OMB Control # 3265-0004

1. **Manufacturer Name:** Election Systems and Software

2. **Manufacturer Code:** ESS

3. **Version of Standards to be Used for Testing:** VVSG 1.0

4. **Voting System Name:** EVS 6.2.0.0

5. **System Model/Version Number:** See attached excel spreadsheet

6. **EAC Accredited VSTL:** Pro V&V

7. **Requested EAC Certification number:** ESSEVS6200

8. **Brief Description of System or system modification:**

Modification - ES&S Voting System 6.2.0.0 (EVS 62000 is a modification to the ES&S Voting System 6.1.0.0 (EVS6100) previously certified by the EAC on September 24, 2019.

ES&S Voting System 6.2.0.0 (EVS6200) presents a fully integrated suite of election management products that fully comply with the EAC Voluntary Voting System Guidelines, Version 1.0. This release introduces the DS950®, a high speed central count scanner and tabulator with ballot sorting capabilities. It also presents new ExpressVote configuration options; including, the CurbExpress Curbside Voting Cart, Ben Franklin Booth and Dual Express Cart. New DS200 products include the Ballot Trolley and Ballot Tote Bag.
EVS6200 introduces additional options for transmission of unofficial results data over closed networks. In addition to clients reading results media and the central tabulators transferring data across a closed network, the Regional Results application will provide the ability to read results media from the DS200, ExpressTouch, and ExpressVote XL and transmit the results collection files over a customer dedicated network via the Regional Results software for more efficient results reporting.
