Re: Election Systems & Software, Inc (ES&S) ECO-1190 Submitted for Approval

Dear Sue McKay

The EAC has reviewed Engineering Change Order **ECO-1190**, including supporting documentation and analysis provided by the voting system test lab. This minor change is adding a plastic stopper to block the output tray sensor arm from entering the recessed area of the DS950. This is intended to prevent the sensor arm from potentially getting stuck in the recessed area and causing a false bin full message and does not alter the system's reliability, functionality, capability, or operation. Based on the information provided, it has been determined that no further testing is necessary.

The systems impacted by this ECO are:

EVS 6.4.0.0
EVS 6.0.6.0
EVS 6.3.0.0
EVS 6.2.0.0
EVS 6.5.0.0

This correspondence is to inform you that Election Systems & Software, Inc (ES&S) **ECO-1190** is approved.

Sincerely,

Thomas Freitag
Field Services Specialist
U.S. Election Assistance Commission
