA/State%20Plan%202005-06-02.pdf>. Consequently, New Hampshire requires in person registration for all voters who do not qualify for an absentee ballot. *Id.* This can be done either prior to the election or on election day, but it must be done in person. *Id.* Registration requires proof of citizenship, proof of age, and proof of domicile. N.H. Rev. Stat. Ann. § 654:12 (2005). Proof of age requires documentation proving the requirement, but citizenship and domicile may be proven through affidavit (but executing the affidavit requires proof of identity).

The identification requirements of HAVA are not really much of an issue in New Hampshire, as only absentee voters are permitted to register by mail.

At the polls, voters are only required to announce their name prior to receiving a ballot, but in order to register on election day they must prove citizenship, domicile, and age. N.H. Rev. Stat. Ann. § 659:13 (2005); N.H. Rev. Stat. Ann. § 654:12 (2005). An election day registrant is not permitted to register and consequently vote without proof of citizenship, age, and domicile (no provisional balloting). New Hampshire Secretary of State, 2005 State Plan Draft, 14 (2005), <http://www.sos.nh.gov/HAVA/State%20Plan%202005-06-02.pdf>.

There are several bills pending concerning election day registration, photo identification at the polls, and identification at registration. All remain in committee currently.

- **Statutes:** N.H. Rev. Stat. Ann. § 654:12 (2005); N.H. Rev. Stat. Ann. § 659:13 (2005)
  - **Passed:**
    - § 654:12 – 1979
    - § 659:13 – 1979
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - HB 639, 159<sup>th</sup> Sess. (N.H. 2005): eliminating election day registration and enacting provisions of NVRA [1/26/05 introduced; 3/23/05 retained in committee]
  - HB 501, 159<sup>th</sup> Sess. (N.H. 2005) & HB 345, 159<sup>th</sup> Sess. (N.H. 2005): AT POLLS - requiring photo identification for all voters; AT REGISTRATION - changing forms of identification for proof of domicile to: NH state identification card, NH driver's license, NH vehicle registration, passport, military identification, or other photo identification; AT REGISTRATION - adds proof of identity to

030238

requirements – by photo identification only [Both bills - 1/26/05 introduced; 3/16/05 retained in committee]

- HB 347, 159<sup>th</sup> Sess. (N.H. 2005): requiring proof of citizenship of all voters at the polls - birth certificate, passport, naturalization papers, citizenship affidavit, or any other reasonable documentation which indicates the applicant is a citizen. [1/26/05 introduced; 3/16/05 retained in committee]
- HB 345, 159<sup>th</sup> Sess. (N.H. 2005): requiring photo identification of all voters prior to voting (photo driver's license, passport, military identification, or other government issued photo identification). [1/26/05 introduced; 3/16/05 retained in committee]
- SB 26, 159<sup>th</sup> Sess. (N.H. 2005): requiring photo identification prior to voting. [1/5/05 introduced; 4/7/05 recommitted to committee]
- **Case law (from annotations):** none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration/all voters:** Requires in person registration with city clerk or the Supervisors of the Checklist. Registration can occur on election day. Also requires proof of citizenship, age, and domicile (also proof of identity required if any of those three are to be proven by affidavit). N.H. Rev. Stat. Ann. § 654:12 (2005).
      - Proof of citizenship: birth certificate, passport, naturalization papers, notarized citizenship affidavit, or any other document indicating the voter is a U.S. citizen
      - Proof of age: any reasonable document indicating the applicant is eighteen years old or older
      - Proof of domicile: any reasonable document indicating the applicant has a domicile and intends to maintain a domicile there or a notarized domicile affidavit
        - Documents acceptable for domicile proof: NH driver's license, NH vehicle registration, or photo identification issued by US government
      - Proof of identity (needed to execute affidavit to prove citizenship or domicile): driver's license issued by any state, passport, or government issued photo identification
    - **At polls/all registered voters:** Announce name only. N.H. Rev. Stat. Ann. § 659:13 (2005).
    - **HAVA:** voters are only permitted to register by mail in New Hampshire if they qualify for an absentee ballot, but that procedure complies with HAVA and requires identification. New Hampshire Secretary of State, 2005 State Plan Draft, 16 (2005), <http://www.sos.nh.gov/HAVA/State%20Plan%202005-06-02.pdf>.
  - **First time voters registering by mail or all?**
    - Requirements apply to all voters; obviously the registration requirements apply only to new voters. N.H. Rev. Stat. Ann. § 654:12 (2005); N.H. Rev. Stat. Ann. § 659:13 (2005).

- **When?**
  - At registration. N.H. Rev. Stat. Ann. § 654:12 (2005).
- **What types of ID?**
  - Proof of citizenship: birth certificate, passport, naturalization papers, notarized citizenship affidavit, or any other document indicating the voter is a U.S. citizen
  - Proof of age: any reasonable document indicating the applicant is 18 years old or older
  - Proof of domicile: any reasonable document indicating the applicant has a domicile and intends to maintain a domicile there or a notarized domicile affidavit
    - Documents acceptable for domicile proof: NH driver's license, NH vehicle registration, or photo identification issued by US government
  - Proof of identity (needed to execute affidavit to prove citizenship or domicile): driver's license issued by any state, passport, or government issued photo identification
  - N.H. Rev. Stat. Ann. § 654:12 (2005).
- **State or federal elections?**
  - All elections.
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Cannot vote/not registered – no provisional voting system. New Hampshire is exempt from provisional voting requirement of HAVA because it has election day registration. Voter must prove citizenship, age and domicile prior to registration and voting (but that can be done by affidavit). New Hampshire Secretary of State, 2005 State Plan Draft, 14 (2005), <http://www.sos.nh.gov/HAVA/State%20Plan%202005-06-02.pdf>.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - See above.
- **Challenge available at polls?**
  - Yes, any voter may challenge. N.H. Rev. Stat. Ann. § 659:27 (2005).
- **Miscellaneous:**
  - Has election day registration with same identification requirements as regular registration. Requires in person registration. N.H. Rev. Stat. Ann. § 654:7-a, 7b (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 22, 2005  
**RE:** States for ID requirements chart: New Jersey

---

### New Jersey

#### Summary:

New Jersey does not require any identification beyond HAVA for new registrants registering by mail; instead, New Jersey merely applies HAVA's requirements to all elections. N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-5 (2005); N.J. Stat. Ann. § 19:31-6.4 (2005). The acceptable forms of identification are the same as under HAVA. *Id.* The applicant may present the identification either at the polls or with his/her registration. *Id.* Without identification, a new voter may vote a provisional ballot, but the vote will not be counted if the voter does not produce identification to election officials within two days of the election. N.J. Stat. Ann. § 19:53C-3 (2005).

At the polls, there is no identification requirement for all voters, but signature comparison is done. N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-21 (2005).

There are several voter identification-related bills pending in the legislature. A couple of these bills have passed one chamber and are awaiting a vote in the other. Two of these proposals would require identification at the polls. SB 2462, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005).

- **Statutes:** N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-5 (2005); N.J. Stat. Ann. § 19:31-6.4 (2005).
  - **Passed:**
    1. § 19:15-17 – 2004
    2. § 19:31-5 – 2004
    3. § 19:31-6.4 – 2004
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - SB 2462, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005): requires personal identification to vote (identification types not specified) [5/5/05 introduced, referred to committee]
  - A 3404: issue electronic voter ID cards to voters which must be brought to polls [10/18/04 introduced, referred to committee]
  - AB 42, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005): Permits voter registration up to twenty-one days before election; permits use of provisional ballot as voter registration; modifies information available on voter registration list [3/7/05 introduced; 6/20/05 passed Assembly; 6/20/05 second reading in Senate]
    4. Companion Bill – SB 2387, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005): Permits voter registration up to 21 days before election; permits use of provisional ballot as voter registration; modifies information available on voter registration list [3/14/05 introduced; 6/20/05 amended on floor]
  - AB 39, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005): increasing criminal penalties [3/7/05 introduced; 6/20/05 passed Assembly; 6/20/05 second reading in Senate]

- 5. Companion Bill – SB 2393, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005): increasing criminal penalties [3/14/05 introduced; 6/20/05 substituted by AB 39]
  - AB 38, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005): adds political party affiliation to registration form [3/7/05 introduced; 6/20/05 passed Assembly; 6/20/05 second reading in Senate]
    - 6. Companion Bill – SB 2394, 211<sup>th</sup> Assem., 2<sup>nd</sup> Ann. Sess. (N.J. 2005): adds political party affiliation to registration form [3/14/05 introduced; 6/9/05 second reading in Senate]
  - AB 2413, 211<sup>th</sup> Assem., 1<sup>st</sup> Ann. Sess. (N.J. 2005): implements portions of HAVA [2/24/05 introduced, referred to committee]
  - AB 1612, 211<sup>th</sup> Assem., 1<sup>st</sup> Ann. Sess. (N.J. 2005): Permits person registering to vote to declare political affiliation on voter registration form [1/13/04 introduced, referred to committee]
- **Case law (from annotations):** none
- **Administrative regulations:** none as such, but there could be informal ones not on Attorney General's website (Chief Election Official).
- **What the law requires:**
  - **Is ID required?**
    - 7. **For registration:**
      - The voter must provide identification with his registration, his social security number or his driver's license number on his registration form or else the voter will be required to show identification at the polls prior to voting. N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-5 (2005); N.J. Stat. Ann. § 19:31-6.4 (2005).
    - 8. **At polls:**
      - Signature comparison only. N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-21 (2005).
  - **First time voters or all?**
    - 9. First time voters who register by mail. N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-5 (2005); N.J. Stat. Ann. § 19:31-6.4 (2005).
  - **When?**
    - 10. Either at registration or at the polls. (HAVA). N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-5 (2005); N.J. Stat. Ann. § 19:31-6.4 (2005).
  - **What types of ID?**
    - 11. (1) A current and valid photo identification card.
    - 12. (2) A current utility bill, bank statement, government check, or paycheck.
    - 13. (3) Any other government document that shows the voter's name and current address.
    - 14. (4) Other documents deemed acceptable by the Attorney General.
    - 15. N.J. Stat. Ann. § 19:15-17 (2005); N.J. Stat. Ann. § 19:31-5 (2005); N.J. Stat. Ann. § 19:31-6.4 (2005).
  - **State or federal elections?**
    - 16. Both. N.J. Stat. Ann. § 19:31-6.4 (2005).

- **Consequences of having no ID (provisional ballot v. regular ballot?)**  
*17. Provisional ballot. N.J. Stat. Ann. § 19:15-17 (2005).*
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**  
*18. Voter has two days after election to produce identification or else vote does not count. N.J. Stat. Ann. § 19:53C-3 (2005).*
- **Challenge available at polls?**  
*19. Yes, candidates, the election board, and political parties may appoint poll challengers who can challenge voters at the polls. N.J. Stat. Ann. § 19:15-18 (2005).*

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Sarah Shive  
**DATE:** August 21, 2005  
**RE:** States for ID requirements chart: New Mexico

---

### New Mexico

#### Summary:

New Mexico requires that when registering for the first time in New Mexico via mail, a voter must either submit a copy of current, valid photo identification, or a utility bill, bank statement, government check, paycheck, student identification card or other government document (including tribal identification) that shows the name and address of the applicant. N.M. Stat. Ann. §1-4-5.1(I)(4)(a). If the voter does not submit identification when registering, they will be required to present it when voting in person or absentee. N.M. Stat. Ann. §1-4-5.1(I)(4)(b).

At the polls, a voter must present identification, which may include current, valid photo identification, or a utility bill, bank statement, government check, paycheck, student identification card or other government document (including tribal identification) that shows the name and address of the applicant. N.M. Stat. Ann §1-12-7.1(D). Alternatively, the voter may supply a verbal or written statement by the voter of the voter's name, year of birth and unique identifier, with no need to include their middle initial or suffix. N.M. Stat. Ann. §1-1-5.4(B). If a voter cannot provide such identification, they must vote provisionally, and provide the required voter identification to the county clerk's office before the county canvass begins, or to the precinct board before the polls close, for their vote to be counted. N.M. Stat. Ann. §1-12-7.1(D). If lines to vote exceed 45 minutes, however, any physical identification requirements not required by federal law may be suspended, and a voter may simply state their name, year of birth, and unique identifier. N.M. Stat. Ann. §1-12-10.2. If a voter cannot state their name, year of birth, and unique identifier, however, physical identification is still required, and it may also be required at the request of two or more precinct board members of different parties. *Id.*

- **Statutes:**
  - **Passed:**
    - §1-1-5.4 – 2005
    - §1-4-5.1 – 1978; 2005
    - §1-12-7.1 – 1953; 2005
    - §1-12-10.2 – 2005
- **Session law/recent legislation passed:**
  - None.
- **Pending legislation:**
  - **2005 NM H.B. 18:** proposes that all voters registering by mail must submit the required identification when voting in person or absentee. Also specifically enumerates tribal identification as an acceptable form of identification. (Jan. 19, 2005)

030243

- **2005 NM S.B. 680:** proposes that a voter identification card or tribal identification be added as acceptable identification for submission when registering to vote by mail. (Mar. 2, 2005)
- **Case law (from annotations):**
  - None.
- **Administrative regulations:**
  - None.
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - By mail: When registering for the first time in New Mexico via mail, a voter must submit either a copy of current, valid photo identification, or a utility bill, bank statement, government check, paycheck, student identification card or other government document (including tribal identification) that shows the name and address of the applicant. If the voter does not submit such identification, they will be required to provide identification at the polls.
      - At polls: A voter must present identification, which may include current, valid photo identification, or a utility bill, bank statement, government check, paycheck, student identification card or other government document (including tribal identification) that shows the name and address of the applicant. Alternatively, the voter may state their name, year of birth and unique identifier, with no need to include their middle initial or suffix.
  - **First time voters or all?**
    - All
  - **When?**
    - When registering to vote by mail, and at the polls before voting.
  - **What types of ID?**
    - When registering by mail: A voter must submit a copy of current, valid photo identification, or a utility bill, bank statement, government check, paycheck, student identification card or other government document (including tribal identification) that shows the name and address of the applicant.
    - At the polls: Before a voter may receive a ballot, they must present current photo identification showing their name, which may include a valid driver's license, a school photo identification card, or a tribal photo identification card. If they do not provide current photo identification, they may provide instead a current utility bill, bank statement, paycheck, notice of confirmation of voter registration, government check, or other government document that shows the elector's name and current address.
  - **State or federal elections?**
    - Both

- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - A voter with no identification or insufficient identification at the polling place must vote provisionally.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - If a voter cannot provide identification, they must vote provisionally, and provide the required voter identification to the county clerk's office before the county canvass begins, or to the precinct board before the polls close, for their vote to be counted.
- **Challenge available at polls?**  
Yes, under N.M. Stat. Ann. § 3-8-43.

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 23, 2005  
**RE:** States for ID requirements chart: New York

---

### New York

#### Summary:

New York does not require any identification beyond the HAVA requirements. N.Y. Elec. Law § 8-303 (2005). A new voter must either include his driver's license or social security number on his registration or provide identification at the polls or with his registration. *Id.* The types of identification permitted are the same as permitted under HAVA. *Id.* This requirement applies to state and federal elections. *Id.* Without identification, a first time voter who registered by mail may sign an affidavit and vote an affidavit ballot. *Id.* At the polls, all other voters must merely announce their name and address and sign the poll record. N.Y. Elec. Law § 8-302 (2005); N.Y. Elec. Law § 8-304 (2005).

Recently, a law was passed providing for the creation of a statewide voter registration list. 2005 N.Y. Laws Ch. 24. In addition, two relevant bills are pending. One provides that an affidavit ballot is also a valid application to register to vote. S. 2029, 228<sup>th</sup> Ann. Legis. Sess. (N.Y. 2005). The other implements HAVA identification provisions and other HAVA requirements. A. 121, 228<sup>th</sup> Ann. Legis. Sess. (N.Y. 2005).

- **Statutes:** N.Y. Elec. Law § 8-303 (2005).
  - **Passed:**
    - § 8-303 – 2004 [expires & is repealed July 1, 2005]
- **Session law/recent legislation passed:**
  - 2005 N.Y. Laws Ch. 24, sec. 1,2: creates a statewide voter registration list
    - Bills enacted: S. 3604, 228<sup>th</sup> Ann. Legis. Sess. (N.Y. 2005) (enacted) & A. 6733, 228<sup>th</sup> Ann. Legis. Sess. (N.Y. 2005) (enacted)
    - Passed May 3, 2005
- **Pending legislation:**
  - S. 2029, 228<sup>th</sup> Ann. Legis. Sess. (N.Y. 2005): Provides that an affidavit ballot submitted on election day at a polling place shall also constitute an application to register to vote. [2/8/05 introduced, referred to committee]
  - A. 121, 228<sup>th</sup> Ann. Legis. Sess. (N.Y. 2005): adds a new section implementing HAVA identification provisions; defines (broadly) the forms of identification which satisfy HAVA; adds identification requirement to registration form; implements statewide registration list; provides that an affidavit ballot is an application to register to vote; sets up system for affidavit ballot voters to ascertain if their ballot was counted [1/6/05 introduced; 1/25/05 passed Assembly; 1/25/05 referred to committee in Senate]
- **Case law (from annotations):**
  - **Gross v. Albany County Bd. of Elections**, 781 N.Y.S.2d 172 (N.Y. App. Div. 3 Dept. 2004): Affidavit on ballot signed by the voter, acknowledging that any false statement was punishable according to law, complied with requirements of law

030246

setting forth requirements for allowing voter to vote despite lack of registration poll record, despite failure of election inspector to witness voter's signature.

- ***Marraccini v. Balancia*, 582 N.Y.S.2d 232 (N.Y. App. Div. 2 Dept. 1992):** Affidavit ballots cast in general election for office of town mayor were invalid and should not have been counted, insofar as voters did not attempt to vote in election district for their address or were not registered on date of election.
- ***McClure v. D'Apice*, 497 N.Y.S.2d 770 (N.Y. App. Div. 2 Dept. 1986):** Vote of affidavit voter, who did not properly complete address portion of affidavit as required under Election Law § 8-302, subd. 3(f)(ii), would not be counted.
- ***Conroy v. Levine*, 479 N.Y.2d 187 (N.Y. App. Div. 2 Dept. 1984):** New election, after the fact, for village trusteeships was not warranted where there has been no showing of fraud or misconduct on the part of the inspectors of election or that any ineligible voter actually voted, and where the ten voters who were denied the opportunity to vote because no registration poll record could be found for them failed to avail themselves of the remedy of obtaining a court order on election day, when Justices of the Supreme Court were available for such purposes.
- ***People ex. rel. Borgia v. Doe*, 96 N.Y.S. 389 (N.Y. App. Div. 1 Dept. 1905):** The fact that some other person had voted on a registered elector's name did not deprive the elector of the right to insist that he be given a ballot and be permitted to vote, on complying with the requirements of the former Election Law of 1896.
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration/polls for new registrants:**
      - Same as HAVA – must have identification at registration or at polls or have included their driver's license number or social security number on registration form. N.Y. Elec. Law § 8-303 (2005).
    - **At polls/other voters:**
      - Announce name and address and sign poll record. N.Y. Elec. Law § 8-302 (2005); N.Y. Elec. Law § 8-304 (2005).
  - **First time voters or all?**
    - First time voters only. N.Y. Elec. Law § 8-303 (2005).
  - **When?**
    - Either at registration or at polls. N.Y. Elec. Law § 8-303 (2005).
  - **What types of ID?**
    - Current and valid photo identification
    - OR
    - Current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter
    - N.Y. Elec. Law § 8-303 (2005).
  - **State or federal elections?**
    - Both. Statute implementing HAVA does not make any distinction. N.Y. Elec. Law § 8-303 (2005). Also, voter registration form does not have any limitation on identification requirement limiting it to federal elections only. Voter registration form, at <http://www.elections.state.ny.us/download/voting/voteform.pdf>.

- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Affidavit ballot. N.Y. Elec. Law § 8-303 (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit. N.Y. Elec. Law § 8-303 (2005).
- **Challenge available at polls?**
  - Yes, a voter may be challenged at the polls by any inspector, clerk, appointed watcher, or registered voter. N.Y. Elec. Law § 8-502 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 27, 2005  
**RE:** States for ID requirements chart: North Carolina

---

### North Carolina

#### Summary:

Presently, North Carolina does not require identification beyond HAVA. N.C. Gen. Stat. § 163-166.12 (2005). A voter who registered by mail and is voting for the first time must present identification at the polls. *Id.* A voter is exempt if he or she provided identification with his/her registration or provided the last four digits of his/her social security number or driver's license number on the registration form. *Id.* The forms of acceptable identification are the same as permissible under HAVA. *Id.* Without identification, these voters may execute an affidavit and vote a provisional ballot. N.C. Gen. Stat. § 163-166.12 (c) (2005); N.C. Gen. Stat. § 163-166.11 (2005). Other voters must merely state their name and current address prior to voting. N.C. Gen. Stat. § 163-166.7 (2005).

North Carolina recently passed a bill making it clear that new laws enacted to implement HAVA were intended to apply broadly to state and federal elections alike. 2005 N.C. Sess. Laws 2005-2. There are also two bills pending which concern voter identification. One would require all voters at the polls to provide a current photo identification *and* a copy of a utility bill, bank statement, government check, paycheck, or other government document with the voter's name and current address. H794, 2005-2006 Sess. (N.C. 2005). The other would require identification (of the same types permissible under HAVA) of all voters at the polls. H1446, 2005-2006 Sess. (N.C. 2005).

- **Statutes:** N.C. Gen. Stat. § 163-166.12 (2005).
  - **Passed:** 2003
- **Session law/recent legislation passed:**
  - 2005 N.C. Sess. Laws 2005-2: HAVA compliant laws/system in North Carolina should be broadly construed to apply to state and federal elections. [3/2/05 signed by governor]
- **Pending legislation:**
  - H794, 2005-2006 Sess. (N.C. 2005): requires all voters to provide at the polls a current and valid photo identification *and* a copy of one of the following documents that shows the name and address of the voter: a current utility bill, bank statement, government check, paycheck, or other government document. [3/17/05 introduced and referred to committee]
  - H1446, 2005-2006 Sess. (N.C. 2005): requires identification (same types as HAVA) of all voters in all elections. [4/21/05 introduced and referred to committee]
- **Case law (from annotations):** none
- **Administrative regulations:** none

030254

- **What the law requires:**
  - **Is ID required?**
    - **HAVA / at registration or at polls:**
      - Must present identification either at polls or at registration or provide the last four digits of his/her social security number or driver's license number on registration form. N.C. Gen. Stat. § 163-166.12 (2005).
    - **All voters at polls:**
      - State name and current residence address. N.C. Gen. Stat. § 163-166.7 (2005).
  - **First time voters or all?**
    - First time voters who registered by mail only. N.C. Gen. Stat. § 163-166.12 (a) (2005).
  - **When?**
    - Either at registration or at polls. N.C. Gen. Stat. § 163-166.12 (2005).
  - **What types of ID?**
    - Current and valid photo identification.
    - OR
    - A current utility bill, bank statement, government check, paycheck, or other government document.
    - N.C. Gen. Stat. § 163-166.12 (a) (2005).
  - **State or federal elections?**
    - Both. Legislature confirmed in 2005 that the enactments implementing HAVA were intended to make the rules the same for state and federal elections. 2005 N.C. Sess. Laws 2005-2.
      - Also voter registration form contains notice of identification requirement with no distinction between federal and state elections.
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - May vote provisionally. N.C. Gen. Stat. § 163-166.12 (c) (2005).
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - Affidavit. N.C. Gen. Stat. § 163-166.11 (2005).
  - **Challenge available at polls?**
    - Yes, by any registered voter. N.C. Gen. Stat. § 163-87 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 28, 2005  
**RE:** States for ID requirements chart: North Dakota

---

### North Dakota

#### Summary:

North Dakota's election laws are unique in that North Dakota does not require registration. Consequently, it is exempt from HAVA's identification and provisional voting provisions and also from the NVRA. North Dakota requires identification of all voters at the polls. In March of 2005, the legislature modified the voter identification requirements for voters at the polls. 2005 N.D. Laws 183, sec. 1, § 16.1-05-07. Previously, voters were required to show identification with their birth date and picture prior to voting. N.D. Cent. Code § 16.1-05-07 (2005). The new bill requires identification with the voter's address and date of birth. 2005 N.D. Laws 183, sec. 1, § 16.1-05-07. The Secretary of State has yet to advise voters on what identifications fulfill this new requirement. However, both the newer and earlier version of this statute permit a voter who is known to election officials to recite his date of birth and have the official vouch for his identity. N.D. Cent. Code § 16.1-05-07 (2005); 2005 N.D. Laws 183, sec. 1, § 16.1-05-07.

Without identification and without an election official to vouch for the voter, a voter will likely be challenged. N.D. Cent. Code § 16.1-05-07 (2005); N.D. Cent. Code § 16.1-05-06 (2005); *see also* Alvin Jaeger, Secretary of State, 2004 Election Officials' Manual (2004), <http://www.state.nd.us/sec/forms/pdf/election-offic-manual.pdf>. The voter may then execute an affidavit and vote a regular ballot. N.D. Cent. Code § 16.1-05-06 (2005).

There is a bill pending in the House which would eliminate the identification requirement entirely for voters that election officials personally know. HB 1405, 59<sup>th</sup> Legis. Assem. (2005).

- **Statutes:** N.D. Cent. Code § 16.1-05-07 (2005).
  - **Passed:**
    - 2003
- **Session law/recent legislation passed:**
  - 2005 N.D. Laws 183, sec. 1, § 16.1-05-07: amended § 16.1-05-07 to require identification containing address and date of birth rather than picture identification. [3/23/05 signed by governor]
    - Bill: HB 1254
- **Pending legislation:**
  - HB 1405, 59<sup>th</sup> Legis. Assem. (2005): no identification necessary for voters personally known to election officials. [2/15/05 failed to pass House]
- **Case law (from annotations):** none
- **Administrative regulations:** none
- **What the law requires:**
  - **Note:**
    - North Dakota is exempt from HAVA identification and provisional voting requirements because it does not require registration. Secretary of State, Al

030256

Jaeger, North Dakota HAVA Plan (2004), <http://www.state.nd.us/hava/documents/docs/2004-final-state-plan.pdf>.

- **Is ID required?**
  - **At polls:**
    - **PRIOR LAW:**
      - Must show driver's license, form of identification with photo and birth date, or any other form of identification permitted by the Secretary of State (see below for forms okay under this previous provision). N.D. Cent. Code § 16.1-05-07 (2005).
        - Exception: voter states his date of birth and a poll worker can personally vouch for him. N.D. Cent. Code § 16.1-05-07 (2005).
    - **RECENT BILL PASSED:**
      - Must show identification with the voter's address and date of birth. 2005 N.D. Laws 183, sec. 1, § 16.1-05-07.
        - Bill maintains the exception described above. *Id.*
  - **First time voters or all?**
    - All voters. No registration, so all voters are the same. However, some precincts maintain lists of voters that have voted in past elections. The voters appearing on this list are less likely to be challenged.
  - **When?**
    - At polls. 2005 N.D. Laws 183, sec. 1, § 16.1-05-07.
  - **What types of ID?**
    - **PRIOR LAW:** valid drivers license; valid state identification card; valid federally issued identification card, including: (1) passport (2) agency identification card; valid tribal identification card; valid student identification card; valid US military identification card; utility bill dated thirty days prior to election day with name and residential address; or change of address verification letter from the US Postal Service. *Id* Requirements, *available at* <http://www.state.nd.us/hava/education/doc/id-requirements.pdf>.
    - **RECENT BILL PASSED:** official form of identification issued by the State, official identification issued by a tribal government, form of identification prescribed by Secretary of State, or any combination of the previous three. 2005 N.D. Laws 183, sec. 1, § 16.1-05-07.
  - **State or federal elections?**
    - Both. 2005 N.D. Laws 183, sec. 1, § 16.1-05-07.
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Not specific, but if the voter is not personally known to election officials, he will probably be challenged. A challenged voter must execute an affidavit. The voter votes a regular ballot. N.D. Cent. Code § 16.1-05-07 (2005); N.D. Cent. Code § 16.1-05-06 (2005); *see also* Alvin Jaeger, Secretary of State, 2004 Election Officials' Manual (2004), <http://www.state.nd.us/sec/forms/pdf/election-offic-manual.pdf>.
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - Affidavit if he is challenged. N.D. Cent. Code § 16.1-05-06 (2005).

- **Challenge available at polls?**
  - Yes. Poll challengers permitted at polls. Election board members may challenge. N.D. Cent. Code § 16.1-05-06 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 29, 2005  
**RE:** States for ID requirements chart: Ohio

---

### Ohio

#### Summary:

Ohio has little formal law on voter identification. All voters are required to announce their name and address and sign the poll book, which is then compared to the voter registration card. Ohio Rev. Code Ann. § 3505.18 (2004). For voters who registered by mail and are voting for the first time in a federal election only the federal HAVA requirements apply. J. Kenneth Blackwell, Secretary of State, Ohio Voter Information Guide (2005), *available at* <http://serform.sos.state.oh.us/sos/pubAffairs/elections/voteGuide.pdf>. Ohio has not enacted a law incorporating the HAVA requirements into state law, thus the requirement only applies in federal elections, as required by the federal law. Ohio Secretary of State's website, <http://serform.sos.state.oh.us/sos/index.html>. All requirements are exactly what is required under federal law.

Ohio is considering several bills which would change voter identification requirements. SB 3 and HB 3 would enact the HAVA identification requirements for all elections. SB 3, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005); HB 3, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005). SB 36 would limit HAVA to voters who registered by mail voting for the first time in a federal election and apply a photo identification requirement to all other voters. SB 36, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005). HB 129 would eliminate election day challenges. HB 129, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005)

- **Statutes:** Ohio Rev. Code Ann. § 3505.18 (2004). [There is no statute implementing HAVA]
  - **Passed:**
    - § 3505.18 – at least since 1991.
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - SB 3, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005): applies HAVA identification requirements to all elections. [1/24/05 in committee]
  - HB 3, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005): adds identification requirement to voter registration form; if notification postcard returned, the voter must show identification at the polls; codifies HAVA identification provisions; provides provisional ballots for those without identification; requires voter who votes provisionally to return within ten days with identification. [5/17/05 passed House; second reading in Senate, in Senate committee]
  - SB 36, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005): enacts HAVA requirements for elections for federal office only; photo identification requirement for all voters not subject to HAVA. [1/26/05 introduced and referred to committee]
  - HB 129, 126<sup>th</sup> Gen. Assem., Reg. Sess. (Ohio 2005): eliminates challenges on election day. [3/15/05 introduced, referred to committee]
- **Case law (from annotations):** none

030260

- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration/polls/HAVA:**
      - New registrants who register by mail are required to provide identification either with the registration or at the polls unless the voter provided his/her current driver's license number or the last four digits of his/her social security number on the registration form. J. Kenneth Blackwell, Secretary of State, Ohio Voter Information Guide (2005), *available at* <http://serform.sos.state.oh.us/sos/pubAffairs/elections/voteGuide.pdf>.
    - **At polls/all voters:**
      - Announce name and address and sign poll book, which is compared to registration. Ohio Rev. Code Ann. § 3505.18 (2004).
  - **First time voters or all?**
    - First time voters who register by mail. J. Kenneth Blackwell, Secretary of State, Ohio Voter Information Guide (2005), *available at* <http://serform.sos.state.oh.us/sos/pubAffairs/elections/voteGuide.pdf>.
  - **When?**
    - At registration or at polls.
  - **What types of ID?**
    - A copy of a current and valid photo identification OR a copy of a current utility bill, bank statement, paycheck, government check, or other government document showing name and address. J. Kenneth Blackwell, Secretary of State, Ohio Voter Information Guide (2005), *available at* <http://serform.sos.state.oh.us/sos/pubAffairs/elections/voteGuide.pdf>.
    - Ohio liberally construes identification requirements allowing "any reasonable means of identification such as utility bills, rent receipts or any legal or quasi-legal instrument that bears the name and address of the prospective voter." Changing the Election Landscape in the State of Ohio: A State Plan to Implement the Help America Vote Act of 2002 in Accordance with Public Law 107-252, §253(b) (2005), *available at* <http://serform.sos.state.oh.us/sos/hava/files/StatePlan12005.pdf>.
  - **State or federal elections?**
    - Federal only. Secretary of State's webpage repeatedly refers to HAVA requirements applying "for persons registering by mail and voting for the first time in a *federal* election." Ohio Secretary of State's website, <http://serform.sos.state.oh.us/sos/index.html> (emphasis added).
      - Also, there is no statute or administrative regulation implementing HAVA, thus only the federal law applies.
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Same as federal law, provisional ballot.
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - None.

- **Challenge available at polls?**
  - Yes, by any challenger, voter properly in the polling place, or election judge. Ohio Rev. Code Ann. § 3505.20 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** June 29, 2005  
**RE:** States for ID requirements chart: Oklahoma

---

### Oklahoma

#### Summary:

Oklahoma does not require anything beyond the federal requirements of HAVA for voter identification. Okla. Stat. Ann. tit. 26, § 7-115.2 (2004). Voters who registered by mail and are voting for the first time in a federal election are required to produce identification if they did not produce it at registration. *Id.* The types of identification are identical to the forms permitted under HAVA except for the addition of a voter registration card. *Id.* Without proper identification, the voter may vote a provisional ballot. Okla. Stat. Ann. tit. 26, § 7-115.2 (2004); Okla. Stat. Ann. tit. 26, § 7-116.1 (2004). All other voters must merely announce their name and sign the precinct register prior to voting. Okla. Stat. Ann. tit. 26, § 7-114 (2004); Okla. Stat. Ann. tit. 26, § 7-117 (2004).

There are several bills pending concerning voter identification. HB 1373, HB 1487, and HB 1528 require photo identification prior to voting, but allow voters to execute an affidavit as an alternative. HB 1373, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005); HB 1487, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005); HB 1528, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005). SB 456 would require voters to show a voter identification card prior to voting. SB 456, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005). SB 298 and SB 791 would require proof of identity (government issued photo identification) at the polls. SB 298, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005); SB 791, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005). All of these bills are currently in committee, but HB 1487 has passed the House and is in committee in the Senate.

- **Statutes:** Okla. Stat. Ann. tit. 26, § 7-115.2 (2004).
  - **Passed:**
    - § 7-115.2 – 2004
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - HB 1373, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005): requiring photo identification at the polls; voters may execute an affidavit as an alternative. [2/8/05 in committee]
  - HB 1487, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005): requiring photo identification at the polls; voters may execute an affidavit as an alternative. [3/16/05 passed House; 3/28/05 in Senate committee]
  - HB 1528, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005): requiring photo identification at the polls; voters may execute an affidavit as an alternative. [2/8/05 in committee]
  - SB 298, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005): requiring proof of identity at the polls, this includes: driver's license, passport, state identification card, or photocopy of the previous three. [2/8/05 in committee]

030264

- SB 456, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005): requiring voters to present a voter identification card prior to voting. [2/8/05 in committee]
- SB 791, 50<sup>th</sup> Legis Sess., 1<sup>st</sup> Sess. (Okla. 2005): requiring proof of identity at the polls, this includes: voter identification card, driver's license, passport, state identification card, or photocopy of the previous four. [2/8/05 in committee]
- **Case law (from annotations):** none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration/at polls/HAVA requirements:**
      - Registered voters who submitted applications for new voter registration by mail who are voting for the first time in a federal election are required to produce identification. Okla. Stat. Ann. tit. 26, § 7-115.2 (2004).
    - **At polls/all voters:**
      - Announce name and sign in precinct register. Okla. Stat. Ann. tit. 26, § 7-114 (2004); Okla. Stat. Ann. tit. 26, § 7-117 (2004).
  - **First time voters or all?**
    - First time voters who registered by mail. Okla. Stat. Ann. tit. 26, § 7-115.2 (2004).
  - **When?**
    - Either at registration or at polls. Okla. Stat. Ann. tit. 26, § 7-115.2 (2004).
  - **What types of ID?**
    - Current and valid photo identification
    - Voter identification card (addition from HAVA)
    - copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the voter's name and address
    - Okla. Stat. Ann. tit. 26, § 7-115.2 (2004).
  - **State or federal elections?**
    - Possibly federal only. Statute says "when they vote for the first time in a federal election." Okla. Stat. Ann. tit. 26, § 7-115.2 (2004).
    - Probably both, since no distinction made on voter registration form. State of Oklahoma Voter Registration Form, at <http://www.state.ok.us/~elections/vrform.pdf>.
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Provisional ballot for all elections and issues. Okla. Stat. Ann. tit. 26, § 7-115.2 (2004); Okla. Stat. Ann. tit. 26, § 7-116.1 (2004).
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - None, but vote only counts if election board can verify the voter's identity. Okla. Stat. Ann. tit. 26, § 7-116.1 (2004).
  - **Challenge available at polls?**
    - No. Election website does not mention challenges, and there are no administrative regulations or statutes allowing for challenge at the polls.

## MEMORANDUM

**TO:** Sara Sampson

**DATE:** June 30, 2005  
**RE:** States for ID requirements chart: Oregon

---

### Oregon

#### **Summary:**

Oregon is unique in its election law. Since 2000, Oregon has conducted even Presidential elections by mail. Consequently, the identification requirements of HAVA are modified to accommodate vote-by-mail. Oregon does not require any identification beyond the HAVA requirements. First time voters who registered by mail must provide identification (same forms as HAVA) with their registration, upon request after registration, or with their ballot. Secretary of State, Bill Bradbury, Oregon Elections Plan: To Implement the Help America Vote Act of 2002, 22-23 (2003), [http://www.uhavavote.org/pdf/state\\_plan.pdf](http://www.uhavavote.org/pdf/state_plan.pdf). Without identification, a voter may still vote for state and local elections as normal. Secretary of State Letter dated December 26, 2002, at [http://www.sos.state.or.us/elections/votreg/hava\\_nr.pdf](http://www.sos.state.or.us/elections/votreg/hava_nr.pdf). For federal elections, their ballot is considered a provisional ballot, and if their eligibility can be verified, their ballot will count. Secretary of State, Bill Bradbury, Oregon Elections Plan: To Implement the Help America Vote Act of 2002, 22-23 (2003), [http://www.uhavavote.org/pdf/state\\_plan.pdf](http://www.uhavavote.org/pdf/state_plan.pdf).

Obviously, there is no identification requirement for other voters, as they are permitted to vote by mail; however, for all voters, the signature on their ballot envelope is compared to the signature on their registration card.

There are two bills pending which concern voter identification. HB 2583 and 2841 would both require proof of citizenship at registration in the form of a passport, birth certificate, or naturalization document. HB 2583, 73<sup>rd</sup> Legis. Assem. (Or. 2005); HB 2841, 73<sup>rd</sup> Legis. Assem. (Or. 2005). HB 2583 has passed the House and is pending in the Senate.

- **Statutes:** none concerning voter identification.
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - HB 2583, 73<sup>rd</sup> Legis. Assem. (Or. 2005): voters must provide proof of citizenship (passport, birth certificate, naturalization documents) with registration [5/19/05 passed House, 5/27/05 in Senate committee]
  - HB 2841, 73<sup>rd</sup> Legis. Assem. (Or. 2005): voters must provide proof of citizenship (passport, birth certificate, naturalization documents) with registration [3/11/05 in committee]
- **Case law (from annotations):** none
- **Administrative regulations:** none concerning voter identification.
- **What the law requires:**
  - **Is ID required?**
    - **First time voters:**

030266

- HAVA requirements, same identification forms. Voting in Oregon Guide, <http://www.uhavavote.org/votingguide/register.html#where>.
- **At polls/all voters:**
  - None, vote by mail, so voters do not attend polls.
  - Signature on envelope is checked against registration when ballot returned.
- **First time voters or all?**
  - First time voters who register by mail. Voting in Oregon Guide, <http://www.uhavavote.org/votingguide/register.html#where>.
- **When?**
  - At registration, after request to provide identification after registration received, or with mailed ballot. Secretary of State, Bill Bradbury, Oregon Elections Plan: To Implement the Help America Vote Act of 2002, 22-23 (2003), [http://www.uhavavote.org/pdf/state\\_plan.pdf](http://www.uhavavote.org/pdf/state_plan.pdf).
- **What types of ID?**
  - Must have name and address, acceptable forms include:
    - valid photo identification (such as a driver's license)
    - a paycheck stub
    - a utility bill
    - a bank statement
    - a government document (with name and address of the voter)
  - Voter registration form, at <http://www.sos.state.or.us/elections/votreg/sc1500.pdf>
- **State or federal elections?**
  - Federal only. Without identification, a voter may still vote as normal in state and local elections. Secretary of State Letter dated December 26, 2002, at [http://www.sos.state.or.us/elections/votreg/hava\\_nr.pdf](http://www.sos.state.or.us/elections/votreg/hava_nr.pdf).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot as to the federal elections only. Secretary of State, Bill Bradbury, Oregon Elections Plan: To Implement the Help America Vote Act of 2002, 22-23 (2003), [http://www.uhavavote.org/pdf/state\\_plan.pdf](http://www.uhavavote.org/pdf/state_plan.pdf).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - If the election officials cannot verify the voter's eligibility to vote, no vote for federal office. May still vote for state and local offices as normal. Secretary of State, Bill Bradbury, Oregon Elections Plan: To Implement the Help America Vote Act of 2002, 22-23 (2003), [http://www.uhavavote.org/pdf/state\\_plan.pdf](http://www.uhavavote.org/pdf/state_plan.pdf).
- **Challenge available at polls?**
  - Yes, when election conducted at polling places, voters may be challenged by election board clerks or any voter. Or. Rev. Stat. § 254.419 (2003).
- **Miscellaneous:**

- Has election by mail for all elections on the general election date or primary date. (began in 1998

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 1, 2005  
**RE:** States for ID requirements chart: Pennsylvania

---

### Pennsylvania

#### Summary:

Currently, all first time voters must produce either photo identification or an alternative identification with their name and address prior to voting at the polls. Pa. Stat. Ann. tit. 25, § 3050 (2004). Without either form of identification, the voter must sign an affidavit and cast a provisional ballot. *Id.* This identification requirement is stricter than HAVA; all first time voters must produce identification, regardless of the method of registration. *Id.* It is also stricter than HAVA in that the identification must be produced at the polls, and providing identification at registration does not exempt the voter from the requirement. *Id.* The requirement applies to both state and federal elections. The forms of identification are similar to HAVA and include a wide array of forms of identification. *Id.*

Pennsylvania's election law concerning first time voters voting in person will change slightly after October 8, 2005. 2004 Pa. Stat. Ann. tit. 25, § 3050 (2004); 2004 Pa. Laws 97. After October 8, election officers must sign an affidavit attesting to the fact that the voter's identification was actually examined, and a procedure for challenging provisional ballots will go into effect. *Id.*

Voters who vote absentee for the first time and registered by mail are only subject to the HAVA requirements and only if they registered by mail. Commonwealth of Pennsylvania, State Plan As Amended, As Required by Public Law 107-252, The Help America Vote Act of 2002, 28, [http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004\\_state\\_plan\\_\(elements\\_6\\_10\\_12\\_to\\_be\\_sent\\_to\\_eac\)-approved\\_\(08-13-04\)1.doc](http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004_state_plan_(elements_6_10_12_to_be_sent_to_eac)-approved_(08-13-04)1.doc).

- **Statutes:** Pa. Stat. Ann. tit. 25, § 3050 (2004).
  - **Passed:**
    - § 3050 – 2002, amended in 2004 with changes effective on 10/8/05.
- **Session law/recent legislation passed:**
  - 2004 Pa. Laws 97: amends § 3050, effective October 8, 2005, requires election official to sign an affidavit that identification was examined; changes provisional balloting procedure.
    - SB 346
- **Pending legislation:** none
- **Case law (from annotations):**
  - *In re Second Legislative Dist. Election*, 4 Pa. D. & C.2d 93 (1955): A vote cast by a voter in her maiden name, after her marriage and the death of her husband, without any change in her registration, although irregular and contrary to instructions, will be counted where there is no question of identity.
  - *In re Morganroth Election Contest*, 50 Pa. D. & C. 143 (1944): In the absence of fraudulent intent on the part of the voter or of the election officers

030269

or of any conspiracy between them, the failure of an election board to require each elector desiring to vote first to sign a voter's certificate, and to compare the signature on such certificate with the elector's signature in the district register, is a mere irregularity not warranting rejection of entire vote cast in district.

- *Commw. v. Albert*, 30 A.2d 184 (Pa. Super. Ct. 1943): Each member of election board must be on guard to prevent any form of fraud or irregularity that would interfere with a fair election, and if irregularity or fraud being perpetrated in course of election is detected, appropriate action should be taken immediately to stop such misconduct. Election inspector having numbered list of voters and record of those who assisted voters and inspector whose duties included comparing signatures of those desiring to vote were under a duty to prevent persons not registered as qualified electors from signing the names of electors to voters' certificates
- *In re General Election in City and County of Philadelphia on November 8, 1938*, 2 A.2d 301 (Pa. 1938): Where city registration commissioners and their agents failed properly to file registration cards in the election districts in which electors resided, substitution of affidavits to duplicate original registration forms for missing registration cards would not be authorized, but voters could establish their right to vote by secondary evidence before judges qualified to sit in the common pleas. The requirement of this section that voter's registration card be in the district register of voter's election district is a mere aid in the proof of the existence of the record showing voter's qualifications, as a part of a public record. The rule that contents of a lost or missing record may be proved by secondary evidence is applicable to registration cards showing voter's qualifications.
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **First time voters:**
      - **UNTIL OCT 8:**
        - All first time voters must produce photo identification prior to voting at the polls. Pa. Stat. Ann. tit. 25, § 3050 (a) (2004).
        - If the voter has no photo identification, they must produce alternative identification with name and address. Pa. Stat. Ann. tit. 25, § 3050 (a.1) (2004).
        - If no identification at all, the voter must sign an affidavit and cast a provisional ballot. Pa. Stat. Ann. tit. 25, § 3050 (a.2), (a.4)(2) (2004).
      - **AFTER OCT 8 (changes underlined):**
        - All first time voters must produce photo identification prior to voting at the polls, and election officer must sign affidavit that the identification was examined. Pa. Stat. Ann. tit. 25, § 3050 (a) (2004).

- If the voter has no photo identification, they must produce alternative identification with name and address, and election officer must sign affidavit that the identification was examined. Pa. Stat. Ann. tit. 25, § 3050 (a.1) (2004).
- If no identification at all, the voter must sign an affidavit and cast a provisional ballot. Pa. Stat. Ann. tit. 25, § 3050 (a.2), (a.4)(2) (2004).
- Procedure for challenging provisional ballots goes into effect on Oct. 8. Pa. Stat. Ann. tit. 25, § 3050 (a.4)(4) (2004).
- **All voters:**
  - All voters must sign a voter's certificate, and their signature is compared with the signature on file. Pa. Stat. Ann. tit. 25, § 3050 (a.3) (2004).
- **First time voters or all?**
  - First time voters in the county or voters that have moved within the county – all who are new registrants who vote in person, not just those who registered by mail. Pa. Stat. Ann. tit. 25, § 3050 (a)-(a.2) (2004); Pennsylvania Voter Guide, 3, <http://www.dos.state.pa.us/voting/lib/voting/guide/engguide.pdf>.
  - Absentee voters who vote for the first time must submit identification either with their registration or with their ballot if they registered by mail only. Commonwealth of Pennsylvania, State Plan As Amended, As Required by Public Law 107-252, The Help America Vote Act of 2002, 28, [http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004\\_state\\_plan\\_elements\\_6\\_10\\_12\\_to\\_be\\_sent\\_to\\_eac--approved\\_\(08-13-04\)1.doc](http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004_state_plan_elements_6_10_12_to_be_sent_to_eac--approved_(08-13-04)1.doc).
- **When?**
  - At polls for voters who vote in person. Pa. Stat. Ann. tit. 25, § 3050 (a) (2004); Commonwealth of Pennsylvania, State Plan As Amended, As Required by Public Law 107-252, The Help America Vote Act of 2002, 28, [http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004\\_state\\_plan\\_elements\\_6\\_10\\_12\\_to\\_be\\_sent\\_to\\_eac--approved\\_\(08-13-04\)1.doc](http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004_state_plan_elements_6_10_12_to_be_sent_to_eac--approved_(08-13-04)1.doc).
  - At either registration or with ballot for absentee voters. Commonwealth of Pennsylvania, State Plan As Amended, As Required by Public Law 107-252, The Help America Vote Act of 2002, 28, [http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004\\_state\\_plan\\_elements\\_6\\_10\\_12\\_to\\_be\\_sent\\_to\\_eac--approved\\_\(08-13-04\)1.doc](http://www.hava.state.pa.us/hava/lib/hava/stateplan/2004_state_plan_elements_6_10_12_to_be_sent_to_eac--approved_(08-13-04)1.doc).
- **What types of ID?**
  - UNTIL OCT 8, 2005 & AFTER OCT. 8 – photo identification (types of identification are the same):
    - Valid driver's license or identification card issued by Department of Transportation

030271

- Valid identification card issued by another State agency
- Valid identification issued by federal government
- Valid passport
- Valid student identification card
- Valid employee identification card
- Valid military identification card
- Pa. Stat. Ann. tit. 25, § 3050 (a) (2004).
- UNTIL OCT. 8 & AFTER OCT. 8 – alternative identification types:
  - Nonphoto identification issued by PA or agency of
    - Voter identification card – not in statute but listed as acceptable form on website. Pennsylvania Department of State Website, <http://www.hava.state.pa.us/hava/cwp/view.asp?a=1189&q=442312>
  - Nonphoto identification issued by federal government
  - Firearm permit
  - Current utility bill
  - Current bank statement
  - Paycheck
  - Government check
  - Pa. Stat. Ann. tit. 25, § 3050 (a.1) (2004).
- **State or federal elections?**
  - Both. Pa. Stat. Ann. tit. 25, § 3050 (2004).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Pa. Stat. Ann. tit. 25, § 3050 (a.2) (2004).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit. Pa. Stat. Ann. tit. 25, § 3050 (a.4)(2) (2004).
- **Challenge available at polls?**
  - Yes. Pa. Stat. Ann. tit. 25, § 2685 (2004); Pa. Stat. Ann. tit. 25, § 2687 (2004); Pa. Stat. Ann. tit. 25, § 3528 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 1, 2005  
**RE:** States for ID requirements chart: Rhode Island

---

### Rhode Island

#### Summary:

Rhode Island does not require any identification of voters by State law. State law requires that voters state their name and address and sign a ballot application. R.I. Gen. Laws § 17-19-24 (2004). The only identification requirements that apply to voters are the federal HAVA requirements for first time voters who register by mail. It appears, however, from Rhode Island's election website that Rhode Island extends the requirement to all elections, not just federal elections. Rhode Island Voter Registration Form, <http://www.elections.state.ri.us/docs/VR6-04.pdf>. Without identification, voters may vote a provisional ballot, as required by federal law. Rhode Island Board of Elections: Frequently Asked Questions, <http://www.elections.state.ri.us/frequent.htm>.

There is a bill pending in the House which would require voters to present either one form of identification with the name, address, and photo of the voter or two forms of identification with the name and address of the voter. HB 5976, 2005-2006 Legis. Sess. (R.I. 2005).

- **Statutes:** R.I. Gen. Laws § 17-19-24 (2004). [But no statute implementing HAVA requirements]
  - **Passed:**
    - § 17-19-24 – at least since 1994 – probably a lot longer
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - HB 5976, 2005-2006 Leg. Sess. (R.I. 2005): requiring all voters to present one form of identification with the name, address, and photo of the voter or two forms with the name and address of the voter. [3/23/05 Committee hearing]
- **Case law (from annotations):** none
- **Administrative regulations:** none, and has no administrative code.
- **What the law requires:**
  - **Is ID required?**
    - **For registration or polls/HAVA:**
      - First time voters who mailed their registration must provide identification either at polls or at registration – HAVA requirement. (no state statute) Rhode Island Board of Elections: Registering to Vote, <http://www.elections.state.ri.us/registration/intro.htm>; Rhode Island Voter Registration Form, <http://www.elections.state.ri.us/docs/VR6-04.pdf>.

030274

- **At polls/all voters:**
      - All voters must state their name and address at the polls and sign their name on a ballot application. R.I. Gen. Laws § 17-19-24 (2004).
- **First time voters or all?**
  - First time voters who mail their registration. Rhode Island Board of Elections: Registering to Vote, <http://www.elections.state.ri.us/registration/intro.htm>; Rhode Island Voter Registration Form, <http://www.elections.state.ri.us/docs/VR6-04.pdf>.
- **When?**
  - Registration or polls. Rhode Island Board of Elections: Registering to Vote, <http://www.elections.state.ri.us/registration/intro.htm>.
- **What types of ID?**
  - Either a copy of a current and valid photo identification OR a copy of a current utility bill, bank statement, government check, paycheck, or government document that shows the voter's name and address.
  - Rhode Island Board of Elections: Registering to Vote, <http://www.elections.state.ri.us/registration/intro.htm>; Rhode Island Voter Registration Form, <http://www.elections.state.ri.us/docs/VR6-04.pdf>
- **State or federal elections?**
  - Probably both. Doesn't seem to be a distinction made, most materials say "when voting for the first time" rather than "when voting for the first time in a federal election." Rhode Island Voter Registration Form, <http://www.elections.state.ri.us/docs/VR6-04.pdf>.
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Rhode Island Board of Elections: Frequently Asked Questions, <http://www.elections.state.ri.us/frequent.htm>.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - None beside provisional vote. R.I. Gen. Laws § 17-19-24.1 (2004).
- **Challenge available at polls?**
  - Yes, watchers and election officials may challenge at polls. R.I. Gen. Laws § 17-19-22 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Sarah Shive  
**DATE:** August 31, 2005  
**RE:** States for ID requirements chart: South Carolina

---

### South Carolina

#### Summary:

South Carolina requires voters to present a valid South Carolina driver's license or other photographic South Carolina identification, if the voter does not have a driver's license. S.C. Code Ann. §7-13-710. A voter may also present their signed registration notification. *Id.*

South Carolina has not codified provisions for voter identification when voters register in person or via mail. The state's voter registration by mail form offers evidence that they comply with the Help America Vote Act of 2002 in their actual identification requirements, but have made no state law related to the matter.

There are also no state statutes related to the consequences of having no identification when appearing at the polls.

- **Statutes:**
  - **Passed:**
    - **§7-13-710** – 1962; 1988 permitted registration notification to be used as identification if signed.
- **Session law/recent legislation passed:**
  - None.
- **Pending legislation:**
  - **2005 SC H.B. 3451:** proposes to add a U.S. passport as a form of identification that may be presented by a voter at the polls (Feb. 3, 2005)
  - **2005 SC H.B. 3461:** proposes to add a photographic college identification card as identification that may be presented by a voter at the polls if they do not have a driver's license (Feb. 3, 2005)
- **Case law (from annotations):**
  - None
- **Administrative regulations:**
  - None.
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - No statutes address the matter.
    - **At polls:**
      - At the polls, voters are required to present a valid South Carolina driver's license or other photographic South Carolina identification, if the voter does not have a driver's license. A signed copy of the voter's registration confirmation may also be presented if the voter does not have a driver's license.
  - **First time voters or all?**

030278

- All
- **When?**
  - At the polls before voting.
- **What types of ID?**
  - When registering by mail: No statutes address the matter.
  - When registering in person: No statutes address the matter.
  - At the polls: Voters are required to present a valid South Carolina driver's license or other photographic South Carolina identification, if the voter does not have a driver's license. A signed copy of the voter's registration confirmation may also be presented if the voter does not have a driver's license.
- **State or federal elections?**
  - Both
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - No statutes address the matter.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - No statutes address the matter.
- **Challenge available at polls?**
  - Yes.

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jaime Molbreak  
**DATE:** August 30, 2005  
**RE:** Voter Identification – South Dakota

---

### South Dakota

#### Summary

In order to cast a ballot in an election, South Dakota voters must present themselves to the precinct worker in charge of the registration list, announce their name and show valid photo identification. S.D. CODIFIED LAWS § 12-18-6.1 (Michie 2005). If the voter does not have a valid identification card, the voter must complete a personal identification affidavit. § 12-18.6.2. A member of the election board must verify that the picture on the ID matches the voter. § 12-18.6.3. The name on the ID must also match the name on the voter registration list. *Id.* If the election board worker cannot make this verification, the worker may consider other forms of identification, personal knowledge, and the voter's explanation. *Id.* If the voter's identity cannot be proven to the satisfaction of the election board the voter may vote a provisional ballot. *Id.* This is significant because between 5 percent and 10 percent of South Dakota's Native American population lack a photo ID due to poverty.<sup>1</sup> §12-1-1 of S.D. CODIFIED LAWS (2005) provides that the provisions in Title 12 that follow apply to elections for state and local officers. In certain counties, a person proficient in both local Sioux dialect and English must be present in all precincts of the county. § 12-3-10. South Dakota does not offer early voting.<sup>2</sup>

- **Statutes** S.D. CODIFIED LAWS § 12-4-5.5 (Michie 2005); S.D. CODIFIED LAWS § 12-19-2.1 (Michie 2005)
  - **Passed**
    - The legislature recently voted to amended § 12-4-5.5 to include a check for authenticity of a driver's license number or social security number at the time voter registration information is transmitted from a county to the statewide voter registration file. HB 1007.
    - Additionally, the legislature amended § 12-19-2.1, permitting absentee voting on the day of an election. HB 1110.
- **Session Law / Recent Legislation Passed**
  - See above
- **Pending Legislation**
  - SB 120, 80<sup>th</sup> Gen. Assem. 2005 Reg. Sess. (S.D. 2005) failed a vote in the Senate, but was proposed to allow a voter who is recognized by election judges to vote without photo identification or affidavit.

<sup>1</sup> Information from [www.reformelections.org](http://www.reformelections.org) (August 30, 2005).

<sup>2</sup> National Conference of State Legislatures, <http://www.ncsl.org/programs/legman/elect/absentearly.htm> (August 30, 2005).

- **Case Law (from annotations)**
  - None
- **Administrative Regulations**
  - None
- **What the Law Requires**
  - **Is ID Required?**
    - **For Registration:**  
Provide driver's license number or last four digits of social security number. These will be subject to a review for authenticity pursuant to aforementioned recent legislation. If a person does not have a driver license or social security number, the person may only register at the county auditor's office and must sign a statement to that effect. § 12-4-5.4.
    - **At Polls:**  
A voter requesting a ballot must present a valid form of identification. § 12-18-6.1. If a voter is not able to present a form of personal identification as required by § 12-18-6.1, the voter may complete an affidavit in lieu of the personal identification.
    - **Absentee Voters:**  
Recent legislation provides that absentee voting is permitted on the day of an election. See HB 1110. The election board compares the signature on the statement on the ballot return envelope with the signature on the written application received from the auditor. § 12-19-10.
  - **First-time voters or all?**  
All.
  - **When?**  
At the polls.
  - **What types of ID?**  
A voter must announce their name and present either a South Dakota driver's license or non-driver identification card; a passport or an identification card, including a picture, issued by an agency of the United States government; a tribal identification card, including a picture; or an identification card, including a picture, issued by an accredited institution of higher education, including a university, college, or technical school, located within the State of South Dakota. § 12-18-6.1.
  - **Consequences of having no ID (provisional ballot v. regular ballot)**  
If the voter's identity can't be proven to the satisfaction of the election board, the voter may vote a provisional ballot. § 12-18.6.3.
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**  
If the voter does not have a valid identification card, the voter must complete a personal identification affidavit. § 12-18-6.2. The affidavit requires the voter to provide his or her name and address.

▪ **Challenge available at polls?**

Yes. A voter may only be challenged as to their identity or on grounds that within fifteen days preceding the election the person has been convicted of a felony or declared by proper authority to be mentally incompetent. The proceedings are to be conducted before the precinct superintendent and precinct deputies who must determine from the evidence presented whether or not the person is permitted to vote. § 12-18-10. Pursuant to § 12-18-39, If any person is successfully challenged under § 12-18-10, the person may cast a provisional ballot.

### Tennessee

#### Summary:

In Tennessee, registrars must verify that the voter's signature and information on the application for ballot matches the signature and information on the duplicate permanent registration record, if the county is not computerized. Tenn. Code Ann. §2-7-112 (2005). If the county is electronic, then the registrar must compare the voter's signature and information on the computerized signature list with other evidence of identification supplied by the voter. *Id.* "Evidence of identification" means a valid voter's registration certificate, Tennessee driver license, social security card, credit card bearing the applicant's signature or other document bearing the applicant's signature. *Id.*

If the voter's eligibility to vote at a particular precinct cannot be determined, the voter may vote provisionally with verification of the voter's residential address. *Id.* The type of verification includes, but is not limited to, a Tennessee driver license, a residential lease agreement, a utility bill or other document bearing the applicant's residential address. *Id.*

If the voters register by mail, they must present satisfactory proof of identity before voting. §2-2-115(b)(7) (2005).

There are two bills that are pending which would require the voter to present a photo identification to the registrar or two forms of identification that state the name and address of the voter. 2005 TN S.B. 1595 (SN); 2005 TN H.B. 196 (SN).

- **Statutes:** Tenn. Code Ann. §2-7-112 (2005).
  - 2003 added provisions to set out the procedures used for casting a provisional ballot
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - 2005 TN S.B. 1595 (SN), 104<sup>th</sup> Gen. Assem.: amends §2-7-112(a)(1) and requires the voter to present to the registrar one form of identification that bears the name, address and photograph of the voter or two different forms of identification that bear the name and address of the voter [introduced 2/3/05]
  - 2005 TN H.B. 196 (SN), 104<sup>th</sup> Gen. Assem.: amends §2-7-112(a)(1) and requires the voter to present to the registrar one form of identification that bears the name, address and photograph of the voter or two different forms of identification that bear the name and address of the voter [introduced 2/1/05]

- **Case law (from annotations):**
  - none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For registration:**
      - If registering by mail: before voting, voter must present satisfactory proof of identity. This does not apply to a voter who is on the permanent absentee voting register. §2-2-115(b)(7) (2005).
    - **At polls:**
      - After registrar verifies that the voter's signature and information on the application for ballot matches the signature and information on the duplicate permanent registration record, he will initial the application, which will serve as the voter's identification for a paper ballot or for admission to a voting machine. Tenn. Code Ann. §2-7-112(a)(1) (2005).
      - **Computerized county:**
        - Registrar must compare the voter's signature and information on the computerized signature list with other evidence of identification supplied by the voter. §2-7-112(a)(2)(B) (2005).
    - **Provisional voter:**
      - Voter must present verification of the residential address under which the person desires to vote. §2-7-112(a)(3)(A)(i) (2005).
    - **Early voting at polls:**
      - Upon completion of the application, the administrator of elections shall compare the signature of the voter with the signature on the voter's permanent registration record, or other evidence of identification if computerized duplicate registration records are used. §2-6-109(a) (2005).
  - **First time voters or all?**
    - All. §2-7-112 (2005).
  - **When?**
    - At the polls. §2-7-112 (2005).
  - **What types of ID?**
    - For purposes of comparing the person's signature on the application for ballot, "evidence of identification" shall be a valid voter's registration certificate, Tennessee driver license, social security card, credit card bearing the applicant's signature or other document bearing the applicant's signature. §2-7-112(c) (2005).
    - For purposes of registering a voter to vote provisionally, "verification of residential address" shall include, but is not limited to, a Tennessee driver license, a residential lease agreement, a

utility bill or other document bearing the applicant's residential address. §2-7-112(d) (2005).

- **State or federal elections?**
  - All elections. §2-7-112 (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. §2-7-112(a)(3)(A) (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Must execute an affidavit of identity. §2-7-112(a)(2)(D) (2005).
- **Challenge available at polls?**
  - Yes. §2-7-123 (2005).

## MEMORANDUM

**TO:** Sara Sampson

**DATE:** July 5, 2005  
**RE:** States for ID requirements chart: Texas

---

### Texas

#### Summary:

Texas law requires that first time voters who registered by mail provide proof of identity. Tex. Elec. Code Ann. § 13.122 (2004). The forms of identification include: (1) driver's license or state identification card; (2) photo identification of any kind; (3) birth certificate; (4) citizenship papers; (5) passport; (6) official mail from a government entity; (7) current utility bill, bank statement, government check, paycheck, or other government document that shows the voter's name and current address. Tex. Elec. Code Ann. § 63.0101 (2004). Voters may submit the proof of identity at the polls or with their registration. Texas Voter Registration Form, <http://www.sos.state.tx.us/elections/forms/vr17.pdf>.

Under Texas law, all voters must present their voter registration certificate prior to voting. Tex. Elec. Code Ann. § 63.001 (2004). Without the registration certificate (and voter is on precinct list of voters), the voter may only vote a regular ballot if he executes an affidavit that he does not have his voter registration certificate and shows proof of identification (same forms as above). Tex. Elec. Code Ann. § 63.008 (2004). If the voter does not have his registration certificate and is not on the precinct list of voters, he must execute an affidavit that he is a registered voter and is eligible to vote and vote a provisional ballot. Tex. Elec. Code Ann. § 63.009 (2004). However, if the precinct worker can determine the voter is eligible from identification presented, the voter may execute an affidavit that he does not have his certificate and vote a regular ballot. *Id.*

All voters must also sign the signature roster. Tex. Elec. Code Ann. § 63.002 (2004).

Texas recently passed HB 2309, which had required voter identification in earlier versions, but the enrolled version did not include the provisions. There were several bills pending this session which would have required voter identification at the polls, but most died in committee. HB 1706 is still pending and would require voters to present their voter registration certificate and two forms of identification (same forms as for proof of identity now). HB 1706, 79<sup>th</sup> Legis., Reg. Sess. (Tex. 2005).

#### • Statutes:

- Tex. Elec. Code Ann. § 63.001 (2004): must present voter registration certificate at polls.
- Tex. Elec. Code Ann. § 63.002 (2004): must sign signature register.
- Tex. Elec. Code Ann. § 63.006 (2004): voter with certificate not on the list may vote.
- Tex. Elec. Code Ann. § 63.008 (2004): without registration certificate (and on the precinct list of voters), voter must execute affidavit that he/she does

030285

not have the certificate with him/her and must present identification (otherwise, the voter votes provisionally).

- Tex. Elec. Code Ann. § 63.009 (2004): without registration certificate (and not on the precinct list of voters), voter must execute affidavit that he/she is a registered voter and is eligible and vote provisionally; however, if the precinct worker can determine that the voter is eligible from identification presented, the voter may execute an affidavit that he does not have the certificate and vote a regular ballot.
- Tex. Elec. Code Ann. § 63.0101 (2004): ID forms
- **Passed:**
  - § 63.001 – 1985
  - § 63.002 – 1985
  - § 63.006 – 1985
  - § 63.008 – 1985; amended in 1997, 2003
  - § 63.009 – 1985; amended in 1997, 2003
  - § 63.0101 – 1997; amended in 2003
- **Session law/recent legislation passed:** Texas passed HB 2309, which had required voter identification in an earlier version, but the voter identification provisions were dropped from the bill passed.
- **Pending legislation:**
  - HB 1706, 79<sup>th</sup> Leg., Reg. Sess. (Tex. 2005): would require voter to present voter registration certificate and two forms of identification (same list as currently used for proof of identity) [2/28/05 introduced; 5/3/05 passed House with amendments; 5/5/05 referred to Senate committee].
- **Case law (from annotations):**
  - *Deffebach v. Chapel Hill Independent School Dist.*, 650 S.W.2d 510 (Tex. App. 12 Dist. 1983): In regard to provision of V.A.T.S. Election Code art. 8.07 (repealed; but replaced) requiring voters to sign an affidavit upon failing to present to the election officials a current voter registration certificate, compliance with the provisions of such article were directory and not mandatory.
  - *Gottlieb v. Hofheinz*, 523 S.W.2d 7 (Tex. Civ. App. 1975), dismissed: Absent allegation and proof that certain votes were fraudulently induced or cast, voters in question were not disqualified merely because precinct judges did not acknowledge the affidavit pages they signed which stated that their voter registration certificates were missing or lost; provisions of former Election Code were directory.
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **First time voters/HAVA:**
      - First time voters who register by mail must provide proof of identification. Tex. Elec. Code Ann. § 13.122 (2004).
    - **At polls/all voters:**
      - Must present voter registration certificate. Tex. Elec. Code Ann. § 63.001 (2004).

- Without voter registration certificate (and voter is on precinct list of voters), the voter may vote a regular ballot if he executes an affidavit that he does not have his voter registration certificate and shows proof of identification. Tex. Elec. Code Ann. § 63.008 (2004).
- Without voter registration certificate (and not on the precinct list of voters), voter must execute affidavit that he is a registered voter and is eligible to vote and vote a provisional ballot. However, if the precinct worker can determine that the voter is eligible from identification presented, the voter may execute an affidavit that he does not have the certificate and vote a regular ballot. Tex. Elec. Code Ann. § 63.009 (2004).
- All accepted voters must sign signature roster. Tex. Elec. Code Ann. § 63.002 (2004).
- **First time voters or all?**
  - Looks like all voters have a requirement. First time voters who registered by mail must satisfy the requirement with proof of identity; all other voters may use either their registration certificate or proof of identity document. Tex. Elec. Code Ann. § 13.122 (2004); Tex. Elec. Code Ann. § 63.001 (2004); Tex. Elec. Code Ann. § 63.008 (2004); Tex. Elec. Code Ann. § 63.008 (2004).
- **When?**
  - For first time voters who registered by mail either at the polls or with registration. Texas Voter Registration Form, <http://www.sos.state.tx.us/elections/forms/vr17.pdf>.
  - However, all voters are required to present either proof of identity or a registration certificate at the polls.
- **What types of ID?**
  - All voters & first time voters – these documents are proof of identity:
    - (1) a driver's license or personal identification card issued to the person by the Department of Public Safety or a similar document issued to the person by an agency of another state, regardless of whether the license or card has expired;
    - (2) a form of identification containing the person's photograph that establishes the person's identity;
    - (3) a birth certificate or other document confirming birth that is admissible in a court of law and establishes the person's identity;
    - (4) United States citizenship papers issued to the person;
    - (5) United States passport issued to the person;
    - (6) official mail addressed to the person by name from a governmental entity;

- (7) a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter; or
  - (8) any other form of identification prescribed by the secretary of state.
  - Tex. Elec. Code Ann. § 63.0101 (2004).
- **State or federal elections?**
    - All elections.
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - With no voter registration certificate and no identification, the voter must vote provisionally. Tex. Elec. Code Ann. § 63.008 (2004); Tex. Elec. Code Ann. § 63.0011 (2004).
    - First time voters without identification must vote provisionally too.
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - Execute affidavit that he is a registered voter and is eligible to vote. Tex. Elec. Code Ann. § 63.0011 (2004).
  - **Challenge available at polls?**
    - All voters may challenge registration. Tex. Elec. Code Ann. § 16.091 (2004).
    - Poll challengers permitted at the polls, but they may only suggest that an irregularity has occurred to election officials. Tex. Elec. Code Ann. § 33.056 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 6, 2005  
**RE:** States for ID requirements chart: Utah

---

### Utah

#### Summary:

Utah requires either proof of identity or proof of residence for first time voters who mailed their registration. Utah Code Ann. § 20A-3-104 (2005); Utah Code Ann. § 20A-2-202 (2005). This may be provided either at registration or at the polls. Utah Code Ann. § 20A-2-202 (2005). Without identification, the voter may vote a provisional ballot. Utah Code Ann. § 20A-3-104 (2005).

All other voters must announce their name and, if requested, their address prior to voting. *Id.* If the election official does not know the voter, he *may* request identification (proof of residence or identity) or that the voter be identified by another voter. *Id.*

There are two pending bills related to voter identification. SB 67 would require voters to present one form of identification with their name, address, and photo or two forms of identification with their name and address. SB 67, 56<sup>th</sup> Legis., 2005 Gen. Sess. (Utah 2005). The Senate and House have each passed different versions of this bill. SB 267 would allow election day registration, which may or may not affect provisional balloting (some states with election day registration do not have provisional balloting).

- **Statutes:** Utah Code Ann. § 20A-3-104 (2005) & Utah Code Ann. § 20A-2-202 (2005).
  - **Passed:**
    - § 20A-3-104 – 1953, reenacted in 1993; HAVA compliant section added in 2003.
    - § 20A-2-202 – 1953, reenacted in 1993; HAVA compliant section added in 2003.
- **Session law/recent legislation passed:** none significant to voter identification.
- **Pending legislation:**
  - SB 67, 56<sup>th</sup> Leg., 2005 Gen. Sess. (Utah 2005): voter must present one form of identification with name, current address, and photo of voter or two forms of identification with name and current address. [2/25/05 passed Senate, failed House, 3/2/05 sent back to Senate]
  - SB 267, 56<sup>th</sup> Leg., 2005 Gen. Sess. (Utah 2005): to allow election day registration. [2/24/05 second reading]
- **Case law (from annotations):** none
- **Administrative regulations:** none

030290

- **What the law requires:**
  - **Is ID required?**
    - **For first time mail in registrants:**
      - Proof of identity or residence required. Utah Code Ann. § 20A-3-104 (2005); Utah Code Ann. § 20A-2-202 (2005).
    - **At polls/all voters:**
      - Must announce his/her name and, if requested, his/her address. If the election official does not know the voter and has reason to doubt the voter's identity, the official may request identification or have the voter identified by another registered voter. Utah Code Ann. § 20A-3-104 (2005).
  - **First time voters or all?**
    - Identification is only *required* of first time voters. It may be requested of all voters. Utah Code Ann. § 20A-3-104 (2005).
  - **When?**
    - Either at registration or at the polls. Utah Code Ann. § 20A-2-202 (2005).
  - **What types of ID?**
    - Either proof of identification or proof of residence satisfies requirement. Utah Code Ann. § 20A-2-202 (2005).
    - Proof of identity: photo identification that establishes identity (such as driver's license or identification card). Utah Code Ann. § 20A-1-102 (2005).
    - Proof of residence: some official document or form that establishes a person's residence (such as driver's license or utility bill). Utah Code Ann. § 20A-1-102 (2005).
    - Utah Voter Information Pamphlet lists driver's license, state identification card, passport, current utility bill, government check, paycheck, and other document that shows name and current address as acceptable identification. Utah Voter Information Pamphlet, 74, [http://elections.utah.gov/Voter%20Information%20Pamphlet\\_web.pdf](http://elections.utah.gov/Voter%20Information%20Pamphlet_web.pdf).
  - **State or federal elections?**
    - Both. Utah Code Ann. § 20A-3-104 (2005).
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Provisional Ballot. Utah Code Ann. § 20A-3-104 (2005).
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - None. Utah Code Ann. § 20A-3-105.5 (2005).
  - **Challenge available at polls?**
    - Yes. Utah Code Ann. § 20A-3-202 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 6, 2005  
**RE:** States for ID requirements chart: Vermont

### Vermont

#### Summary:

In Vermont, voters who are voting for the first time and registered by mail must present identification prior to voting. Vt. Stat. Ann. tit. 17, § 2563 (2004). This identification may be presented at any time prior to voting, including at registration. *Id.* The types of identification permitted are the same as the types permitted under HAVA. *Id.* Without identification, a voter may vote a provisional ballot. *Id.* This requires completing an attestation, and the voter may only vote for candidates for federal office. Vt. Stat. Ann. tit. 17, § 2556 (2004).

All voters must state their name and, if requested, their address prior to voting. Vt. Stat. Ann. tit. 17, § 2563 (2004). No identification is required of voters besides the requirement for first time voters who registered by mail. *Id.*

There are no pending bills or recent bills passed concerning voter identification.

- **Statutes:** Vt. Stat. Ann. tit. 17, § 2563 (2004).
  - **Passed:**
    - § 2563 – 2003 identification requirement for first time voters added
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - none
- **Case law (from annotations):** none
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **First time voters who registered by mail:**
      - Identification required for first time voters who registered by mail. Vt. Stat. Ann. tit. 17, § 2563 (2004).
    - **At polls/all voters:**
      - State name and, if requested, address. No identification required. Vt. Stat. Ann. tit. 17, § 2563 (2004).
  - **First time voters or all?**
    - First time voters who registered by mail only. Vt. Stat. Ann. tit. 17, § 2563 (2004).
  - **When?**
    - Either registration, some time prior to the election, or at the polls. Vt. Stat. Ann. tit. 17, § 2563 (2004).

030292

- **What types of ID?**
  - (1) A valid photo identification; (2) copy of a current utility bill; (3) copy of a current bank statement; (4) or copy of a government check, paycheck, or any other government document that shows the current name and address of the voter. Vt. Stat. Ann. tit. 17, § 2563 (2004).
- **State or federal elections?**
  - Seems to be all elections. However, when a voter votes provisionally, he may only vote for federal candidates. Vt. Stat. Ann. tit. 17, § 2563 (2004); Vt. Stat. Ann. tit. 17, § 2556 (2004).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Vt. Stat. Ann. tit. 17, § 2563 (2004).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit & vote for federal candidates only. Vt. Stat. Ann. tit. 17, § 2556 (2004).
- **Challenge available at polls?**
  - Challenge permitted by challengers appointed by a political party, candidate, or issue group. Vt. Stat. Ann. tit. 17, § 2564 (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 7, 2005  
**RE:** States for ID requirements chart: Washington

---

### Washington

#### **Summary:**

Recently, Washington passed two bills concerning voter identification. 2005 Wash. Laws 243; 2005 Wash. Laws 246. 2005 Wash. Laws 243 is effective July 24, 2005, and 2005 Wash. Laws 246 is effective January 1, 2006. These new laws require all voters to present identification at the polls in the form of a photo identification, bank statement, paycheck, government check, or other government document. 2005 Wash. Laws 243. They also require first time voters who register by mail (regardless of voting method) to provide identification (forms similar to above list) prior to voting at the polls. 2005 Wash. Laws 246.

Until the new laws take effect, only first time voters who register by mail are required to present identification. All other voters must merely state their name and sign the precinct record. Wash. Rev. Code § 29A.44.201 (2005); Wash. Admin. Code § 434-253-040 (2005).

There are several bills pending in the legislature. All of these bills require photo identification.

#### • **Statutes:**

- 2005 Wash. Laws 243 – new voter identification law for all voters at the polls (effective 7/24/05)
- 2005 Wash. Laws 246 – voter identification law applying to first time voters who registered by mail only (effective 1/1/06)
- Wash. Rev. Code § 29A.44.201 (2005) – current law until 7/24/05
- **Passed:**
  - § 29A.44.201 – 2004
  - 2005 Wash. Laws 243 (SB 5499) – 2005
  - 2005 Wash. Laws 246 (SB 5743) – 2005

#### • **Session law/recent legislation passed:**

- 2005 Wash. Laws 243, sec. 7: all voters required to present identification at the polls (forms: voter registration card, any current and valid government-issued photo identification, driver's license, state identification card, passport, tribal identification card, military ID card, or a copy of a current utility bill, bank statement, paycheck, government check or other government document) [signed by governor 5/3/05, effective 7/24/05]
  - SB 5499, 59<sup>th</sup> Leg., 2005 Reg. Sess. (Wash. 2005)

- 2005 Wash. Laws 246, sec. 7: any voter who registered by mail and indicated that he did not have a social security number, driver's license, or state identification card must provide identification prior to voting (this requirement includes voters voting by mail and at the polls) [signed by governor 5/3/05, effective 1/1/06]
  - SB 5743, 59<sup>th</sup> Leg., 2005 Reg. Sess. (Wash. 2005)
- **Pending legislation:**
  - HB 2158, 59<sup>th</sup> Leg., 2005 Reg. Sess. (Wash. 2005): require identification containing photo and signature at polls. [2/28/05 committee hearing]
  - SB 6075, 59<sup>th</sup> Leg., 2005 Reg. Sess. (Wash. 2005): require identification containing photo and signature at polls. [3/3/05 introduced, referred to committee]
  - HB 2226, 59<sup>th</sup> Leg., 2005 Reg. Sess. (Wash. 2005): require identification containing photo and signature at polls (only driver's license, state identification card, or passport acceptable). [2/24/05 introduced, referred to committee]
  - SB 5400, 59<sup>th</sup> Leg., 2005 Reg. Sess. (Wash. 2005): require voters to show photo identification and registration verification. [1/24/05 introduced, referred to committee]
- **Case law (from annotations):** none
- **Administrative regulations:**
  - Wash. Admin. Code § 434-253-040 (2005): verification of voter's name.
- **What the law requires:**
  - **Is ID required?**
    - **First time voters who registered by mail:**
      - Now: Must provide identification prior to voting regardless of whether voter is voting at the polls or by mail. 2005 Wash. Laws 246, sec. 7 (effective 1/1/06).
      - Prior to new law: HAVA only.
    - **At polls - all voters:**
      - Now: All voters must provide identification prior to signing poll book. 2005 Wash. Laws 243, sec. 7.
      - Prior to new law: Announce name and sign record only. Wash. Rev. Code § 29A.44.201 (2005); Wash. Admin. Code § 434-253-040 (2005).
  - **First time voters or all?**
    - All voters have a similar identification requirement. 2005 Wash. Laws 243, sec. 7; 2005 Wash. Laws 246, sec. 7.
  - **When?**
    - At polls. 2005 Wash. Laws 243, sec. 7; 2005 Wash. Laws 246, sec. 7.
  - **What types of ID? [requirements for all voters and first time voters are similar]**
    - **At polls – all voters:**
      - Current and valid photo identification, including: voter registration card, any current and valid government-issued

photo identification, driver's license, state identification card, passport, tribal identification card, and military ID card.

- Other identification, including: copy of current utility bill, bank statement, government check, paycheck, and any other government document.
- 2005 Wash. Laws 243, sec. 7.
- **First time voters who registered by mail:**
  - (a) Valid photo identification;
  - (b) A valid enrollment card of a federally recognized Indian tribe in Washington state;
  - (c) A copy of a current utility bill;
  - (d) A current bank statement;
  - (e) A copy of a current government check;
  - (f) A copy of a current paycheck; or
  - (g) A government document that shows both the name and address of the voter.
  - 2005 Wash. Laws 246, sec. 7.
- **State or federal elections?**
  - Both. 2005 Wash. Laws 243, sec. 7; 2005 Wash. Laws 246, sec. 7.
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional Ballot. 2005 Wash. Laws 243, sec. 7; 2005 Wash. Laws 246, sec. 7.
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Sign affidavit. 2005 Wash. Laws 243, sec. 6.
- **Challenge available at polls?**
  - No, only election officials may challenge at the polls. Wash. Rev. Code § 29A.44.201 (2005).
- **Miscellaneous:**
  - Has vote by mail for precincts with less than 200 active registered voters, and Washington recently passed a law permitting vote by mail for any precinct with permission of the county. Wash. Rev. Code § 29A.48.010 (2005); 2005 Wash. Laws 241.

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 7, 2005  
**RE:** States for ID requirements chart: West Virginia

---

### West Virginia

#### Summary:

The identification requirements under West Virginia law are the same as required under HAVA. W. Va. Code § 3-2-10 (2005). These requirements apply to local, state, and federal elections. Without identification, a voter is permitted to vote a provisional ballot. *Id.*

While West Virginia allows voters to register by mail with only the HAVA requirements for identification, voters who register in person are required to present identification and proof of age. W. Va. Code § 3-2-7 (b) (2005).

No recent laws passed or bills pending.

- **Statutes:** W. Va. Code § 3-2-10 (2005); W. Va. Code § 3-1-34 (2005).
  - **Passed:**
    - § 3-2-10 – 2003
    - § 3-1-34 – 1981
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - none
- **Case law (from annotations):**
  - *State ex rel. Bumgardner v. Mills*, 53 S.E.2d 416 (W. Va. 1949): The purpose of the legislature in enacting the provisions of this section (§ 3-1-34) requiring the signature of the clerk on the back of the ballot was to guard against and prevent fraud in an election.
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For first time voters who registered by mail:**
      - Any voter who registers by mail who has not yet voted in the State (if statewide system set up) or in the county (prior to statewide system) must provide identification. W. Va. Code § 3-2-10 (g) (2005).
    - **Registration:**
      - For voters who register in person, they are required to present valid identification and proof of age. W. Va. Code § 3-2-7 (b) (2005).
    - **At polls/all voters:**
      - State name and sign poll book. W. Va. Code § 3-1-34 (a) (2005).

030299

- **First time voters or all?**
  - Only first time voters who register by mail who have not voted in the State before. W. Va. Code § 3-2-10 (g) (2005).
- **When?**
  - Anytime prior to voting. W. Va. Code § 3-2-10 (g) & (i) (2005).
- **What types of ID?**
  - A current and valid photo identification; or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. W. Va. Code § 3-2-10 (g) (2005).
- **State or federal elections?**
  - Both. W. Va. Code § 3-2-10 (g) (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. W. Va. Code § 3-2-10 (g) & (h) (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Looks like none. W. Va. Code § 3-1-41 (2005).
- **Challenge available at polls?**
  - Yes. W. Va. Code § 3-1-34 (d) (2005); W. Va. Code § 3-1-41 (2005).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 7, 2005  
**RE:** States for ID requirements chart: Wisconsin

---

### Wisconsin

#### Summary:

Wisconsin does not require identification beyond HAVA for voters who registered by mail and are voting for the first time in a national election. Wis. Stat. § 6.36 (2)(c)(2) (2004). It also only requires identification in national elections, not for state and local elections. *Id.* The identification forms are the same as permitted under HAVA. Wis. Stat. § 5.02 (6m) (2004). Without identification, a voter may vote a provisional ballot; the provisional ballot only counts if the voter brings identification to the clerk's office by 4 p.m. the day after election day. Wis. Stat. § 6.97 (2004); Wisconsin State Elections Board, Voter Information: Frequently Asked Questions, [http://elections.state.wi.us/faq\\_detail.asp?faqid=142&fid=27&fname=&linkid=](http://elections.state.wi.us/faq_detail.asp?faqid=142&fid=27&fname=&linkid=).

Wisconsin has in-person late registration and election day registration. Wis. Stat. § 6.29 (2004). This requires proof of residence (many forms acceptable) or an affidavit as to the residence of the voter by another registered voter. *Id.* All other voters must only provide their name and address prior to voting. Wis. Stat. § 6.79 (2)(c), (3) (2004).

There are several bills pending which would require photo identification of all voters prior to voting. One of these bills passed both houses and was vetoed by the governor in May. Another similar bill has passed both houses recently.

- **Statutes:** Wis. Stat. § 6.79 (2004); Wis. Stat. § 6.36 (2004)
  - **Passed:**
    - § 6.36 – 2003
    - § 6.79 – since at least 1989, probably since 1965
- **Session law/recent legislation passed:** none
- **Pending legislation:**
  - AB 63, 97<sup>th</sup> Legis. Sess., Reg. Sess. (Wis. 2005): require all voters to show a WI driver's license, state identification card, or military identification card. [5/2/05 vetoed, 5/3/05 failed to override veto]
  - SB 42, 97<sup>th</sup> Legis. Sess., Reg. Sess. (Wis. 2005): require all voters to show a WI driver's license, state identification card, or military identification card; provisional ballot to those without identification; identification cards free. [6/15/05 passed Senate, 6/23/05 passed Assembly]
  - AJR 36: requires photo identification to vote at the polls. [5/3/05 introduced, 5/31/05 to committee]
- **Case law (from annotations):**
  - *State ex rel. Hopkins v. Olin* 23 Wis. 309 (Wis. 1868): Proof, by residents of a town or village, that no such persons as some whose names are on the poll

030300

list as having voted at the election, were known by the witnesses to have resided in such town or village, will authorize the jury to find that such names are fictitious, or belong to persons who were not legal voters in such town or district, unless other proof to the contrary is given.

- *State v. Trask* 115 N.W. 823 (Wis. 1908): The provisions of St.1898, §§ 23, 61 that one whose name was not on the registry as completed could not vote except on presenting an affidavit showing certain facts as to his qualification, was not unreasonable or inconsistent with his right to vote, as secured by the Constitution.
- **Administrative regulations:** none
- **What the law requires:**
  - **Is ID required?**
    - **For first time voters who registered by mail:**
      - Voters who registered by mail and have not yet voted in an election for national office. Wis. Stat. § 6.36 (2)(c)(2) (2004).
    - **At polls/all voters:**
      - All other voters must provide their name and address prior to voting. Wis. Stat. § 6.79 (3) (2004).
    - **Registration:**
      - Election day or in-person late registration: requires proof of residence – see “miscellaneous” below. Wis. Stat. § 6.29 (2004).
  - **First time voters or all?**
    - Just first time voters and just federal elections. Wis. Stat. § 6.36 (2)(c)(2) (2004).
      - Currently, the requirement applies to voters voting for the first time in the county; on Jan. 1, the requirement will apply to voters voting for the first time in the State. Wis. Stat. § 6.36 (2)(c)(2) (2004).
  - **When?**
    - At polls. Wis. Stat. § 6.36 (2)(c)(2) (2004).
  - **What types of ID?**
    - Current and valid photo identification or a copy of a utility bill, bank statement, paycheck, or a check or other document issued by a unit of government that shows the current name and address of the elector. Wis. Stat. § 5.02 (6m) (2004).
  - **State or federal elections?**
    - “Elections for national office.” Wis. Stat. § 6.36 (2)(c)(2) (2004).
  - **Consequences of having no ID (provisional ballot v. regular ballot?)**
    - Provisional ballot. Wis. Stat. § 6.97 (2004).
  - **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
    - Provide identification in the municipal clerk’s office by 4 p.m. the day after election day. Wisconsin State Elections Board, Voter Information: Frequently Asked Questions, [http://elections.state.wi.us/faq\\_detail.asp?faqid=142&fid=27&fname=&linkid=](http://elections.state.wi.us/faq_detail.asp?faqid=142&fid=27&fname=&linkid=)

- **Challenge available at polls?**
  - Yes. Wis. Stat. § 6.925 (2004); Wis. Admin. Code § 9.02 (2005).
- **Miscellaneous:**
  - Registration not required in all municipalities.
  - Has late registration and election day registration, which requires identification. Wis. Stat. § 6.29 (2004).
    - Affidavit that voter is qualified to the best of his knowledge. Wis. Stat. § 6.55 (2004).
    - Identification required:
      - Proof of residence OR affidavit as to the voter's residence made by another registered voter and proof of residence for that voter. Wis. Stat. § 6.29 (2004).
        - Proof of residence: must include voter's name and current residence address (WI driver's license, state identification card, other identification card issued by WI or employer, credit card, library card, check cashing card, tax bill, lease, tuition bill, student identification card, pilot's license, or utility bill). Wis. Stat. § 6.55 (7) (2004).

## MEMORANDUM

**TO:** Sara Sampson  
**FROM:** Jamie LaPlante  
**DATE:** July 8, 2005  
**RE:** States for ID requirements chart: Wyoming

---

### Wyoming

#### **Summary:**

Wyoming does not require identification beyond HAVA for voters who registered by mail and are voting for the first time in a Wyoming federal election. Wyo. Stat. Ann. § 22-3-118 (b) (2005). It also only requires identification in federal elections, not for state and local elections. *Id.* The identification forms are the same as permitted under HAVA. *Id.* Without identification, a voter may sign an affidavit and vote a provisional ballot; the provisional ballot only counts if the voter brings identification to the clerk's office the day after election day. Wyo. Stat. Ann. § 22-3-118 (2005); Wyo. Stat. Ann. § 22-15-105 (2005).

There are no pending bills concerning voter identification. However, Wyoming recently passed a bill adding tribal identifications to the list of acceptable identifications. 2005 Wyo. Sess. Laws 130.

- **Statutes:** Wyo. Stat. Ann. § 22-3-118 (2005).
  - **Passed:**
    - § 22-3-118 – 2004
- **Session law/recent legislation passed:**
  - 2005 Wyo. Sess. Laws 130 (HB 325): adds tribal identification as an acceptable identification. [2/25/05 signed by governor – effective 7/1/05]
- **Pending legislation:** none
- **Case law (from annotations):** none
- **Administrative regulations:** Secretary of State Regulation Issued October 1, 2004.
- **What the law requires:**
  - **Is ID required?**
    - **First time voters who register by mail:**
      - First time voters who register by mail and have not previously voted in a Wyoming federal election are required to provide identification prior to voting. Wyo. Stat. Ann. § 22-3-118 (b) (2005).
  - **First time voters or all?**
    - Just first time voters. Wyo. Stat. Ann. § 22-3-118 (2005).
  - **When?**
    - Prior to voting – anytime. Wyo. Stat. Ann. § 22-3-118 (2005).
  - **What types of ID?**
    - Current & valid photo identification, utility bill, bank statement, paycheck, government check, or other government document with the voter's name and address. Wyo. Stat. Ann. § 22-3-118 (b) (2005).

030304

- The Secretary of State promulgated guidelines further defining identification for the purposes of voting or registration and added these specific forms:
  - Passport
  - Driver's license or state identification card (any state)
  - Identification card issued by Federal Government
  - Military identification card
  - Certificate of citizenship
  - Certificate of naturalization
  - Military draft record
  - Voter registration card from another State or County
  - Certificate of birth abroad issued by Department of State
  - Birth certificate
  - Any other form of identification issued by official agency of the U.S. or a State
  - Secretary of State Regulation Issued October 1, 2004.
- **State or federal elections?**
  - Federal only. Wyo. Stat. Ann. § 22-3-118 (b) (2005).
- **Consequences of having no ID (provisional ballot v. regular ballot?)**
  - Provisional ballot. Wyo. Stat. Ann. § 22-3-118 (2005).
- **Consequences of having no ID (affidavit, bring ID later, none, recite DOB & address)**
  - Affidavit. Wyo. Stat. Ann. § 22-15-105 (2005).

AND

  - Bring identification the day after the election in order for vote to count. Wyo. Stat. Ann. § 22-3-118 (2005); Wyo. Stat. Ann. § 22-15-105 (2005).
- **Challenge available at polls?**
  - Not by poll watchers or other voters. Only election judges may challenge. Wyo. Stat. Ann. § 22-15-101 (2005); Wyo. Stat. Ann. § 22-15-105 (2005); Wyo. Stat. Ann. § 22-15-109 (2005).

## **EAC to Launch Comprehensive Study of Voter ID Laws**

For Immediate Release  
March 30, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report, which focused on only one election cycle, was not sufficient to draw any conclusions. The Commission declined to adopt the report, but is releasing all of the data to the public.

The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov). The Commission's statement regarding its decision is attached.

“After careful consideration of the initial research, the Commission decided this important issue deserves a more in-depth research approach, and that it should be examined beyond only one election cycle,” said EAC Chair Donetta Davidson. “The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers.”

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting, including the agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

EAC's future research on this topic will be expanded to include more than one federal election, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC's comprehensive research approach will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation. EAC will use some of the information collected by the contractor as well as additional data from the states to develop this baseline.

- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification.
- Study how voter identification provisions that have been in place for two or more federal elections have impacted voter turnout, voter registration figures, and fraud.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###

# **EAC Statement on Study of Voter Identification Requirements**

## **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, [www.eac.gov](http://www.eac.gov).

## **EAC Declines to Adopt Draft Report**

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.

---

<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

---

<sup>4</sup> See Transcript of EAC Public Meeting, February 8, 2007, page 109.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject I've been sending stuff to your personal email address!

Sorry about that! Here's what I sent out earlier:

Commissioners,

Based upon the revised tally vote language, I have made edits to the press release and to the Q&A. Please let me know if you have any edits. I plan to release this tomorrow if the tally vote is completed by then. Also, please pay special attention to the following answer I have composed, which is in the Q&A document. I will notify you before issuing the press release.

**Q: What are your specific objections/concerns with the methodologies utilized by Eagleton?**

A: First of all, we agree with the contractor that we should examine more than one federal election. Regarding the methodologies, the contractor conducted two analyses that had different outcomes. The first analysis showed no statistically significant correlations. The second analysis, based on statistics from the Current Population Survey, showed some evidence of a correlation. Also, the categorization of voter identification requirements included classifications that do not require identification documentation, such as "state your name." The bottom line is that the research produced more questions than answers, and that's why EAC is expanding its efforts to examine this important issue.

## **OVERALL MESSAGE**

Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The preliminary research focused exclusively on the 2004 election, was insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors including, the many changes in state laws and regulations that have occurred since the 2004.

## **Q&A**

### **Q: Why not release the draft fraud report, too?**

A: EAC issued a final Voting Fraud and Voter Intimidation Report in December 2006, which included recommendations adopted by the Commission to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

In the case of the voter ID report, the Commission chose not to adopt a final report because it was determined that there was insufficient data to provide meaningful conclusions.

### **Q: You cited concerns with the contractor's methodology and analysis. Didn't your contract with Eagleton include specific language regarding these issues?**

A: Yes, but in retrospect, perhaps we could have done a better job articulating how we wanted this research to be conducted.

### **Q: What are your specific objections/concerns with the methodologies utilized by Eagleton?**

A: First of all, we agree with the contractor that we should examine more than one federal election. Regarding the methodologies, the contractor conducted two analyses that had different outcomes. The first analysis showed no statistically significant correlations. The second analysis, based on statistics from the Current Population Survey, showed some evidence of a correlation. Also, the categorization of voter identification requirements included classifications that do not require identification documentation, such as "state your name." The bottom line is that the research produced more questions than answers, and that's why EAC is expanding its efforts to examine this important issue.

### **Q: During the course of the project, did you see draft reports? If so, why didn't these concerns get addressed at that time?**

A: We did receive progress reports, and when we identified areas of concern, we discussed it with the contractor. It was because of these concerns that EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

**Q: During the course of the contract, did you ever express these concerns with Eagleton?**

A: Yes, and as a result of these conversations, EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

**Q: You spent more than \$500,000 for a report the Commission doesn't think should be adopted – so basically you're flushing a lot of money down the drain. Is this a wise use of taxpayer dollars?**

A: There is value in what Eagleton provided, and this included work they did for us regarding provisional voting. As a result of the research on provisional voting, EAC issued a set of best practices last fall. The voter ID data will help provide a baseline for how to move forward. And even though their research raised many questions, contemplating the answers to those questions has informed us on how to move forward.

**Q: If you were not satisfied with the final product, why did you pay for it?**

A: We adhered to the terms of the contract.

**Q: EAC received this data in June of last year. What has taken so long to bring it to a conclusion?**

A: This is an important issue, one that deserves careful deliberation and a thorough approach. Yes, we like to get things done quickly, but it is more important to take the time to get things right.

## **TRANSITION PHRASES**

To stay on message and avoid being dragged into discussions about anything other than the action taken, employ the following phrases and transition back to the overall message.

### ***Overall Message***

Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The preliminary research focused exclusively on the 2004 election, was insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors including, the many changes in state laws and regulations that have occurred since the 2004.

### ***Bridge/Transition Phrases***

- What's really important here...
- We are focused on moving forward, not going back...
- The bottom line is...
- The point is...
- We have a responsibility to...
- I'll let others speak to that, but let me tell you what's important to EAC...
- Everyone agrees that...

## **EAC to Launch Comprehensive Study of Voter ID Laws**

For Immediate Release  
March 30, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research focusing on only one election cycle was not sufficient to draw any conclusions. The Commission declined to adopt the report, but is releasing all of the data to the public. The information is available at [www.eac.gov](http://www.eac.gov), and the Commission's statement regarding its decision is attached.

“After careful consideration of the initial research, the Commission decided this important issue deserves a more in-depth research approach, and that it should be examined beyond only one election cycle,” said EAC Chair Donetta Davidson. “The Commission and our contractor agree that the research raises more questions than provides answers.”

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting, including the agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

EAC's future research on this topic will be expanded to include more than one federal election, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC's comprehensive research approach will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

# EAC Statement on Study of Voter Identification Requirements

## Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, [www.eac.gov](http://www.eac.gov).

## EAC Declines to Adopt Draft Report

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.
